

**AUXILIUM COLLEGE (Autonomous)**  
**(Accredited by the NAAC with A+Grade with a CGPA of 3.55 in the 3<sup>rd</sup> Cycle)**

**Gandhi Nagar, Vellore – 632 006**

**ACADEMIC PROGRAMME - REGULATIONS**

**With effect from the Academic Year 2020 - 2021**

Auxilium College, an autonomous institution, follows the Semester Pattern with Choice Based Credit System (CBCS) of evaluation, requiring 3 years of study for an Undergraduate Degree Programme and 2 years of study for a Postgraduate Degree Programme. The duration of a semester is 90 days of instruction.

The CBCS offers internal assessment, inter-departmental academic collaboration and course credits. It offers freedom to the departments to design the course structure, to frame rules pertaining to academic programmes and also to introduce new study programmes. It aims at making the academic programme student-oriented, interdisciplinary, flexible and relevant to the times. Under this system, the students will have ample freedom to select the electives to suit their interest, aptitude and needs.

A curriculum is a programme of studies and/or activities (curricular, co-curricular and extra curricular). Arising from the basic needs and moving on to individual, social and cultural needs, the curriculum attempts to fulfill the ideal needs also, such as moral, intellectual, aesthetic and spiritual needs.

**Credit System**

The Autonomous status of the College offers a student the benefits of Choice Based Credit System. Every paper is allotted a certain number of credits. A student is awarded the specified credits on obtaining a pass in the respective paper.

The student has abundant opportunities during the course of study to obtain additional credits by doing Optional Certificate Courses offered by different Departments of the College. This facility will strengthen the academic potential of the student, as it provides flexibility in the choice of courses offered beyond the framework of the respective discipline of study. The introduction of the CBCS ensures compatibility with the academic norms practiced in other educational institutions of repute in India and abroad.

The structure of undergraduate programmes provides a wide range of choice for students to opt for courses based on their eligibility, aptitude and career goals. The undergraduate curriculum will include the following categories of courses in order to accomplish a holistic approach to undergraduate education.

offered by the respective Department. Allied courses complement the Major courses of Study.

**(iv) Part III –Major Electives/Project**

Each Department offers three papers, of which one may be a project. It will help the student to acquire knowledge in a specialised area of interest related to the core selected.

**(iv) Part IV – Courses in Tamil/ Non-Major Electives**

Each Department offers one/two papers during the last two semesters.

**(a) Basic Level Course in Tamil**

It is mandatory for a student who has not studied Tamil up to Std. XII and has taken a non-Tamil language under Part I, to do two Basic level courses in Tamil (The level is of Std. VI)

**(b) Advanced Level Course in Tamil**

It is mandatory for a student who has studied Tamil up to Std. XII and has taken a non-Tamil language under Part I, to take two Advanced level courses in Tamil.

**(c) Those who do not come under (a) or (b) above, will choose any two non-major electives offered by other departments.**

Each Department will offer to the students of other disciplines, courses with a syllabus containing fundamental concepts of the respective course. It will facilitate the student to acquire a basic knowledge of other disciplines and will enhance her competency for acquiring a suitable job.

The student is required to register her name for the course she opts for, with the department concerned, by the date specified.

**(v) Part IV – Skill-Based Electives**

They are job-oriented, skill-based and need-based courses designed to develop skills in the student to enhance her competency for acquiring a suitable job.

Every Department will offer at least one skill-based course per semester. This provides a wide choice for the student to select the course of her choice. Each student should take six skill-based electives, one in each semester. Each student may take two general skills, two soft skills and two skills in the core course of study.

The student is required to register her name for the course she opts for, with the department concerned, by the date specified. The number of students per course will be 30. (30 to 35, if needed)

**(vi) Part IV – Environmental Studies**

This paper offered in the fourth Semester provides awareness to the student regarding the basic concepts of environment and environment-related issues. It is intended to motivate the students to develop a positive attitude towards environmental concerns of the society. It is mandatory for every student to obtain a pass in this course as per the directives of the Supreme Court.

**(vii) Part IV – Value Education**

This course offered every semester, is intended to build up the moral values in the student. It also offers inputs for personality development and social consciousness.

**(viii) Part V - Extension Activities**

Extension Activities is a part of the Curriculum. A student should put in 90 hours of extension activity during the course of study. It includes service activities extended by a student through the Department or any service group of the College, to any marginalised community outside the College premises. It should be carried out after/before the regular working hours of the College, as the case may be. The Head of the Department/ the concerned staff-in-charge will certify for the work done by the student to earn the respective credits.

**(ix) Others**

**(a) Certificate Course in Computers**

**(b)**

A student should complete a basic course in Computers. This is to make the student computer literate. The student may or may not attend the classes offered by the College for the said course, but should appear for the examination in the course conducted by the College (and should obtain a Pass to complete the Degree Course).

**(c) Other Certificate Courses**

These courses are not a part of the curriculum. They are job-oriented, skill-based and need-based courses designed to develop skills in the student to enhance her opportunities for acquiring a suitable job.

The student may or may not attend the classes offered by the College for the said courses, but should appear for the examination in those courses conducted by the College and should obtain a pass to receive additional credits.

The duration of the Certificate Courses will be 75 hours per semester (2 semesters).

*Medium of Instruction and Examination* The medium of instruction and examination will be English. Distribution of Hours:

**(a) Undergraduates: B.A – 15 Weeks/Semester**

Part	Course	Hours/Week						Total Credits
		Sem I	Sem II	Sem III	Sem IV	Sem V	Sem VI	
I	Language: Tamil/Hindi	6	6	5	6	-	-	12
II	Part II: English	6	6	6	5	-	-	12

## Requirements of Attendance

1. The minimum requirement of attendance for a candidate is 75% per semester, to enable her to appear for the Semester Examinations.
2. If the attendance of a candidate is between 65 - 75%, due to any of the following reasons, the candidate is eligible to appear for the current Semester Examinations only after obtaining condonation from the Principal, by payment of the prescribed Condonation Fee:
  - a. Prolonged illness
  - b. Major surgery
  - c. Accident, which requires a long period of rest

The reason for the long period of absence should be informed to the Principal and the sanction obtained, within a week from the commencement of absence.

If the attendance of a candidate is between 55% - 65% in a semester, **she is not eligible to appear for the current Semester Examinations**. But she is permitted to appear for the arrear courses, if any. She is also permitted to move to the next Semester.

If the attendance of a candidate is below 55%, she is **not eligible to continue her studies** but can complete the Programme by re-joining the same Semester in the following academic year, if vacancy is available. She should obtain the approval from the University through the concerned Head of the Department and the Principal.

## TESTING, ASSESSING AND VALUATION

Each Undergraduate Programme consists of six Semesters.

There are two components in the Valuation and Assessment of a student - **Internal Assessment (CA)** and **Semester Examinations (SE)**.

### Continuous Assessment (CA):

1. The maximum marks for CA is 40 and SE is 60, both for theory and practical papers.
2. Each CA written examination is of two hours duration for 50 marks. The tests will be conducted centrally. The average of two such CA is calculated for 35 marks.
3. Other Innovative Components will be for 5 Marks

The innovative component is for 5 marks, conducted during the class hours by the Staff member in charge of the course, in the form of assignments/ quiz/ seminars /presentations/Online/Open Book/Viva Voce/ Group work/ Mini Project/ Exhibition,

etc. The topic and time for submission/ presentation will be announced by the staff member in charge of the course in advance. Each student should explain and defend her presentation.

4. For SBE courses: 2 CA examinations of one hour each for 25 Marks converted to 35 Marks. Other Innovative Components will be for 5 Marks. The Semester Examination will be of 2 hours duration for 60 Marks.
5. For Environmental Studies: One CA of one hour for 25 Marks, Project for 25 Marks, converted to 40 Marks. The Semester Examination will be of 2 hours duration for 60 Marks.
6. For major and allied papers, the Semester Examination will be of 3 hours with maximum 100 marks which will be converted to 60.
7. Syllabus of not less than two units shall be included for each CA.
8. A retest for CA will be conducted for those students who were absent due to participation in NSS/NCC/Sports activities on prior written permission obtained through the concerned staff member.
9. There is no passing minimum for CA.
10. There is no provision for improvement in CA.

### **Semester Examinations (SE)**

1. A student should register herself to appear for the Semester Examinations by payment of the prescribed fee.
2. The Semester Examinations will be in the form of a comprehensive examination covering the entire syllabus in each course. It will be of 3 hours duration, irrespective of the number of credits allotted to it.
3. If a candidate fails to obtain Pass marks even after the third attempt due to less marks in the CA examination, the marks of the next examination will be converted to be out of 100.
4. The maximum marks for each course shall be 100.

### **Valuation of Answer Scripts**

1. There shall be single valuation for Undergraduate, Postgraduate as well as M.Phil. Programmes. The Panel of Examiners will consist of internal and external examiners.
2. The valuation will be centralised.
3. A student has a maximum period of five years from the Date of Admission to clear all the course prescribed for the Programme at the time of her admission.

After the fifth year, to complete the programme, the student has to appear for an examination in the same/equivalent paper offered under the revised syllabus structure. Fraction of final marks in CA and SE shall be rounded off to the nearest integer.

#### Revaluation

1. A student can apply for the photocopy of answer scripts, if needed, on payment of the prescribed fee.
2. A student can apply for revaluation of any course, on payment of the prescribed fee within the specified date. Receipt of the photocopy of the answer script is a pre-requisite for revaluation.

#### Supplementary Examination

After the declaration of the results of the final semester, a student who has only one paper in any semester can apply by the specified date, for Supplementary Examination, either for reappearance or for improvement. This facility is available only for those students who have not obtained a pass due to one paper or want to improve performance in one paper. The examination will be conducted and results published within a month of the first publication of the result.

#### Improvement:

The facility to improve one's performance in any paper(s) is offered to all the students. A student, who wishes to improve her performance in any paper(s), may apply for the examination in the same, if the examination is conducted in that paper(s) during that particular semester/ Supplementary Examination. This provision is available till the Supplementary Examination after the final semester examination.

#### Note:

A student can report any grievance regarding CA or SE, to the Controller of Examinations, who in turn, will present the same to the Examination Committee, chaired by the Principal.

### CA and SE for Laboratory and Practical Work

CA		SE	
Components	Marks	Components	Marks
Performance during regular practicals	10	Record	10
Regularity and submission of Observation Notebook and Record	5	Practical Examination	45
Practical Examination	25	Viva	5
<b>Total</b>	<b>40</b>	<b>Total</b>	<b>60</b>

#### Passing Minimum:

A candidate shall be declared to have passed in a course if she secures

For Undergraduate Programme	For Postgraduate Programme
40% and above in the SE. If a candidate fails in any paper, she shall be required to appear only for the SE in the respective paper.	50% and above in the SE. If a candidate fails in any paper, she shall be required to appear only for the SE in the respective paper.

#### Classification of Successful Candidates:

Conversion of Marks to Grade Points and Letter Grade:

Range of Marks	Grade Points	Letter Grade	Description
90 - 100	9.0 – 9.5	O	Outstanding
80 – 89	8.0 – 8.9	D+	Excellent
75 – 79	7.5 – 7.9	D	Distinction
70 – 74	7.0 – 7.4	A+	Very Good
60 – 69	6.0 – 6.9	A	Good
50 – 59	5.0 – 5.9	B	Average
40 – 49 #	4.0 – 4.9	C	Satisfactory
00 – 39	0.0	U	Re-appear
ABSENT	0.0	AA	ABSENT

## Calculation of Grade Point Average

Based on the grades obtained by a candidate, the Grade Point Average (GPA) is calculated as follows:

$$\text{Grade Point Average (GPA)} = \frac{\sum_{i=1}^C G_i}{\sum_{i=1}^C C_i}$$

i.e.,  $\text{GPA} = \frac{\text{Sum of the multiplication of Grade Points by the credits of the courses}}{\text{Sum of the credits of the courses in a Semester}}$

Where  $C_i$  = Credits earned for course  $i$  in any semester

$G_i$  = Grade Point obtained for course  $i$  in any semester

**For the Entire Programme:**

Based on the grades obtained by a candidate for the entire programme, the Cumulative Grade Point Average (CGPA) is calculated as follows:

$$\text{Cumulative Grade Point Average (CGPA)} = \frac{\sum \sum \frac{C_n G_n}{n}}{\sum C_n}$$

i.e.,  $\text{CGPA} = \frac{\text{Sum of the multiplication of Grade Points by the credits of the entire programme}}{\text{Sum of the credits of the courses of the entire programme}}$

Where  $C_i$  = Credits earned for course  $i$  in any semester

$G_{nj}$  = Grade Point obtained for course  $i$  in any semester

$n$  refers to the Semester in which such courses were credited.

The final classification is based on the following Grade Conversion Table:

CGPA	GRADE	CLASSIFICATION OF FINAL RESULT
9.5 – 10.0	O+	First Class with Exemplary*
9.0 and above but below 9.5	O	
8.5 and above but below 9.0	D++	First Class with Distinction*
8.0 and above but below 8.5	D+	
7.5 and above but below 8.0	D	
7.0 and above but below 7.5	A++	First Class
6.5 and above but below 7.0	A+	
6.0 and above but below 6.5	A	
5.5 and above but below 6.0	B+	Second Class
5.0 and above but below 5.5	B	
4.5 and above but below 5.0	C+ #	Third Class
4.0 and above but below 4.5	C #	
0.0 and above but below 4.0	U	Re-appear

\* The candidates who have passed in the first appearance and within the prescribed semester of the U.G. programme (Major, allied and elective courses alone) are eligible.

# Only applicable to U.G. Programme

### **Ranking of Successful Candidates**

Ranking will be based on CGPA. Candidates who passed in all the examinations prescribed for the Programme in the very first appearance only are eligible for ranking.

### **Important Note:**

It is mandatory for a student to secure a Pass in the Certificate Course in Computers as well as to fulfill the 90 hour-requirement of the Extension Activities, in order to be declared as **'Programme Completed'**. Only such a candidate is eligible to receive the Diploma.

Malpractices:

**Resolved that the following norms be followed in dealing with the cases of malpractices in CA/Semester Examinations.**

<b>S.No.</b>	<b>Nature of Malpractice</b>	<b>Action Suggested</b>
1.	Appeal by a candidate for favourable consideration or mercy in the answer script	Warn the candidate
2.	Letter of appeal for favourable consideration, promising bribe in cash or kind.	Cancel the examination taken in that particular Course only
3.	Candidate writing her own name in any part of the answer book	Warn the candidate
4.	Candidate writing her own Register Number in any part of the answer book other than on the front page	Warn the candidate
5.	Possessing notes or books relevant to the course of the examination	Cancel the examination taken in that particular Course only
6.	Possessing notes or books relevant to the course of the examination (repeated)	Cancel the examinations taken previously and not to allow to appear for the remaining examinations in that Semester
7.	Using or copying from notes or books relevant to the course of the examination	Cancel the examination taken in that particular Course only
8.	Using or copying from the answer scripts of other candidates	Cancel the examination taken by both the candidates in that particular Course only
9.	Inserting pre-written answer sheet(s) brought from outside, in the main answer book.	Cancel the examinations taken previously and not to allow to appear for the remaining examinations in that Semester
10.	Threatening or assaulting the Invigilator or behaving in any insubordinate manner	Cancel the examination taken

11.	Manhandling or injuring any examination personnel	Cancel the examination taken
12.	Impersonation	Cancel the examination taken and debar from the examination for the next three years
<b>S.No.</b>	<b>Nature of Malpractice</b>	<b>Action Suggested</b>
13.	Tampering with spelling/ name /initials in any certificate	The candidate has to produce fresh certificates and a fine of ₹ 1,000/-
14.	Tampering with the Date of Birth in the certificate issued by the College	The candidates should not be permitted to appear for any examination of this College for a period of two years from the date of submission of documents and not to pursue any course of studies for the corresponding period
15.	Tampering with the Grade Certificate or any other Certificate issued by the College	The College will retain the tampered certificate and duplicate certificate will not be issued for three years from the date of presentation of documents. The candidate should not pursue any course of studies in this College for the corresponding period

Important Note:

The above rules are intended to guide the Examination Committee and to be judiciously applied to any form of malpractice by candidates.

**The decision of the Principal shall be final in all matters pertaining to the Academic Programme.**

---

## **PROGRAMME OUTCOMES (PO) (INSTITUTIONAL LEVEL)**

**PO1:**Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:**Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:**Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:**Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:**Emulate positive social values and exercise leadership qualities and team work.

**PO6:**Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## **PROGRAMME SPECIFIC OUTCOME (DEPARTMENT LEVEL)**

**On completion of B.A. Programme in English, students will be able to**

**PSO1** - Remember the principles of Literature in general and English Literature in particular and understand its typological, critical, socio cultural aspects (K1, K2)

**PSO2** - Attain fluency, accuracy and a good command in the four skills (listening, speaking, reading and writing) of English Language (K3)

**PSO3** - Apply the knowledge of form, structure, history and contextual cultural diversity and comprehend the applications of the English Language in practice (K3)

**PSO4** - Appreciate life, think critically, and develop positive, interpersonal relationship with fellow humans (K4, K5)

**PSO5** - Discern avenues for higher learning, career options, and venture entrepreneurship (K4)

**PSO6** - Formulate research questions and identify relevant approaches and sources to find answers/solutions for questions/problems related to Language, Communication, Art and Culture. (K5, K6)

## Course Syllabus

### Unit I – Theory

**Knowledge Component: K1-K4**

**(15 Hours)**

- 1.1. Phonetics
- 1.2. Consonants, Voiced and Voiceless Sounds
- 1.3. Place of Articulation
- 1.4. Familiar and Unfamiliar Symbols
- 1.5. Transcribing Sounds
- 1.6. Manner of Articulation

### Unit II – Theory

**Knowledge Component: K1-K4**

**(15 Hours)**

- 2.1 Consonant Chart
- 2.2 Glottal Stops and Flaps
- 2.3 Vowels
- 2.4 Diphthongs
- 2.5. American and British

#### Diphthongs

- 2.6. Subtle Individual Variation

### Unit III - Theory

**Knowledge Component: K1-K4**

**(15 Hours)**

- 3.1. Phonology
- 3.2. Phonemes
- 3.3. Natural Classes
- 3.4. Phones and Allophones
- 3.5. Complementary Distribution and Minimal Pairs
- 3.6. Phonotactics

**Unit IV – Theory**

**Knowledge Component: K1-K4**

**(15 Hours)**

- 4.1. Syllables
- 4.2. Coarticulation Effects
- 4.3. Assimilation
- 4.4. Nasalization
- 4.5. Elision
- 4.6. Normal Speech

**Unit V: Practice**

**Knowledge Component: K1-K4**

**(15 Hours)**

- 5.1. Phonemic Symbols for Vowels
- 5.2. Phonemic Symbols for Consonants
- 5.3. Sound pairs in Vowels
- 5.4. Sound pairs in Consonants
- 5.5. Word Stress: Practice
- 5.5. Sentence Stress: Practice

## **Course Syllabus**

- Unit I: Introduction to International Business** (18 hours)
- 1.1 International Business - Meaning- Definition (K1,K2)
  - 1.2 Globalization - Meaning (K1,K2)
  - 1.3 Stages in Globalization (K1,K2,K3)
  - 1.4 Drivers of Globalization (K1,K2)
  - 1.5 Difference between Domestic and International trade (K1,K2,K3)
  - 1.6 Entry Strategies (K1,K2,K3,K4)
- Unit II: International Business Environment** (18 hours)
- 2.1 International business environment (K1,K2,K3)
  - 2.2 Cultural aspects (K1,K2,K3)
  - 2.3 Social structure (K1,K2,K3)
  - 2.4 Political, Legal and Economic factors (K1,K2,K3)
  - 2.5 General agreement on trade and tariffs (K1,K2,K3)
  - 2.6 World Trade Organization – Functions (K1,K2,K3)
- Unit III: Multinational Corporation** (18 hours)
- 3.1 Multinational corporation – Definition – Meaning (K1,K2,)
  - 3.2 Trans nationality index – Network spread index (K1,K2,K3)
  - 3.3 Organizational models (K1,K2,K3)
  - 3.4 Dominance of MNCs – MNC’s and International Trade (K1,K2,K3)
  - 3.5 Merits – Demerits of MNC’s (K1,K2,K3)
  - 3.6 Perspective – code of conduct – Multinationals in India (K1,K2,K3)
- Unit IV: Foreign Direct Investment** (18 hours)
- 4.1 Foreign direct investment (K1,K2,K3)
  - 4.2 Need for FDI (K1,K2,K3)
  - 4.3 Factors influencing FDI (K1,K2,K3)
  - 4.4 Problems in patent laws in international scenario (K1,K2,K3)
  - 4.5 IMF (K1,K2,K3)
  - 4.6 World Bank and ADB (K1,K2,K3)
- Unit V: Foreign Exchange Market** (18 hours)
- 5.1 Foreign exchange market – Functions – Nature (K1,K2,K3)
  - 5.2 Exchange rate determination (K1,K2,K3)
  - 5.3 Financial factors and balance of payments: disequilibrium and correction (K1,K2,K3)
  - 5.4 Currency convertibility (K1,K2,K3)
  - 5.5 General principles of CSR (K1,K2,K3)
  - 5.6 Social responsibility & Ethics in International Business (K1,K2,K3)

**SEMESTER – III****UEBAB20 – LOGISTICS AND SUPPLY CHAIN MANAGEMENT**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: III</b>	UEBAB20	Logistics and Supply Chain Management	Theory	Elective	5	5	100

**Objectives**

1. To familiarize the students with the basic concepts of logistics and its types
2. To implement a broad understanding of logistics decision, planning and cost
3. To develop an understanding of Supply Chain Management, Supply Chain Software
4. To enable the students to understand the concept of inventory, warehousing and Supply Chain Interface
5. To understand the activities involved in distribution network planning and Integrated Supply Chain Management

**Course Outcomes (CO)**

The learners will be able to

1. Aware of the basic concepts of logistics and its types
2. Learn about the logistics decision, logistics planning and logistics cost
3. Develop an understanding of Supply Chain Management, Supply Chain Software
4. Gain knowledge about inventory, warehousing and Supply Chain Interface
5. Be enriched about the activities involved in distribution network planning and Integrated Supply Chain Management

**H- High (3), M- Moderate (2), L- Low (1)**

## **Course Syllabus**

### **UNIT I Introduction (15 Hours)**

- 1.1 Logistics management – Definition – Meaning (K1, K2)
- 1.2 Types of logistics organization structure (K1)
- 1.3 JIT (K2)
- 1.4 Measures of logistics (K1, K2)
- 1.5 Qualitative measures (K1)
- 1.6 Quantitative measures (K1, K2)

### **UNIT II Logistics Planning (15 Hours)**

- 2.1 Logistics planning (K1)
- 2.2 Goal of logistics planning (K1, K2)
- 2.3 Key Factors in logistics planning (K1, K2)
- 2.4 Logistics Decision (K2)
- 2.4 Logistics Cost (K1)
- 2.6 Strategies (K1, K2)

### **UNIT III Supply Chain Management (15 Hours)**

- 3.1 Supply Chain Management (K1, K2)
- 3.2 Definition – Objectives (K1, K2)
- 3.3 Types of Supply Chain Management (K1, K2, K3)
- 3.4 Supply Chain Performance (K1, K2, K3)
- 3.5 Supply Chain Software (K1, K2)
- 3.6 Pitfalls in Supply Chain Management (K1, K2)

### **UNIT IV Inventory Management (15 Hours)**

- 4.1 Inventory – Order Processing (K1, K2, K3)
- 4.2 Purchasing – Warehousing (K1, K2)
- 4.3 Material Handling – Packaging (K1, K2, K3)
- 4.4 Customer Service Management (K1, K2, K3)
- 4.5 Marketing and Supply Chain Interface (K1, K2, K3)
- 4.6 Finance and Supply Chain Interface (K1, K2, K3)

### **UNIT V Decision Support System (15 Hours)**

- 5.1 Distribution and Network Planning and Warehouse Location (K1, K2)
- 5.2 Integrated supply (K1)
- 5.3 Decision Support Models of Supply Chain Management (K1, K2)
- 5.4 Transportation System (K1)
- 5.5 Warehouse Design (K1, K2)
- 5.6 Transshipment (K1, K2, K3)

**SEMESTER – III/IV****USBAC320/USBAC420 – HOSPITAL PLANNING AND ADMINISTRATION**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem:</b>	USBAC320	Hospital Planning and Administration	Theory	Skill Based Elective	2	2	100
III/IV	/USBAC420						

**Objectives**

1. To enable the students to understand the planning of Modern Hospital
2. To familiarize the students with Organization Structure and Medical Records of a Hospital
3. To make the students understand the importance of Hospital Waste Management
4. To assimilate the concept of Customer Experience Management to students in hospitals
5. To provide adequate knowledge about Clinical Support Services in Hospital

**Course Outcomes (CO)**

The learners will be able to

1. Understand and attain knowledge in the planning of Modern Hospital
2. Be familiarized with Organization Structure and Medical Records of a Hospital
3. Identify the importance of Hospital Waste Management
4. Understand the Customer Experience Management
5. Acquire adequate knowledge about Clinical Support Services in Hospitals

CO5	M	H	M	M	M	L

**H- High (3), M- Moderate (2), L- Low (1)**

## **Course Syllabus**

### **Unit I: Introduction to Hospital**

**(6 Hours)**

- 1.1 Hospital – Introduction (K1,K2)
- 1.2 Classification of Hospitals (K1,K2)
- 1.3 Some important considerations in Hospitals (K1,K2,K3)
- 1.4 Planning of Modern Hospital (K1,K2,K3,K4)
- 1.5 Basic requirements of a Hospital (K1,K2)
- 1.6 Computer aided Diagnosis - Expert Systems-Structure (K1,K2,K3)

### **Unit II: Organization Structure and Medical Records**

**(6 Hours)**

- 2.1 Organization Structure- Unique features of a Hospital (K1,K2,K3)
- 2.2 Structure and Context factors -Organizational structure – Structural dimensions of an organization (K1,K2,K3)
- 2.3 Organizational designs (K1,K2,K3)
- 2.4 Medical Records- Responsibilities (K1,K2,K3)
- 2.5 Computerization (K1,K2,K3)
- 2.6 Legal Aspects- Retention (K1,K2,K3)

### **Unit III: Hospital Waste Management**

**(6 Hours)**

- 3.1 Hospital Waste Management (K1,K2)
- 3.2 Waste Group- Infectious waste management- Categories (K1,K2,K3)
- 3.3 Waste collection (K1,K2,K3)
- 3.4 Waste disposal (K1,K2,K3)
- 3.5 Waste treatment (K1,K2,K3)
- 3.6 Waste minimization options (K1,K2,K3)

### **Unit IV: Customer Experience Management**

**(6 Hours)**

- 4.1 Customer Experience Management-Types (K1,K2,K3)
- 4.2 Customer Based factors - Meaning-Characteristics (K1,K2,K3)
- 4.3 Profitability of loyal customers (K1,K2,K3)
- 4.4 Environmental based factors (K1,K2,K3)
- 4.5 Customer Experience Management Framework (K1,K2,K3)
- 4.6 Design of customer experience (K1,K2,K3)

### **Unit V: Clinical Support Services**

**(6 Hours)**

- 5.1 Chaplain and counseling - Pharmacy – Laboratories (K1,K2,K3)
- 5.2 Blood Bank – Radiology -Diagnostic service – Nuclear medicine (K1,K2,K3)
- 5.3 Patient Relations in Hospital- Process and practice of Patient Relations (K1,K2,K3)
- 5.4 Patient Relations applied to Support Services (K1,K2,K3)
- 5.5 Paradigm shift to Quality-TQM- ISO 9000 series (K1,K2,K3,K4)
- 5.6 Benefits of ISO Certification (K1,K2,K3)

**SEMESTER – IV****UCBAH20 – COST AND MANAGEMENT ACCOUNTING**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: IV</b>	UCBAH20	Cost and Management Accounting	Problem	Core	6	4	100

**Objectives**

1. To enable the students understand the concept of Management and Cost Accounting
2. To make the learners understand the elements of Cost and methods of Costing
3. To enable the students understand and prepare Financial Statement Analysis
4. To give practical knowledge over the most important tools of analysis and interpretation of Financial Statements
5. To make understand the learners and to give practical knowledge over the most important techniques of Management Accounting

**Course Outcomes (CO)**

The learners will be able to

1. Gain knowledge on the concepts of management and cost accounting techniques
2. Be equipped with the knowledge for preparation of cost sheet ,valuation of stock, pricing of material issues and prepare accounting for stage wise production under different process
3. Be capable of preparing, analysis and interpreting financial statements using various tools
4. Gain knowledge how to prepare fund flow statement and cash flow statement and using the same for decision making in business
5. Be able to make decisions in the form of preparing budgets and price fixation

## Course Syllabus

### UNIT-I Introduction to Cost and Management Accounting

(15 Hours)

- 1.1: Meaning – Definition – Scope (K1, K2)
- 1.2: Objectives – Functions (K1, K2, K3)
- 1.3: Merits and Demerits of cost and management accounting (K1, K2, K4)
- 1.4: Distinction between cost and management accounting (K1, K2, K4)
- 1.5: Tools of cost and management accounting (K1, K2, K3)
- 1.6: Techniques of cost and management accounting (K1, K2, K3)

### UNIT II Methods of Costing (15 Hours)

- 2.1: Cost sheet – meaning – definition – objectives (K1, K2, K3, K4)
- 2.2: Classification of cost (K1, K2, K3)
- 2.3: preparation of cost sheet (K1, K2)
- 2.4: Materials FIFO (K1, K2, K3)
- 2.5: LIFO (K1, K2, K3)
- 2.6: Process costing (K1,K2,K3,K4)

### UNIT- III -Financial Statement Analysis

(15 Hours)

- 3.1: Financial statement analysis – preparation of comparative statement (K1, K2, K3, K4)
- 3.2: Common size statement (K1, K2, K3)
- 3.3: Trend analysis (K1, K2, K3)
- 3.4: Ratio analysis – calculation of various ratios – profitability ratios (K1, K2, K3, K4)
- 3.5: Liquidity ratios, solvency ratios (K1, K2, K3, K4)
- 3.6: Turn over ratios and capital structure ratios (K1, K2, K3, K4)

### UNIT-IV -Fund Flow Statement and Cash Flow Statement

(15 Hours)

- 4.1: Fund flow analysis – meaning – working capital –current assets – current liabilities (K1, K2, K3, K4)
- 4.2: Preparation of fund flow statement (without adjustments) (K1, K2, K3)
- 4.3: Preparation of fund flow statement (simple problems with sale of fixed assets under indirect method) (K1, K2, K3, K4)
- 4.4: Cash flow analysis – meaning – importance – difference between fund flow and cash flow statement (K1, K2, K3, K4)
- 4.5: Cash flow statement – preparation of cash flow statement (without adjustments) (K1, K2, K3)
- 4.6: Preparation of cash flow statement (simple problems with sale of fixed assets under indirect method) (K2,K3,K4)

### UNIT-V- Marginal Costing and Budgetary Control

(15 Hours)

- 5.1: Marginal costing –definition – meaning – profit volume ratio (K1, K2, K3, K4)
- 5.2: Break even analysis (K1, K3, K4)
- 5.3: Cost volume profit analysis excluding managerial decision making problems (K1, K2, K3, K4)
- 5.4: Budget and budgetary control – meaning –types of budgets (K1, K2, K3, K4)
- 5.5: Cash budget, flexible budget (K1, K2, K3, K4)
- 5.6: Production budget and sales budget (K3, K4)

**Note: Theory 20% and Problems 80%**

## SEMESTER – IV

### UCBAJ20 – RESEARCH METHODOLOGY

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> UCBAJ20	<b>Title of the Course:</b> Research Methodology	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Objectives

1. To understand the basic concepts of research
2. To familiarize with research design and hypothesis testing
3. To acquire knowledge in sampling techniques
4. To gain knowledge about data collection methods
5. To acquire knowledge in writing a report

#### Course Outcomes (CO)

The learners will be able to

1. Know the general definition of research and qualities of research
2. Be able to distinguish the research design and to conduct statistical test of a hypothesis
3. Define the sampling design on the basis of the data
4. Understand the types of data collection and to use it for their study based on the requirement
5. Be able to write report and do statistical analysis using software packages

CO4	H	M	H	M	H	H
CO5	H	M	M	H	M	H

**H- High (3), M- Moderate (2), L- Low (1)**

## **Course Syllabus**

### **UNIT I Introduction to Research**

**(15 Hours)**

- 1.1 Definition of Research – Meaning (K1,K2)
- 1.2 Objectives (K1,K2)
- 1.3 Types of research (K1,K2)
- 1.4 Research process (K1,K2)
- 1.5 Qualities of a researcher (K1,K2)
- 1.6 Criteria of good research – Problems encountered in research. (K1,K2)

### **UNIT II Research Design and Hypothesis Testing**

**(15 Hours)**

- 2.1 Definition of research problem (K1,K2)
- 2.2 Research design - Features of good research design (K1,K2)
- 2.3 Types of research design (K1,K2,K3)
- 2.4 Factors affecting research design (K1,K2,K3)
- 2.5 Hypothesis – Meaning – Definition – Need for hypothesis – Formulation of hypothesis (K1,K2,K3)
- 2.6 Types of hypothesis – Test of hypothesis – Type I and Type II error (K1,K2,K3)

### **UNIT III Sampling Techniques**

**(15 Hours)**

- 3.1 Sampling techniques – Need for sampling techniques (K1,K2)
- 3.2 Types of sampling (K1,K2,K3)
- 3.3 Merits and demerits of sampling (K1,K2)
- 3.4 Sampling and Non-sampling errors-Sampling distribution (K1,K2,K3)
- 3.5 Essential quality of good sampling (K1,K2,K3)
- 3.6 Requisites in determining the Sample size (K1,K2,K3)

### **UNIT IV Methods of Data Collection**

**(15 Hours)**

- 4.1 Collection of primary and secondary data (K1,K2,K3)
- 4.2 Interview techniques - Survey and interview method – Merits and Demerits (K1,K2,K3)
- 4.3 Questionnaire – Pre requisites of using questionnaire (K1,K2,K3)
- 4.4 Structured and unstructured questionnaire (K1,K2,K3)
- 4.5 Types of secondary data (K1,K2,K3)
- 4.6 Measurement of scaling techniques (K1,K2,K3)

### **UNIT V Report Writing**

**(15 Hours)**

- 5.1 Meaning and techniques of Interpretation (K1,K2,K3)
- 5.2 Data preparation process (K1,K2,K3)
- 5.3 Types of analysis (K1,K2,K3)
- 5.4 Significance of Report writing (K1,K2,K3)
- 5.5 Layout of research report (K1,K2,K3)
- 5.6 Types of report- Statistical Packages. (K1,K2,K3)

## SEMESTER – IV

### UCBAK20 – HUMAN RESOURCE MANAGEMENT AND DEVELOPMENT

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> UCBAK20	<b>Title of the Course:</b> Human Resource Management and Development	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objectives

1. To understand the various HR Concepts and about Human Resource Planning
2. To have a good understanding of the various HR functions like Recruitment, selection and training process and also about the performance appraisal
3. To acquire knowledge in the management of talents in the organisation
4. To enable the students to understand the types of welfare and safety measures
5. To provide an overview of HR audit, ethics and about the challenges in HR

## **Course Syllabus**

### **UNIT I Introduction to HRM (18 hours)**

- 1.1: Introduction to HRM – Meaning – Nature (K1, K2, K3, K4)
- 1.2: Functions of HRM (K1, K2, K4)
- 1.3: Objectives of HRM (K1, K2, K4)
- 1.4: Difference between HRM and Personnel Management (K1, K2, K4)
- 1.5: HRP – Meaning – Importance (K1, K2, K3, K4)
- 1.6: HRIS (Human Resource Information System) (K1, K2, K4)

### **UNIT II Functions of HRM (18 hours)**

- 2.1: Recruitment – Meaning – Factors – Process (K1, K2, K3)
- 2.2: Selection – Meaning – Process (K1, K2, K3, K4)
- 2.3: Induction and orientation – Meaning - Strategic choices – Problems (K1, K2, K3)
- 2.4: Performance appraisal – Meaning – Objectives – Problems (K1, K2, K4)
- 2.5: Methods of Performance appraisal (K1, K2)
- 2.6: Training – Process – Methods (K1, K2, K3, K4)

### **UNIT III Talent Management (18 hours)**

- 3.1 : Career Development – Roles – Initiatives (K1, K2)
- 3.2 : Talent Management – Lifecycle – Initiatives - QWL (Quality of work life) – Factors (K1, K2, K3, K4)
- 3.3 : Job Analysis – Meaning – Process – Methods (K1, K2, K3, K4)
- 3.4: Job Design – Meaning – Approaches (K1, K2, K3, K4)
- 3.5: Participative Management- Meaning – Methods (K1, K2, K4)
- 3.6: Separation – Meaning – Types – Causes (K1, K2, K3, K4)

### **UNIT IV Employee Welfare and Safety (18 hours)**

- 4.1 : Employee Welfare – Meaning - Merits and demerits – Types (K1, K2)
- 4.2: Approaches to Employee Welfare – Safety – Meaning – Need (K1, K2, K3)
- 4.3: Health - Physical health - Health services – Mental health (K1, K2, K3, K4)
- 4.4: Work stress - Coping strategies (K1, K2, K3, K4)
- 4.5: Trade unions – Meaning – Reasons - Strategic choices (K1, K2, K3, K4)
- 4.6: Disputes - Causes and settlement. (K1, K2, K3, K4)

### **UNIT V HR Audit and Challenges (18 hours)**

- 5.1 : HR Audit - Meaning- Need – Approaches (K1, K2)
- 5.2 : HR Ethics - Meaning - Sources- Importance (K1, K2, K3, K4) 5.3: HR Ethical Issues (K1, K2, K3)
- 5.4 : Managing ethics (K1, K2, K3, K4)
- 5.5: Challenges in HR (K1, K2)
- 5.6: E-HR (K1, K2, K4)

## UAITR20 - INSTITUTIONAL TRAINING

Each student shall be required to prepare on the basis of the training undergone by her in a business or industrial organization. The report should demonstrate the capability of the student in studying the organization and its process in totality.

### EVALUATION PATTERN

- ✓ Each student should undergo the training separately.
- ✓ The mode of evaluating the student will consist of two parts. One on the basis of the report writing and the other will be through Viva-Voce.
- ✓ The valuation of the report writing will be done by the Internal Examiner while for the oral i.e. Viva-Voce Examination an External Examiner will be called for.
- ✓ 60 marks will be awarded for the report writing and 40 marks for the Oral (Viva-Voce) Examination.
- ✓ Training will be for a period of 25 days which will be during the month of December of every academic year.
- ✓ Each student should find a reputed organization which carries out the important functions like Production, Human Resource, Finance and Marketing to carry out her investigation with the approval of the department
- ✓ Records should be maintained for the daily activities signed by the concerned authorities in the organization.
- ✓ After completion of the training, the students should get the Completed Certificate and the Attendance Certificate from the company when she comes to the College.
- ✓ Any change of the organization during the course of the Training should be done only after getting the consent from the Head of the Department of the College in a written format
- ✓ The following are the components for Report Writing (60 Marks)

Content	40 Marks
Layout	10 Marks
Grammar	10 Marks

- ✓ For the Viva-Voce Examinations (Semester – 40 Marks)

Oral Presentation	30 Marks
Question and Answer	10 Marks

## UCBAR20 – PROJECT

Each student shall be required to do a project and prepare the report on the basis of the investigation carried out by her in an institution or industrial organization. The student is expected to identify a problem in the organization based on her area of specialization and provide solutions and suggestions to the management. The report should demonstrate the capability of the students in analysing and evaluating the problem and to create original approach in providing solutions to the problem.

The project should include field studies, surveys, interpretation, planning and designing of the Research Methodology presented in a comprehensive manner with recommendations for solutions based on scientifically worked out data and Viva-Voce Examinations will be conducted on the basis of the report and presentation.

### EVALUATION PATTERN

- ✓ Each student should undergo the training separately.
- ✓ The mode of evaluating the student will consist of two parts. One on the basis of the report writing and the other will be through Viva-Voce.
- ✓ The valuation of the report writing will be done by the Internal Examiner while for the oral i.e. Viva-Voce Examination an External Examiner will be called for.
- ✓ 60 marks will be awarded for the report writing and 40 marks for the Oral (Viva-Voce) Examination.
- ✓ Training will be for a period of 30 days (One Month) which will be during the month May – June of every academic year.
- ✓ Each student should find a reputed organization which carries out the important functions like Production, Human Resource, Finance and Marketing to carry out her investigation with the approval of the department
- ✓ Records should be maintained for the daily activities signed by the concerned authorities in the organization.
- ✓ After completion of the training, the students should get the Completed Certificate and the Attendance Certificate from the company when she comes to the College.
- ✓ Any change of the organization during the course of the Training should be done only after getting the consent from the Head of the Department of the College in a written format
- ✓ The following are the components for Report Writing (60 Marks)

Content	40 Marks
Layout	10 Marks
Grammar	10 Marks

- ✓ For the Viva-Voce Examinations (Semester – 40 Marks)

Oral Presentation	30 Marks
Question and Answer	10 Marks

**SEMESTER – V/VI****USBAE520/USBAE620 – CAMPUS TO CORPORATE**

<b>Year: III Sem: V/VI</b>	<b>Course Code: USBAE520/ USBAE620</b>	<b>Title of the Course: Campus to Corporate</b>	<b>Course Type: Theory</b>	<b>Course Category: Skill Based Elective</b>	<b>H/W 2</b>	<b>Credits 2</b>	<b>Marks 100</b>

### **Unit I: Production Management (18 hours)**

- 1.1 Introduction to Production – Definition- Objectives of Production Management (K1, K2)
- 1.2 Production process (K1, K2, K3)
- 1.3 Functions and Responsibility of Production Manager (K1,K2,K3)
- 1.4 Plant location – Objectives – Factors influencing Plant location (K1,K2,K3)
- 1.5 Plant layout – Definition – Objectives – Factors (K1,K2,K3)
- 1.6 Types of Plant layout – Advantages and disadvantages (K1,K2,K3)

### **Unit II: Production planning and control (18 hours)**

- 2.1 Production planning and control – Objectives – Functions of PPC (K1,K2,K3)
- 2.2 Stages – Organization for PPC- Comparison of Production planning and Production control (K1,K2,K3)
- 2.3 Production Schedule - Factors affecting Schedule (K1,K2,K3)
- 2.4 Scheduling Procedure and Techniques (K1,K2,K3)
- 2.5 Maintenance Management – Areas – Objectives (K1,K2,K3)
- 2.6 Functional elements of Maintenance program – Types of maintenance and their advantages and disadvantages (K1,K2,K3)

### **Unit III: Quality control (18 hours)**

- 3.1 Quality control – Definition – Objectives – Principles (K1,K2,K3)
- 3.2 Quality circles – Definition – Characteristics (K1,K2,K3)
- 3.3 TQM – Meaning- Principles of TQM- Deming’s Principles- Six Sigma (K1,K2,K3)
- 3.4 Work Study – Definition – Objectives – Procedure (K1,K2,K3)
- 3.5 Method study – Definition - levels – Objectives – Procedure – Analytical approach of Method Study (K1,K2,K3)
- 3.6 Work Measurement- Techniques (K1,K2,K3)

### **Unit IV: Materials Management (18 hours)**

- 4.1 Materials management – Definition - Scope - Advantages – Codification and Standardization (K1,K2,K3)
- 4.2 Purchasing management – Purchase parameters - Purchase systems – Classification – Methods –
- 4.3 Special purchasing system (K1,K2,K3)
- 4.4 Stores management – Purpose – Factors in design of stores (K1,K2,K3)
- 4.5 Stores accounting – Costing issues – Stock verification (K1,K2,K3)
- 4.6 Material handling – Equipment – Guidelines- Inventory Management - Coding (K1,K2,K3)

### **Unit V: Inventory control (18 hours)**

- 5.1 Concepts of ABC, EOQ, MRP – Objectives (K1,K2,K3)
- 5.2 JIT – Elements – Benefits (K1,K2,K3)
- 5.3 Selective inventory control Techniques (K1,K2,K3)
- 5.4 Value analysis – Types – Phases/Stages – Advantages (K1,K2,K3,K4)
- 5.5 ISO 9000 – Process of obtaining ISO certification (K1,K2,K3,K4)
- 5.6 Advantages of ISO certification (K1,K2,K3)

## SEMESTER – VI

### UCBAO20 – FUNDAMENTALS OF INFORMATION TECHNOLOGY AND SYSTEM

<b>Year: III</b> <b>Sem: VI</b>	<b>Course Code:</b> UCBAO20	<b>Title of the Course:</b> Fundamentals of Information Technology and System	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objectives

1. To understand and gain knowledge in information systems and technology
2. To acquire the managerial skills using information systems and to coordinate the operative and management functions
3. To acquire the basic mailing and web skills to gain professionalism
4. To enable the students acquire the ability to be a future leader, manager in IT organisations
5. To attain the ability to be self- directed towards their career and contribute to the society

#### Course Outcomes (CO)

The learners will be able to

1. Well-versed in the basics of information system and technology
2. Understand programming languages to coordinate the operative and management functions
3. Equip with the practical knowledge of information technologies and implement in their organisation
4. Acquire knowledge over the basic concepts of information systems and can implement in their organisation
5. Gain knowledge on all the management functions inculcating with IS and IT

## **Course Syllabus**

### **Unit I Introduction to Computer systems (15 Hours)**

- 1.1 Introduction – Classification of digital computers (K1, K2, K3)
- 1.2 Computer architecture: The first electronic computer (K1, K2, K3)
- 1.3 Low level languages – High level language (K1, K2, K3)
- 1.4 The first commercial computers – Inside a typical computer system (K1, K2, K3)
- 1.5 Peripheral devices, Auxiliary storage devices (K1, K2, K3)
- 1.6 Input devices – Output devices (K1, K2, K3)

### **Unit II Computer programming Languages (15 Hours)**

- 2.1 Algorithms (K1, K2, K3)
- 2.2 Flowcharts (K1, K2, K3)
- 2.3 Control structure – Programming paradigm (K1, K2, K3)
- 2.4 Programming languages – Generations of programming language (K1, K2, K3)
- 2.5 Introduction to computer software – Definition – Categories (K1, K2, K3)
- 2.6 Software piracy – Software terminologies.(K1, K2, K3)

### **Unit III Introduction to Information Technologies (15 Hours)**

- 3.1 Computers in business and industry (K1, K2, K3, K4)
- 3.2 Computers in home (K1, K2, K3)
- 3.3 Computers in education and training (K1, K2, K3, K4)
- 3.4 Computers in entertainment, science, medical and engineering(K1, K2, K3, K4)
- 3.5 Internet and Wide World Web- Electronic Mail: Mail Basics (K1, K2, K3)
- 3.6 E-Mail Ethics E-mail - Advantages and Disadvantages – Mailing lists(K1, K2, K3,K4)

### **Unit IV Management information systems (15 Hours)**

- 4.1 Introduction (K1, K2, K3)
- 4.2 Basic concepts of management information system (K1, K2, K3)
- 4.3 Scope of management information system (K1, K2, K3 , K4)
- 4.4 Classification of information system (K1, K2, K3, K4)
- 4.5 Characteristics of management information systems (K1, K2, K3, K4)
- 4.6 Functions of management information system (K1, K2, K3, K4)

### **Unit V Functional information system (15 Hours)**

- 5.1 Introduction - Functional information system (K1, K2, K3, K4)
- 5.2 Marketing management information system (K1, K2, K3, K4)
- 5.3 Human resource information system (K1, K2, K3, K4)
- 5.4 Financial management information system (K1, K2, K3, K4)
- 5.5 Production and inventory information system (K1, K2, K3, K4)
- 5.6 CRM and SCM using information system (K1, K2, K3, K4)

## **Text Books**

## SEMESTER – VI

### UEBAC20 – TOTAL QUALITY MANAGEMENT

<b>Year: III</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: VI</b>	UEBAC20	Total Quality Management	Theory	Elective	5	5	100

#### Objectives

1. To understand the concepts of total quality management
2. To acquire knowledge about the customers and to have continuous improvement
3. To analyze the supplier partnering and the performance measure for improvement
4. To create an awareness regarding quality challenges and benchmarking
5. To analyze critically the strategic issues in quality management and standardization

#### Course Outcomes (CO)

The learners will be able to

1. Evaluate the principles of quality management and to explain how these principles can be applied within quality management systems
2. Identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality
3. Critically appraise the organizational, communication and teamwork requirements for effective quality management
4. Know the concept of benchmarking and total productive maintenance in the organization
5. Identify key challenges in implementing TQM and maintain standardization

## **Course Syllabus**

### **UNIT I Introduction**

**(15 Hours)**

- 1.1 Definition of Quality – Need for quality - Dimensions of product and service quality – Quality planning (K1,K2)
- 1.2 Quality costs – Analysis techniques for quality costs - TQM - Introduction – Definition (K1,K2)
- 1.3 Principles of TQM (K1,K2)
- 1.4 Quality council – Quality Statements (K1,K2)
- 1.5 Deming Philosophy (K1,K2)
- 1.6 Barriers to TQM Implementation. (K1,K2)

### **UNIT II Customer Satisfaction**

**(15 Hours)**

- 2.1 Customer Satisfaction – Customer perception of quality (K1,K2)
- 2.2 Customer complaints, Service quality (K1,K2)
- 2.3 Customer retention, Employee involvement (K1,K2)
- 2.4 Continuous process improvement (K1,K2)
- 2.5 Juran Trilogy, PDCA Cycle (K1,K2,K3)
- 2.6 5S, Kaizen (K1,K2,K3)

### **UNIT III Supplier Partnering and Performance Measure**

**(15 Hours)**

- 3.1 Supplier Partnership – Partnering, Sourcing (K1,K2,K3)
- 3.2 Supplier selection, Supplier rating, Relationship development (K1,K2,K3)
- 3.3 Performance Measures – Basic concepts – Strategy (K1,K2,K3)
- 3.4 Performance measure - Process capability (K1,K2,K3)
- 3.5 Concept of six- sigma (K1,K2,K3)
- 3.6 Control charts (K1,K2,K3)

### **UNIT IV Benchmarking and Failure Mode and Effect Analysis (FMEA)**

**(15 Hours)**

- 4.1 Benchmarking – Reasons to Benchmark (K1,K2,K3)
- 4.2 Benchmarking process (K1,K2)
- 4.3 Quality Function Development (QFD) – House of Quality, QFD process – Benefits (K1,K2,K3)
- 4.4 Taguchi Quality Loss Function (K1,K2)
- 4.5 Total Productive Maintenance (TPM) – Concept - Improvement – Needs (K1,K2,K3)
- 4.6 FMEA – Stages of FMEA – Types (K1,K2)

### **UNIT V Standardization**

**(15 Hours)**

- 5.1 ISO - Origin – Introduction (K1,K2)
- 5.2 Need for ISO 9000 and other Quality Systems (K1, K2)
- 5.3 ISO 9000: 2000 Quality System – Elements (K1,K2)
- 5.4 Implementation of Quality System (K1,K2)
- 5.5 Documentation (K1)
- 5.6 Quality Auditing (K1)

## **Course Syllabus**

### **UNIT I: Introduction**

**(15 Hours)**

- 1.1 Introduction – Definition- Understanding the meaning of entrepreneurship (K1)
- 1.2 Importance of entrepreneurship (K1, K2)
- 1.3 Characteristics of an entrepreneur (K1, K2)
- 1.4 Classification of the entrepreneurs (K1, K2)
- 1.5 Factors influencing entrepreneurship (K1, K2)
- 1.6 Role played by Government and non- government agencies (K1, K2)

### **UNIT II: Entrepreneurial growth, Project appraisal**

**(15 Hours)**

- 2.1 Project Appraisal – Techniques (K1, K2)
- 2.2 Business plan - Content of business plan (K1, K2, K3)
- 2.3 EDP's (K, K2)
- 2.4 SIDBI (K1, K2)
- 2.5 DIC– MSME (K1, K2)
- 2.6 Industrial policy of Government of India (K1, K2)

### **UNIT III: Business Idea generation technique**

**(15 Hours)**

- 3.1 Starting an enterprise (K1)
- 3.2 Business Generation Techniques (K1)
- 3.3 Marketing feasibility (K1)
- 3.4 Financial feasibility (K1)
- 3.5 Technical feasibility – Legal feasibility (K1)
- 3.6 Managerial and Location feasibility (K1)

### **UNIT IV: Forms of Entrepreneur**

**(15 Hours)**

- 4.1 Rural entrepreneurs (K1, K2)
- 4.2 Small scale entrepreneurs (K1, K2)
- 4.3 Export entrepreneur-Export procedure (K1, K2, K3)
- 4.4 Family Business - Importance of family business - Responsibilities and rights of shareholders of a family business Pitfalls of the family business (K1, K2)
- 4.5 Women entrepreneurship – Meaning - Definition- Problems of women entrepreneur (K1, K2)
- 4.6 Prospects of women entrepreneur – Success stories of women entrepreneurs (K1, K2)

### **UNIT V: Entering the Market**

**(15 Hours)**

- 5.1 Michael porter's five force model (K1, K2)
- 5.2 Acquisition (K1, K2, K3)
- 5.3 Joint ventures (K1, K2, K3)
- 5.4 Franchising (K1, K2, K3)
- 5.5 Licensing (K1, K2, K3)
- 5.6 Piggybacking (K1, K2)

**SEMESTER – V/VI****USBAF520/USBAF620– APPLICATIONS OF GST**

<b>Year: III</b>	<b>Course Code:</b> USBAF520/ USBAF620	<b>Title of the Course:</b> Applications of GST	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
------------------	--	--	-------------------------------	--	-----------------	---------------------	---------------------

**Objectives**

1. To enable the students to learn the concepts of GST from the pre-GST period to post- GST period
2. To Attain knowledge in formalities and registration
3. To study the procedure of filing GST returns
4. To comprehend the principles of taxations, objectives of taxes and its impact, shifting and incidence process of indirect taxes in the market orientated economy
5. To understand the implications of GST on the taxable capacity consumers, dealers and of the society at large and its changes
6. To make them to be a tax consultant in preparing the tax planning, tax management, Payment of tax and filing of tax returns

**Course Outcomes (CO)**

The learners will be able to

1. Study the basic concepts of GST
2. Learn the registration of tax filling
3. Understand the GST returns
4. Learn the composition scheme
5. Know the input tax credit

## **Course Syllabus**

### **Unit I - Introduction to Goods and Services Tax (12 Hours)**

- 1.1 Introduction - Stages of Evolution of Goods and Services Tax (K1)
- 1.2 Methodology of GST (K1, K2, K3)
- 1.3 Constitutional background (K1, K2, K3)
- 1.4 Benefits of implementing GST (K1, K2, K3)
- 1.5 Structure of GST- Central Goods and Services Tax - State Goods and Services Tax (K1, K2, K3)
- 1.6 UTGST - Integrated Goods and Services Tax (K1, K2, K3)

### **Unit II: Levy, Tax Collection and Reverse Charge Mechanism (12 Hours)**

- 2.1 Levy and Collection of Tax (K1)
- 2.2 Rates of GST- Scope of Supply (K1, K2, K3)
- 2.3 Composite and Mixed Supplies (K1, K2, K3)
- 2.4 E-commerce under GST regime (K1, K2, K3)
- 2.5 Composition Scheme of Levy-Value of taxable supply (K1, K2, K3)
- 2.6 Interstate supply-Intra state supply (K1, K2, K3)

### **Unit III-Concept of time and place of supply & Import and Export (12 Hours)**

- 3.1 Time of supply (K1)
- 3.2 Place of supply (K1, K2, K3)
- 3.3 Significance (K1, K2, K3)
- 3.4 Time and place of supply in case of intra state supply (K1, K2, K3)
- 3.5 Interstate supply (K1, K2, K3)
- 3.6 Import and export of goods and services (K1, K2, K3)

### **Unit IV- Input Tax Credit & Payment of GST (12 Hours)**

- 4.1 Cascading Effect of Taxation- Benefits of Input Tax Credit (K1)
- 4.2 Computation - Input service distribution (K1, K2, K3)
- 4.3 Recovery of Credit -Reversal of credit-Utilization of Input tax credit (K1, K2, K3)
- 4.4 Cases in which input tax credit is not available (K1, K2, K3)
- 4.5 Tax Invoice - Unauthorized Collection of Tax - Credit Notes - Debit Notes (K1, K2, K3)
- 4.6 Electronic Cash Ledger - Electronic Credit Ledger - Electronic liability ledger (K1, K2, K3)

### **Unit V – Registration, Returns and Accounts and Assessment (12 Hours)**

- 5.1 Registration - Persons Liable for Registration (K1, K2, K3)
- 5.2 Compulsory Registration - Deemed Registration (K1, K2, K3)
- 5.3 Procedure For Registration - GSTIN (K1, K2, K3)
- 5.4 Amendment of Registration - Cancellation of Registration (K1, K2, K3)
- 5.5 Revocation of cancellation (K1, K2, K3)
- 5.6 Furnishing Details of Supplies - Returns - Accounts and Records (K1, K2, K3)

## **Text Books**

1. Goods and service taxes (GST) by Dr.M.C Mehotra and Prof.V.P.Agarwal - Sahitya Bhawan publication, 5<sup>th</sup> Edition, 2019.
2. Goods and Services Tax (GST) in India B. Viswanathan, 1st Edition, 2016.

<b>CO5</b>	H	M	H	L	M	M

**H- High (3), M- Moderate (2), L- Low (1)**

## **Course Syllabus**

### **Unit I Introduction to Human Resource Management (9 Hours)**

- 1.1: Definition - Scope of HRM (K1, K2, K3, K4)
- 1.2: Objectives of HRM (K1, K2, K3, K4)
- 1.3: Qualities of a HR manager (K1, K2, K4)
- 1.4: Difference between HRM and Personnel management (K1, K2)
- 1.5: HR Planning – Need – Process – Requisites and barriers (K1, K2)
- 1.6: HRIS – E-HR (K1, K2)

### **Unit II Recruitment and Selection (9 Hours)**

- 2.1: Recruitment – Factors (K1, K2, K3)
- 2.2: Process of Recruitment (K1, K2, K3)
- 2.3: Sources of Recruitment (K1, K2, k3)
- 2.4: Selection – Process (K1, K2, K4)
- 2.5: Induction and Orientation – Purpose – Strategic Choices – Problems (K1, K2, K4)
- 2.6: Placement (K1, K2, K4)

### **Unit III Performance Appraisal and Training (9 Hours)**

- 3.1: Performance appraisal – Meaning – Objectives (K1, K2, K4)
- 3.2: Process and Problems of Performance Appraisal (K1, K2, K4)
- 3.3: Methods of Performance Appraisal (K1, K2, K3)
- 3.4: Training – Inputs – Process (K1, K2, K3)
- 3.5: Techniques of Training (K1, K2, K3, K4)
- 3.6: Career Planning and Development (K1, K2, K3)

### **Unit IV Employee Welfare and Safety Measures (9 Hours)**

- 4.1: Participative management – Types (K1, K2, K3)
- 4.2: Employee welfare – Measures (K1, K2, K3)
- 4.3: Approaches to Employee Welfare (K1, K2)
- 4.4: Safety - Need – Health (K1, K2, K3)
- 4.5: Industrial Relations (K1, K2, K4)
- 4.6: Trade unions (K1, K2, K4)
- 4.7: Work Stress – Reasons (K1, K2, K4)
- 4.8: Coping strategies of stress (K1, K2, K3, K4)

### **Unit V Talent Management (9 Hours)**

- 5.1: Talent acquisition and retention (K1, K2, K4)
- 5.2: Quality of Work Life – Factors (K1, K2, K3)
- 5.3: Job Enlargement – Reasons (K1, K2, K3, K4)
- 5.4: Job enrichment – Features (K1, K2, K4)
- 5.5: Job Rotation – Job Analysis – Job Specification (K1, K2, K3)
- 5.6: HR Audit – Approaches (K1, K2)
- 5.7: Challenges in HR (K1, K2)

### **Text Books**

1. V. S. P Rao, Human Resource Management: Text and Cases, Excel Books, New Delhi, 3<sup>rd</sup> Edition, 2010
2. K Aswathappa, Human Resource Management and Personnel Management, Tata McGraw Hill, New Delhi, 8<sup>th</sup> Edition, 2015

**SEMESTER – I/II**

**USBAA120/USBAA220 – LIFE STYLE MANAGEMENT**

<b>Year: I Sem: I/II</b>	<b>Course Code:</b> USBAA120/ USBAA220	<b>Title of the Course:</b> Life Style Management	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--	---	-----------------------------------	--	-----------------	---------------------	---------------------

**Objectives**

1. To know the fundamental concepts of self management
2. To acquire the knowledge of Stress management
3. To have the knowledge about time management
4. To assess the knowledge about situations management
5. To study the knowledge related to Career Management

**Course Outcomes (CO)**

The learners will be able to

1. Be equipped with the talent of self management
2. Acquire the skills of Stress management
3. Be able to manage time
4. Be able to tackle and manage various situations
5. Familiarized in the skills of Career Management

**H- High (3), M- Moderate (2), L- Low (1)**

## **Course Syllabus**

### **Unit I Self-Management**

**(6 hours)**

- 1.1 Meaning – Self Awareness (K1,K2)
- 1.2 Dimensions of Personality Development (K1,K2,K3)
- 1.3 Interpersonal Relations – Types of Complexes (K1,K2,K3)
- 1.4 Emotional Intelligence – Emotional Management (K1,K2,K3)
- 1.5 Components of EI – SWOT Analysis (K1,K2,K3,K4)
- 1.6 Health and Nutrition Management (K1,K2,K3)

**(6 hours)**

- 2.1 Meaning - Definition of stress (K1,K2,)
- 2.2 Life style stressors (K1,K2,K3)
- 2.3 Major sources of stress (K1,K2,K3)
- 2.4 Work Stress (K1,K2,K3)
- 2.5 Symptoms – Guidelines to reduce stress (K1,K2,K3)
- 2.6 Workplace humor (K1,K2,)

### **Unit III Time Management**

**(6 hours)**

- 3.1 Definition (K1,K2)
- 3.2 Tips for Time Management (K1,K2,K3)
- 3.3 Advantages (K1,K2,K3)
- 3.4 Common mistakes students make in Time Management (K1,K2,K3,K4)
- 3.5 Goals of Time Management (K1,K2,K3,K4)
- 3.6 Technology and Media Management (K1, K2, K3)

### **Unit IV Situations Management**

**(6 hours)**

- 4.1 Conflict management (K1,K2,K3)
- 4.2 Styles of managing Conflict (K1,K2,K3)
- 4.3 Anger management (K1,K2,K3)
- 4.4 Crisis management (K1,K2,K3)
- 4.5 Event management (K1,K2,K3)
- 4.6 Components of a successful Event (K1, K2, K3)

### **Unit V Career Management**

**(6 hours)**

- 5.1 Career Planning (K1,K2,K3)
- 5.2 Elements of Career management in Business (K1,K2,K3)
- 5.3 Team building (K1,K2,K3)
- 5.4 Change management (K1,K2,K3)
- 5.5 Creativity management (K1,K2,K3)
- 5.6 Work Life Balance (K1, K2, K3)

**Text Books**

**SEMESTER – I/II**

**USBAB120/USBAB220 – WINNING THROUGH COMMUNICATION**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> USBAB120/ USBAB220	<b>Title of the Course:</b> Winning Through Communication	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
--------------------------	--	---	-------------------------------	--	-----------------	---------------------	---------------------

**Objectives**

1. To understand the role of communication in Personal and Professional success
2. To impart the correct practices and strategies of effective letter writing and drafting of resume
3. To provide an overview of prerequisites to business correspondence
4. To understand and evaluate key approaches used in report writing
5. To develop skills in report writing

**Course Outcomes (CO)**

The learners will be able to

1. Be able to understand the concepts in communication
2. Attain skill in writing letters and resume
3. Be trained in drafting business correspondence
4. Able to draft effective business report with brevity and clarity
5. Gain confidence in various career development initiatives like Group Discussion, Role play and interviewing techniques

## **Course Syllabus**

### **Unit I - Introduction to Communication**

**(6 Hours)**

- 1.1 : Definition of communication – Elements (K1, K2, K3)
- 1.2 : Guidelines for effective business communication (K1, K2, K3, K4)
- 1.3: Steps in communication process (K1, K2, K3, K4)
- 1.4: Types and media of communication (K1, K2)
- 1.5: Barriers in communication (K1, K2, K3)
- 1.6: Technology in Communication (K1, K2)

### **Unit II Letter writing skills**

**(6 Hours)**

- 2.1: Business Letter – Meaning (K1, K2, K3, K4)
- 2.2: Structure of business letter (K1, K2, K3)
- 2.3: Leave letter (K1, K2, K3, K4)
- 2.4: Complaint letter (K1, K2, K3)
- 2.5: Letter of application (K1, K2, K3)
- 2.6: Preparation of resume/CV (K1, K2, K3, K4)

### **Unit III Business Letter**

**(6 Hours)**

- 3.1 : Types of Business Letter (K1, K2, K3)
- 3.2 : Sales letter - Enquiry – Quotations (K1, K2, K3, K4)
- 3.3: Order – Adjustment Letter (K1, K2, K3, K4)
- 3.4: Follow up Letter - Reference letter (K1, K2, K3, K4)
- 3.5: Acknowledge Letter – Cover Letter (K1, K2, K3, K4)
- 3.6: Resignation Letter (K1, K2, K3, K4)
- 3.7: Banking Correspondence (K1, K2)

### **Unit IV Report Writing**

**(6 Hours)**

- 4.1 : Report – Meaning (K1, K2)
- 4.2: Features of a good Report (K1, K2, K3)
- 4.3 : Essentials Elements of the Research Report (K1, K2)
- 4.4: Classification of Reports (K1, K2, K3)
- 4.5 : Types of Business Report: Periodic Reports – Proposals (K1, K2, K3, K4)
- 4.6 : Types of Business Report: Policies and Procedures – Situational Reports (K1, K2, K3, K4)

### **Unit V Practical Session**

**(6 Hours)**

- 5.1: Group discussion – Importance (K1, K2, K3,
- 5.2: Criteria for group discussion (K1, K2, K3, K4)
- 5.3: Process – Do's and Don'ts of group discussion (K1, K2, K3)
- 5.4: Creation of Gmail Account (K1, K2, K3)
- 5.5 : Role - Play (K1, K2, K3)
- 5.6 : Interviewing Techniques (K1, K2, K3)
- 5.7: Presentation Techniques (K1, K2, K3)

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*  
**Gandhi Nagar, Vellore-632 006**

**Department of Computer Applications (B.C.A.) - (UG)**

**OUTCOME BASED EDUCATION - 2020**

(Effective for the Batch of Students Admitted from 2020-2021)

**A) INSTITUTION LEVEL**

**Vision**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighboring districts.

**B) NAME OF THE PROGRAMME: B.C.A.**

**VISION OF THE PROGRAMME**

- To provide a intellectual environment that fosters the search for new knowledge in a highly dynamic computing world
- To be a leading, contemporary, innovative programme in inculcating professional competencies in the field of Computing and related interdisciplinary technologies to achieve academic excellence and to facilitate research activities as a timely response to dynamic needs and challenges of industry and society.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

The basic BCA eligibility is to possess an aggregate of 50% or above in Class 12 in any stream (Arts, Science, Commerce) with English as a compulsory subject.

**D) List of Courses:**

Sem	Part	Code	Title of Paper	Hours/ Week	Exam Hours		Credits	Marks

## **E) Programme Objectives (PO)**

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## **F) Programme Specific Outcomes (PSO)**

**PSO1:** Equip the students with requisite knowledge, skills and right attitude necessary to provide effective software development skills in a global environment and also focus on preparing students for roles pertaining to computer applications and IT industry.

**PSO2:** Acquire skills in computer and information technology and also be competent in the field of Commerce, Mathematics and Management.

**PSO3:** Introduce and update knowledge relevant to IT like networking, computer graphics, web development, trouble shooting, and hardware and software skills. Also to develop software solutions to problems across a broad range of application domains through analysis and design.

**PSO4:** Become proficient and ensure job in the key areas of computer science like Web designing and development, Mobile applications, Network and communication technologies, undertaking government organizations, faculty for computer science and applications in educating institutions.

**PSO5:** Ability to analyze social and environmental aspects with professional values, ethics and equity to transform the knowledge, skills and expertise to the community.

**PSO6:** Ability to work as a member or leader in diverse teams in multidisciplinary environment. And identify opportunities, entrepreneurship vision and use of innovative ideas to create value and wealth for the betterment of the individual and society.

**STRONGLY CORRELATED - 3, MODERATELY CORRELATED – 2, WEAKLY CORRELATED - 1**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	UCCAA20	Programming in C	Theory	Core	4	5	40+60

### COURSE OBJECTIVES

1. To introduce students to the concept of basic programming- thereby reducing the design complexity and increasing the reusability of a component.
2. The course is designed to provide complete knowledge of C language.
3. Students will be able to develop logics which will help them to create programs, applications in C.
4. Also by learning the basic programming constructs they can easily switch over to any other language in future.
5. To create a program that measures or simulates performance and use it to analyze behavior.

### COURSE LEARNING OUTCOMES

The Learners will be able to

1. Introduce the students to understand the concept of basic programming- thereby reducing the design complexity and increasing the reusability of a component.
2. Construct the basic structure of C-programming, declaration and usage of variable.
3. Understand and develop conditional and iterative statements to write programs.
4. Exercise C programs that uses array and string.
5. Develop user defined functions to solve real time problems

### COURSE SYLLABUS

Unit I

Hours: 12

- 1.1 Algorithm and Flowchart (K1,K2,K3,K4)
- 1.2 Overview of C (K2)
- 1.3 Basic Techniques: Sum of Two Given Numbers- Swapping Two Numbers - Simple Interest Calculation (K1,K2,K3,K4)
- 1.4 Constants (K2,K3)
- 1.5 Variables (K2, K3)
- 1.6 Data Types. (K2 K3)

## **Unit II**

**Hours: 12**

- 2.1 Operators (K1, K2)
- 2.2 Expressions (K1, K2)
- 2.3 Managing Input Operations (K1, K2, K3, K4)
- 2.4 Managing Output Operations (K1, K2, K3, K4)
- 2.5 Decision Making and Branching (K1, K2, K3, K4)
- 2.6 Decision Making and Looping (K1, K2, K3, K4)

## **Unit III**

**Hours: 12**

- 3.1 Arrays (K1, K2, K3)
- 3.2 One Dimensional Array (K1, K2, K3)
- 3.3 Two Dimensional Array (K1, K2, K3)
- 3.4 Multi-Dimensional Array (K1, K2)
- 3.5 Dynamic Array (K1, K2)
- 3.6 Predefined Streams (K1)

## **Unit IV**

**Hours: 12**

- 4.1 Character Arrays and Strings (K1, K2, K3)
- 4.2 Reading and Writing String (K1, K2, K3)
- 4.3 Arithmetic Operation on Characters (K1, K2, K3)
- 4.4 Putting String Together and Comparison of Two Strings (K1, K2, K3)
- 4.5 String Handling Functions (K1, K2, K3)
- 4.6 Other Features of Strings (K1, K2)

## **Unit V**

**Hours: 12**

- 5.1 User-Defined Functions (K1, K2, K3)
- 5.2 Categories of functions (K1, K2, K3)
- 5.3 Recursions (K1, K2, K3)
- 5.4 Passing Array to Functions and Passing Strings to Functions (K1, K2, K3)
- 5.5 Scope- Visibility and Lifetime of Variables (K1, K2, K3)
- 5.6 Structures and Unions. (K1, K2, K3)

**SEMESTER I**

**UCCAB20- FUNDAMENTALS OF INFORMATION TECHNOLOGY**

<b>Year/ Sem</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
I / I	UCCAB20	Fundamentals of Information Technology	Theory	Core	4	5	40+60

**COURSE OBJECTIVES**

1. The main objective is to introduce Information Technology in a Simple Language to all undergraduate students regardless of their specialization.
2. To have the knowledge about communication networks and various types of network.
3. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry.
4. To understand operating system and Evolution and development of operating system.
5. To know the difference between windows and DOS.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the fundamental concepts of computers with the present level of knowledge of the students.
2. Identify the basic terminology used in computer programming.
3. Understand the basic taxonomy and terminology of the data communication networking.
4. Acquire the knowledge of Internet and its applications
5. Analyze the difference between an operating system and an application program.

## **COURSE SYLLABUS**

### **Unit I**

**Hours: 12**

- 1.1 Definition and Technological Trends in IT (K1,K2,K3)
- 1.2 Applications of Information Technology (K1,K2)
- 1.3 Introduction to Computers: Definition - Characteristics of a Computer (K1,K2)
- 1.4 Classification of Computers (K1,K2)
- 1.5 Basic Anatomy of the Computer (K1,K2)
- 1.6 Applications / Uses of Computers in Different Fields (K1,K2)

### **Unit II**

**Hours: 12**

- 2.1 Input Devices (K1,K2)
- 2.2 Output Devices (K1,K2)
- 2.3 Data Representation (K1,K2)
- 2.4 Programming Languages / Computer Languages (K1,K2)
- 2.5 System Software and Application Software (K1,K2)
- 2.6 Difference between System Software and Application Software (K1, K2, K3)

### **Unit III**

**Hours: 12**

- 3.1 Computer Networks : Overview of Networks (K1)
- 3.2 Intranet and Extranet (K2)
- 3.3 Communication Processor (K2)
- 3.4 Communication Media (K2)
- 3.5 Types of Networks: LAN, MAN, WAN (K2)
- 3.6 Network Topologies (K2)

### **Unit IV**

**Hours: 12**

- 4.1 Internet and its Applications : History of Internet - Uses of Internet - Advantages of Internet (K1)
- 4.2 Internet Access: Types of Internet Connections (K2)
- 4.3 Internet Protocols and Services (K2)
- 4.4 Internet Addressing: IP Address – URL – DNS (K2)
- 4.5 Web Browser and Search Engine (K3)
- 4.6 E-mail (K3)

### **Unit V**

**Hours: 12**

- 5.1 Operating System: Evolution of Operating Systems (K1)
- 5.2 Function of Operating System (K2)
- 5.3 Classification of Operating System (K2)
- 5.4 Example of Operating System – DOS –Windows – UNIX - Linux (K2)
- 5.5 Difference between Windows and DOS (K2)
- 5.6 Difference between Linux and Windows (K2)

### **Book for Study:**

1. Pelin Aksoy, Laura DeNardis, “Introduction to Information Technology”, 1st Edition, Cengage Learning India Private Limited, 2009.
2. Alexis Leon and Mathews Leon, “Fundamentals of Information Technology”, Second

**Books for Reference:**

1. Dr. P.Rizwan Ahmed, “Introduction to Information Technology”, Second Edition, Margham Publications, Chennai, 2016
2. Alexis Leon and Mathew Leon, “Internet for Everyone”, Second Edition, Vikas Publishing, 201

**SEMESTER I**  
**UCCAC20- Practical I: C**

Year / Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	UCCAC20	Practical I: C	Practical	Core	2	2	40+60

**COURSE OBJECTIVES**

1. To introduce students to the concept of basic programming- thereby reducing the design complexity and increasing the reusability of a component.
2. To learn data types and control structures in C.
3. To improve upon a solution to a problem.
4. Analyze a given problem and develop an algorithm to solve the problem.
5. To design, develop and test programs written in C.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Exercise with basic structure of the C program, declaration and usage of variable.
2. Resolve mathematical and scientific problem.
3. Develop the programs using conditional and iterative statements.
4. Implement array and string concept in C program.
5. Write real time problems using user defined functions

**Low - L, Medium - M, High - H**

**Practical Program:**

**(Hours: 30)**

1. Input and Output Operations.
2. Decision Making Statements.
3. Arrays and Looping Statements.
4. Two Dimensional Arrays.
5. The Concept of Functions.
6. Recursion.
7. Character Arrays
8. Structures and Unions

**SEMESTER II**  
**UCCAD20 – PYTHON**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	UCCAD20	Python	Theory	Core	4	4	40+60

**COURSE OBJECTIVES**

1. To describe the core syntax and semantics of Python programming language.
2. To discover the need for working with the strings and functions.
3. To illustrate the process of structuring the data using lists, dictionaries, tuples and sets.
4. To design real life situational problems and think creatively about solutions of them.
5. To apply a solution clearly and accurately in a program using Python

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the Numbers, Math functions, Strings, List, Tuples and Dictionaries in Python
2. Express different Decision Making statements and Functions
3. Interpret Object oriented programming in Python
4. Explain how to design GUI Applications in Python and evaluate different database operations
5. Design and develop Client Server network applications using python

## **COURSE SYLLABUS**

### **Unit I**

**(Hours: 12)**

- 1.1 Computer Systems - Python Programming Language (K1,K2)
- 1.2 Computational Thinking Python Data Types(K1,K2)
- 1.3 Expressions, Variables, and Assignments(K2,K3)
- 1.4 Strings - Lists (K2,K3)
- 1.5 Objects & Classes (K1, K2, K3,K4)
- 1.6 Python standard library. (K5, K6)

### **Unit II**

**(Hours: 12)**

- 2.1 Imperative Programming(K3)
- 2.2 Python Modules - Print() (K3,K4)
- 2.3 Function - Functional Eval() Execution Control Structures (K2,K3,K4)
- 2.4 User Defined Functions (K2,K3)
- 2.5 Python Variables(K3)
- 2.6 Assignments Parameter Passing.(K3)

### **Unit III**

**(Hours: 12)**

- 2.1 Text Data (K2,K3,K4)
- 2.2 Exceptions (k4)
- 2.3 Strings Revisited - Formatted Output(K3,K4)
- 2.4 Files(K2,K3)
- 2.5 Errors &Exceptions Execution Control Structures(K2,K3)
- 2.6 Decision Control & The IF Statement(K3,K4)

### **Unit IV**

**(Hours : 12)**

- 4.1 Container And Randomness (K2, K3)
- 4.2 Dictionaries (K3, K4)
- 4.3 Other Built-in Container Types (K2, K3)
- 4.4 Character Encodings (K2)
- 4.5 Strings (K2,K3)
- 4.6 Module Random (K3)

### **Unit V**

**(Hours: 12)**

- 5.1 FOR Loop & Iteration Patterns (K2, K3)
- 5.2 Two dimensional Lists While Loop (k2,K3)
- 5.3 More Loop Patterns - Additional Iteration (K1,K2,K3)
- 5.4 Control Statements Namespaces - Encapsulation in Functions(K3)
- 5.5 Global Vs. Local Namespaces (K2,K3,K5)
- 5.6 Exceptional Flow Control - Modules as Namespaces(K2,K4)

**Book for Study:**

**SEMESTER II**  
**UCCAЕ20 - COMPUTER ORGANIZATION AND ARCHITECTURE**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	UCCAЕ20	Computer Organization and Architecture	Theory	Core	4	5	40+60

**COURSE OBJECTIVES**

1. To make students understand the basic structure and operation of digital computer.
2. To understand the hardware-software interface.
3. To familiarize the students with arithmetic and logic unit and implementation of fixed point and floating-point arithmetic operations.
4. To expose the students with different ways of communicating with I/O devices and standard I/O interfaces.
5. To familiarize the students with hierarchical memory system including cache memories and virtual memory.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Explain the organization of basic computer, its design and the design of control Unit.
2. Elaborate advanced concepts of computer architecture, Parallel Processing, Inter-processor communication and synchronization.
3. Demonstrate the working of central processing unit and RISC and CISC Architecture.
4. Describe the operations and language the register transfer, micro operations and input-output organization.
5. Understand the organization of memory and memory management hardware.

**Low - L, Medium - M, High – H**

## **COURSE SYLLABUS**

### **Unit I**

**Hours: 13**

- 1.1 Digital Computers-Logic Gates-Boolean Algebra (K1, K2)
- 1.2 Map Simplification – Combinational Circuits – Sequential Circuits (K3)
- 1.3 Flip-Flops (SR D JK T) (K3, K4)
- 1.4 Digital Components: Decoders – Multiplexers (K2, K3)
- 1.5 Register – Shift Register (K3)
- 1.6 Data Representation: Data Types - Complements - Other Binary Codes. (K1, K2, K4)

### **Unit II**

**Hours: 11**

- 2.1 Basic Computer Organization and Design: Instruction Codes (K2, K3)
- 2.2 Computer Registers (K4)
- 2.3 Computer Instructions (K3, K4)
- 2.4 Timing and Control (K2)
- 2.5 Instruction Cycle (K3, K4)
- 2.6 Memory Reference Instructions. (K3, K4)

### **Unit III**

**Hours: 12**

- 3.1 Programming the Basic Computer: Introduction - Machine Language (K2)
- 3.2 Assembly Language (K3, K6)
- 3.3 The Assembler (K3, K4)
- 3.4 Central Processing Units: Introduction - General Register Organization (K2, K3)
- 3.5 Instruction Formats - Addressing Modes (K3, K4)
- 3.6 RISC and CISC Characteristics. (K4)

### **Unit IV**

**Hours: 12**

- 4.1 Input Output Organization: Peripheral Devices (K1, K2)
- 4.2 Input/output Interface (K3, K4)
- 4.3 Asynchronous Data Transfer (K3)
- 4.4 Modes of Transfer (K3, K4)
- 4.5 Priority Interrupt (K3)
- 4.6 Direct Memory Access. (K3)

- 5.1 Memory Organization: Memory Hierarchy (K1, K2)
- 5.2 Main Memory (K1, K2)
- 5.3 Auxiliary Memory (K2, K3)
- 5.4 Cache Memory (K3, K4)
- 5.5 Virtual Memory: Address Space and Memory Space – Address Mapping using Pages (K3, K6)
- 5.6 Associative Memory Page Table – Page Replacement (K3, K6)

**Book for Study:**

1. M.Morris Mano, “Computer System Architecture”, Edition 3, Prentice Hall of India Pvt. Ltd., 2013.

**SEMESTER II**  
**UCCAF20 – PRACTICAL V: PYTHON**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	UCCAF20	Practical V: Python	Practical	Core	2	2	40+60

**COURSE OBJECTIVES**

1. To describe the core syntax and semantics of Python programming
2. Python programming is intended for software engineers, system analysts, program managers and user support personnel who wish to learn the Python programming language.
3. To understand why Python is a useful scripting language for developers.
4. To learn how to design and program Python applications.
5. To learn how to use lists, tuples, and dictionaries in Python programs.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. To Understand the Numbers, Math functions, Strings, List, Tuples and Dictionaries in Python
2. Express different Decision Making statements and Functions
3. Interpret Object oriented programming in Python
4. Explain how to design GUI Applications in Python and evaluate different database operations
5. Design and develop Client Server network applications using python

CO5	H	H	L	H	M	M

**Low - L, Medium - M, High - H**

1. Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.
2. Program to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria:
  - i. Grade A: Percentage  $\geq 80$
  - ii. Grade B: Percentage  $\geq 70$  and  $< 80$
  - iii. Grade C: Percentage  $\geq 60$  and  $< 70$
  - iv. Grade D: Percentage  $\geq 40$  and  $< 60$
  - v. Grade E: Percentage  $< 40$
3. Program, using user defined functions to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
4. Program to display the first n terms of Fibonacci series
5. Program to find factorial of the given number.
6. Program to find sum of the following series for n terms:  $1 - 2/2! + 3/3! - \dots + n/n!$
7. Program to calculate the sum and product of two compatible matrices.

**SEMESTER III**  
**UCCAG20-Data Structures**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCCAG20	Data Structures	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. On learning this paper students will gain the knowledge on different types of data along with the structures and its algorithm.
2. To impart the basic concepts of data structures and algorithms
3. To understand concepts about searching and sorting techniques
4. To Understand basic concepts about stacks, queues, lists, trees and graphs
5. To understanding about writing algorithms and step by step approach in solving problems with the help of fundamental data structures

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Discuss the concept of complexity of algorithms, data types, algorithms, Big O notation.
2. Apply basic data structures such as arrays, linked lists, stacks and queues.
3. Identify problem involving trees and binary search trees.
4. Apply Algorithm for solving problems like sorting, searching, insertion and deletion of data using linked list.
5. Analyze graphs and describe the hash function and concepts of collision and its resolution methods.

# COURSE SYLLABUS

## Unit I

**Hours: 15**

- 1.1 Introduction - Data structure operations (K1)
- 1.2 Complexity and Time Space of Algorithms (K2)
- 1.3 Mathematical Notation and Functions - Algorithmic Notation K2)
- 1.4 Control Structures - Complexity of Algorithms - Sub Algorithms - Variables - Data Types (K2)
- 1.5 String Processing: Basic Terminology - Storing Strings (K3)
- 1.6 Character Data Type - String Operations (K2)

## Unit II

**Hours: 15**

- 2.1 Linear Arrays Representation in Memory (Cognitive Level: K1)
- 2.2 Traversals (Cognitive Level: K2)
- 2.3 Inserting and Deleting (Cognitive Level: K3)
- 2.4 Sorting – Searching (Cognitive Level: K3)
- 2.5 Multidimensional Arrays (Cognitive Level: K1)
- 2.6 Pointer Arrays. (Cognitive Level: K1)

## Unit III

**Hours: 15**

- 3.1 Linked Lists: Representation in Memory - Traversing a Linked List (K1)
- 3.2 Searching – Garbage Collection (K1)
- 3.3 Insertion and Deletion - Headers – Two Way Lists (K3)
- 3.4 Array Representation - Arithmetic Expressions- Recursion (K1)
- 3.5 Queues - Application Circular queues - Priority Queues. (K1.K3)

## Unit IV

**Hours: 15**

- 4.1 Trees - Binary Trees - Representation in Memory (K1)
- 4.2 Tree Traversals (K2)
- 4.3 Binary Search Trees (K2)
- 4.4 Searching (K3)
- 4.5 Inserting and Deleting (K2)
- 4.6 Path Lengths - General Trees (K1)

## Unit V

**Hours: 15**

- 5.1 Graphs - Sequential Representation (K1)
- 5.2 Adjacency Matrix - Path Matrix (K2)
- 5.3 Heap Sort (K1)
- 5.4 Warshall's Algorithm for Shortest Path (K2)
- 5.5 Linked Representation - Graph Traversals (K1)
- 5.6 Hashing (K1)

## Book for Study:

1. Seymour Lipschutz, "Data Structures: Schaum's Outline Series", Revised Edition, McGraw Hill Publication, 2011.

## Reference Books :

1. Ellis Horowitz, Sartaj Sahni, Susan Anderson Freed, "Fundamentals of Data Structures in C", 2<sup>nd</sup> Edition, Universities Press Pvt Ltd, 2018

**SEMESTER III**  
**UCCA20 - Java Programming**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCCA20	Java Programming	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. This course provides an introduction to object oriented programming (OOP) using the Java programming language.
2. Its main objective is to teach the basic concepts and techniques which form the object oriented programming paradigm
3. Concepts of object oriented programming in java are needed.
4. To provide sufficient knowledge about developing real world projects with object oriented concept.
5. To have the knowledge of Exception handling and Event handling and applets.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Able to understand the use of OOPs concepts.
2. Able to solve real world problems using OOP techniques. To understand the use of polymorphism and Inheritance.
3. Able to understand the use of Packages and Interface in java.
4. Able to develop and understand exception handling, multithreaded applications with synchronization.
5. Able to design GUI based applications and develop AWT and applets for web applications.

# COURSE SYLLABUS

## Unit I

Hours: 15

- 1.1 Introduction to Java (K1)
- 1.2 Features of Java (K1)
- 1.3 Lexical issues & Data types (K1)
- 1.4 Variables - Operators (K1)
- 1.5 Type conversion and casting (K2)
- 1.6 Control Statements (K2)

## Unit II

Hours: 15

- 2.1 Arrays – Strings (K1)
- 2.2 Classes - Objects-Constructors - Overloading method (K2)
- 2.3 Access Control - Static and Fixed method (K2)
- 2.4 Inner Class –String class (K2)
- 2.5 Inheritance - Overriding Method (K3)
- 2.6 Using Super Class. (K2)

## Unit III

Hours: 15

- 3.1 Input/output: Exploring Java i/o: The Java I/O classes (K1)
- 3.2 Interfaces (K2)
- 3.3 File Stream Classes (K2)
- 3.4 Packages (K3)
- 3.5 Access Protection - Importing Packages (K3)
- 3.6 Interfaces (K2)

## Unit IV

Hours: 15

- 4.1 Exception Handling: try, catch (K1)
- 4.2 Throw and Throws - Finally (K2)
- 4.3 Thread - Creating a Thread (K4)
- 4.4 Multithreading (K2)
- 4.5 Synchronization (K3)
- 4.6 Deadlock. (K2)

## Unit V

Hours: 15

- 5.1 The Java Applet and (K4)
- 5.2 HTML APPLET tag (K4)
- 5.3 getDocumentBase() and getCodeBase() (K5)
- 5.4 Event Handling (K3)
- 5.5 Working with Windows (K4)
- 5.6 AWT Classes. (K2)

**UCCAI20 - Design and Analysis of Algorithms**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCCAI20	Design and Analysis of Algorithms	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. To demonstrate a familiarity with major algorithms and data structures.
2. To apply important algorithmic design paradigms and methods.
3. To synthesize efficient algorithms in problem solving situations.
4. To apply important algorithmic design paradigms and methods of analysis.
5. To apply important algorithmic design paradigms and methods of analysis.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Define the basic concepts of algorithms and analyze the performance of algorithms.
2. Discuss various algorithm design techniques for developing algorithms
3. Identify the usage of set of rules design methods including the greedy approach, divide and overcome, dynamic programming, and certain.
4. Understand the variations among backtracking, graph coloring and 8 Queens problems
5. Understand NP completeness and identify different NP complete problems

# COURSE SYLLABUS

## Unit I

Hours: 15

- 1.1 Basic Concepts: Overview - System Life Cycle (K1)
- 1.2 PseudoCode for Expressing Algorithms (K1)
- 1.3 Algorithm Specification (K1)
- 1.4 Performance Analysis (K2)
- 1.5 Performance Measurement Space Complexity, Time Complexity (K2)
- 1.6 Asymptotic Notation - Big Oh Notation, Omega Notation, Theta Notation and Little Oh Notation. (K2)

## Unit II

Hours: 15

- 2.1 Divide and Conquer: General Method (K2)
- 2.2 Finding the Maximum and Minimum (K3)
- 2.3 Merge Sort (K3)
- 2.4 Quick Sort (K3)
- 2.5 Selection (K2)
- 2.6 Optimal Binary Search Trees (K2)

## Unit III

Hours: 15

- 3.1 Greedy method: General method - Knapsack Problem (K2)
- 3.2 Minimum Cost Spanning Trees (K2)
- 3.3 Single Source Shortest Path Problem (K2).
- 3.4 Dynamic Programming: General method (K2)
- 3.5 All Pairs Shortest Path Problem (K2)
- 3.6 Travelling Sales Person Problem (K2,K3,K4)

## Unit IV

Hours: 15

- 4.1 Backtracking: General Method (K1)
- 4.2 8 Queens Problem (K2,K3)
- 4.3 Sum of Subsets (K2)
- 4.4 Graph Coloring (K2)
- 4.5 Hamiltonian Cycles (K2,K3)
- 4.6 Knapsack Problem (K2,K3)

## Unit V

Hours: 15

- 5.1 Branch and Bound: General method (K2)
- 5.2 Least Cost (LC) Search (K2,K3)
- 5.3 FIFO Branch and Bound (K2,K4)
- 5.4 LC Branch and Bound Solution (K2,K3)
- 5.5 NP Hard and NP Complete Problems- basic concepts (K2,K3)
- 5.6 Non deterministic algorithms (K2,K3)

### Book for Study:

1. Ellis Horowitz, Sartaj Sahni, SanguthevarRajasekaran, "Fundamentals of Computer Algorithms", 2<sup>nd</sup> Edition, Galgotia Publication Pvt.Ltd., 2009.

### Books for Reference:

1. Yashavant P. Kanetkar, "Data Structure through C", 2<sup>nd</sup> Edition, BPB Publications, 2003.
2. Thomas H Corman, Charles Eleiserson, RonaldL. Rivest,Clifford Stein, "Introduction

to Algorithms”, 3rd Edition, PHI Learning Pvt. Ltd, 2010.

3. Seymour Lipschutz, “Data Structures with C”, Revised Edition, Schaum’s Outline Series, 2009

**OER:**

1. <http://freecomputerbooks.com/compscAlgorithmBooks.html>

**SEMESTER III**  
**UCCAJ20 - Practical - III: Java**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCCAJ20	Practical - III: Java	Practical	Core	3	2	40+60

**COURSE OBJECTIVES**

1. To introduce the object oriented programming concepts.
2. To understand object oriented programming concepts, and apply them in solving problems.
3. To introduce the principles of inheritance and polymorphism; and demonstrate how they relate to the design of abstract classes
4. To introduce the concepts of exception handling and multithreading.
5. To introduce the design of Graphical User Interface using applets and swing controls.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods etc and I/O Streams.
2. Establish exception handling is used to minimize the errors in Java programming.
3. Demonstrate the concepts of Packages and Interface.
4. Evaluate the Java programs to implement error handling techniques using exception handling.
5. Design GUI based applications and develop applets for web applications.

CO/PO	PO

CO2	L	H	M	H	H	M
CO3	M	H	H	L	M	H
CO4	H	L	H	L	H	M
CO5	L	M	H	H	H	H

**Low -L, Medium -M, High-H**

1. Implementing String manipulation using character Array.
2. Implementing Input and Output Stream.
3. Implementing Packages and Interface.
4. Implementing Exception handling.
5. Implementing Real time application using multithread.
6. Implementing Applet using Graphics class.
7. Implementing AWT controls.
8. Implementing Colors and fonts.
9. To create any applications using Applets and AWT.

**SEMESTER III**  
**UCCA20 - Practical: Data Structures and Algorithms**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCCA20	Practical - IV: Data Structures and Algorithms	Practical	Core	3	2	40+60

**COURSE OBJECTIVES:**

1. Analyze the asymptotic performance of algorithms.
2. Write rigorous correctness proofs for algorithms.
3. Demonstrate a familiarity with major algorithms and data structures.
4. Apply important algorithmic design paradigms and methods of analysis.
5. Simplify efficient algorithms in common engineering design situations.
6. Analyze the asymptotic performance of algorithms.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Implement PUSH, POP and Add and delete operations of Stack using Arrays.
2. Explore the Infix to postfix conversion and binary tree traversals and its algorithms like depth first and breadth first traversal
3. Understanding polynomial addition and merge sort using Divide and Conquer Technique.
4. Implement travelling Salesman problem using Dynamic programming and Hashing with two collision techniques.
5. Implement PUSH, POP and Add and delete operations of Stack using Arrays.

CO/PO	PO

CO4	L	H	M	H	L	H
CO5	H	H	H	L	M	M

**Low -L, Medium -M, High-H**

1. Implementing PUSH, POP operations of Stack using Arrays.
2. Implementing add, delete operations of a Queue using Arrays.
3. Implementing Infix to postfix conversion of an expression using Stack.
4. Implementing Binary tree traversals (inorder, preorder, postorder).
5. Implementing Polynomial addition using linked list.
6. Implementing the following graph traversal algorithms:
  - a) Depth first traversal
  - b) Breadth first traversal
7. Implementing Merge sort using Divide and Conquer Technique.
8. Implementing Travelling Salesman problem using Dynamic Programming technique.
9. Implementing Hashing - any two Collision techniques.
10. Implementing Knapsack problem

**II Year – SKILL BASED ELECTIVE  
USCAA320 - SBE: ACCOUNTING SOFTWARE**

II / III	USCAA320	SBE: Accounting Software	Theory with Practical	Skill Based Elective	2	2	40+60

**COURSE OBJECTIVE**

1. To seamlessly combine the activities of accounting, inventory, payroll, finance and more.
2. To maintain a record of all monetary transactions.
3. To apply the knowledge of quantitative tools & techniques in the interpretation of data for managerial decision – making.
4. To develop computer skills of recording financial transactions, preparation of annual accounts and reports using Tally.
5. To acquaint with the accounting concept, tools and techniques influencing business organization.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the basics in Tally and company creations
2. Creating vouchers, ledgers accounts, Balance Sheet
3. Demonstrate Profit And Loss Account and Reconciliation of the bank account.
4. Create company accounts that use various functions like Cost Category and Cost Centre
5. Learn to apply the tools & techniques in the interpretation of data for managerial decision – making.

**Low - L, Medium - M, High - H**

# COURSE SYLLABUS

## Unit I

**Hours: 5**

- 1.1 Company Creation and Configuration : Creation for New Company(K1,k2)
- 1.2 Company Features Accounting Features (K1,k2)
- 1.3 Inventory Features – Configuring Tally (K1,k2,k6)
- 1.4 Configuring Voucher Entry (k5,k6)
- 1.5 Configuring Invoice/Orders Entry – Shut A Company(k4,k5)
- 1.6 Alter a Company – Delete a Company(K4,k5)

## Unit II

**Hours: 5**

- 2.1 Accounting and Inventory an Outline : Fundamentals of Accounting – Accounting Terms Definitions – Ledger and Ledger Accounts (K2,K3)
- 2.2 Trial Balance – Trading and Profit and Loss Account (K1,K2)
- 2.3 Profit and Loss Account – Balance Sheet – Fundamentals of Inventory (K1, K2)
- 2.4 Accounts Masters Creation: Accounts Information – Group (Create, Display, Delete) Multiple Groups (K1,K2)
- 2.5 Ledgers (Create, Display, Alter) – Multiple Ledgers (K2, K4, K5)
- 2.6 Cost Categories – Cost Centres. (K5, K6)

## Unit III

**Hours: 6**

- 3.1 Inventory Master Creation: Stock Groups – Entering Vouchers (K1,K2,K4)
- 3.2 Voucher Types –Voucher Entry (K3, K4)
- 3.3 Different Types of Accounting Vouchers(Payment/Receipt, Journal, Sales , Purchase) (K2,K3,K4)
- 3.4 Reports In Tally: Display Balance Sheet – Profit And Loss Account (K3,K4,K5)
- 3.5 Display Trial Balance – Day Book (K2,K3,K4)
- 3.6 Reconciliation of Bank Accounts. (K5,K6)

## Unit IV

**Hours: 6**

1. Trading , Profit and Loss Account of a Company
2. Balance Sheet of a Company
3. Cost Category and Cost Centre

## Unit V

**Hours: 6**

4. Bank Reconciliation Statement
5. Inventory and Stock
6. Display and Reporting

### Books for Study:

1. LP Computer Series - Guide To Tally 9 - Law Point, Kolkata, First Edition, 2007.

### Books for Reference:

1. Tally for Beginners - Tally Press.

**SEMESTER IV**  
**UCCAL20 -DATA COMMUNICATIONS AND NETWORKING**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	UCCAL20	Data Communications and Networking	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. To discuss and explain about basics of data communication and networking concepts.
2. To introduce analysis and design of computer and communication networks.
3. Understand the network layered architecture and the protocol stack.
4. Design the basic configuration of routers and switches.
5. Resource sharing in the computer network to provide high Reliability.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Describe the Functions of each layer in OSI and TCP/IP Model.
2. Explain the types of Transmission Media with Real-Time Applications.
3. Apply Time and Frequency concept of analysis.
4. Manage Network functions for an Organization.
5. Analyze various Routing Algorithms and Protocols.

# COURSE SYLLABUS

## Unit I

**Hours: 14**

- 1.1 Data Communications, Data Networking, and the Internet: Data Communications and Networking for Today's Enterprise - Communications Model.(K1, K2)
- 1.2 Data Communications - Networks - The Internet. (K2, K3)
- 1.3 Protocol Architecture, TCP/IP, and Internet - Based Applications: The Need for Protocol Architecture. (K2, K3)
- 1.4 The TCP/IP Protocol Architecture –The OSI Model. (K3, K4)
- 1.5 Standardization within a Protocol Architecture - Traditional Internet (K2, K3)
- 1.6 Data Transmission: Concepts and Terminology - Analog and Digital Data Transmission - Transmission Impairments (K2, K3)

## Unit II

**Hours: 16**

- 2.1 Transmission Media: Guided Transmission Media. (K3)
- 2.2 Wireless Transmission - Wireless Propagation (K3)
- 2.3 Signal Encoding Techniques: Digital Data, Digital Signals - Digital Data, Analog Signals. (K3, K4)
- 2.4 Analog Data, Digital Signals - Analog Data, Analog Signals. (K3)
- 2.5 Digital Data Communication Techniques: Asynchronous and Synchronous Transmission - Types of Errors (K2, K3, K4)
- 2.6 Error Detection. Error Correction (K2,K3)

## Unit III

**Hours: 14**

- 3.1 Data Link Control Protocols: Flow Control - Error Control. (K2)
- 3.2 High Level Data Link Control (HDLC). (K3)
- 3.3 Multiplexing: Frequency Division Multiplexing - Synchronous Time Division Multiplexing - Statistical Time Division Multiplexing. (K3, K4)
- 3.4 Asymmetric Digital Subscriber Line –xDSL.(Cognitive Level: K2, K3)
- 3.5 Spread Spectrum: The Concept of Spread Spectrum - Frequency Hopping Spread Spectrum. (K3, K4, K5)
- 3.6 Direct Sequence Spread Spectrum – Code Division Multiple Access. (K3, K4, K5)

## Unit IV

**Hours: 16**

- 4.1 Circuit Switching and Packet Switching: Switched Communications Networks - Circuit Switching Networks. (K2, K4)
- 4.2 Circuit Switching Concepts - Softswitch Architecture. (K2, K4)
- 4.3 Packet Switching Principles - X.25 - Frame Relay. (K4, K5)
- 4.4 Asynchronous Transfer Mode: Protocol Architecture. (K4)
- 4.5 ATM Logical Connections - ATM Cells - Transmission of ATM Cells. (K5)
- 4.6 ATM Service Categories. (K4, K5)

## Unit V

**Hours: 15**

- 5.1 Routing in Switched Networks: Routing in Packet Switching Networks - Examples: Routing in ARPANET. (K2, K3)
- 5.2 Least Cost Algorithms. (K3, K4)
- 5.3 Effects of Congestion - Congestion Control.( K4)
- 5.4 Traffic Management - Congestion Control in Packet Switching Networks.(K4, K5, K6)
- 5.5 Frame Relay Congestion Control - ATM Traffic Management. (K5, K6)
- 5.6 ATMGFR Traffic Management. (K5, K6)

**Book for Study:**

1. William Stallings, “Data and Computer Communications”, 8<sup>th</sup> Edition , Pearson Education, Inc., 2016.

**Books for Reference:**

1. Andrews S. Tanenbaum, “Computer Networks”, 4<sup>th</sup> Edition , Prentice Hall of India Private Limited, 2011
2. Leon Garcia and Widjaja, “Communication Networks, Fundamental Concepts and Key Architecture “, 2<sup>nd</sup> Edition, Tata McGraw Hill, 2001.
3. Behrouz A. Forouzan, “Data Communications and Networking”, Fourth Edition, Tata McGraw Hill, 2017.

2. <http://freecomputerbooks.com/networkCategory.html>

**SEMESTER IV**  
**UCCAM20 – OPERATING SYSTEM**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	UCCAM20	Operating System	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. To describe basic components of operating system.
2. To understand basic principles used in the design of modern operating systems.
3. To illustrate the general architecture of computers.
4. To Understand and analyze theory.
5. To analyze: processes, resource control (concurrency etc.), physical and virtual memory, scheduling, I/O.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Acquire the important computer system resources and the role of operating system in their management policies and algorithms
2. Understand the process management policies and scheduling of processes by CPU.
3. Evaluate the requirement for process synchronization and coordination handled by operating system
4. Describe and analyze the memory management and its allocation policies
5. Entity use and evaluate the storage management policies with respect to different storage management technologies

# COURSE SYLLABUS

## Unit I

Hours: 12

- 1.1 LINUX: Introduction, Brief history. Unix Components/Architecture (K1)
- 1.2 Features of Unix. (K1)
- 1.3 Basic Commands: Directory and File Commands: pwd, ls, cd, cp, mv, rm, mkdir, rmdir, chmod. (K2)
- 1.4 Full and Relative Pathnames (K2)
- 1.5 File and Directory Naming Conventions. (K1,K2)
- 1.6 Wildcard Characters? - Ownership and Permission: chmod, chgrp, chown. (K1,K2)

## Unit II

Hours: 12

- 2.1 Shell Programming Language (K2)
- 2.2 Naming Shell Programs. (K2)
- 2.3 Shell Variables and Arguments. (K2,K3)
- 2.4 Command Line Arguments. (K2,K3)
- 2.5 Looping and Conditional Execution: if..then..else..elseif..fi.(K1,K2,K3)
- 2.6 While ..do, for..do..done, for, while, until and case statements, break and continue, true and false commands. (K3)

## Unit III

Hours: 12

- 3.1 System calls - Types of System calls (K3)
- 3.2 Process Management: Process Concepts (K2,K3,K5)
- 3.3 Inter Process Communication (K2,K3,K5)
- 3.4 Multithreaded Programming: Multithreading Models. (K5)
- 3.5 Process Scheduling: Basic Concepts - Scheduling Criteria - Scheduling Algorithms. (K3,K4)
- 3.6 Deadlock: Deadlock Characterization - Deadlock Avoidance. (K3,K4)

## Unit IV

Hours: 12

- 4.1 Memory Management: Background – Swapping. (K3, K4)
- 4.2 Contiguous Memory Allocation – Paging. (K3, K4)
- 4.3 Structure of the Page Table (K3, K4)
- 4.4 Segmentation. (K3, K4)
- 4.5 Virtual Memory Management: Demand Paging (K3, K4)
- 4.6 Page Replacement - Thrashing. (K4)

## Unit V

Hours: 12

- 5.1 File System: File Concept - Access methods (K1, K2, K3)
- 5.2 Directory Structure. (K1, K2, K3)
- 5.3 Implementing File Systems: File System Structure and Implementation. (K1, K2, K4)
- 5.4 Allocation Methods - Free Space Management. (K1, K2, K4)
- 5.5 Secondary Storage Structure Disk Structure (K1, K2, K3)
- 5.6 Disk Scheduling. (K1, K2, K4)

### Book for Study:

1. Behrouz A. Forouzan, Richard F. Gilberg.Thomson, “Unix and shell Programming”, 2005.
2. Meeta, Tilak & Rajiv, “The ‘C’ Odyssey UNIX - The Open, Boundless C”, First Edition, BPB Publication 1992.

3. Silberschatz Galvin Gagne, “Operating System Principles”, 7 th Edition, Prentice Hall, 2011.

**Books for Reference:**

1. Your UNIX the ultimate guide, Sumitabha Das, 2nd Edition, TMH, 2007.
2. UNIX for programmers and users, 3rd edition, Graham Glass, King Ables, Pearson Education.
2. Richard Rosinski, Douglas Host, Kenneth Rosen, Rachel Klee, “UNIX: The Complete Reference”, Second Edition, 2007.
3. Andrew S. Tanenbaum, “Operating Systems, Design and Implementation”, 2nd Edition, Prentice Hall of India, 2012.

**SEMESTER IV**  
**UCCAN20 - .NET PROGRAMMING**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	UCCAN20	.Net Programming	Theory	Core	5	4	40+60

**COURSE OBJECTIVES**

1. Understand code solutions and compile C# projects within the .NET framework.
2. Design and develop professional Console and Window based .NET application.
3. Demonstrate knowledge of object-oriented concepts design user experience and functional requirements C#.NET application.
4. Understand and implement string manipulation, events and exception handling within .NET application environment.
5. Identify and resolve problems in C#.NET window based application.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the concepts of .NET Framework and C#.
2. Apply the usage of Methods, Arrays and Strings.
3. Interpret the concepts of Constructors, Inheritance and Interfaces.
4. Analyze Operator Overloading, Delegates, Events and Exceptions.
5. Create Windows Applications and Web - based Applications.

# COURSE SYLLABUS

## Unit I

**Hours: 13**

- 1.1 Introduction – Evolution of C# – Characteristics of C# – Applications of C# (K1, K2)
- 1.2 Origins of .NET Technology – .NET Framework (K1, K2)
- 1.3 Common Language Runtime–User and Program Interfaces – .NET Languages (K2, K3)
- 1.4 Benefits of the .NET Approach – Simple C# Program – Namespaces (K3, K4)
- 1.5 Providing Interactive Input – Literals, Variables and Data Types (K5,K2)
- 1.6 Decision Making and Branching Statements. (K3, K5)

## Unit II

**Hours: 14**

- 2.1 Decision Making and Looping Statements – Methods in C# (K3, K4)
- 2.2 Declaring Methods – Invoking Methods – Nesting of Methods (K2, K3)
- 2.3 Method Parameters – Pass by Value – Pass by Reference – Output Parameters (K2)
- 2.4 Method Overloading – One Dimensional Array – Creating an Array – Two Dimensional Arrays (K3, K4)
- 2.5 Array List Class – Manipulating Strings – Creating Strings – String Methods (K5, K6)
- 2.6 Inserting strings – Comparing Strings – Finding Substrings – Array of Strings. (K5)

## Unit III

**Hours: 11**

- 3.1 Classes and Objects – Defining a Class – Adding variables and methods (K1, K3)
- 3.2 Creating objects – Constructors – Member Initialization – this Reference (K2, K4)
- 3.3 Nesting of Classes–Indexers –Classical Inheritance –Containment Inheritance (K4, K5)
- 3.4 Defining a subclass – Defining Subclass Constructors – Multilevel Inheritance – Hierarchical Inheritance (K3)
- 3.5 Overriding Methods – Defining an interface – Implementing interfaces (K4, K5)
- 3.6 Interface and Inheritance – Explicit interface implementation. (K6)

## Unit IV

**Hours: 12**

- 4.1 Need for Operator Overloading – Defining Operator Overloading (K3, K4)
- 4.2 Overloading Binary Operators – Overloading Comparison Operators (K5)
- 4.3 Delegate Declaration – Delegate Methods – Delegate Instantiation (K2, K4)
- 4.4 Delegate Invocation – Using Delegate – Events – Exceptions (K2, K3)
- 4.5 Types of errors – Multiple Catch Statements – Exception Hierarchy (K3)
- 4.6 General Catch Handler – Using Finally Statement. (K3, K4)

## Unit V

**Hours: 10**

- 5.1 Creating Window Forms (K3, K4)
- 5.2 Customizing a Form (K2, K3)
- 5.3 Creating a Windows Application (K5)
- 5.4 Running a Windows Application (K3, K4)
- 5.5 Creating Web based Application on .NET (K3, K4)
- 5.6 Creating a .NET application to send SMS to mobile phones. (K2, K3)

## Books for Study:

1. E. Balagurusamy, “Programming in C#”, Fourth Edition, Tata McGraw Hill Education, 2017.

## Books for Reference:

1. Herbert Schildt, "Complete Reference C#", Tata McGraw-Hill, 2010.
2. John Sharp, “Microsoft Visual C# Step by Step”, Eighth Edition, PHI Publications, 2016.
3. Harsh Bhasin, “Programming in C#”, First Edition, Oxford University Press, 2014.

**OER:**

**SEMESTER IV**  
**UCCAO20 – PRACTICAL V: LINUX**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	UCCAO20	Practical V: Linux	Practical	Practical	3	2	40+60

**COURSE OBJECTIVES**

1. To Provides the skills in Linux Shell Script
2. To learn programmatically to implement simple OS mechanisms.
3. To understand shell script in files
4. To learn about standard I/O and system calls.
5. To learn suspending and resuming process.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Become familiar with the C language, gcc compiler, and make files to understand the high-level structure of the Linux kernel.
2. Understand the high-level structure of the Linux kernel both in concept and source code.
3. Acquire a detailed understanding of one aspect (the scheduler) of the Linux kernel
4. To learn to develop software for Linux systems.
5. To obtain a foundation for an advanced course in operating systems.

CO5	H	M	L	H	M	M

**Practical Programs:****Hours: 40**

1. Write a shell script that accepts a file name, starting and ending line numbers as arguments and displays all the lines between the given line numbers.
2. Write a shell script that displays a list of all files in the current directory to which the user has read, write and execute permissions.
3. Write a shell script to find the factorial of a given number.
4. Write a C program that makes a copy of a file using standard I/O and system calls.
5. Implement in C the following Linux commands using system calls:
  - a. (a) cat (b) ls (c) mv .
6. Write a C program to list every file in a directory, its inode number and file name.
7. Write a C program that illustrates how to execute two commands concurrently with a command pipe. Ex: `ls -l | sort`.
8. Write a C program that illustrates suspending and resuming processes using signals.
9. Write a C program that implements a producer-consumer system with two processes (using semaphores).
10. Write a C program that illustrates two processes communicating using shared memory.

**SEMESTER IV**  
**UCCAP20 - PRACTICAL VI: .NET**

<b>Year /Sem</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
II / IV	UCCAP20	Practical VI: .NET	Practical	Practical	3	2	40+60

**COURSE OBJECTIVES**

1. Understand code solutions and compile C# projects within the .NET framework.
2. Design and develop professional Console and Window based .NET application.
3. Demonstrate knowledge of object-oriented concepts design user experience and functional requirements C#.NET application.
4. Understand and implement string manipulation, events and exception handling within .NET application environment.
5. Identify and resolve problems in C#.NET window based application.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand code solutions and compile C# projects within the .NET framework.
2. Create user interactive web pages using .NET.
3. To develop, implement and creating Applications with C#.
4. Debug, compile, and run a simple application.
5. Create Mobile Application using .NET compact Framework

**Practical Programs:****Hours: 40**

1. Program using Decision Statements.
2. Program using Iteration Statements.
2. Program using Method Overloading.
3. Program using One Dimensional and Two Dimensional Arrays.
4. Program using Strings.
5. Program using Classes and Objects.
6. Program using Constructors.
7. Program using Inheritance.
8. Program using Binary Operator Overloading.
9. Program using Exception Handling with Multiple Catch Statements.
10. Designing a Windows Application using Window Forms.
11. Creating a .NET application to send SMS to Mobile Phones using Web.

**II YEAR - SKILL BASED ELECTIVE  
USCSB420 - DESIGN AND ANIMATION**

<b>Year/ Sem</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/ W</b>	<b>Credits</b>	<b>Marks</b>
II/IV	USCSB420	Design and Animation	Practical	Skill Based Elective	2	2	25+35

**COURSE OBJECTIVES**

1. To provide knowledge about the latest computer animations like Photoshop and Flash.
2. Enables the students to develop and manage pictures, changing the colors, animation and different Tweening options.
3. Identify the categories of Tools and Identify each tools corresponding keyboard shortcut.
4. Design, Manipulate and customize palettes.
5. To create animated graphics, add sound and interactivity.

**COURSE SYLLABUS**

**Unit I**

**Hours: 6**

- 1.1 Introduction to Multimedia (K1)
- 1.2 The Elements of Multimedia System (K2)
- 1.3 Benefits of using Multimedia (K2)
- 1.4 Multimedia Platforms: Multimedia Hardware (K2)
- 1.5 System Software - Future Directions. (K1,K2)
- 1.6 Storage for Multimedia: Choice of Storage - Magnetic Media - Optical Media (K3)

**Unit II**

**Hours: 5**

- 2.1 Introduction - Bitmaps and Vectors (K1)
- 2.2 Toolbox: Selection tools - Painting tools - Editing tools - Retouching Tools (K2)
- 2.3 Colours setting (K3)
- 2.4 Layers: Working with Layers - Layer Styles - Locking Layers - Merging Layers (K2)
- 2.5 Managing Layers Components (K2)
- 2.6 Palettes(K1)

**Unit III**

**Hours :5**

- 3.1 Introduction flash (K1)
- 3.2 Basics - Creating objects - Editing objects - Color and text (K2)
- 3.3 Symbols and instances - Library (K2)
- 3.4 Text Animation – Motion Tweening- Shape (K2)
- 3.5 Tweening - Motion Guide - Movie Clip (K2)
- 3.6 Working with ActionScript (K3)

**Unit IV**

**Hours :7**

1. Create an Action in Photoshop.
2. Color Transformation Using Photoshop.
3. Design a Book Cover in Photoshop.
4. Create an Animation using Photoshop.

**Unit V****Hours :7**

5. Traffic Light Control Using ActionScript in Flash.
6. Create a Slide Show Presentation in Flash.
7. Design a Greeting Card Using Button in Flash.
8. Create a Public Service Awareness Using ActionScript in Flash.

**Books for Study:**

1. Jeffcoate Judith – Multimedia in Practice – Pearson Education, 2009.
2. Photoshop CS6 in Simple Steps Paperback – Kogent Learning Solutions Inc , 2012.
3. Flash CS5 in Simple Steps – Kogent Learning Solutions Inc., Dreamtech Press Publication, 2011.
4. Chris Grover with E.A.Vander Veer-Flash CS4-Pogue Press O'Reilly,2008.

**OER:**

2. <https://www.photoshopessentials.com>
3. <https://www.javatpoint.com/photoshop>

**SEMESTER V**  
**UCCAQ20 -Relational Database Management Systems**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCCAQ20	Relational Database Management Systems	Theory	Core	5	3	40+60

**COURSE OBJECTIVES**

1. The objective of this course is to expose the students to the fundamentals & basic concepts in relational Data Base Management Systems.
2. This course discusses architecture of Database Systems with concept of relational model & ER model.
3. This course explains techniques for database design, Normalization and database recovery and protection.
4. To understand and apply database normalization principles.
5. To analyze the database transaction management, database recovery, security.

**COURSE LEARNING OUTCOMES (CLOS)**

The Learners will be able to

1. Demonstrate an understanding of the elementary & advanced features of DBMS & RDBMS
2. Write the SQL commands to create tables and Triggers, insert/update/delete data, and query data in a relational DBMS.
3. Analyze and Design a database based on a data model considering the normalization to a specified level.
4. Apply the storage size of the database and design appropriate storage techniques.
5. Analyze the requirements of transaction processing, concurrency control Analyze and XML Structure

CO3	M	H	L	H	L	H
CO4	L	M	H	H	M	L
CO5	M	H	M	H	H	M

## COURSE SYLLABUS

**Unit I:** **Hours: 15**

- 1.1 File System vs. DBMS Database System Applications (K1)
- 1.2 View of Data Database language - Data Storage & Querying (K1)
- 1.3 Data Architecture - Database Users and Administrators (K1, K2)
- 1.4 Relational Model - Structure of Relational Databases (K3)
- 1.5 Database Schemas -Relational Query Languages (K2)
- 1.6 Relational Operations. (K3)

**Unit II:** **Hours: 15**

- 2.1 Introduction to SQL:SQL Data Definition Basic Structure (K1)
- 2.2 Additional Basic Operations - Set Operations (K3)
- 2.3 Aggregate Functions - Null Values - Nested Sub queries (K1)
- 2.4 Modification of the Database; Intermediate SQL Join Expressions (K4)
- 2.5 Views Transactions - Integrity Constraints (K3)
- 2.6 SQL Data Types and Schemas -Advanced SQL Triggers.( K1)

**Unit III:** **Hours: 15**

- 3.1 Database Design and the E\_R Model :Entity Relationship Model (K1)
- 3.2 Constraints Removing - Redundant Attributes ER Diagrams (K2)
- 3.3 Reduction to Relational Schemas - ER Design Issues - Extended ER Features (K1)
- 3.4 Alternative Notations for Modeling Data; (K1)
- 3.5 Functional Dependencies (K2)
- 3.6 Normalization using Functional Dependencies (K4)

**Unit IV:** **Hours: 15**

- 4.1 Storage and File Structure: Overview of Physical Storage Media (K1)
- 4.2 Magnetic disks - File Organization (K2)
- 4.3 Organization of records in Files (K3)
- 4.4 Data Dictionary (K2)
- 4.5 Storage Ordered Indices (K3)
- 4.6 B+ Tree Index Files. (K2)

**Unit V:** **Hours: 15**

- 5.1 Distributed Databases : Homogeneous and Heterogeneous Databases (K2)
- 5.2 Distributed Data Storage (K1)
- 5.3 Distributed Transactions - Commit - Protocols -Concurrency Control (K3)
- 5.4 Object Based Databases (K1)
- 5.5 Complex Data types - Structured Types and Inheritance in SQL (K3)
- 5.6 Object identity and ReferenceTypes in SQL (K2)

**Book for Study:**

1. Abraham Silberschatz, Henry F.Korth and S.Sundarshan “Database System Concepts”, Sixth Edition, McGraw Hill, 2010.

**Books for Reference:**

1. R Elmasri, S.B. Navathe - “Fundamentals of Database Systems”, Seventh Edition - Pearson Education/Addison Wesley, 2011.

2. C.J.Date, A. Kannan and S.Swamynathan - “An Introduction to Database System”, Eighth Edition - Pearson Education, 2006

**SEMESTER V**  
**UCCAR20 - Software Engineering**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCCAR20	Software Engineering	Theory	Core	5	3	40+60

**COURSE OBJECTIVES**

1. On learning this paper students will gain the knowledge of developing software with its techniques.
2. To identify the minimum requirements for the development of application.
3. To develop, maintain efficient, reliable and cost effective software solutions.
4. Ability to critically thinking and evaluate assumptions and arguments.
5. To analyze the test case design and test automation.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Apply the software engineering lifecycle by demonstrating competence in communication, planning, analysis, design, construction, and deployment.
2. Discuss the function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
3. Manage the time, processes and resources effectively by prioritizing competing demands to achieve personal and team goals Identify and analyzes the common threats in each domain.
4. Understand architectural design in order to minimize the risks and errors.
5. Test the techniques for ensuring high quality software and Understand the capabilities of cost estimation.

# COURSE SYLLABUS

## Unit I

Hours: 15

- 1.1 Introduction: Professional Software Development (K2)
- 1.2 Software Engineering Ethics (K1)
- 1.3 Software Process Model (K2)
- 1.4 Process Activities (K2)
- 1.5 Coping with Changes (K2)
- 1.6 Process Improvement (K2)

## Unit II

Hours: 15

- 2.1 Agile Software Development: Methods – Development Techniques (K2)
- 2.2 Scaling Agile Methods (K2)
- 2.3 Requirement Engineering: Functional and Non Functional Requirements (K2)
- 2.4 Requirement Engineering Processes – Requirements Elicitation (K2)
- 2.5 Requirements Specification (K2)
- 2.6 Requirements Validation and Changes (K2)

## Unit III

Hours :15

- 3.1 System Model: Context Models – Interaction Models (K2)
- 3.2 Structural Models (K2)
- 3.3 Behavioural Models (K2)
- 3.4 Architectural Design: Decisions - Views (K2)
- 3.5 Architectural Patterns (K2)
- 3.6 Application Architecture (K2)

## Unit IV

Hours: 15

- 4.1 Design and Implementation: Object-Oriented Design using the UML (K2)
- 4.2 Design Patterns – Implementation Issues (K2)
- 4.3 Software Testing: Development Testing (K2)
- 4.4 Test-Driven Development (K2)
- 4.5 Release Testing (K2)
- 4.6 User Testing (K2)

## Unit V

Hours:15

- 5.1 Software Evolution: Evolution Process (K1)
- 5.2 Legacy Systems (K2)
- 5.3 Software Maintenance (K2)
- 5.4 Dependable Systems (K2)
- 5.5 Dependability Properties (K2)
- 5.6 Sociotechnical Systems (K2)

### Book for Study:

1. Ian Sommerville, “Software Engineering”, Edition 10, Pearson Education, 2016.

### Books for Reference:

1. Roger S.Pressman, “Software Engineering: A Practitioner’s Approach”, Edition 7, McGraw Hill, New York, 2016.
2. Pankaj Jalote, “An Integrated Approach to Software Engineering”, Edition 3, Narosa Publication, 2018.

**SEMESTER V**  
**UCCAS20 - Mobile Application Development**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCCAS20	Mobile Application Development	Theory	Core	4	3	40+60

**COURSE OBJECTIVES**

1. To study about the android architecture and the tools for developing android applications.
2. To create an android application.
3. To learn about the user interfaces used in android applications.
4. To learn about how to handle and share android data.
5. To learn about how to develop an android services and to publish android application for use.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understanding of Android and Android SDK and know about its development environment. Recognize the architecture of Android and its tools. Analyze Eclipse and Android Development Tools(ADT).
2. Understanding of the specific requirements, possibilities and challenges when developing for a mobile context.
3. Understanding of the interaction between user interface and underlying application infrastructure.
4. Define to plan and carry out a design work including developing a prototype that can be evaluated with a specified user group.
5. Develop practical skills and knowledge to construct software for a mobile application and the ability to reflect over possibilities and demands in collaborative software development.

# COURSE SYLLABUS

## Unit I

**Hours: 15**

- 1.1 Introduction- Android-Android Versions - Features of Android (K1)
- 1.2 Architecture of Android Obtaining the Required Tools-Android SDK (K2)
- 1.3 Installing the Android SDK Tools Configuring the Android SDK Manager –Eclipse (K2)
- 1.4 Android Development Tools (ADT)-Creating Android Virtual Devices (AVDs)- Creating Your First Android Application (K5)
- 1.5 Types of Android Application (K2)
- 1.6 Anatomy of an Android Application.(K2)

## Unit II

**Hours: 15**

- 2.1 Activities, Fragments and Intents-Understanding Activities (K2)
- 2.2 Linking Activities Using Intents (K1)
- 2.3 Fragments-Adding Fragments Dynamically-Life Cycle of a Fragment (K1, K2)
- 2.4 Interactions between Fragments-Calling Built-In Applications Using Intents (K1)
- 2.5 Understanding the Intent Object-Using Intent Filters (K2)
- 2.6 Adding Categories-Displaying Notifications.(K3)

## Unit III

**Hours: 15**

- 3.1 Android User Interface-Understanding the Components of a Screen(K1, K3)
- 3.2 Adapting to Display Orientation (K2)
- 3.3 Managing Changes to Screen Orientation(K2)
- 3.4 Utilizing the Action Bar (K3)
- 3.5 Creating the User Interface Programmatically (K5)
- 3.6 Listening for UI Notifications. (K4)

## Unit IV

**Hours: 15**

- 4.1 Databases-Content Providers and Messaging-Saving and Loading User Preferences (K1, K3)
- 4.2 Persisting Data to Files(K2)
- 4.3 Creating and Using Databases-Content Providers (K2)
- 4.4 Sharing Data in Android-Using a Content Provider-Creating Your Own Content (K2, K3)
- 4.5 Providers-Using the Content Provider (K4)
- 4.6 Messaging-SMS Messaging-Sending E-mail. (K2)

## Unit V

**Hours: 15**

- 5.1 Android-lifecycle:activity-lifecycle (K1, K2)
- 5.2 Life cycle concepts (K2)
- 5.3 lifecycle callbacks-onCreate()-onStart()-onResume()-onRestart()(K1, K2)
- 5.4 onPause()-onStop()-onDestroy()(K1, K2)
- 5.5 ios lifecycle – (K5)
- 5.6 Deployment methodologies (K5)

**UECAA20 - Resource Management Techniques**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UECAA20	Resource Management Techniques	Theory	Core Elective	5	3	40+60

**COURSE OBJECTIVES**

1. It will enable the students to learn various research techniques and to find out the solution for the critical problems.
2. To acquiring, allocating and managing the resources.
3. To ensure that internal and external resources are used effectively on time and to budget.
4. To process preplanning, scheduling and allocating the resources to maximize efficiency.
5. To aim smoothing problems using PERT and CPM model.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Identify the role of computer in Operational Research techniques.
2. Apply linear programming to solve real-life applications.
3. Analyze Transportation Model and Solve optimization problems using dual simplex method.
4. Describe Assignment Model and Travelling Salesman Problem, Sequencing problem
5. Use PERT and CPM for problems in project management

# COURSE SYLLABUS

## Unit I: Introduction and Mathematical Formulation

Hours: 15

- 1.1 Operations research: Definition (K1, K2, K3, K4)
- 1.2 Scope, Characteristics (K1, K2, K3, K4)
- 1.3 Models of operations research: Iconic (K1, K2, K3, K4)
- 1.4 Analogue, Symbolic model (K1, K2, K3, K4)
- 1.5 Linear programming (K1, K2, K3, K4)
- 1.6 Formulation. (K1, K2, K3, K4)

## Unit II: Linear Programming

Hours: 15

- 2.1 Linear Programming: Graphical method (problems: part I) (K1, K2, K3, K4)
- 2.2 Graphical method (problems: part II) (K1, K2, K3, K4)
- 2.3 Graphical method (problems: part III) (K1, K2, K3, K4)
- 2.4 Regular simplex Method (problems: part I) (K1, K2, K3, K4)
- 2.5 Regular simplex Method (problems: part II) (K1, K2, K3, K4)
- 2.6 Regular simplex Method (problems: part III) (K1, K2, K3, K4)

## Unit III: Linear Programming

Hours: 15

- 3.1 Linear programming: Big 'M' method (problems part I) (K1, K2, K3, K4)
- 3.2 Big 'M' method (problems part II) (K1, K2, K3, K4)
- 3.3 Big 'M' method (problems part III) (K1, K2, K3, K4)
- 3.4 Duality (problems part I) (K1, K2, K3, K4)
- 3.5 Duality (problems part II) (K1, K2, K3, K4)
- 3.6 Duality (problems part III) (K1, K2, K3, K4)

## Unit IV: Transportation Model

Hours: 15

- 4.1 Transportation Problem (K1, K2, K3, K4)
- 4.2 Initial basic feasible solution using North West Corner rule(K1, K2, K3, K4)
- 4.3 Initial basic feasible solution using least cost method and Vogel's approximation method (K1, K2, K3, K4)
- 4.4 Degeneracy, Unbalanced Transportation problem (K1, K2, K3, K4)
- 4.5 Maximization problem(K1, K2, K3, K4)
- 4.6 Test of Optimality using MODI method (K1, K2, K3, K4)

## Unit V: Assignment Model

Hours: 15

- 5.1 Assignment problems (K1, K2, K3, K4)
- 5.2 Minimal assignment problems (K1, K2, K3, K4)
- 5.3 Unbalanced Assignment problems (K1, K2, K3, K4)
- 5.4 Restricted Assignment problems (K1, K2, K3, K4)
- 5.5 Maximization problem in Assignment (K1, K2, K3, K4)
- 5.6 Maximization problems in Assignment Problems (K1, K2, K3, K4)

## Book for Study:

**SEMESTER V**  
**UECAB20 - Elective I B: Cloud Computing**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UECAB20	Elective I B: Cloud Computing	Theory	Elective	5	3	40+60

**COURSE OBJECTIVES**

1. Discuss the fundamental concepts in cloud computing technologies.
2. Understand the various technologies.
3. Explain the architecture and concept of different cloud models: IaaS, PaaS, SaaS
4. Analyze the fundamental and Cloud Deployment Models Course Outcomes.
5. Understand the concepts of Challenges in Cloud security.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the fundamental concepts in cloud computing technologies.
2. Analyze and integrate the cloud enabling services.
3. Analyze the architecture and concept of different cloud models: IaaS, PaaS, SaaS.
4. Understand and familiar with the deployment models.
5. Comprehend the Cloud Data Security concepts and how they are addressed with the security mechanisms.

# **COURSE SYLLABUS**

## **Unit I**

**Hours:15**

- 1.1 Introduction to Cloud Computing: Cloud Computing in Nutt shell (K2, K4)
- 1.2 Roots of Cloud Computing- Types of Clouds (K4, K6)
- 1.3 Features of a Cloud (K5)
- 1.4 Cloud Infrastructure Management (K4, K6)
- 1.5 Challenges and Risks (K4, K6)
- 1.6 Migrating in to a Cloud. (K4)

## **Unit II**

**Hours: 15**

- 1.1 Integration as a Service-Introduction (K2)
- 1.2 Onset of Knowledge Era- Evolution of SaaS (K4, K5)
- 1.3 Challenges (K4, K5)
- 1.4 Approaching the SaaS Integration- New Integration Scenarios (K4)
- 1.5 Integration Methodologies-SaaS Integration Services (K4, K5)
- 1.6 B2B Services. (K4, K6)

## **Unit III**

**Hours: 15**

- 3.1 Cloud Service Models: Infrastructure as a Service (IaaS): Introduction to IaaS, Resource Virtualization (K2, K4)
- 3.2 Server, Storage, Network. (K2, K4)
- 3.3 Case studies (K4, K5)
- 3.4 Platform as a Service (PaaS): Introduction to PaaS (K2, K4)
- 3.5 Cloud platform & Management (K2, K3)
- 3.6 Computation, Storage. (K3, K4)

## **Unit IV**

**Hours: 15**

- 4.1 Cloud Deployment Models: Introduction (K2)
- 4.2 Public Deployment Model (K2, K4, K5)
- 4.3 Private Deployment Model (K2, K4, K5)
- 4.4 Virtual Private Deployment Model (K4, K5)
- 4.5 Hybrid Deployment Model (K4, K5)
- 4.6 Community Deployment Model. (K4, K5)

## **Unit V**

**Hours: 15**

- 5.1 Scientific Applications for Cloud Environments (K2, K4, K5)
- 5.2 Building Content Delivery Networks Using Clouds (K2, K3, K4)
- 5.3 Cloud Challenges: Organizational Readiness and Change management in cloud (K2, K4)
- 5.4 Data Security in the Cloud (K4, K5)
- 5.5 Legal Issues in Cloud Computing (K4)
- 5.6 Production Readiness for Cloud Services. (K4, K5)

**SEMESTER V**  
**UECAC20 - Elective I C: Object Oriented Analysis and Design**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UECAC20	Elective I C: Object Oriented Analysis and Design	Theory	Core	5	3	40+60

**COURSE OBJECTIVES**

1. Understand the importance and basic concepts and of object oriented modeling.
2. To understand the Object-based view of Systems
3. To develop robust object-based models for Systems
4. Specify, analyze and design the use case driven requirements for a particular system.
5. Identify, Analyze the subsystems, various components and collaborate them interchangeably Model the event driven state of object and transform them into implementation specific layouts.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Analyse, design, document the requirements through use case driven approach.
2. Identify, analyse, and model structural and behavioural concepts of the system.
3. Develop, explore the conceptual model into various scenarios and applications.
4. Apply the concepts of architectural design for deploying the code for software.
5. Apply the Testing Strategies and Debugging Principles for measuring the User Satisfaction

# **COURSE SYLLABUS**

## **Unit I**

**Hours: 15**

- 1.1 System Development (K1, K2)
- 1.2 Object Basics (K1, K2)
- 1.3 Development Life Cycle (K1, K2, K3)
- 1.4 Methodologies - Patterns (K1, K2, K3, K4)
- 1.5 Frameworks (K1, K2, K3, K4)
- 1.6 Unified Approach - UML. (K1, K2, K3, K4)

## **Unit II**

**Hours: 15**

- 2.1 Use-Case Models (K1, K2, K3)
- 2.2 Object Analysis (K1, K2, K3, K4)
- 2.3 Object relations (K1, K2, K3, K4)
- 2.4 Attributes - Methods (K1, K2, K3)
- 2.5 Class and Object responsibilities (K1, K2)
- 2.6 Case Studies (K1, K2, K3, K4)

## **Unit III**

**Hours: 15**

- 3.1 Design Processes (K1, K2, K3)
- 3.2 Design Axioms (K1, K2)
- 3.3 Class Design (K1, K2, K3)
- 3.4 Object Storage (K1, K2)
- 3.5 Object Interoperability (K1, K2, K3)
- 3.6 Case Studies. (K1, K2, K3, K4)

## **Unit IV**

**Hours: 15**

- 4.1 User Interface Design (K1, K2, K3)
- 4.2 View layer Classes (K1, K2, K3)
- 4.3 Micro-Level Processes (K1, K2, K3)
- 4.4 Micro-Level Processes (K1, K2, K3)
- 4.5 View Layer Interface (K1, K2)
- 4.6 Case Studies (K1, K2, K3, K4)

## **Unit V**

**Hours: 15**

- 5.1 Quality Assurance Tests (K1, K2)
- 5.2 Testing Strategies - Object orientation on testing (K1, K2, K3, K4)
- 5.3 Test Cases – Test Plans - Continuous testing (K1, K2, K3, K4)
- 5.4 Debugging Principles (K1, K2)
- 5.5 System Usability - Measuring User Satisfaction (K1, K2, K3, K4)
- 5.6 Case Studies (K1, K2, K3, K4)

**SEMESTER V**  
**UCCAT20 - Practical - VII: RDBMS**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCCAT20	Practical - VII: RDBMS	Practical	Core	3	2	40+60

**COURSE OBJECTIVES**

1. The objective of this course is to expose the students to the fundamentals & basic concepts in relational Data Base Management Systems.
2. To identify the basic concepts and various data model used in database design
3. To analyze various aggregate functions using SQL commands.
4. To use an SQL interface of a relational DBMS package to create, populate, maintain, and query a database.
5. To apply relational database theory and be able to describe relational algebra expression, tuple and domain relation expression from queries.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand, Appreciate and effectively explain the underlying concepts of Database technologies. Programming PL/SQL including stored procedures, stored functions, cursors, packages.
2. Attain a good practical understanding of the Oracle.
3. Design and implement a database schema for a given problem-domain.
4. Construct a query using SQL DDL, DML, and DCL Commands.
5. Prepare various database tables and joins them using SQL commands. Analyze various aggregate functions using SQL commands
6. Design and develop front end tool VB .NET to design forms, and select, insert, delete, update using Data Source Binding.

CO/PO	PO

CO2	M	M	H	H	M	M
CO3	H	L	H	L	H	H
CO4	M	H	H	H	L	M
CO5	M	H	L	H	H	L

**Low -L, Medium -M, High-H**

1. Creating data base tables and using data types. Create table Modify table Drop table
2. Practical Based on Data Manipulation Adding data with Insert Modify data with Update Deleting records with Delete
3. Practical Based on Implementing the Constraints NULL and NOT NULL Primary Key and Foreign Key Constraint Unique, Check and Default Constraint
4. Practical for Retrieving Data Using following clauses Simple select clause Accessing specific data with Where Ordered By Distinct and Group By
5. Practical Based on Aggregate Functions AVG -COUNT - MAX -MIN -SUM – CUBE
6. Practical Based on implementing all String functions and Date and Time Functions, union, intersection, set difference.
7. Implement Nested Queries & JOIN operation.
8. Practical Based on implementing use of triggers, cursors & procedures.
9. Make Database connectivity with front end tool VB and Oracle as back end perform Insertion, Deletion and Updation for the following:
  - Staff Information System
  - Electricity Bill Processing System

**SEMESTER V**  
**UCCA20 - Practical VIII: Mobile Application Development**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCCA20	Practical IX: Mobile Application Development	Practical	Core	2	2	40+60

**COURSE OBJECTIVES**

1. To introduce students to the concept of basic programming- thereby reducing the design complexity and reusability of a component.
2. To understand the components and structure of mobile application development frameworks for Android and windows OS based mobiles.
3. To understand how to work with various mobile application development frameworks.
4. To learn the basic and important design concepts and issues of development of mobile applications.
5. To understand the capabilities and limitations of mobile devices.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Establishing the development environment
2. Implementing the layout to add action bar
3. Understanding the interfaces using views , menus and notification
4. Apply and learn multiple screens to emulate android application
5. Perform basic interaction with application.

CO/PO	PO

CO5	H	H	M	L	H	H

**Low -L, Medium -M, High-H**

**Practical Program:****Hours: 40**

1. Creating a simple “Hello World” application
2. Adding an action bar to android app to make application interactive
3. Build user interfaces using Views, Menus and Notifications
4. Handle file operations in Android application program.
5. Build an android application with multiple screens.
6. Learning Android Emulator to emulate android apps on various devices.
7. Use of Intents to perform basic interaction with apps.
8. Using Android styles and themes to make application.

**SEMESTER VI**  
**UCCA20 - INTERNET AND WEB PROGRAMMING**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UCCA20	Internet and Web Programming	Theory	Core	4	3	40+60

**COURSE OBJECTIVES**

1. Enhance the programming experience with the help of tools like editors and debuggers that makes JavaScript coding easier and more interactive.
2. Understand the concepts commonly used in dynamic language programming such as higher-order functions and closures.
3. Understand the server-side programming works on the web.
4. Develop dynamic and interactive web pages using the powerful tool and server scripting language like PHP.
5. Understanding File handling concepts to connect, access, and update a MySQL database.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Acquire the basic concept of JavaScript.
2. Use operators, variables, arrays, control structures, functions and objects in JavaScript.
3. Create PHP programs that use various PHP library functions, and that manipulate files and directories.
4. Design a responsive web site using HTML, PHP, MySQL and Apache.
5. Students will be able to build dynamic web pages using JavaScript (Client Side Programming) and apply their knowledge to create interactive websites.

# COURSE SYLLABUS

## Unit I: JAVA SCRIPT

Hours: 15

- 1.1 Introduction - Values - Numbers - Strings - Unary Operators. (K1, K2)
- 1.2 Boolean Values - Empty Values - Automatic Type Conversion. (K2)
- 1.3 Program Structure: Expressions and Statements- Bindings - Binding Names - The Environment. (K2, K3)
- 1.4 Functions - The Console Log Function - Return Values - Control Flow - Conditional Execution - While and Do Loops. (K2, K3)
- 1.5 Indenting Code - For Loops - Breaking out of a Loop - Updating Bindings Succinctly. (K2, K3)
- 1.6 Dispatching on a Value with Switch – Capitalization – Comments. (K3)

## Unit II

Hours: 15

- 2.1 Functions - Bindings and Scopes - Functions as Values. (K2)
- 2.2 Declaration Notation - Arrow Functions - The Call Stack. (K2, K3, K4)
- 2.3 Optional Arguments - Closure – Recursion - Growing Functions. (K3, K4)
- 2.4 Data Structures: Objects and Arrays: The Were Squirrel - Data Sets – Properties – Methods – Objects. (K3, K4)
- 2.5 Mutability - The Lycanthrope’s Log - Computing Correlation - Array Loops - The Final Analysis - Further Arrayology - Strings and their Properties. (K2, K3, K4, K5)
- 2.6 Rest Parameters - The Math Object - Destructuring – JSON. (K2, K3, K4)

## Unit III: PHP PROGRAMMING

Hours: 15

- 3.1 Web Server – Apache - PHP Introduction - PHP Install - PHP Syntax - PHP Variables. (K1, K2)
- 3.2 PHP Echo / Print - PHP Data Types - PHP Strings - PHP Constants - PHP Operators. (K1, K2)
- 3.3 Control Structures - PHP Functions - Directory Functions - File System Functions. (K2, K3)
- 3.4 PHP Arrays - PHP Sorting – Arrays - PHP - Super Global. (K3, K4)
- 3.5 String Functions - Date and Time Functions. (K1, K2, K3, K4)
- 3.6 Mathematical Functions - Miscellaneous Functions. (K3, K4)

## Unit IV

Hours: 15

- 4.1 Basic Form Processing (GET And POST Method) - PHP Form Handling. (K1, K2)
- 4.2 PHP Form Validation - PHP Form Required– URL - E-Mail. (K1, K2)
- 4.3 PHP Form Complete PHP MYSQL Functions -Connect- Create DB. (K4, K6)
- 4.4 Create Table- Insert Data - Get Last ID - Insert Multiple. (K3, K4, K5)
- 4.5 Prepared-Select Data - Delete Data - Update Data - Limit Data. (K3, K4, K5)
- 4.6 Table Join - Database Driven Application. (K3, K4)

## Unit V

Hours: 15

- 5.1 PHP Arrays Multi-PHP Date and Time - PHP Include. (K2, K3)
- 5.2 PHP File Handling- PHP File Open/Read. (K3)
- 5.3 PHP File Create/Write - PHP File Upload-PHP Cookies. (K4, K5)
- 5.4 PHP Sessions-PHP Filters - PHP Filters Advanced. (K4)
- 5.5 PHP Error Handling - PHP Exception. (K4, K5)
- 5.6 COM-DOM-CURL-SOAP. (K5, K6)

**Books for Study:**

1. MarijiHaverbeke, “Eloquent Javascript, A Modern Introduction to Programming”, Third Edition, Published by No Starch Press, 2018.
2. Julie C Meloni, Sams “Teach yourself PHP, MySQL and Apache”, 6<sup>th</sup> edition, Sams Publishing, 2012.

**Books for Reference:**

1. Phil Ballard , JavaScript in 24 Hours, 6th Edition, Sams Teach Yourself, 2015.
2. Ed LeckyThompson Steven D. Nowicki Thomas Myer, “Professional PHP6”, Wrox Press, Paperback Edition, 2011.

**SEMESTER VI**  
**UCCA W20 - Data Mining**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UCCA W20	Data Mining	Theory	Core	5	3	40+60

**COURSE OBJECTIVES**

1. To study the methodology of engineering legacy databases for data warehousing and data mining to derive business rules for decision support systems.
2. To analyze the data, identify the problems, and choose the relevant models and algorithms to apply.
3. To develop research interest towards advances in data mining
4. To impart the knowledge of how Data Mining could be used to solve scientific and social problems.
5. To expose to various Data Mining techniques

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand Data Warehouse fundamentals and Data Mining Principles
2. Understand and implement classical algorithms in data mining and identify the application area of algorithms.
3. Compare and evaluate different data mining techniques like, prediction, clustering and association rule mining
4. Describe complex data types with respect to spatial and web mining.
5. Analyze the temporal mining techniques to detect patterns in the e-world.

# COURSE SYLLABUS

## Unit I

**Hours: 14**

- 1.1 Basic Data Mining Tasks – Data Mining Versus Knowledge Discovery In Databases (K1, K2)
- 1.2 Data Mining Issues – Social Implications of Data Mining (K2)
- 1.3 Data Mining from A Database Perspective. Data Mining Techniques: Introduction – A Statistical Perspective on Data Mining (K2, K3)
- 1.4 Similarity Measures (K1, K2, K3)
- 1.5 Decision Trees (K2, K3)
- 1.6 Neural Networks – Genetic Algorithms. (K1, K2, K3)

## Unit II

**Hours: 13**

- 2.1 Classification: Introduction (K1, K2, K3)
- 2.2 Statistical – Based Algorithms (K2, K3, K5)
- 2.3 Distance- Based Algorithms (K2, K3, K5)
- 2.4 Decision Tree- Based Algorithms (K2, K3, K5)
- 2.5 Neural Network – Based Algorithms (K2, K3, K5)
- 2.6 Rule-Based Algorithms (K2, K3, K5)

## Unit III

**Hours: 15**

- 1.7 Clustering: Introduction – Similarity and Distance Measures – Outliers (K2, K3, K5)
- 1.8 Hierarchical Algorithms – Partitional Algorithms (K3, K4, K5)
- 1.9 Association Rules: Introduction - Large Item Sets – Basic Algorithms (K2, K3, K5)
- 1.10 Parallel and Distributed Algorithms (K2, K3, K5)
- 1.11 Comparing Approaches – Incremental Rules (K3, K5, K6)
- 1.12 Advanced Association Rules Techniques – Measuring the quality of Rules (K3, K5)

## Unit IV

**Hours: 15**

- 4.1 Web mining: Introduction – Web content Mining Crawlers (K2, K3)
- 4.2 Web Structure Mining (K2, K3)
- 4.3 Web Usage Mining (K2, K3)
- 4.4 Spatial Mining: Overview – Primitives (K2, K3, K5)
- 4.5 Generalization and specialization (K2, K3, K5)
- 4.6 Spatial Rules- Spatial Classification Algorithm. (K2, K3, K5)

## Unit V

**Hours: 12**

- 5.1 Temporal Mining: Introduction (K2)
- 5.2 Modeling temporal events (K2, K3)
- 5.3 Time series (K2, K3, K5)
- 5.4 Pattern detection (K2, K3, K4, K5, K6)
- 5.5 Sequences (K2, K3, K5, K6)
- 5.6 Temporal Associations Rules (K2, K3, K5)

## Books for Study:

**SEMESTER VI**  
**UECAD20 - ELECTIVE – II A: CRYPTOGRAPHY**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UECAD20	Elective – II A: Cryptography	Theory	Elective	5	3	40 + 60

**COURSE OBJECTIVES**

1. To understand Cryptography Theories, Algorithms and Systems.
2. To understand necessary Approaches and Techniques
3. To build protection mechanisms in order to secure computer networks.
4. Enable the students to learn fundamental concepts of computer security and cryptography and utilize these techniques in computing systems.
5. Understand vulnerability assessments and the weakness of using passwords for authentication.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Classify the symmetric encryption techniques
2. Illustrate various Public key cryptographic techniques
3. Evaluate the authentication and hash algorithms.
4. Summarize the intrusion detection and its solutions to overcome the attacks.
5. Basic concepts of system level security.

**Low – L, Medium – M, High – H**

# **COURSE SYLLABUS**

## **Unit I**

**Hours: 15**

- 1.1 Computer Security Concepts (K2)
- 1.2 The OSI Security Architecture (K2 K4)
- 1.3 Security Attacks - Security Services Security Mechanisms - A model for Network Security(K2)
- 1.4 Symmetric Cipher Model (K2, K4)
- 1.5 Substitution Techniques (K2, K5)
- 1.6 Transposition Techniques - Stenography.(K2, K5)

## **Unit II**

**Hours: 16**

- 2.1 Block Cipher Principles (K2, K3)
- 2.2 The DES - A DES example - The strength of DES(K2, K4)
- 2.3 Differential and Linear Cryptanalysis (K2)
- 2.4 Block Cipher Design Principles (K2, K4)
- 2.5 Divisibility and Division algorithms (K2, K4)
- 2.6 The Euclidean Algorithm - Modular Arithmetic.(K2, K4)

## **Unit III**

**Hours: 15**

- 3.1 Origin of AES - AES Structure (K2)
- 3.2 AES round function (K2, K4)
- 3.3 AES Key Expansion (K2)
- 3.4 AES Implementation. (K2, K3)
- 3.5 Multiple Encryption (K2, K3)
- 3.6 Triple DES (K2, K3)

## **Unit IV**

**Hours: 14**

- 4.1 Prime Numbers (K2, K3)
- 4.2 Fermat's and Euler's Theorem (K2, K3)
- 4.3 Testing for Primality (K2, K3)
- 4.4 The Chinese Remainder Theorem (K2, K4)
- 4.5 Principles of Public Key Cryptosystems(K2, K4)
- 4.6 The RSA Algorithm.K2, K3, K4)

## **Unit V**

**Hours: 12**

- 5.1 Diffie - Helman Key Exchange (K2, K3)
- 5.2 Digital Signatures (K2)
- 5.3 Symmetric Key Distribution Using Symmetric Encryption (K2, K4)
- 5.4 Symmetric Key Distribution Using Asymmetric Encryption (K2, K4)
- 5.5 Distribution of Public Keys (K2)
- 5.6 Kerberos.(K2)

## **Book for Study:**

1. William Stallings, "Cryptography and Network Security Principles and Practices", Seventh Edition, Prentice Hall, 2017.
2. Behrouz A. Foruzan, "Cryptography and Network Security", 2<sup>nd</sup> Edition, Tata McGraw Hill 2007.

**Book for Reference:**

1. C K Shyamala, N Harini and Dr. T R Padmanabhan: “Cryptography and Network Security”, First Edition, Wiley India Pvt.Ltd, 2011.
2. Sudha Sridhar , “ Cryptography and Network Security”, Charulatha Publications, 2013

**SEMESTER V**  
**UECAE20 - Elective II B: COMPUTER GRAPHICS**

Year/ Sem	Course Code	Title of The Course	Course Type	Course Category	H/W	Credits	Marks
III/ V	UECAE20	Elective II B: Computer Graphics	Theory	Elective	5	3	40+60

**COURSE OBJECTIVES**

1. Understand two dimensional graphics and their transformations.
2. Gain knowledge about graphics hardware devices and software used.
3. Understand three dimensional graphics and their transformations and to become familiar with clipping techniques.
4. To understand the importance of visual representation.
5. To design 2D and 3D techniques for graphics.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the basic objectives and scope of computer graphics
2. To acquire knowledge on graphics hardware devices and software used.
3. Implement various algorithms to scan, convert the basic geometrical primitives, Transformations, Area filling, clipping.
4. Understand the concepts of and techniques used in 2D and 3D computer graphics, including viewing transformations, hierarchical modeling, color, lighting and texture
5. Understand the concepts of computer graphics, including viewing, projection, Perspective, modeling and transformation in two and three dimensions.

**Low -L, Medium -M, High-H**

# COURSE SYLLABUS

## Unit I

Hours: 15

- 1.1 Overview of graphics Systems: Video Display Device (K1, K2, K3)
- 1.2 Raster Scan Displays and Random Scan Displays (K1, K2, K3)
- 1.3 Graphics Monitor and Workstation (K1, K2)
- 1.4 Input Devices (K1, K2)
- 1.5 Hard Copy Devices (K1, K2)
- 1.6 Graphics software (K1, K2)

## Unit II

Hours: 15

- 2.1 Output Primitives: Points and Lines (K1, K2, K3)
- 2.2 Line Drawing Algorithms: DDA Algorithms and Bresenham's Line Algorithm (K1, K2, K3, K4)
- 2.3 Circle generating Algorithm (K1, K2, K3, K4)
- 2.4 Attributes of Output Primitives: Line Attributes (K1, K2, K3)
- 2.5 Area-Fill Attributes (K1, K2, K3)
- 2.6 Character Attributes (K1, K2, K3)

## Unit III

Hours: 15

- 3.1 Two Dimensional Geometric Transformation: Basic Transformations (K1, K2, K3)
- 3.2 Matrix Representations and Homogeneous Coordinates (K1, K2, K3)
- 3.3 Composite Transformations (K1, K2, K3)
- 3.4 Other Transformations Reflections (K1, K2, K3)
- 3.5 Two Dimensional Viewing: Viewing Pipeline (K1, K2, K3)
- 3.6 Window to Viewport Coordinate Transformation (K1, K2, K3)

## Unit IV

Hours: 15

- 4.1 Clipping Operations - Point Clipping (K1, K2, K3)
- 4.2 Line Clipping: Cohen-Sutherland Line Drawing Algorithm (K1, K2, K3)
- 4.3 Polygon Clipping: Sutherland Hodgeman Polygon Clipping (K1, K2, K3)
- 4.4 Curve Clipping - Text Clipping - Exterior Clipping (K1, K2, K3)
- 4.5 Input of Graphical Data Logical Classification of Input Devices (K1, K2, K3)
- 4.6 Interactive Picture Construction Techniques (K1, K2, K3)

## Unit V

Hours: 15

- 5.1 Three Dimensional Concepts: Three Dimensional Display methods - Parallel projection (K1, K2, K3)
- 5.2 Perspective Projection (K1, K2, K3)
- 5.3 Depth Cueing - Visible Line and Surface Identification (K1, K2, K3)
- 5.4 Three Dimensional Geometric and modeling Transformations: Translation – Rotation and Scaling (K1, K2, K3)
- 5.5 Other Transformations (K1, K2, K3)
- 5.6 Three Dimensional Viewing: Projections (K1, K2, K3)

### Books for Study:

1. Donald Hearn, M. Pauline Baker, "Computer Graphics", 2<sup>nd</sup> Edition, Prentice Hall of India Publication, 2011.
2. Donald Hearn, M. Pauline Baker Warren Carithers, "Computer Graphics with Open GL", 4<sup>th</sup> Edition, Pearson Publication, 2014.

### Books for Reference:

1. Apurva A. Desai - "Computer Graphics", 1<sup>st</sup> Edition, Prentice Hall of India Publication, 2008.
2. ISRD Group - "Computer Graphics", Second Edition, McGraw Hill Book Company, 2008.

**SEMESTER VI**  
**UECAF20- Elective - III A: Mobile Computing**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UECAF20	Elective - III A: Mobile Computing	Theory	Elective	5	3	40+60

**COURSE OBJECTIVES**

1. To understand the basic concepts of mobile computing.
2. To be familiar with the network layer protocols and AdHoc networks.
3. To know the basis of transport and application layer protocols.
4. To gain knowledge about different mobile platforms and application development.
5. Understand fundamentals of wireless communications. Analyze security, energy efficiency, mobility, scalability, and their unique characteristics in wireless networks.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understand the basic concepts of mobile computing.
2. Expand the network layer protocols and AdHoc networks.
3. Apply the basis of transport and application layer protocols.
4. Develop knowledge about different mobile platforms and application development.
5. Analyze security, energy efficiency, mobility, scalability, and their unique characteristics in wireless networks.

# COURSE SYLLABUS

## Unit I

Hours: 15

- 1.1 Introduction to Mobile Computing (K1)
- 1.2 Applications of Mobile Computing (K2, K3, K4)
- 1.3 Generations of Mobile Communication Technologies (K1, K2, K3)
- 1.4 Multiplexing (K1, K2, K3, K4)
- 1.5 Spread spectrum (K1, K2, K3)
- 1.6 MAC Protocols – SDMA- TDMA- FDMA- CDMA (K1, K2, K3, K4)

## Unit II

Hours: 15

- 2.1 Introduction to Cellular Systems (K1, K2, K3, K4)
- 2.2 GSM – Services & Architecture – Protocols (K1, K2, K3)
- 2.3 Connection Establishment (K1, K2, K3)
- 2.4 Frequency Allocation – Routing (K1, K2, K3)
- 2.5 Mobility Management – Security (K1, K2, K3, K4)
- 2.6 GPRS- UMTS – Architecture – Handover – Security (K1, K2)

## Unit III

Hours: 15

- 3.1 Mobile IP – DHCP – AdHoc (K1, K2, K3)
- 3.2 Proactive protocol-DSDV (K1, K2, K3)
- 3.3 Reactive Routing Protocols – DSR, AODV Hybrid routing –ZRP (K1,K2)
- 3.4 Multicast Routing- ODMRP (K1, K2, K3, K4)
- 3.5 Vehicular Ad Hoc networks ( VANET) (K1, K2, K3, K4)
- 3.6 MANET Vs VANET – Security (K1, K2, K3, K4)

## Unit IV

Hours: 15

- 4.1 Mobile TCP (K1, K2, K3)
- 4.2 WAP – Architecture (K2, K3, K4)
- 4.3 WDP – WTLS (K2,K3)
- 4.4 WTP –WSP (K2,K3)
- 4.5 WAE – WTA Architecture (K2,K3)
- 4.6 WML (K2,K3)

## Unit V

Hours: 15

- 5.1 Mobile Device Operating Systems (K1, K2)
- 5.2 Special Constraints & Requirements (K1, K2)
- 5.3 Commercial Mobile Operating Systems (K1, K2, K3)
- 5.4 Software Development Kit: iOS, Android, BlackBerry, Windows Phone (K1, K2, K3)
- 5.5 M-Commerce – Structure – Pros & Cons (K1, K2)
- 5.6 Mobile Payment System – Security Issues (K1, K2)

### Book for Study:

1. Prasant Kumar Pattnaik, Rajib Mall, “Fundamentals of Mobile Computing”, Second Edition, PHI Learning Pvt. Ltd, New Delhi, 2012.

### Books for Reference:

1. Jochen H. Schller, “Mobile Communications”, Second Edition, Pearson Education, New Delhi, 2007.
2. Dharma Prakash Agarval, Qing and An Zeng, "Introduction to Wireless and Mobile Systems", Fourth Edition, Thomson Asia Pvt Ltd, 2017.

**SEMESTER VI**  
**UECAG20 – ELECTIVE – III B: ARTIFICIAL INTELLIGENCE**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UCCAG20	ELECTIVE III B: Artificial Intelligence	Theory	Elective	5	3	40+60

**COURSE OBJECTIVES**

1. Gain a historical perspective of AI and its foundations.
2. Become familiar with basic principles of AI toward problem solving inference, perception, knowledge representation, and learning.
3. Investigate applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.
4. To understand the concept of learning techniques.
5. To know about Context Free Grammars.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Understanding different types of AI Agents and its Environments.
2. Know Various AI Search Algorithms (uninformed, informed, heuristic search).
3. Understand the fundamentals of Knowledge representation (logic based, frame based).
4. Understand the different types of Learning.
5. Ability to apply knowledge representation, reasoning , and machine learning Techniques

# COURSE SYLLABUS

## Unit I

**Hours: 15**

- 1.1 Artificial Intelligence- Introduction- Foundation of Artificial Intelligence. (K1, K2)
- 1.2 History of Artificial Intelligence- Intelligent Agents- Agents and Environment. (K1, K2, K3)
- 1.3 Good Behavior- The Concept of Rationality- Performance Measures- Rationality. (K1, K2, K3)
- 1.4 Problem Solving- Solving Problem by searching- Problem Solve Agents. (K1, K2, K3, K4)
- 1.5 Well Defined Problems and Solutions- Formulating Problems. (K1, K2, K3, K4)
- 1.6 Uniformed Search Strategies- Breadth First Search- Depth First Search. (K1, K2, K3, K4)

## Unit II

**Hours: 15**

- 2.1 Informed Search- Greedy Best First Search- A\* Search Minimizing the total estimated Solution Cost. (K1, K2, K3, K4)
- 2.2 Hill Climbing Search- Genetic Algorithm. (K1, K2, K3, K4)
- 2.3 Local Search in Continuous space- Online Search Agents and Unknown environments - Online Search problems- Online Search Agents. (K1, K2, K3, K4)
- 2.4 Online Local Search- Learning in Online Search. (K1, K2, K3, K4)
- 2.5 Constraint Satisfaction Problems- Backtracking Search for CSPs. (K1, K2, K3, K4)
- 2.6 Backtracking and Local Search. (K1, K2, K3, K4)

## Unit III

**Hours: 15**

- 3.1 Logical Agents- Knowledge Based Agents. (K1, K2, K3)
- 3.2 Logic - Propositional Logic A Very simple logic. (K1, K2, K3)
- 3.3 Reasoning Pattern in Propositional Logic- Resolution Forward and Backward Chaining. (K1, K2, K3)
- 3.4 Syntax and Semantics of First order Logic- Models for First Order Logic. (K1, K2, K3)
- 3.5 Symbol and Interpretations- Terms. (K1, K2)
- 3.6 First Order Logic- Assertions and queries in First order Logic. (K1, K2, K3)

## Unit IV

**Hours: 15**

- 2.1 Learning from Observations- Forms of Learning. (K1, K2)
- 2.2 Inductive Learning- Knowledge in Learning- A logical Formulation of Learning. (K1, K2)
- 2.3 Examples and hypotheses- Current best hypothesis search. (K1, K2, K3)
- 2.4 Least Commitment Search- Explanation Based Learning- Extracting General rules from Examples. (K1, K2)
- 2.5 Improving Efficiency- Learning using Relevance Information. (K1, K2)
- 2.6 Inductive Logic Programming- An Example Top down inductive Learning Methods- Inductive learning with inverse deduction. (K1, K2)

## Unit V

**Hours: 15**

- 5.1 Communication –Communication as Action- Fundamentals of Language. (K1, K2)
- 5.2 Formal Grammar for a Fragment of English- Lexicon of  $\epsilon_0$ - Grammar of  $\epsilon_0$ . ((K1, K2, K3)
- 5.3 Syntactic Analysis Parsing- Efficient Parsing. (K1, K2, K3, K4)
- 5.4 Augmented Grammars- Semantic Interpretation. (K1, K2, K3, K4)
- 5.5 The semantics of a English Fragment- Time and Tense- Quantification- Pragmatic Interpretation. (K1, K2, K3, K4)
- 5.6 Languages and generation with DCG'S- Ambiguity and Disambiguation. (K1, K2, K3)

**Books for Study:**

**SEMESTER VI**  
**UCCAX20 -Practical X: INTERNET AND WEB PROGRAMMING**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UCCAY20	Practical X: Internet and Web Programming	Practical	Core	3	2	40+60

**COURSE OBJECTIVES**

1. Comprehend the usage of PHP and JavaScript in dynamic web development.
2. Understand PHP language data types, logic controls, built-in and user-defined functions.
3. Describe Object oriented programming paradigm in PHP.
4. Understand user validation techniques and cookies.
5. Build a simple, yet functional web application using PHP/MySQL.

**COURSE LEARNING OUTCOMES**

The Learners will be able to

1. Know variable naming rules and JavaScript data types.
2. Use operators, variables, arrays, control structures, functions and objects in JavaScript.
3. Demonstrate objects and arrays usage
4. Create PHP programs that use various PHP library functions, and that manipulate files and directories.
5. Validate user input and create cookies in PHP

**Low -L, Medium -M, High-H**

1. Implementing factorial of a number in JavaScript,
2. Animation in JavaScript.
3. Addition and Multiplication of two numbers in JavaScript.
4. Convert the first letter of each word of the sting toUppercase in JavaScript.
5. Implementing Arrays in JavaScript.
6. Implementing Control Statements and Looping in PHP.
7. Implementing Functions in PHP.
8. Implementing Form Processing (GET & POST) in PHP.
9. Implementing Validation in PHP.
10. Implementing Cookies in PHP.

**SEMESTER VI**  
**UCCAY20 - PROJECT WORK**

<b>Year /Sem</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
III / VI	UCCAY20	Project Work	Practical	Core	3	2	40+60

The objective of the project is to enable the students to work in a project of latest topic.. Students have to do project throughout the semester in any application to gain practical knowledge of what they have studied in five semesters. Each student shall have a guide from the Department, the students are expected to complete the project and submit a fullfledged report comprising of the complete system developed along with implementation and test results. The submitted report will be evaluated by conducting project viva at the end of the semester. Their progress is monitored continuously to award the internal assessment marks.

**ASSESSMENT:**

**Pattern of Question Paper**

**Theory- Total Marks 100**

Section A (Answer ALL) -  $10 \times 3 = 30$

Section B (either OR) -  $5 \times 5 = 25$

Section C (3 out of 5) -  $3 \times 15 = 45$

**Practical - Total Marks 60**

**Practical:** 45 Marks

**Record:** 10 Marks

**Viva:** 5 Marks

**SEMESTER V/VI**  
**USCSG520 –SKILL BASED ELECTIVE: R PROGRAMMING**

<b>Year /Sem</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
III / VI	USCSG520	Skill Based Elective: R Programming	Theory with Practical	Skill Based Elective	2	2	40+60

**COURSE OBJECTIVES**

1. Understand the usage of R programming interactive environment.
2. Understand R programming language includes functions, arrays and dataframes.
3. Describe the statistical computing includes programming in R, reading and accessing data in R.
4. Understand the concept of Meta Programming.
5. Build a simple sorting algorithm.

**COURSE SYLLABUS**

**Unit I**

**Hours: 6**

- 1.1 Introduction to R and R Studio. (K1, K2)
- 1.2 Basic Objects: Vector. (K2)
- 1.3 Matrix, Array. (K2, K3)
- 1.4 Lists. (K2)
- 1.5 Data Frames. (K3)
- 1.6 Functions. (K2, K3)

**Unit II**

**Hours: 6**

- 2.1 Basic Expressions: Assignment Expressions. (K1, K2)
- 2.2 Conditional Expressions. (K3, K4)
- 2.3 Loop Expressions. (K3, K4)
- 2.4 Basic Objects: Object Functions (K2, K3)
- 2.5 Logical Functions. (K2, K3)
- 2.6 Math functions (K2, K3)

**Unit III**

**Hours: 6**

- 3.1 Numeric Methods Statistical function. (K2, K3)
- 3.2 Family Functions. (K2, K3)
- 3.3 Working with Strings. (K2, K3)
- 3.4 Working with Data. (K2, K3)
- 3.5 Meta programming. (K2)
- 3.6 Object Oriented Programming. (K2, K3, K4)

**Unit IV**

**Hours: 6**

1. Write a program that prints ‘Hello World’ to the screen.
2. Write a program that asks the user for a number n and prints the sum of the numbers 1 to n.
3. Write a program that prints a multiplication table for numbers up to 12.
4. Write a function that returns the largest element in a list.

**Unit V****Hours: 6**

1. Write a function that computes the running total of a list.
2. Write a function that tests whether a string is a palindrome.
3. Implement the following sorting algorithms: Selection sort, Insertion sort, Bubble Sort.
4. Implement linear search.
5. Implement binary search.
6. Implement Matrices Addition, Subtraction and Multiplication

**Books for Study:**

1. Kun Ren, "Learning R. Programming, Packt Publishing" - ebooks Account, October 28, 2016.
2. Dr. Mark Gardener, "Beginning R: The Statistical Programming Language", Paperback, 2013.

**Books for Reference:**

1. Colin Gillespie, Robin Lovelace, "Efficient R Programming: A Practical Guide to Smarter Programming", O'Reilly Media, 1<sup>st</sup> Edition (October 25, 2016); eBook (2017-04-10).
2. Daniel Navarro, "Learning Statistics with R", lulu.com (2015); eBook (University of Adelaide, 2018. Updated Continuously)

**SEMESTER V/VI**  
**USCSF620 - SKILL BASED ELECTIVE: DATA ANALYTICS USING DATA**  
**VISUALIZATION TOOLS**

Year /Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	USCSF620	Skill Based Elective: Data Analytics using Data Visualization	Theory with Practical	Skill Based Elective	2	2	40+60

**COURSE OBJECTIVES**

1. To understand and extend the current state of the art in data visualization.
4. To Understand the different data format and its graphical representation
2. To Identify the various data visualizations tools in the market and its features.
3. To provide skills present data effectively through chart, map and dashboard.
4. To Develop skills to present data effectively through chart, map and dashboard.

**COURSE SYLLABUS**

**UNIT I**

**Hours: 5**

- 1.1 Data Visualization: Introduction. (K1)
- 1.2 Benefits of Data Visualization. (K2)
- 1.3 Data Visualization Tools. (K2)
- 1.4 Features. (K2)
- 1.5 Data access from data sources. (K2)

**UNIT II**

**Hours: 5**

- 2.1 Data Transformation. (K1, K2)
- 2.2 Types of charts. (K2)
- 2.3 Bar Chart. (K1, K2)
- 2.4 Pie Chart. (K2)
- 2.5 Data Tables. (K2)
- 2.6 Scatter Chart. (K2)

**UNIT III**

**Hours: 5**

- 3.1 Time series Chart. (K2)
- 3.2 Score card. (K2)
- 3.3 Scatter Chart. (K2)
- 3.4 Bullet Chart. (K2)
- 3.5 Area Chart. (K2)
- 3.6 Heat Map. (K2)

**UNIT IV**

**Hours: 8**

1. Create a bar chart for the given data.
2. Create a pie chart for the given data.
3. Create a scatter chart for the given data.
4. Create a time series chart for the given data.

5. Create a bullet chart for the given data.
6. Create area chart for the given data.
7. Create a heat map for the given data.

**ASSESSMENT FOR SKILL-BASED ELECTIVE****Pattern of Question Paper****SBE: Total Marks 60**

Section A (Any 10 out of 15) -  $10 \times 2 = 20$

Section B

Practical: **35 Marks**

Record: **5 Marks**

**ASSESSMENT FOR NON-MAJOR ELECTIVE****NME - Total Marks 60**

Section A (Answer ALL) -  $5 \times 2 = 10$

Section B (Answer 3 out of 5)  $3 \times 5 = 15$

**Practical:** 30 Marks

**Record:** 5 Marks

# **Department of Commerce (UG)**

## **SYLLABUS AND REGULATIONS**

Under

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**Department of Commerce (UG)**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighboring districts.

**B) NAME OF THE PROGRAMME: B. Com**

**Vision**

To develop a centre for excellence providing conceptual knowledge and sharpen analytical and decision-making skills with ethical behaviour.

**ELIGIBILITY CRITERIA OF THE PROGRAMME**

A candidate who has passed the Higher Secondary Examinations (Academic [10 + 2] Stream) with Commerce, Accountancy, Economics, Computer Science/Statistics/Business Mathematics as subjects, conducted by the Government of Tamil Nadu or an Examination accepted as equivalent thereto by the Syndicate of the Thiruvalluvar University shall be eligible for admission to B. Com Degree Course in General Commerce.

**PROGRAMME OUTCOME:**

On completion of the UG Programme, students will be able to:

**PO 1: SOCIAL CONTRIBUTION:**

excel as a socially committed individual having empathy for the needs of the society through value-based education.

**PO 2: ENVIRONMENT AND SUSTAINABILITY:**

enhance the theoretical and practical knowledge gained in the field of auditing, tax filing, and share market.

**PO 3: PROFESSIONAL ETHICS:**

apply ethical principles in promoting values and attitudes and become responsible towards the practice of accounting norms.

**PO 4: INDIVIDUAL AND TEAM WORK:**

function effectively as an individual and as a member or leader in teams strengthening group dynamics to achieve the common goals of the organisations.

**PO 05: LIFE-LONG LEARNING:**

recognize the need for and have the ability to engage in life-long learning process to cope up with the emerging trends in social, cultural, economic and technological changes.

**PO6: HIGHER KNOWLEDGE :**

Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

**PROGRAMME SPECIFIC OBJECTIVE:**

Within few years of obtaining UG Degree in commerce, the students will be able to

**PSO 1. SUBJECT PROFICIENCY:**

succeed in obtaining employment appropriate to their interest in related fields and make a positive contribution in public practice, government, commerce and industry.

**PSO 2. PRACTICAL APPLICATION:**

Apply the practical knowledge gained over the years in the field of auditing, tax filing, share market and other finance related services

**PSO 3. PROFESSIONAL GROWTH:**

develop in their professional career through lifelong learning and excel as the fellow associates in the field of company secretaryship, chartered accountancy and business administration.

**PSO 4. MANAGEMENT SKILLS:**

Exercise leadership qualities and moral values through ethical ways with the concern for the society and the environment with team spirit to adapt to change throughout their professional career.

**PSO 5. ADDRESSING THE NEEDS OF THE NATION:**

Cater to the needs of the industry/society so as to contribute for the development of the nation.

**PSO6. ENTREPRENEURIAL SKILL:**

Enhance the Entrepreneurial skill, critical & creative thinking to thrive to be self-motivated and successful.

**MAPPING OF PROGRAMME SPECIFIC OBJECTIVE WITH PROGRAMME OUTCOME**

UCCOH20 - FINANCIAL ACCOUNTING II**

<b>Year/ Semester</b>	<b>Course Code</b>	<b>Title of the course</b>	<b>Course type</b>	<b>Course category</b>	<b>No. of. Hours</b>	<b>Credits</b>	<b>Marks</b>
II/IV	UCCOH20	Financial Accounting II	Theory	Core	5	4	40+60

**Course Objective:**

1. To impart the students with knowledge on the procedure for preparation of fire insurance Claims.
2. To enable the students prepare statement of affairs and deficiency account under insolvency Accounts.
3. To acquaint students with the partnership principles and concepts.
4. To assist the students in understanding the application of Partnership principles in different situations and conditions.
5. To enable the students differentiate the different methods of preparation under Piecemeal Distribution System.

**Course Outcome (CO):**

1. Students gained knowledge in computing the loss of stock or loss of profits under fire insurance claims.
2. Students were able to prepare the Statement of Affairs and Deficiency accounts under Insolvency system.
3. Students gained knowledge on applying the various concepts relating to partnership accounts.
4. Students were familiarised to choose different modes of Dissolution of Partnership firms.
5. Students were able to differentiate the different methods of preparation under Piecemeal Distribution System.

**COs consistency with POs**

5	H	H	M	H	H	H

**(Low – L, Medium – M, High –H)****Course Syllabus****Unit I: Fire Insurance Claims****(15 Hours)**

- 1.1 Meaning and need for fire insurance. (K<sub>1</sub>,K<sub>2</sub>)
- 1.2 Types of fire insurance policies(K<sub>1</sub>,K<sub>2</sub>)
- 1.3 Claim for loss of normal stock(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.4 Claim for loss of abnormal stock. (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 1.5 Technical terms related to loss of profit policy (K<sub>1</sub>,K<sub>2</sub>)
- 1.6 Claim for loss of profits(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit II: Insolvency****(15 Hours)**

- 2.1 Meaning and nature of Insolvency (K<sub>1</sub>, K<sub>2</sub>)
- 2.1 Relevant acts – Presidency Town and Provincial Insolvency Act (K<sub>1</sub>, K<sub>2</sub>)
- 2.3 Difference between Statement of Affairs and Balance Sheet(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 2.4 Preparation of Statement of Affairs(K<sub>2</sub>,K<sub>3</sub>)
- 2.5 Preparation of Deficiency Accounts. (K<sub>1</sub>,K<sub>2</sub>)
- 2.6 Consolidated Preparation of Statement of Affairs and Deficiency Accounts (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit III: Partnership****(15 Hours)**

- 3.1 Meaning and features of Partnership Act and Contents of Partnership Deed(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 3.2 Difference between Sacrificing and Gaining Ratios and methods of Goodwill(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 3.3 Partnership Fundamentals(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 3.4 Admission of a Partner(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

3.5 Retirement of a Partner(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit IV: Death and Dissolution of a partners (15 Hours)**

4.1 Death of a partner (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)

4.2 Dissolution of firm – Meaning and Modes of Dissolution (K<sub>1</sub>,K<sub>2</sub>)

4.3 Normal Dissolution – Settlement of Accounts – Accounting Treatment of unrecovered assets and liabilities (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)

4.4 Insolvency of a Partner(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)

4.5 Insolvency of two Partners – Garner Vs Murray Rule(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

4.6 Insolvency of All Partners. (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit V: Piecemeal Distribution (15 Hours)**

5.1 Meaning of Piecemeal Distribution. (K<sub>1</sub>, K<sub>2</sub>)

5.2 Methods of Piecemeal Distribution. (K<sub>1</sub>, K<sub>2</sub>)

5.3 Order of settlement of claims. (K<sub>1</sub>, K<sub>2</sub>)

5.4 Statement showing Absolute Surplus(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

5.5 Proportionate Capital Method. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

5.6 Maximum loss method. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## SEMESTER IV

### UCCOI20– Methods of Cost Accounting

Year/ Semester	Course Code	Title of the course	Course type	Course category	No. of Hours	Credits	Marks
II/IV	UCCOI20	Methods of Cost Accounting	Theory	Core	5	4	40+60

#### Course Objectives:

- 1.To introduce to the students the methods of process costing.
- 2.To teach various methods of apportionment of expenses.
- 3.To enable the students to ascertain cost for Joint products and by products.
- 4.To illustrate the students to calculate cost of complete and incomplete contracts.
5. Students are able to differentiate, analyze and prepare reconciliation statement.

#### Course Outcomes (CO):

Upon the successful completion of this course the students will be able to:

1. Acquire conceptual knowledge of process costing and its treatment.
2. Identify the methods of apportionment according to the impact of business.
3. Identify and analyze the costs incurred in contract costing and job costing.
4. Understand and apply the methods of calculating transport cost.
5. Differentiate and compare the cost and financial books to reconcile the accounts.

#### COs consistency with POs

CO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

## **Course Syllabus**

### **Unit I: Process Costing**

**(15 Hours)**

- 1.1. Introduction Features, costing procedures. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Special points in Process costing – Normal loss and scrap. (K<sub>1</sub>, K<sub>2</sub>)
- 1.3. Abnormal Loss, Abnormal Gain. (K<sub>1</sub>, K<sub>2</sub>)
- 1.4. Problems on Normal Process account. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5. Process Cost with Normal Loss and Normal Gain with Units. (K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Process Cost with Abnormal Loss and Abnormal Gain with Units. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Costing Methods**

**(15 Hours)**

- 2.1. Joint products – Meaning, Accounting for joint products, methods used in apportioning Joint cost. (K<sub>1</sub>, K<sub>2</sub>)
- 2.2. Problems on Joint products- Average Unit method, Physical Unit method, Survey method, Market value method. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.3. By-products – Meaning, Accounting for by-products, Methods used in apportioning By-products, Problems on By-products. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Job costing – Meaning, Features, Advantages, Limitations and procedures. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5. Batch costing – Elements of cost relating to batch, Economic Batch Quantity (EBQ). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6. Problems on Job costing and batch costing. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Contract Costing**

**(15 Hours)**

- 3.1. Meaning, features, Difference between contract costing and job costing. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Contract Costing, Problems on completed contract. (K<sub>3</sub>, K<sub>4</sub>)
- 3.3. Contract Costing – Treatment of plant. (K<sub>2</sub>, K<sub>3</sub>)
- 3.4. Incomplete Contracts. (K<sub>3</sub>, K<sub>4</sub>)
- 3.5. Incomplete contracts with laws. (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Multiple Contracts. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Transport Costing**

**(15 Hours)**

- 4.1. Meaning, Classification of cost, Selection of appropriate cost Unit. (K<sub>1</sub>, K<sub>2</sub>)
- 4.2. Computation of cost Unit. (K<sub>2</sub>, K<sub>3</sub>)
- 4.3. Calculation of cost for running distance. (K<sub>2</sub>, K<sub>3</sub>)
- 4.4. Passenger transport cost. (K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Goods transport Cost. (K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Comprehensive Problems. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Reconciliation Statement**

**(15 Hours)**

- 5.1. Introduction, Meaning and need for reconciliation. (K<sub>1</sub>, K<sub>2</sub>)
- 5.2. Reasons for difference in profit. (K<sub>1</sub>, K<sub>2</sub>)
- 5.3. Procedure of Reconciliation with format. (K<sub>2</sub>, K<sub>3</sub>)
- 5.4. Reconciliation statement – profit as per cost account and laws as per financial account. (K<sub>3</sub>, K<sub>4</sub>)
- 5.5. Reconciliation statement – profit as per financial account and laws as per cost account . (K<sub>3</sub>, K<sub>4</sub>)
- 5.6. Memorandum reconciliation statement. (K<sub>3</sub>, K<sub>4</sub>)

## SEMESTER IV

### UCCOJ20 - LAW OF CONTRACTS II

Year/ Semester	Course Code	Title of the course	Course type	Course category	No. of Hours	Credits	Marks
II/IV	UCCOJ20	Law of Contracts II	Theory	Core	5	4	40+60

#### Course Objectives:

1. To gain knowledge on sales and consumer protection act.
2. To apprehend knowledge on pricing, performance of contract.
3. To acquire theoretical knowledge on special contracts.
4. To know about the incorporation of companies.
5. To have in-depth knowledge on the internal affairs of the companies

#### Course Outcomes (CO):

1. Students acquired conceptual knowledge on sales and consumer protection act.
2. Students were familiarised with the performance of valid contract.
3. Students gained an insight knowledge on special contracts.
4. Students gained thorough knowledge incorporation of companies.
5. Students were well versed in the internal affairs of the companies.

#### COs consistency with POs

### **Unit I: Marginal Costing**

**(15 Hours)**

- 1.1 Meaning and definition of Marginal Costing (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Marginal costing and Absorption Costing (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3 Cost Volume Profit Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.4 Fixed cost and Variable cost (Important terms) ( K<sub>2</sub>, K<sub>3</sub>)
- 1.5 Contribution to Sales (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.6 Calculation of Break - Even Analysis (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Practical Applications of Marginal Costing**

**(15 Hours)**

- 2.1 Practical Applications of Marginal Costing for Managerial Decision Making (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Key Factors in Make or Buy Decision (K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Idle facilities and Plant Mergers (K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Product Mix or Sales Mix (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Export decision - Product Elimination Decision (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Plant or Equipment Purchase Decision (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Standard costing and Variance Analysis**

**(15 Hours)**

- 3.1 Meaning of Standard Costing and Variance Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>4</sub>)
- 3.2 Advantages and Limitations of Standard Costing and Variance Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.3 Computation of Variances Relating to Materials (K<sub>1</sub>, K<sub>2</sub>)
- 3.4 Labour, Overheads and Sales based on Sales Value (Simple problems) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Standard Costs and Estimated Costs (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Applicability of Standard Cost (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: Capital Budgeting**

**(15 Hours)**

- 4.1 Meaning and definition of Capital Budgeting (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Difference between Traditional Methods and Non Traditional Methods (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Pay back accounting Rate of Return (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Profitability Index and Internal Rate of Return (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Discounted Cash Flow Method (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6 N.P.V and I.R.R Method (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Responsibility Accounting and Zero Base Budgeting**

**(15 Hours)**

- 5.1 Meaning of Responsibility accounting and Zero Base Budgeting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.2 Essentials of Responsibility accounting (K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Responsibility Centres (K<sub>1</sub>, K<sub>2</sub>)
- 5.4 Advantages and Limitations of Responsibility Accounting (K<sub>1</sub>, K<sub>2</sub>)
- 5.5 Cost centre and Profit centre (K<sub>1</sub>, K<sub>2</sub>)
- 5.6 Zero Base budgeting and process (K<sub>1</sub>, K<sub>2</sub>)

## **Course Syllabus**

### **Unit I: Income from Capital Gains**

**(15 Hours)**

- 1.1 Meaning of Capital assets, its exceptions and Self generated assets(K<sub>1</sub>,K<sub>2</sub>)
- 1.2 Kinds of capital assets – Short term and Long term assets(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.3 Cost of acquisition and cost of improvement under different circumstances(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.4 Computation of short term and long term gains(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.5 Capital Gains exempt from tax(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.6 Computation of capital gains including exemptions (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

### **Unit II: Income from Other Sources**

**(15 Hours)**

- 2.1 Incomes chargeable under from Other Sources (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Meaning of dividend and taxation of dividend (K<sub>1</sub>, K<sub>2</sub>)
- 2.3 Taxation of casual incomes (K<sub>1</sub>, K<sub>2</sub>)
- 2.4 Interest on securities and kinds of securities (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Deductions allowable from Income from other Sources. (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Computation of Income from Other Source (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Set off and Carry forward of losses**

**(15 Hours)**

- 3.1 Meaning of clubbing of incomes and deemed incomes(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>).
- 3.2 Income of Other Persons included in the Assessee's Total Income(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>).
- 3.3 Aggregation of incomes(K<sub>1</sub>, K<sub>2</sub>).
- 3.4 Provisions governing the set-off of losses(K<sub>1</sub>, K<sub>2</sub>).
- 3.5 Provisions regarding the carry forward and set off of losses(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>).
- 3.6 Computation of Gross Total Income(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Assessment of Individuals**

**(15 Hours)**

- 4.1 Deductions in respect of certain payments (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2 Deductions in respect of certain incomes. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Computation of Deductions eligible under Sec 80C to 80U (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Computation of Total Income (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.5 Rates of Income Tax in case of Individuals (K<sub>1</sub>, K<sub>2</sub>)
- 4.6 Computation of Tax Liability of Individuals(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Preparation of Filing of Returns and Payment of Tax**

**(15 Hours)**

- 5.1 Preparation and Filing of Returns – E- Filing (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.2 Deduction and Collection of Tax at Source (TDS) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Advance Payment of Tax (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4 Recovery of Tax (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Refund of Tax (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Appeals and Revision (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

**SEMESTER V / VI**  
**UECOD520/UECOD620 - ELECTIVE: ELECTRONIC COMMERCE AND TALLY**

Year/ Semester	Course Code	Title of the course	Course type	Course category	No. of Hours	Credits	Marks
III/V/VI	UECOD520/ UECOD620	Electronic Commerce and Tally	Theory	Elective III:A	4	3	40+60

**Course Objectives:**

1. To impart the knowledge about various concepts of e-commerce.
2. To enable the awareness through the usage of internet technologies.
3. To execute the different models of OSI
4. To evaluate the various knowledge about payment methods.
5. To criticize the features of tally & practical consideration of it.

**Course Outcomes (CO):**

The Learners will be able to:

1. To know the various concepts of e-commerce.
2. Awareness gained on the aspects of e-commerce, the usage of internet technologies
3. Executing different security, OSI models
4. Imbibe knowledge on various payment models and its application
5. In depth knowledge on Tally hands on training to create a company and preparation of final accounts.

**CO's consistency with PO'S**

4	M	H	H	M	H	H
5	H	M	H	H	H	H

(Low– L, Medium – M, High– H)

## **Course Syllabus**

### **Unit I: Introduction to E-Commerce**

**(12 Hours)**

- 1.1 E-Commerce Meaning and Definition (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.2 Concept of Electronic Commerce (K<sub>2</sub>, K<sub>3</sub>)
- 1.3 Nature, Scope ( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4 Impact, challenges and limitations of E-Commerce (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5 Advantages of E-Commerce & Disadvantages (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6 Encryption and Decryption (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Aspects of E-Commerce**

**(12 Hours)**

- 2.1 Evolution of E-Commerce (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Major categories of E-Commerce ( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Advertising and Marketing through internet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.4 Internet Advertising and models (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Banner Advertisements (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6 Sponsoring content and push based advertising (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Security in E-Commerce**

**(12 Hours)**

- 3.1 Firewall and Securities (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.2 OSI Models (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Network security and Firewalls (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.4 Firewall & Protocols Types of Protocols (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Data and Message Security (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Security tools (Digital Signature and Digital Certificate) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: E-Commerce payment modes**

**(12 Hours)**

- 4.1 E-Payment Systems Introduction (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2 Online payment & Prepaid and Post paid payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Types of Electronic Payment System (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.4 Security issues on Electronic payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.5 Net Banking & Mobile Commerce. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.6 Requirements metrics of a payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Tally (Theory)**

**(12 Hours)**

- 5.1 Introduction of Tally Accounting and Inventory an outline (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Fundamentals of accounting, accounting terms, (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.3 Definitions Ledger and ledger accounts Trial balance (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4 Trading and profit and loss account Balance Sheet Fundamentals of Inventory (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Account creation, Account Information, Groups (create, display, delete) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Multiple groups ledger (create, display, alter) Multiple ledger Inventory master creation stock groups and stock items Entering Vouchers and Invoices Different types of Accounting vouchers and Inventory Vouchers, Reports in tally Balance sheet, Profit and Loss Account, Trial Balance, Day Book Ratio Analysis, Reconciliation of Bank account,

Interest Calculation (Simple Mode) (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit VI: Practical (12 Hours)**

1. Profit & Loss Account and Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
2. Trial balance and Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
3. Bank reconciliation (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
4. Stock summary and Profit and loss Account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
5. Interest receivables and payables (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

internal assessment (assignment/seminar/presentation/discussion) only]

## SEMESTER V / VI

### USCOD520/USCOD620 - CONSUMER GUIDE AND EMPOWERMENT

Year/ Semester	Course Code	Title of the course	Course type	Course category	No. of. Hours	Credits	Marks
III/V/VI	USCOD520/ USCOD620	Consumer Guide and Empowerment	Theory	Skill Based Elective	2 2	2	40+60

#### Course Objectives

- 1.To understand the advantages and limitation of the consumer movement and the right of consumer
- 2.To understand the role of the consumer guidance society of India
- 3.It get information about demerits or defects of products from consumer and suggests remedial measures
- 4.Students learn food safety and standards authority of India
5. Students will be able to appreciate the emerging questions and policy issues in consumer law for future research

#### Course Outcomes(CO)

- 1.Gain knowledge on Consumer Movement
2. Apprehend Knowledge on Right to Information act
- 3.Acquire Theoretical Knowledge Consumer Protection act
- 4.Know About FSSAI 2006 Act
- 5.Have In-Depth Knowledge on Certification Marks

#### CO's consistency with PO'S

CO	PO1	PO2	PO3	PO4	PO5	PO6
1	H	M	H	H	H	H
2	H	M	H	H	H	M
3	H	H	M	H	M	M
4	M	H	H	M	H	M
5	H	M	H	H	H	M

(Low – L, Medium – M, High – H)

#### CO's consistency with PSO'S

CO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
1	H	M	H	H	H	H
2	H	M	H	H	H	H
3	H	H	M	H	M	H
4	M	H	H	M	H	H
5	H	M	H	H	H	H

(Low– L, Medium – M, High– H)

## **Course Syllabus**

### **Unit I: Consumer Awareness Movement (6 Hours)**

- 1.1 Consumer Awareness Movement (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Gandhiji's quote - Brief History (K<sub>1</sub>, K<sub>2</sub>)
- 1.3 Main features and Provision for Consumer Rights (K<sub>1</sub>, K<sub>2</sub>)
- 1.4 Responsibilities towards each Right (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.5 Critical Awareness (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.6 Environmental concern and United Nations Guidelines (K<sub>1</sub>, K<sub>2</sub>)

### **Unit II: Right to Information (6 Hours)**

- 2.1 Right to Information Act (K<sub>1</sub>, K<sub>2</sub>)
- 2.2 Public information Officer and Assistant (K<sub>1</sub>, K<sub>2</sub>)
- 2.3 Supply of Information to Associations (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Time period for supply of Information (K<sub>1</sub>, K<sub>2</sub>)
- 2.5 Appeals and Complaints (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6 Third party Information and Disclosure (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Consumer Protection Act 1986 (6 Hours)**

- 3.1 Consumer Protection Act 1986 (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Preliminary (Introduction, commencement and application) (K<sub>1</sub>, K<sub>2</sub>)
- 3.3 Consumer Protection Council (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.4 Establishment, Composition, Jurisdiction, Complaint, Manner, Procedure on Receipt of Complaint finding, Appeal (K<sub>1</sub>, K<sub>2</sub>)
- 3.5 Finality of order -limitation Period (K<sub>1</sub>, K<sub>2</sub>)
- 3.6 Administrative control and Enforcement of Orders by the Redressal Agencies (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: FSSAI ACT 2006 (Food Safety and Standards) (6 Hours)**

- 4.1 FSSAI Act 2006 (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2 Food safety and standards Authority of India (K<sub>1</sub>, K<sub>2</sub>)
- 4.3 General provisions as to Articles of Food (K<sub>1</sub>, K<sub>2</sub>)
- 4.4 Compliance steps of FBO (K<sub>1</sub>, K<sub>2</sub>)
- 4.5 Liability of the Manufacturers, Packers, Wholesalers, Distributors and Sellers Food Recall Procedures (K<sub>1</sub>, K<sub>2</sub>)
- 4.6 Offences and penalties, General Provisions relating to Penalty (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Certification Agencies - Certification Mark (6 Hours)**

- 5.1 Certification Agencies (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Certification Marks, BIS Hall Mark, AGMARK, ISI Mark, FPO Mark (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Vegetarian and Non Vegetarian Mark, Geographical Indication Mark (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.4 Significance of Certification Mark (K<sub>1</sub>, K<sub>2</sub>)
- 5.5 Bureau of Indian Standards (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.6 Objectives and Activities (K<sub>1</sub>, K<sub>2</sub>)

**Text Books:**

- 1.E-books available in the FSSAI website like
- 2.Dart, Pink, Yellow and Orange books
3. Newsletters (quarterly publications) of State Consumer Knowledge Helpline Resource Management Portal (SCHKRMP)
- 4.“Nugarvor Kavasam” a publication by the Department of Civil Supplies and Consumer

## SEMESTER V / VI

### USCOE520/USCOE620 - PRACTICAL AUDITING

Year/ Semester	Course Code	Title of the course	Course type	Course category	No. of Hours	Credits	Marks
III/V/VI	USCOE520/ USCOE620	Practical Auditing	Theory	Skill Based Elective	2	2	40+60

#### Course Objectives:

1. To understand basic principles governing audit.
2. To prepare audit programme.
3. To identify different audit evidence.
4. To apply practical knowledge in internal control, internal check and internal audit.
5. To know about vouching and verification.

#### Course Outcomes (CO):

1. Students acquired conceptual knowledge on basic audit principles.
2. Students were familiarized with the preparation of audit programmes for various situations.
3. Students gained an insight knowledge on different audit evidence.
4. Students were well versed in methodology of internal audit.
5. Students were able to differentiate between vouching and verification.

#### CO's consistency with PO'S

CO	PO1	PO2	PO3	PO4	PO5	PO6
1	H	M	H	H	H	H
2	H	M	H	H	H	M
3	H	H	M	H	M	M
4	M	H	H	M	H	M
5	H	M	H	H	H	M

(Low – L, Medium – M, High – H)

#### CO's consistency with PSO'S

CO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
1	H	M	H	H	H	H
2	H	M	H	H	H	H
3	H	H	M	H	M	H
4	M	H	H	M	H	H
5	H	M	H	H	H	H

(Low– L, Medium – M, High– H)

## **Course Syllabus**

### **Unit I: Nature of Auditing**

**(6 Hours)**

- 1.1 Definitions, features, Principles (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Qualifications and qualities of Auditor, Advantages and Disadvantages (K<sub>1</sub>, K<sub>2</sub>)
- 1.3 Primary object (K<sub>1</sub>, K<sub>2</sub>)
- 1.4 Secondary object (K<sub>1</sub>, K<sub>2</sub>)
- 1.5 Audit based on nature (K<sub>1</sub>, K<sub>2</sub>)
- 1.6 Audit based on period (K<sub>1</sub>, K<sub>2</sub>)

### **Unit II: Audit Programme**

**(6 Hours)**

- 2.1 Audit plan (K<sub>1</sub>, K<sub>2</sub>)
- 2.2 Audit program, Types (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Merits and demerits of Audit program (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Working papers (K<sub>1</sub>, K<sub>2</sub>)
- 2.5 Audit files (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Audit note book (K<sub>1</sub>, K<sub>2</sub>)

### **Unit III: Audit Evidence**

**(6 Hours)**

- 3.1 Compliance and substantive audit procedures (K<sub>1</sub>, K<sub>2</sub>)
- 3.2 Types of audit evidence (K<sub>1</sub>, K<sub>2</sub>)
- 3.3 Stages in judging audit evidence (K<sub>1</sub>, K<sub>2</sub>)
- 3.4 Audit sampling (K<sub>1</sub>, K<sub>2</sub>)
- 3.5 Determinants of Audit sample (K<sub>1</sub>, K<sub>2</sub>)
- 3.6 Risks of audit sample (K<sub>1</sub>, K<sub>2</sub>)

### **Unit IV: Internal Control, Internal Check, Internal Audit**

**(6 Hours)**

- 4.1 Audit risk, Types (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Concept of Internal control (K<sub>1</sub>, K<sub>2</sub>)
- 4.3 Characteristics of effective Internal control system (K<sub>1</sub>, K<sub>2</sub>)
- 4.4 objects, principles and advantages of internal check (K<sub>1</sub>, K<sub>2</sub>)
- 4.5 Internal check as regards to various transactions (K<sub>1</sub>, K<sub>2</sub>)
- 4.6 Difference between external and internal audit (K<sub>1</sub>, K<sub>2</sub>)

### **Unit V: Vouching and Verification**

**(6 Hours)**

- 5.1 Audit of cash transactions (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.2 Audit of trading transactions (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.3 Vouching of Impersonal Ledger (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4 Verification of Assets (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Verification of Liabilities (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Valuation of Assets and Liabilities (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Introduction to Accounting, Concepts & Conventions & Accounting Cycle (15 Hours)**

- 1.1. Meaning of Accounting, Definition of Accounting, Need and Steps in Accounting. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Advantage and limitations of Accounting, Groups interested in Accounting and Branches of Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3. Concepts and Conventions of Accounting, Classification of Various concepts and Conventions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4. Double Entry System- (Accounting Equations, Rules pertaining to Accounting equations), and Accounting Cycle. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5. Journal: Recording of transactions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Ledger- Classification of transactions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Trial Balance, Subsidiary Books & Bank Reconciliation Statements (15 Hours)**

- 2.1. Meaning of Trial balance, Definition, Objectives, Methods of Trial balance, Schedule of Debtors and Creditors and Errors not disclosed in Trial Balance. (K<sub>1</sub>, K<sub>2</sub>)
- 2.2. Problems (Trial Balance). (K<sub>3</sub>, K<sub>4</sub>)
- 2.3. Meaning of Subsidiary books, Types of Subsidiary books, Benefits, Methods of Recording and Posting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Accounting treatment of Subsidiary books. (K<sub>3</sub>, K<sub>4</sub>)
- 2.5. Meaning of Reconciliation, Need, Causes for difference and Methods of preparing Bank Reconciliation Statements. (K<sub>1</sub>, K<sub>2</sub>)
- 2.6. Preparation of Bank Reconciliation Statement. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Final Accounts with Simple adjustments (15 Hours)**

- 3.1. Introduction to Final Accounts, Meaning of Manufacturing Account and features of Manufacturing Accounts. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Trading Account Meaning and its Accounting treatment. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3. Profit & Loss Account Meaning and its accounting treatment. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.4. Balance sheet meaning, Classification of Assets and Liabilities and Adjustments. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5. Problems (Final Accounts without Adjustments). (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Problems (Final Accounts with Simple Adjustments). (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Depreciation Accounting (15 Hours)**

- 4.1. Meaning and Definition of Depreciation, Characteristic features of Depreciation. (K<sub>1</sub>, K<sub>2</sub>)
- 4.2. Objectives of Depreciation, Factors affecting the amount of Depreciation. (K<sub>1</sub>, K<sub>2</sub>)
- 4.3. Methods of providing depreciation – Introduction. (K<sub>1</sub>, K<sub>2</sub>)
- 4.4. Straight Line method Meaning, Merits and Demerits, Calculations for finding the Rate of Depreciation ( & More than one Asset). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Diminishing Balance method Meaning, Merits and Demerits, Simple problems. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Problems related to Depreciation. (K<sub>3</sub>, K<sub>4</sub>)

## **Unit 5: Single Entry System**

**(15 Hours)**

**5.1.** Meaning, Definition, Characteristic Features and Limitations of Single Entry System.  
( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

**5.2.** Difference between Double Entry System and Single Entry System. (K<sub>3</sub>, K<sub>4</sub>)

**5.3.** Ascertainment of Profit: Net worth method, Steps in calculating Profit or Loss.  
(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

**5.4.** Conversion Method: Meaning, Need, Steps for conversion of incomplete records.  
(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

**5.5.** Net worth Method: Preparation of Statement of Affairs and Statement of Profit.  
(K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

**5.6.** Conversion Method: Debtors Account, Creditors Account, Bills Payable Account, Bills receivable Account and preparation of Final Account. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Partnership Account –I (Fundamentals & Admission) (15 Hours)**

- 1.1. Definition, Meaning, Partnership deed. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Accounts of partnership firm. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3. Partners Capital account (Fixed & Fluctuating). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4. Admission of a partner- Introduction, Goodwill –meaning, need & Factors affecting the value of Goodwill. (K<sub>1</sub>, K<sub>2</sub>)
- 1.5. Calculation of Sacrificing Ratio and Valuation of Goodwill. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Problems of Admission of a partner (Capital account and Balance sheet). (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Partnership Account – II (Retirement & Death) (15 Hours)**

- 2.1. Introduction to Retirement of Partner – Profit Sharing Ratio, Gaining Ratio, Difference between Sacrificing Ratio and Gaining Ratio and Treatment of Goodwill. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2. Problems (Treatment of Goodwill). (K<sub>3</sub>, K<sub>4</sub>)
- 2.3. Comprehensive problems on Retirement of a Partner. (K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Introduction to Death of a partner, Mode of payment. (K<sub>1</sub>, K<sub>2</sub>)
- 2.5: Calculation of Gaining ratio and share of Goodwill. (K<sub>2</sub>, K<sub>3</sub>)
- 2.6: Comprehensive problems on Death of a Partner. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Branch Accounts (15 Hours)**

- 3.1. Meaning and objectives of Branch Account. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Types of Branch Account. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3. Features of Dependent Branch. (K<sub>1</sub>, K<sub>2</sub>)
- 3.4. Debtors System (Dependent Branch System). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5. Stock and Debtors System. (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Final Accounts System. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Departmental Accounting (15 Hours)**

- 4.1. Meaning, Need, Advantages of Departmental Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2. Difference between Departmental accounts and Branch Accounts, Apportionment of expenses. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3. Apportionment of Indirect expenses. Problems (K<sub>2</sub>, K<sub>3</sub>)
- 4.4. Departmental Trading Account (K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Departmental Profit and Loss Account with indirect expenses (K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Inter Departmental transfer at cost price. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Hire Purchase System (15 Hours)**

- 5.1. Meaning, Definition and characteristic features of Hire purchase. (K<sub>1</sub>, K<sub>2</sub>)
- 5.2. Difference between Hire purchase system and Instalment System. (K<sub>3</sub>, K<sub>4</sub>)
- 5.3. Calculation of Interest. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4. Journal in the books of buyer and seller. (K<sub>3</sub>, K<sub>4</sub>)
- 5.5. Ledger in the books of both buyer and seller. (K<sub>3</sub>, K<sub>4</sub>)
- 5.6. Default and repossession – Complete repossession. (K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Basic concepts of Accounting**

**(9 Hours)**

- 1.1 Definition, Objectives (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Groups interested in accounting information (K<sub>1</sub>, K<sub>2</sub>)
- 1.3 Branches, methods, Types, Bases of accounting (K<sub>1</sub>, K<sub>2</sub>)
- 1.4 Accounting Terminology (K<sub>1</sub>, K<sub>2</sub>)
- 1.5 Accounting concepts (K<sub>1</sub>, K<sub>2</sub>)
- 1.6 Conventions and Equations (K<sub>1</sub>, K<sub>2</sub>)

### **UnitII: Journal & Ledger**

**(9 Hours)**

- 2.1 Journal, meaning and objectives (K<sub>1</sub>, K<sub>2</sub>)
- 2.2 Recording of transactions in journal (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Ledger, meaning and its features and difference between Journal and ledger (K<sub>1</sub>, K<sub>2</sub>)
- 2.4 Posting of journal into ledger (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Trial balance, meaning, objectives (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Preparation of Trial balance (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Subsidiary Books**

**(9 Hours)**

- 3.1 Purchase and Purchase returns Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Sales and Sales returns Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Simple cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.4 Two column cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Three columnar cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Petty cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: Rectification of errors**

**(9 Hours)**

- 4.1 Meaning, classification of errors (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Errors of casting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Errors of carry forward (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Errors of posting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 One sided errors (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6 Double sided errors (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Final Accounts**

**(9 Hours)**

- 5.1 Trading account, meaning, items appearing in Trading account (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Preparation of Trading account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Profit and Loss account, meaning, contents of P&L A/c (K<sub>1</sub>, K<sub>2</sub>)
- 5.4 Preparation of P&L A/c (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.5 Balance sheet, classification of assets and liabilities (K<sub>1</sub>, K<sub>2</sub>)
- 5.6 Preparation of Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

**Programme Outcomes (PO):**

- PO 1** Attain knowledge and understand the principles and concepts in the respective discipline.
- PO 2** Acquire and apply analytical, critical and creative thinking, and problem-solving skills
- PO 3** Effectively communicate general and discipline-specific information, ideas and opinions
- PO 4** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.
- PO 5** Emulate positive social values and exercise leadership qualities and team work.
- PO 6** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

**Programme Specific Outcomes (PSO)**

- PSO 1:** Acquire knowledge about the principles and theories related to Biochemistry
- PSO 2:** Attain skills to tackle issues and apply knowledge to find solutions for the problem
- PSO 3** Bring economically challenged, socially backward young women to be competent with today's modern world for their sustenance
- PSO 4** Create an awareness of resources and enhance eco - consciousness for sustainable development of society
- PSO 5** Function effectively as a member or leader in a team and demonstrate professional ethics, Community living and Nation building initiatives
- PSO 6** Build a critical thinking skill and use them to update scientific knowledge throughout life.

**SEMESTER – I**  
**UCBCA20 - BIOORGANIC CHEMISTRY**

<b>Year/ Sem</b> I	<b>Course Code</b> UCBCA20	<b>Title of the Course</b> Bioorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> <b>100</b> 40+60=100
---------------------------	-----------------------------------	---	----------------------------------	------------------------------------	-----------------	---------------------	---

**Objectives:**

To provide a clear note on the bioorganic compounds.

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Outline the structure, properties and biological importance of carbohydrates.
2. Classify the structure and functions of amino acids along with proteins.
3. Build an idea about the role of lipids in the living system.
4. Assess the structural features of genetic material.
5. Explain the crucial role of vitamins and minerals for maintaining healthy life.

<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 hours)**

- 1.1 Carbohydrates: Occurrence and Structure of Carbohydrates (K1, K2, K3)
- 1.2 Classification of Carbohydrates (K1, K2, K3)
- 1.3 Physical and chemical properties of Glucose and Fructose (Oxidation, Reduction and Phenylhydrazine reaction), Isomerism of monosaccharides (K1, K2, K3, K4)
- 1.4 Biological importance of Monosaccharides (Glucose and Fructose) (K1, K2, K3, K4)
- 1.5 Disaccharides (Maltose, Lactose, Sucrose) (K1, K2, K3)
- 1.6 Polysaccharides (Starch, Glycogen, Cellulose) and Mucopolysaccharides. (K1, K2, K3)

**Unit II: (18 hours)**

- 2.1 Amino Acids: Structure of naturally occurring and non-protein amino acids (K1, K2, K3, K4)
- 2.2 Classification of amino acids based on structure, number of amino and carboxylic groups, nutrition and polarity of side chain (K1, K2, K3, K4)
- 2.3 Physical properties - Chemical properties - Structure of Peptide bond (K1, K2, K3)
- 2.4 Classification of proteins - Primary Structure - Secondary structure- Tertiary structure - Quaternary structure - Various forces stabilizing the structures (K1, K2, K3, K4)
- 2.5 Biologically important peptides - Glutathione (K1, K2, K3)
- 2.6 Biologically important peptide hormones- Insulin, Vasopressin, Oxytocin (Structure and functions). (K1, K2, K3)

**Unit III: (18 hours)**

- 3.1 Lipids- Structure of fatty acids and Classification of fatty acids (K1, K2, K3, K4)
- 3.2 Functions of lipids and fatty acids (K1, K2, K3)
- 3.3 Classification of lipids: Simple, Compound lipids, Derived lipids (K1, K2, K3, K4)
- 3.4 Sterols (Cholesterol, Ergosterol - structure and functions) (K1, K2, K3, K4)
- 3.5 Characteristics of lipids - Iodine number, acid number, Saponification number, Reichert - Meissl number (K1, K2, K3)
- 3.6 Properties of lipids- Physical and Chemical properties. (K1, K2, K3)

**Unit IV: (18 hours)**

- 4.1 Nucleic Acids: Structure of Purine and Pyrimidines (K1, K2, K3)
- 4.2 Nucleosides and Nucleotides (K1, K2, K3, K4)
- 4.3 Structure and forms of DNA (A, B, Z) (K1, K2, K3)
- 4.4 Properties-Denaturation, T<sub>m</sub>, Hypo and Hyperchromicity, Cot value (K1, K2, K3, K4)
- 4.5 Renaturation, Hybridization (K1, K2, K3, K4)
- 4.6 Structure and types of RNA - rRNA, tRNA, mRNA and SnRNA- Functions of RNA. (K1, K2, K3, K4)

**Unit V: (18 hours)**

- 5.1 Vitamins: Classification of vitamins (K1, K2, K3, K4)
- 5.2 Fat soluble vitamins- Sources, RDA, Biochemical functions and Deficiency diseases (A, D, E, K) (K1, K2, K3)
- 5.3 Water soluble vitamin B-complex (vitamin B<sub>1</sub>, B<sub>2</sub>, B<sub>5</sub>, B<sub>6</sub> and B<sub>12</sub>) (Structure not required) (K1, K2, K4)
- 5.4 Water soluble vitamin non-B complex (vitamin C) (K1, K2, K3)
- 5.5 Minerals: Iron, Calcium, Sodium, Potassium (K1, K2, K3)
- 5.6 Microelements: Copper, Iodine and Zinc. (K1, K2, K3)

[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyse]

**SEMESTER – II**  
**UCBCB20 - CELL BIOLOGY**

Year/ Sem I/ II	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks 100 40+60=100
	UCBCB20	Cell Biology	Theory	Core	6	5	

**Objective:**

To provide a deep knowledge about cell – the basic unit of life.

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Describe cell as the basic unit of life, its structural organization and cytoskeleton
2. Develop knowledge about the functions of various subcellular organelles
3. Identify the type of cell division processes and its significance
4. Recall on the components of cell membrane and its role in maintaining cell function
5. Examine clearly about the mechanism of transport across the membrane

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	M	M	L	M
CO 2	H	H	M	M	L	H

CO 5	H	M	H	M	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 hours)**

- 1.1 An overall view of cells- origin-evolution of cells- Cell theory (K1, K2, K3)
- 1.2 Cell organization: Types of cell - Structural organization of Prokaryotic (*E.coli*) and Eukaryotic cells (Animal and plant cell) (K1, K2, K3, K4)
- 1.3 Comparison between plant cell and animal cell structure (K1, K2, K3, K4)
- 1.4 Virus cell structure: T4 Bacteriophage, Corona virus (K1, K2, K3)
- 1.5 An overview of molecular organization of cells - Microfilaments (Actin and Intermediary filament), Microtubules, Centrioles, Basal bodies, Cilia, flagella (K1, K2, K3)
- 1.6 Structure and function of TMV (Tobacco Mosaic Virus). (K1, K2, K3)

**Unit II: (18 hours)**

- 2.1 Components and functions of Organelles: Structure and functions of Mitochondria (K1, K2, K3, K4)
- 2.2 Endoplasmic reticulum- Rough and Smooth endoplasmic reticulum (K1, K2, K3, K4)
- 2.3 Structure and functions of Ribosomes (K1, K2, K3)
- 2.4 Structure and functions of Golgi apparatus (K1, K2, K3)
- 2.5 Structure and functions of Lysosomes – Chloroplast (K1, K2, K3)
- 2.6 Structure and functions of Peroxisomes and Glyoxysomes (K1, K2, K3)

**Unit III: (18 hours)**

- 3.1 Nucleus: Nuclear membrane, nucleolus, nuclear pore and annulus (K1, K2, K3)
- 3.2 Structure of chromosomes (K1, K2, K3, K4)
- 3.3 Functions of chromosomes (K1, K2, K3, K4)
- 3.4 Materials of chromosomes (K1, K2, K3, K4)
- 3.5 Cell cycle – Overview - Cell Division - Mitosis (K1, K2, K3, K4)
- 3.6 Cell Division- Meiosis I & II. (K1, K2, K3, K4)

**Unit IV: (18 hours)**

- 4.1 Cell membrane: Molecular organization of animal cell membrane (K1, K2, K3, K4)
- 4.2 Membrane lipids, proteins and carbohydrates (K1, K2, K3, K4)
- 4.3 The Fluid Mosaic Model and artificial membranes (K1, K2, K3, K4)
- 4.4 Structure of Mitochondrial membrane (K1, K2, K3)
- 4.5 Structure of Red cell membrane (K1, K2, K3)
- 4.6 Cell wall: Components and role of cell wall. (K1, K2, K3)

**Unit V: (18 hours)**

- 5.1 Membrane functions: Cell permeability, Ion selective channels (Uniport, Antiport, Symport with example) and carriers (K1, K2, K3, K4)
- 5.2 Transport processes, Diffusion, Facilitated diffusion (K1, K2, K3, K4)
- 5.3 Active transport proteins ( $\text{Na}^+$ - $\text{K}^+$  ATPase), Ionophores (K1, K2, K3)
- 5.4 Types of cell junctions: Gap junction and tight junctions (K1, K2)
- 5.5 Cell-Cell communication (Belt and Spot desmosomes) (K1, K2, K3)
- 5.6 Cell adhesion proteins: Integrin, Cadherin and selectin. (K1, K2, K3)

**SEMESTER I & II**  
**UCBCC20 MAIN PRACTICAL – I**

<b>Year: I</b> <b>Sem: I/II</b>	<b>Course Code:</b> UCBCC20	<b>Title of the Course:</b> Main Practical - I	<b>Course Type:</b> Practical	<b>Course Category</b> : Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	----------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Objective:**

To provide a wide practical knowledge on Qualitative and Quantitative Analysis.

**Course Outcomes (CO):**

On the completion of the course, the students will be able to;

1. Apply the safety rules in the laboratory
2. Use the measuring technique to weigh the compounds
3. Analyses quantitatively the biomolecules and mineral components
4. Identify the carbohydrate and amino acids qualitatively
5. Explain the idea on the cell division process

## **1. Safety Measures In The Laboratory-I**

### **2. Balance**

Physical Balance, Electronic Balance, Analytical Balance, Weight Box, Types of error

### **3. Volumetric Analysis**

1. Estimation of Glucose by Benedict's method
2. Estimation of Glycine by Sorenson's method
3. Estimation of Ascorbic acid using 2,6 Dichlorophenol indophenol
4. Estimation of Nitrite using sodium hydroxide
5. Estimation of Iron using potassium permanganate
6. Estimation of Copper
7. Estimation of Hydrogen peroxide using potassium permanganate
8. Estimation of Calcium in milk
9. Estimation of Chloride by Mohr's method
10. Acid number of oils
11. Iodine number of edible oils
12. Saponification number of lipids

### **4. Qualitative Analysis**

1. Carbohydrates: Glucose, Fructose, Galactose, Lactose, Maltose, Sucrose, Starch
2. Amino acids: Tyrosine, Tryptophan, Arginine, Cysteine, Methionine, Proline

### **5. Cell Biology**

1. Mitosis in onion root tip
2. Identification of plant and animal cell
3. Meiosis in Flower

### **Reference Books:**

### SEMESTER III

#### UCBCD20 - BIOCHEMICAL TECHNIQUES

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	UCBCD20	Biochemical Techniques	Theory	Core	7	5	40+60=100

#### Objective:

To study about the principles and applications of biochemical techniques.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Develop the ability to apply the principles of biochemical techniques
2. Compare the difference between various methods of chromatography
3. Explain how electrophoresis and centrifugation facilitates the separation of molecules
4. Analyse certain functionalities of bio molecules by using spectroscopic techniques
5. Compare natural and artificial radiation source and its importance

CO 5	H	H	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 hours)

- 1.1 Expression of the concentration of solutes in solutions: Normality, Molarity, Molality, Mass concentration- Osmole- Acids, Bases, Buffers and pH (Definition and examples) (K1, K2, K3, K4)

- 1.2 Buffer system of the body – Henderson equation - Osmosis, Isotonic- Hypo and Hypertonic, Osmotic Pressure (VantHoff's Law) (K1, K2, K3, K4)
- 1.3 Surface tension and Viscosity: Biological importance (K1, K2, K3, K4)
- 1.4 pH Electrode (Hydrogen and Glass): Instrumentation, operation and application. (K1, K2, K3, K4)
- 1.5 Clark Oxygen Electrode: Instrumentation, operation and application. (K1, K2, K3, K4)
- 1.6 Colloids: Definition - Types and Application (K1, K2, K3)

**Unit II:** **(15 hours)**

- 2.1 Chromatography – General Principles- Paper and TLC: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 2.2 Affinity chromatography: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 2.3 Ion-exchange chromatography: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 2.4 Molecular sieve chromatography: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 2.5 Gas chromatography: Principle, instrumentation, operation and applications (K1, K2, K3, K4)
- 2.6 HPLC: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)

**Unit III:** **(15 hours)**

- 3.1 Electrophoresis- General Principles -Factors affecting electrophoretic mobility - Paper, Agarose and Starch Electrophoresis: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 3.2 SDS-PAGE: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 3.3 Isoelectric focusing and Capillary electrophoresis: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 3.4 Centrifugation: Svedberg unit- Basic principle of centrifugation. (K1, K2)
- 3.5 Types of Centrifuges and Rotors (K1, K2)
- 3.6 Preparative and Analytical Ultra Centrifuges: Instrumentations and applications (Cell fractionation) (K1, K2, K3, K4)

**Unit IV:** **(15 hours)**

- 4.1 Spectroscopy: Fundamental principles of spectroscopy - Basic laws of absorption - Beer-Lambert's law - Principle and applications of Colorimetry (K1, K2, K3)
- 4.2 Ultra violet – Visible (UV-VIS) Spectrophotometry: Principle, instrumentation, operation and applications (K1, K2, K3, K4)
- 4.3 Infra-Red (IR) Spectrophotometry: Principle, instrumentation, operation and applications (K1, K2, K3, K4)
- 4.4 Fluorimetry: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 4.5 Atomic absorption spectrometry (AAS): Principle, instrumentation, operation and applications. (K1, K2, K3, K4)

4.6 Flame Emission Spectroscopy (FES): Principle, instrumentation, operation and applications. (K1, K2, K3, K4)

**Unit V : ( 15 hours)**

- 5.1 Radio isotopic Techniques: Radioisotopes- Stable and Unstable, Units of Radioactivity, Types of Radioactivity (K1, K2, K3, K4)
- 5.2 Detection and measurement of radioactivity: Based on Gas ionization (K1, K2, K3, K4)
- 5.3 Detection and measurement of radioactivity: Based on Autoradiography (K1,K2 K3, K4)
- 5.4 Detection and measurement of radioactivity(Method based on excitation)(K1,K2,K3, K4)
- 5.5 Application of radioisotopes in biological science: (Isotope dilution technique, metabolic studies, radio dating) (K1, K2, K3)
- 5.6 Radiation hazards and safety aspects (K1, K2, K3)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyse]**

**Text Books:**

## SEMESTER IV

### UCBCE20 – PHYSIOLOGY AND NUTRITION

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	UCBCE20	Physiology and Nutrition	Theory	Core	5	5	40+60=100

**Objectives:** To understand the homeostatic mechanism of each organ.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Outline the mechanism of breathing and the circulatory system
2. Describe the basic components and functions of the digestive system
3. Compile the functions of the urinary system and the physiology of muscle
4. Explain the central and peripheral nervous system organization
5. Identify the nutrients in food and their functions in maintaining health

**Unit I:** **(15 hours)**

1.1 Respiratory system: Overview of respiratory system (K1, K2)

1.2 Exchange of Gases (K1, K2)

1.3 Circulation: Blood composition and Functions - Types of Blood cells –  
Morphology and Function (K1, K2)

- 1.4 ABO Blood Groups - Blood Coagulation (K1, K2)
- 1.5 Structure of Heart and Blood vessels (K1, K2)
- 1.6 Cardiac cycles - Blood pressure (Diastolic, Systolic and Normal Blood pressure) Normal ECG curve (K1, K2, K3)

**Unit II: (15 hours)**

- 2.1 Digestive System: Structure and function of different components of digestive system (K1, K2)
- 2.2 Carbohydrates: Digestion, Absorption and Nutritional significance (K1, K2, K3)
- 2.3 Lipids: Digestion, Absorption and Nutritional significance (K1, K2, K3)
- 2.4 Proteins: Digestion, Absorption and Nutritional significance (K1, K2, K3)
- 2.5 Role of Bile salts in Digestion and Absorption (K1, K2, K3)
- 2.6 Mechanism of HCl and Gastric juice formation in stomach (K1, K2, K3)

**Unit III: (15 hours)**

- 3.1 Excretory System: Structure of Kidney and Nephron - Composition of Urine (K1, K2)
- 3.2 Formation of Urine – Filtration, Active and passive transport of various substances and Secretion. (K1, K2, K3)
- 3.3 Muscle: Types of Muscle - Structure of Skeletal Muscle (K1, K2)
- 3.4 Mechanism of Muscle Contraction (K1, K2, K3)
- 3.5 Male reproductive system (K1, K2)
- 3.6 Female reproductive system (K1, K2)

**Unit IV: (15 hours)**

- 4.1 Nervous System: Brief outline of Nervous system – Nerve fibres (K1, K2)
- 4.2 Structure of Brain and Spinal Cord (K1, K2)
- 4.3 Synapses – Nerve Impulse – Action potential, Membrane potential, Types and Mechanism – Neurotransmitters (K1, K2, K3)
- 4.4 Composition and functions of CSF and Lymph (K1, K2, K3)
- 4.5 Eye: Structure and functions (K1, K2, K3)
- 4.6 Ear: Structure and functions (K1, K2, K3)

**Unit V: (15 hours)**

- 5.1 Nutrition: Nutrients - Balanced diet –Nutritional status - Food groups (K1, K2, K3)
- 5.2 Calorific value of food- Bomb calorimeter (K1, K2, K3, K4)
- 5.3 RQ: Definition and Measurement (K1, K2, K3, K4)

5.4 SDA: Definition and Measurement (K1, K2, K3, K4)

5.5 BMR: Definition and Measurement (K1, K2, K3, K4)

5.6 Adverse effects of Fast foods -Brief outline on the common adulterants in food (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

**Text Books:**

**SEMESTER III & IV**  
**UCBCF20 MAIN PRACTICAL - II**

<b>Year/ Sem</b> II / IV	<b>Course Code</b> UCBCF20	<b>Title of the Course</b> Main Practical - II	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/ W</b> 3	<b>Credits</b> 5	<b>Marks</b> 40+60=100
---------------------------------	-----------------------------------	--	-------------------------------------	------------------------------------	------------------	---------------------	---------------------------

**Objective:**

To inculcate practical skill in biochemistry.

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Work safely and effectively in a laboratory
2. Implement experimental protocol, and adapt them to plan and carry out simple colorimetric estimation
3. Explain the basic principles involved in isolation of bio molecules from various source
4. Analyse, interpret and report the results of their biochemical experiments

<b>CO / PO</b>	<b>PO 1</b>	<b>PO 2</b>	<b>PO 3</b>	<b>PO 4</b>	<b>PO 5</b>	<b>PO 6</b>
<b>CO 1</b>	H	H	H	H	M	M
<b>CO 2</b>	H	H	H	H	M	M
<b>CO 3</b>	H	H	L	H	M	M
<b>CO 4</b>	H	H	H	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

<b>CO / PSO</b>	<b>PSO 1</b>	<b>PSO 2</b>	<b>PSO 3</b>	<b>PSO 4</b>	<b>PSO 5</b>	<b>PSO 6</b>

<b>CO 4</b>	H	H	H	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**1. Safety Measures In The Laboratory – II**

**2. Colorimetric Estimation:**

1. Estimation of Carbohydrate by Anthrone method
2. Estimation of Fructose by Resorcinol method
3. Estimation of Protein by Biuret method
4. Estimation of Amino acids by Ninhydrin method

5. Estimation of Ascorbic acid
6. Estimation of Iron
7. Estimation of Inorganic phosphorous by Fiske & Subbarow method
8. Estimation of Tryptophan

### **3. Preparations:**

1. Preparation of Starch from potatoes
2. Preparation of Casein from Milk
3. Preparation of Lactalbumin from Milk
4. Preparation of Lecithin from egg yolk
5. Preparation of Albumin from Egg
6. Buffers: Phosphate Buffer, Citrate Buffer, Bicarbonate buffer and Tris buffer
7. Sols and Colloids

### **4. Biochemical Techniques:**

1. Paper Chromatography
2. Thin Layer Chromatography
3. Determination of pH of Saliva/ Urine
4. Agarose gel electrophoresis (Demonstration)
5. SDS - PAGE electrophoresis (Demonstration)

### **Reference Books:**

1. Jayaraman J - Manuals in Biochemistry - 4th edition - New Age International Publishers,2011

## SEMESTER V

### UCBCG20 - ENZYMES AND INTERMEDIARY METABOLISM

Year/ Sem III / V	Course Code UCBCG20	Title of the Course Enzymes and Intermediary Metabolism	Course Type Theory	Course Category Core	H/W 6	Credits 6	Marks 40+60=100

#### Objective:

To impart knowledge about the enzymes and the metabolism of biomolecules and its interrelationship.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Describe the properties, hypothesis and IUB classification of enzymes
2. Discuss the kinetics of enzyme catalyzed reactions, enzyme immobilization and applications of enzymes and their future potential
3. List the major pathways of carbohydrates metabolism and discuss their bioenergetics and regulation
4. Compile the catabolism of amino acid and metabolism of lipids with their significance
5. Revise the metabolic activity of tissues and organ with their function

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit 1:** (18 hours)

- 1.1 Enzymes - Nomenclature and IUB classification. (K1, K2, K3, K4, K5, K6)
- 1.2 Enzymes: Properties and Specificity (K1, K2, K3, K4, K5, K6)
- 1.3 Salient features of active site. (K1, K2, K3, K4, K5, K6)
- 1.4 Enzyme units (IU, Katal and Turnover number) (K1, K2, K3, K4, K5, K6)
- 1.5 Lock and key hypothesis and induced fit theory (K1, K2, K3, K4, K5, K6)
- 1.6 Collision theory (K1, K2, K3, K4, K5, K6)

**Unit II:** (18 hours)

- 2.1 Kinetics of single and bi substrate enzyme catalyzed reaction (K1, K2, K3, K4, K5, K6)
- 2.2 Catalysis-mechanism of reactions involving acid-base catalysis, electrostatic catalysis and Covalent catalysis (K1, K2, K3, K4, K5, K6)
- 2.3 Co-enzymes -NAD<sup>+</sup>, FMN, Co-ASH, Pyridoxyl phosphate, Biotin, FH 4 - Structure and Functions (K1, K2, K3, K4, K5, K6)
- 2.4 Enzyme Inhibition- Competitive, Non- competitive and Uncompetitive inhibition – Irreversible inhibition – Suicidal Inhibitors (K1, K2, K3, K4, K5, K6)
- 2.5 Various methods of immobilization (K1, K2, K3, K4, K5, K6)
- 2.6 Industrial and Medical applications of Enzyme (K1, K2, K3, K4)

**Unit III:** (18 hours)

- 3.1 Carbohydrate metabolism: Glycolysis - Role of PDH complex - Citric acid cycle (Pathway, Key enzymes and Regulation) Amphibolic role of TCA cycle (K1, K2, K3, K4, K5, K6)
- 3.2 Glycogenesis – Glycogenolysis: Pathway, Key enzymes and Regulation (K1, K2, K3, K4, K5, K6)
- 3.3 Gluconeogenesis: Pathway, Key enzymes and Regulation (K1, K2, K3, K4, K5, K6)
- 3.4 Pentose phosphate pathway: Pathway, Key enzymes and Regulation (K1, K2, K3, K4, K5, K6)
- 3.5 Metabolism of Galactose and Fructose - High energy compounds (K1, K2, K3, K4, K5, K6)
- 3.6 Electron transport chain, Oxidative Phosphorylation, Uncoupler and Inhibitors (K1, K2, K3, K4, K5, K6)

**Unit IV:** (18 hours)

- 4.1 Fate of Dietary proteins - Catabolism of amino acids -Oxidative and non-oxidative deamination – Transamination (K1, K2, K3, K4, K5, K6)
- 4.2 Decarboxylation and Urea cycle (K1, K2, K3, K4, K5, K6)
- 4.3 Fate of dietary lipids – Biosynthesis fatty acids (K1, K2, K3, K4, K5, K6)
- 4.4  $\alpha$ ,  $\beta$ ,  $\omega$ - Oxidation of fatty acids-Energetic of  $\beta$  Oxidation (K1, K2, K3, K4, K5, K6)
- 4.5 Biosynthesis of Cholesterol. (K1, K2, K3, K4, K5, K6)
- 4.6 Biosynthesis of TG and Phospholipids (K1, K2, K3, K4, K5, K6)

**UNIT V:****(18 hours)**

- 5.1 Nucleic acid metabolism: Fate of dietary nucleic acid (K1, K2, K3, K4, K5, K6)
- 5.2 Purine: Biosynthesis (K1, K2, K3, K4, K5, K6)
- 5.3 Pyrimidine: Biosynthesis (K1, K2, K3, K4, K5, K6)
- 5.4 Degradation of Purine and Pyrimidine nucleotides - Inhibitors of nucleotide biosynthesis (K1, K2, K3, K4, K5, K6)
- 5.5 Interrelationship of carbohydrates, proteins and fat metabolism (K1, K2, K3, K4, K5, K6)
- 5.6 Detoxification - Conjugation, Hydrolysis, Reduction and Oxidation (K1, K2, K3, K4, K5, K6)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate; K6 – Create]**

## SEMESTER V

### UCBCH20 – ENDOCRINOLOGY

Year/ Sem	Course Code	Title of The Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UCBCH20	Endocrinology	Theory	Core	5	6	40+60=100

#### Objective:

Endocrinology describes in detail the role of endocrine glands, their secretion and its regulatory effect on metabolic activities to maintain homeostasis.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Identify the various endocrine glands, morphology and their relevant hormones secreted
2. Know the chemical nature and structure of Hormones
3. Demonstrate the mechanisms of hormone action
4. Explain the functions of hormones
5. Analyze the clinical disorders of hormones

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	H	H	H	M	H	H
CO 3	H	H	M	H	H	H
CO 4	H	M	H	M	H	M
CO 5	H	H	M	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	M	M	M	H	M	M
CO 2	H	H	H	M	H	H
CO 3	M	H	M	H	M	H
CO 4	H	M	H	M	H	M
CO 5	H	H	M	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:** (15 Hours)

- 1.1 Glands- types of glands-General features and functions of Endocrine system (K1, K2, K3)
- 1.2 Definition of Hormones, Effector cell, target cell, Hormone target relationship (K1, K2, K4)
- 1.3 Classification of hormones based on Solubility, types of receptors, mechanism of action, (K1, K2, K3)
- 1.4 Steroid and protein hormones- Salient features, Biosynthesis, Secretion, Storage (K2, K3, K4, K5, K6)
- 1.5 Steroid and protein hormones (cAMP and tyrosine kinase) - transport and Mechanism of action (K3, K4, K5, K6)
- 1.6 Structure and types of Receptors (K1, K2, K3)

**Unit II:** (15 Hours)

- 2.1 Hypothalamus – Structure (K1, K2, K3)
- 2.2 Pituitary Gland – Structure (K1, K2, K3)
- 2.3 Anterior pituitary hormones -TSH, ACTH, LH, FSH, growth hormone, prolactin - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)
- 2.4 Posterior pituitary hormones - Vasopressin, Oxytocin - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)
- 2.5 Hypothalamic releasing factors (K1, K2, K3)
- 2.6 Pituitary Gland disorders - Gigantism, Acromegaly, Dwarfism (Etiology, Clinical features) (K1, K2, K3)

**Unit III** (15 Hours)

- 3.1 Thyroid Gland – Structure (K1, K2)
- 3.2 Parathyroid Gland – Structure (K1, K2)
- 3.3 Thyroid hormones – T3 and T4: Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)
- 3.4 Calcium regulating hormones – PTH and Calcitonin - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)
- 3.5 Thyroid gland disorders -Goiter, Grave's disease, Hashimoto's disease (Etiology, Clinical features) (K1, K2, K3)
- 3.6 Functions of atrial natriuretic peptide (heart), hormones of pregnancy- human chorionic gonadotropin (placenta), Erythropoietin and renin (kidneys), leptin and resistin (adipose tissue), Thymosin (thymus gland) (K1, K2, K3, K4)

**Unit IV:** (15 Hours)

- 4.1 Pancreas – Structure (K1, K2)
- 4.2 Dual Function of the Pancreatic Gland (K1, K2, K3)
- 4.3 Pancreatic Hormones: Insulin - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)
- 4.4 Pancreatic Hormones: Glucagon - Biosynthesis, Secretion, Storage, Transport,

Mechanism of action and Function (K3, K4, K5, K6)

4.5 Disorders of Pancreatic Hormone: Diabetes mellitus, Hyperglycemia and Hypoglycemia (K1, K2, K3)

4.7 Gastro Intestinal hormones (K1, K2, K3, K4)

#### **Unit V:**

**(15 Hours)**

5.1 Adrenal Gland – Anatomy (K1, K2)

5.2 Gonads – Structure (K1, K2)

5.3 Adrenal medullary hormones- Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)

5.4 Adrenal cortex hormones - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K3, K4, K5, K6)

5.5 Disorders of Adrenal hormones: Addison's disease, Cushing syndrome (Etiology, Clinical features) (K1, K2, K3)

5.6 Gonadal Hormones - Androgens, Estrogens, Progesterone - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Function (K2, K3, K4, K5, K6)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

## SEMESTER-V

### UEBCA20- ELECTIVE I A: IMMUNOLOGY

Year / Sem	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
III/V	UEBCA20	Elective I A: Immunology	Theory	Elective I A	5	5	40+60=100

#### Objective:

To help the students to understand the components of Immune system

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Outline the cell types and organ present in the immune response
2. Identify the role of MHC antigens
3. Discuss the basic techniques of antigen and antibody interactions
4. Compare the spectrum of autoimmune diseases
5. Explain the stages of transplantation

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	L	L	H	M	H	L
CO 3	M	H	M	L	H	M
CO 4	H	M	H	M	L	H
CO 5	M	H	L	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	M	M	H
CO 2	H	M	L	M	M	M
CO 3	H	H	H	H	H	H
CO 4	H	M	M	M	H	M
CO 5	H	H	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 Hours)

- 1.1 Lymphoid Organs-Primary Lymphoid organs—Structure of Thymus and Bone marrow (K1, K3)
- 1.2 Secondary Lymphoid organs -Structure of Lymph node, Spleen (K2)
- 1.3 Cells involved in immune system -Morphology, secretions and functions (K3)
- 1.4 Immunity-Innate immunity and Acquired immunity (K2)
- 1.5 Immuno techniques: RIA-Types, advantages and disadvantages (K1, K4)
- 1.6 ELISA- Types - Direct, Indirect, Competitive ELISA (K2)

**Unit II:** (15 Hours)

- 2.1 Antigens: Essential features (K1, K2)
- 2.2 Epitopes, Haptens and Adjuvants (K1, K2)
- 2.3 Types of MHC antigens (K3)
- 2.4 Antibodies: Types, structure, properties and biological functions (K2, K4)
- 2.5 Clonal Selection theory (K3)
- 2.6 Production and applications of monoclonal antibodies (K3, K4)

**Unit III:** (15 Hours)

- 3.1 Antigen - antibody interactions: Precipitation reaction (K2, K4)
- 3.2 Agglutination (K2, K3)
- 3.3 Complement fixation, Lysis, and Opsonization (K3, K4)
- 3.4 Fluorescent antibody technique (K2, K4)
- 3.5 Immunoblotting technique (K2, K4)
- 3.6 Immuno electrophoresis with their types (K2, K3, K4)

**Unit IV:** (15 Hours)

- 4.1 Complement- Salient features, Classical pathway and Alternative pathway (K2, K4)
- 4.2 Humoral immunity and Cell mediated immunity (K2, K4)
- 4.3 Autoimmunity- Pathogenesis of Graves diseases and Myasthenia gravis -etiology, clinical features and treatment (K2, K3)
- 4.4 Rheumatoid arthritis and Systemic lupus erythematosus (SLE) -Etiology, clinical features and treatment (K2, K3)
- 4.5 Multiple Sclerosis -Etiology, clinical features and treatment (K2, K3)
- 4.6 Corona -Etiology, clinical features and treatment (K2)

**Unit V:** (15 Hours)

- 5.1 Transplantation immunology: Types of grafts (K3)
- 5.2 Mechanism of allograft rejection (K3, K4)
- 5.3 Hypersensitivity-factors affecting hypersensitivity (K1, K3)
- 5.4 Hypersensitivity type I-Mechanism (K2, K3)
- 5.5 Hypersensitivity type II, III Mechanism (K3)
- 5.6 Hypersensitivity type IV- Mechanism (K3)

[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]

**Text Books:**

## SEMESTER V

### UEBCB20 - ELECTIVE I B: ENVIRONMENTAL TOXICOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	UEBCB20	Environmental Toxicology	Theory	Elective- I B	5	5	40+60=100

#### Objective:

To understand the basics in toxicological aspects that effects the environment.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Explain the properties of pollutants, effects, origin and occurrence in the environment
2. Use clinical and laboratory findings in the treatment of acute toxic exposures
3. Compare and interpret the results of occupational exposure assessments within the context of safety assessments
4. Identify signs and symptoms of important toxic syndromes
5. Discuss the role of poison information services and systems for the surveillance of Poisoning

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	H	H	H	M	H	M
CO 3	H	H	M	H	H	M
CO 4	H	M	H	M	H	M
CO 5	H	H	M	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	M	M	H
CO 2	H	M	L	M	M	M
CO 3	H	H	H	H	H	H
CO 4	H	M	M	M	H	M
CO 5	H	H	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 hours)

- 1.1 Definition and scope of toxicology (K1, K2, K3)
- 1.2 Eco-toxicology and its environment significance (K1, K2, K3)
- 1.3 Basis for general classification and nature, dose - response relationship (K1, K2)
- 1.4 Synergism and Antagonism, Determination of ED<sub>50</sub> and LD<sub>50</sub> (K1, K2)
- 1.5 Acute and chronic exposures. Factors influencing toxicity (K1, K2)
- 1.6 Pharmaco dynamics & Chemo dynamics (K1, K2)

**Unit II: (15 Hours)**

- 2.1 Principles and procedures of testing for acute toxic effects (K1, K2, K4)
- 2.2 Regulators guidelines, mammalian systems affected and the clinical signs (K1, K2, K3)
- 2.3 Factors affecting acute toxicity studies. Biochemical basis of toxicity (K1, K2)
- 2.4 Mechanism of toxicity: disturbance of excitable membrane function altered calcium homeostasis (K1, K2)
- 2.5 Covalent binding to cellular macromolecules (K1, K2)
- 2.6 Tissue specific toxicity (K1, K2)

**Unit III: (15 Hours)**

- 3.1 Toxicity testing: Test Protocol, Genetic Toxicity Testing (K1, K2, K4)
- 3.2 Mutagenesis Assays: In-vivo test systems- Bacterial Mutation Tests: Reversion Tests, Ames test, Fluctuation Tests (K1, K2, K4)
- 3.3 Use of drosophila in toxicity testing. (K1, K2, K4)
- 3.4 DNA repair assays. (K1, K2, K4)
- 3.5 Chromosome damage test. (K1, K2, K4)
- 3.6 Toxicological evaluation of Recombinant DNA –Derived Proteins. (K1, K2)

**Unit IV: (15 Hours)**

- 4.1 Food toxicology: Toxin and Toxicants (K1, K2)
- 4.2 Toxicology of food additives. (K1, K2, K3)
- 4.3 Metal toxicity: Toxicology of Arsenic and Mercury (K1, K2, K3)
- 4.4 Metal contamination and human disease (K1, K2)
- 4.5 Environmental Factors Affecting Metal Toxicity- Effect of Light, Temperature & P<sup>H</sup> (K1, K2)
- 4.6 Diagnosis of toxic changes in liver and kidneys (K1, K2, K4)

**Unit V: (15 Hours)**

- 5.1 Air Pollution: Common Air Pollutants And Their Sources (K1, K2)
- 5.2 Air Pollution & Ozone. (K1, K2)
- 5.3 Air Pollution Due To Chlorofluorocarbons (CFCS) And Asbestos. (K1, K2, K3)
- 5.4 Occupational Toxicology And Assessment Of Occupational Hazards (K1, K2)
- 5.5 An Overview Of Regulatory Agencies: Responsibilities Of Regulatory Agencies. (K1, K2, K3)
- 5.6 Management of toxicological risks. (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

## SEMESTER V

### USBCC520 – SBE: ENTREPRENEURIAL BIOCHEMISTRY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / V	USBCC520	Entrepreneurial Biochemistry	Theory	Skill Based Elective III	2	2	40+60=100

#### Objective:

To understand the concept of entrepreneurship

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Explain the theory of entrepreneurship and its practical implementation
2. Explore and experience the joy of creating small business ideas
3. Identify strategic marketing planning and mobilize resources for future growth, development and protection of their enterprise
4. Implement market opportunities into business plan
5. Re-construct and build a mindset focusing on unique approach to market opportunities

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	H	H	H	M	H	M
CO 3	H	H	M	H	H	M
CO 4	H	M	H	M	H	M
CO 5	H	H	M	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	M	M	H
CO 2	H	M	L	M	M	M
CO 3	H	H	H	H	H	H
CO 4	H	M	M	M	H	M
CO 5	H	H	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

**(6 Hours)**

- 1.1 Entrepreneurship - concept (K1, K2)
- 1.2 Entrepreneurship - Need and importance (K1, K2, K3)
- 1.3 Types of entrepreneur (K1, K2)

- 1.4 Characters of entrepreneur (K1, K2, K3)
- 1.5 Entrepreneurial values (K1, K2, K3)
- 1.6 Role of society and family in the growth of an entrepreneur. (K1, K2, K4)

**Unit II: (6 Hours)**

- 2.1 Business ideas (K1, K2)
- 2.2 Methods of generating ideas (K1, K2, K3)
- 2.3 Feasibility study and Opportunity assessment (K1, K2, K4)
- 2.4 Business plan preparation and Execution (K1, K2, K3)
- 2.5 Project report - Patent registration process (K1, K2, K4)
- 2.6 Challenges faced by women in entrepreneurship (K1, K2, K4)

**Unit III: (6 Hours)**

- 3.1 Institutional Support System and Government schemes for Entrepreneurs (K1, K2, K3)
- 3.2 Central Government Support system MSME – NABARD – SIDO – NSIC – KVIC –DIC (K1, K2, K3)
- 3.3 Start-up India - Make in India (K1, K2, K3)
- 3.4 Supports to Training and Employment Programme for Women (STEP) (K1, K2, K3)
- 3.5 Biotechnology Industry Research Assistance Council (BIARC). (K1, K2, K3)
- 3.6 Export- Packing licence- Marketing (K1, K2, K3)

**Unit IV: (6 Hours)**

- 4.1 Organic Farming (K1, K2, K3)
- 4.2 Preparation of value-added product from dairy farms (K1, K2, K3)
- 4.3 Food processing (K1, K2, K3)
- 4.4 Mushroom cultivation (K1, K2, K3)
- 4.5 Compost fertilizer production - Vermi compost (K1, K2, K3)
- 4.6 Biopesticide manufacturing. (K1, K2, K3)

**Unit V: (6 Hours)**

- 5.1 Health drinks preparation (K1, K2, K3)
- 5.2 Seasonal juice preparation (K1, K2, K3)
- 5.3 Homemade cakes and cookies (K1, K2, K3)
- 5.4 Homemade chocolates (K1, K2, K3)
- 5.5 Handmade soaps (K1, K2, K3)
- 5.6 Herbal preparation (Herbal incense) (K1, K2, K3)

[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]

**SEMESTER VI**  
**UCBCI20 - MOLECULAR BIOLOGY**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UCBCI20	Molecular Biology	Theory	Core	6	6	40+60=100

**Objective:**

To make a study on life and the information centers called genes.

**Course Outcomes (CO):**

On completion of the course, the students will be able to;

1. Demonstrate the nature of Genes
2. Analyze the blueprint of life
3. Describe the mechanism of replication
4. Illustrate the mechanism of Transcription
5. Demonstrate the features of Genetic code and mechanism of Translation

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	M	H
CO 2	H	H	H	H	H	M
CO 3	H	H	M	M	H	H
CO 4	H	M	H	M	H	H
CO 5	H	H	M	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	M	M	M	H
CO 2	H	H	H	H	H	M
CO 3	H	H	H	H	M	M
CO 4	H	H	H	H	H	H
CO 5	H	M	H	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 Hours)**

- 1.1 Genetics- Mendel's laws of inheritance, test cross, back cross and law of incomplete dominance (K1, K2, K3, K4)
- 1.2 Genomic organization of prokaryotes cells (K1, K2, K3, K4)
- 1.3 Genomic organization of eukaryotic cells (K1, K2, K3, K4)
- 1.4 Genetic Material – DNA and RNA, Evidences for DNA as genetic material - Griffith,

Avery et al and Hershey chase experiments (K1, K2, K3, K4)

1.5 Central dogma of molecular genetics (K1, K2, K3, K4)

1.6 Repetitive DNA (K1, K2, K3, K4)

**Unit II:** (18 Hours)

2.1 Prokaryotic replication: Modes of replication (K1, K2)

2.2 Semi conservative replication - Experimental evidences (K1, K2)

2.3 Process of Prokaryotic replication - Initiation, Elongation and Termination (K1, K2)

2.4 Enzymes and proteins involved in replication (K1, K2)

2.5 Inhibitors of replication (K1, K2)

2.6 DNA repair - Overview (K1, K2)

**Unit III:** (18Hours)

3.1 Prokaryotic transcription: Promoters (K1, K2)

3.2 Process of transcription- Initiation, Elongation & Termination (K1,K2, K3,K4)

3.3 Enzymes and proteins involved in transcription (K1, K2)

3.4 Inhibitors of transcription (K1, K2)

3.5 Post transcriptional processing of rRNA and tRNA in prokaryotes (K1, K2)

3.6 Reverse transcription (K1, K2)

**Unit IV:** (18 Hours)

4.1 Genetic code dictionary - General features, Wobble hypothesis (K1, K2)

4.2 Composition of prokaryotic ribosome (K1, K2)

4.3 Composition of eukaryotic ribosome (K1, K2)

4.4 Process of protein synthesis in prokaryotes - Initiation, Elongation and Termination (K1,K2, K3, K4)

4.5 Inhibitors of protein synthesis in prokaryotes (K1, K2)

4.6 Post translational modification (K1, K2)

**Unit V:** (18 Hours)

5.1 Regulation of gene expression in prokaryotes: Operon concept - lac operon (K1, K2)

5.2 Mutation: Definition, Classification with example (K1, K2)

5.3 An overview of Genomics (K1, K2)

5.4 An overview of Proteomics (K1, K2)

5.5 Chromosome mapping, Human Genome Project (K1, K2)

5.6 DNA micro arrays, DNA fingerprinting and foot printing (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyse]**

## SEMESTER- VI

### UEBCC20- ELECTIVE II A: CLINICAL BIOCHEMISTRY

Year / Sem	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
III/VI	UEBCC20	Clinical Biochemistry	Theory	Elective II A	5	6	40+60=100

#### Objective

To understand the biochemical basis of various diseases and disorders

#### Course Outcomes (CO):

On completion of the course, the students will be able to;

1. Discuss the disorders of carbohydrate metabolism
2. Outline the role of serum lipids
3. Describe the types of jaundice and serum enzyme activities in diseases
4. Identify various renal disorders and examination of gastric residuum
5. Compare the application of diagnostic enzymes

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	M	H
CO 2	H	H	H	H	H	M
CO 3	H	H	M	M	H	H
CO 4	H	M	H	M	H	H
CO 5	H	H	M	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	M	M	M	H
CO 2	H	H	H	H	H	M
CO 3	H	H	H	H	M	M
CO 4	H	H	H	H	H	H
CO 5	H	M	H	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 Hours)

- 1.1 Regulation of Blood Glucose level - Hypoglycemia and Hyperglycemia, renal threshold value and Tubular maximum reabsorption of Glucose (TmG) (K1, K2)
- 1.2 Diabetes mellitus - Types, Etiology, Clinical features, Complications and Management- Diabetic ketoacidosis (K2, K3)
- 1.3 Significance of fasting and post prandial blood glucose (K1, K2)
- 1.4 Glucose tolerance test and Glycosylated Hb (K2, K4)
- 1.5 Galactosemia - Fructosuria – Lactose intolerance (K2, K3)

## 1.6 Glycogen storage diseases (K2, K4)

### **Unit II: (15 Hours)**

- 2.1 Lipoproteins- Types and function, Elementary details of Hypo and Hyper lipoproteinemia (K1, K2)
- 2.2 Atherosclerosis and Ischemic Heart disease (K2, K3)
- 2.3 Factors affecting Blood Cholesterol level, Hypercholesterolemia (K2, K3, K4)
- 2.4 Fatty liver-types and treatment, Cirrhosis (K2, K4)
- 2.5 Inborn errors of Amino acid Metabolism- Phenylketonuria, Alkaptonuria (K2, K3)
- 2.6 Inborn errors of Amino acid Metabolism-Cystinuria, Hemophilia, Albinism (K2, K3)

### **Unit III: (15 Hours)**

- 3.1 Metabolism of Bilirubin (K2, K3)
- 3.2 Jaundice – Types: Haemolytic jaundice, Obstructive jaundice, Hepatic jaundice (K3, K4)
- 3.3 Liver function test based on abnormalities of pigment metabolism - Vandenbergh reaction and Urine bilirubin (K3)
- 3.4 Galactose tolerance test (K2, K3)
- 3.5 BSP test (K3, K4)
- 3.6 Prothrombin time (K1, K3)

### **Unit IV: (15 Hours)**

- 4.1 Kidney diseases -Glomerulonephritis, Nephrotic syndrome - Etiology, clinical features, diagnosis and treatment (K2, K3)
- 4.2 Clearance- Definition and types, Renal function tests based on glomerular filtration urea and creatinine clearance (K2, K3)
- 4.3 Renal plasma flow (PAH test) and Tubular function- Phenol sulphathelein test (K3)
- 4.4 Gastric function test – Collection and Examination of gastric contents (K3, K4)
- 4.5 FTM– Collection and Examination of gastric contents (K3)
- 4.6 Stimulation test- Alcohol, Caffeine and Histamine (K2, K3)

### **Unit V: (15 Hours)**

- 5.1 Assessment of Cell Damage and Proliferation – Localization of Damage – Nonspecific causes of Raised plasma Enzyme activities (K2, K3)
- 5.2 Enzymes of Diagnostic importance- Aspartate transaminase, Alanine transaminase, Lactate Dehydrogenase, Creatinine Kinase (K2, K3)
- 5.3 Enzymes of Diagnostic importance – Amylase, Acid phosphatase, Alkaline phosphatase (K2, K4)
- 5.4 Enzymes of Diagnostic importance -Streptokinase,  $\gamma$  Glutamyl transferase, Aldolase (K2, K4)
- 5.5 Cancer: Etiology- Morphological changes in Tumour cells (K4)
- 5.6 Tumour markers - AFP, CEA HCG (K4)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

**Text Books:**

**UEBCD20- PHARMACOLOGY**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III / VI	UEBCD20	Pharmacology	Theory	Elective II B	5	5	40+60=100

**Objective**

To make detailed study of drugs, and their actions on living systems

**Course Outcomes (CO):**

On completion of the course, the students will be able to,

1. Classify different dosage forms of drug
2. Discuss the basic understanding of detoxification mechanisms
3. Compare the structure and uses of antibiotics available
4. Outline the clinical applications, side effects and toxicities of cardiovascular drugs
5. List out commonly used analgesic and anesthetic drug classes

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	M	H	H	M	M	M
CO 2	M	M	H	H	M	L

CO 4	L	H	H	M	H	M
CO 5	M	M	M	M	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(15 hours)**

- 1.1 Introduction - Sources and dosage forms (K2, K3)
- 1.2 Route of administration (K3, K4)
- 1.3 Classification- absorption of drugs, Distribution (K2, K3)
- 1.4 Binding of drugs to plasma proteins (K2, K4)
- 1.5 Receptor- Types and Binding forces in Drug-receptor interaction (K1, K3)
- 1.6 Consequences of Drug-receptor interaction (K4)

**Unit II:** (15 hours)

- 2.1 Xenobiotics (K2, K4)
- 2.2 Mechanism of oxidation in Phase I (K2, K3)
- 2.3 Mechanism of reduction in Phase I (K2, K3)
- 2.4 Mechanism of hydrolysis in Phase I (K2, K3)
- 2.5 Phase II- conjugation (K3, K4)
- 2.6 Structure and uses of oral hypoglycemic drugs - Classes, Parenteral (K3)

**Unit III:** (15 hours)

- 3.1 Antibiotics: Structure and therapeutic uses of Penicillin, Streptomycin, Tetracycline, Chloramphenicol and Erythromycin (K2, K3)
- 3.2 Antiseptics (K1, K2)
- 3.3 Disinfectants (K1, K2)
- 3.4 Structure and uses of Phenols and related compounds - (a) Alkyl substituted Phenols: Cresol, Thymol (b) Chlorinated Phenols: Chloroxymol (K3, K4)
- 3.5 Halogen compounds – Chloramine and Organic mercurial - Thiomersol (K2, K3)
- 3.6 Formaldehyde and its derivative - Formaldehyde and Nitro furan derivative - Nitro furazone (K2, K3)

**Unit IV:** (15 hours)

- 4.1 Cardiovascular Drugs - Structure And Action Of Cardiac Glycosides- Digoxin And Digitoxin (K2, K3)
- 4.2 Antiarrhythmic Drugs - Structure And Uses Of Propranolol And Procainamide (K1, K2)
- 4.3 Anti- Hypertensive Agents - Drugs Acting Centrally - Example: Clonidine And Alpha Methyl Dopa (K2, K3)
- 4.4 Ganglion Blockers - Example: Pentolinium Tartrate (K2, K3)
- 4.5 Vasodilators - Example: Tolazaline (K1, K2)
- 4.6 B Blockers - Example: Phenoxybenzamine – Hypotensive agents (K2, K3)

**Unit V:** (15 hours)

- 5.1 Analgesics -Morphine, Pethidine, Aspirin (K2, K3)
- 5.2 Salicin (K1, K2)
- 5.3 Paracetamol and Phenacetin (K2, K3)
- 5.4 Analgin and Indomethacin (K3)
- 5.5 Anesthetics - Chloroform, Nitrous oxide, Trichloro ethylene, Benzocaine, Procaine, Lignocaine (K2, K4)
- 5.6 Cytotoxic agents – Chlorambucil (K3)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

## SEMESTER VI

### UEBCE20 – ELECTIVE III A: BIOTECHNOLOGY

Year/ Sem III / VI	Course Code UEBCE20	Title of the Course Biotechnology	Course Type Theory	Course Category Elective III A	H/W 5	Credits 5	Marks 40+60=100
--------------------------	---------------------------	---	--------------------------	---	----------	--------------	--------------------

#### Objective:

To explore the applications and future potential of Biotechnology

#### Course Outcomes (CO):

On completion of the course, the students will be able to;

1. Recall the steps involved in recombinant DNA technology
2. Outline the role of vector in gene technology and explain the construction of Genomic and cDNA library and their importance
3. Explain the principles of plant tissue and animal cell culture and summarize the methods used to produce transgenic plants and animals
4. Identify and debate the ethical and social issues in the field of biotechnology and get insight in application of rDNA technology
5. Discuss the various aspects of bioprocess technology

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 hours)

- 1.1 Introduction to Biotechnology and its branches- Scope and importance of biotechnology (K1, K2)
- 1.2 Biotechnology in India (K1, K2)
- 1.3 Introduction to Genetic Engineering- Steps and enzymes involved in Genetic Engineering (K1, K2, K3, K4)
- 1.4 Restriction endonucleases: Nomenclature – Types (K1, K2, K3, K4)
- 1.5 Reverse Transcriptase, Taq polymerase and DNA Ligases (K1, K2, K3, K4)

1.6 Applications of genetic Engineering. (K1, K2, K3)

**Unit II: (15 hours)**

- 2.1 Gene cloning vectors: Plasmids: Classification, Characteristics, Example: pBR322 (K1, K2, K3, K4)
- 2.2 Shuttle vectors: Example pJDB219 (K1, K2, K3, K4)
- 2.3 Cosmid: Feature, Example: pLFR5 (K1, K2, K3, K4)
- 2.4 DNA Library: Genomic and cDNA library (K1, K2, K3)
- 2.5 Methods of Gene Transfer (K1, K2, K3)
- 2.6 Gene cloning in Prokaryotes: methodology of Gene cloning with reference to Insulin gene (K1, K2, K3, K4)

**Unit III: (15 hours)**

- 3.1 Plant tissue Culture: Basis of Plant cell and tissue culture- A tissue culture laboratory – Nutrient media composition and preparation - maintenance of Aseptic Environment (K1, K2, K3, K4)
- 3.2 Methods of Plant cell, Tissue and Organ culture - Somatic embryogenesis and Somaclonal variation (K1, K2, K3, K4)
- 3.3 Animal cell culture - Characteristics, Substrates and Culture Media (K1, K2, K3, K4)
- 3.4 Somatic cell fusion - Valuable products from cell culture- Tissue Plasminogen Activator (K1, K2, K3, K4)
- 3.5 Gene transfer in plants and animals- Transgenic plants -Herbicide resistance - stress tolerance - Transgenic plants as bioreactor (K1, K2, K3, K4)
- 3.6 Transgenic animals- Transgenic cattle- The first mammalian clone “Dolly- Animal Bioreactors (K1, K2, K3, K4)

**Unit IV: (15 hours)**

- 4.1 Genetically engineered microorganisms (GEMOs) in health care products: Insulin (K1, K2, K3)
- 4.2 Cytokines: Importance (K1, K2, K3)
- 4.3 Interferon: Importance (K1, K2, K3)
- 4.4 Vaccines: Importance (K1, K2, K3)
- 4.5 Risks of releasing Genetically Engineered Organisms (K1, K2)
- 4.6 Ethics of biotechnology (K1, K2)

**Unit V: (15 hours)**

- 5.1 Fermentation systems- Batch and continuous process (K1, K2)
- 5.2 Fermentor design (K1, K2)
- 5.3 Solid substrate fermentation (K1, K2, K3)
- 5.4 Components of Medium - criteria used in media formulation (K1, K2, K3)
- 5.5 Downstream processing - introduction, separation process, example of recovery process (K1, K2, K3, K4)
- 5.6 Wine and SCP: Production and types (K1, K2, K3)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

**Text Books:**

1. Dubey RC - A Text book of Biotechnology - 5th edition - S Chand Publishing
2. Satyanarayana U - Biotechnology - 5th edition - Books and Allied Private Ltd, 2022

## SEMESTER- VI

### UEBCF20 - ELECTIVE III B: PLANT BIOCHEMISTRY

Year/ Sem	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks 100
III/VI	UEBCF20	Plant Biochemistry	Theory	Elective III B	5	5	40+60=100

#### Objectives:

To explore the applications of plant and their products

#### Course Outcomes (CO):

On completion of the course, the students will be able to;

1. Describe the structural features of plant cell and phytohormones
2. Outline the types of photosynthetic pigments
3. Create the impact of nitrogen, sulphur and carbon cycle on nature
4. Compile the mechanism of seed germination
5. Identify the antioxidant potential and role of secondary metabolites

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(15 Hours)

- 1.1 Architecture of plant cell and its role - Plasmodesmata, Vacuoles, Plastids, Chloroplast, Mitochondria, Peroxisomes. (K2, K3)
- 1.2 Cell wall - Structure of plant cell wall - Cellulose and Hemicelluloses. (K3)
- 1.3 Plant growth regulators - structure and physiological effects of Auxins structure and Physiological effects of Gibberellins (K2, K3)
- 1.4 Structure and physiological effects of Cytokinin. (K3, K4)
- 1.5 Structure and physiological effects of Abscisic acid. (K3, K4)
- 1.6 Structure and physiological effects of Ethylene – Phytochromes (K3, K4)

**Unit II: (15 Hours)**

- 2.1 Photosynthesis - photosynthetic pigments Chlorophyll Structure and their function (K2, K3)
- 2.2 Carotenoid - Structure and their function (K1, K3)
- 2.3 Phycobilin -Structure and their function (K1, K3)
- 2.4 Light reaction - Photo system I and Photo system II (K3, K4)
- 2.5 Hill's reaction - Emerson effect - Cyclic and non-cyclic photo phosphorylation (K3, K4)
- 2.6 Dark reaction - Calvin' s cycle (K3, K4)

**Unit III: (15 Hours)**

- 3.1 Nitrogen cycle - Ammonification, Nitrification, nitrate reduction (K2, K4)
- 3.2 Denitrification - Symbiotic and non-symbiotic Nitrogen fixation (K2, K4)
- 3.3 Nitrogenase enzyme - Nodule development (K3, K4)
- 3.4 Sulfur cycle - release of sulfur from organic compounds (K1, K2)
- 3.5 Oxidation of sulfur compounds (K1, K4)
- 3.6 Reduction of sulfate Carbon cycle (K3, K4)

**Unit IV: (15 Hours)**

- 4.1 Seed germination - Mobilization of storage lipids during seed germination (K4)
- 4.2 Glyoxylate cycle (K2, K3)
- 4.3 Seed dormancy - Definition of vernalization and devernization (K2, K3)
- 4.4 Cold tolerance in metabolic compounds (K1, K3)
- 4.5 Enzymatic activity for Esterase (K3)
- 4.6 Enzymatic activity for Peroxidases (K3)

**Unit V: (15 Hours)**

- 5.1 Secondary metabolites in plant - Biological role of Phenolic compounds (K4)
- 5.2 Biological role of Terpenoids (K3)
- 5.3 Biological role of Tannins (K3)
- 5.4 Biological role of Lignin (K4)
- 5.5 Biological role of Pectin (K3, K4)
- 5.6 Biological role of Antioxidant compounds (K3, K4)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

**Text Books:**

## SEMESTER- VI

### USBCD620 – SBE- IV - MEDICAL LABORATORY TECHNOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credit	Marks 100
III/VI	USBCD620	Medical Laboratory Technology	Theory	Skilled Based Elective - IV	2	2	40+60=100

#### Objectives:

To make detailed study of the organization and functions of a laboratory

#### Course Outcome (CO):

On completion of the course, the students will be able to;

1. Outline the organization of a laboratory for its efficient functioning
2. Discuss the various methods of blood collection and its preservation
3. Evaluate the significance of urine analysis and its correlation with disease
4. Demonstrate about the blood transfusion method
5. Apply histopathological techniques in detecting abnormal cells

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit-I:

(6 Hours)

- 1.1 Introduction: Code of conduct for laboratory personnel (K1, K2, K3)
- 1.2 Medical care, organization of the clinical laboratory (K1, K2, K3)
- 1.3 Functional components of a laboratory (K1, K2)
- 1.4 Basic needs and role of medical laboratory technician (K1, K2)
- 1.5 Safety aspects in the laboratories (K1, K2, K3)
- 1.6 First aid in the laboratories (K1, K2, K3)

**Unit-II: (6 Hours)**

- 2.1 Specimen collection: Blood collection by vein puncture and capillary puncture (K1, K2, K3)
- 2.2 Equipment and storage of blood collection - transport and waste disposal (K1, K2, K3)
- 2.3 Anticoagulants (K1, K2, K3)
- 2.4 Collection and preservation of urine, sputum, throat swab (K1, K2, K3)
- 2.5 Collection and preservation of stool (K1, K2, K3)
- 2.6 Collection and preservation of CSF specimens (K1, K2, K3)

**Unit-III: (6 Hours)**

- 3.1 Collection and processing of blood for transfusion (K1, K2, K3)
- 3.2 Preparation for blood collection and Blood bank (K1, K2, K3)
- 3.3 Screening, Rejection, Registration of Donors (K1, K2, K3)
- 3.4 Blood Collection procedure, Transportation (K1, K2, K3)
- 3.5 Clinical significance of Blood Transfusion (K1, K2, K3)
- 3.6 Coomb's test (K1, K2, K3)

**Unit-IV: (6 Hours)**

- 4.1 Urine - Normal and Abnormal constituents of urine (K1, K2, K3)
- 4.2 Routine examination of urine- Physical examination -Colour, Appearance, Odour and Specific gravity (K1, K2, K3)
- 4.3 Microscopic examination of urine sediment - organized and unorganized elements – Culture test (24 and 48 Hrs) – Crystal appearance in urine (K1, K2, K3)
- 4.4 Pregnancy test (hCG test) –Typhoid test (Widal test) (K1, K2, K3)
- 4.5 Malaria test (QBC test) (K1, K2, K3)
- 4.6 Tuberculosis test (Mantoux tuberculin skin test) (K1, K2, K3)

**Unit-V: (6 Hours)**

- 5.1 Introduction to histopathology and cytology (K1, K2, K3)
- 5.2 Laboratory equipment for cytology and histology (K1, K2, K3)
- 5.3 Reagents, microscope, microtome, paraffin oven, tissue floating bath, automated tissue processor and slide warmer (K1, K2, K3)
- 5.4 Preparation of tissues for histology (K1, K2, K3)
- 5.5 Collection of specimens for cytological evaluation (K1, K2, K3)
- 5.6 Clinical significance of cytological technique (K1, K2, K3)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze]**

**Note:** The study materials will be provided by the Department

**SEMESTER – V & VI**  
**UCBCJ20- MAIN PRACTICAL -III**

<b>Year/ Sem</b> III / VI	<b>Course Code</b> UCBCJ20	<b>Title of the Course</b> Main Practical –III	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 6	<b>Marks</b> 40+60=100
----------------------------------	-----------------------------------	--	-------------------------------------	------------------------------------	-----------------	---------------------	---------------------------

**Objective:**

The course is aimed to enhance the practical skill of the student in handling and estimating the components present in the biological samples.

**Course Outcomes (CO)**

On Completion of the course, the students will be able to;

1. Apply the safety measures in the laboratory
2. Predict the biochemical laboratory analysis
3. Analyse the presence and absence of abnormalities in blood
4. Assess the presence and absence of abnormalities in urine

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

**1. Safety Measures In The Laboratory-III**

**2. Colorimetric Estimations In Clinical Samples:**

1. Estimation of Creatinine by Jaffe's method
2. Estimation of Glucose by Orthotoluidine method
3. Estimation of Urea by Diacetyl Monoxime method
4. Estimation of Cholesterol by Zak's method
5. Estimation of Bilirubin by Vandenbergh method
6. Estimation of Uric acid by Caraway's method
7. Estimation of Protein by Biuret method and determination of A/G ratio
8. Estimation of Protein by Lowry's method
9. Estimation of DNA by Diphenyl amine method
10. Estimation of RNA by Orcinol method

**3. Urine Analysis:**

1. Methods for Preservation of Urine for analysis
2. Qualitative Analysis of Urine for Normal Constituents
3. Qualitative Analysis of Urine for Abnormal Constituents

#### **4. Extraction, Isolation, Identification And Purification**

1. DNA
2. RNA
3. Proteins

#### **Reference Books:**

**1. Safety Measures In The Laboratory-IV**

**2. Enzyme Analysis:**

1. Determination of SGOT activity.
2. Determination of SGPT activity
3. Effect of pH on the activity of the enzyme -Acid phosphatase
4. Effect of Temperature on the activity of the enzyme - Acid phosphatase
5. Effect of substrate concentration on the activity of the enzyme -Acid phosphatase
6. Determination of Specific activity of the enzyme - Acid phosphatase
7. Effect of pH on the activity of the enzyme - salivary amylase
8. Effect of Temperature on the activity of the enzyme - salivary amylase
9. Effect of substrate concentration on the activity of the enzyme - salivary amylase
10. Determination of Specific activity of the enzyme - salivary amylase

**3. Hematological Experiments:**

1. Methods for Preservation of blood for analysis
2. Collection of Blood
3. Enumeration of RBC
4. Enumeration of WBC
5. Enumeration of Platelets
6. Estimation of Erythrocyte sedimentation rate
7. Determination of Hemoglobin

8. Packed cell volume
9. Determination of Bleeding time
10. Determination of Clotting Time
11. Grouping of Blood & Rh typing

**Reference Books:**

**SEMESTER – III – SKILL BASED ELECTIVE -II YEARS**

**USBCA320 - NUTRITIONAL BIOCHEMISTRY**

<b>Year / Sem</b> II / III	<b>Course Code</b> USBCA320	<b>Title Of the course</b> Nutritional Biochemistry	<b>Course Type</b> Theory	<b>Course Category</b> Skill Based Elective I	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> <b>100</b> 40+60=100
-------------------------------	--------------------------------	--	------------------------------	--	-----------------	---------------------	---

**Objective:**

To make a note on nutrients and its role on metabolism.

**Course Learning Outcomes (CLO)**

On Completion of the course, the students will be able to:

1. Explain the functions of specific nutrients in maintaining health
2. Describe the role of antioxidants
3. Use a balanced diet for diseased conditions
4. Discuss basic principles and practices of common food preservation methods
5. Discuss the various aspects of protein quality

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 5	H	H	M	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit - I:**

**(6 Hours)**

- 1.1 Definition of food and Nutrition, (K1, K3, K4)
- 1.2 Basic Food groups - Energy yielding foods, Body Building, Protective Foods (K1, K3)
- 1.3 Basic concepts of Energy Expenditure, Unit of Energy, Measurements of Food stuffs by Bomb Calorimeter (K2)
- 1.4 Calorific values of Proteins, Carbohydrates and Fats (K1, K3)
- 1.5 Basal metabolic rate (K2, K3)
- 1.6 Factors affecting BMR (K3)

**Unit - II:****(6 Hours)**

- 2.1 Antioxidants-Types (K2, K3)
- 2.2 Antioxidant rich food (K3)
- 2.3 Sources and health effects of free radical (K2, K3)
- 2.4 Dietary fibres (K2, K3)
- 2.5 Single Cell Proteins (K1, K2)
- 2.6 Probiotics (K3)

**Unit - III:****(6 Hours)**

- 3.1 Balanced diet - Nutrition in infancy (K2, K3)
- 3.2 Nutrition in childhood (K2, K3)
- 3.3 Nutrition in Adolescence (K3)
- 3.4 Nutrition in Adulthood (K2, K3)
- 3.5 Nutrition in Elderly person. (K2)
- 3.6 Nutrition during pregnancy and lactation (K2, K3)

**Unit - IV:****(6 Hours)**

- 4.1 Food processing and preservation: Types (K2, K3)
- 4.2 Food fortification (K3)
- 4.3 Sanitation and Hygiene in Food service (K2, K3, K4)
- 4.4 Food Toxicities - organic toxicants (K2, K3, K4)
- 4.5 Inorganic toxicants (K2, K3, K4)
- 4.6 Methods of detecting adulterated food (K3)

**Unit - V:****(6 Hours)**

- 5.1 Protein Malnutrition (Kwashiorkor) Under Nutrition (Marasmus) their preventive and curative measures (K2, K3, K4)
- 5.2 Protein quality and requirement (K3)
- 5.3 Dehydration (K2, K3)
- 5.4 Overhydration (K2, K3)
- 5.5 Eating disorders -Signs of eating disorder (K3)
- 5.6 Body mass index (BMI) - obesity (K3)

**Text Books:** The study materials will be provided by the Department

**SEMESTER IV– SKILL BASED ELECTIVE -II YEARS**

**USBCB420- SBE: HEALTH CARE FOR WOMEN**

<b>Year / Sem</b> II/IV	<b>Course Code</b> USBCB420	<b>Title of the Course</b> Health Care for Women	<b>Course Type</b> Theory	<b>Course Category</b> Skill Based Elective - II	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> <b>100</b> 40+60=100
----------------------------	--------------------------------	---	------------------------------	---	-----------------	---------------------	---

**Objective:**

To provide awareness about common health problems of women and how to overcome certain diseases

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Understand the common health problems of women
2. Describe the function of Estrogen and Progesterone hormone
3. Outline the Stages of women hood
4. Discuss the types of anemia and obesity
5. Gain knowledge to overcome PCOS, Ovarian cancer and Depression

<b>CO / PO</b>	<b>PO 1</b>	<b>PO 2</b>	<b>PO 3</b>	<b>PO 4</b>	<b>PO 5</b>	<b>PO 6</b>
<b>CO 1</b>	H	H	H	H	M	L

<b>CO 5</b>	H	H	M	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit - I:**

**(6 Hours)**

- 1.1 Introduction-Women’s health-Importance, Healthy tips for women (K4)
- 1.2 Healthy diet for Women – Physiology of Exercise – Importance of yoga (K3)
- 1.3 Preventive care and screenings (K2, K3)
- 1.4 Women and Drug abuse (K3)
- 1.5 Feminism and women’s health movement (K2, K4)
- 1.6 Factors influencing women’s health (K3)

**Unit - II:** (6 Hours)

- 2.1 Anatomy of female reproductive system (K3)
- 2.2 Primary and secondary sexual organs (K2, K4)
- 2.3 Hormones related with females-Estrogen and Progesterone (K3)
- 2.4 Puberty-Early and Late puberty (K2, K4)
- 2.5 Menstrual cycle, Menopause Amenorrhea (K3)
- 2.6 Endometriosis, Vaginal discharge (K4)

**Unit - III:** (6 Hours)

- 3.1 Stages of women hood: Pregnancy, Delivery, Lactating period - Gestation Diabetes – Hypertension during pregnancy period (K2, K4)
- 3.2 C-Section, D and C, Hysterectomy (K3)
- 3.3 Obstetrical fistula (K2, K4)
- 3.4 Female infertility (K4)
- 3.5 Contraception-Variou s methods (K3)
- 3.6 Diet and nutrition services (K3, K4)

**Unit - IV:** (6 Hours)

- 4.1 Anemia-Types, Causes, Symptoms, Diagnosis and Treatment (K2, K4)
- 4.2 Osteoporosis (K4)
- 4.3 Obesity (K2, K4)
- 4.4 Urinary infection (K3)
- 4.5 Blood Grouping, Erythroblastosis foetalis (K3)
- 4.6 Role of thyroid hormones (K4)

**Unit - V:** (6 Hours)

- 5.1 Cancer Prevalent In Women: Ovarian Cancer, Cervical Cancer, -Etiology, Symptoms, Diagnosis And Treatment (K3)
- 5.2 Breast Cancer-Etiology, Symptoms, Diagnosis And Treatment (K3)
- 5.3 Polycystic Ovaries, Fibroids- Etiology, Symptoms, Diagnosis & Treatment (K3, K4)
- 5.4 Violence Against Women-Domestic Violence And Intimate Partner Violence (K2)
- 5.5 Depression And Anxiety (K2, K3)
- 5.6 Chronic Fatigue Syndrome (K2)

**Note:** The study material will be provided by the Department

**SEMESTER-V/VI - NON-MAJOR ELECTIVE – III YEARS**

**UGBCA520/620– NON-MAJOR ELECTIVE - DISEASES AND TREATMENT**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
III / VI	UGBCA520 /620	Diseases and Treatment	Theory	Non-major elective - I	3	2	40+60=100

**Objective:**

To provide a basic knowledge about common diseases and its treatment.

**Course Outcomes (CO):**

On completion of the course, the students will be able to,

1. Understand the concept of immune system, blood and bone diseases
2. Know the pathology of liver and lung diseases
3. Acquire a broad knowledge about the deadliest diseases in the world
4. Understand about the pathophysiology of cardiovascular and neurological diseases
5. Learn the various types of skin diseases

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 5	H	H	M	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit - I:**

**(9 Hours)**

- 1.1 Diseases and its types (K1, K3)
- 1.2 Immune system - Types - Innate and Acquired (K3, K4)
- 1.3 Phagocytosis (K1)
- 1.4 Blood: Composition, Sickle Cell Anemia, Iron deficiency Anemia, Leucopenia, Hemolysis (K2, K3)

- 1.5 Bleeding disorder- Hemophilia A and B (K1, K2, K3)
- 1.6 Bone disorder: Osteomalacia, Rickets, Joint Pain (K2, K3)

**Unit - II: (9 Hours)**

- 2.1 Asthma-Types, Causes, Clinical feature and Treatment (K1, K2)
- 2.2 Tuberculosis-Causes, Clinical feature, Prevention and Treatment (K2, K3)
- 2.3 Pneumonia: Causes, Clinical features, Prevention and Treatment (K1, K3)
- 2.4 Jaundice: Causes, Clinical features, Prevention and Treatment (K1, K2)
- 2.5 Hepatitis: Causes, Clinical features, Prevention and Treatment (K2, K3)
- 2.6 Fatty liver: Causes, Clinical features, Prevention and Treatment (K2, K3)

**Unit - III: (9 Hours)**

- 3.1 Diabetes Mellitus- Types, Causes, Clinical features and Treatment (K1, K2)
- 3.2 Cancer-Causes, Clinical features and Treatment (K2, K3)
- 3.3 Types of Tumors (K1, K2)
- 3.4 Oncogenes (K3)
- 3.5 Tumor markers (K1)
- 3.6 AIDS, COVID: Causes, Clinical features, Diagnosis, Prevention and Treatment (K2, K3)

**Unit - IV: (9 Hours)**

- 4.1 Hypertension-Causes, Clinical features, Management (K2, K3)
- 4.2 Heart attack- Causes, Clinical features and Prevention (K3)
- 4.3 Dementia-Types, Causes, Symptoms and Treatment (K3, K4)
- 4.4 Seizures (K2)
- 4.5 Coma (K2)
- 4.6 Autism- Causes, Clinical features and Treatment (K2, K3)

**Unit - V: (9 Hours)**

- 5.1 Anatomy of skin (K3)
- 5.2 Alopecia Areata- Classification, Causes, Clinical features and Treatment (K2, K3)
- 5.3 Hirsutism- Causes, Clinical features and Treatment (K2)
- 5.4 Psoriasis (K2, K3)
- 5.5 Acne Vulgaris (K3)
- 5.6 Dandruff – Causes, Clinical features and Treatment (K2, K3)

**UGBCB520/620 – NON-MAJOR ELECTIVE: THERAPEUTIC AGENTS**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks 100 40+60=100
III/ V/VI	UGBCB520/ 620	Therapeutic Agents	Theory	Non-major elective - II	3	2	

**Objective:**

To impart knowledge on action of drugs in treating diseases.

**Course Outcomes (CO)**

1. Analyze the drug dosage forms and its mechanism of action
2. Assess the role of vaccines in preventing diseases
3. Outline the role of antibiotics and its side effects
4. Acquire knowledge on the medicinal therapy for various health conditions and function of medicinal plants as therapeutics
5. Utilize the importance of first aid in accidents to preserve life

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 4	H	M	M	L	H	M
CO 5	H	H	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit - I:**

**(9 Hours)**

- 1.1 Drug – Definition – Nature of drug (K1, K2)
- 1.2 Dosage forms of Drugs (K1, K2, K3)
- 1.3 Routes of administration (K1, K2, K3)
- 1.4 Drug Absorption – Drug Distribution (K1, K2, K3, K4)
- 1.5 Termination of Drugs – Elimination of Drugs (K1, K2, K3, K4)
- 1.6 Biotransformation (K1, K2, K3)

**Unit - II:**

**(9 Hours)**

- 2.1 Vaccines - Definition (K1, K2, K3)
- 2.2 Types of vaccines: Attenuated live Vaccine (K1, K2, K3)
- 2.3 Killed Viral Vaccine and examples (K1, K2, K3)
- 2.4 Types of Immunization (K1, K2, K3)
- 2.5 Immunization Schedule for Children (K1, K2, K3)
- 2.6 Immunization under special circumstances (K1, K2, K3)

**UNIT - III:**

**(9 Hours)**

- 3.1 Antibiotics: Definition (K1, K2, K3)
- 3.2 Therapeutic role of Penicillin, Erythromycin, Tetracycline, Streptomycin and Chloramphenicol (K1, K2)
- 3.3 Uses of Antiseptics (K1, K2)
- 3.4 Disinfectant and its types (K1, K2)
- 3.5 Analgesics: Morphine, Aspirin, Paracetamol (K1, K2, K3)
- 3.6 Anaesthetics: Chloroform, Procaine (K1, K2, K3)

**Unit - IV:**

**(9 Hours)**

- 4.1 Medical Therapies for Mouth Ulcer (K1, K2, K3)
- 4.2 Definition, symptoms, causes, diagnosis and treatment of Gallstones (K1, K2, K3)
- 4.3 Definition, symptoms, causes, diagnosis and treatment of Urinary Stones (K1, K2, K3)
- 4.4 Definition, symptoms, causes, diagnosis and treatment of Intestinal Worms (K1, K2, K3)
- 4.5 Medicinal plants: Tulsi, Mint (K1, K2)
- 4.6 Medicinal plants: Neem, Turmeric (K1, K2)

**Unit - V:****(9 Hours)**

5.1 First Aid: Important Rules of First Aid - First Aid Box (K1, K2, K3)

5.2 Cuts and Abrasions – Types of Bleeding (K1, K2, K3)

5.3 Types of Fractures (K1, K2, K3)

5.4 Types of Burns, Fainting (K1, K2, K3)

5.5 Poisonous Bites - Some Common Poisons and their antidotes (K1, K2, K3)

5.6 Acid Poisoning - Alkali Poisoning and poisoning by Disinfectant (K1, K2, K3)

**Note:** The study materials will be provided by the Department

## SEMESTER-I

### UABCA20– ALLIED BIOCHEMISTRY-I

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I/I	UABCA20	Allied Biochemistry-I	Theory	Allied	4	4	40+60=100

#### Objective:

To acquire knowledge on the structure and the function of biomolecules

#### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Write about the properties and biological importance of carbohydrates
2. Outline the properties and structural organization of proteins
3. List out the structural components, properties and biological importance of nucleic acids.
4. Classify the biological importance of lipids
5. Identify the role of water- and fat-soluble vitamins for maintaining healthy life

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	M	M	M
CO 2	H	H	H	M	L	M

CO 4	H	M	H	M	M	M
CO 5	H	M	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	H	M	M	M
CO 2	H	H	H	M	L	M
CO 3	H	M	L	H	M	H
CO 4	H	M	H	M	M	M
CO 5	H	M	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(12 hours)

- 1.1 Carbohydrates: Structure and biological importance of carbohydrates (K2, K3)
- 1.2 Classification and Physical properties of Carbohydrate –Mutarotation, isomerism (K1,K3)
- 1.3 Chemical Properties- Reactions of Glucose -Oxidation, Reduction and Osazone formation (K3, K4)
- 1.4 Reactions of Fructose: Oxidation with Concentrated Nitric acid, Reduction with sodium amalgam and Osazone formation (K3, K4)
- 1.5 Occurrence, Structure and Properties of Disaccharides (Maltose, Lactose, Sucrose) (K1,K2)

1.6 Polysaccharides (Starch) (K2, K3)

**Unit II: (12 hours)**

2.1 Amino Acids: Occurrence, biological importance of amino acids and structure of Peptide bond (K2, K3)

2.2 Classification of amino acids based on the Structure, Polarity of side chain and Nutritional factor (K1, K3)

2.3 Physical properties (Amphoteric nature and Isoelectric pH) (K4)

2.4 Chemical properties (reactions involving Carboxyl, Amino and both the groups) and color reactions of amino acids (K3)

2.5 Occurrence, biological importance of proteins, physical properties: Denaturation, salting in and salting out effect. Functions and classifications based on shape, solubility, composition and biological function (K2, K3)

2.6 Structural Organization of Proteins - Primary, Secondary (alpha helix and beta pleated sheet), Tertiary and Quaternary structure (K1, K3)

**Unit III: (12 hours)**

3.1 Nucleic Acids: Structural Components and Biological Importance of DNA (K1, K2)

3.2 Structural Components and Biological Importance of RNA (K1, K2)

3.3 Double helical structure of DNA proposed by Watson and Crick (K2, K4)

3.4 Denaturation and Annealing of DNA (K2, K3)

3.5 Structure and role of ribosomal, messenger and transfer RNA (K2, K3, K4)

3.6 Difference between DNA and RNA (K3, K4)

**Unit IV: Lipids: (12 hours)**

4.1 Biological importance of lipids and types of Fatty acid–Saturated and Unsaturated (K2, K3)

4.2 Physical Properties and Chemical Properties–Reactions involving Double bond, Carboxyl and Hydroxyl groups (K2, K3)

4.3 Classification of Lipids - Simple Lipids (Fats, Oils and Waxes) (K3)

4.4 Compound lipids - Phospholipids: Phosphoglycerides (Lecithin, Cephalin and Plasmalogen), Phosphoinositides (Phosphotidyl inositol) and phosphosphingosides (Sphingomyelin), Glycolipids: Cerebrosides, Gangliosides (K1, K4)

4.5 Derived lipids - Sterols (cholesterol - structure and functions) (K1, K3)

4.6 Iodine number, Acid number, Saponification number, Reichert -meissl number of oils (K1, K2)

**Unit V: Vitamins: (12 hours)**

5.1 Vitamins: Fat soluble vitamins A and D - Sources, RDA, Biochemical functions and Deficiency diseases (K1, K3)

5.2 Vitamins: Fat soluble vitamins E - Sources, RDA, Biochemical functions and Deficiency diseases (K2, K3)

5.3 Fat soluble vitamin K - Sources, RDA, Biochemical functions and Deficiency diseases (K2)

- 5.4 Water soluble vitamins B1, B2 and B5- Sources, RDA, Biochemical functions and Deficiency diseases (K1, K3)
- 5.5 Water soluble vitamins B6 and B12 - Sources, RDA, Biochemical functions and Deficiency diseases (K2, K3)
- 5.6 Water soluble vitamin C - Sources, RDA, Biochemical functions and Deficiency diseases (K1, K2)

**Text Books:**

## SEMESTER-II

### UACB20- ALLIED BIOCHEMISTRY-II

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	UACB20	Allied Biochemistry-II	Theory	Allied	4	4	40+60=100

#### Objective:

To understand the basic of metabolic pathway

#### Course Outcomes (CO):

On completion of the course, the students will be able to

1. Provide a deeper insight into the fundamentals of structure, function and kinetics of enzymes
2. Describe and identify the main characteristics of diagnosis, screening and prognosis of disease
3. Gain knowledge of intermediary metabolism and regulation of individual metabolism
4. Provide the knowledge of the key concepts of endocrine system
5. Understand the role of minerals in health and disease

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 3	H	M	L	H	M	H
CO 4	H	M	H	M	M	M
CO 5	H	M	M	H	L	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I: Enzymes:

(12 hours)

- 1.1 General characteristics, IUB classification, enzyme units (IU and Katal)-  
Active site (K2, K3)
- 1.2 Lock and key and induced fit hypothesis (K1, K2)
- 1.3 Effect of temperature, pH and Substrate concentration on enzyme activity (K2, K3)
- 1.4 Michaelis – Menten equation (K2, K4)
- 1.5 Enzyme Inhibition - Competitive, non-competitive and uncompetitive inhibition

(kinetics not required) (K2, K4)

1.6 Industrial and Medical applications of enzymes (K1, K3)

**Unit II: Clinical Biochemistry:**

**(12 hours)**

2.1 Diabetes mellitus: Types, Causes and Symptoms (K1, K2)

2.2 Atherosclerosis: Stages, Risks and Consequences (K1, K3)

2.3 Obesity (K2, K3)

2.4 Gout (K1, K3)

2.5 Protein Calorie Malnutrition (K1, K3)

2.6 Marasmus and Kwashiorkor (K3)

**Unit III: Intermediary Metabolism:**

**(12 hours)**

3.1 Glycolysis- Pathway and energetics (Regulation not required) (K2, K3)

3.2 TCA cycle- energetics (Regulation not required) (K2, K4)

3.3 Electron transport chain (K1, K2)

3.4 Beta - oxidation of fatty acids (K2, K3)

3.5 Urea cycle and Decarboxylation (K1, K3)

3.6 Transamination (K1, K2)

**Unit IV: Hormonal Biochemistry:**

**(12 hours)**

4.1 Hormones, Receptors, Effectors, Targets–Definition (K1, K2)

4.2 Classification based on nature: Protein, steroid and amino acid derived hormone (K3, K4)

4.3 Insulin - Biological function and Disorders (K1, K3)

4.4 Thyroid hormones- Biological function and Disorders (K2, K3)

4.5 Growth hormone- Biological function and Disorders (K1, K2)

4.6 Oxytocin and Vasopressin -Biological function and Disorders (K1, K3)

**Unit V: Minerals:**

**(12 hours)**

5.1 Calcium - Source, RDA, Role and Deficiency diseases (K1, K2)

5.2 Iron - Source, RDA, Role and Deficiency diseases (K1, K3)

5.3 Potassium - Source, RDA, Role and Deficiency diseases (K1, K2)

5.4 Iodine - Source, RDA, Role and Deficiency diseases (K2, K3)

5.5 Sodium - Source, RDA, Role and Deficiency diseases (K1, K2)

5.6 Copper - Source, RDA, Role and Deficiency diseases (K1, K2)

**Text Books:**

1. Satyanarayana U- Textbook of Biochemistry - 3<sup>rd</sup> edition - Books and Allied Private Ltd,2008
2. Chatterjea M N, Rana Shinde - Textbook of Medical Biochemistry - 7<sup>th</sup> edition - Jaypee Publishers,2007

**Reference Books:**

**SEMESTER I & II**  
**UABCC20 - ALLIED BIOCHEMISTRY PRACTICAL**

Year/ Sem I / II	Course Code	Title of the Course Allied Biochemistry Practical	Course Type Practical	Course Category Allied Practical	H/ W 2	Credits 2	Marks 40+60=100
	UABCC20						

**Objective:**

To acquire knowledge on the structure and the function of biomolecules

**Course Outcomes (CO):**

On completion of the course, the students will be able to,

1. Understand the various identification tests for carbohydrates
2. Demonstrate separation of protein by electrophoresis
3. Estimate the amount of biomolecules
4. Discuss the principle and application of centrifugation

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**1. Safety Measures in The Laboratory**

**2. Volumetric Analysis:**

1. Estimation of Glucose by Benedicts method
2. Estimation of Glycine by Sorenson's method
3. Estimation of Ascorbic acid using 2,6 Dichlorophenol indophenol
4. Estimation of Iron using potassium permanganate
5. Estimation of Nitrite using sodium hydroxide
6. Estimation of Calcium in Milk

### **3. Qualitative Analysis:**

1. Carbohydrates: Glucose, Fructose, Galactose, Lactose, Maltose, Sucrose, Starch
2. Amino acids: Tyrosine, Tryptophan, Arginine, Cysteine

### **4. Instrumentation: (Demonstration)**

1. Chromatography: Column, Paper, Thin layer
2. Electrophoresis: Vertical and Horizontal
3. Colorimeter
4. UV Spectrophotometer
5. Centrifuge

# Department of Chemistry (UG)

## SYLLABUS AND REGULATIONS

Under

### OUTCOME-BASED EDUCATION

2020

(Effective for the Batch of Students Admitted from 2020-2021)

### AUXILIUM COLLEGE (Autonomous)

*(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)*

**Gandhi Nagar, Vellore-632 006.**

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)*  
**Gandhi Nagar, Vellore-632 006.**

**Department of Chemistry (UG)**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**Eligibility for admission to B.Sc. Chemistry:**

- A pass in Higher Secondary with Mathematics, Physics, Chemistry and Biology.
- A pass in Higher Secondary with Mathematics, Physics, Chemistry and Computer Science.
- A pass in Higher Secondary with Physics, Chemistry, Zoology and Botany.

**Allied Subjects:**

1. Mathematics/ Botany
2. Physics

**Eligibility to take Allied Subjects:**

Students who belong to category I and II are eligible to take Mathematics as one of the Allied courses. Students who belong to category III are eligible to take Botany as one of the Allied courses.

## PROGRAMME OUTCOMES (PO)

- PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.
- PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills
- PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.
- PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.
- PO5:** Emulate positive social values and exercise leadership qualities and team work.
- PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## PROGRAMME SPECIFIC OUTCOMES (PSO)

**PSO1:** Demonstrate a firm foundation in fundamentals and gain an in depth knowledge in different fields of Chemistry such as Inorganic Chemistry, Organic Chemistry, Physical Chemistry, Analytical Chemistry, Pharmaceutical Chemistry, Food Chemistry and Small Scale Chemistry.

**PSO2:** Apply laboratory skills, carry out experiments, record observations and inferences and analyze the results and follow the correct procedures and regulations for safe handling and usage of chemicals.

**PSO3:** Communicate effectively chemistry specific information, ideas and opinions and be able to comprehend and write reports effectively.

**PSO4:** Develop an interest in pursuing higher studies in Chemistry and related subjects which are relevant to employment and entrepreneurship.

**PSO5:** Demonstrate the knowledge of professional and ethical practices.

**PSO6:** Integrate the knowledge and skills developed in multidisciplinary environments and function effectively as an individual or a leader and contribute towards the needs of the society.

(HIGH -3, MODERATE – 2, LOW -1)

## SEMESTER I

### UCCHA20 - GENERAL CHEMISTRY – I

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code</b> UCCHA20	<b>Title of the Course</b> General Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To impart knowledge on periodicity of properties and to learn the theory behind inorganic qualitative analysis.
2. To learn the IUPAC system of nomenclature of organic compounds and shapes of molecules based on hybridization.
3. To help the students to recapitulate the fundamentals in gaseous state, liquid state and quantum chemistry.

#### Course Outcomes:

The Learners will be able to

1. Recall and understand the concepts of valency, oxidation and reduction, classify the elements in the periodic table and explain the periodicity of properties.
2. Recall the concepts and theories of acid - base, buffer solutions, understand the principle of inorganic qualitative analysis and apply it in practicals.
3. Apply IUPAC nomenclature in naming organic compounds and the concept of hybridization to identify the geometry and shape of the simple organic molecules.
4. Analyse and apply the concepts of liquid and gaseous states.
5. Recall the concepts of classical and quantum mechanics and solve related problems.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (18 hours)

- 1.1 Valency, oxidation number, oxidation and reduction in terms of oxidation number, calculation of oxidation state- acids, bases, salts, oxidizing and reducing agents. (K1, K2, K3 & K4)
- 1.2 Oxidation, reduction and redox reactions (definition and examples). Oxidizing and reducing agents (definition and examples). Balancing chemical equations - oxidation number and ion electron methods. (K1, K2, K3 & K4)
- 1.3 Modern periodic law, general classification of elements in the periodic table, general characteristics of s, p, d, and f block elements. (K1, K2, K3 & K4)
- 1.4 Periodicity of properties – definition, factors affecting and periodicity of the following properties - atomic radii, ionic radii, ionization potential and electron affinity. (K1, K2, K3 & K4)
- 1.5 Factors affecting and periodicity of electronegativity. (K1, K2, K3 & K4)
- 1.6 Determination of electronegativity – Pauling's scale and Mulliken's scale. (K1, K2, K3 & K4)

**Unit II:** (18 hours)

- 2.1 Acids and Bases-concepts- Arrhenius, Lowry-Bronsted and Lewis acid – base theory, acid- base equilibria. (K1, K2, K3 & K4)
- 2.2 Definition of pH of strong and weak acid solutions, calculation. Hard and soft acids and bases – definition. (K1, K2, K3 & K4)
- 2.3 Buffer solutions, relative strength of acids and bases from  $k_a$  and  $k_b$  values, Henderson-Hasselbalch equations.) (K1, K2, K3 & K4)
- 2.4 Common ion effect, concept of sparingly soluble salts, solubility product principle, relation between solubility and solubility product. (K1, K2, K3 & K4)
- 2.5 Application of common ion effect and solubility product principle in inorganic qualitative analysis, eliminating the interfering radicals, significance of sodium carbonate extract. (K1, K2, K3 & K4)
- 2.6 Spot test reagents – Magneson, Aluminon, Nessler's, Thiourea, Cupferon and DMG (K1, K2, K3 & K4)

**Unit III:** (18 hours)

- 3.1 IUPAC system of nomenclature of organic compounds- introduction, rules of IUPAC system of nomenclature of organic compounds. (K1, K2, K3 & K4)
- 3.2 IUPAC system of nomenclature for complex organic compounds, alkanes, substituted alkanes, alkyl halides, alkenes, alkynes, alkyl substituents and cycloalkanes. (K1, K2, K3 & K4)
- 3.3 Nomenclature of compounds having functional groups - alcohols, ethers, aldehydes, ketones, carboxylic acids, esters, nitro compounds. (K1, K2, K3 & K4)
- 3.4 Nomenclature of aromatic compounds and substituted aromatic compounds, poly functional and heterocyclic compounds, bicyclic and spiro compounds. (K1, K2, K3 & K4)
- 3.5 Concept of Hybridization – definition, characteristics of hybrid orbitals, modes of hybridization. (K1, K2, K3 & K4)

3.6 Hybridization – tetra valency of carbon, geometry of molecules - methane, ethane, ethylene, acetylene and benzene. (K1, K2, K3 & K4)

**Unit IV:**

**(18 hours)**

- 4.1 Gaseous state - kinetic gas equation, derivation, gas laws from the kinetic gas equation, types of velocities - Mean, Root Mean Square Velocity (RMS), Most Probable Velocities (MPV), calculation of molecular velocities. (No derivation). (K1, K2, K3 & K4)
- 4.2 Maxwell's distribution of molecular velocities (derivation), equipartition of energy, collision number, Collision diameter, mean free path, definition. (No derivation). (K1, K2, K3 & K4)
- 4.3 Real gases – deviation from ideal behavior – van der Waal's equation- Virial equation of state, Boyle's temperature (No derivation). (K1, K2, K3 & K4)
- 4.4 Joule's law, Joule Thomson effect, Joule Thomson Coefficient and its derivation, inversion temperature and its significance. (No derivation) (K1, K2, K3 & K4)
- 4.5 Liquid State - qualitative treatment of the structure of liquids, surface tension – definition, effects of surface tension, experimental determination – capillary rise method – drop weight method, applications. (K1, K2, K3 & K4)
- 4.6 Viscosity – definition, effect of viscosity on temperature and pressure, experimental determination - Saybolt Viscometer and Ostwald's Viscometer method (Including problems). (K1, K2, K3 & K4)

**Unit V:**

**(18 hours)**

- 5.1 Classical Mechanics –the  $e/m$  of an electron, Rutherford's scattering experiments, Rutherford atomic model. (K1, K2, K3 & K4)
- 5.2 The Bohr theory of hydrogen atom, Sommerfeld extension of the Bohr theory. (K1, K2, K3 & K4)
- 5.3 Photoelectric effect and Compton effect- Wave mechanical concept of the atom, de Broglie's relationship. (K1, K2, K3 & K4)
- 5.4 Davisson and Germer experiment, wave nature of electron, Heisenberg's uncertainty principle. (K1, K2, K3 & K4)
- 5.5 Quantum mechanics- postulates of quantum mechanics, concept of operators, angular wave function, Eigen values, Schrodinger wave equation (no derivation), and significance of wave functions. (K1, K2, K3 & K4)
- 5.6 Radial and angular wave functions, probability distribution of electrons, radial probability distribution curves. (K1, K2, K3 & K4)

\*Related problems to be worked out

## SEMESTER II

### UCCHB20 - GENERAL CHEMISTRY – II

<b>Year: I</b> <b>SEM: II</b>	<b>Course Code</b> UCCHB20	<b>Title of the Course</b> General Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To throw light on alkali metals and their compounds, different types of bonding and its importance in inorganic compounds.
2. To understand the importance of VSEPR and MO theories.
3. To give a detailed knowledge on electron displacement effects and reaction intermediates, the mechanistic aspects of free radical substitution reactions in alkanes and addition reactions in alkenes and dienes.
4. To understand the properties of liquid crystals and solutions.

#### Course Outcomes:

The Learners will be able to

1. Illustrate the different types of bonds with examples and apply the knowledge of VSEPR theory to determine geometries of molecules.
2. Interpret the molecular orbital theory of homo and hetero nuclear diatomic molecules, compare the chemical and physical properties of alkali metals and their compounds and understand the chemistry of lithium.
3. Analyse and apply the electronic displacement effects, reactions, generation, structure and stability of reaction intermediates.
4. Examine and analyse the reactions and mechanisms of alkanes, alkenes, dienes and alkynes.
5. Analyse the laws and concepts of ideal and non ideal solutions, mesomorphic and colloidal states.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO

CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:****(18 hours)**

- 1.1 Chemical bonding: Introduction- Types of bonds - Ionic, Covalent, and Coordinate bonds- characteristics and examples. (K1,K2, K3 &K4)
- 1.2 Ionic bond - conditions for the formation of ionic bond. (K1,K2, K3 &K4)
- 1.3 Characteristics and general properties, radius ratio rule and its limitation - Comparison of ionic and covalent bonds. (K1,K2, K3 &K4)
- 1.4 Hydration energy, lattice energy and their applications. (K1,K2, K3 &K4)
- 1.5 Born-Haber cycle – Hydrogen bond - Fajan’s rule. (K1,K2, K3 &K4)
- 1.6 VSEPR theory- geometry of  $\text{NH}_3$ ,  $\text{H}_2\text{O}$ ,  $\text{XeF}_2$ ,  $\text{XeF}_4$ ,  $\text{XeF}_6$ ,  $\text{XeF}_5^-$ ,  $\text{XeOF}_5^-$ ,  $\text{XeF}_8^{2-}$ ,  $\text{IF}_7$  and  $\text{NH}_4^+$ . (K1,K2, K3 &K4)

**Unit II:****(18 hours)**

- 2.1 Molecular orbital theory - Postulates of MOT, formation of bonding and antibonding molecular orbitals. (K1,K2, K3 &K4)
- 2.2 Bond order – Stability and magnetic property of the molecules. (K1,K2, K3 &K4)
- 2.3 MO diagrams of homo nuclear diatomic molecules  $\text{H}_2$ ,  $\text{O}_2$ ,  $\text{O}_2^+$ ,  $\text{N}_2$  and hetero nuclear diatomic molecules-  $\text{CO}$ ,  $\text{NO}$ . (K1,K2, K3 &K4)
- 2.4 Chemical and physical properties of alkali metals, Comparative study of the elements and the compounds of alkali metals- carbonates, oxides, hydroxides and halides. (K1,K2, K3 &K4)
- 2.5 Exceptional properties of lithium, diagonal relationship of lithium and magnesium. (K1,K2, K3 &K4)
- 2.6 Lithium- occurrence, ores, extraction from phosphate and silicate ores and uses. Preparation, properties and uses of lithium carbonate. (K1,K2, K3 &K4)

**Unit III:****(18 hours)**

- 3.1 Electron displacement effects- inductive effect- effect on bond length, dipole moment, reactivity of alkyl halides, strength of carboxylic acids and basic character of amines. (K1,K2, K3 &K4)
- 3.2 Electromeric effect, comparison with inductive effect, mesomeric effect, comparison with inductive effect. (K1,K2, K3 &K4)
- 3.3 Hyperconjugative effect and steric effect. (K1,K2, K3 &K4)
- 3.4 Bond fission- homolytic fission, heterolytic fission. Reaction intermediates- Carbocations – generation, structure, stability and reactions. (K1,K2, K3 &K4)
- 3.5 Generation, structure, stability and reactions of carbanions and free radicals. (K1,K2, K3 &K4)
- 3.6 Generation of benzyne, nitrenes and carbenes. (K1,K2, K3 &K4)

**Unit IV:****(18 hours)**

- 4.1 Alkanes - chemical properties, mechanism of free radical reactions, halogenation of alkanes. (K1,K2, K3 &K4)

- 4.2 Alkenes - addition reactions of alkenes with hydrogen, halogens, hydrogen halides- Markownikoff's rule and anti Markownikoff's rule (peroxide effect), sulphuric acid, water. (K1,K2, K3 &K4)
- 4.3 Hydroboration, ozonolysis, hydroxylation with  $\text{KMnO}_4$ , allylic substitution by NBS. (K1,K2, K3 &K4)
- 4.4 Dienes - types, stability and 1,2 and 1,4 addition reactions - Diels –Alder reaction. (K1,K2, K3 &K4)
- 4.5 Alkynes- acidity of alkynes, formation of acetylides, addition reactions with water, hydrogen halides, halogens. (K1,K2, K3 &K4)
- 4.6 Alkynes- oxidation, ozonolysis and hydroxylation with  $\text{KMnO}_4$ . (K1,K2, K3 &K4)

**Unit V:**

**(18 hours)**

- 5.1 Mesomorphic state - Liquid crystals – classification, thermotropic and lyotropic, Smectic, Nematic and Cholestric liquid crystals and the molecular arrangements and its applications. (K1,K2, K3 &K4)
- 5.2 Solutions - solutions of gases in liquids, Henry's law- solutions of liquids in liquids- Raoult's law, binary liquid mixtures, ideal solutions. (K1,K2, K3 &K4)
- 5.3 Deviations from ideal behaviour, vapour pressure-composition curves and boiling point, composition curves. (K1,K2, K3 &K4)
- 5.4 Distillation -types of distillation, fractional distillation, steam distillation, vacuum distillation, column distillation and azeotropic distillation. (K1,K2, K3 &K4)
- 5.5 Colloidal State - colloidal systems- classification of colloids, preparation of colloidal solutions, dispersion methods and condensation methods. (K1,K2, K3 &K4)
- 5.6 Properties of colloidal systems –Tyndall effect, importance and applications of colloids. (K1,K2, K3 &K4)

## SEMESTER II

### UCCHC20- PRACTICAL I: INORGANIC QUALITATIVE ANALYSIS

<b>Year : I</b> <b>SEM: II</b>	<b>Course Code</b> UCCHC20	<b>Title of the Course</b> Inorganic Qualitative Analysis	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes

The Learners will be able to

1. Recall the principles of inorganic qualitative analysis.
2. Apply the concepts of semimicro analysis in inorganic qualitative analysis.
3. Develop skill to analyse systematically the given inorganic mixture and identify the acid and basic radicals.
4. Understand the importance of eliminating the interfering radical.
5. Eliminate the interfering acid radical for group separation and identification of basic radicals.

CO	PSO

CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

Analysis of a mixture containing two cations and two anions, one of which will be an interfering ion. Semi micro methods using the conventional scheme may be adopted.

Reactions of the following anions to be analysed:

carbonate, sulphide, sulphate, fluoride, chromate, bromide, chloride, nitrate, oxalate, phosphate and borate.

Reactions of the following cations to be analysed:

Lead, copper, cadmium, bismuth, aluminium, iron, manganese, zinc, cobalt, nickel, calcium, strontium, barium, magnesium and ammonium.

**SEMESTER III****UCCHD20 - GENERAL CHEMISTRY – III**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code</b> UCCHD20	<b>Title of the Course</b> General Chemistry - III	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 7	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

**Learning Objectives:**

1. To understand the principles of volumetric analysis.
2. To gain knowledge on alkaline earth metals and their compounds.
3. To learn the reactivity of cycloalkanes, carbonyl compounds, carboxylic acids, alcohols, ethers and epoxides.
4. To provide knowledge on solid-state chemistry.

**Course Outcomes:**

The Learners will be able to

1. Define and calculate equivalent weights and concentration terms and explain the principles of volumetric analysis, and illustrate the theories of different types of titrations and indicators.
2. Discuss the trend in periodicity of Beryllium, Boron and Carbon family elements and their compounds.
3. Describe the methods of preparation and properties of cycloalkanes, dicarboxylic acids and carbonyl compounds, and apply the concept of acidity and acid strength of carboxylic acids.
4. Describe the methods of preparation and properties of alcohols, ethers and epoxides.
5. Elaborate the basic concepts of solid-state chemistry including solid state defects and semiconductors.

CO5	H	H	H	H	M	H

**Unit I:****(21 hours)**

- 1.1 Definition of Mole, Molarity, Molality, Normality, Mole fraction, Equivalent Weights of acid, base, oxidizing agent, reducing agent and salt. (K1, K2, K3 & K4)
- 1.2 Volumetric analysis - principle, titrand, titrant, indicator, preparation of solutions and standardization of commercial acids. (K1, K2, K3 & K4)
- 1.3 Primary and secondary standards – characteristics and examples. Standardisation of solutions. (K1, K2, K3 & K4)
- 1.4 Theories of acid-base titrations, redox, complexometric and iodometric and iodimetric titrations. (K1, K2, K3 & K4)
- 1.5 Theories of acid-base, redox, metal ion and adsorption indicators, choice of indicators. (K1, K2, K3 & K4)
- 1.6 Types of errors, minimizing the errors, accuracy and precision, significant figures. (K1, K2, K3 & K4)

**Unit II:****(21 hours)**

- 2.1 Alkaline earth metals - Be, Mg, Ca, Sr, Ba - occurrence, comparative study of elements and compounds- oxides, halides, hydroxides, sulphates and carbonates. (K1, K2, K3 & K4)
- 2.2 Exceptional properties of Beryllium –Diagonal relationship between Be and Al, extraction of magnesium. (K1, K2, K3 & K4)
- 2.3 p - block elements -Boron family-comparative study of elements and compounds- oxides, hydroxides, halides and hydrides. (K1, K2, K3 & K4)
- 2.4 Preparation, properties, uses and structures of  $\text{LiAlH}_4$ ,  $\text{NaBH}_4$ , diborane and Borazole. (K1, K2, K3 & K4)
- 2.5 Carbon family - comparative study of elements and compounds- hydrides, oxides and halides. (K1, K2, K3 & K4)
- 2.6 Classification of silicates, chemistry of silicones and their applications. (K1, K2, K3 & K4)

**Unit III:****(21 hours)**

- 3.1 Cycloalkanes – preparation using Wurtz's reaction, Dieckmann's ring closure and reduction of aromatic hydrocarbons. (K1, K2, K3 & K4)
- 3.2 Substitution and ring opening reactions, Baeyer's strain theory, theory of strainless rings. (K1, K2, K3 & K4)
- 3.3 Carboxylic acid- ionization of carboxylic acids, acidity constants, comparison of acid strengths of substituted halo acids, acid strengths of substituted benzoic acids. Conversion of acids to their derivatives. (K1, K2, K3 & K4)
- 3.4 Dicarboxylic acids- preparation and properties of oxalic, malonic, succinic, glutaric and adipic acids. (K1, K2, K3 & K4)
- 3.5 Carbonyl compounds- preparation from alcohols, alkene, alkyne, acid chloride, Grignard reagent, chemical reactions, relative reactivities of aldehydes and ketones. (K1, K2, K3 & K4)

3.6 Acidity of  $\alpha$ -hydrogen, nucleophilic addition reactions (bisulphite, HCN, Grignard and alcohol). (K1, K2, K3 & K4)

**Unit IV:**

**(21 hours)**

- 4.1 Alcohols - reactions of alcohols with Na, HX, esterification, oxidation with alk.  $\text{KMnO}_4$ , acidic dichromate, con  $\text{HNO}_3$ , catalytic dehydrogenation. (K1, K2, K3 & K4)
- 4.2 Dihydric alcohol -Glycol- preparation, properties and uses. (K1, K2, K3 & K4)
- 4.3 Trihydric alcohol - Glycerol- preparation, properties and uses. (K1, K2, K3 & K4)
- 4.4 Ethers- isomerism, preparation by Williamson synthesis, reactions of ethers. (K1, K2, K3 & K4)
- 4.5 Epoxides- preparation from alkene, ring opening reactions. (K1, K2, K3 & K4)
- 4.6 Reactions of epoxides with alcohol, ammonia derivative and  $\text{LiAlH}_4$ . (K1, K2, K3 & K4)

**Unit V: (21 hours)**

- 5.1 The Solid State - difference between crystalline and amorphous solids, symmetry in crystal systems - elements of symmetry, space lattice, unit cell, Bravais lattices, law of rational indices and Miller indices. (K1, K2, K3 & K4)
- 5.2 X - ray diffraction – derivation of the Bragg's equation – experimental methods – Laue's method and powder method. (K1, K2, K3 & K4)
- 5.3 Types of crystals – characteristics of molecular, covalent, metallic and ionic crystals. (K1, K2, K3 & K4)
- 5.4 Three-dimensional close packing of spheres – ccp and hcp – characteristics of hcp, ccp and bcc structures, interstitial sites in closely packed arrangement of atoms – triangular, tetrahedral and octahedral sites, radius ratio rule and its effect on the shapes of ionic crystals, structures of ionic crystals- $\text{NaCl}$ ,  $\text{CsCl}$ ,  $\text{ZnS}$ , Wurtzite, Fluorite and Rutile. (K1, K2, K3 & K4)
- 5.5 Imperfections in crystal systems – Schottky and Frenkel defects, metal excess and metal deficiency defects. (K1, K2, K3 & K4)
- 5.6 Semiconductors – band theory of solids, intrinsic semiconductors, extrinsic semiconductors - n-type and p-type semiconductors. (K1, K2, K3 & K4)

### SEMESTER III

#### USCHA320 - SKILL BASED ELECTIVE: INDUSTRIAL CHEMISTRY

<b>Year: II</b> <b>SEM:III</b>	<b>Course Code</b> USCHA320	<b>Title of the Course</b> Industrial Chemistry	<b>Course Type</b> Theory	<b>Course category</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	------------------------------	--	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To acquire an in depth knowledge on various areas of industrial chemistry like polymers, leathers, textile, fuels, glasses, ceramics, cements and paints.
2. To help the students enhance the reasoning skills and understand the working of industrial processes.

#### Course Outcomes:

The Learners will be able to

1. Discuss the composition, characteristics and manufacture of various industrial products. (Polymer, Leather, Textile, Glass, Ceramics, Cements, Paints and Pigments).
2. Explain the various process involved in the manufacture of leathers and leather products.
3. Describe the importance of natural and synthetic fibres in textile industry.
4. Understand the classifications of fuels and learn the common terms related to it.
5. Understand how to implement the concepts in industrial working environment.

CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

#### Unit I:

(6 Hours)

- 1.1 Introduction- terms involved in polymers. (K1 & K2)
- 1.2 Classification of polymers. (K1, K2 & K3)

- 1.3 Polymerization, types of polymerization. (K1, K2 & K3)
- 1.4 Preparation, properties and uses of natural polymers. (K1 & K2)
- 1.5 Preparation, properties and uses of synthetic rubber- polyvinyl chloride, polyester, polyamide. (K1, K2 & K3)
- 1.6 Biodegradable polymers. (K1 & K2)

**Unit II:**

**(6 Hours)**

- 2.1 Introduction-constituent of animal skin. (K1 & K2)
- 2.2 Preparation of hides for tanning. (K1 & K2)
- 2.3 Process - cleaning and soaking, liming and unhairing, delimiting, bating and pickling. (K1, K2 & K3)
- 2.4 Leather tanning-vegetable and chrome tanning. (K1, K2 & K3)
- 2.5 Finishing process- dyeing and fat liquoring. (K1, K2 & K3)
- 2.6 Cleaner processing and practices in beam house, Effluent treatment (K1, K2 & K3)

**Unit III:**

**(6 Hours)**

- 3.1 Introduction to textile fibres-Classification of textile fibres. (K1 & K2)
- 3.2 Differences between natural and synthetic fibres. (K1 & K2)
- 3.3 Synthetic fibres- Preparation and properties of Rayon and Nylon. (K1, K2 & K3)
- 3.4 Textile chemical processing for the fibres-Singeing, de-sizing, scouring, bleaching, mercerization. (K1, K2, K3 & K4)
- 3.5 Textile dyes- difference between pigments and dyes. (K1 & K2)
- 3.6 Classification of dyes- vat dyes, Azo dyes, chrome dyes, Acid and base dyes. (K1 & K2)

**Unit IV:**

**(6 Hours)**

- 4.1 Introduction- Classification of fuels. (K1 & K2)
- 4.2 Solid fuel-coal and coke- composition and properties. (K1 & K2)
- 4.3 Liquid fuel- Petroleum processing and fractions, Biofuels.(K1 & K2)
- 4.4 Cracking- catalytic cracking and methods-Knocking- octane number and cetane number. (K1, K2 & K3)
- 4.5 Synthetic petrol-Fischer Tropsch and Bergius processes. (K1, K2 & K3)
- 4.6 Fuel gases- Natural gas and Water gas. (K1 & K2)

**Unit V:**

**(6 Hours)**

- 5.1 Glass- Raw materials- characteristics. (K1 & K2)
- 5.2 Methods of Manufacture- melting, shaping, annealing, finishing- special glasses. (K1, K2 & K3)
- 5.3 Refractories- characteristics, classification and properties. (K1 & K2)
- 5.4 General methods of manufacture of refractories. (K1, K2 & K3)
- 5.5 Cement- composition, setting of cement- crystalline and colloidal theory. (K1, K2 & K3)
- 5.6 Paints and pigments- Constituent of paints, pigments- white lead, ultramarine, Chrome yellow. (K1, K2 & K3)

## SEMESTER IV

### UCCHE20 - GENERAL CHEMISTRY – IV

Year: II	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
SEM: IV	UCCHE20	General Chemistry - IV	Theory	Core	5	5	100

#### Learning Objectives:

1. To give in depth knowledge about nitrogen family, oxygen family, halogen family and zero group elements.
2. To learn the mechanistic details of electrophilic and nucleophilic substitution in aromatic compounds.
3. To gain knowledge on heterocyclic compounds and phenols.
4. To learn the laws of thermodynamics and their applications.

#### Course Outcomes:

The Learners will be able to

1. Explain the periodic properties of Nitrogen, Oxygen and Halogen family elements and their compounds, and reason out the position of noble gases in the periodic table and describe the preparation and properties of xenon compounds.
2. Illustrate the mechanisms of aliphatic, aromatic nucleophilic substitution and elimination reactions.
3. Recall and apply Huckel's rule, illustrate the preparation, properties and uses of heterocyclic compounds, dihydric and trihydric phenols, and related named reactions.
4. Define the terms involved in thermodynamics, the laws of thermodynamics and their developments.
5. Describe the concept of entropy and calculate the entropy changes during various processes, and to explain the third law of thermodynamics and its applications.

CO	PSO

**Unit I:****(15 hours)**

- 1.1 Nitrogen family - preparations, properties and uses of hydrazine. (K1, K2 & K3)
- 1.2 Structure and properties of oxides, oxyacids of N ( $N_2O$ , NO,  $N_2O_5$ ) and phosphorous ( $H_3PO_4$ ,  $H_3PO_3$ ,  $PCl_3$ ,  $PCl_5$ ). (K1, K2, K3 & K4)
- 1.3 Oxygen Family - comparative study of compounds- hydrides, halides, oxides and oxyacids. (K1, K2, K3 & K4)
- 1.4 Halogens - comparative study of elements and compounds of halogens- hydracids, oxyacids and inter halogen compounds. Pseudo halogens- comparison of halogens and pseudo halogens. (K1, K2, K3 & K4)
- 1.5 Noble gases - position in the periodic table, clathrates and their applications. (K1, K2, K3 & K4)
- 1.6 Preparation and properties of  $XeF_6$ ,  $XeO_3$  and  $XeOF_4$ . (K1, K2, K3 & K4)

**Unit II:****(15 hours)**

- 2.1 Aliphatic Nucleophilic Substitution - mechanism of  $S_N1$ ,  $S_N2$ , and  $S_{Ni}$  reactions. (K1, K2, K3 & K4)
- 2.2 Effect of structure of substrate, solvent, nucleophile and the leaving group. (K1, K2, K3 & K4)
- 2.3 Aromatic nucleophilic substitution - benzyne and intermediate complex mechanism. (K1, K2, K3 & K4)
- 2.4 Effect of substituents on reactivity, orientation and reactivity in substituted benzenes. (K1, K2, K3 & K4)
- 2.5 Aromatic electrophilic substitution reactions in benzene and substituted benzenes- nitration, halogenation, sulphonation, Friedel-Craft's acylation and alkylation reactions. (K1, K2, K3 & K4)
- 2.6 Elimination reaction- Hoffmann and Saytzeff's rules. cis and trans eliminations- mechanisms of E1 and E2 reactions, elimination vs substitution. (K1, K2, K3 & K4)

**Unit III:****(15 hours)**

- 3.1 Aromaticity – Huckel's rule and its applications. (K1, K2, K3 & K4)
- 3.2 Heterocyclic compounds - preparation, properties and uses of furan, thiophene and pyrrole. (K1, K2, K3 & K4)
- 3.3 Preparation, properties and uses of pyridine, quinoline and isoquinoline. (K1, K2, K3 & K4)
- 3.4 Phenols - acidic character of phenols, preparation, properties and uses of dihydric phenols. (K1, K2, K3 & K4)
- 3.5 Preparation, properties and uses of trihydric phenols. (K1, K2, K3 & K4)
- 3.6 Mechanisms of Kolbe's, Riemeier-Tiemann, Gattermann, Mannich and Houben –Hoesch reactions. (K1, K2, K3 & K4)

**Unit IV:****(15 hours)**

- 4.1 Thermodynamics - types of systems – isolated, closed, open, homogeneous and heterogeneous systems, phase, state of a system, state variables. Thermodynamic equilibrium - thermal, mechanical and chemical equilibria, extensive and intensive

properties, processes and their types – isothermal, adiabatic and isobaric processes, reversible and irreversible processes, nature of work and heat. (K1, K2, K3 & K4)

- 4.2 The first law of thermodynamics - concept of internal energy, statements of I law, state functions, exact and inexact differentials, the Euler reciprocal relation, enthalpy of a system, enthalpies of vaporization and fusion, heat capacity of a system - relationship between  $C_p$  and  $C_v$  in gaseous systems. (K1, K2, K3 & K4)
- 4.3 Calculation of  $w$ ,  $\Delta U$ ,  $q$  and  $\Delta H$  for expansion and compression of ideal gases under reversible and irreversible isothermal conditions. Adiabatic expansion – calculation of  $w$ ,  $\Delta U$  and  $\Delta H$ , final temperatures in reversible and irreversible adiabatic expansions, Comparison of isothermal and adiabatic expansions. Zeroeth law of thermodynamics. (K1, K2, K3 & K4)
- 4.4 Thermochemistry - heat of reaction, exothermic and endothermic reactions, relationship between  $q_p$  and  $q_v$ , standard enthalpy changes of reactions, standard enthalpies of combustion, neutralization and formation, determination of enthalpies of reactions, variation of enthalpy of reaction with temperature -Kirchhoff's equations. (K1, K2, K3 & K4)
- 4.5 Bond energies-definition, calculation and applications of bond energies. (K1, K2, K3 & K4)
- 4.6 The Second law of thermodynamics - need for the second law, statements of II law, spontaneous processes, Carnot's cycle - efficiency of a heat engine-Carnot's theorem (statement only). (K1, K2, K3 & K4)

#### Unit V:

(15 hours)

- 5.1 Entropy – the concept of entropy, entropy changes in isothermal expansion of an ideal gas, in reversible and irreversible processes, entropy change accompanying change of phase. (K1, K2, K3 & K4)
- 5.2 Calculation of entropy changes with changes in T, V, and P, entropy changes in different processes, entropy of a mixture of ideal gases, entropy of mixing, physical significance of entropy. (K1, K2, K3 & K4)
- 5.3 Helmholtz and Gibbs free energy functions, variation of free energy change with T and P. Maxwell's relations, criteria for reversible and irreversible processes, Gibbs-Helmholtz equation. (K1, K2, K3 & K4)
- 5.4 Partial molar properties – concept of chemical potential, Gibbs-Duhem equation, variation of chemical potential with temperature and pressure, chemical potential in a system of ideal gases. (K1, K2, K3 & K4)
- 5.5 The Clapeyron-Clausius equation and its applications. (K1, K2, K3 & K4)
- 5.6 Third law of thermodynamics - Nernst heat theorem, statement of third law, determination of absolute entropies of solids, liquids and gases, residual entropy. (K1, K2, K3 & K4)

\*Related problems to be worked out

## SEMESTER IV

### UCCHF20 – PRACTICAL II: VOLUMETRIC ESTIMATION

<b>Year: II</b> SEM: IV	<b>Course Code</b> UCCHF20	<b>Title of the Course</b> Volumetric Estimation	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------	-------------------------------	---	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Use double titration method in volumetric analysis.
2. Prepare standard solutions.
3. Apply volumetric principles to carry out acid-base titrations, complexometric titrations, precipitation titration and redox titrations like permanganometric, dichrometry and iodometric titrations.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H

#### Acidimetry

1. Estimation of sodium hydroxide- standard sodium carbonate
2. Estimation of borax-standard sodium carbonate

#### Permanganometry

3. Estimation of oxalic acid- standard Mohr's salt or ferrous sulphate
4. Estimation of sodium nitrite- standard oxalic acid
5. \*\*Estimation of Calcium
6. \*\*Determination of percentage of Manganese dioxide in Pyrolusite

#### Iodometry

7. Estimation of copper-standard copper sulphate
8. Estimation of potassium dichromate- standard potassium dichromate

### Complexometry

9. Estimation of magnesium using EDTA
10. Estimation of nickel using EDTA
11. \*Estimation of temporary and permanent hardness of water

### Dichrometry

12. Estimation of ferrous ion using diphenylamine/ N-phenyl anthranilic acid as indicator

### Precipitation titration

13. \*Estimation of chloride in neutral medium

\* & \*\*Not to be given for examination.

\*\* To be given as a group experiment.

Continuous Assessment	40 marks
I CA	50
II CA	50
Average	25
Performance during regular practical's	10
Regularity in submission of observation notebook and record	5

### Semester Practical Examination - 60 marks

Short Procedure writing - 5

Viva-voce -5

Record -10

Volumetric Analysis:

≤ 2% - 40 marks

> 1 upto 2% - 35 marks

>2 upto 3% - 25 marks

>3 upto 4% - 15 marks

> 4% - 10 marks

## SEMESTER 1V

### USCHB420 - SKILL BASED ELECTIVE: AGRICULTURAL CHEMISTRY

<b>Year: II</b> <b>SEM: IV</b>	<b>Course Code</b> USCHB420	<b>Title of the Course</b> Agricultural Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Skill Based	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	------------------------------	---------------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To impart elementary ideas of soil chemistry, types of farming, insecticides, fungicides and herbicides.
2. To emphasize the importance of fertilizers.

#### Course Outcomes:

The Learners will be able to

1. Understand the scope of agriculture in India and Tamil Nadu.
2. Explain the physical and chemical properties of soil.
3. Describe the types of farming.
4. Summarize the certification of organic products.
5. Identify the benefits and adverse effects of pesticides.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:****(6 Hours)**

- 1.1 Agriculture – Definition – Scope of agriculture in India and Tamil Nadu. (K1 & K2)
- 1.2 Branches of agriculture. (K1 & K2)
- 1.3 Agronomy – Art, Science and business of crop production. (K1 & K2)
- 1.4 Agronomical classification of crops - their importance. (K1 & K2)
- 1.5 Major crops of India and Tamil Nadu, Water resources in Tamil Nadu. (K1 & K2)
- 1.6 Factors affecting crop production – Moisture, aeration, light, temperature and nutrients. (K1 & K2)

**Unit II:****(6 Hours)**

- 2.1 Soil chemistry – Introduction, soil classification and survey. (K1 & K2)
- 2.2 Properties of soil – soil texture and soil water. (K1 & K2)
- 2.3 Soil temperature and soil colloids. (K1 & K2)
- 2.4 Soil minerals and soil pH. (K1 & K2)
- 2.5 Soil acidity – alkalinity and buffering soil. (K1 & K2)
- 2.6 Soil fertility and soil formation. (K1 & K2)

**Unit III:****(6 Hours)**

- 3.1 Farming – types – subsistence farming and commercial farming. (K1 & K2)
- 3.2 Plantation farming, mixed farming and conventional farming. (K1 & K2)
- 3.3 Organic farming, poultry farming and dairy farming. (K1 & K2)
- 3.4 Advantages of organic farming- limitation of organic farming. (K1 & K2)
- 3.5 Certification of organic products – OFAI organic labeling system. (K1 & K2)
- 3.6 Research findings on organic food. (K1 & K2)

**Unit IV:****(6 Hours)**

- 4.1 Insecticides, Fungicides and Herbicides - Introduction. (K1 & K2)
- 4.2 Methods of using pest controls. (K1 & K2)
- 4.3 Insecticides – Arsenic compounds, fluorine compounds and boron compounds. (K1 & K2)
- 4.4 Insecticides- mercury compounds, copper compounds and sulphur compounds. (K1 & K2)
- 4.5 Modern insecticides – some important herbicides -Rodenticides. (K1 & K2)
- 4.6 Benefits of Pesticides, Adverse environmental effects of Pesticides. (K1 & K2)

**Unit V:****(6 Hours)**

- 5.1 Fertilizers – Classification- Examples of fertilizers. (K1 & K2)
- 5.2 Nitrogenous fertilizers- phosphate fertilizers- potash fertilizers. (K1 & K2)
- 5.3 Ill effects of fertilizers. (K1 & K2)
- 5.4 Manures, compost and saw dust. (K1 & K2)
- 5.5 Farmyard manure, compost, reinforcing manure and green manure. (K1 & K2)
- 5.6 Sewage and sludge - biogas production. (K1 & K2)

## SEMESTER V

### UCCHG20 - INORGANIC CHEMISTRY

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code</b> UCCHG20	<b>Title of the Course</b> Inorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To discuss in detail the general characteristics of d block and f block elements, make a comparative study of a few group elements and the metallurgy of certain elements and compounds.
2. To make an in-depth study on nuclear chemistry.
3. To introduce the field of bioinorganic chemistry.

#### Course Outcomes:

The Learners will be able to

1. Discuss the general characteristics of d and f block elements, and compare the properties of elements belonging to Ti, V, Cr, Mn and Fe groups.
2. Summarize the various steps involved in metallurgical processes, and illustrate the preparation, properties and uses of Ti, Zr, U, Pt and Th.
3. Recall the basic concepts of nuclear chemistry, and to explain the stability of nuclides by n/p ratio, mass defect and binding energy, packing fraction, magic numbers and natural radioactivity.
4. Explain nuclear transmutation reactions, artificial radioactivity, nuclear fission and fusion reactions.
5. Describe the biological importance of certain elements, chelate therapy, radio pharmaceuticals, contrast agents and toxicity of few metals.

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	H	H	H	H
CO2	H	L	H	H	H	H
CO3	H	L	H	H	H	H
CO4	H	L	H	H	H	H
CO5	H	L	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

**Unit I:****(12 Hours)**

- 1.1 d-block elements - general characteristics of d block elements. (K1, K2, K3 & K4)
- 1.2 Group discussion of d-block elements - titanium, vanadium and chromium groups - electronic configuration, occurrence, oxidation states, reactivity, magnetic properties, catalytic properties, colour and comparative study of their compounds. (K1, K2, K3 & K4)
- 1.3 Comparative account of manganese and iron groups - electronic configuration, occurrence, oxidation states, reactivity, magnetic properties, catalytic properties, colour and comparative study of their compounds. (K1, K2, K3 & K4)
- 1.4 f-block elements – position in the periodic table, general characteristics of lanthanides - occurrence, electronic configuration, oxidation states, ionic radii – lanthanide contraction, colour, spectra, magnetic properties and formation of complexes. (K1, K2, K3 & K4)
- 1.5 General characteristics of actinides - occurrence, electronic configuration, oxidation states, ionic radii - actinide contraction, colour, spectra, magnetic properties and formation of complexes. (K1, K2, K3 & K4)
- 1.6 Comparative account of lanthanides and actinides. (K1, K2, K3 & K4)

**Unit II:****(12 Hours)**

- 2.1 Principle and processes of metallurgy – minerals and ores, occurrence of metals in nature, various steps of metallurgy – various ore-dressing methods, calcination, roasting, various reduction and refining methods. (K1, K2, K3 & K4)
- 2.2 Titanium, Zirconium and Platinum – occurrence, extraction, properties and uses. (K1, K2, K3 & K4)
- 2.3 Uranium – occurrence, extraction from pitchblende - acid and alkali digestion processes, extraction from carnotite, properties and uses. (K1, K2, K3 & K4)
- 2.4 Chemistry of Thorium – occurrence, extraction from monazite sand, properties and uses. (K1, K2, K3 & K4)
- 2.5 Preparation and uses of ammonium molybdate, vanadium pentoxide, uranium hexa fluoride. (K1, K2, K3 & K4)
- 2.6 Heat treatment of steel, uses of steel alloys. (K1, K2, K3 & K4)

**Unit III:****(12 Hours)**

- 3.1 Nuclear chemistry - sub atomic particles of the nucleus, nucleon terminology, classification of nuclides – based on Z and N values - isotopes, isobars, isotones, mirror nuclei and isomers – based on stability. (K1, K2, K3 & K4)
- 3.2 Theories of nuclear forces operating between the nucleons inside the nucleus – meson theory and nuclear fluid theory. (K1, K2, K3 & K4)
- 3.3 Stability of nuclides - odd-even nature of Z and N values, N/P ratio - stability belt, packing fraction, mass defect and nuclear binding energy - calculations involving mass defect and B.E per nucleon. (K1, K2, K3 & K4)
- 3.4 Liquid drop model, shell model- magic numbers. (K1, K2, K3 & K4)
- 3.5 Natural radioactivity - general properties of radioactive radiations, properties of alpha, beta and gamma rays, modes of radioactive decay, group displacement law, rate of disintegration and half-life period. (K1, K2, K3 & K4)
- 3.6 Radioactive series – uranium, thorium, actinium and neptunium series – similarities between radioactive series. (K1, K2, K3 & K4)

**Unit IV:****(12 Hours)**

- 4.1 Nuclear transmutation – introduction, Bohr’s theory of nuclear reactions, classification of nuclear reactions – based on overall energy transformation. (K1, K2, K3 & K4)
- 4.2 Classification of nuclear reactions – based on the nature of the bombarding particles, nuclear reactions versus chemical reactions. (K1, K2, K3 & K4)
- 4.3 Artificial radioactivity - discovery, reactions emitting electrons and positrons, preparation of trans-uranium elements. (K1, K2, K3 & K4)
- 4.4 Nuclear fission – definition, reaction, Q-value, mechanism, uses - atom bomb, nuclear reactor and its components, breeder reactor. (K1, K2, K3 & K4)
- 4.5 Nuclear fusion – definition - thermonuclear reactions, uses – stellar energy, hydrogen bomb. (K1, K2, K3 & K4)
- 4.6 Comparison of fission and fusion, atom bomb and hydrogen bomb. (K1, K2, K3 & K4)

**Unit V:****(12 Hours)**

- 5.1 Bioinorganic Chemistry – micro and macro nutrients, biological aspects of Fe, Co and Zn. (K1, K2, K3 & K4)
- 5.2 Biological role of Mg, P and Mo. (K1, K2, K3 & K4)
- 5.3 Biological importance of Na, K and Ca. (K1, K2, K3 & K4)
- 5.4 Biological importance of copper, sulphur, iodine and selenium. (K1, K2, K3 & K4)
- 5.5 Inorganic medicinal chemistry - radio pharmaceuticals, chelate therapy, and contrast agents in MRI. (K1, K2, K3 & K4)
- 5.6 Toxicity of metals – As, Hg, Cd, Pb and Cr toxic effects. (K1, K2, K3 & K4)

**SEMESTER V**  
**UCCHH20 - ORGANIC CHEMISTRY**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
	UCCHH20	Organic Chemistry	Theory	Core	4	4	100

**Learning Objectives:**

1. To acquire knowledge on active methylene compounds, organic photochemistry and mechanisms of certain named reactions.
2. To give a broad outline of stereochemistry and conformational analysis.
3. To learn the mechanisms of molecular rearrangements.

**Course Outcomes:**

The Learners will be able to

1. Remember the concepts of stereoisomerism and apply it in identifying the configurations of the optical and geometrical isomers.
2. Illustrate tautomerism and conformational analysis.
3. Explain the preparation and synthetic uses of active methylene compounds, basic concepts of organic photochemistry and illustrate organic photochemical reactions.
4. Apply the knowledge of various named reactions in organic synthesis.
5. Summarize the different types of molecular rearrangements their mechanisms and applications.

<b>CO</b>	<b>PSO</b>

<b>CO4</b>	H	H	H	H	M	H
<b>CO5</b>	H	H	H	H	M	H

**Unit I:****(12 Hours)**

- 1.1 Stereoisomerism: Optical isomerism – conditions for optical activity. Projection formulae: Fischer, Flying wedge, Sawhorse and Newmann projection formulae. (K1,K2,K3&K4)
- 1.2 Cahn –Ingold – Prelog rules, R-S notations for optical isomers with one and two asymmetric carbon atoms. (K1,K2,K3&K4)
- 1.3 Optical activity in compounds not containing asymmetric carbon atoms – biphenyls (atropisomerism), allenes and spiranes. (K1,K2,K3&K4)
- 1.4 Geometrical isomerism: cis - trans, syn - anti and E-Z notations.(K1,K2,K3&K4)
- 1.5 Geometrical isomerism in maleic and fumaric acids and unsymmetrical ketoximes. (K1,K2,K3&K4)
- 1.6 Methods of distinguishing geometrical isomers using chemical and physical methods – cyclisation, by converting into compounds of known configuration, method of optical activity, acid strengths, dipole moment, melting point, boiling point, solubility, density, refractive index. (K1,K2,K3&K4)

**Unit II:****(12 Hours)**

- 2.1 Tautomerism – definition, cause of tautomerism, acidity of alpha hydrogen, reasons for acidity. (K1,K2,K3&K4)
- 2.2 Keto- enol tautomerism- evidences in favour of the keto and enol form, enolisation- acid - base catalysed mechanisms. (K1, K2, K3& K4)
- 2.3 Nitro-acinitro tautomerism and amido-imidol tautomerism – evidences. (K1,K2,K3&K4)
- 2.4 Conformational analysis- conformational analysis of ethane including energy diagrams. (K1,K2,K3&K4)
- 2.5 Conformational analysis of n- butane including energy diagrams. (K1,K2,K3&K4)
- 2.6 Conformers of cyclohexane – axial and equatorial bonds, ring flipping showing axial equatorial inter conversions, conformers of mono and di substituted cyclohexanes – 1,2 and 1,3 interactions.(K1, K2, K3& K4)

**Unit III:****(12 Hours)**

- 3.1 Active methylene group – characteristic reactions of active methylene groups in acetoacetic ester and its uses. (K1,K2,K3&K4)
- 3.2 Characteristic reactions of malonic ester and cyano acetic esters and their synthetic uses. (K1,K2,K3&K4)
- 3.3 Basic concepts of organic photochemistry. (K1,K2,K3&K4)
- 3.4 Photochemistry of carbonyl compounds –Norrish type I and II reactions. (K1,K2,K3&K4)
- 3.5 Photo reduction, photo addition. (K1,K2,K3&K4)
- 3.6 Photochemical rearrangement (di-pi methane rearrangement), Paterno- Buchi reaction, Barton reaction and Photo Fries reaction. (K1,K2,K3&K4)

**Unit IV:****(12 Hours)**

- 4.1 Reaction Mechanisms – mechanism and applications of Aldol, Benzoin and Claisen condensations.(K1, K2, K3& K4)

- 4.2 Darzen condensation, Cannizaro, Reformatsky and Perkin reactions – mechanism and applications. (K1, K2, K3 & K4)
- 4.3 Micheal addition, Knoevenagal and haloform reactions – mechanism and applications. (K1, K2, K3 & K4)
- 4.4 Dakin, Wittig and Dieckmann reactions – mechanism and applications. (K1, K2, K3 & K4)
- 4.5 Mechanism of reduction with  $\text{NaBH}_4$  and  $\text{LiAlH}_4$ . (K1, K2, K3 & K4)
- 4.6 Wolf Kishner and MPV reduction – mechanism and applications. (K1, K2, K3 & K4)

**Unit V:**

**(12 Hours)**

- 5.1 Molecular rearrangements – classification as anionotropic, cationotropic and inter molecular, intra molecular. (K1, K2, K3 & K4)
- 5.2 Mechanism, evidence for carbonium ion intermediate formation, migratory aptitude, inter / intra molecular rearrangement. Migration to electron deficient carbon atom – Pinacol-Pinacolone rearrangement. (K1, K2, K3 & K4)
- 5.3 Rearrangement involving electron deficient nitrogen atom- Beckmann rearrangement, migration to electron deficient oxygen – Baeyer Villiger oxidation. (K1, K2, K3 & K4)
- 5.4 Rearrangement of aromatic compounds- benzidine rearrangement. (K1, K2, K3 & K4)
- 5.5 Rearrangements involving sigmatropic shifts – Claisen and Paracaisen rearrangement. (K1, K2, K3 & K4)
- 5.6 Rearrangements to electron rich carbon atom – Favorskii rearrangements. (K1, K2, K3 & K4)

**SEMESTER V**  
**UCCHI20 – PHYSICAL CHEMISTRY**

<b>Year: III</b>	<b>Course Code</b>	<b>Title of the Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>SEM: V</b>	UCCHI20	Physical Chemistry	Theory	Core	5	4	100

**Learning Objectives:**

1. To understand the importance of chemical kinetics and the theories on reaction rates, catalysis and adsorption.
2. To gain knowledge about photophysical and photochemical processes.
3. To understand the applications of phase rule through the study of one component and two component systems.
4. To gain an understanding on catalysis, adsorption and enzyme catalysis.

**Course Outcomes:**

The Learners will be able to

1. Demonstrate the plausible mechanisms based on the study of the kinetics of chemical reactions.
2. Describe the theories developed to understand the reaction kinetics of simple and complex reactions.
3. Explain the basic principles of photo chemistry, deduce rate laws of photochemical reactions and discuss the applications of photo physical processes.
4. Apply Phase rule to study one component and two component systems and interpret phase diagrams.
5. Apply the knowledge gained about catalysis and adsorption to deduce the kinetics of homogeneous and heterogeneous surface reactions.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	M
CO2	H	M	H	H	H	M
CO3	H	M	H	H	H	M
CO4	H	M	H	H	H	M
CO5	H	M	H	H	H	M

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	L	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	L	M	H
CO5	H	H	H	M	M	H

**Unit I:****(15 Hours)**

- 1.1 Chemical Kinetics – scope of chemical kinetics, rate, rate constant and rate law. Factors that affect the rate of the reaction. Measurements of reaction rates. Order and molecularity of chemical reactions- Differences between order and molecularity. Methods to determine the rate of the reactions. (K1,K2,K3 & K4)
- 1.2 Derivation of rate constants of first, second, third and zero order reactions and derivation for time for half change. (K1,K2,K3 & K4)
- 1.3 Examples of first, second, third and zero order reactions and study of kinetics of hydrolysis of ester, inversion of cane sugar, decomposition of  $\text{H}_2\text{O}_2$ , thermal decomposition of acetaldehyde and gaseous reactions involving NO. (K1,K2,K3 & K4)
- 1.4 Methods to determine the order of chemical reactions – Integration method, Graphical method, Vant Hoff differential method, Method using half life period and Ostwald's dilution method. (K1,K2,K3 & K4)
- 1.5 Experimental methods in the study of kinetics of reactions- Volumetry, Manometry, Polarimetry, Dilatometry and Colorimetry. (K1,K2,K3 & K4)
- 1.6 Effect of temperature on the rate of reactions –Arrhenius equation and concept of energy of activation. (K1,K2,K3 & K4)

**Unit II:****(15 Hours)**

- 2.1 The Collision theory of bimolecular reactions and derivation of rate constant. (K1,K2,K3 & K4)
- 2.2 Theory of unimolecular reactions- Lindemann's theory, draw backs of collision theory. (K1,K2,K3 & K4)
- 2.3 Theory of Absolute Reaction Rates based on thermodynamics. Derivation for the rate constant of a bimolecular reaction based on ARRT. (K1,K2,K3 & K4)
- 2.4 Comparison of Collision theory and ARRT. (K1,K2,K3 & K4)
- 2.5 Significance of entropy, enthalpy and free energy of activation and determination of  $\Delta G^*$ ,  $\Delta H^*$  and  $\Delta S^*$ .(K1,K2,K3 & K4)
- 2.6 Complex reactions: types – consecutive, parallel, reversible and chain reactions (no derivation, only examples). (K1,K2,K3 & K4)

**Unit III:****(15 Hours)**

- 3.1 Photochemistry- differences between thermal and photochemical reactions. Laws of light absorption – Beer's law and Beer Lambert's law. (K1,K2,K3 & K4)
- 3.2 Laws of photochemistry – Grotthus Draper's law and Stark Einstein's law. (K1,K2,K3 & K4)
- 3.3 Jablonski diagram –singlet and triplet states, qualitative description of fluorescence and phosphorescence. (K1,K2,K3 & K4)
- 3.4 Primary and secondary reactions – quantum yield – experimental determination by using Eder's and Uranyl oxalate actinometers. (K1,K2,K3 & K4)
- 3.5 Kinetics of Hydrogen – Bromine reaction, photolysis of aldehyde- Rice Herzfeld mechanism. (K1,K2,K3 & K4)
- 3.6 Photosensitization, chemiluminescence and bioluminescence. (K1,K2,K3 & K4)

**Unit IV:****(15 Hours)**

- 4.1 Phase equilibria – Gibbs phase rule –statement, definition of terms and derivation of phase rule. (K1,K2,K3 & K4)
- 4.2 One component systems – water system and sulphur system. (K1,K2,K3 & K4)
- 4.3 Reduced phase rule – two component systems: Pb – Ag system, desilverization of Pb-Pattinson’s process. Thermal analysis and cooling curves. (K1,K2,K3 & K4)
- 4.4 Compound formation with congruent melting point: Zn-Mg system and FeCl<sub>3</sub>-H<sub>2</sub>O system, Freezing mixtures. (K1,K2,K3 & K4)
- 4.5 Incongruent melting point: Na-K system. (K1,K2,K3 & K4)
- 4.6 CST and effect of impurity on Phenol – Water system. (K1,K2,K3 & K4)

**Unit V:****(15 Hours)**

- 5.1 Catalysis-definition and characteristics of a catalyst –homogeneous catalysis-function of a catalyst in terms of Gibbs free energy of activation. (K1,K2,K3 & K4)
- 5.2 Heterogeneous catalysis- Mechanisms of surface reactions –Simple decompositions on surfaces - Kinetics of unimolecular surface reactions-Langmuir Hinshelwood mechanism. (K1,K2,K3 & K4)
- 5.3 Enzyme catalysis- characteristics of enzymes. Derivation of Michaelis Menton equation. (K1,K2,K3 & K4)
- 5.4 Adsorption – physisorption and chemisorption -differences. (K1,K2,K3 & K4)
- 5.5 Freundlich adsorption isotherm - Langmuir adsorption isotherm. (K1,K2,K3 & K4)
- 5.6 BET equation (no derivation) - applications of adsorption. (K1,K2,K3 & K4)

## SEMESTER V

### UECHA20 - ELECTIVE I A: ANALYTICAL CHEMISTRY

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code</b> UECHA20	<b>Title of the Course</b> Analytical Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-----------------------------------	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To learn the principles behind gravimetric analysis.
2. To acquire an in depth knowledge on the principle, instrumentation, working and applications of NMR, IR, Raman, UV-Visible, Raman and Mass Spectroscopy.

#### Course Outcomes:

The Learners will be able to

1. Summarize the various steps involved in gravimetric analysis.
2. Demonstrate the principles and techniques involved in paper, column, TLC and ion exchange chromatography and their applications.
3. Explain the absorption laws, instrumentation and working of UV-Visible spectrophotometers.
4. Elaborate the principle, instrumentation of IR spectroscopy for the identification of simple organic molecules.
5. Explain the principle involved in NMR and interpret NMR spectra of simple organic compounds, describe the principle, instrumentation of Mass spectroscopy and determine the molecular formulae of simple organic molecules.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H
CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (15 Hours)

- 1.1 Principles of gravimetric analysis—characteristics of precipitating agents, choice of precipitants and conditions of precipitation. (K1, K2, K3 & K4)
- 1.2 Organic precipitants, specific and selective precipitants. (K1, K2, K3 & K4)
- 1.3 Steps in gravimetric analysis- sequestering agents, co-precipitation-mechanism of co-precipitation. (K1, K2, K3 & K4)
- 1.4 Post precipitation, differences between co precipitation and post precipitation. (K1, K2, K3 & K4)
- 1.5 Solubility product and precipitation- reduction of error-precipitation from homogeneous solutions. (K1, K2, K3 & K4)
- 1.6 Types, care and use of crucibles. (K1, K2, K3 & K4)

**Unit II:** (15 Hours)

- 2.1 Chromatography –principle, classifications. (K1, K2, K3 & K4)
- 2.2 Column chromatography –principle, adsorbents, solvents, apparatus, experimental procedure, applications. (K1, K2, K3 & K4)
- 2.3 Paper chromatography – principle, experimental procedure,  $R_f$  value- factors affecting  $R_f$  value, technique. (K1, K2, K3 & K4)
- 2.4 Precautions taken and applications of paper chromatography, two dimensional-radial paper chromatography. (K1, K2, K3 & K4)
- 2.5 Thin layer chromatography- principle, experimental method, superiority of TLC,  $R_f$  value, factors affecting  $R_f$  value. (K1, K2, K3 & K4)
- 2.6 Ion exchange chromatography- principle-types and properties of ion exchangers, applications. Specific examples- separation of chloride and bromide, cadmium and zinc. (K1, K2, K3 & K4)

**Unit III:** (15 Hours)

- 3.1 Concepts in spectroscopy- introduction, types of spectra-radiant energy, wave and particle properties of electromagnetic radiation. (K1, K2, K3 & K4)
- 3.2 Flame photometer – Principle and working. (K1, K2, K3 & K4)
- 3.3 UV – Visible spectroscopy– Born-Oppenheimer approximation, absorption laws, deviation from Beer- Lambert's law. (K1, K2, K3 & K4)
- 3.4 Instrumentation –photocolorimeter and spectrophotometer, block diagrams with description of components, working and applications. (K1, K2, K3 & K4)
- 3.5 Electronic transitions –types- chromophore and auxochromes, factors influencing  $\lambda_{max}$  and  $\Sigma_{max}$ . (K1, K2, K3 & K4)
- 3.6 Sensors—definition- chemical and physical sensors with examples. (K1, K2, K3 & K4)

**Unit IV:** (15 Hours)

- 4.1 Infrared Spectroscopy –principle, molecular vibrations, types with reference to linear and nonlinear molecules. (K1, K2, K3 & K4)
- 4.2 Vibrational frequencies, factors influencing vibrational frequencies. (K1, K2, K3 & K4)
- 4.3 Instrumentation –block diagram, source, monochromator and sample cell. (K1, K2, K3 & K4)
- 4.4 Sampling techniques. (K1, K2, K3 & K4)
- 4.5 Detectors and recorder, working of IR. (K1, K2, K3 & K4)
- 4.6 Identification of simple organic molecules from characteristic absorption bands. (K1, K2, K3 & K4)

**Unit V:****(15 Hours)**

- 5.1 Nuclear magnetic resonance spectroscopy –principle, instrumentation, block diagram with different components, chemical shift, factors influencing chemical shift, number of signals. (K1, K2, K3 & K4)
- 5.2 Shielding mechanism – spin-spin splitting or coupling, coupling constants. (K1, K2, K3 & K4)
- 5.3 NMR spectra of simple organic compounds- alcohols, aldehydes and ketones. (K1, K2, K3 & K4)
- 5.4 Mass Spectroscopy–basic principles, instrumentation with block diagram. (K1, K2, K3 & K4)
- 5.5 Molecular peak – base peak, isotopic peak, metastable peak, their uses, fragmentation of alcohols, aldehydes and aromatic hydrocarbons. Nitrogen rule. (K1, K2, K3 & K4)
- 5.6 Determination of molecular formula with examples. (K1, K2, K3 & K4)

**Text Books:**

1. R. Gopalan *et al.*, Elements of Analytical Chemistry, 2<sup>nd</sup> Edition, Sultan Chand & Sons, New Delhi, 1993.

## SEMESTER V

### UECHB20 – ELECTIVE I B: BASICS OF COMPUTER PROGRAMMING IN C AND ITS APPLICATIONS IN CHEMISTRY

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code</b> UECHB20	<b>Title of the Course</b> Basics of Computer programming in C and its applications in chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-----------------------------------	-------------------------------	---	------------------------------	------------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To introduce the basics of computers.
2. To learn C language and its applications and solving problems in chemistry.

#### Course Outcomes:

The Learners will be able to

1. Define and relate software and hardware.
2. Describe the various components of C language.
3. Demonstrate the uses of functions, arrays and pointers.
4. Apply C language for solving problems in chemistry.
5. Apply C language to calculate specific terms in Chemistry.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	M	M
CO3	H	H	H	H	M	M
CO4	H	H	H	H	M	M
CO5	H	H	H	H	M	M

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

**Unit I:****(15 hours)**

- 1.1 Basic computer organization, processors. (K1, K2, K3 & K4)
- 1.2 Types of memory- main memory and secondary memory, storage hierarchy. (K1, K2, K3 & K4)
- 1.3 Basics of operating systems. (K1, K2, K3 & K4)
- 1.4 Software – relationship between hardware and software – types of software. (K1, K2, K3 & K4)
- 1.5 Planning the computer program – algorithm and flowcharts. (K1, K2, K3 & K4)
- 1.6 Computer languages – machine language, assembly language, assembler, compiler, interpreter and programming languages. (K1, K2, K3 & K4)

**Unit II:****(15 hours)**

- 2.1 C language – introduction and its historical development. (K1, K2, K3 & K4)
- 2.2 Structure of C Programming – the main () function, character set, variables, constants, operators, input/output functions. (K1, K2, K3 & K4)
- 2.3 Variables - local variables, global variables and formal parameters, Constants. (K1, K2, K3 & K4)
- 2.4 Operators - Arithmetic, Relational and logical, Bitwise operators. (K1, K2, K3 & K4)
- 2.5 Input & Output – Formated input and output – scanf() and printf( ). (K1, K2, K3 & K4)
- 2.6 Unformatted input and output - getchar(), putchar( ) , gets( ) and puts( ). (K1, K2, K3 & K4)

**Unit III:****(15 hours)**

- 3.1 Control structures –Control statements in C -*if* statement, *if-else* statement, Nested *if-else* statement. (K1, K2,K3 & K4)
- 3.2 The *switch* statement, *goto*and the *exit* ()function. (K1,K2,K3 & K4)
- 3.3 Looping in C language –*for* loop, *while* loop, *do-while* loop and continue statements in loops. (K1, K2,K3 & K4)
- 3.4 Functions - Functions with Arguments, Functions with Non-integer Arguments, Functions with no Arguments and Recursive Functions.(K1, K2,K3 & K4)
- 3.5 Arrays- initializing array elements, Character arrays, two-dimensional arrays. (K1, K2,K3 & K4)
- 3.6 Pointers – Array declaration using pointers-Pointers to pointers. (K1, K2, K3 & K4)

**Unit IV:****(15 hours)**

- 4.1 Applications in Chemistry – calculation of the radius of the first Bohr orbit for an electron. (K1,K2, K3 & K4)
- 4.2 Calculation of half-life time for an integral order reaction. (K1, K2, K3 & K4)
- 4.3 Calculation of molarity, molality and normality of a solution. (K1, K2, K3 & K4)
- 4.4 Calculation of pressure of ideal or Vanderwaal’s gas. (K1, K2, K3 & K4)
- 4.5 Calculation of electronegativity of an element using Pauling’s relation.(K1, K2, K3 & K4)

4.6 Determination of lattice energy of a crystal using Born- Lande equation.(K1, K2, K3 & K4)

**Unit V:**

**(15 hours)**

5.1 Applications in Chemistry – Calculation of empirical formulae of hydro carbon.(K1, K2, K3 & K4)

5.2 Calculation of reduced mass of a few diatomic molecules.(K1, K2, K3 & K4)

5.3 Determination of the wave numbers of spectral lines of hydrogen atom.(K1, K2, K3 & K4)

5.4 Calculation of work of expansion in adiabatic process.(K1, K2, K3 & K4)

5.5 Calculation of pH and solubility product.(K1, K2, K3 & K4)

5.6 Calculation of standard deviation and correlation coefficient.(K1, K2, K3 & K4)

**Reference Books:**

## SEMESTER V

### USCHC520-SKILL BASED ELECTIVE: SMALL SCALE CHEMISTRY

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code</b> USCHC520	<b>Title of the Course</b> Small Scale Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	------------------------------	--	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To impart knowledge on small-scale industries.
2. To acquire skills in the manufacture of various small-scale products.

#### Course Outcomes:

The Learners will be able to

1. Understand the laws, role and steps involved in starting small scale industries.
2. Acquire skills to prepare soaps and detergents.
3. Describe the characteristics and uses of cosmetics and perfumes.
4. Gain skills in the manufacture of selected small-scale products.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H

#### Unit I: Small - Scale Industry

- 1.1. Objectives and characteristics of small-scale industries (K1 & K2)
- 1.2. Types of SSI, role of SSI in Indian economy. (K1 & K2)
- 1.3. Steps in starting SSI (K1 & K2)
- 1.4. Laws for SSI, Problems of SSI (K1 & K2)
- 1.5. Finance management, Quality control – definition and advantages. (K1 & K2)

- 1.6. Marketing and branding, Advertising – definition, objectives, advertising media. (K1 & K2)

## **Unit II: Soaps and Detergents**

- 2.1. Soaps- definition, fatty and non- fatty raw materials. (K1 & K2)
- 2.2. Types of soaps, manufacture of laundry soap and bathing soap. (K1 & K2)
- 2.3. Mechanism of cleansing action of soap. (K1 & K2)
- 2.4. Composition, preparation and advantages of herbal soaps. (K1 & K2)
- 2.5. Detergents - classification of surfactive agents (LABSA), manufacture of detergents. (K1 & K2)
- 2.6. Shampoo – composition and manufacture of egg and herbal shampoo, anti-dandruff and conditioners. (K1 & K2)

## **Unit III: Cosmetics and Perfumes**

- 3.1. Cosmetics – definition and history. (K1 & K2)
- 3.2. Kinds of cosmetics. (K1 & K2)
- 3.3. Preparation of face powder, face cream and lipstick. (K1 & K2)
- 3.4. Perfumes - definition, essential ingredients in perfumes. (K1 & K2)
- 3.5. Classification of essential oils. (K1 & K2)
- 3.6. Preparation of perfumes. (K1 & K2)

## **Unit IV: Miscellaneous Small-Scale Products**

- 4.1. Camphor – production, biosynthesis and applications. (K1 & K2)
- 4.2. Bleaching powder – preparation, properties and uses. (K1 & K2)
- 4.3. Biogas- composition, production and uses. (K1 & K2)
- 4.4. Handmade paper from bagasse- composition of bagasse and uses. (K1 & K2)
- 4.5. Asofoetida – composition, cultivation, manufactures and uses. (K1 & K2)
- 4.6. Composition and manufacture of safety matches and agarbattis. (K1 & K2)

## **Unit V: Miscellaneous Small-Scale Products**

- 5.1. Recycling of synthetic organic polymers – applications of PET and PVC. (K1 & K2)
- 5.2. Recycling of synthetic organic polymers – applications of HDPE and polystyrene. (K1 & K2)
- 5.3. Reverse osmosis of water – production and applications. (K1 & K2)
- 5.4. Coconut oil – manufacture by dry and wet process and uses. (K1 & K2)
- 5.5. Vulcanization of rubber, making an eraser. (K1 & K2)
- 5.6. Pencils – forms of graphite, adhesion and lengthwise graphitization method & uses. (K1 & K2)

**SEMESTER VI****UCCHJ20 – COORDINATION CHEMISTRY**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code</b> UCCHJ20	<b>Title of the Course</b> Coordination Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

**Learning Objective:**

1. To give students a thorough knowledge on Coordination Chemistry.

**Course Outcomes:**

The Learners will be able to

1. Define the terms involved in coordination chemistry and recall IUPAC nomenclature of coordination compounds and to explain the concept of chelation and illustrate the isomerism exhibited by coordination complexes.
2. Explain and compare Werner, Sidgwick and Valence Bond theories of bonding in coordination compounds.
3. Describe the various aspects of Crystal Field Theory and its applications.
4. Explain the importance of MOT, construct molecular orbital diagrams and to compare MOT with CFT.
5. Describe the synthesis, properties, uses, bonding, hybridization and structures of carbonyls of Ni, Cr, Fe, Co, Mn, Mo and W.

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	H	H	H	H
CO2	H	L	H	H	H	H
CO3	H	L	H	H	H	H
CO4	H	L	H	H	H	H
CO5	H	L	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

**Unit I:** (12 Hours)

- 1.1 Co-ordination compounds: Molecular compounds, difference between double salts and complex compounds, definition of terms used, classification of ligands – based on denticity and charge. (K1, K2, K3 & K4)
- 1.2 Chelation – tendency of poly dentate ligands to form chelates and applications of chelate formation. (K1, K2, K3 & K4)
- 1.3 Nomenclature of coordination compounds. (K1, K2, K3 & K4)
- 1.4 Isomerism in complexes: structural isomerism - conformation isomerism, ionization isomerism, hydrate isomerism, linkage isomerism, ligand isomerism, co-ordination isomerism, coordination position isomerism and polymerization isomerism. (K1, K2, K3 & K4)
- 1.5 Geometrical isomerism in 4- and 6- coordinate complexes. (K1, K2, K3 & K4)
- 1.6 Optical isomerism - optical activity, conditions, optical isomerism in 4- and 6- coordinated complexes. (K1, K2, K3 & K4)

**Unit II:** (12 Hours)

- 2.1 Theories of coordination compounds - Werner's theory – postulates, designation and formation of Co(III) ammine complexes, experimental verification. (K1, K2, K3 & K4)
- 2.2 Sidgwick theory – electronic concept of coordinate bond, EAN rule, limitations. (K1, K2, K3 & K4)
- 2.3 Theory of bonding - valence bond theory – postulates. (K1, K2, K3 & K4)
- 2.4 VBT as applied to outer orbital and inner orbital octahedral complexes. (K1, K2, K3 & K4)
- 2.5 VBT as applied to tetrahedral and square planar complexes - hybridization, geometry and magnetic properties. (K1, K2, K3 & K4)
- 2.6 Failures of Werner's, Sidgwick's and Pauling's theories. (K1, K2, K3 & K4)

**Unit III:** (12 Hours)

- 3.1 Crystal Field theory – salient features, splitting of d - orbitals in octahedral, tetrahedral and square planar complexes. (K1, K2, K3 & K4)
- 3.2 Crystal field stabilization energy - factors affecting the magnitude of  $\Delta_o$  - spectrochemical series. (K1, K2, K3 & K4)
- 3.3 Filling up  $t_{2g}$  and  $e_g$  orbitals with electrons in octahedral and tetrahedral complexes - low spin and high spin complexes. (K1, K2, K3 & K4)
- 3.4 Calculation of crystal field stabilization energy values of octahedral and tetrahedral complexes, uses of CFSE values. (K1, K2, K3 & K4)
- 3.5 Applications of CFT - explanation of magnetic properties, colour and geometry. (K1, K2, K3 & K4)
- 3.6 Limitations of CFT, comparison between VBT and CFT. (K1, K2, K3 & K4)

**Unit IV:** (12 Hours)

- 4.1 Molecular Orbital theory – need, introduction, construction of Coulson's MO diagram for CO. (K1, K2, K3 & K4)

- 4.2 Covalency in transition metal complexes - evidences for covalency. Molecular Orbital theory - postulates, metal orbitals and LGOs suitable for  $\sigma$ -bonding in octahedral geometry. (K1, K2, K3 & K4)
- 4.3 Construction of qualitative MO energy level diagrams for  $\sigma$  -bonding in octahedral complexes. (K1, K2, K3 & K4)
- 4.4 Metal orbitals and LGOs suitable for  $\pi$  -bonding in octahedral geometry. (K1, K2, K3 & K4)
- 4.5 Effect of  $\pi$ -bonding on the magnitude of  $\Delta_o$  – construction of  $\pi$  MOs for donor and acceptor ligands, relation between pi bonding ability of ligands and spectrochemical series. (K1, K2, K3 & K4)
- 4.6 Comparison between CFT and MOT - similarities and differences. (K1, K2, K3 & K4)

#### Unit V:

(12 Hours)

- 5.1 Pi acceptor ligands: metallic carbonyls – synergic effect, synthesis, properties and uses of carbonyls of Ni, Cr, Mo and W. (K1, K2, K3 & K4)
- 5.2 Synthesis, properties and uses of carbonyls of iron –  $\text{Fe}(\text{CO})_5$ ,  $\text{Fe}_2(\text{CO})_9$  and  $\text{Fe}_3(\text{CO})_{12}$ . (K1, K2, K3 & K4)
- 5.3 Carbonyls of Co and Mn – synthesis, properties and uses. (K1, K2, K3 & K4)
- 5.4 Bonding, hybridization and structures of carbonyls of Ni, Cr, Mo and W. (K1, K2, K3 & K4)
- 5.5 Bonding, hybridization and structures of carbonyls of Fe. (K1, K2, K3 & K4)
- 5.6 Bonding, hybridization and structures of carbonyls of Co and Mn. (K1, K2, K3 & K4)

**SEMESTER VI****UCCHK20 – ELECTRO CHEMISTRY**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code</b> UCCHK20	<b>Title of the Course</b> Electro Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

**Learning Objectives:**

1. To provide an in-depth study on electrical conductance and electro motive force.
2. To highlight the working of different types of electrodes and electro chemical cells.
3. To throw light on their working and applications.
4. To understand hydrogen over voltage, decomposition potential, lead storage battery and fuel cells.

**Course Outcomes:**

The Learners will be able to

1. Apply the laws on electrolysis and definitions of specific, equivalent and molar conductance to the working of electrolytic cells.
2. Illustrate the Debye Huckel's theory of strong electrolytes.
3. Explain the use of electrical energy in bringing about chemical reactions and how chemical reactions can produce electrical energy so has to design cells and batteries.
4. Apply chemical cells and concentration cells for determining the valency of mercurous ion, transport number, solubility and solubility product.
5. Demonstrate the knowledge gained in the study of irreversible electrode processes. And illustrate the principle and applications of fuel cells.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	M	M
CO3	H	H	H	H	M	M
CO4	H	H	H	H	M	M
CO5	H	H	H	H	M	M

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

**Unit I:****(12 Hours)**

- 1.1 Electrochemistry - conductance—metallic and electrolytic conductors, resistance, specific resistance, specific conductance, equivalent conductance and molar conductance – terms, definitions and units. (K1,K2,K3 & K4)
- 1.2 Measurement of conductance based on Wheatstone bridge principle.(K1,K2,K3 & K4)
- 1.3 Variation of conductance with dilution for strong and weak electrolytes (qualitative explanation) (K1,K2,K3 & K4)
- 1.4 Transport number and its determination by Hittorf's method by using Pt and Ag electrodes. (K1,K2,K3 & K4)
- 1.5 Ionic mobility – determination of ionic mobility, effect of temperature and concentration on ionic mobility. (K1,K2,K3 & K4)
- 1.6 Ionic conductance - Kohlrausch's law and its applications. (K1,K2,K3 & K4)

**Unit II:****(12 Hours)**

- 2.1 Theory of strong electrolytes - Debye -Huckel's theory- postulates, Debye Huckel limiting law and verification, Debye Huckel Bronsted equation. (K1,K2,K3 & K4)
- 2.2 Debye Huckel Onsager theory-verification of Onsager equation,Wein effect and Debye Falkenhagen effect. (K1,K2,K3 & K4)
- 2.3 Ionic strength and calculation of ionic strength. (K1,K2,K3 & K4)
- 2.4 Activity and activity coefficients of strong electrolytes. Mean ionic activity and mean ionic activity coefficients. (K1,K2,K3 & K4)
- 2.5 Applications of conductivity measurements – degree of hydrolysis and solubility product. (K1,K2,K3 & K4)
- 2.6 Conductometric titrations- principle, experimental techniques and sketch of curves of various types of titrations – Acid - Base, mixture of acids versus base and Precipitation titrations. Advantages of conductometric titrations. (K1,K2,K3 & K4)

**Unit III:****(12 Hours)**

- 3.1 EMF –construction of an electrochemical cell, definition of electrode and cell potentials, conventions regarding sign of emf, cell reaction and emf, Relationship between heat energy and electrical energy. Galvanic cells-reversible and irreversible cells. (K1,K2,K3 & K4)
- 3.2 EMF and its measurement based on Poggendorff compensation principle. (K1,K2,K3 & K4)
- 3.3 Types of electrodes – metal-metal ion, gas, metal-metal insoluble salt, amalgam and oxidation-reduction electrodes. Reference electrodes: Primary reference electrode-Hydrogen electrode, Secondary reference electrode-Calomel electrode. (K1,K2,K3 & K4)
- 3.4 Derivation of Nernst equation for electrode potentials, Thermodynamics and emf-derivation of  $\Delta G$ ,  $\Delta H$ ,  $\Delta S$  from emf data. (K1,K2,K3 & K4)
- 3.5 Standard cell – working of Weston saturated and unsaturated standard cells. (K1,K2,K3 & K4)
- 3.6 Electrochemical series and its applications. (K1, K2,K3 & K4)

**Unit IV:****(12 Hours)**

- 4.1 Chemical and concentration cells – chemical cells with and without transference and their applications. (K1,K2,K3 & K4)
- 4.2 Concentration cells – electrode concentration cells without transference. (K1,K2,K3 & K4)
- 4.3 Electrolytic concentration cells without transference- examples and derivation of expressions for their emf's. (K1,K2,K3 & K4)
- 4.4 Electrolytic concentration cells with transference - examples and derivation of expressions for their emf's – liquid junction potential. Functions of a salt bridge(K1,K2,K3 & K4)
- 4.5 Applications of emf measurements-determination of pH using hydrogen, quinhydrone and glass electrodes. (K1,K2,K3 & K4)
- 4.6 Potentiometric titrations- acid - base, redox and precipitation titrations- advantages of potentiometric titrations. Titration of polybasic acids versus a base. (K1,K2,K3 & K4)

**Unit V:****(12 Hours)**

- 5.1 Applications of concentration cells – determination of valency of ions and transport number. (K1,K2,K3 & K4)
- 5.2 Determination of ionic product of water and solubility product. (K1,K2,K3 & K4)
- 5.3 Polarization – decomposition potential, back emf, definition and experimental determination. (K1,K2,K3 & K4)
- 5.4 Hydrogen over voltage – definition, experimental determination and application. Electroplating. (K1,K2,K3 & K4)
- 5.5 Storage cells –lead acid battery – mechanism of discharging and recharging. (K1,K2,K3 & K4)
- 5.6 Fuel cells – types of fuel cells – low temperature fuel cells and high temperature fuel cells. Hydrogen – Oxygen fuel cell. (K1,K2,K3 & K4)

## SEMESTER VI

### UECHC20 – ELECTIVE II A: CHEMISTRY OF NATURAL PRODUCTS

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code</b> UECHC20	<b>Title of the Course</b> Chemistry of Natural Products	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------------	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

To impart knowledge on natural products such as carbohydrates, amino acids, proteins, terpenes, alkaloids, vitamins, carotenoids, anthocyanins and flavones.

#### Course Outcomes:

The Learners will be able to

1. Explain the structural elucidation, properties and reactions of glucose, fructose, sucrose, maltose, starch and cellulose.
2. Elaborate the preparation, properties and reactions of alpha aminoacids, synthesis of peptides and classification and structure of proteins.
3. Explain the structure and applications DNA, RNA and processes like transcription and translation in protein synthesis.
4. Illustrate the sources, properties and structural elucidation of alkaloids and terpenoids.
5. Elaborate the sources, properties, structural elucidation and synthesis of flavonoids, carotenoids, anthocyanins and vitamins.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:****(15 Hours)**

- 1.1 Carbohydrates - classification, configuration-D,L, Ascending of carbon chain in sugars- Kiliani-Fischer synthesis, descending of carbon chain in sugars- Ruff's synthesis.(K1, K2, K3 & K4)
- 1.2 Constitution of glucose and fructose. (K1, K2, K3 & K4)
- 1.3 Reactions of glucose and fructose - osazone formation. Mutarotation and its mechanism. (K1, K2, K3 & K4)
- 1.4 Cyclic structure - pyranose and furanose forms, determination of ring size - Haworth projection formula. (K1, K2, K3 & K4)
- 1.5 Epimerisation, inter conversion of aldoses and ketoses. (K1, K2, K3 & K4)
- 1.6 Sucrose, maltose, starch and cellulose - structural elucidation. (K1, K2, K3 & K4)

**Unit II:****(15 Hours)**

- 2.1 Amino acids and proteins - classification of amino acids - essential and non-essential amino acids. (K1, K2, K3 & K4)
- 2.2 Preparation of alpha amino acids- Strecker's synthesis, Gabriel Phthalimide synthesis. (K1, K2, K3 & K4)
- 2.3 Properties - zwitter ions, isoelectric points, reactions of amino group. (K1, K2, K3 & K4)
- 2.4 Reactions of carboxyl and both amino and carboxyl groups. (K1, K2, K3 & K4)
- 2.5 Peptide bond, Peptide synthesis, Proteins - classification based on physical and chemical properties and on physiological functions. (K1, K2, K3 & K4)
- 2.6 Primary and secondary structures of proteins - Helical and sheet structures, tertiary and quaternary structure. Denaturation and renaturation of proteins. (K1, K2, K3 & K4)

**Unit III:****(15 Hours)**

- 3.1 Nucleic acids – nucleoside, nucleotide, types of nucleic acids. (K1, K2, K3 & K4)
- 3.2 RNA and DNA – structures and differences. (K1, K2, K3 & K4)
- 3.3 Sequencing of DNA, synthesizing an oligonucleotide array.(K1, K2, K3 & K4)
- 3.4 DNA replication, transcription and translation - protein synthesis.(K1, K2, K3 & K4)
- 3.5 Introduction to lipids, classification, oils and fats.(K1, K2, K3 & K4)
- 3.6 Common fatty acids present in oils and fats, trans fats.(K1, K2, K3 & K4)

**Unit IV:****(15 Hours)**

- 4.1 Terpenes - classification, isoprene rule, source and structural elucidation of citral.(K1, K2, K3 & K4)
- 4.2 Source and structural elucidation of geraniol. (K1, K2, K3 & K4)
- 4.3 Source and structural elucidation of  $\alpha$  – pinene. (K1, K2, K3 & K4)
- 4.4 Alkaloids - classification, general methods of isolation and general methods of structural determination, source and structural elucidation of coniine. (K1, K2, K3 & K4)
- 4.5 Source and structural elucidation of piperine. (K1, K2, K3 & K4)
- 4.6 Source and structural elucidation of nicotine. (K1, K2, K3 & K4)

**Unit V :****(15 Hours)**

- 5.1 Carotenoids- introduction and general methods of structural determination. (K1, K2, K3 & K4)
- 5.2 Anthocyanins- introduction and general methods of structural determination. (K1, K2, K3 & K4)
- 5.3 Flavones- source, isolation, separation, purification. (K1, K2, K3 & K4)
- 5.4 Properties and structural elucidation of flavones. (K1, K2, K3 & K4)
- 5.5 Vitamins- source, classification, structural elucidation of Ascorbic acid. (K1, K2, K3 & K4)
- 5.6 Structural elucidation of thiamine. (K1, K2, K3 & K4)

## SEMESTER VI

### UECHD20 - ELECTIVE II B: POLYMER CHEMISTRY

<b>Year: III SEM: VI</b>	<b>Course Code</b> UECHD20	<b>Title of the Course</b> Polymer Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core-Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To expose the students to the fascinating trends in the field of polymer chemistry.
2. To study in detail the mechanisms, techniques, characterization and applications of polymers.

#### Course Outcomes:

The Learners will be able to

1. Classify polymers and determine the molecular weights of polymers by physical and chemical methods.
2. Describe the mechanisms of different types of polymerization reactions.
3. Summarize the types and techniques involved in polymer degradation.
4. Demonstrate the applications of industrial polymers and explain the role of conducting polymers.
5. Illustrate the various polymer processing techniques.

CO	PSO

#### Unit I:

(15 Hours)

- 1.1 Introduction to Polymer Science: monomers and oligomers. (K1, K2, K3 & K4)
- 1.2 Polymers and their characteristics. (K1, K2, K3 & K4)
- 1.3 Polymer structure: copolymers, tacticity, geometric isomers. (K1, K2, K3 & K4)

- 1.4 Classification of polymers: Natural, synthetic, linear, cross-linked and network, plastics, elastomers, fibres, homopolymers and co-polymers. (K1, K2,K3 &K4)
- 1.5 Bonding in Polymers: Primary and secondary bond forces in polymers: cohesive energy and decomposition of polymers. (K1, K2,K3 &K4)
- 1.6 Molecular weight and its determination –Chemical and physical methods. (K1, K2,K3 &K4)

**Unit II:**

**(15 Hours)**

- 2.1 Mechanism of Polymerization, chain growth polymerization, cationic and anionic.(K1,K2,K3 & K4)
- 2.2 Free radical polymerization- initiation, propagation and termination steps.(K1,K2,K3 & K4)
- 2.3 Coordination polymerization, solution and template polymerization.(K1,K2,K3 & K4)
- 2.4 Stereo regular polymers - Ziegler Natta polymers.(K1,K2,K3 & K4)
- 2.5 Step growth polymers – Polycondensation and Polyaddition polymerization.(K1,K2,K3 & K4)
- 2.6 Bulk and block polymerization, electrochemical polymerization.(K1,K2,K3 & K4)

**Unit III:**

**(15 Hours)**

- 3.1 Polymerization Technique –Bulk and Solution polymerization.(K1,K2,K3 & K4)
- 3.2 Suspension and emulsion polymerization.(K1,K2,K3 & K4)
- 3.3 Interfacial, plasma and gas phase polymerization.(K1,K2,K3 & K4)
- 3.4 Polymer Degradation -Types of Polymer Degradation- Thermal degradation, mechanical degradation.(K1,K2,K3 & K4)
- 3.5 Photodegradation and Photo stabilizers.(K1,K2,K3 & K4)
- 3.6 Chemical structure determination: Vibrational spectroscopy, Nuclear Magnetic Resonance Spectroscopy.(K1,K2,K3 & K4)

**Unit IV:**

**(15 Hours)**

- 4.1 Industrial Polymers: Raw material, preparation, fibre forming polymers, elastomeric material.(K1,K2,K3 & K4)
- 4.2 Thermoplastics- Polyethylene, Polypropylene, Polystyrene, Polyacrylonitrile, Poly Vinyl Chloride, Poly tetrafluoro ethylene, Nylon and Polyester.(K1,K2,K3 & K4)
- 4.3 Thermosetting Plastics: Phenol formaldehyde and epoxide resin.(K1,K2,K3 & K4)
- 4.4 Elastomers- Natural rubber and synthetic rubber, Buna -N, Buna-S and Neoprene.(K1,K2,K3 & K4)
- 4.5 Conducting Polymers - Elementary ideas; examples: poly sulphur nitriles, poly phenylene, poly aniline, poly pyrrole and poly acetylene.(K1,K2,K3 & K4)
- 4.6 Biodegradable Polymers.(K1,K2,K3 & K4)

**Unit V:****(15 Hours)**

- 5.1 Introduction to Polymer Processing –Processes: Mixing, Rolling and kneading, Pelletizing, Shredding and Grinding, Storage and transportation.(K1,K2,K3 & K4)
- 5.2 Pressureless Processing Techniques – casting, dipping, coating and foaming.(K1,K2,K3 & K4)
- 5.3 Polymer processing under pressure – Calendaring, Moulding – Compression, injection, extrusion, blow moulding.(K1,K2,K3 & K4)
- 5.4 Polymer additives- definition, requirement of additives, classification of additives.(K1,K2,K3 & K4)
- 5.5 Stabilizers – Antioxidants and thermal stabilizers.(K1,K2,K3 & K4)
- 5.6 Other additives: Fillers, plasticizers, fire retardants and colourants.(K1,K2,K3 & K4)

**SEMESTER VI****UECHE20 - ELECTIVE III A: APPLIED CHEMISTRY**

<b>Year: III SEM: VI</b>	<b>Course Code</b> UECHE20	<b>Title of the Course</b> Applied Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core-Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

**Learning Objectives:**

1. To impart knowledge on biological, dairy, leather, soil and dye chemistry.

**Course Outcomes:**

The Learners will be able to

1. Describe the digestion and absorption of carbohydrates, proteins and fats and describe the role of enzymes and physiological functions of hormones.
2. Recall the definition, constituents and physico-chemical properties of milk and indicate the composition of creams, butter, ghee and ice creams.
3. Demonstrate the chief processes involved in leather manufacture and treatment of tannery effluents
4. Classify and enumerate the properties of soils.
5. Determine the physico-chemical properties of water and illustrate reverse osmosis and ion-exchange methods.

CO	PSO

CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

**Unit I:** (15 Hours)

- 1.1 Biological Chemistry:Elementary treatment of digestion and absorption of carbohydrates, proteins and fats. (K1, K2, K3 &K4)
- 1.2 Elementary treatment of enzymes, cofactors, prosthetic groups and theory of enzyme action.(K1, K2, K3 &K4)
- 1.3 Physiological functions of adrenaline and thyroxin.(K1, K2,K3 &K4)
- 1.4 Physiological functions of oxytocin and insulin. (K1, K2, K3& K4)
- 1.5 Physiological functions of sex harmones.(K1, K2,K3 & K4)
- 1.6 Micronutrients and their biological role in human systems.(K1, K2, K3 & K4)

**Unit II:** (15 Hours)

- 2.1 Dairy Chemistry: Milk- Definition, Physicochemical properties of milk.(K1, K2,K3 &K4)
- 2.2 Constituents of milk and their physicochemical properties.(K1, K2,K3 & K4)
- 2.3 Chemical change taking place in milk due to processing parameters- boiling, pasteurization, sterilization and homogenization.(K1, K2, K3 &K4)
- 2.4 Definition and composition of creams, butter, ghee and icecreams. (K1, K2,K3 &K4)
- 2.5 Milk powder-definition, need for making powder. (K1, K2,K3 & K4)
- 2.6 Principles involved in drying process- spray drying and drum drying.(K1, K2,K3 & K4)

**Unit III:** (15 Hours)

- 3.1 Leather Chemistry: Introduction, chief process used in leather manufacture.(K1,K2,K3 & K4)
- 3.2 Structure of hide and skin.(K1, K2,K3 & K4)
- 3.3 Leather processing-process before tannage. (K1, K2, K3 & K4)
- 3.4 Tanning process- vegetable tanning and chrome tanning. (K1, K2, K3& K4)
- 3.5 Finishing process - dyeing and fat liquoring. (K1, K2, K3& K4)
- 3.6 Tannery effluent and by product problems and treatment. (K1, K2, K3 & K4)

**Unit IV:** (15 Hours)

- 4.1 Soil Chemistry: Introduction-soil classification. (K1, K2,K3 & K4)
- 4.2 Properties of soil, soil water, soil air, soil temperature, soil minerals, soil colloids, soil reaction and buffering. (K1,K2,K3 & K4)
- 4.3 Soil pH, soil acidity, soil salinity and alkalinity. (K1, K2,K3 & K4)
- 4.4 Cation Exchange Capacity and its significance. (K1, K2, K3 &K4)
- 4.5 Soil fertility and soil formation. (K1, K2,K3 &K4)
- 4.6 Nutrient cycle –Biological nitrogen fixation. (K1, K2, K3 & K4)

**Unit V:****(15 Hours)**

- 5.1 Water Chemistry: Sources of water. (K1, K2, K3 &K4)
- 5.2 Physical characteristics-colour, temperature, turbidity, Total solids, Total Dissolved Solids.(K1, K2, K3 &K4)
- 5.3 Chemical characteristics - Hardness, degree of hardness, temporary and permanent hardness, Scale formation, removal of hardness.(K1, K2, K3 &K4)
- 5.4 pH, Alkalinity, Dissolved Oxygen. .(K1, K2, K3 &K4)
- 5.5 Biological characteristics – Biological Oxygen Demand. (K1, K2, K3 &K4)
- 5.6 Reverse osmosis and ion exchange methods – principle and functions.(K1, K2, K3 &K4)

## SEMESTER VI

### UECHF20 - ELECTIVE III B - PHARMACEUTICAL CHEMISTRY

<b>Year : III</b> <b>SEM :VI</b>	<b>Course Code</b> UECHF20	<b>Title of the Course</b> Pharmaceutical Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-------------------------------------	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To give basic knowledge of the different terms used in pharmaceutical chemistry.
2. To know the examples, their actions, chemical compositions and uses of various drugs.
3. To study in detail the causes, symptoms and preventive measures of certain diseases.

#### Course Outcomes:

The Learners will be able to

1. Explain the basic pharmacological terms are used in pharmaceutical chemistry. Illustrate the selected Indian Medicinal plants and their uses.
2. Elaborate the definition, properties and therapeutic uses of sulphonamides, antibiotics, antiseptics and disinfectants.
3. Explain the role of analgesics and anesthetics.
4. Analyse the causes, symptoms and drugs used for the treatment of Cancer, AIDS, Epilepsy and Hypertension
5. Summarize the characteristics and classifications of cardiovascular drugs. Identify the common organic pharmaceutical aids.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:****(15 hours)**

- 1.1 Definition of the following terms -drug, nature and sources of drugs, pharmacy, pharmacodynamics, pharmacokinetics, pharmacology, molecular pharmacology, pharmacophore, toxicology. (K1,K2, K3 & K4)
- 1.2 Bacteria, virus, difference between bacteria and virus, fungi, vaccine. (K1,K2, K3 & K4)
- 1.3 Causes, symptoms and drugs for anaemia, jaundice, cholera, malaria and filarial. (K1,K2, K3 & K4)
- 1.4 Causes, symptoms and drugs for dengue fever, chikungunya, typhoid. (K1,K2, K3 & K4)
- 1.5 Diagnostic test for sugar, salt and cholesterol in blood and urine. (K1,K2, K3 & K4)
- 1.6 Indian medicinal plants - medicinal uses and chemical present in neem, keezhanelli, mango, adathoda, thoothuvalai, hibiscus,rose, tulsi, turmeric, curry leaves, ficus. (K1,K2, K3 & K4)

**Unit II:****(15 hours)**

- 2.1 Sulphonamides – definition, synthesis and therapeutic uses of prontosil, sulphathiozole. (K1,K2, K3 & K4)
- 2.2 Definition, synthesis and therapeutic uses of sulphafurazole and sulphapyridine. (K1,K2, K3 & K4)
- 2.3 SAR of prontosil. (K1,K2, K3 & K4)
- 2.4 Antibiotics – definition, conditions, classifications. Properties, therapeutic uses and structure activity relationship of penicillin. (K1,K2, K3 & K4)
- 2.5 Properties, therapeutic uses and structural activity relationship of chloramphenicol, tetracyclines. (K1,K2, K3 & K4)
- 2.6 Antiseptics and disinfectants-definition and distinction, phenolic and chlorocompounds(K1,K2, K3 & K4)

**Unit III:****(15 hours)**

- 3.1 Analgesics – definition, narcotic: natural, morphine and its derivatives, uses, SAR of morphine. (K1,K2, K3 & K4)
- 3.2 Synthetic - pethidine, methadone, morphinan, benzomorphan – disadvantages and uses. (K1,K2, K3 & K4)
- 3.3 Non-narcotic analgesics - salicylic acid and its derivatives, para-aminophenol derivatives, pyrazole derivative, indolyl and aryl acetic acid derivatives, ibuprofen, ketoprofen - therapeutic uses and adverse effects. (K1,K2, K3 & K4)
- 3.4 Anaesthetics – definition, characteristics, classifications. (K1,K2, K3 & K4)
- 3.5 Volatile general anaesthetics - ether, vinyl ether, chloroform, halothane, trichloroethylene, ethylchloride, nitrous oxide, cyclopropane – uses and disadvantages. (K1,K2, K3 & K4)
- 3.6 Non-volatile general anesthetics - thiopental sodium, methohexitone, propanidid. Local anesthetics: requisites, natural- cocaine. Synthetic - benzocaine, procaine-uses, side effects. (K1,K2, K3 & K4)

**Unit IV:****(15 hours)**

- 4.1 Cancer: definition, causes, treatment, drugs used (antineoplastics), alkylating agents, antimetabolites, plant products. (K1,K2, K3 & K4)
- 4.2 AIDS - causes, symptoms, prevention, AZT, DDC. (K1,K2, K3 & K4)
- 4.3 Hypoglycemic drugs, diabetes - types -causes, control, insulin- preparation, uses. Oral hypoglycemic agents. (K1,K2, K3 & K4)
- 4.4 Anticonvulsant agents - definition, types. Barbiturates, hydantoins, oxazolidene diones, succinimides. (K1,K2, K3 & K4)
- 4.5 Blood - grouping, composition, R<sub>n</sub> factor. (K1,K2, K3 & K4)
- 4.6 Blood pressure - hypertension and hypotension, treatment. (K1,K2, K3 & K4)

**Unit V:****(15 hours)**

- 5.1 Cardiovascular drugs – definition, action, cardiac glycosides, anti arrhythmic drugs- characteristics, classification, example - quinidine, propranolol hydrochloride and uses. (K1,K2, K3 & K4)
- 5.2 Anti hypertensive agents – aldomet, pentolinium tartrate, reserpine. (K1,K2, K3 & K4)
- 5.3 Anti anginal agents – nitrites, dipyridamole, vasodilator, tolazoline hydrochloride, isoxsuprine hydrochloride, sodium nitroprusside, hydralazine hydrochloride and papaverine. (K1,K2, K3 & K4)
- 5.4 Organic pharmaceutical aids- preservatives, properties, common preservatives used. (K1,K2, K3 & K4)
- 5.5 Colouring agents- properties, common colouring agents used. Sweetening agents- properties, common sweetening agents used. (K1,K2, K3 & K4)
- 5.6 Flavouring agents- properties and common flavouring agents used. (K1,K2, K3 & K4)

**Textbook**

## SEMESTER VI

### USCHD620 - SKILL BASED ELECTIVE: FOOD CHEMISTRY

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code</b> USCHD620	<b>Title of the Course</b> Food Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	--	------------------------------	--	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To impart elementary ideas of various types of food, food additives, food poisons, food adulteration.
2. To emphasize the importance of vegetable and fruits.

#### Course Outcomes:

The Learners will be able to

1. Apply simple analytical techniques for detecting food adulterants.
2. Describe the role of food additives, preservatives, flavours, colours and antioxidants.
3. Detect food poisons and apply first aid techniques.
4. Distinguish between alcoholic and nonalcoholic beverages.
5. Describe the importance of saturated and unsaturated fats in edible oils and the nutritive value of fruits and vegetables.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (6 Hours)

- 1.1 Food and food adulteration, food types, advantages and disadvantages. (K1 & K2).
- 1.2 Food adulteration- adulteration in food grains, milk and butter. (K1 & K2)
- 1.3 Food adulteration- adulteration in ghee, ice creams and cakes. (K1 & K2)
- 1.4 Food adulteration- adulteration in pepper, turmeric and chilli powder. (K1 & K2)
- 1.5 Food adulteration- adulteration in edible oils, coffee and tea powder. (K1 & K2)
- 1.6 Detection of adulterants by simple analytical techniques, FSSAI and HACCP laws. (K1 & K2)

**Unit II:** (6 Hours)

- 2.1 Food additives - Definition, structure , advantages and disadvantages of artificial sweeteners – sucralose, saccharin, cyclamate and aspartate. (K1 & K2)
- 2.2 Food flavours-esters, aldehydes and heterocyclic compounds (K1 & K2)
- 2.3 Food flavours -spices - ajwain, aniseed, asafoetida, bay leaves, cardamom, cinnamon, cloves. (K1 & K2)
- 2.4 Food colours, emulsifying agents and preservatives . (K1 & K2)
- 2.5 Leavening agents- baking powder, baking soda, yeast. (K1 & K2)
- 2.6 Antioxidants- propyl gallate, butylated hydroxyl anisole and butylated hydroxyl toluene. (K1 & K2)

**Unit III:** (6 Hours)

- 3.1 Food poison - pesticides and chemical poisons. (K1 & K2)
- 3.2 First aid for poison consumed victims. (K1 & K2)
- 3.3 Beverages - soft drinks- soda, carbonated drinks, fruit juices. (K1 & K2)
- 3.4 Alcoholic beverages- examples and composition. (K1 & K2)
- 3.5 Addiction to alcohol- diseases of liver. (K1 & K2)
- 3.6 Deaddiction measures. (K1 & K2)

**Unit IV:** (6 Hours)

- 4.1 Edible oils - fats, oils, sources of oils, saturated and unsaturated fats. (K1 & K2)
- 4.2 Importance of MUFA and PUFA. (K1 & K2)
- 4.3 Iodine value, RM value, saponification values and their significance. (K1 & K2)
- 4.4 Rancidity- types, hydrolytic and oxidative. (K1 & K2)
- 4.5 Test for rancidity (K1 & K2)
- 4.6 Prevention of rancidity. (K1 & K2)

**Unit V:** (6 Hours)

- 5.1 Vegetables and Fruits – classification and composition. (K1 & K2)
- 5.2 Nutritive value of green leafy vegetables, roots and tubers, other vegetables. (K1 & K2)
- 5.3 Pigments- water insoluble and water soluble pigments. (K1 & K2)
- 5.4 Vegetable cookery- preparation, changes during cooking, loss of nutrients during cooking. (K1 & K2)
- 5.5 Fruits- classification and composition. (K1 & K2)
- 5.6 Ripening of fruits, chemical fruit ripening and storage of fruits. (K1 & K2)

## SEMESTER VI

### UCCHL20 - PRACTICAL III: PHYSICAL CHEMISTRY PRACTICAL

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code</b> UCCHL20	<b>Title of the Course</b> Physical Chemistry Practical	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 2	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Demonstrate practical skills in carrying out chemical reactions of different orders to arrive at reaction kinetics.
2. Estimate quantitatively using conductometric and potentiometric titrations
3. Assess the meaning of values and calculations in experiments and learn the techniques of getting rate constants through graphical methods.
4. Understand laboratory practices and safety/First aid rules.
5. Handle electronic equipments with technical skills

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

#### 1. Kinetics

Determination of the order of the following reactions:

- a) Acid catalysed hydrolysis of an ester (methyl or ethyl acetate)
- b) Persulphate – Potassium iodide reaction kinetics
- c) Iodination of acetone

#### 2. Polarimetry

\* Inversion of Sucrose

3. Molecular weight of a solute  
Rast's method using naphthalene, metadinitrobenzene and diphenyl as solvents
4. Heterogeneous equilibria
  - a) \* Phenol- water system- CST
5. Effect of impurity – 2% NaCl or succinic acid solutions on CST of phenol-water system-  
determination of the concentration of the given solution.
6. Determination of transition temperature of the given salt hydrate  
 $\text{Na}_2\text{S}_2\text{O}_3 \cdot 5\text{H}_2\text{O}$ ,  $\text{CH}_3\text{COONa} \cdot 3\text{H}_2\text{O}$ ,  $\text{SrCl}_2 \cdot 6\text{H}_2\text{O}$ ,  $\text{MnCl}_2 \cdot 4\text{H}_2\text{O}$
7. Electrochemistry  
Conductivity
  - a) Conductometric titration of a strong acid against a strong base.
8. Potentiometry
  - a) Titration of a strong acid against a strong base
  - b) Determination of pH
9. To construct the phase diagram of a two-component system (Naphthalene-Biphenyl system)  
by cooling curve method.

\* Not to be given for examination

**Continuous Assessment – 40 marks**

I C.A. - 50

II C.A. - 50

Average - 25

Performance during regular practicals-10

Regularity in submission of observation note-book and Record –5

**Semester Practical examination – 60 marks**

Principle writing – 5 marks

Viva-voce – 5marks

Record – 10 marks

**1. Kinetics**

Graph – 5 marks

Below a factor of 10 – 35 marks

By a factor of 10 – 25 marks

More than the above – 10 mark

**2. Molecular weight & Effect of electrolyte**

Error up to 10 % - 40 marks

10 – 20 % - 35 marks

21 – 30 % - 20 marks

Above 30% - 10 marks

**3. Transition Temperature**

Error up to 2°C difference – 40 marks

Error up to 7°C difference –25 marks

Error above 7°C difference – 10 marks

#### **4. Conductivity / Potentiometric titrations /pH**

Error up to 10 % - 40 marks

Error up to 15 % - 30 marks

Error up to 20 % - 20 marks

Error above 20 % - 10 marks

(Proportionate marks are reduced for in between % of error)

## SEMESTER VI

### UCCHM20 -PRACTICAL IV: GRAVIMETRIC ESTIMATION

<b>Year:</b> III <b>SEM:</b> VI	<b>Course Code</b> UCCHM20	<b>Title of the Course</b> Gravimetric Estimation	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 2	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Learning Outcomes:

The Learners will be able to

1. Quantitatively estimate metal ions using gravimetric analysis.
2. Gain knowledge on the choice of precipitating methods, reagents, crucibles and filtration.
3. Identify common errors in gravimetric analysis.
4. Outline the favourable conditions for precipitation and factors affecting the particle size of the precipitate.
5. Relate particle size of the precipitates with choice of crucibles used in gravimetric estimations.

## SEMESTER VI

### UCCHN20 – PRACTICAL V: MICRO SCALE ORGANIC ANALYSIS & PREPARATION

<b>Year:</b> <b>III</b> <b>SEM:</b> <b>VI</b>	<b>Course Code</b> UCCHN20	<b>Title of the Course</b> Micro Scale Organic Analysis & Preparation	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 2	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Learning Outcomes:

The Learners will be able to

1. Apply the concepts of micro scale analysis in organic qualitative analysis.
2. Develop skill to analyse systematically the given organic mixture and identify the functional group and special elements.
3. Prepare simple organic compounds.
4. Discuss the importance of laboratory practices and safety/First aid rules for handling the organic chemicals.
5. Explain the significance of organic reactions to understand the theory concepts of organic chemistry.

#### 1. Organic Preparations

- a) Oxidation ( benzaldehyde to benzoic acid)
- b) Hydrolysis ( methyl salicylate or ethyl benzoate or benzamide to acid)
- c) Nitration ( nitrobenzene to m-dinitrobenzene)
- d) Bromination ( parabromoacetanilide from acetanilide)
- e) Benzoylation ( betanaphthol to betanaphthyl benzoate)
- f) Acetylation (salicylic acid to aspirin)

2. Organic analysis: Reactions of the following functional groups:  
Aldehyde, ketone, carboxylic acid (mono and di), ester, carbohydrate (reducing and non reducing), phenol, aromatic primary amine, amide (mono and di), nitrocompound and anilide.

Analysis of organic compounds containing one or two functional groups and characterization with a derivative.

**Continuous Assessment – 40 marks**

I C.A.	- 50

**SEMESTER – V/VI****UGCHA520/620 – NON MAJOR ELECTIVE: FOOD AND NUTRITION CHEMISTRY**

<b>Year : III</b> <b>SEM :</b> <b>V&amp;VI</b>	<b>Course Code</b> UGCHA520/ UGCHA620	<b>Title of the Course</b> Food & Nutrition Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> NME	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 100
--	---	--	------------------------------	-------------------------------	-----------------	---------------------	---------------------

**Learning Objectives:**

1. To impart knowledge about the importance of food and its impact on human health.
2. To highlight the nutritive value of fruits and vegetables and the importance of balanced diet.

**Course Outcomes:**

The Learners will be able to

1. Explain the sources, classification, functions, deficiency diseases and metabolism of carbohydrates.
2. Explain the sources, classification, functions, deficiency diseases and metabolism of proteins and fats.
3. Outline the sources, functions and deficiency diseases of fat soluble and water soluble vitamins.
4. Describe the sources, functions, and deficiency diseases and RDA of essential and trace minerals.
5. Appreciate the nutritive values and evaluate the chemical changes and loss of nutrients during cooking and storage of fruits and vegetables.

CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (9 Hours)

- 1.1. Nutrition and Health – concept. (K1, K2)
- 1.2. Classification of food. (K1, K2)
- 1.3. Nutrients - macro and micro nutrients. (K1, K2)
- 1.4. Carbohydrates - sources, classification, functions, deficiency diseases, energy requirements. (K1, K2)
- 1.5. Blood sugar level. (K1, K2)
- 1.6. Carbohydrates metabolism - Glycolysis, Glyconeogenesis, Glycogenolysis. (K1, K2&K3)

**Unit II:** (9 Hours)

- 2.1. Proteins - sources, classification, functions. (K1, K2)
- 2.2. Deficiency diseases, energy requirements. (K1, K2)
- 2.3. Protein metabolism. (K1, K2&K3)
- 2.4. Fats - Sources, classification, functions. (K1, K2)
- 2.5. Deficiency diseases, energy requirements. (K1, K2)
- 2.6. Fat metabolism. (K1, K2&K3)

**Unit III:** (9 Hours)

- 3.1. Vitamins – classification, difference between fat soluble and water soluble vitamins. (K1, K2)
- 3.2. Fat soluble vitamins (A and D) (K1, K2)
- 3.3. Fat soluble vitamins (E and K) (K1, K2)
- 3.4. Water soluble vitamins (Thiamine, Riboflavin, Niacin Pyridoxine, Pantothenic acid,) sources, functions, deficiency diseases and daily requirements. (K1, K2)
- 3.5. Water soluble vitamins (Folate, Choline, Biotin, Cyanocobalamin) sources, functions, deficiency diseases and daily requirements. (K1, K2)
- 3.6. Ascorbic acid - sources, functions, deficiency diseases and daily requirements. (K1, K2)

**Unit IV:** (9 Hours)

- 4.1. Minerals – classification. (K1, K2)
- 4.2. Major elements (Ca, P, Na, K) sources, functions, deficiency diseases and recommended requirements. (K1, K2)
- 4.3. Major elements (Fe, Mg, I and F), sources, functions, deficiency diseases and recommended requirements. (K1, K2)
- 4.4. Trace elements (Zn, Cu, Co, Se, Mo) - sources, functions, deficiency diseases and recommended requirements. (K1, K2)
- 4.5. Balanced diet - Recommended diet for adult - Indian men and women. (K1, K2)
- 4.6. Diet in pregnancy and lactation. (K1, K2)

**Unit V:** (9 Hours)

- 5.1. Vegetables – Nutritive value of green leafy vegetables, roots and tubers. (K1, K2)
- 5.2. Vegetable cookery (preliminary preparation, changes during cooking, loss of nutrients during cooking). (K1, K2)
- 5.3. Fruits – Nutritive value of fruits, pigments, water, cellulose and pectic substances, flavour constituents, polyphenols, bitterness in fruits. (K1, K2)
- 5.4. Ripening of fruits – chemical ripening. (K1, K2)
- 5.5. Storage of fruits. (K1, K2)

## 5.6. Antioxidants - antioxidant properties of vegetables and fruits. (K1, K2)

## SEMESTER VI

### UGCHB520/620 - NON-MAJOR ELECTIVE: COSMETICS AND DYES

<b>Year: III</b> <b>SEM:</b> <b>V/VI</b>	<b>Course Code:</b> UGCHB520/ UGCHB620	<b>Title of the Course:</b> Cosmetics and Dyes	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> <b>3</b>	<b>Credits</b> <b>2</b>	<b>Marks</b> <b>100</b>
--	--	--	-------------------------------	-------------------------------------	------------------------	----------------------------	----------------------------

#### Learning Objectives:

1. To give a basic introduction to cosmetics, their classification and uses.
2. To give a broad overview on the disadvantages of using synthetic cosmetics over herbal cosmetics, cosmetic safety and evaluation method, etc.
3. To give an introduction to dyes and their applications in various industries from textile to pharmacy and food, contribution of various industries to environmental pollution and its effect on human health.

#### Course Outcomes:

The learners will be able to

1. Define and classify cosmetics, deodorants, antiperspirants, perfumes, aerosols and identify the pros and cons of synthetic cosmetics.
2. Describe the safety assessment methods used by FDA.
3. Prepare and use fruits and vegetables based herbal cosmetics and evaluate the significance of aromatherapy and apply it to human health and beauty.
4. Explain the properties of natural and synthetic dyes.
5. Understand the impact of dyes used in textile and leather industry to environmental pollution and analyse the importance of dyes in pharmaceutical and food industry.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H

CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (9 hours)

- 1.1 Cosmetics – definition & classification based on use. (K1, K2)
- 1.2 Components of cosmetics. (K1, K2)
- 1.3 Deodorants, antiperspirants. (K1, K2)
- 1.4 Aerosols, perfumes and fragrances. (K1, K2)
- 1.5 Pros and cons of synthetic cosmetics. (K1, K2, K3)

**Unit II:** (9 hours)

- 2.1 Safety of Cosmetics. (K1, K2)
- 2.2 Basic concept of cosmetic safety. (K1, K2)
- 2.3 Safety test items. (K1,K2,K3)
- 2.4 Evaluation method. (K1, K2, K3)
- 2.5 Skin irritation, sensitization. (K1, K2)
- 2.6 Testing on human (Patch test, Usage test). (K1, K2)

**Unit III:** (9 hours)

- 3.1 Herbal cosmetics. (K1, K2)
- 3.2 Fruits and vegetables as hair care and skin care (apple, apricot, banana, carrot, cucumber, honey, lemon, tomato). (K1, K2)
- 3.3 Herbal Perfumes and fragrance. (K1, K2)
- 3.4 Skin care herbs – olive oil, sesame oil, black pepper, Amla. (K1, K2, K3)
- 3.5 Aromatherapy – various oils used in aromatherapy and their significance. (K1,K2, K3)
- 3.6 Standardization of herbs – importance, methods employed for standardization of herbal extracts. (K1, K2)

**Unit IV:** (9 hours)

- 4.1 Dyes - definition of dyes and types. (K1, K2)
- 4.2 Requirements of a good dye i.e.Colour, chromophore and auxochrome, solubility, linearity, coplanarity, fastness, substantivity, definition of fastness and its properties. (K1, K2,K3)
- 4.3 Mordants Definition with examples. (K1, K2)
- 4.4 Natural dyes - Definition; Advantages and limitations of natural dyes. (K1, K2)
- 4.5 Examples and uses of natural dyes with respect to henna, turmeric, saffron, indigo, chlorophyll –names of the chief dyeing material/s in each of the natural dye (structures not expected) (K1, K2)
- 4.6 Synthetic dyes - definition of synthetic dyes, primaries and intermediates. (K1, K2)

**Unit V: (9 hours)**

- 5.1 Textile uses of dyes - impact of the textile and leather dye Industry on the environment with special emphasis on water pollution. (K1, K2, K3, K4)

- 5.2 Non textile uses of dyes - biomedical uses – Tablets, syrups and capsules. (K1, K2, K3, K4)
- 5.3 DNA markers and therapeutics. (K1, K2, K3)
- 5.4 Dyes in food and cosmetics - commonly used food colors and their limits. (K1, K2, K3)
- 5.5 Properties of dyes used in food and cosmetics. (K1, K2, K3)
- 5.6 Dyes sensitized solar cells – A tool to overcome the future energy crisis. (K1, K2)

## SEMESTER I

### UACHA20 –ALLIED: CHEMISTRY I

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code</b> UACHA20	<b>Title of the Course</b> Allied Chemistry I	<b>Course Type</b> Theory	<b>Course Category</b> Allied	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	-------------------------------	--	------------------------------	----------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To help the students understand the concepts in industrial and polymer chemistry.
2. To impart knowledge on aromatic compounds and heterocyclic compounds.
3. To highlight the importance of chemical kinetics.
4. To learn the methods of separation through chromatographic techniques.

#### Course Outcomes:

The Learners will be able to:

1. Understand and apply the concept of aromaticity, mechanism of electrophilic substitution reaction, and chemistry of heterocyclic compounds.
2. Explain the terms involved in kinetics and methods of determination of order of the reaction, and understand the theories of reaction rates.
3. Classify polymers and explain its preparation, properties and uses.
4. Understand the concepts, types of chromatographic techniques, principles of volumetric analysis, and describe the separation and purification techniques.
5. Understand the composition and uses of fuel gases, cement, glass, explosives and dyes.

CO	PSO					
	1	2	3	4	5	6

CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit I:** (12 hours)

- 1.1 Aromatic compounds-aromaticity, Huckel's rule. (K1, K2, K3 & K4)
- 1.2 Application of Huckel's rule for benzenoid and nonbenzenoid compounds (benzene, naphthalene, anthracene, pyridine and quinoline, azulene and ferrocene). (K1, K2, K3 & K4)
- 1.3 Preparation, properties and uses of naphthalene. (K1, K2, K3 & K4)
- 1.4 Heterocyclic compounds-preparation, properties and uses of furan, thiophene, and pyrrole. (K1, K2, K3 & K4)
- 1.5 Electrophilic substitution in benzene-mechanism of nitration, halogenation, and sulphonation. (K1, K2, K3 & K4)
- 1.6 Electrophilic substitution in benzene-mechanism of alkylation and acylation (K1, K2, K3 & K4)

**Unit II:** (12 hours)

- 2.1 Chemical kinetics-rate of reaction, rate law (K1, K2, K3 & K4)
- 2.2 Factors affecting rate of the reaction. (K1, K2, K3 & K4)
- 2.3 Molecularity and Order of the reaction, methods of determining the order of a reaction. (K1, K2, K3 & K4)
- 2.4 Derivation of rate constant of a first order reaction and half life period. (K1, K2, K3 & K4)
- 2.5 Arrhenius theory- effect of temperature on reaction rate. (K1, K2, K3 & K4)
- 2.6 Collision theory for a bimolecular reaction. (K1, K2, K3 & K4)

**Unit III:** (12 hours)

- 3.1 Polymer chemistry- classification of polymers. (K1, K2, K3 & K4)
- 3.2 Natural and synthetic rubbers with examples. (K1, K2, K3 & K4)
- 3.3 Preparation and uses of nylon 6, 6 and terylene. (K1, K2, K3 & K4)
- 3.4 Preparation and uses of polyethylene and PVC. (K1, K2, K3 & K4)
- 3.5 Protein fibers- chemical composition(K1, K2, K3 & K4)
- 3.6 Properties of wool and silk(K1, K2, K3 & K4)

**Unit IV:** (12 hours)

- 4.1 Introduction to qualitative and quantitative analysis(K1, K2, K3 & K4)
- 4.2 Principles of volumetric analysis. (K1, K2, K3 & K4)
- 4.3 Separation and purification techniques – extraction, distillation and crystallization. (K1, K2, K3 & K4)
- 4.4 Chromatography- column chromatography - principle, packing of columns, method of separation, identification of compounds and applications. (K1, K2, K3 & K4)
- 4.5 Paper chromatography – principle, procedure,  $R_f$  value and applications. (K1, K2, K3 & K4)
- 4.6 Thin layer chromatography - principle, procedure,  $R_f$  value and applications. (K1, K2, K3 & K4)

**Unit V:****(12 hours)**

- 5.1 Industrial chemistry-fuel gases - natural gas, water gas, semi water gas, carburetted water gas, oil gas and producer gas (composition and uses only). (K1, K2, K3 & K4)
- 5.2 Cement-composition, setting of cement and uses (K1, K2, K3 & K4)
- 5.3 Types of glasses(K1, K2, K3 & K4)
- 5.4 Dye chemistry- terms - chromophore, auxochrome, bathochromic shift, hypsochromic shift, hyperchromic shift. (K1, K2, K3 & K4)
- 5.5 Azo and triphenylmethane dyes - preparation of methyl orange. (K1, K2, K3 & K4)
- 5.6 Explosives – TNT, nitroglycerine and dynamite (K1, K2, K3 & K4)

## SEMESTER II

### UACHB20 –ALLIED: CHEMISTRY- II

<b>Year: I SEM: II</b>	<b>Course Code</b> UACHB20	<b>Title of the Course</b> Allied Chemistry II	<b>Course Type</b> Theory	<b>Course Category</b> Allied	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------	-------------------------------	---	------------------------------	----------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

1. To help the students understand the concepts in coordination and medicinal chemistry.
2. To throw light on stereochemistry.
3. To highlight the importance of electrochemistry and photochemistry.
4. To impart knowledge on medicinal chemistry.

#### Course Outcomes:

The Learners will be able to

1. Understand the nomenclature and theories of coordination compounds.
2. Understand the concepts of isomerism and tautomerism.
3. Explain the concepts of electrolytes and its types, buffer solutions, separation techniques, and construction of electrochemical cell.
4. Understand the basic principles of photochemistry and kinetics of hydrogen-chlorine reaction.
5. Recall the basic terms in medicinal chemistry, and discuss the causes, symptoms and treatment of cancer, diabetes and AIDS.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

**Unit I:** (12 hours)

- 1.1 Co-ordination chemistry – definition of the terms - ligands, chelate, chelation. (K1,K2,K3 & K4)
- 1.2 Nomenclature of mononuclear complexes. (K1,K2,K3 & K4)
- 1.3 Werner's and Pauling theory, Sidgwick's theory. (K1,K2,K3 & K4)
- 1.4 Effective Atomic Number rule. (K1,K2,K3 & K4)
- 1.5 Chemistry of EDTA. (K1,K2,K3 & K4)
- 1.6 Chemistry of haemoglobin and chlorophyll. (K1,K2,K3 & K4)

**Unit II:** (12 hours)

- 2.1 Isomerism- types of isomerism. (K1,K2,K3 & K4)
- 2.2 Stereoisomerism-optical isomerism - cause of optical activity. (K1,K2,K3 & K4)
- 2.3 Optical isomerism of lactic acid and tartaric acid, R- S notation (one asymmetric carbon atom). (K1,K2,K3 & K4)
- 2.4 Racemisation and resolution. (K1,K2,K3 & K4)
- 2.5 Geometrical isomerism of maleic and fumaric acids, E-Z notation. (K1,K2,K3 & K4)
- 2.6 Tautomerism – keto-enol tautomerism. (K1,K2,K3 & K4)

**Unit III:** (12 hours)

- 3.1 Ionic equilibria- strong and weak electrolytes, common ion effect. (K1,K2,K3 & K4)
- 3.2 Definition of pH, pKa, pKb and pKw. Buffer solution. (K1,K2,K3 & K4)
- 3.3 Electrochemical cells – construction, definition of emf, standard electrode potentials. (K1,K2,K3 & K4)
- 3.4 Types of cells- primary and secondary. (K1,K2,K3 & K4)
- 3.5 Principle of Standard hydrogen electrode and calomel electrode. (K1,K2,K3 & K4)
- 3.6 Principle of Electrophoresis, electro-dialysis and electro-osmosis. (K1,K2,K3 & K4)

**Unit IV:** (12 hours)

- 4.1 Photochemistry-Laws of light absorption- Lamberts law and Lamberts-Beer's law. (K1,K2,K3 & K4)
- 4.2 Grotthus – Draper's law and Stark – Einstein's law of photochemical equivalence. (K1,K2,K3 & K4)
- 4.3 Quantum yield (Definition) (K1,K2,K3 & K4)
- 4.4 Photochemical reactions, kinetics of hydrogen and chlorine reaction. (K1,K2,K3 & K4)
- 4.5 Jablonski diagram. (K1,K2,K3 & K4)
- 4.6 Fluorescence, phosphorescence, photosensitization and chemiluminescence (definition, examples and applications). (K1,K2,K3 & K4)

**Unit V:** (12 hours)

- 5.1 Medicinal chemistry - definition and one example each for analgesics, antipyretics antiseptics, tranquilizers, sedatives and hypnotics. (K1,K2,K3 & K4)

- 5.2 Local anesthetics and general anesthetics. (K1,K2,K3 & K4)
- 5.3 Antibiotics – structure and uses of Penicillin, Streptomycin and Chloramphenicol. (K1,K2,K3 & K4)
- 5.4 Causes and treatment of diabetes. (K1,K2,K3 & K4)
- 5.5 Causes and treatment of cancer. (K1,K2,K3 & K4)
- 5.6 Causes and treatment of AIDS. (K1,K2,K3 & K4)

## SEMESTER II

### UACHC20 – ALLIED PRACTICAL: CHEMISTRY

<b>Year: I SEM: II</b>	<b>Course Code</b> UACHC20	<b>Title of the Course</b> Allied Chemistry Practicals	<b>Course Type</b> Practicals	<b>Course Category</b> Allied	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------	-------------------------------	---	----------------------------------	----------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Acquire skills in acid-base titrations.
2. Acquire skill in Permanganometry
3. Acquire skill in determining hardness of water
4. Analyse the elements presents in organic compounds.
5. Analyse the functional groups presents in organic compounds

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

#### I Volumetric Analysis:

1. Estimation of sodium hydroxide using standard sodium carbonate.
2. Estimation of Hydrochloric acid using standard oxalic acid.
3. Estimation of borax using standard sodium carbonate.
4. Estimation of ferrous sulphate using standard Mohr's salt
5. Estimation of oxalic acid using standard ferrous sulphate.
6. \*Estimation of temporary and permanent hardness of water.

## II Organic Analysis:

Reactions of aldehyde (aromatic), \*ketone (aliphatic and aromatic), carbohydrate, carboxylic acid (mono and dicarboxylic), phenol, aromatic primary amine, amide and diamide.

Systematic analysis of organic compounds containing one functional group and characterization by confirmatory tests or derivatives.

**Question Paper Pattern**  
**Department of Chemistry**  
**2020-2021**

**Main Semester Examination (100 Marks)**

Section A: Answer **all** questions (10 x 2 = 20 marks)

Two questions from each unit

Section B: Answer **all** questions (5 x 7 = 35 marks)

Either-or choice

One question from each unit

Section C: Answer any **three** questions out of five (3x15=45 marks)

Atleast one question from each unit

**SBE (60 Marks)**

Section A: Answer **all** questions (10x2=20 marks)

Section B: Answer any **four** (4x5=20 marks)

Section C: Answer any **two** questions (2x10=20 marks)

**Main- Continuous Assessment Examinations (50 Marks)**

Section A: Answer **all** questions (7x2=14 marks)

Section B: Answer any **three** questions out of five (3x7=21 marks)

Section C: Answer any **one** question out of two (1x15=15 marks)

Atleast one question from each unit

**SBE-Continuous Assessment Examinations ( 30 Marks)**

Section A: Answer **all** questions (5x2=10 marks)

Section B: Answer any **two** questions out of four (2x5= 10 marks)

Section C: Answer any **one** question out of two (1x10=10 marks)

# Department of Computer Science (UG)

## SYLLABUS AND REGULATIONS

Under

### OUTCOME-BASED EDUCATION

2020

(Effective for the Students Admitted from the Academic  
year 2020-2021)

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

## **F) PROGRAM OUTCOMES (POs)**

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## **G) PROGRAMME SPECIFIC OUTCOMES (PSOs)**

**PSO 1:** Ability to attain knowledge and understand the mathematical and logical concepts, algorithmic principles and computer fundamentals.

**PSO 2:** Understand the basic concepts of system software, hardware and evolution of computer graphics.

**PSO 3:** Demonstrate the knowledge on appropriate theory, practices and tools for the specification, design and implementation.

**PSO 4:** Utilize the practical skill to examine, plan and engineer the applications of technology using computing tools and techniques.

**PSO 5:** Apply the recent technology in multidisciplinary domains and evaluate the methods to implement it, to create high level design and implement robust software applications using latest technological skills.

**PSO 6:** Be ethically and professionally responsible with the ability to relate IT applications to broader social context for the growth of the nation.

## SEMESTER I

### UCCSA20 - PROGRAMMING IN C

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> UCCSA20	<b>Title of the Course:</b> Programming in C	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Learning Objectives (CLO)

1. To learn the fundamental programming concepts and methodologies which are essential to build good C programs.
2. Develop a greater understanding of the issues involved in programming language design and implementation.
3. To practice the fundamental programming methodologies in the C/C++ programming language via laboratory experiences.
4. Develop an in-depth understanding of functional, logic and object-oriented programming paradigms.
5. To code, document, test, and implement a well-structured, robust computer program using the C/C++ programming language.

#### Course Outcomes (COs)

The Learners will be able to

1. Introduce the students to understand the concept of basic programming - thereby reducing the design complexity and increasing the reusability of a component.
2. Construct the basic structure of C programming, declaration and usage of variable.
3. Understand and develop conditional and iterative statements to write programs.
4. Exercise C programs that uses array and string.
5. Develop user defined functions to solve real time problems.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	L	M	M	L	M
CO2	M	M	L	L	M	M
CO3	M	L	L	M	M	M
CO4	H	H	L	L	L	M
CO5	H	L	M	M	M	L

(Low -L, Medium -M, High-H)

CO	PO					
	1	2	3	4	5	6
CO1	M	H	L	L	M	L
CO2	L	M	H	M	M	M
CO3	M	H	M	H	L	L
CO4	L	L	M	H	L	L
CO5	L	M	M	L	H	L

**Unit I****(Hour 12)**

- 1.1 Algorithm and Flowchart. (K2)
- 1.2 Basic Technique - Sum of Two Given Numbers. (K2)
- 1.3 Swapping Two Numbers - Simple Interest Calculation. (K2)
- 1.4 Overview of C. (K2)
- 1.5 Constants and Variables. (K2)
- 1.6 Data Types. (K2)

**Unit II****(Hour 12)**

- 2.1 Operators. (K1,K2)
- 2.2 Expressions. (K1,K2)
- 2.3 Managing Input and Output Operations. (K1,K2)
- 2.4 Decision Making and Branching. (K1,K2)
- 2.5 Decision Making and Looping. (K1,K2)
- 2.6 Decision Making and Looping. (K1,K2)

**Unit III****(Hour 12)**

- 3.1 Arrays – One Dimensional Array – Predefined Streams. (K2)
- 3.2 Introduction - Reading and Writing String. (K2)
- 3.3 Arithmetic Operation on Characters. (K2)
- 3.4 Putting String Together - Comparison of Two Strings - String Handling. (K2)
- 3.5 Functions. (K2)
- 3.6 Other Features of Strings. (K2)

**Unit IV****(Hour 12)**

- 4.1 User defined Function Introduction. (K2,K4)
- 4.2 Defining and Accessing Functions. (K2,K4)
- 4.3 Function Prototypes. (K2,K4)
- 4.4 Categories of Function. (K2,K4)
- 4.5 Passing Arguments. (K2,K4)
- 4.6 Nesting of Functions. (K2,K4)

**Unit V****(Hour 12)**

- 5.1 Recursion. (K2)
- 5.2 Passing Array to Functions. (K2)
- 5.3 Passing Strings to Functions. (K2)
- 5.4 Scope - Visibility and Lifetime of Variables. (K2)
- 5.5 Visibility and Lifetime of Variables. (K2)
- 5.6 Structures and Unions. (K2)

## SEMESTER I

### UCCSB20 - PRACTICAL I: C

<b>Year:</b> I <b>SEM:</b> I	<b>Course Code:</b> UCCSB20	<b>Title of the Course:</b> Practical I: C	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
---------------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. To make the student learn a programming language.
2. Develop a greater understanding of the issues involved in programming language design and implementation.
3. To learn problem solving techniques.
4. Develop an in-depth understanding of functional, logic and object-oriented programming paradigms.
5. To teach the student to write programs in C and to solve the problems.

#### Course Outcomes (COs)

The Learners will be able to

1. Exercise with basic structure of the C program, declaration and usage of variable.
2. Resolve mathematical and scientific problem.
3. Develop the programs using conditional and iterative statements.
4. Implement array and string concept in C program.
5. Write real time problems using user defined functions

**SEMESTER I**  
**UCCSC20 –PRACTICAL II: DIGITAL LOGICS AND FUNDAMENTALS**

<b>Year:</b> I	<b>Course Code:</b> UCCSC20	<b>Title of the Course:</b> Practical II: Digital Logics and Fundamentals	<b>Course Type:</b> Practical	<b>Course Category</b> : Core	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 100
-------------------	--------------------------------	---	----------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Course Learning Objectives (CLO)**

1. The objective of this course is to provide the fundamental concepts associated with the digital logic and Circuit design.
2. To introduce the basic concepts and laws involved in the Boolean algebra and logic families and digital circuits.
3. To familiarize with the different number systems, logic gates and combinational and sequential circuits utilized in the different digital circuits and systems.
4. The course will help in design and analysis of the digital circuit and system.
5. The course will help in design and analysis of the Combinational circuits and system.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand working of logic families and logic gates.
2. To minimize the Boolean expression using Boolean algebra.
3. Design and analyze the combinational and sequential logic circuits.
4. Simulate digital circuits and implement them using hardware component.
5. Design and implementation of combinational circuits.

CO5	H	M	H	H	H	L

(Low -L, Medium -M, High-H)

### Unit I

(Hour 9)

- 1.1 Number System - Binary Numbers - Conversion from one number system to other – Number Base Conversion. (K2)
- 1.2 Octal and Hexadecimal Numbers – Complements - Binary Arithmetic. (K3)
- 1.3 Binary Codes - Binary Logics - Logic gates. (K3)
- 1.4 Truth Table - Boolean Algebra - Basic Definition. (K2,K3)
- 1.5 Axiomatic Definition of Boolean Algebra. (K2)
- 1.6 Basic Theorems and properties of Boolean Algebra – Duality - Basic theorems. (K3)

### Unit II

(Hour 9)

- 2.1 Simplification of Boolean Function - The Map method. (K3,K4)
- 2.2 Two and Three Variable Maps - Four Variable Maps. (K5)
- 2.3 Five and Six Variable Maps - Tabulation Methods - McClausky Tabulation Methods. (K4, K5)
- 2.4 Combinational Logic – Adders - Half Adder - Full Adder. (K2)
- 2.5 Subtractor – Half Subtractor – Full Subtractor. (K2)
- 2.6 Encoders – Decoders – Multiplexer - Demultiplexer. (K1, K2)

### Unit III

(Hour 9)

- 3.1 Design of Circuits using Decoders/ Multiplexer, Demultiplexer. (K6)
- 3.2 Sequential Logic – Introduction - Flip Flops - Basic Flip Flop Circuits. (K2)
- 3.3 Closed RS Flip flops - JK Flip flops - D Flip flops - T Flip flops. (K2)
- 3.4 Registers - Registers with parallel load. (K3)
- 3.5 Shift Registers - Serial transfer - Bidirectional shift Register with parallel Load. (K3)
- 3.6 Serial Addition using sequential logic. (K3)

### Unit IV

(K6)

(Hour 9)

1. Verify the truth table of logic gates AND, OR and NOT gate.
2. Construct the Half Adder Circuit using Logic Gates.
3. Construct the Full Adder Circuits using Logic Gates.
4. Construct the Half Subtractor Circuit using Logic Gates.

**Unit V**

(K6)

**(Hour 9)**

5. Construct the Full Subtractor Circuit using Logic Gates.
6. Implement the Karnaugh Map method as Sum of Product (SOP) using NAND Gate.
7. Implement the Karnaugh Map method as Product of Sum (POS) using NOR Gate.

**Text Books**

1. Morris M.Mano, "Digital Logic Fundamentals" - Pearson's Education- 5<sup>th</sup> edition, 2015.

**Reference Books**

1. Vijendran, "Digital Computer Fundamentals", 1<sup>st</sup> Edition - Lakshmi Publications, 2001.
2. Thomas M.Floyd, "Digital Fundamentals", 8<sup>th</sup> Edition-USB Publications, 2009.

**Open Educational Resources (OER)**

2. Full Adder and Half AddER Video Tutorial-[http//youtube/FSFNefbKckM](http://youtube/FSFNefbKckM).
3. Karnaugh Map – NAND Gate - <https://www.youtube.com/watch?v=LuXdFI8iK1U>

## SEMESTER II

### UCCSD20 – DATA STRUCTURES WITH C++

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> UCCSD20	<b>Title of the Course:</b> Data Structures with C++	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 40+60
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. To understand how C++ expands C with object-oriented features.
2. To learn how to implement copy constructors and class member functions.
3. To learn how inheritance and virtual functions implement dynamic binding with polymorphism.
4. To identify problem involving trees and binary search trees.
5. To apply Algorithm for solving problems like sorting, searching, insertion and deletion of data using linked list.

#### Course Outcomes (COs)

1. Describe the procedural and object-oriented paradigm with concepts of streams, classes, functions, data and objects.
2. Understand dynamic memory management techniques using pointers, constructors, destructors, etc.
3. Describe the concept of function overloading, operator overloading, virtual functions.
4. Identify problem involving trees and binary search trees.
5. Analyse graphs and describe the hash function and concepts of collision and its resolution methods.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	M	M	M	M	L	H
CO2	M	L	H	L	M	M
CO3	L	L	M	H	L	M
CO4	M	M	L	M	M	M
CO5	H	L	M	M	M	L

(Low -L, Medium -M, High-H)

CO	PO					
	1	2	3	4	5	6
CO1	H	M	L	M	M	H
CO2	M	H	M	H	H	L
CO3	H	M	H	L	L	H
CO4	M	H	L	M	H	M
CO5	L	M	H	H	M	M

(Low -L, Medium -M, High-H)

### Unit I

(Hour 12)

- 1.1 Principles of OOP – Basic concepts - Benefits – Applications (K2, K4)
- 1.2 Introduction to C++ –Tokens-Keywords – Identifiers – Variables (K1, K2)
- 1.3 Operators – Expressions and Control structures. (K1, K2, K4)
- 1.4 Function Function Prototyping (K4, K5, K6)
- 1.5 Parameter Passing in Function – Values Returned by Functions (K4, K6)
- 1.6 Inline Functions – Function Overloading. (K2, K4, K6)

### Unit II

(Hour 12)

- 2.1 Classes and Objects - Constructors and Destructors - Introduction (K2, K4, K6)
- 2.2 Types of Constructors - Destructors - Operator Overloading (K2, K3, K6)
- 2.3 Inheritance: Introduction – Types - Virtual Base Classes (K3, K4, K5, K6)
- 2.4 Abstract Classes - Constructors in Inheritance (K2, K4)
- 2.5 Virtual functions and Polymorphism (K2, K6)
- 2.6 Pointers to Objects - this Pointer (K2, K6)

### Unit III

(Hour 11)

- 3.1 Virtual functions and Polymorphism: Pointers to Objects - this Pointer(K2, K6)
- 3.2 Pointers to Derived Classes - Virtual Functions- Pure Virtual Functions. (K2, K4)
- 3.3 Mapping Console I/O Operations - File File streams (K2, K5, K6)
- 3.4 File operations - File pointers (K2)
- 3.5 Command Line Arguments (K4, K6)
- 3.6 Exception handling. (K2, K4, K5, K6)

### Unit IV

(Hour 13)

- 4.1 Introduction - Basic Terminology - Data structures - Data structure operation (K2)
- 4.3 Traversing Linear Arrays - Inserting and Deleting – Searching - Linear Search - Binary Search - Multidimensional Arrays – Pointers - Pointer Arrays(K2)
- 4.4 Introduction- Linked list - Traversing a linked list - Searching a linked list (K3)

4.5 Single Linked List - Doubly Linked List – Stacks - Arithmetic Expression- Polish Notation – Recursion - Queues. (K2, K3)

4.6 Trees – Introduction - Binary Trees - Traversing Binary Trees – Preorder - In order - Post order. (K3)

## **Unit V**

**(Hour 12)**

5.1 Graphs - Warshall Algorithm Shortest paths. (K2)

5.2 Adjacency - First Search - Depth First Search. (K3, K4)

5.4 Warshall Algorithm Matrix - Path Matrix - Heap Sort. (K2)

5.3 Traversing on Graphs - Breadth Shortest paths - Linked Representation of Graphs. (K3)

5.5 Hashing- Hash Function - Collision Resolution. (K2)

5.6 Open Addressing: Linear Probing and Modifications – Chaining. (K3)

## **Text Book**

**SEMESTER II**  
**UCCSE20- PRACTICAL III: DATA STRUCTURES WITH C++**

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>SEM: II</b>	UCCSE20	Practical III: Data Structures with C++	Practical	Core	2	2	40+60

**Course Learning Objectives (CLO)**

1. To build an understanding of basic concepts of object-oriented programming techniques.
2. To develop programming skills in programming language.
3. To write a program to solve various problems.
4. To implement object-oriented techniques using C++ language features.
5. To develop software using object-oriented programming paradigms.

**Course Outcomes (COs)**

1. Identify the appropriate data structure and algorithm for solving the real world problems.
2. Implement stack and queue techniques using arrays and pointers.
3. Implement the data structure algorithm for polynomial addition.
4. To know the concept of singly linked list.
5. To implement the concept of tree traversals using the algorithm.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO5	M	M	M	L	H	M

**(Low -L, Medium -M, High-H)**

**Practical Programs (K6)****(Hour 30)**

1. Stack using Array in C++.
2. Queue using Array in C++.
3. Stack using pointers in C++.
4. Queue using pointers in C++.
5. Polynomial Addition using Array in C++.
6. Singly Linked List in C++.
7. Depth First Search for Graph in C++.
8. Binary Tree Traversal using Recursion in C++.

## SEMESTER II

### UCCSF20 - PRACTICAL IV: MICROPROCESSOR

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> UCCSF20	<b>Title of the Course:</b> Practical IV: Microprocessor	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 40+60
----------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. To develop background knowledge and core expertise of microprocessor.
2. To know the importance of different peripheral devices and addressing modes.
3. To know the design aspects of Instruction Set.
4. To know the concept of Data Manipulation.
5. To understand and implement the concept of Assembly Code.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand the Architecture of a typical microprocessor.
2. Understand different addressing modes and instructions of 8086 design and to develop assembly language programs using software interrupts.
3. Understand the concepts of Instruction sets.
4. Write the assembly code for 8 bit and 16 bit data manipulation.
5. Write the assembly code for Sorting and reversing elements.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	M	M	M	M	L	H
CO2	L	M	L	M	M	M
CO3	M	L	M	H	L	L
CO4	M	M	H	H	M	M
CO5	H	M	M	M	L	L

(Low -L, Medium -M, High-H)

CO	PO					
	1	2	3	4	5	6
CO1	M	H	H	H	M	M
CO2	H	H	H	H	M	L
CO3	H	H	M	M	M	M
CO4	H	H	H	H	H	L
CO5	H	H	H	H	H	M

**Unit I****(Hour 9)**

- 1.1 Introduction – Introduction to Intel processors. (K2,K4)
- 1.2 Minimum mode. (K2,K4)
- 1.3 Maximum mode. (K2,K4)
- 1.4 Pin layouts of 8086. (K2,K4)
- 1.5 Pin functions of 8086. (K2,K4)
- 1.6 8086 Architecture. (K2,K4)

**Unit II****(Hour 9)**

- 2.1 Machine language and Assembly language. (K1,K2)
- 2.2 Programmer's model of 8086 – The 8086 addressing modes. (K1,K2)
- 2.3 Data transfer instructions. (K1,K2)
- 2.4 Arithmetic instructions. (K1,K2)
- 2.5 Logic Instructions - Shift Instructions. (K1,K2)
- 2.6 Rotate Instructions. (K1,K2)

**Unit III****(Hour 9)**

- 3.1 Compare instructions. (K2)
- 3.2 Jump instructions. (K2)
- 3.3 Loop Instructions. (K2)
- 3.4 Loop Instructions. (K2)
- 3.5 String Instructions. (K2)
- 3.6 String Instructions. (K2)

**Unit IV****(Hour 9)**

1. Write the assembly code in Data Manipulation using 8 Bit. (K2,K3)
2. Write the assembly code in Data Manipulation using 16 Bit. (K2,K3)
3. Write the assembly code to find the largest number in an array. (K2,K3)

**Unit V (Hour 9)**

4. Write the assembly code to sort the data in ascending order. (K2,K3)
5. Write the assembly code for Block Move. (K2,K3)
6. Write the assembly code to reverse array elements. (K2,K3)

**SEMESTER- III**  
**UCCSG20 - JAVA PROGRAMMING**

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> UCCSG20	<b>Title of the Course:</b> Java Programming	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 40+60
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	-----------------------

**Course Learning Objectives (CLO)**

1. To give the knowledge of the structure and model of the Java programming language.
2. Use the Java programming language for various programming technology.
3. To develop software in the Java programming.
4. Evaluate user requirements for software functionality required to decide whether the Java programming language can meet user requirement.
5. To decide whether the Java programming language provides the required solutions.

**Course Outcomes (COs)**

The Learners will be able to

1. Able to understand the use of OOPs concepts.
2. Able to solve real world problems using OOP techniques and to understand the use of polymorphism and Inheritance.
3. Able to understand the use of Packages and Interface in Java.
4. Able to develop and understand exception handling, multithreaded applications with synchronization.
5. Able to design GUI based applications and develop AWT and applets for web applications.

CO	PSO

<b>CO3</b>	L	L	H	H	H	H
<b>CO4</b>	H	H	H	L	H	H
<b>CO5</b>	L	L	H	M	H	H

**Unit I****(Hour 12)**

- 1.1 Introduction to Java (K2)
- 1.2 Features of Java (K4)
- 1.3 Lexical issues (K2, K5)
- 1.4 Data types – Variables (K2)
- 1.5 Operators - Type conversion and casting (K2, K3, K4)
- 1.6 Control Statements (K2, K4)

**Unit II****(Hour 12)**

- 2.1 Arrays – Strings (K2, K4)
- 2.2 Classes and Objects – Constructors (K2, K3, K4)
- 2.3 Overloading method – Access Control - Static and Fixed method (K2, K4)
- 2.4 Inner Class - String class (K2, K3, K4)
- 2.5 Inheritance (K2, K3)
- 2.6 Overriding Method - Using Super Class. (K2, K3, K6)

**Unit III****(Hour 12)**

- 3.1 Input/Output: Exploring Java I/O: The Java I/O classes and Interfaces (K2, K3, K5)
- 3.2 File (K2, K4, K6)
- 3.3 The Stream Classes (K2, K4)
- 3.4 Packages - Access Protection (K2, K3, K4)
- 3.5 Importing Packages (K2, K4)
- 3.6 Interfaces. (K2, K4, K5)

**Unit IV****(Hour 12)**

- 4.1 Exception Handling: try, catch (K2, K4)
- 4.2 Throw and Throws (K2, K4)
- 4.3 Finally (K2, K4)
- 4.4 Thread (K2, K3, K6)
- 4.5 Multithreading: Creating a Thread. (K2, K3, K6)
- 4.6 Executing threads (K5)

**Unit V****(Hour 12)**

- 5.1 The Java Applet and Interface (K2)
- 5.2 HTML Interface (K2)
- 5.3 getDocumentBase() and getCodeBase() (K4)
- 5.4 Event Handling (K4, K6)
- 5.5 Working with Windows (K4)
- 5.6 AWT Classes. (K5, K6)

## SEMESTER III

### UCCSH20 – PRACTICAL -V: PROGRAMMING IN JAVA

<b>Year: II</b> <b>Sem:III</b>	<b>Course Code:</b> UCCSH20	<b>Title of the Course:</b> Practical - V: programming in Java	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Learning Objectives (CLO)

1. To introduce the object-oriented programming concepts.
2. To understand object-oriented programming concepts and apply them in solving problems.
3. To introduce the principles of inheritance and polymorphism and demonstrate how they relate to the design of abstract classes.
4. To introduce the concept of exception handling and multi-threading.
5. To introduce the design of graphical user interface using applets and AWT controls.

#### Course Outcomes (COs)

The Learners will be able to

1. Explain about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc.
2. Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods and I/O Streams.
3. Demonstrate the concepts of Packages and Interface.
4. Evaluate the Java programs to implement error handling techniques using exception handling.
5. Design GUI based applications and develop applets for web applications.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	M	M	M	M	M	H
CO2	L	M	L	M	M	M
CO3	M	H	L	H	L	H
CO4	L	L	M	H	M	L
CO5	H	H	M	M	L	L

(Low -L, Medium -M, High-H)

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	M	M
CO2	L	H	M	M	H	H
CO3	M	H	H	M	H	H
CO4	M	M	H	H	M	M
CO5	L	M	M	H	M	M

**Practical Programs****(Hour 30)**

1. Implementing String manipulation using character Array. (K1, K3, K5)
2. Implementing Input and Output Stream. (K1, K3, K5)
3. Implementing Packages and Interface. (K3, K5)
4. Implementing Exception handling. (K3, K5)
5. Implementing Real time application using multithread. (K3, K5)
6. Implementing Applet using Graphics class. (K3, K5)
7. Implementing AWT controls. (K3, K5)
8. Implementing Colors and fonts. (K3, K5)
9. To create any applications using Applets and AWT. (K5)

### SEMESTER III

#### UCCSI20 – PRACTICAL-VI: WINDOWS PROGRAMMING WITH VB.NET

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: III</b>	UCCSI20	Practical VI: Windows Programming with VB.NET	Practical	Core	4	2	40+60

#### Course Learning Objectives (CLO)

1. To understand the concepts of Windows Programming.
2. To understand VB.NET syntax, program structure, properties and modules.
3. Prepare students theoretically and practically to apply acquired knowledge and skills in producing programs in VB.NET.
4. Prepare students to create applications using GUI concepts.
5. To create simple applications.

#### Course Outcomes (COs)

The Learners will be able to

1. Explain the concepts of windows programming.
2. Create windows by using different basic elements and resources.
3. Develop real time applications using VB.NET.
4. Understand the impact of VB.NET on business.
5. Create a user interface following good GUI design guidelines.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	M	M	M	M	M	H
CO2	L	L	L	M	M	M
CO3	M	M	M	L	H	H
CO4	L	L	M	M	M	L
CO5	H	H	M	M	L	L

(Low -L, Medium -M, High-H)

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	M	M
CO2	H	H	M	M	H	H
CO3	H	H	H	M	H	H
CO4	M	M	H	H	M	M
CO5	M	M	M	H	M	M

**Unit I**

(Hour 10)

- 1.1 Introduction about the .NET Framework. (K1,K2)
- 1.2 Visual Studio Integrated Development Environment – Introduction to VB.NET. (K1,K2)
- 1.3 VB.NET Fundamentals – Variables – Data Types. (K1,K2)
- 1.4 Arrays – Control Flow Statements. (K1,K2)
- 1.5 Function and Procedures. (K1,K2)

**Unit II**

(Hour 10)

- 2.1 Implementing OOPS in VB.NET – Classes. (K2,K6)
- 2.2 Constructors – Inheritance – Static classes. (K2,K6)
- 2.3 Interfaces - Exception Handling – Collections. (K2,K6)
- 2.4 Arrays – Array list Collection. (K2,K6)
- 2.5 Handling Characters, Strings and Dates. (K2,K6)
- 2.6 File I/O Operations. (K2,K6)

**Unit III**

(Hour 10)

- 3.1 Overview of Windows Programming. (K2)
- 3.2 Event driven programming – GUI concepts. (K2)
- 3.3 Data Types – Resources – Windows Messages. (K2)
- 3.4 Basic Drawing GDI – Device Context. (K2)
- 3.5 Dots and Lines - Creating the window – Displaying the window. (K2)
- 3.6 Text Output – Scroll Bars – Keyboard– Mouse – Menus. (K2)

**Unit IV**

(Hour 15)

1. Write a VB.NET program to accept a character from keyboard and check whether it is vowel or not. Also display the case of that character. (K1,K6)
2. Write a Vb.net program to add the elements of an array. (K1,K6)
3. Design a form and event handler for keyboard and mouse events. (K1,K6)
4. Console Application to handle exceptions. (K1,K6)

**Unit V**

(Hour 15)

5. Window Application to use various controls in VB.NET. (K1,K6)
6. Window Application to create Notepad using Menu. (K1,K6)
7. Window Application to perform file operations. (K1,K6)
8. Design Digital Clock in VB.NET. (K1,K6)

**J) Text Book**

1. Steven Holzner, “Visual Basic.Net, Black Book Series”, Dreamtech Press, 1<sup>st</sup> Edition, 2005.
2. Charles Petzold, "Programming Windows", 6<sup>th</sup> Edition, 2012, Microsoft Press.

**K) Reference Books**

1. David I. Schneider , "Introduction to Programming Using Visual Basic", University of Maryland, Pearson, 10<sup>th</sup> Edition, 2017
2. Jeffery R. Shapiro, "The Complete Reference Visual Basic .NET", Tata McGraw Hills, 1<sup>st</sup> Edition, 2002.
3. Evangelos Petroustos, Ali Bilgin, "Mastering Visual Basic. NET Database Programming", BPB Publications, 1<sup>st</sup> Edition, 2002.

**SEMESTER IV**  
**UCCSJ20 – OPERATING SYSTEM**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: IV</b>	UCCSJ20	Operating system	Theory	Core	4	4	40+60

**Course Learning Objectives (CLO)**

1. To describe basic components of operating system.
2. To understand basic principles used in the design of modern operating systems.
3. To illustrate the general architecture of computers.
4. To Understand and analyze theory.
5. To analyze, processes, resource control (concurrency etc.), physical and virtual memory, scheduling, I/O.

**Course Outcomes (COs)**

The Learners will be able to

1. Acquire the Knowledge of important computer system resources and the role of operating system in their management policies and algorithms.
2. Understand the process management policies and scheduling of processes by CPU.
3. Evaluate the requirement for process synchronization and coordination handled by operating system.
4. Describe and analyze the memory management and its allocation policies.
5. Edify and evaluate the storage management policies with respect to different storage management technologies.

## Course Syllabus

### Unit I

(Hour 12)

- 1.1 Linux: Introduction, Brief history. Unix Components/Architecture - Features of Unix. (K1)
- 1.2 Basic Command Directory and File. (K1)
- 1.3 Command pwd, ls, cd, cp, mv, rm, mkdir, rmdir, chmod. (K1)
- 1.4 Full and Relative Pathnames, File and Directory Naming Conventions. (K1)
- 1.5 Wildcard Characters (K1)
- 1.6 Ownership and Permission: chmod, chgrp, chown. (K1)

### Unit II

(Hour 12)

- 2.1 Shell Programming Language: Naming Shell Programs. (K2)
- 2.2 Shell Variables and Arguments. (K2)
- 2.3 Command Line Arguments. (K2)
- 2.4 Looping and Conditional Execution: if..then..else..elseif..fi. (K2)
- 2.5 while...do, for..do..done, for, while, until and case statements. (K2)
- 2.6 break and continue, true and false commands. (K2)

### Unit III

(Hour 12)

- 3.1 System calls - Types of System calls (K5)
- 3.2 Process Management: Process Concepts - Inter Process Communication (K5)
- 3.3 Multithreaded Programming: Multithreading Models. (K5)
- 3.4 Process Scheduling: Basic Concepts. (K5)
- 3.5 Scheduling Criteria - Scheduling Algorithms. (K5)
- 3.6 Deadlock: Deadlock Characterization - Deadlock Avoidance. (K5)

### Unit IV

(Hour 12)

- 4.1 Memory Management: Background. (K4)
- 4.2 Swapping - Contiguous Memory Allocation. (K4)
- 4.3 Paging - Structure of the Page Table. (K4)
- 4.4 Segmentation. (K4)
- 4.5 Virtual Memory Management: Demand Paging. (K4)

#### 4.6 Page Replacement - Thrashing. (K4)

### Unit V

(Hour 12)

5.1 File System: File Concept. (K1, K2, K4)

5.2 Access methods - Directory Structure. (K1, K2, K4)

5.3 Implementing File System File System Structure and Implementation. (K1, K2, K4)

5.4 Allocation Methods. (K1, K2, K4)

5.5 Free Space Management. (K1, K2, K4)

5.6 Secondary Storage Structure Disk Structure - Disk Scheduling. (K1, K2, K4)

### J) Text Books

1. Behrouz A. Forouzan, Richard F. Gilberg.Thomson, “Unix and shell Programming”, 1<sup>st</sup> Edition, 2002.
2. Silberschatz Galvin Gagne, “Operating System Principles”, 7<sup>th</sup> Edition, Prentice Hall, 2011.

### K) Reference Books

1. Sumitabha Das, “Your UNIX the ultimate guide”, 2<sup>nd</sup> Edition, TMH, 2007.
2. Graham Glass, King Ables, “UNIX for programmers and users”, 3rd edition, Pearson Education.
3. Richard Rosinski, Douglas Host, Kenneth Rosen, Rachel Klee, “UNIX: The Complete Reference”, 2<sup>nd</sup> Edition, 2007.
4. Andrew S. Tanenbaum, “Operating Systems, Design and Implementation”, 2nd Edition, Prentice Hall of India, 2012.

**SEMESTER IV**  
**UCCSK20 – PRACTICAL VII: LINUX**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: IV</b>	UCCSK20	Practical VII: Linux	Practical	Core	2	2	40+60

**Course Learning Objectives (CLO)**

1. To provide the skills in Linux Shell Script.
2. To learn programmatically to implement simple OS mechanisms.
3. To understand shell script in files.
4. To learn about standard I/O and system calls.
5. To learn suspending and resuming process.

**Course Outcomes (COs)**

The Learners will be able to

1. Get familiar with the GCC compiler and files.
2. Understand the high-level structure of the Linux kernel both in concept and source code.
3. Acquire a detailed understanding of one aspect (the scheduler) of the Linux kernel.
4. Learn to develop software for Linux systems.
5. Obtain a foundation for an advanced course in operating systems.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

<b>CO3</b>	M	H	M	M	L	L
<b>CO4</b>	L	M	L	M	L	M
<b>CO5</b>	M	L	H	M	H	L

**(Low -L, Medium -M, High-H)**

**Practical Programs (K6)****(Hour 30)**

1. Write a shell script that accepts a file name, starting and ending line numbers as arguments and displays all the lines between the given line numbers.
2. Write a shell script that displays a list of all files in the current directory to which the user has read, write and execute permissions.
3. Write a shell script to find the factorial of a given number.
4. Write a C program that makes a copy of a file using standard I/O and system calls.
5. Implement in C the following Linux commands using system call  
(a) cat (b) ls (c) mv.
6. Write a C program to list every file in a directory, its inode number and file name.
7. Write a C program that illustrates how to execute two commands concurrently with a command pipe. Ex: `ls -l | sort`.
8. Write a C program that illustrates suspending and resuming processes using signals.
9. Write a C program that implements a producer-consumer system with two processes (using semaphores).
10. Write a C program that illustrates two processes communicating using shared memory.

## SEMESTER IV

### UCCSL20 – PRACTICAL VIII: PYTHON PROGRAMMING

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: IV</b>	UCCSL20	Practical VIII: Python Programming	Practical	Core	3	2	40+60

#### Course Learning Objectives (CLO)

1. To Learn Syntax and Semantics and create Functions in Python.
2. To Handle Strings and Files in Python.
3. To Understand Lists, Dictionaries in Python.
4. To Implement Object Oriented Programming concepts in Python.
5. To Build GUI applications.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand and comprehend the basics of python programming.
2. Understand and implement modular approach using Python.
3. Learn and implement various data structures provided by python library including string, list, dictionary and its operations etc.
4. Understand about files and its applications.
5. Develop real-world applications using oops, files and exception handling provided by python.

CO4	L	H	L	M	L	L
CO5	H	L	H	M	H	L

(Low -L, Medium -M, High-H)

## **Course Syllabus**

### **Unit I**

**(Hour 9)**

- 1.1 Introduction - Numbers and Expression Large Integers – Hexadecimals and Octal. (K1)
- 1.2 Variables – Statements – Functions - Modules, List and Tuples. (K1)
- 1.3 Working with String Single - Quoted Strings and Escaping Quotes. (K1)
- 1.4 Concatenating Strings - String Representations, str and repr. (K1)
- 1.5 input vs. raw\_input - Long Strings. (K1)
- 1.6 Raw Strings, and Unicode String Operations, String Methods. (K1)

### **Unit II**

**(Hour 9)**

- 2.1 Dictionary: Dictionary Uses - Creating and Using Dictionaries. (K1)
- 2.2 The dict Function - Basic Dictionary Operations. (K1)
- 2.3 String Formatting with Dictionaries - Dictionary Methods Conditionals. (K1)
- 2.4 Loop while Loops - for Loops - Treating Over Dictionaries - Some Iteration. (K1)
- 2.5 Utilities - Breaking Out of Loops. (K1)
- 2.6 else Clauses in Loops Abstraction: Abstraction, Object Classes, and Exceptions. (K1)

### **Unit III**

**(Hour 9)**

- 3.1 Files and Staff: Opening Files - File Modes – Buffering. (K1)
- 3.2 Basic File Method Reading and Writing - Piping Output. (K1)
- 3.3 Reading and Writing Lines - Closing Files - Using the Basic File Methods. (K1)
- 3.4 Iteration over file content Doing It Byte by Byte - One Line at a Time. (K1)
- 3.5 Reading Everything - Lazy Line Iteration with fileinput - File Iterators. (K1)
- 3.6: Graphical user Interface Basic concepts. (K1)

### **Unit IV**

**(Hour 9)**

1. Write a Program to implement Calendar, Date and Time. (K6)
2. Write a Program to accept the User's first and last name and prints them in reverse order with a space between them. (K6)
3. Write a program to iterate over dictionary. (K6)
  - a) Write a program to count the numbers of characters in the string and store them in a dictionary data structure. (K6)
  - b) Write a program to use split and join methods in the string and trace a birthday with a dictionary data structure. (K6)
- c) Write a program combine lists that combines these lists into a dictionary. (K6)
4. Write a unique function to find all the unique elements of a list. (K6)

### **Unit V**

**(Hour 9)**

5. Write a program read first n lines of a file. (K6)
6. Write a program using class variables and instance variable and illustration of the self-variable. (K6)
  - a) Robot. b) ATM.

7. Write a program for Graphical user Interfaces. (K6)
  - a) Write a GUI for an Expression Calculator using tk.
  - b) Write a program to implement the following figures using turtle.

### **Text Book**

1. Ljubomir Perkovic, "Introduction to Computing Using Python: An Application Development Focus", John Wiley & Sons, 2012.

## SEMESTER V

### UCCSM20 -RELATIONAL DATABASE MANAGEMENT SYSTEMS

<b>Year: III  Sem: V</b>	<b>Course Code: UCCSM20</b>	<b>Title of the Course: Relational Database Management Systems</b>	<b>Course Type: Theory</b>	<b>Course Category: Core</b>	<b>H/W  5</b>	<b>Credits  4</b>	<b>Marks  40+60</b>
--------------------------------------	-------------------------------------	--	------------------------------------	--------------------------------------	-----------------------	---------------------------	-----------------------------

#### Course Learning Objectives (CLO)

1. The objective of this course is to expose the students to the fundamentals and basic concepts in relational Data Base Management Systems.
2. This course discusses architecture of Database Systems with concept of relational model and ER model.
3. This course explains techniques for database design, normalization and database recovery and protection.
4. To understand and apply database normalization principles.
5. To analyze the database transaction management, database recovery, security.

#### Course Outcomes (COs)

The Learners will be able to

1. Demonstrate an understanding of the elementary and advanced features of RDBMS.
2. Apply the SQL commands to create tables and Triggers, insert/update/delete data, and query data in a relational DBMS.
3. Analyze and Design a database based on a data model considering the normalization to a specified level.
4. Apply the storage size of the database and design appropriate storage techniques.
5. Analyze the requirements of transaction processing, concurrency control and avoid redundancy.

CO5	H	H	H	H	M	L

(Low -L, Medium -M, High-H)

## Course Syllabus

### Unit I

(Hour 15)

- 1.1 File System vs. DBMS Database System Application View of Data Database language. (K1, K4)
- 1.2 Data Storage & Querying Data Architecture. (K3)
- 1.3 Database Users and Administrators. (K2)
- 1.4 Relational Model - Structure of Relational Databases. (K3)
- 1.5 Database Schemas -Relational Query Languages. (K4)
- 1.6 Relational Operations. (K3)

### Unit II

(Hour 15)

- 2.1 Introduction to SQL: SQL Data Definition Basic Structure. (K1, K2)
- 2.2 Additional Basic Operations - Set Operations. (K3)
- 2.3 Aggregate Functions - Null Values - Nested Sub queries. (K2, K3)
- 2.4 Modification of the Database; Intermediate SQL Join Expressions. (K6)
- 2.5 Views Transactions - Integrity Constraints SQL Data Types and Schemas. (K3, K4)
- 2.6 Advanced SQL Triggers. (K4)

### Unit III

(Hour 15)

- 3.1 Database Design and the E\_R Model: Entity Relationship Model. (K1, K6)
- 3.2 Constraints Removing - Redundant Attributes ER Diagrams - Reduction to Relational Schemas. (K3, K4)
- 3.3 ER Design Issues - Extended ER Features Alternative Notations for Modeling Data. (K6)
- 3.4 Functional Dependencies - Features of Relational designs. (K5, K6)
- 3.5 Decomposition. (K4, K5)
- 3.6 Normalization. (K4, K5)

### Unit IV

(Hour 15)

- 4.1 Storage and File Structure: Overview of Physical Storage Media. (K2, K3)
- 4.2 Magnetic disks. (K3)
- 4.3 RAID Tertiary Storage. (K3, K4)
- 4.4 File Organization - Organization of records in Files. (K6)
- 4.5 Data Dictionary. (K1, K3)

4.6 Storage Ordered Indices. (K3)

## **Unit V**

**(Hour 15)**

5.1 Distributed Database Homogeneous and Heterogeneous Databases. (K1, K3)

5.2 Distributed Data Storage - Distributed Transactions – Commit. (K3)

5.3 Protocols - Concurrency Control. (K1, K2)

5.4 Object Based Databases - Complex Data types. (K3)

5.5 Structured Types and Inheritance in SQL. (K2)

5.6 Object identity and Reference types in SQL. (K1)

## **Text Book**

## SEMESTER V

### UCCSN20 .NET PROGRAMMING IN C#

<b>Year: III Sem: V</b>	<b>Course Code:</b> UCCSN20	<b>Title of the Course:</b> .NET Programming in C#	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 40+60
---------------------------------	------------------------------------	---	-----------------------------------	-------------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. Understand code solutions and compile C# projects within the .NET framework.
2. Design and develop professional Console and Window based .NET application.
3. Demonstrate knowledge of object-oriented concepts design user experience and functional requirements C#.NET application.
4. Understand and implement string manipulation, events and exception handling within .NET application environment.
5. Identify and resolve problems in C#.NET window based application.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand the concepts of .NET Framework and C#.
2. Apply the usage of Methods, Arrays and Strings.
3. Interpret the concepts of Constructors, Inheritance and Interfaces.
4. Analyze Operator Overloading, Delegates, Events and Exceptions.
5. Create Windows Applications and Web - based Applications.

CO4	M	M	H	M	H	L
CO5	M	M	H	H	H	L

## **Course Syllabus**

### **Unit I**

**(Hour15)**

- 1.1 Introduction – Evolution of C# – Characteristics of C# – Applications of C#. (K2)
- 1.2 Origins of .NET Technology – .NET Framework – Common Language Runtime. (K2)
- 1.3 User and Program Interfaces – .NET Languages. (K2)
- 1.4 Benefits of the .NET Approach – Simple C# Program(K6)
- 1.5 Namespaces – Providing Interactive Input. (K2)
- 1.6 Literals, Variables and Data Types – Decision Making and Branching Statements. (K1)

### **Unit II**

**(Hour 15)**

- 1.1 Decision Making and Looping Statements – Methods in C#. (K1, K2)
- 2.2 Declaring Methods – Invoking Methods – Nesting of Methods. (K2)
- 2.3 Method Parameters-Pass by Value – Pass by Reference – Output Parameters – Method Overloading. (K2)
- 2.4 One Dimensional Arrays – Creating an Array – Two Dimensional Arrays. (K1)
- 2.5 Array List Class –Manipulating Strings – Creating Strings – String Methods. (K2,K3)
- 2.6 Inserting strings – Comparing Strings – Finding Substrings – Array of Strings. (K2,K3)

### **Unit III**

**(Hour 15)**

- 3.1 Classes and Objects – Defining a Class – Adding variables and methods. (K2).
- 3.2 Creating objects – Constructors – Member Initialization – this Reference. (K2)
- 3.3 Nesting of Classes – Indexers – Classical Inheritance – Containment Inheritance. (K1.K2)
- 3.4 Defining a subclass – Defining Subclass Constructors – Multilevel Inheritance – Hierarchical Inheritance (K1.K2)
- 3.5 Overriding Methods – Defining an interface – Implementing interfaces. (K3)
- 3.6 Interfaces and Inheritance – Explicit interface implementation. (K2)

### **Unit IV**

**(Hour 15)**

- 4.1 Need for Operator Overloading – Defining Operator Overloading. K2)
- 4.2 Overloading Binary Operators Overloading Comparison Operators – Delegate Declaration Delegate Methods. (K3)
- 4.3 Delegate Instantiation – Delegate Invocation. (K3)
- 4.4 Using Delegate - Events – Exceptions. (K3,K4)
- 4.5 Types of errors – Multiple Catch Statements – Exception Hierarchy. (K2)
- 4.6 General Catch Handler – Using Finally Statement. (K2)

### **Unit V**

**(Hour15)**

- 5.1 Creating Window Forms. (K6)
- 5.2 Customizing a Form. (K6)
- 5.3 Creating a Windows Application. (K6)
- 5.4 Running a Windows Application. (K6)

5.5 Creating Web – based Application on .NET. (K6)

5.6 Creating a .NET application to send SMS to mobile phones. (K6)

## SEMESTER V

### UCCSO20 - DATA COMMUNICATION AND NETWORKING

<b>Year: III</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: V</b>	UCCSO20	Data Communication and Networking	Theory	Core	5	4	40+60

#### Course Learning Objectives (CLO)

1. To discuss and explain about basics of data communication and networking concepts.
2. To introduce analysis and design of computer and communication networks.
3. Understand the network layered architecture and the protocol stack.
4. Design the basic configuration of routers and switches.
5. Resource sharing in the computer network to provide high Reliability.

#### Course Outcomes (COs)

The Learners will be able to

1. To gain expertise in some specific areas of networking such as the design and maintenance of individual networks.
2. Explain the types of Transmission Media with Real-Time Applications.
3. Apply Time and Frequency concept of analysis.
4. Manage Network functions for an Organization.
5. Analyze various Routing Algorithms and Protocols.

CO5	H	L	L	M	H	L

## **Course Syllabus**

### **Unit I**

**(Hour14)**

- 1.1 Data Communication Data Networking and the Internet - Data Communications and Networking for Today's Enterprise. (K1, K2)
- 1.2 Communications Model - Data Communications Networks. (K1, K2)
- 1.3 The Internet Protocol Architecture - TCP/IP and Internet Based Applications the Need for a Protocol Architecture - The TCP/IP Protocol Architecture. (K1, K2)
- 1.4 The OSI Model Standardization within Protocol Architecture - Traditional Internet Based Applications. (K1, K2)
- 1.5 Multimedia Data Transmission - Concepts and Terminology. (K1, K2)
- 1.6 Analog and Digital Data Transmission -Transmission Impairments - Channel Capacity. (K1, K2)

### **Unit II**

**(Hour16)**

- 2.1 Transmission Media - Guided Transmission Media. (K2, K3)
- 2.2 Wireless Transmission - Wireless Propagation. (K2, K3)
- 2.3 Line of Sight Transmission - Signal Encoding Techniques. (K2, K3)
- 2.4 Digital Data Digital Signals - Digital Data Analog Signals – Analog Data Digital Signals – Analog Data Analog Signals. (K2, K3)
- 2.5 Digital Data Communication Techniques - Asynchronous and Synchronous Transmission. (K2, K3)
- 2.6 Types of Errors - Error Detection - Error Correction - Line Configurations. (K2, K3)

### **Unit III**

**(Hour14)**

- 3.1 Data Link Control Protocols - Flow Control Error Control. (K3, K4, K5)
- 3.2 High Level Data Link Control (HDLC) - Multiplexing. (K3, K4, K5)
- 3.3 Frequency Division Multiplexing - Synchronous Time Division Multiplexing. (K3, K4, K5)
- 3.4 Statistical Time Division Multiplexing - Asymmetric Digital Subscriber Line – xDSL. (K3, K4, K5)
- 3.5 Spread Spectrum - The Concept of Spread Spectrum - Frequency Hopping. (K3, K4, K5)
- 3.6 Spread Spectrum - Direct Sequence Spread Spectrum – Code Division Multiple Access. (K3, K4, K5)

### **Unit IV**

**(Hour16)**

- 4.1 Circuit Switching and Packet Switching - Switched Communications Networks. (K5, K6)
- 4.2 Circuit Switching Networks - Circuit Switching Concepts. (K5, K6)
- 4.3 Soft switch Architecture - Packet Switching Principles - X.25 - Frame Relay. (K5, K6)
- 4.4 Asynchronous Transfer Mode - Protocol Architecture. (K5, K6)
- 4.5 ATM Logical Connections - ATM Cells. (K5, K6)
- 4.6 Transmission of ATM Cells - ATM Service Categories. (K5, K6)

**Unit V****(Hour15)**

- 5.1 Routing in Switched Networks - Routing in Packet Switching Networks. (K4, K5, K6)
- 5.2 Example Routing in ARPANET. (K4, K5, K6)
- 5.3 Least Cost Algorithms - Congestion Control in Data Networks. (K4, K5, K6)
- 5.4 Effects of Congestion - Congestion Control – Traffic Management. (K4, K5, K6)
- 5.5 Congestion Control in Packet Switching Networks - Frame Relay Congestion Control.  
(K4, K5, K6)
- 5.6 ATM Traffic Management-ATMGFR Traffic Management. (K4, K5, K6)

## SEMESTER V

### UECSA20 - ELECTIVE - I A: SOFTWARE ENGINEERING

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UECSA20	<b>Title of the Course:</b> Elective - I A:Software Engineering	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 40+60
<b>Sem: V</b>							

#### Course Learning Objectives (CLO)

1. On learning this paper students will gain the knowledge of developing software with its techniques.
2. Be successful professionals in the field with solid fundamental knowledge of software engineering.
3. Capable of team and organizational leadership in computing project settings and have a broad understanding of ethical application of computing-based solutions to societal and organizational problems.
4. Be agile software developers with a comprehensive set of skills appropriate to the needs of the dynamic global computing-based society.
5. Acquire skills and knowledge to advance their career, including continually upgrading professional, communication, analytic and technical skills.

#### Course Outcomes (COs)

The Learners will be able to

1. Apply the software engineering life cycle by demonstrating competence in communication, planning, analysis, design, construction and deployment.
2. Discuss the function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
3. Manage the time, processes and resources effectively by prioritizing competing demands to achieve personal and team goals Identify and analyzes the common threats in each domain
4. Understand architectural design in order to minimize the risks and errors.
5. Test the techniques for ensuring high quality software and understand the capabilities of cost estimation.

## Course Syllabus

### Unit I

(Hour 15)

- 1.1 Introduction - Computer Based System Engineering - Emergent System Properties. (K3, K4, K5)
- 1.2 System and Their Environment - System Modeling. (K3, K4, K5)
- 1.3 System Engineering Process - System Procurement. (K3, K4, K5)
- 1.4 Software Process - Software Process Models. (K3, K4, K5)
- 1.5 Process Iteration Software Design and Implementation-Software Validation. (K3, K4, K5)
- 1.6 Software Evolution- Automated Process Support. (K3, K4, K5)

### Unit II

(Hour 15)

- 2.1 Project Management: Management Activities. (K2)
- 2.2 Project Planning. (K2)
- 2.3 Project Scheduling - Risk Management. (K2)
- 2.4 Software Requirement: Functional and Non\_Functional. (K2)
- 2.5 Functional Requirements. (K2)
- 2.6 User Requirements - System Requirements Software Requirements Documents. (K2)

### Unit III

(Hour 15)

- 3.1 Requirement Engineering Processes - Feasibility Study. (K4)
- 3.2 Requirement Elicitation and Analysis. (K4)
- 3.3 Requirement Validation - Requirements Management. (K4)
- 3.4 System Model: Context Models. (K4)
- 3.5 Behavioural Models. (K4)
- 3.6 Data Models – Object Models. (K4)

### Unit IV

(Hour15)

- 4.1 Architectural Design: Architectural Design Decisions. (K2)
- 4.2 System Organization - Modular Decomposition Styles.
- 4.3 Control Styles - User Interface Design. (K2)

4.4 Design Issues-User Interface Design Process. (K2)

4.5 User Analysis. (K2)

4.6 User Interface Prototyping. (K2)

## **Unit V**

**(Hour15)**

5.1 Software Testing: System Testing - Component Testing. (K2, K6)

5.2 Test Case Design - Test Automation. (K2, K6)

5.3 Software Cos Estimation: Productivity. (K2, K6)

5.4 Estimation Techniques. (K2, K6)

5.5 Algorithmic Cost Modelling. (K2, K6)

5.6 Project Duration and Staffing. (K2, K6)

## SEMESTER V

### UECSB20- ELECTIVE I B: DATA MINING

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UECSB20	<b>Title of the Course:</b> Elective I B: Data Mining	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 40+60
<b>Sem: V</b>							

#### Course Objectives

- 1.To study the methodology of engineering legacy databases for data warehouse and data mining to derive business rules for decision support systems.
- 2.To analyze the data, identify the problems, and choose the relevant models and algorithms to apply.
- 3.To develop research interest towards advances in data mining.
- 4.To impart the knowledge of how Data Mining could be used to solve scientific and social problems.
- 5.To expose to various Data Mining techniques.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand Data Warehouse fundamentals and Data Mining Principles
2. Understand and implement classical algorithms in data mining and identify the application area of algorithms.
3. Compare and evaluate different data mining techniques like, prediction, clustering and association rule mining.
4. Describe complex data types with respect to spatial and web mining.
5. Analyze the temporal mining techniques to detect patterns in the e-world.

CO4	H	H	H	H	M	L
CO5	M	M	M	M	M	M

(Low – L, Medium – M, High – H)

## Course Syllabus

### Unit I

(Hour 14)

- 1.1 Basic Data Mining Tasks – Data Mining Versus Knowledge Discovery In Databases. (K1, K2)
- 1.2 Data Mining Issues – Social Implications of Data Mining. (K2)
- 1.3 Data Mining from A Database Perspective. Data Mining Technique Introduction – A Statistical Perspective on Data Mining. (K2, K3)
- 1.4 Similarity Measures. (K1, K2, K3)
- 1.5 Decision Trees. (K2, K3)
- 1.6 Neural Networks – Genetic Algorithms. (K1, K2, K3)

### Unit II

(Hour 16)

- 2.1 Classification: Introduction. (K1, K2, K3)
- 2.2 Statistical Based Algorithms. (K2, K3, K5)
- 2.3 Distance Based Algorithms. (K2, K3, K5)
- 2.4 Decision Tree Based Algorithms. (K2, K3, K5)
- 2.5 Neural Network Based Algorithms. (K2, K3, K5)
- 2.6 Rule Based Algorithms. (K2, K3, K5)

### Unit III

(Hour 15)

- 3.1 Clustering: Introduction – Similarity and Distance Measures – Outliers. (K2, K3, K5)
- 3.2 Hierarchical Algorithms – Partitional Algorithms. (K3, K4, K5)
- 3.3 Association Rule Introduction - Large Item Sets – Basic Algorithms. (K2, K3, K5)
- 3.4 Parallel and Distributed Algorithms. (K2, K3, K5)
- 3.5 Comparing Approaches – Incremental Rules. (K3, K5, K6)
- 3.6 Advanced Association Rules Techniques – Measuring the quality of Rules. (K3, K5, K6)

### Unit IV

(Hour 15)

- 4.1 Web mining: Introduction – Web content Mining Crawlers. (K2, K3)
- 4.2 Web Structure Mining. (K2, K3)
- 4.3 Web Usage Mining. (K2, K3)
- 4.4 Spatial Mining: Overview – Primitives. (K2, K3, K5)

- 4.5 Generalization and specialization. (K2, K3, K5)  
4.6 Spatial Rules- Spatial Classification Algorithm. (K2, K3, K5)

## **Unit V**

**(Hour 15)**

- 5.1 Temporal Mining: Introduction. (K2)  
5.2 Modeling temporal events. (K2, K3)  
5.3 Time series. (K2, K3, K5)  
5.4 Pattern detection. (K2, K3, K4, K5, K6)  
5.5 Sequences. (K2, K3, K5, K6)  
5.6 Temporal Associations Rules. (K2, K3, K5)

## SEMESTER V

### UCCSP20 - PRACTICAL - IX: RDBMS

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UCCSP20	<b>Title of the Course:</b> Practical - IX: RDBMS	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
<b>Sem: V</b>							

#### Course Learning Objectives (CLO)

1. The objective of this course is to expose the students to the fundamentals and basic concepts in relational Data Base Management Systems.
2. To analyze various aggregate functions using SQL commands.
3. To use an SQL interface of a relational DBMS package to create, populate, maintain and query a database.
4. To apply relational database theory and be able to describe relational algebra expression, tuple and domain relation expression from queries.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand, Appreciate and effectively explain the underlying concepts of Database technologies. Programming PL/SQL including stored procedures, stored functions, cursors, package.
2. Attain a good practical understanding of the Oracle.
3. Design and implement a database schema for a given problem-domain.
4. Prepare various database tables and joins them using SQL commands. Analyze various aggregate functions using SQL commands.
5. Design and develop forms to select, insert, delete and update using Data Source Binding with the front end tool VB .NET.

CO4	H	H	H	H	H	L
CO5	H	H	H	H	H	L

(Low -L, Medium -M, High-H)

### Practical Programs

(Hour 30)

1. Creating data base tables and using data types. Create table Modify table Drop table (K1, K6)
2. Practical Based on Data Manipulation Adding data with Insert Modify data with Update Deleting records with Delete. (K2, K5)
3. Practical Based on Implementing the Constraints NULL and NOT NULL Primary Key and Foreign Key Constraint Unique, Check and Default Constraint. (K1, K3)
4. Practical for Retrieving Data Using following clauses Simple select clause Accessing specific data with Where Ordered By Distinct and Group By. (K1, K3)
5. Practical Based on Aggregate Functions AVG -COUNT - MAX -MIN -SUM CUBE. (K2, K4)
6. Practical Based on implementing all String functions and Date and Time Functions, union, intersection, set difference. (K3)
7. Implement Nested Queries & JOIN operation. (K3, K6)
8. Practical Based on implementing use of triggers, cursors & procedures. (K1, K3)
9. Make Database connectivity with front end tool VB.NET and Oracle as back end and perform Insertion, Deletion and Updation for the following:
  - Staff Information System
  - Electricity Bill Processing System (K3,K5)

## SEMESTER V

### UCCSQ20- PRACTICAL X: .NET PROGRAMMING IN C#

<b>Year: III</b>	<b>Course Code:</b> UCCSQ20	<b>Title of the Course:</b> Practical X: .Net Programming in C#	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
----------------------	------------------------------------	---	--------------------------------------	-------------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. Understand code solutions and compile C# projects within the .NET framework.
2. Design and develop professional Console and Window based .NET application.
3. Demonstrate knowledge of object-oriented concepts design user experience and functional requirements C#.NET application.
4. Understand and implement string manipulation, events and exception handling within .NET application environment.
5. Identify and resolve problems in C#.NET window based application.

#### Course Outcomes (COs)

The Learners will be able to

1. Create user interactive web pages using .NET. Understanding different types of AI Agents and its Environments.
2. Develop, implement and create applications with C#.
3. Debug, compile and run a simple application.
4. Create Mobile Application using .NET compact Framework.
5. Design and develop Web based applications on .NET.

CO4	M	M	M	M	L	H
CO5	M	M	H	H	H	L

(Low -L, Medium -M, High-H)

### Practical Programs (K6)

(Hour 30)

1. Program using Decision Statements.
2. Program using Iteration Statements.
3. Program using Method Overloading.
4. Program using One Dimensional and Two-Dimensional Arrays.
5. Program using Strings.
6. Program using Classes and Objects.
7. Program using Constructors.
8. Program using Inheritance.
9. Program using Binary Operator Overloading.
10. Program using Exception Handling with Multiple Catch Statements.
11. Designing a Windows Application using Window Forms.
12. Creating a .NET application to send SMS to Mobile Phones using Web.

## SEMESTER VI

### UCCSR20-INTERNET AND WEB PROGRAMMING

<b>Year:</b> III	<b>Course Code:</b> UCCSR20	<b>Title of the Course:</b> Internet and Web Programming	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 40+60
<b>Sem:</b> VI							

#### Course Objectives

1. Enhance the programming experience with the help of tools like editors and debuggers that makes JavaScript coding easier and more interactive.
2. Understand the concepts commonly used in dynamic language programming such as higher-order functions and closures.
3. Understand the server-side programming works on the web.
4. Develop dynamic and interactive web pages using the powerful tool and server scripting language like PHP.
5. Understanding File handling concepts to connect, access, and update a MySQL database.

#### Course Outcomes (COs)

The Learners will be able to

1. Acquire the basic concept of JavaScript.
2. Use operators, variables, arrays, control structures, functions and objects in JavaScript.
3. Create PHP programs that use various PHP library functions, and that manipulate files and directories.
4. Design a responsive web site using HTML, PHP, MySQL and Apache.
5. Build dynamic web pages using JavaScript (Client Side Programming) and apply their knowledge to create interactive websites.

CO5	L	M	M	L	M	L

(Low -L, Medium -M, High-H)

## Course Syllabus

### Unit I

(Hour 15)

- 1.1 JavaScript: Introduction - Values - Numbers - Strings - Unary Operators. (K1, K2)
- 1.2 Boolean Values - Empty Values - Automatic Type Conversion. (K2)
- 1.3 Program Structure: Expressions and Statements- Bindings - Binding Names - The Environment. (K2, K3)
- 1.4 Functions - The Console Log Function - Return Values - Control Flow - Conditional Execution - While and Do Loops. (K2, K3)
- 1.5 Indenting Code - For Loops - Breaking out of a Loop - Updating Bindings Succinctly. (K2, K3)
- 1.6 Dispatching on a Value with Switch – Capitalization – Comments. (K3)

### Unit II

(Hour 15)

- 2.1 Functions - Bindings and Scopes - Functions as Values. (K2)
- 2.2 Declaration Notation - Arrow Functions - The Call Stack. (K3)
- 2.3 Optional Arguments - Closure – Recursion - Growing Functions. (K3, K4)
- 2.4 Data Structure Objects and Array - The Were Squirrel - Data Sets – Properties – Methods Objects. (K3, K4)
- 2.5 Mutability - The Lycanthrope’s Log - Computing Correlation - Array Loops - The Final Analysis - Further Arrayology - Strings and their Properties. (K5)
- 2.6 Rest Parameters - The Math Object - Destructuring – JSON. (K2, K3, K4)

### Unit III

(Hour 15)

- 3.1 PHP Programming: Web Server – Apache - PHP Introduction - PHP Install - PHP Syntax - PHP Variables. (K1, K2)
- 3.2 PHP Echo / Print - PHP Data Types - PHP Strings - PHP Constants - PHP Operators. (K1, K2)
- 3.3 Control Structures - PHP Functions - Directory Functions - File System Functions. (K2, K3)

3.4 PHP Arrays - PHP Sorting Arrays - PHP Super Global. (K3, K4)

3.5 String Functions - Date and Time Functions. (K4)

3.6 Mathematical Functions - Miscellaneous Functions. (K3, K4)

#### **Unit IV**

**(Hour 15)**

4.1 Basic Form Processing (GET And POST Method) - PHP Form Handling. (K1, K2)

4.2 PHP Form Validation - PHP Form Required- URL - E-Mail. (K1, K2)

4.3 PHP Form Complete PHP MYSQL Functions -Connect- Create DB. (K4, K6)

4.4 Create Table- Insert Data - Get Last ID - Insert Multiple. (K3, K4, K5)

4.5 Prepared-Select Data - Delete Data - Update Data - Limit Data. (K3, K4, K5)

4.6 Table Join - Database Driven Application. (K3, K4)

#### **Unit V**

**(Hour 15)**

5.1 PHP Arrays Multi-PHP Date and Time - PHP Include. (K2, K3)

5.2 PHP File Handling- PHP File Open/Read. (K3)

5.3 PHP File Create/Write - PHP File Upload-PHP Cookies. (K4, K5)

5.4 PHP Sessions-PHP Filters - PHP Filters Advanced. (K4)

5.5 PHP Error Handling - PHP Exception. (K4, K5)

5.6 COM-DOM-CURL-SOAP. (K5, K6)

#### **Text Books**

**SEMESTER VI**  
**UCCSS20 CLOUD COMPUTING**

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UCCSS20	<b>Title of the Course:</b> Cloud Computing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 40+60
<b>Sem:</b> <b>VI</b>							

**Course Learning Objectives (CLO)**

1. Discuss the fundamental concepts in cloud computing technologies.
2. Understand the various technologies.
3. Explain the architecture and concept of different cloud model IaaS, PaaS, SaaS
4. Analyze the fundamental and Cloud Deployment Models Course Outcomes.
5. Understand the concepts of Challenges in Cloud security.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the fundamental concepts in cloud computing technologies.
2. Analyze and integrate the cloud enabling services.
3. Analyze the architecture and concept of different cloud model IaaS, PaaS, SaaS.
4. Understand and familiar with the deployment models.
5. Comprehend the Cloud Data Security concepts and how they are addressed with the security mechanisms.

(Low -L, Medium -M, High-H)

## Course Syllabus

### Unit I

(Hour15)

- 1.1 Introduction to Cloud Computing: Cloud Computing in Nutt shell. (K2, K4)
- 1.2 Roots of Cloud Computing- Types of Clouds. (K4, K6)
- 1.3 Features of a Cloud. (K5)
- 1.4 Cloud Infrastructure Management. (K4, K6)
- 1.5 Challenges and Risks. (K4, K6)
- 1.6 Migrating in to a Cloud. (K4)

### Unit II

(Hour 15)

- 2.1 Integration as a Service-Introduction. (K2)
- 2.2 Onset of Knowledge Era- Evolution of SaaS. (K4, K5)
- 2.3 Challenges. (K4, K5)
- 2.4 Approaching the SaaS Integration- New Integration Scenarios. (K4)
- 2.5 Integration Methodologies-SaaS Integration Services. (K4, K5)
- 2.6 B2B Services. (K4, K6)

### Unit III

(Hour 15)

- 3.1 Cloud Service Model Infrastructure as a Service (IaaS): Introduction to IaaS, Resource Virtualization. (K2, K4)
- 3.2 Server, Storage, Network. (K2, K4)
- 3.3 Case studies. (K4, K5, K6)
- 3.4 Platform as a Service (PaaS): Introduction to PaaS. (K2, K4)
- 3.5 Cloud platform and Management, Computation, (K3, K4)
- 3.6 Storage. (K5)

### Unit IV

(Hour 15)

- 4.1 Cloud Deployment Model Introduction. (K2)
- 4.2 Public Deployment Model. (K2, K4, K5)
- 4.3 Private Deployment Model. (K2, K4, K5)
- 4.4 Virtual Private Deployment Model. (K4, K5)

4.5 Hybrid Deployment Model. (K4, K5)

4.6 Community Deployment Model. (K4, K5)

## **Unit V**

**(Hour 15)**

5.1 Cloud Challenge. (K2, K4)

5.2 Organizational Readiness. (K2, K4)

5.3 Change management in cloud. (K2, K4)

5.4 Data Security in the Cloud. (K4, K5)

5.5 Legal Issues in Cloud Computing. (K4)

5.6 Production - Readiness for Cloud Services. (K4, K5)

**UECSC20 –ELECTIVE II A: SOFTWARE TESTING**

<b>Year:</b> III	<b>Course Code:</b> UECSC20	<b>Title of the Course:</b> Elective – II A: Software Testing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 40+60
<b>Sem:</b> VI							

**Course Learning Objectives (CLO)**

1. Define the characteristics of testing and software development life cycle models.
2. Recognize the facts of software development models to adopt with product characteristics.
3. Understand different types of testing, their objectives and challenges.
4. Interpret the software products to execute and report test cases.
5. Apply software testing methods and to perform various types of testing in a software project.

**Course Outcomes (COs)**

The Learners will be able to

1. Test various processes and continue quality improvement.
2. Verify types of errors and fault models.
3. Analyze methods of test generation from requirements.
4. Input space modeling using combinatorial designs.
5. Test adequacy assessment using control flow, data flow and program mutations.

CO5	H	H	M	H	M	H

(Low -L, Medium -M, High-H)

## **Course Syllabus**

### **Unit I**

**(Hours 15)**

- 1.1 A Perspective on Testing - Basic Definitions. (K1)
- 1.2 Test Cases- Insights from a Venn Diagram. (K1, K2)
- 1.3 Identifying Test Cases – Specification - Based Testing - Code-Based Testing. (K2)
- 1.4 Fault Taxonomies- Levels of Testing – Examples - Generalized Pseudocode. (K1, K2, K3)
- 1.5 The Triangle Problem - Problem Statement- Discussion. (K2, K4)
- 1.6 Traditional Implementation - Structured Implementations. (K2)

### **Unit II**

**(Hours 15)**

- 2.1 Role of Testing - Verification and Validation. (K1, K2)
- 2.2 Failure, Error, Fault, and Defect -Notion of Software Reliability. (K2, K3)
- 2.3 Objectives of Testing - What Is a Test Case? (K2)
- 2.4 Expected Outcome - Concept of Complete Testing. (K1,K2)
- 2.5 Central Issue in Testing - Testing Activities. (K2, K4)
- 2.6 Test Levels - Sources of Information for Test Case Selection. (K1, K2, K3)

### **Unit III**

**(Hours 15)**

- 3.1 White-Box and Black-Box Testing - Test Planning and Design. (K1, K2)
- 3.2 Monitoring and Measuring Test Execution - Test Tools and Automation- Test Team Organization and Management. (K2, K3)
- 3.3 Unit Testing- Concept of Unit Testing - Static Unit Testing- Defect Prevention - Dynamic Unit Testing. (K1, K2)
- 3.4 Debugging- Tools for Unit Testing - Control Flow Testing. (K4, K5)
- 3.5 Basic Idea- Outline of Control Flow Testing - Control Flow Graph- Paths in a Control Flow Graph. (K2, K3)
- 3.6 Life Cycle Based Testing - Traditional Waterfall Testing- Waterfall Testing - Pros and Cons of the Waterfall Model. (K2, K6)

### **Unit IV**

**(Hours 15)**

- 4.1 Integration Testing – Decomposition-Based Integration - Top–Down Integration - Bottom–Up Integration - Sandwich Integration - Pros and Cons. (K2,K4)
- 4.2 Data flow testing -System integration testing - Functional testing - Acceptance testing - Domain testing - Exploratory testing. (K4)
- 4.3 System Test Planning and Automation - Structure of a System Test Plan - Introduction and Feature Description. (K4)
- 4.4 Assumptions - Test Approach - Test Suite Structure - Test Environment - System Test Execution- Basic Ideas - Modeling Defects. (K4,K6)
- 4.5 Preparedness to Start System Testing - Metrics for Tracking System Test - Metrics for Monitoring Test Execution. (K6)
- 4.6 Test Execution Metric Examples - Metrics for Monitoring Defect Reports - Defect Report Metric Examples. (K4,K5)

## **Unit V**

**(Hours 15)**

- 5.1 Software Reliability - What Is Reliability?(K1,K2)
- 5.2 Definitions of Software Reliability - Factors Influencing Software Reliability. (K2)
- 5.3 Applications of Software Reliability - Test Team Organization - Test Groups. (K1,K2)
- 5.4 Software Quality Assurance Group - System Test Team Hierarchy- Effective Staffing of Test Engineers. (K1,K2)
- 5.5 Recruiting Test Engineers - Retaining Test Engineers - Team Building. (K2,K4)
- 5.6 Software Testing Excellence – Craftsmanship - Best Practices of Software Testing. (K2,K5,K6)

**UECSD20 - ELECTIVE – II B: DATA SCIENCE**

<b>Year:</b> III	<b>Course Code:</b> UECSD20	<b>Title of the Course:</b> Elective – II B: Data Science	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 40+60
<b>Sem:</b> VI							

**Course Learning Objectives (CLO)**

1. Understand the key concepts of data science and its applications.
2. Gain in-depth knowledge on data collection and management techniques.
3. Implement simple applications and analyze the results using relevant tools.
4. Apply the relevant techniques for implementing simple applications.
5. Critically evaluate data visualization based on their design and use for communication from data.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the key concepts in data science, its applications and the toolkit used by data scientists.
2. Explain how data is collected, managed and stored for data science.
3. Implement data collection and management.
4. Use visualization tools for data visualization.
5. Possess the required knowledge and expertise to become a proficient data scientist.

## **Course Syllabus**

### **Unit I**

**(Hour 15)**

- 1.1 Basics of Data Science: Properties of Data. (K2, K3)
- 1.2 Structured Data - Unstructured Data. (K2)
- 1.3 Quantitative Data – Categorical Data. (K2)
- 1.4 Big Data – Little Data. (K2)
- 1.5 Data Visualization. (K2, K3)
- 1.6 Tool Boxes for Data Scientists. (K2, K3)

### **Unit II**

**(Hour 15)**

- 2.1 Introduction to core concepts and technologieIntroduction. (K2)
- 2.2 Terminology. (K2)
- 2.3 Data science process. (K2)
- 2.4 Data Science toolkits. (K2, K3)
- 2.5 Types of data. (K2)
- 2.6 Example applications. (K2)

### **Unit III**

**(Hour 15)**

- 3.1 Data collection and management: Introduction. (K2)
- 3.2 Sources of data. (K2)
- 3.3 Data collection and APIs. (K2)
- 3.4 Exploring and fixing data. (K2, K4)
- 3.5 Data storage and management. (K2)
- 3.6 Using multiple data sources. (K2)

### **Unit IV**

**(Hour 15)**

- 4.1 Data visualization: Introduction - Types of data visualization. (K2)
- 4.2 Data for visualization: Data types. (K2)
- 4.3 Data encodings. (K2, K3)
- 4.4 Retinal variables. (K2, K3)
- 4.5 Mapping variables to encodings. (K2)
- 4.6 Visual encodings. (K2)

### **Unit V**

**(Hour 15)**

- 5.1 Recent Technologies. (K2)
- 5.2 Recent trends in various data collection. (K2)
- 5.3 Recent trends in analysis techniques. (K2)
- 5.4 Various visualization techniques. (K2, K5)
- 5.5 Application development methods used in data science. (K2, K5)

## SEMESTER VI

### UECSE20- ELECTIVE – III A: ARTIFICIAL INTELLIGENCE

Year:	Course Code:	Title of the Course:	Course Type:	Course Category:	H/W	Credits	Marks
III	UECSE20	Elective – III	Theory	Elective	5	5	40+60
Sem:		A: Artificial Intelligence					
VI							

### Course Learning Objectives (CLO)

1. Gain a historical perspective of AI and its foundations.
2. Become familiar with basic principles of AI toward problem solving inference, perception, knowledge representation, and learning.
3. Investigate applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.
4. To understand the concept of learning techniques.
5. To know about Context Free Grammars.

## Course Outcomes (COs)

The Learners will be able to

1. Understand different types of AI Agents and its Environments.
2. Know Various AI Search Algorithms (uninformed, informed, heuristic search).
3. Understand the fundamentals of Knowledge representation (logic based, frame based).
4. Understand the different types of Learning.
5. Ability to apply knowledge representation, reasoning, and machine learning Techniques.

CO5	H	H	H	H	M	M

(Low -L, Medium -M, High-H)

## Course Syllabus

### Unit I

(Hour 15)

- 1.1 Artificial Intelligence – Introduction - Foundation of Artificial Intelligence. (K2)
- 1.2 History of Artificial Intelligence - Intelligent Agents - Agents and Environment. (K1)
- 1.3 Good Behavior - The Concept of Rationality - Performance Measures- Rationality. (K1,K4)
- 1.4 Problem Solving- Solving Problem by searching - Problem Solve Agents. (K5)
- 1.5 Well Defined Problems and Solutions - Formulating Problems. (K5)
- 1.6 Uniformed Search Strategies - Breadth First Search - Depth First Search. (K3, K4)

**Unit II****(Hour 15)**

- 2.1 Informed Search - Greedy Best First Search - A\* Search Minimizing the total estimated Solution Cost. (K3, K4)
- 2.2 Hill Climbing Search - Genetic Algorithm. (K3, K4)
- 2.3 Local Search in Continuous space - Online Search Agents and Unknown environments - Online Search problems - Online Search Agents. (K5, K6)
- 2.4 Online Local Search - Learning in Online Search. (K6)
- 2.5 Constraint Satisfaction Problems - Backtracking Search for CSPs. (K4, K5)
- 2.6 Backtracking and Local Search (K5, K6)

**Unit III****(Hour 15)**

- 3.1 Logical Agents - Knowledge Based Agents. (K2, K3)
- 3.2 Logic - Propositional Logic, a very simple logic. (K3)
- 3.3 Reasoning Pattern in Propositional Logic - Resolution Forward and Backward Chaining. (K2)
- 3.4 Syntax and Semantics of First order Logic - Models for First Order Logic. (K3)
- 3.5 Symbol and Interpretations - Terms. (K2)
- 3.6 First Order Logic - Assertions and queries in First order Logic. (K3)

**Unit IV****(Hour 15)**

- 4.1 Learning from Observations - Forms of Learning. (K2)
- 4.2 Inductive Learning - Knowledge in Learning- A logical Formulation of Learning. (K1, K2)
- 4.3 Examples and hypotheses - Current best hypothesis search. (K3)
- 4.4 Least Commitment Search - Explanation Based Learning - Extracting General rules from Examples. (K2)
- 4.5 Improving Efficiency - Learning using Relevance Information. (K2)
- 4.6 Inductive Logic Programming - An Example Top down inductive Learning Methods - Inductive learning with inverse deduction. (K1, K2)

**Unit V****(Hour 15)**

- 5.1 Communication – Communication as Action- Fundamentals of Language. (K2)
- 5.2 Formal Grammar for a Fragment of English - Lexicon of  $\epsilon_0$ - Grammar of  $\epsilon_0$ . (K3)
- 5.3 Syntactic Analysis Parsing - Efficient Parsing. (K3, K4)
- 5.4 Augmented Grammars - Semantic Interpretation. (K4)
- 5.5 The semantics of a English Fragment - Time and Tense - Quantification- Pragmatic Interpretation. (K5)
- 5.6 Languages and generation with DCG'S - Ambiguity and Disambiguation. (K5)

**UECSF20 - ELECTIVE III B: COMPUTER GRAPHICS**

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UECSF20	<b>Title of the Course:</b> Elective III B: Computer Graphics	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 40+60
<b>Sem:</b> <b>VI</b>							

**Course Learning Objectives (CLO)**

1. Understand two dimensional graphics and their transformations.
2. Gain knowledge about graphics hardware devices and software used.
3. Understand three dimensional graphics and their transformations and to become familiar with clipping techniques.
4. Extract scene with different clipping methods and its transformation to graphics display device.
5. Explore projections and visible surface detection techniques for display of 3D scene on 2D screen.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the basics of computer graphics, different graphics systems and applications of computer graphics.
2. Discuss various algorithms for scan conversion and filling of basic objects and their comparative analysis.
3. Use of geometric transformations on graphics objects and their application in composite form.
4. Apply clipping methods and its transformation to graphics display device.
5. Use suitable projections and visible surface detection techniques for display of 3D scene on 2D screen.

## Course Syllabus

### Unit I

(14 Hours)

- 1.1 Overview of graphics System Video Display Device. (K1)
- 1.2 Refresh Cathode-Ray tubes. (K1)
- 1.3 Raster - Scan Displays. (K1, K3)
- 1.4 Random - Scan Displays. (K1, K3)
- 1.5 Color CRT Monitors -Direct view Storage tubes Flat - Panel Displays. (K1, K3)
- 1.6 Three - Dimensional Viewing Devices - Stereoscopic and Virtual - Reality Systems. (K1, K2)

### Unit II

(16 Hours)

- 2.1 Raster - Scan Systems Video Controller. (K1, K3)
- 2.2 Random Scan Systems Video Controller. (K1, K3)
- 2.3 Random-Scan Systems. (K1, K3)
- 2.4 Input device - Keyboard Mouse - Trackball and Space ball-Joysticks - Data Glove – Digitizers - Image Scanners - Touch Panels - Light pens. Voice Systems – Hard – Copy Devices. (K1)
- 2.5 Line Drawing Algorithms DDA Algorithms. (K1, K3, K5)
- 2.6 Circle generating Algorithm Properties of Ellipses. (K1, K3, K5)

### Unit III

(14 Hours)

- 3.1 Two Dimensional Geometric Transformation: Basic Transformations – Translation. (K1, K2, K3)
- 3.2 Rotation. (K1, K2, K3)
- 3.3 Scaling. (K1, K2, K3)
- 3.4 Matrix Representations and Homogeneous Coordinates. (K1, K3)
- 3.5 Other Transformations Reflections. (K1, K2, K3)
- 3.6 Two Dimensional Viewing. (K1)

**Unit IV****(16 Hours)**

- 4.1 Three Dimensional Concept Three Dimensional Display method. (K1)
- 4.2 Parallel projection - Depth cueing visible line and surface. (K1, K3)
- 4.3 Three Dimensional Geometric and modeling Transformation Translation - Rotation – Scaling. (K1, K2, K3)
- 4.4 Composite Transformations. (K1, K3)
- 4.5 Three Dimensional Viewing: Viewing pipeline - Viewing Coordinates. (K1, K3)
- 4.6 Projections - Parallel Projections - Perspective Projections. (K2, K3)

**Unit V****(15 Hours)**

- 5.1 Windows to view point coordinate Transformations. (K1, K2)
- 5.2 Clipping Operations - Point Clipping - Line Clipping - Curve Clipping - Text Clipping - Exterior Clipping. (K1, K3)
- 5.3 Visible Surface Detection Method Classification Visible Surface Detection Algorithms. (K1, K2)
- 5.4 Back Face Detection. (K1, K2)
- 5.5 Depth - Buffer Method - A-Buffer Method. (K1, K2)
- 5.6 Scan line method. (K1, K3)

## SEMESTER VI

### UCCST20 - PRACTICAL XI: INTERNET AND WEB PROGRAMMING

<b>Year:</b> III	<b>Course Code:</b> UCCST20	<b>Title of the Course:</b> Practical XI: Internet and Web Programming	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
---------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	-----------------------

#### Course Learning Objectives (CLO)

1. Comprehend the usage of PHP and JavaScript in dynamic web development.
2. Understand PHP language data types, logic controls, built-in and user-defined functions.
3. Describe Object oriented programming paradigm in PHP.
4. Understand user validation techniques and cookies.
5. Build a simple, yet functional web application using PHP/MySQL.

#### Course Outcomes (COs)

The Learners will be able to

1. Know variable naming rules and JavaScript data types.
2. Use operators, variables, arrays, control structures, functions and objects in JavaScript.
3. Demonstrate objects and arrays usage.
4. Create PHP programs that use various PHP library functions, and that manipulate files and directories.
5. Validate user input and create cookies in PHP.

CO3	M	M	M	H	H	H
CO4	H	H	H	H	M	H
CO5	M	M	M	L	L	L

**Practical Programs (K6)****(Hour 30)**

1. Implement factorial of a number in JavaScript. (K2, K3)
2. Animation in JavaScript. (K3, K4)
3. Addition and Multiplication of two numbers in JavaScript. (K1, K2)
4. Convert the first letter of each word of the string to Uppercase in JavaScript. (K1, K2)
5. Implementing Arrays in JavaScript. (K4, K5)
6. Implementing Control Statements and Looping in PHP. (K3, K4)
7. Implementing Functions in PHP. (K4, K5)
8. Implementing Form Processing (GET & POST) in PHP. (K5, K6)
9. Implementing Validation in PHP. (K4)
10. Implementing Cookies in PHP. (K3, K4, K5)

## SEMESTER VI

### UCCSU20 - PRACTICAL XII: PROJECT WORK

Year: III	Course Code:	Title of the Course:	Course Type:	Course Category:	H/W	Credits	Marks
Sem: VI	UCCSU20	Practical XII: Project Work	Practical	Core	2	2	40+60

#### Course Learning Objectives (CLO)

1. Acquire practical knowledge on the implementation of the programming concepts learnt.
2. Motivate the Students to work in emerging/latest technologies.
3. Help the students to develop ability, to apply theoretical and practical tools/techniques.
4. To solve real life problems related to industry, academic institutions and research laboratories.
5. Help the students to gain Self-confidence.

#### GUIDELINES FOR PROJECT WORK

- Each student should carry out individually one project work and it may be a work using the software packages that they have learned or the implementation of concepts from the papers studied or implementation of any innovative idea focusing on application oriented concepts.
- The project work should be compulsorily done in the college only under the supervision of the department staff concerned.
- The project is of 3 hours/week for one (semester VI) semester duration and a student is expected to plan, analyze, design, code and implement the project. The initiation of project should be with the project proposal. The synopsis approval will be given by the project guides.
- For the project work, the guide(internal) will evaluate the work for 40 marks based on the performance of the candidates during the development of the project and the external examiner will evaluate the project work as follow
  - Project Report -40 marks
  - Viva Voce -20 marks

**SEMESTER V/VI**  
**USCSEn20 - SKILL BASED ELECTIVE: DATA ANALYTICS USING DATA**  
**VISUALIZATION TOOLS**

<b>Year:</b> III/ V	<b>Course Code:</b> USCSEn20	<b>Title of the Course:</b> Data Analytics using Data Visualization Tools	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
------------------------	---------------------------------	--	----------------------------------	---	-----------------	---------------------	-----------------------

**Course Learning Objectives (CLO)**

1. Understand the behavior of data.
2. To extend the current state of the art in data visualization.
3. To present data effectively through chart, map and dashboard.
4. Represent data graphically.
5. To implement Data Analytics efficiently.

**Course Outcomes (COs)**

The learners will be able to

1. Identify the various data visualizations tools in the market and its features.
2. Understand the different data format and its graphical representation
3. Develop skills to present data effectively through chart, map and dashboard.
4. Demonstrate to design visual presentations of data for decision making.
5. Apply data visualizations on real-time data.

## **Course Syllabus**

### **Unit I**

**(Hour 5)**

- 1.1 Data Visualization: Introduction. (K1)
- 1.2 Benefits of Data Visualization. (K2)
- 1.3 Data Visualization Tools. (K2)
- 1.4 Features. (K2)
- 1.5 Data access from data sources. (K2)

### **Unit II**

**(Hour 5)**

- 2.1 Data Transformation. (K1, K2)
- 2.2 Types of charts. (K2)
- 2.3 Bar Chart. (K1, K2)
- 2.4 Pie Chart. (K2)
- 2.5 Data Tables. (K2)
- 2.6 Scatter Chart. (K2)

### **Unit III**

**(Hour 5)**

- 3.1 Time series Chart. (K2)
- 3.2 Score card. (K2)
- 3.3 Scatter Chart. (K2)
- 3.4 Bullet Chart. (K2)
- 3.5 Area Chart. (K2)
- 3.6 Heat Map(K2)

### **Unit IV (K6)**

**(Hour 8)**

1. Create a bar chart for the given data.
2. Create a pie chart for the given data.
3. Create a scatter chart for the given data.
4. Create a time series chart for the given data.

### **Unit V (K6)**

**(Hour 7)**

5. Create a bullet chart for the given data.
6. Create area chart for the given data.
7. Create a heat map for the given data.

### **Text Book**

1. Nathan Yau Visualize Thi, “The Flowing Data Guide to Design, Visualization, and Statistics”, Wiley, 1<sup>st</sup> Edition 2011.

## **Reference Books**

**SEMESTER V / VI**  
**USCSFn20 - SKILL BASED ELECTIVE: R PROGRAMMING**

<b>Year:</b> III/ V	<b>Course Code:</b> USCSFn20	<b>Title of the Course:</b> Skill Based Elective: R Programming	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
<b>Sem:</b> VI							

**Course Learning Objectives (CLO)**

1. Understand the usage of R programming interactive environment.
2. Understand R programming language which includes functions, arrays and dataframes.
3. Describe statistical computing which includes programming in R, reading and accessing data in R.
4. Understand the concept of Meta Programming.
5. Build a simple sorting algorithm.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the basics in R and Studio Programming.
2. Use Vector, Arrays, Matrix and Data frames.
3. Demonstrate Math functions, Statistical functions and Family functions.
4. Create R programs that use various library functions, and that manipulate files and directories.
5. Learn to apply R programming for Text processing.

CO4	H	M	H	H	H	M
CO5	L	M	M	M	L	M

## **Course Syllabus**

### **Unit I**

**(Hour 5)**

- 1.1 Introduction to R and R Studio. (K1, K2)
- 1.2 Basic Object Vector. (K2)
- 1.3 Matrix, Array. (K2, K3)
- 1.4 Lists. (K2)
- 1.5 Data Frames. (K3)
- 1.6 Functions. (K2, K3)

### **Unit II**

**(Hour 5)**

- 2.1 Basic Expression Assignment Expressions. (K1, K2)
- 2.2 Conditional Expressions. (K3, K4)
- 2.3 Loop Expressions. (K3, K4)
- 2.4 Basic Object Functions - Logical Functions. (K2, K3)
- 2.5 Math functions, Numeric Methods Statistical function - Apply. (K3, K5)
- 2.6 Family Functions. (K3, K4)

### **Unit III**

**(Hour 5)**

- 3.1 Working with Strings. (K4, K5)
- 3.2 Working with Data. (K4, K5)
- 3.3 Meta programming. (K6)
- 3.4 Object Oriented Programming. (K3, K4)

### **Unit IV**

**(Hour 7)**

- 4.1 Write a program that prints 'Hello World' to the screen. (K2)
- 4.2 Write a program that asks the user for a number n and prints the sum of the numbers 1 to n. (K4, K5)
- 4.3 Write a program that prints a multiplication table for numbers up to 12. (K4)
- 4.4 Write a function that returns the largest element in a list. (K5)

### **Unit V**

**(Hour 8)**

- 5.1 Write a function that computes the running total of a list. (K5, K6)
- 5.2 Write a function that tests whether a string is a palindrome. (K5)
- 5.3 Implement the following sorting algorithm Selection sort, Insertion sort, Bubble Sort. (K3, K5, K6)
- 5.4 Implement linear search. (K3, K4,)
- 5.5 Implement binary search. (K3, K4)
- 5.6 Implement Matrices Addition, Subtraction and Multiplication. (K3, K4)

### **Text Books**

1. Kun Ren, “Learning R. Programming, Packt Publishing” - ebooks Account (October 28, 2016).
2. Dr. Mark Gardener, “Beginning R: The Statistical Programming Language”, Paperback, 2013.

### **Reference Books**

1. Colin Gillespie, Robin Lovelace, “Efficient R Programming: A Practical Guide to Smarter Programming”, O'Reilly Media, 1<sup>st</sup> Edition (October 25, 2016); eBook (2017-04-10).
2. Daniel Navarro, “Learning Statistics with R”, lulu.com (2015); eBook (University of Adelaide, 2018. Updated Continuously)

**USCSAn20 - SKILL BASED ELECTIVE: BASICS OF WEB DESIGN**

<b>Year:</b> II	<b>Course Code:</b> USCSAn20	<b>Title of the Course:</b> SBE: Basics of Web Design	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
<b>Sem:</b> III							

**Course Learning Objectives (CLO)**

1. To impart knowledge in designing web pages with text and images.
2. Analyze a web page and identify its elements and attributes.
3. To learn and implement XML Concepts.
4. Write codes to create website.
5. Write programs in XML.

**Course Outcomes (COs)**

The Learners will be able to

1. Demonstrate competency in the use of common HTML code.
2. Support the development of web pages.
3. Create XML documents and Schemas.
4. Create website using HTML.
5. Write programs using XML.

## Course Syllabus

### Unit I

(Hour 5)

- 1.1 Introduction: HTML - Understanding HTML Tags. (K2)
- 1.2 Creating the HTML, Head, and Body Sections. (K6)
- 1.3 Creating Paragraphs and Line Breaks. (K6)
- 1.4 Formatting Text by Using Tags. (K6)
- 1.5 Creating Headings. (K6)
- 1.6 Applying Bold and Italic Formatting - Applying Superscript and Subscript Formatting. (K3)

### Unit II

(Hour 5)

- 2.1 Using Lists and Backgrounds - Creating Bulleted and Numbered Lists. (K2)
- 2.2 Creating Definition Lists. (K6)
- 2.3 Choosing Background and Foreground Colors. (K6)
- 2.4 Creating Hyperlinks and Anchors-(K6)
- 2.5 Introduction to Style Sheets-(K6)
- 2.6 Creating tables. (K6)

### Unit III

(Hour 5)

- 3.1 XML Overview: Working with Basics of XML- (K1)
- 3.2 XML Namespaces – XML Tree-XML Syntax- (K1)
- 3.3 XML Elements - DTD – (K1)
- 3.4 XML Schema – (K1)
- 3.5 Extensible Style Sheets (K1)
- 3.6 XSL Transformation. (K1)

### Unit IV

(K6)

(Hour 8)

1. Write a program to change the Font style, Font colour, Font Sizes and Background Image.
2. Write a program to design Bio-data using Basic HTML tags.
3. Write a program in HTML to develop a College Website.
4. Write a HTML program to create Time Table preparation using HTML tags.
5. Write a HTML program using links.

### Unit V

(K6)

(Hour 7)

6. Write a HTML program for Lists.
7. Write a program to apply Style Sheet in a webpage.
8. Write a program to flip the text using XML.
9. Write a XML program using elements.
10. Write a XML program using DTD.

**Text Books**

1. Faithe Wempen, “Step by Step HTML5”, Published with the O’Reilly Media, Inc. 2012.
2. Kogent Learning Solutions Inc, ”Html5 Black Book: Covers CSS3, JavaScript, XML, XHTML, AJAX, PHP and jQuery”, Dreamtech Press, 2011.

**Books for Reference**

1. HTML by Tutorials point, Published by Tutorials Point Pvt. Ltd, 2015.
2. Heather Williamson, “XML: The Complete reference”, Indian Edition, Tata McGraw Hill Pub, 2001.
3. Deitel, Nieto, Lin, Sadhu, “XML HOW TO PROGRAM”, 1<sup>st</sup> Edition, Pearson Education, 2002.

## SEMESTER IV

### USCSBn20 - SKILL BASED ELECTIVE: DESIGN AND ANIMATION

<b>Year:</b> II	<b>Course Code:</b> USCSBn20	<b>Title of the Course:</b> Skill Based Elective: Design and Animation	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 40+60
<b>Sem:</b> IV							

#### Course Learning Objectives (CLO)

1. To learn the basics and fundamentals of Multimedia.
2. To introduce Multimedia components and tools.
3. To understand how multimedia can be incorporated.
4. To study the various applications of design techniques.
5. Demonstrate in depth knowledge of multimedia development tools.

#### Course Outcomes (COs)

The Learners will be able to

1. Understand Multimedia components using various tools and techniques.
2. Analyze and Interpret Multimedia Data.
3. Discuss about different types of media format and their properties.
4. Understand and apply principles of design into given projects.
5. Acquire and analyze different ideas about designs and its implementation.

## Course Syllabus

### Unit I

(Hour 5)

- 1.1 Introduction to Multimedia – The Elements of Multimedia System. (K2)
- 1.2 Using Multimedia: Benefits of using Multimedia. (K1, K2)
- 1.3 Multimedia Platform Multimedia Hardware. (K2, K3)
- 1.4 System Software. (K2, K3)
- 1.5 Future Directions. (K2)
- 1.6 Storage for Multimedia: Choice of Storage – Magnetic Media – Optical Media. (K2)

### Unit II

(Hour 5)

- 2.1 Introduction – Bitmaps and Vectors Toolbox. (K2)
- 2.2 Selection tools – Painting tools – Editing tools – Retouching Tool( K2)
- 2.3 Colors setting. (K1, K2)
- 2.4 Layer Working with Layers. (K1, K2)
- 2.5 Layer Styles – Locking Layers. (K2)
- 2.6 Merging Layers – Managing Layers Components – Palette. (K3)

### Unit II

(Hour 5)

- 3.1 Introduction flash – Basics. (K2)
- 3.2 Creating objects – Editing objects. (K3, K6)
- 3.3 Color and text – Symbols and instances. (K2)
- 3.4 Library – Text Animation – Motion Tweening. (K2, K3)
- 3.5 Shape Tweening – Motion Guide. (K3)
- 3.6 Movie Clip – Working with Action Script. (K3)

### Unit IV

(K6)

(Hour 8)

1. Create an Action in Photoshop.
2. Color Transformation Using Photoshop.
3. Design a Book Cover in Photoshop.
4. Create an Animation using Photoshop.

### Unit V

(K6)

(Hour 7)

5. Traffic Light Control Using Action Script in Flash.
6. Create a Slide Show Presentation in Flash.
7. Design a Greeting Card Using Button in Flash.
8. Create a Public Service Awareness Using Action Script in Flash.

### Text Books

1. “Photoshop CS6 in Simple Steps”, Paperback, Kogent Learning Solutions Inc., 2012.
2. “Flash CS5 in Simple Steps”, Kogent Learning Solutions Inc., Dreamtech Press Publication, 2011.

### **Books for Reference**

1. Chris Grover with E.A.Vander Veer, "Flash CS4", Pogue Press O'Reilly,2008.

**SEMESTER V/VI**  
**UGCSAn20: NON MAJOR ELECTIVE: STATISTICAL PACKAGE FOR SOCIAL  
 SICENCE**

<b>Year: III</b>	<b>Course Code:</b> UGCSAn20	<b>Title of the Course:</b> Non Major Elective: Statistical Package For Social Science	<b>Course Type:</b> Practical	<b>Course Category:</b> Non Major Elective	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 40+60
----------------------	-------------------------------------	---	--------------------------------------	--	-----------------	---------------------	-----------------------

**Course Learning Objectives (CLO)**

1. The students will understand the data analysis, define variables and perform variable manipulation and transformation.
2. Understand the basic workings of SPSS and perform basic statistical analysis.
3. To perform a wide range of data management in SPSS.
4. To introduce the basic practice of statistics by using SPSS statistics.
5. To perform advanced analysis of SPSS.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the basic workings of SPSS software using menus and buttons and perform basic statistical analysis.
2. Analyze data and create simple tables, charts and frequencies.
3. Introduce data analysis and perform basic statistical analysis.
4. Analyze data for reporting descriptive statistics, graphics and correlations
5. Perform simple analysis of Two way sample and Chi-square tests.

(Low -L, Medium -M, High-H)

## Course Syllabus

### Unit I

(Hour 10)

- 1.1 SPSS Introduction (K1)
- 1.2 Task Bar and Start Menu (K2)
- 1.3 Common Buttons – Commonly used Windows (K2)
- 1.4 Creating and Editing a Data File (K6)
- 1.5 Select Case – Sort Case – Merging Files (K5)
- 1.6 Printing Results. (K5)

### Unit II

(Hour 10)

- 2.1 Graphs and Chart Producing Graphs and Charts (K6)
- 2.2 Bar Charts – Line Graphs (K6)
- 2.3 Pie Chart – Box Plots (K6)
- 2.4 Error Bar Charts (K1, K6)
- 2.5 Histograms – Scatter Plots (K1.K6)
- 2.6 Understanding Frequencies. (K2)

### Unit III

(Hour 10)

- 3.1 Descriptive Statistic Normal Distribution Mean, Median, Mode (K2. K6)
- 3.2 Variance & Standard Deviation (K1.K6)
- 3.3 Skewness (K2. K6)
- 3.4 Kurtosis (K2. K6)
- 3.5 Maximum, Minimum, Range and Sum (K2. K6)
- 3.6 Standard Error. (K2)

### Unit IV

(Hour 8)

1. Creating data file, assigning names and value to variables and saving it.(K1,K6)
2. Creating data file and find the percentage of subjects in each group. (K2, K6)
3. Running a simple analysis to create a frequency table. (K4)
4. Creating a new variable based on an existing variable. (K6)
5. Creating charts for different Variables. (K2, K5)

**Unit V****(Hour 7)**

6. Statistical application to obtain central tendency or dispersion values. (K3)
7. Editing of tables & charts, fixing tables and charts in word document. (K5)
8. Running a simple analysis to create different correlation (K5, K6)
9. Running a simple analysis to create different 't' tests. (K5, K6)
10. Creating two-way tables and to obtain Chi – Square values. (K6)

**Text Book**

1. Darren George & Paul Mallery, "SPSS for Windows step by step", Pearson Education in South Asia, 8<sup>th</sup> Edition.

**Books for Reference**

1. Sabine Landau & Brain S.Everitt, "A Handbook of Statistical Analyses using SPSS", A CRC Press Company, 2004

**UGCSBn20 - NON-MAJOR ELECTIVE: WEB DESIGNING USING**  
**DREAMWEAVER**

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UGCSBn20	<b>Title of the Course:</b> Non-Major Elective : Web Designing Using Dreamweaver	<b>Course Type:</b> Practical	<b>Course Category:</b> Non Major Elective	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 40+60
----------------------------	---------------------------------	--	----------------------------------	---	-----------------	---------------------	-----------------------

**Course Learning Objectives (CLO)**

1. To build an understanding of basic concepts of web site.
2. To develop programming skills in analyzing the usability of a web site.
3. Learn techniques of responsive web design software.
4. To be able to create different kind of web page based on the user requirements.
5. To implement text based, audio and video based object techniques using Dreamweaver software.
6. To develop software using different kind of web page based on the user requirements.

**Course Outcomes (COs)**

The Learners will be able to

1. Understand the basic concept of Web designing using Dreamweaver software.
2. Creating the web pages using background colors, property inspector tools in HTML.
3. Develop how to create web page links.
4. Create tables, frames and frameset using Dreamweaver tools.
5. Apply style sheet, adding forms to a web page.

## Course Syllabus

### Unit I

(Hour 10)

- 1.1 Opening the Document Window – Locating the Little Bar (K2)
- 1.2 Menu Bar Components – Menu Bar – Toolbar – Status Bar (K2)
- 1.3 Design View – Object Panel – Launchers (K2, K4)
- 1.4 Property Inspector – Creating a New Site (K4, K6)
- 1.5 Local Vs. Remote Site – Designing a Local Site (K2, K4)
- 1.6 Creating and Opening a Site – Setting up the Sitting Window – Accessing the Site. (K5, K6)

### Unit II

(Hour 10)

- 2.1 Working with HTML Tags - Code Inspector (K2, K4)
- 2.2 Quick Tag Editor – Importing HTML (K2, K5)
- 2.3 Creating Web Page Opening and Closing Pages – Copying and Pasting Test (K4, K6)
- 2.4 Working with Text and Property Inspector – Working with Background Colors (K3,K4)
- 2.5 Leaving Links – Working with Anchors (K4, K5)
- 2.6 Working with Image Link – Creating an Email Links. (K5, K6)

### Unit III

(Hour 10)

- 3.1 Definition of Tables – Creating and Editing Tables – Preformatted Tables ( K2, K4)
- 3.2 Frames and Frameset: Creating and Editing Frames (K4, K6)
- 3.3 Adding Multimedia to a Website - CSS (K3, K5)
- 3.4 Applying Style Sheet to a Webpage – CGI (K3, K5)
- 3.5 Form – Adding Form in the Project (K2, K3)
- 3.6 Creating Layers – Customizing Dreamweaver. (K6)

### Unit IV

(Hour 8)

#### Practical Programs

(K3, K4, K5, K6)

1. Create and design a webpage for Clipart Gallery.
2. Create a webpage for online shopping.
3. Create a banner using various tools (College day, Graduate day).
4. Create a webpage for sports day.

## **Unit V**

**(Hour 7)**

### **Practical Programs**

(K3, K4, K5, K6)

5. Create a web page for Class time tables using table properties.
6. Design an E-Book with appropriate navigation.
7. Create a webpage for advertising a product using rollover image.
8. Create a webpage using layers.

### **Text Books**

1. Candace Garrod, “Dreamweaver Rapid Web Design”, Prentice Hall of India, 2001.
2. Jim Maivald Publisher, “Adobe Dreamweaver CC Classroom in a Book”, (2019 Release), 1<sup>st</sup> Edition, Adobe Press, 2018.

### **Books for Reference**

1. Hirdesh Bhardwaj, “Web Designing”, 1<sup>st</sup> Edition, Pothi.com, 2016.

### **Open Educational Resources (OER)**

1. <http://makeawebsitehub.com/dreamweaver-tutorial/>
2. <http://www.uis.edu/informationtechnologyservices/wp-content/uploads/sites/106/2013/04/DWIntro.pdf>
3. <http://www.egr.msu.edu/classes/ece480/capstone/fall12/group05/Documents/Application%20Note%20-%20Nan%20Xia.pdf>

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*  
**Gandhi Nagar, Vellore-632 006**

**Department of Mathematics UG)**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighbouring districts.

**B) NAME OF THE PROGRAMME: B.Sc. Mathematics**

**Vision:**

To enhance the logical reasoning, analytical thinking and problem-solving skills of the students and prepare them to be lifelong learners who will be socially responsible to navigate the complexities of a rapidly changing society.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

A candidate who has qualified in Higher Secondary Examination conducted by Government of Tamil Nadu or an examination accepted as equivalent thereto by the Syndicate with Physics as one of the subjects is eligible for seeking admission to the B.Sc. Mathematics course.

### D) List of courses

Sem	Part	Paper Code	Title of Subject	Hours/ Week	Exam Hours		Credits	Marks
					Th	Pr		
I	I	ULTAA20	Tamil Paper – I	6	3	-	3	40+60
	II	UENGA20	English Paper – I	6	3	-	3	40+60

## **E) Programme Outcomes (PO)**

On completion of the Undergraduate Programme (UG), students will be able to:

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## **F) Programme Specific Outcomes (PSO)**

### **PSO1: Disciplinary knowledge**

Capability to demonstrate comprehensive knowledge of Mathematics and understand one or more disciplines which form a part of an undergraduate programme of study.

### **PSO2: Communication skills**

- i. Ability to communicate various concepts of mathematics effectively using examples and their geometrical visualizations.
- ii. Ability to use mathematics as a precise language of communication in other branches of human knowledge and communicate long standing unsolved problems in mathematics.
- iii. Ability to show the importance of mathematics as precursor to various scientific developments since the beginning of the civilization.
- iv. Ability to explain the development of mathematics in the civilizational context and its role as queen of all sciences.

### **PSO3: Critical thinking**

Ability to employ critical thinking in understanding the concepts in every area of Mathematics.

### **PSO4: Analytical thinking**

Ability to analyze the results and apply them in various problems appearing in different branches of mathematics.

### **PSO5: Problem solving**

- i. Capability to solve problems in computer graphics using concepts of linear algebra.
- ii. Capability to solve various models such as growth and decay models, radioactive decay model, drug assimilation, LCR circuits and population models using techniques of differential equations.
- iii. Ability to solve linear system of equations, linear programming problems and network flow problems.
- iv. Ability to provide new solutions using the domain knowledge of mathematics.

**PSO6: Digital literacy**

- i. Capability to understand and apply the programming concepts of C and C++ to mathematical investigations and problem solving.
- ii. Capability to understand and apply the programming concepts of R to statistical investigations and problem solving.

<b>PSO</b>	<b>PO</b>

**UCMAA20 – Algebra and Trigonometry**

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> UCMAA20	<b>Title of the Course:</b> Algebra and Trigonometry	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>CREDITS</b> 4	<b>MARKS</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To improve problem solving skills in Algebra
2. To deepen the knowledge in basic concepts of Trigonometry

**Course Outcomes (CO)**

The learners will be able to

1. Perceive the fundamental concepts in the theory of equations.
2. Solve various types of higher order equations.
3. Know about matrices and their applications.
4. Solve problems involving trigonometric functions.
5. Analyze and relate hyperbolic and circular functions.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I : Theory of Equations

(12 hours)

- 1.1 Basic definitions (K1)
- 1.2 Polynomial equation(K1, K2)
- 1.3 Imaginary and Irrational roots(K1, K2, K3)
- 1.4 Symmetric functions of roots (K1, K2, K3, K4)
- 1.5 Sum of the powers of the roots (K1, K2, K3, K4)
- 1.6 Transformation of equations (K1, K2, K3, K4)

### Unit II: Theory of Equations (Continued)

(12 hours)

- 2.1 Types of Reciprocal equations (K1, K2, K3, K4)
- 2.2 Descarte's rule of signs (K1, K2, K3, K4)
- 2.3 Horner's method (K1, K2, K3, K4)
- 2.4 Cardon's method (K1, K2, K3, K4)
- 2.5 Biquadratic equations (K1, K2, K3, K4)
- 2.6 Ferrari's method (K1, K2, K3, K4)

### Unit III: Series and Matrices

(12 hours)

- 3.1 Statement of Binomial, Exponential and Logarithm series (K1)
- 3.2 Summation and Approximation of Series (K1, K2, K3, K4)
- 3.3 Types of matrices (K1, K2)
- 3.4 Sums on Eigen values and Eigen vectors (K1, K2, K3, K4)
- 3.5 Sums on Cayley-Hamilton Theorem (K1, K2, K3, K4)
- 3.6 Diagonalisation of a matrix (K1, K2, K3, K4)

### Unit IV: Expansions of Trigonometric Functions

(12 hours)

- 4.1 Formulae of Trigonometric Functions (K1)
- 4.2 Expansion of  $\sin n\theta$ ,  $\cos n\theta$ ,  $\tan n\theta$  (K1, K2, K3, K4)
- 4.3 Expansion of  $\sin^n \theta$ ,  $\cos^n \theta$  (K1, K2, K3, K4)
- 4.4 Expansion of  $\sin\theta$ ,  $\cos\theta$ ,  $\tan\theta$  in terms of  $\theta$  (K1, K2, K3, K4)
- 4.5 Application of Trigonometric functions to limits (K1, K2, K3, K4)
- 4.6 Approximations of Trigonometric functions (K1, K2, K3, K4)

### Unit V: Hyperbolic Functions

(12 hours)

- 5.1 Formulae, properties of Hyperbolic Functions (K1, K2)
- 5.2 Sums on Hyperbolic Functions (K1, K2, K3, K4)
- 5.3 Formulae, properties of Inverse Hyperbolic functions (K1, K2)
- 5.4 Inverse hyperbolic functions (K1, K2, K3, K4)
- 5.5 Relation between hyperbolic and circular functions (K1, K2, K3, K4)
- 5.6 Logarithm of complex quantities (K1, K2, K3, K4)

**SEMESTER – I**  
**UCMAB20 – Calculus**

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: I</b>	UCMAB20	Calculus	Theory	Core	5	4	100

**Course Objectives**

1. To introduce basic properties of integrals
2. To understand the concepts of multiple integration
3. To improve analytical skills

**Course Outcomes (CO)**

The learners will be able to

1. Calculate the radius of curvature, center of curvature, evolutes and involutes.
2. Understand and find the asymptotes of rational curves.
3. Determine the area and volume by applying the technique of double and triple integrals.
4. Determine and use various techniques to solve the variety of integration problems.
5. Evaluate beta and gamma functions and apply beta and gamma functions in double and triple integrals.

## Course Syllabus

### Unit I: Curvature

(15 hours)

- 1.1 Radius of curvature in Cartesian coordinates (K1, K2, K3, K4)
- 1.2 Radius of curvature in Polar coordinates (K1, K2, K3, K4)
- 1.3 Centre of curvature in Cartesian coordinates (K1, K2, K3, K4)
- 1.4 Centre of curvature in Polar coordinates (K1, K2, K3, K4)
- 1.5 Circle of curvature (K1, K2, K3, K4)
- 1.6 Evolutes and Involutives (K1, K2, K3, K4)

### Unit II: Asymptotes and Envelopes:

(15 hours)

- 2.1 Asymptotes- Definition (K1, K2)
- 2.2 Methods of finding asymptotes of rational algebraic curves with special cases (Without proof) (K1, K2)
- 2.3 Envelopes – Definition (K1, K2)
- 2.4 Envelope for one parameter family of curves (K1, K2, K3, K4)
- 2.5 Problems on Envelope for one parameter family of curves (K1, K2, K3, K4)
- 2.6 Envelope for two parameter family of curves (K1, K2, K3, K4)

### Unit III: Integration

(15 hours)

- 3.1 Integration of irrational functions (K1, K2, K3, K4)
- 3.2 Integration of trigonometric functions (K1, K2, K3, K4)
- 3.3 Bernoulli's formula (K1, K2)
- 3.4 problems on Bernoulli's formula (K1, K2, K3, K4)
- 3.5 Properties of definite integrals (K1, K2, K3, K4)
- 3.6 Problems on definite integrals (K1, K2, K3, K4)

### Unit IV: Multiple Integrals

(15 hours)

- 4.1 Line integrals (K1, K2, K3, K4)
- 4.2 Double integrals (K1, K2, K3, K4)
- 4.3 Triple integrals (K1, K2, K3, K4)
- 4.4 Change of order of integration (K1, K2, K3, K4)
- 4.5 Applications of double integrals in finding area (K1, K2, K3, K4)
- 4.6 Applications of triple integrals in finding volume. (K1, K2, K3, K4)

### Unit V: Improper Integrals

(15 hours)

- 5.1 Improper integrals (Type I-Type VI) (K1, K2, K3, K4)
- 5.2 Improper integrals (Type VII-Type XII) (K1, K2, K3, K4)
- 5.3 Beta functions (K1, K2)
- 5.4 Gamma functions (K1, K2)
- 5.5 Applications of Beta in evaluation of double and triple integrals (K1, K2, K3, K4)
- 5.6 Applications of Gamma functions in evaluation of double and triple integrals (K1, K2, K3, K4)

**Text Book:**

**SEMESTER – II**  
**UCMAC20 – Vector Analysis and Fourier Series**

<b>Year: I</b> <b>SEM: II</b>	<b>Course Code:</b> UCMAC20	<b>Title of the Course:</b> Vector Analysis and Fourier Series	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To understand the fundamental concepts of vector analysis and apply the various techniques of vector integration in solving volume and surface integrals
2. To define Fourier series and express periodic functions as infinite series

**Course Outcomes (CO)**

The learners will be able to

1. Compute divergence, curl, directional derivatives and Gradients.
2. Calculate the unit normal and tangent to the surface.
3. Evaluate line integrals, surface integrals and volume integrals using vector integration.
4. Verify and Apply Green's Theorem, Gauss divergence Theorem, Stoke's Theorem.
5. Understand the nature of the Fourier series and find the Fourier coefficients.

## Course Syllabus

### Unit I: Differentiation of Vectors (15 hours)

- 1.1 Scalar and vector point functions (K1, K2, K3, K4)
- 1.2 Derivative of product of vectors (K1, K2, K3, K4)
- 1.3 Definition of del operator and gradient of a scalar point function (K1, K2, K3, K4)
- 1.4 Determination of unit tangent and unit normal vectors (K1, K2, K3, K4)
- 1.5 Directional derivative – Angle between two surfaces (K1, K2, K3, K4)
- 1.6 Equation of tangent plane – Equation of normal to the given surface. (K1, K2, K3, K4)

### Unit II: Differentiation of Vectors (Continued) (15 hours)

- 2.1 Divergence of a vector (K1, K2, K3, K4)
- 2.2 Curl of a vector (K1, K2, K3, K4)
- 2.3 Solenoidal vectors (K1, K2, K3, K4)
- 2.4 Irrotational vectors (K1, K2, K3, K4)
- 2.5 Vector identities and their applications (K1, K2, K3, K4)
- 2.6 Laplacian differential operator and its applications. (K1, K2, K3, K4)

### Unit III: Integration of Vectors (15 hours)

- 3.1 Integration of point functions (K1, K2, K3, K4)
- 3.2 Line integrals (K1, K2, K3, K4)
- 3.3 Surface integrals (K1, K2, K3, K4)
- 3.4 Problems on Surface integrals (K1, K2, K3, K4)
- 3.5 Volume integrals (K1, K2, K3, K4)
- 3.6 Problems on Volume integrals (K1, K2, K3, K4)

### Unit IV: Integral Theorems (15 hours)

- 4.1 Statement of Gauss Divergence theorem (K1, K2)
- 4.2 Verification of Gauss Divergence theorem (K1, K2, K3, K4)
- 4.3 Applications of Gauss Divergence theorem (K1, K2, K3, K4)
- 4.4 Statement of Green's theorem – Verification of Green's theorem (K1, K2, K3, K4)
- 4.5 Application of Green's theorem – Statement of Stokes' theorem
- 4.6 Verification of Stokes' theorem – Applications of Stokes' theorem (K1, K2, K3, K4).

### Unit V: Fourier series (15 hours)

- 5.1 Fourier series – Definition (K1, K2)
- 5.2 Finding Fourier Coefficients for a given function (K1, K2, K3, K4)
- 5.3 Finding Fourier Coefficients for a given periodic function with period  $2\pi$  (K1, K2, K3, K4)
- 5.4 Finding Fourier Coefficients for odd functions (K1, K2, K3, K4)
- 5.5 Finding Fourier Coefficients even functions (K1, K2, K3, K4)
- 5.6 Half-range Series (K1, K2, K3, K4)

<b>Year: I</b> <b>SEM: II</b>	<b>Course Code:</b> UCMAD20	<b>Title of the Course:</b> Differential Equations and Laplace Transforms	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>CREDITS</b> 4	<b>MARKS</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To improve problem solving skills in Differential Equations and Laplace Transforms
2. To expose students to different techniques of finding solution to these equations.

**Course Outcomes (CO)**

The learners will be able to

1. Solve the standard forms of first order differential equations.
2. Solve the second order differential equations with constant coefficients and variable coefficients.
3. Find the complete, singular and general integral of PDE.
4. Analyze the properties of Laplace Transforms.
5. Solve differential equations using Laplace Transforms.

## Course Syllabus

### Unit I: First Order Differential Equations (12 hours)

- 1.1 Introduction and Definitions of Differential Equations (K1, K2)
- 1.2 First order higher degree (K1, K2, K3, K4)
- 1.3 Solvable for p, x and y. (K1, K2, K3, K4)
- 1.4 Solving Clairaut's form (K1, K2, K3, K4)
- 1.5 Exact differential equations (K1, K2, K3, K4)
- 1.6 Total differential equations  $Pdx + Qdy + Rdz = 0$  (K1, K2, K3, K4)

### Unit II: Second Order Differential Equations (12 hours)

- 2.1 Introduction of Second order differential equations (K1)
- 2.2 Sums on Second order equations with constant coefficients (K1, K2, K3, K4)
- 2.3 Finding P.I for  $e^{ax}V$ , where V is  $x^m$ ,  $\cos mx$ ,  $\sin mx$  (m is a positive constant) (K1, K2, K3, K4)
- 2.4 Solving Second order differential equations (K1, K2, K3, K4)
- 2.5 Second order differential equations with variable coefficients (K1, K2, K3, K4)
- 2.6 Method of variation of parameters. (K1, K2, K3, K4)

### Unit III: Partial Differential Equations (12 hours)

- 3.1 Formation of P.D.E by eliminating arbitrary constants (K1, K2, K3, K4)
- 3.2 Formation of P.D.E by eliminating arbitrary functions (K1, K2, K3, K4)
- 3.3 Definition of Complete, Singular and general integral (K1, K2, K3, K4)
- 3.4 Solution of equations of standard types:  $f(p,q) = 0$ ;  $f(x,p,q) = 0$ ,  $f(y,p,q) = 0$ ,  $f(z,p,q) = 0$ ;  
 $f_1(x,p) = f_2(y,p)$  (K1, K2, K3, K4)
- 3.5 Solution of Clairaut's form (K1, K2, K3, K4)
- 3.6 Solution of Lagrange's method (K1, K2, K3, K4)

### Unit IV: Laplace Transforms (12 hours)

- 4.1 Definition of Laplace Transform (K1, K2)
- 4.2 Transforms of elementary functions (K1, K2, K3, K4)
- 4.3 Properties of Laplace Transform (K1, K2, K3)
- 4.4 Laplace Transforms of derivatives (K1, K2, K3, K4)
- 4.5 Laplace Transforms of integrals (K1, K2, K3, K4)
- 4.6 Periodic function of Laplace transforms. (K1, K2, K3, K4)

### Unit V: Applications of Laplace Transforms (12 hours)

- 5.1 Introduction of Inverse Laplace transforms (K1, K2)
- 5.2 Basic properties of Inverse Laplace Transform (K1, K2)
- 5.3 Sums on Inverse Laplace transform (K1, K2, K3, K4)
- 5.4 Introduction of linear Second order Differential equations (K1, K2)
- 5.5 Solution of linear ordinary differential equations of second order (K1, K2, K3, K4)
- 5.6 Solution of Second order differential equation with constant coefficients using Laplace Transformations (K1, K2, K3, K4)

**Text Books:**

<b>Year: II</b> <b>SEM:III</b>	<b>Course Code:</b> UCMAE20	<b>Title of the Course:</b> Solid Geometry	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce various concepts of three-dimensional Analytical Solid Geometry.
2. To understand and deepen the knowledge related to three-dimensional Analytical Solid Geometry.

**Course Outcomes (CO)**

The learners will be able to

1. Comprehend the basic concepts of plane and find the equation of a plane under given conditions.
2. Understand the basic concepts of straight line and skew lines and also find the equation of a straight line under given conditions, find the length and equations of the shortest distance between two skew lines.
3. Understand the basic concepts of sphere and find the equation of a sphere under given conditions.
4. Familiarize with cone, right circular cone, enveloping cone and reciprocal cone and also find the respective equations under given conditions.
5. Familiarize with cylinder, enveloping cylinder and right circular cylinder and also find the respective equations under given conditions.

## Course Syllabus

### Unit 1: Plane (15 hours)

- 1.1 General equation of a plane (K1, K2, K3)
- 1.2 Equation of a plane in intercept form (K1, K2, K3, K4)
- 1.3 Equation of a plane in normal form (K1, K2, K3, K4)
- 1.4 Angle between two planes (K1, K2, K3)
- 1.5 Plane through the intersection of two given planes (K1, K2, K3, K4)
- 1.6 Condition for the homogenous equation of the second degree to represent a pair of planes (K1, K2, K3, K4)

### Unit 2: Straight Line (15 hours)

- 2.1 Symmetrical form of a straight line (K1, K2, K3)
- 2.2 Equation of a straight line passing through two given points (K1, K2, K3)
- 2.3 Expressing the equation of a line in symmetrical form (K1, K2, K3, K4)
- 2.4 Image of a point in the given plane (K1, K2, K3, K4)
- 2.5 Image of a line in the given plane (K1, K2, K3, K4)
- 2.6 Length and equations of the shortest distance between two skew lines (K1, K2, K3, K4)

### Unit 3: Sphere (15 hours)

- 3.1 Equation of a sphere (K1, K2, K3)
- 3.2 Length of the tangent from a point to the given sphere (K1, K2, K3)
- 3.3 Equation of the tangent plane at a point to the given sphere (K1, K2, K3, K4)
- 3.4 Section of a sphere by a plane (K1, K2, K3, K4)
- 3.5 Equation of a sphere passing through a given circle (K1, K2, K3, K4)
- 3.6 Condition for orthogonality of two spheres (K1, K2, K3, K4)

### Unit 4: Cone (15 hours)

- 4.1 Equation of a cone (K1, K2, K3, K4)
- 4.2 Condition for the general equation of the second degree to represent a cone (K1, K2, K3, K4)
- 4.3 Right Circular Cone (K1, K2, K3, K4)
- 4.4 Enveloping Cone (K1, K2, K3, K4)
- 4.5 Tangency of a plane to a cone (K1, K2, K3)
- 4.6 Reciprocal Cone (K1, K2, K3)

### Unit 5: Cylinder (15 hours)

- 5.1 Equation of a cylinder with a given generator and a given guiding curve (K1, K2, K3, K4)
- 5.2 Enveloping cylinder (K1, K2, K3, K4)
- 5.3 Enveloping cylinder as a limiting form of an enveloping cone (K1, K2, K3)
- 5.4 Equation of a right circular cylinder with a given axis and a given radius (K1, K2, K3, K4)
- 5.5 Equation of a right circular cylinder with a given axis and passing through a given point (K1, K2, K3, K4)
- 5.6. Equation of a right circular cylinder passing through a circle (K1, K2, K3, K4)

**UCMAF20 - Statics**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> UCMAF20	<b>Title of the Course:</b> Statics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To develop broad knowledge of Statics and understanding of definitions, concepts, principles and theorems.
2. To enhance the ability of learners to apply the knowledge and skills acquired by them during the course to solve specific theoretical and applied problems in Statics.

**Course Outcomes (CO)**

The learners will be able to

1. Familiarize with subject matter, which has been the single center, to which mathematicians, physicists, astronomers, and engineers were drawn together.
2. Understand necessary conditions for the equilibrium of particles acted upon by various forces and learn the principle of virtual work for a system of coplanar forces acting on a rigid body.
3. Understand the reduction of force system to a resultant force acting at a base point and a resultant couple, which is independent of the choice of base of reduction.
4. Understand static friction that exists between a stationary object and the surface on which it is resting and apply the knowledge and skills to solve specific theoretical and applied problems.
5. Construct center of gravity of some materialistic systems.

## Course Syllabus

### Unit I: Force

(15 hours)

- 1.1 Newton's Laws of motion (K1,K2)
  - 1.2 Force (K1,K2, K3)
  - 1.3 Resultant of two forces on a particle – Book works (K1,K2, K3)
  - 1.4 Resultant of two forces on a particle – Problems (K1,K2, K3, K4)
  - 1.5 Resultant of three forces related to a triangle acting at a point (K1,K2, K3, K4)
  - 1.6 Resultant of several forces acting on a particle (K1,K2, K3, K4)
- (Chapter 2: Sections 2.1, 2.1.1, 2.2, 2.2.1, 2.2.2; Omit 2.1.2)

### Unit II: Forces on a Rigid Body

(15 hours)

- 2.1 Equilibrium of a particle under three forces (K1, K2)
  - 2.2 Triangle of forces-Polygon of forces (K1, K2)
  - 2.3 Lami's theorem (K1, K2, K3)
  - 2.4 Equilibrium of a particle under several forces (K1, K2, K3)
  - 2.5 Equilibrium of a particle – Problems (K1, K2, K3, K4)
  - 2.6 Moment of a force – Moment of a force about a line – Scalar moment (K1, K2)
- (Chapter 3: Sections 3.1, 3.1.1, 3.1.2, Chapter 4: Sections 4.1, 4.1.1, 4.1.2.).

### Unit III: Forces on a Rigid Body (Continued)

(15 hours)

- 3.1 Parallel forces – Point of application of resultant of many parallel forces (K1, K2, K3, K4)
  - 3.2 Varignon's theorem (K1, K2, K3, K4)
  - 3.3 Parallel forces at the vertices of a triangle (K1, K2, K3, K4)
  - 3.4 Forces along the sides of a triangle (K1, K2, K3, K4)
  - 3.5 Couples – Moment of a couple – Arm and axis of a couple (K1, K2, K3, K4)
  - 3.6 Resultant of several coplanar forces-Moment of a certain couple as an area (K1, K2, K3, K4)
- (Chapter 4: Sections 4.4, 4.4.1, 4.4.2, 4.4.3, 4.5, 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1)

### Unit IV: Friction

(15 hours)

- 4.1 Types of forces – Friction – Definitions (K1, K2)
  - 4.2 Laws of friction (K1, K2)
  - 4.3 Limiting equilibrium of a particle on an inclined plane – Book Works (K1, K2, K3)
  - 4.4 Limiting equilibrium of a particle on an inclined plane – Problems (K1, K2, K3, K4)
  - 4.5 Problems involving frictional forces (K1, K2, K3, K4)
  - 4.6 Problems involving frictional forces (K1, K2, K3, K4)
- (Chapter 2: Section 2.1.2, Chapter 3: Section 3.2, Chapter 5: Section 5.2; Omit 5.2.1)

### Unit V: Centre of Mass

(15 hours)

- 5.1 Centre of mass (K1, K2)
  - 5.2 Centre of gravity (K1, K2)
  - 5.3 Finding mass centre -Finding mass centre (not using integration) - Theory (K1, K2, K3, K4)
  - 5.4 Finding mass centre (not using integration) – Problems (K1, K2, K3, K4)
  - 5.5 Finding mass centre using integration (K1, K2, K3, K4)
  - 5.6 Finding mass centre using integration (K1, K2, K3, K4)
- (Chapter 6: Sections 6.1, 6.1.1, 6.2, 6.2.1, 6.2.2)

**SEMESTER – III**  
**UAMSA20 – Mathematical Statistics I**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> UAMSA20	<b>Title of the Course:</b> Mathematical Statistics-I	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To study Statistics from a purely mathematical standpoint using Probability theory as well as other branches of Mathematics.
2. To understand the concepts of random variables and probability functions.
3. To demonstrate knowledge of probability and the standard statistical distributions.
4. To recognize the fundamental meanings of correlation and regression.

**Course Outcomes (CO)**

The learners will be able to

1. Comprehend the fundamentals of probability.
2. Know about random variables of one and two dimensions.
3. Learn about the measures of central tendency and concepts of moments.
4. Acquire knowledge about discrete and continuous distributions.
5. Apply correlation and regression for the investigation of relationship between the variables.

## Course Syllabus

### **Unit I: Theory of Probability** (18 hours)

- 1.1 Definition of probability and basics (K1, K2)
- 1.2 Independence of events (K1, K2, K3)
- 1.3 Addition theorem (K1, K2)
- 1.4 Conditional probability (K1, K2, K3)
- 1.5 Multiplication Law of probability (K1, K2, K3, K4)
- 1.6 Bayes' theorem (K2, K3, K4)

### **Unit II: Random Variables** (18 hours)

- 2.1 Discrete and continuous random variables - Probability distribution and distribution Function (K1, K2, K3)
- 2.2 Definition of two-dimensional random variable (K1K2)
- 2.3 Probability distribution (K2, K3, K4)
- 2.4 Probability density function (K2, K3, K4)
- 2.5 Marginal and conditional distributions (K1, K2, K3, K4)
- 2.6 Stochastic independence of random variables (K2, K3)

### **Unit III: Characteristics of Random Variables** (18 hours)

- 3.1 Mathematical Expectation and Properties (K1, K2, K3)
- 3.2 Variance, Standard deviation, Mean deviation (K1, K2, K3)
- 3.3 Tchebychev's inequality (K2, K3, K4)
- 3.4 Raw and central moments and relation between them (K1, K2, K3)
- 3.5 Moment generating function (mgf) and properties of mgf (K1, K2, K3, K4)
- 3.6 Uniqueness theorem (statement only), Characteristic function and properties (K1, K2, K3, K4)

### **Unit IV: Standard Distributions** (18 hours)

- 4.1 Binomial distribution (K1, K2, K3, K4)
- 4.2 Poisson distribution (K1, K2, K3, K4)
- 4.3 Normal distribution (K1, K2, K3,)
- 4.4 Normal distribution (continued) (K1, K2, K3, K4)
- 4.5 Uniform distribution (K1, K2, K3)
- 4.6 Rectangular distribution. (K1, K2, K3)

### **Unit V: Correlation and Regression** (18 hours)

- 5.1 Correlation, types of correlation and Karl Pearson's coefficient of correlation (K1, K2)
- 5.2 Properties of correlation coefficient (K1, K2)
- 5.3 Spearman's rank correlation coefficient (K1, K2)
- 5.4 Computation of correlation and rank correlation coefficient for raw and grouped data (K3, K4)
- 5.5 Regression lines definition, derivation, angle between regression lines, regression coefficient properties (K1, K2)
- 5.6 Computation of regression lines for raw and grouped data. (K3, K4)

**SEMESTER – III**  
**USMAAn20 – Numerical Methods**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> USMAAn20	<b>Title of the Course:</b> Numerical Methods	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>MARKS</b> 100
------------------------------------	---------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce various concepts of numerical methods.
2. To apply them and obtain the approximate solutions to mathematical problems.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the operators of finite differences and express any value of  $y$  in terms of the forward differences of  $y_0$  and the backward differences of  $y_n$ .
2. Apply interpolating techniques for equal intervals by Newton's method.
3. Apply central difference formulae to get the intermediate values of given data.
4. Apply interpolating techniques for unequal intervals by divided difference formula and Lagrange's interpolation formula.
5. Evaluate the gradient at any point of a graph using numerical differentiation and find the area under curved surface, velocity, etc. using numerical integration.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Finite Differences

(6 hours)

First difference – Operators:  $\Delta, \nabla, \mu, \delta$ , E and D - Properties of operators – Relation between the operators - Express any value of y in terms of  $y_n$  and the backward differences of  $y_n$  - Differences of a polynomial – Factorial polynomial. (K1, K2, K3, K4)

### Unit II: Interpolation with Equal Intervals

(6 hours)

Gregory-Newton forward interpolation formula (for equal intervals) – Gregory-Newton Backward interpolation formula (for equal intervals) - Equidistant terms with one or more missing values (K1, K2, K3, K4)

### Unit III: Central Difference Interpolation Formulae

(6 hours)

Central differences and central differences table – Gauss's forward interpolation formula – Gauss's backward interpolation formula- Stirling's formula – Bessel's formula. (K1, K2, K3, K4)

### Unit IV: Interpolation with Unequal Intervals

(6 hours)

Divided differences – Properties of divided differences – Relation between divided differences and forward differences – Theorem: Newton's divided difference formula – Deduction: Deduce Gregory Newton interpolation forward formula for equal intervals- Lagrange's interpolation formula – Different form of Lagrange's interpolation formula. (K1, K2, K3, K4)

### Unit V: Numerical Differentiation and Integration

(6 hours)

Newton's forward difference formula to get the derivative – Newton's Backward difference formula to get the derivative – Derivative using Stirling's formula- A general quadrature formula for equidistant ordinates–Trapezoidal rule –Simpson's one-third rule – Simpson's three-eighth rule. (K1, K2, K3, K4)

**Course Objectives**

1. To apply problem solving skills to real life situations.
2. To develop logical and analytical skills.

**Course Outcomes (CO)**

The learners will be able to

1. Translate the real-world problems into linear programming problems and obtain solutions.
2. Apply the transportation problem techniques for the optimization of cost.
3. Solve the assignment problem which deals with the allocation of various sources to various destinations on one-to-one basis.
4. Find the optimum strategies of the players and the value of the 2-person games.
5. Perform network planning using PERT & CPM techniques which provide a methodology for planning and controlling of a project.

## Course Syllabus

### Unit I: Linear Programming

(12 hours)

- 1.1 Introduction (K1, K2)
- 1.2 Scope of OR (K1, K2)
- 1.3 Formulation a Linear Programming Problem (K1, K2, K3)
- 1.4 Graphical Method Standard Form of LPP – Simplex Method (K1, K2, K3, K4)
- 1.5 Standard Form of LPP – Simplex Method (K1, K2, K3, K4)
- 1.6 Simplex Method – Problems (K1, K2, K3, K4)

### Unit II: Transportation Model

(12 hours)

- 2.1 Introduction – Mathematical Formulation (K1, K2)
- 2.2 Finding Initial Basic Feasible Solution- North West Corner Rule (K1, K2, K3, K4)
- 2.3 Matrix Minima Method (K1, K2, K3, K4)
- 2.4 Vogel's Approximation Method – Optimality Test – MODI Method (K1, K2, K3, K4)
- 2.5 Unbalanced Transportation Problem (K1, K2, K3, K4)
- 2.6 Maximization Problem (K1, K2, K3, K4)

### Unit III: Assignment Model

(12 hours)

- 3.1 Assignment Model Formulation of Assignment Problem (K1, K2)
- 3.2 Hungarian Method (K1, K2, K3, K4)
- 3.3 Multiple optimal - Non Square Matrix (K1, K2, K3, K4)
- 3.4 Maximization of Assignment Problem (K1, K2, K3, K4)
- 3.5 Restrictions on Assignment (K1, K2, K3, K4)
- 3.6 Travelling Salesman Problem – Mathematical Formulation – Solutions to Travelling Salesman Problem (K1, K2, K3, K4)

### Unit IV: Game Theory

(12 hours)

- 4.1 Introduction – Characteristics of Games – Definitions (K1, K2)
- 4.2 Two Person Zero-sum game with saddle point (K1, K2, K3, K4)
- 4.3 Maxmin-Minimax Principle (K1, K2, K3, K4)
- 4.4 Game Problems of Mixed Strategies Arithmetic and Algebraic Methods (K1, K2, K3, K4)
- 4.5 Method of Dominance (K1, K2, K3, K4)
- 4.6 Graphical Method for  $2 \times n$  or  $m \times 2$  games (without saddle point) (K1, K2, K3, K4)

### Unit V: PERT and CPM

(12 hours)

- 5.1 Introduction – Network Diagram Representation (K1, K2)
- 5.2 Rules for Constructing the Network (K1, K2)
- 5.3 Calculation and Critical path in Network Analysis (K1, K2, K3, K4)
- 5.4 Determination of Floats or Slack Times (K1, K2, K3, K4)
- 5.5 Critical path Method – Procedure of Determining the Critical path (K1, K2, K3, K4)

## 5.6 Program Evaluation and Review Technique (PERT). (K1, K2, K3, K4)

### **Text Book:**

**SEMESTER – IV**  
**UCMAH20-Dynamics**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>HOURS</b>
<b>SEM: IV</b>	UCMAH20	Dynamics	Theory	Core	4	4	100

**Course Objectives**

1. To develop balanced knowledge of Dynamics and understanding of definitions, concepts, principles and theorems in Dynamics.
2. To enhance the ability of learners to apply the knowledge and skills acquired by them during the course to solve specific theoretical and applied problems in Dynamics.

**Course Outcomes (CO)**

The learners will be able to

1. Familiarize with subject matter, which has been the single centre, to which mathematicians, physicists, astronomers, and engineers were drawn together.
2. Understand behaviour of motion of objects.
3. Understand simple harmonic motion and projectiles.
4. Express the effects of impact of spheres.
5. Demonstrate methods to locate central orbits.
6. Apply the knowledge and skills to solve specific theoretical and applied problems.

## Course Syllabus

### Unit I: Velocity (12 hours)

- 1.1 Basic units – Velocity – Velocity of a particle describing a circle (K1, K2)
  - 1.2 Resultant Velocity (K1, K2, K3, K4)
  - 1.3 Relative Velocity (K1, K2, K3, K4)
  - 1.4 Acceleration (K1, K2)
  - 1.5 Coplanar motion - Velocity and acceleration in a coplanar motion (K1, K2, K3, K4)
  - 1.6 Angular velocity – Relative angular velocity (K1, K2, K3, K4)
- (Chapter I: Sections 1.1, 1.2, 1.2.1, 1.2.2, 1.2.3, 1.3, 1.4, 1.4.1, 1.4.2, 1.4.3; Omit 1.3.1, 1.3.2)

### Unit II: Simple Harmonic Motion (12 hours)

- 2.1 Simple Harmonic motion - Definitions (K1, K2)
  - 2.2 Simple Harmonic motion – Book works (K1, K2, K3)
  - 2.3 Projection of a particle having a uniform circular motion (K1, K2)
  - 2.4 Composition of two simple harmonic motions of same period. (K1, K2)
  - 2.5 Simple Harmonic motion – Problems (K1, K2, K3, K4)
  - 2.6 Simple Harmonic motion – Problems (K1, K2, K3, K4)
- (Chapter 12: Sections 12.1, 12.1.1, 12.1.2)

### Unit III: Projectiles (12 hours)

- 3.1 Forces on a projectile (K1, K2)
  - 3.2 Displacement as a combination of vertical and horizontal displacements (K1, K2)
  - 3.3 Nature of a trajectory – Results pertaining to the motion of a projectile -  
Maximum horizontal range for a given velocity (K1, K2, K3, K4)
  - 3.4 Projectiles- Problems (K1, K2, K3, K4)
  - 3.5 Projectile projected on an inclined plane (K1, K2, K3, K4)
  - 3.6 Maximum range on an inclined plane (K1, K2, K3, K4)
- (Chapter 13: Sections 13.1, 13.1.1, 13.1.2, 13.1.3, 13.1.4, 13.2, 13.2.1; Omit 13.1.5, 13.1.6)

### Unit IV: Impact (12 hours)

- 4.1 Impact of spheres - Laws of Impact (K1, K2)
  - 4.2 Impact of two smooth spheres (K1, K2)
  - 4.3 Direct impact of two smooth spheres – Book works (K1, K2, K3)
  - 4.4 Direct impact of two smooth spheres – Problems (K1, K2, K3, K4)
  - 4.5 Oblique impact of two smooth spheres – Book works (K1, K2, K3)
  - 4.6 Oblique impact of two smooth spheres – Problems (K1, K2, K3, K4)
- (Chapter 14: Sections 14.2, 14.2.1, 14.3, 14.3.1, 14.5; Omit 14.4)

### Unit V: Central Orbit (12 hours)

- 5.1 Central orbit (K1, K2)
  - 5.2 Differential Equation of a central orbit (K1, K2, K3, K4)
  - 5.3 Laws of a central force (K1, K2)
  - 5.4 Methods to find the central orbits (K1, K2, K3, K4)
  - 5.5 Central orbit - Problems (K1, K2, K3, K4)
  - 5.6 Central orbit - Problems (K1, K2, K3, K4)
- (Chapter 16: Sections 16.2, 16.2.1, 16.2.2, 16.2.3)

**Text Book:**

**SEMESTER – IV**  
**UAMSB20 – Mathematical Statistics II**

<b>Year: II</b> <b>SEM: IV</b>	<b>Course Code:</b> UAMSB20	<b>Title of the Course:</b> Mathematical Statistics-II	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide a sound foundation in basic topics of modern statistical inference.
2. To study the concept of likelihood and derive the likelihood and associated functions of interest for simple models.
3. To construct confidence intervals for unknown parameters.
4. To demonstrate understanding of how to design experiments and surveys for efficiency.

**Course Outcomes (CO)**

The learners will be able to

1. Know the basic concepts of some advanced distributions.
2. Apply estimation theory to estimate the values of parameters.
3. Use appropriate sampling distributions for testing of hypothesis.
4. Apply chi-square test to find out the significant difference between expected and observed frequencies in one or more categories.
5. Use F-test to compare statistical model that has been fitted to a data that best fits the population from which the data was sampled.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Sampling Distributions

(18hours)

- 1.1 Parameter and statistic - sampling distribution - Standard error (K1, K2)
- 1.2 Sampling distribution of statistics (K1, K2)
- 1.3 Chi-square distribution -p.d.f derivation, moment generating function (K1, K2, K3, K4)
- 1.4 Chi-square distribution (continued) mean, variance, additive property (K1, K2, K3, K4)
- 1.5 Student's t distribution – moments - limiting form of t distribution (K1, K2, K3, K4)
- 1.6 F distribution – mean, variance (K1, K2, K3, K4)

### Unit II: Parametric Estimation

(18 hours)

- 2.1 Point estimation, Concept of unbiasedness, consistency, efficiency and sufficiency (K1, K2, K3)
- 2.2 Cramer Rao Inequality – Rao-Blackwell Theorem (K3, K4)
- 2.3 Methods of estimation - method of moments (K1, K2, K3, K4)
- 2.4 Method of maximum likelihood (K1, K2, K3, K4)
- 2.5 Interval Estimation - Confidence interval for mean - difference in means – proportion - difference in proportions (K1, K2, K3, K4)
- 2.6 Interval Estimation for variance using normal, t and Chi-square distributions (K1, K2, K3, K4)

### Unit III: Tests of Significance

(18 hours)

- 3.1 Tests of significance – definitions (K1, K2)
- 3.2 Tests of significance for large samples for mean and standard deviation (K1, K2, K3, K4)
- 3.3 Tests of significance for large samples for proportion and correlation coefficient (K1, K2, K3, K4)
- 3.4 Tests of significance for small samples – t,  $\chi^2$  test for mean and variance (K1, K2, K3, K4)
- 3.5 Test of significance for small samples - F test for mean, variance (K1, K2, K3, K4)
- 3.6 Tests of significance for small samples with regard to coefficient of correlation (K1, K2, K3, K4)

### Unit IV: Chi Square Tests

(18 hours)

- 4.1 Formula derivation for Chi-square test (K1, K2)
- 4.2 Chi-square test of goodness of fit (K3, K4)
- 4.3 Attribute (K1, K2, K3,)
- 4.4 coefficient of association (K1, K2, K3)
- 4.5 Contingency tables (K1, K2, K3)
- 4.6 Chi-square test for independence of attributes (K3, K4)

### Unit V: Analysis of Variance

(18hours)

- 5.1 Analysis of variance-one-way and two-way classification (K1, K2, K3, K4)
- 5.2 Basic principles of design of experiments (K1, K2)
- 5.3 Randomization – Replication - Randomized Block Design (K1, K2)
- 5.4 Randomized block design (K1, K2, K3, K4)
- 5.5 Completely Randomized block design (K1, K2, K3, K4)
- 5.6 Latin Square Design (K1, K2, K3, K4)

**SEMESTER – IV**  
**USMABn20 - R Programming Language**

<b>Year: II</b> <b>SEM: IV</b>	<b>Course Code:</b> USMABn20	<b>Title of the Course:</b> R Programming Language	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>HOURS</b> 100
-----------------------------------	---------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of basic R programming, thereby enhancing the logical thinking of the students with regard to programming.
2. To train the students to apply the programming concepts of R to statistical investigations and problem solving.

**Course Learning Outcomes (CLO)**

The learners will be able to

1. Familiarize the basics of programming in R such as vectors, arrays, data frames, etc.
2. Use the Decision making-branching and looping statements in R programming.
3. Represent data and Interpret results through graphical tools in R.
4. Calculate basic statistical measures and fit standard distributions using R.
5. Understand and apply the programming concepts of R to perform tests of significance.
6. Understand and apply the programming concepts of R to perform Analysis of Variance.

**(L-Low, M-Moderate, H-High)**

## Course Syllabus

### Unit I: Basics of R (6 hours)

Introduction and Preliminaries-Simple Manipulations; Numbers and Vectors-Arrays and Matrices - Lists and Data Frames-Reading Data from files (K1, K2, K3, K4)

### Unit II: Decision Making and Graphical Procedures (6 hours)

Grouping-Loops and Conditional Execution-Graphics on R-Scatter Plot-Line Graphs-Pie Charts-Bar Plots-Histograms-Frequency Polygons (K1, K2, K3, K4)

### Unit III: Statistical Measures & Probability Distributions (6 hours)

Mean, Median and Mode-Variance, Standard Deviation and Mean Deviation -Correlation and Regression-Standard Distributions -Binomial, Poisson and Normal Distributions (K1, K2, K3, K4)

### Unit IV: Tests of significance (6 hours)

z-Test-Test for Mean-Test for Proportion-Comparing two Means-Comparing two proportions- Student t-test and t-test for two Means- Chi-Square Test-Test for Independence of Attributes (K1, K2, K3, K4)

### Unit V: Analysis of Variance (6 hours)

Comparing more than two Means-Completely Randomized Design - One-Way Classification-Randomized Block Design-Two-Way Classification-Latin Square Design (K1, K2, K3, K4)

**SEMESTER – V**  
**UCMAI20 – Abstract Algebra**

<b>Year : III</b> <b>SEM : V</b>	<b>Course Code :</b> UCMAI20	<b>Title Of The Course :</b> Abstract Algebra	<b>Course Type :</b> Theory	<b>Course Category :</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>MARKS</b> 100
-------------------------------------	---------------------------------	--	--------------------------------	----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the concepts of abstract algebra.
2. To enable understanding of fundamental algebraic structures.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the concepts of groups and sub groups.
2. Know about normal subgroups, quotient groups, homomorphisms and isomorphisms.
3. Understand the concepts of automorphisms for constructing new groups from the given groups.
4. Have knowledge on concepts of ring theory.
5. Understand the concepts of maximal ideals, Euclidean rings and particular integral domain.

## Course Syllabus

### Unit I: Group Theory

(18 hours)

- 1.1 Definition of a group (K1, K2)
  - 1.2 Examples of groups (K1, K2, K3)
  - 1.3 Some preliminary lemmas (K2, K3)
  - 1.4 Subgroups (K1, K2, K3)
  - 1.5 Lagrange's theorem, corollaries to Lagrange's theorem (K1, K2, K3, K4)
  - 1.6 A Counting Principle (K1, K2, K3, K4)
- (Chapter 2: Sections 2.1, 2.2, 2.3, 2.4, 2.5)

### Unit II: Group Theory (Continued)

(18 hours)

- 2.1 Normal subgroups (K1, K2, K3)
  - 2.2 Quotient groups (K1, K2, K3)
  - 2.3 Homomorphisms (K1, K2, K3)
  - 2.4 Kernel of a homomorphism (K1, K2, K3)
  - 2.5 Isomorphisms (K1, K2, K3)
  - 2.6 Theorems on isomorphisms (K1, K2, K3, K4)
- (Chapter 2: Sections 2.6, 2.7; Omitting applications 1 and 2)

### Unit III: Group Theory (Continued)

(18 hours)

- 3.1 Automorphisms (K1, K2, K3)
  - 3.2 Inner automorphisms (K1, K2, K3)
  - 3.3 Cayley's theorem (K1, K2, K3)
  - 3.4 Permutation groups (K1, K2, K3)
  - 3.5 Cycles and Transpositions (K1, K2, K3, K4)
  - 3.6 Even and odd permutations (K1, K2, K3, K4)
- (Chapter 2: Section 2.8, 2.9, 2.10)

### Unit IV: Ring Theory

(18 hours)

- 4.1 Definition of a ring (K1, K2)
  - 4.2 Examples of rings (K1, K2, K3)
  - 4.3 Some special classes of rings (K1, K2)
  - 4.4 Integral domain (K1, K2, K3, K4)
  - 4.5 Homomorphisms and isomorphisms (K1, K2, K3, K4)
  - 4.6 Ideals and Quotients Rings. (K1, K2, K3, K4)
- (Chapter 3: Section 3.1, 3.2, 3.3, 3.4)

### Unit V: Ring Theory (Contd.)

(18 hours)

- 5.1 More Ideals and Maximal Ideals (K1, K2, K3)
  - 5.2 Quotient Rings (K1, K2, K3)
  - 5.3 The field of Quotients of an Integral Domain (K1, K2, K3, K4)
  - 5.4 Euclidean Rings (K1, K2, K3)
  - 5.5 Unique Factorisation Theorem (K1, K2, K3)
  - 5.6 A particular Euclidean Ring (K1, K2, K3, K4)
- (Chapter 3: Section 3.5, 3.6, 3.7, 3.8)

**UCMAJ20 – Real Analysis I**

<b>Year: III</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: V</b>	UCMAJ20	Real Analysis – I	Theory	Core	6	6	100

**Course Objectives**

1. To create an interest and to deepen the knowledge of students in concepts of real analysis.
2. To familiarize the students to concepts of sequences, limits of sequences, limits of functions and continuity.
3. To introduce the concepts of convergent, divergent and bounded sets.

**Course Outcomes (CO)**

The learners will be able to

1. Know the basic properties of the real line and real number system.
2. Understand the fundamentals of sequences and to calculate their limits.
3. Recognize the arithmetic properties of convergence and divergence of sequence and series.
4. Learn the properties of metric space and its type.
5. Know about continuous function and its reformulation.

## Course Syllabus

- Unit I: Functions and Real Numbers** (18 hours)
- 1.1 Functions (K1, K2)
  - 1.2 Real valued functions (K1, K2, K3, K4)
  - 1.3 Equivalence – Countability (K1, K2, K3, K4)
  - 1.4 Real Numbers (K1, K2)
  - 1.5 Least upper bounds (K1, K2, K3, K4)
  - 1.6 Simple problems. (K1, K2, K3, K4)
- (Chapter 1: Sections 1.3, 1.4, 1.5, 1.6, 1.7)
- Unit II: Sequences of Real numbers** (18 hours)
- 2.1 Definition of sequence and subsequence (K1, K2)
  - 2.2 Limit of sequence (K1, K2, K3, K4)
  - 2.3 Convergent sequences (K1, K2, K3, K4)
  - 2.4 Divergent sequence (K1, K2, K3, K4)
  - 2.5 Bounded sequences (K1, K2, K3, K4)
  - 2.6 Monotone sequences – Simple problems (K1, K2, K3, K4)
- (Chapter 2: Sections 2.1, 2.2, 2.3, 2.4, 2.5, 2.6)
- Unit III: Sequences (continued) and Series of Real Numbers** (18 hours)
- 3.1 Operations on convergent sequences (K1, K2, K3, K4)
  - 3.2 Operations on divergent sequences (K1, K2, K3, K4)
  - 3.3 Convergence and divergence of Series (K1, K2, K3, K4)
  - 3.4 Series with non-negative terms (K1, K2, K3, K4)
  - 3.5 Alternating series (K1, K2, K3, K4)
  - 3.6 Simple problems (K1, K2, K3)
- (Chapter 2: Sections 2.7, 2.8, Chapter 3: 3.1, 3.2, 3.3)
- Unit IV: Limits and Continuity of Metric Spaces** (18 hours)
- 4.1 Conditional convergence and absolute convergence (K1, K2, K3, K4)
  - 4.2 Limits and continuity of metric space (K1, K2, K3, K4)
  - 4.3 Limit of a function on the real line (K1, K2, K3, K4)
  - 4.4 Metric spaces (K1, K2, K3, K4)
  - 4.5 Limits in metric spaces (K1, K2, K3, K4)
  - 4.6 Simple problems (K1, K2, K3)
- (Chapter 3: Section 3.4; Chapter 4: Section 4.1, 4.2, 4.3)
- Unit V: Continuous Functions on Metric Spaces** (18 hours)
- 5.1 Functions continuous at a point on the real line (K1, K2, K3, K4)
  - 5.2 Theorems on continuous function (K1, K2, K3, K4)
  - 5.3 Reformulation (K1, K2, K3, K4)
  - 5.4 Simple problems (K1, K2, K3, K4)
  - 5.5 Functions continuous on metric space (K1, K2, K3)
  - 5.6 Theorems on continuity of metric space (K1, K2, K3, K4)
- (Chapter 5: Sections 5.1, 5.2, 5.3)

**Text Book:**

**SEMESTER – V**  
**UCMAK20 – Complex Analysis**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code:</b> UCMAK20	<b>Title of the Course:</b> Complex Analysis	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the fundamental ideas of the functions of complex variable
2. To impart the basic knowledge of holomorphic functions, Cauchy's integral formula and the residue theorem.

**Course Outcomes (CO)**

The learners will be able to

1. Know to define and give some of the important properties of complex analytic functions.
2. Learn certain elementary functions with special reference to the correspondence between certain portions of the z-plane and w-plane as determined by the relation between the function w and the independent variable z.
3. Become familiar with the integrals of analytic functions where many properties from calculus is carried over to complex case.
4. Expand the concept of sequence and series which plays a major part of calculus to the complex domain.
5. Learn to compute residues, which allow the determination of general contour integrals.

## Course Syllabus

### Unit I: Analytic Functions

(18 hours)

- 1.1 Regions in the Complex Plane (K1, K2)
  - 1.2 Limits (K1, K2)
  - 1.3 Theorems on limits (K1, K2, K3)
  - 1.4 Continuity (K1, K2, K3)
  - 1.5 Derivatives (K1, K2, K3)
  - 1.6 C-R Equations (K1, K2, K3, K4)
- (Chapter 1: Section: 8, Chapter: 2 Section: 11-17)

### Unit II: Mappings by Elementary Functions

(18 hours)

- 2.1 Mapping (K1, K2)
  - 2.2 Bilinear transformations (K1, K2)
  - 2.3 Cross-Ratio -Theorems and problems (K1, K2, K3, K4)
  - 2.4 Linear Transformation  $w = \frac{1}{z}$ , problems (K1, K2, K3, K4)
  - 2.5 Transformation  $W = \sqrt{z}$ ,  $W = e^z$ ,  $W = \sin z$  and  $W = \cos z$  (K1, K2, K3, K4)
  - 2.6 Linear fractional transformations – An Implicit Form (K1, K2)
- (Chapter 8: Sections: 68-71, 73-75)

### Unit III: Complex Integration

(18 hours)

- 3.1 Definite integrals, Line and Contour Integrals – Examples (K1, K2)
  - 3.2 Cauchy's Theorem Cauchy – Goursat Theorem (K1, K2, K3)
  - 3.3 Cauchy integral formula (K1, K2, K3)
  - 3.4 Derivatives of analytic functions – Morera's Theorem (K1, K2, K3)
  - 3.5 Cauchy's in-equality (K1, K2, K3)
  - 3.6 Liouville's theorem and the Fundamental theorem of algebra (K1, K2, K3, K4)
- (Chapter: 4, Sections: 32, 33, 36-41, omit 39)

### Unit IV: Series

(18 hours)

- 4.1 Convergence of sequence and series (K1, K2)
  - 4.2 Convergence of series (K1, K2)
  - 4.3 Taylor series – Examples (K1, K2, K3)
  - 4.4 Laurent series – Examples (K1, K2, K3, K4)
  - 4.5 Absolute and uniform convergence of power series (K1, K2, K3, K4)
  - 4.6 uniform convergence of power series (K1, K2, K3, K4)
- (Chapter 5: Sections: 43-48)

### Unit V: Residues and Poles

(18 hours)

- 5.1 Zeros of analytic functions (K1, K2)
  - 5.2 Singularities, Types of Singularities (K1, K2)
  - 5.3 Theorem Riemann's Theorem – Weistrass (K1, K2, K3)
  - 5.4 Residues – Residue theorems (K1, K2, K3, K4)
  - 5.5 Residues at poles – Zeros and poles of order m (K1, K2, K3, K4)
  - 5.6 Two types of integrals involving Sines and Cosines (K1, K2, K3, K4)
- (Chapter 6: Sections: 53-57)

**Text Book:**

**SEMESTER – V**  
**UEMAA20 – Programming in C**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code:</b> UEMAA20	<b>Title of the Course:</b> Elective-I A: Programming in C	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 4	<b>CREDITS</b> 3	<b>HOURS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of basic programming, thereby enhancing the logical thinking of the students with regard to programming.
2. To train the students to apply the programming concepts of C to mathematical investigations and problem solving.
3. To enhance the ability of students to work independently and do in-depth study of various notions of programming.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the basics of programming in C such as tokens, data types, operators etc.
2. Use the Decision making-branching and looping statements in C programming.
3. Handle the concept of arrays and the concept of the user defined functions.
4. Express the uses of structures and pointers
5. Understand and apply the programming concepts of C to problem solving.

**(L-Low, M-Moderate, H-High)**

## **Course Syllabus**

### **Unit I: Overview of C, Constants, Variables and Data types (12 hours)**

- 1.1 Basic Structure of C programs – Character set (K1, K2)
- 1.2 C tokens – Keywords and Identifiers (K1, K2, K3, K4)
- 1.3 Constants – Variables (K1, K2, K3, K4)
- 1.4 Data types – Declaration of variables (K1, K2, K3, K4)
- 1.5 Assigning values to variables (K1, K2, K3, K4)
- 1.6 Defining symbolic constants – Declaring a variable as constant (K1, K2, K3, K4)  
(Chapter 2: Sections 2.8; Chapter 3: Sections 3.2 – 3.8, 3.10 – 3.12)

### **Unit II: Operators, Expressions, Managing Input and Output Operations (12 hours)**

- 2.1 Introduction-Arithmetic Operators-Relational Operators-Logical Operators (K1, K2, K3, K4)
- 2.2 Assignment Operators - Increment and Decrement Operators (K1, K2, K3, K4)
- 2.3 Conditional Operators - Bitwise Operators – Special Operators (K1, K2, K3, K4)
- 2.4 Arithmetic Expression-Evaluation of Expression-Precedence of Arithmetic Operators (K1, K2, K3, K4)
- 2.5 Type Conversions in Expressions – Operator Precedence and Associativity (K1, K2, K3, K4)
- 2.6 Reading a Character-Writing a Character-Formatted Input-Formatted Output (K1, K2, K3, K4)  
(Chapter 4: Sections 4.1- 4.12, 4.14, 4.15; Chapter 5: Sections 5.2 – 5.5)

### **Unit III: Decision Making and Branching, Decision Making and Looping (12 hours)**

- 3.1 Introduction - Decision Making with IF Statement (K1, K2, K3, K4)
- 3.2 Simple IF – IF ELSE - Nesting of IF ELSE statements (K1, K2, K3, K4)
- 3.3 The ELSE IF Ladder - The SWITCH statement (K1, K2, K3, K4)
- 3.4 The conditional (? : ) operator- The GOTO statement (K1, K2, K3, K4)
- 3.5 Introduction - The WHILE statement – The DO statement (K1, K2, K3, K4)
- 3.6 The FOR statement - Jumps in LOOPS (K1, K2, K3, K4)  
(Chapter 6: Sections 6.1 – 6. 9; Chapter 7: Sections 7.1 – 7.5.)

### **Unit IV: Arrays and User-Defined Functions (12 hours)**

- 4.1 Introduction – One Dimensional Array (K1, K2, K3, K4)
- 4.2 Declaration and Initialization of One Dimensional Array (K1, K2, K3, K4)
- 4.3 Two Dimensional Arrays - Initializing Two Dimensional Arrays – Multi Dimensional Arrays (K1, K2, K3, K4)
- 4.4 Introduction – Need for User-defined functions – A Multi-function Program (K1, K2, K3, K4)
- 4.5 Elements of user-defined functions – Definition of functions – Return values and their types (K1, K2, K3, K4)
- 4.6 Function calls – Function declaration - Nesting of functions – Recursion. (K1, K2, K3, K4)  
(Chapter 8: Sections 8.1- 8.7; Chapter 10: Sections 10.1 – 10.8, 10. 15, 10.16)

### **Unit V: Structures and Unions, Pointers (12 hours)**

- 5.1 Introduction-Defining a structure-Declaring structure variables-Accessing structure members (K1, K2, K3, K4)
- 5.2 Structure initialization-copying and comparing structure variables-Operations on individual members (K1, K2, K3, K4)
- 5.3 Arrays of structures - Arrays within Structures - Structures within Structures - Unions (K1, K2, K3, K4)
- 5.4 Understanding Pointers – Accessing the address of a variable – Declaring pointer variables (K1, K2, K3, K4)
- 5.5 Initialization of pointer variables-Accessing a variable through its pointer-Chain of pointers (K1, K2, K3, K4)
- 5.6 Pointer expressions-Pointer increments and scale factor-Pointers and Arrays (K1, K2, K3, K4)  
(Chapter 11: Sections 11. 1 - 11. 10, 11.12; Chapter 12: Sections 12. 2 – 12. 10.)

**SEMESTER – V**  
**UEMAB20 - Elective Practical I: C**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code:</b> UEMAB20	<b>Title of the Course:</b> Elective Practical I : C	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>HOURS</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of basic programming, thereby enhancing the logical thinking of the students with regard to programming.
2. To train the students to apply the programming concepts of C to mathematical investigations and problem solving.
3. To construct the ability of students to work independently and do in-depth study of various notions of programming.

**Course Outcomes (CO)**

The learners will be able to

1. Implement programs with branching and looping statements.
2. Write programs that perform operations using derived data types and functions.
3. Demonstrate a thorough understanding of arrays by designing and implementing programs that search and sort arrays.
4. Perform Matrix operations using C.
5. Use structures and pointers in C programs.

**(L-Low, M-Moderate, H-High)**

## 1. Simple Programs:

- a) Sum of 'n' natural numbers.
- b) Quadratic Equation
- c) Simple Interest
- d) Mean, Standard deviation and Variance.
- e) Generating Prime numbers.
- f) Largest of three numbers.

## 2. Summation of Series:

- a)  $\sin(x)$
- b)  $\cos(x)$

## 3. Recursion:

- a)  $nPr$  and  $nCr$
- b) GCD of two numbers.

## 4. Matrix Manipulation:

- a) Addition and Subtraction
- b) Transpose.

## 5. Sorting and Searching:

- a) Bubble sort (simple program)
- b) Binary search and Median

## 6. Structures:

Grades of students of a class using structure

**SEMESTER - V**  
**UEMAC20 - Number Theory**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code:</b> UEMAC20	<b>Title of the Course:</b> Elective - I B: Number Theory	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>HOURS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of number theory, thereby enhancing the logical thinking of the students with regard to applications in security systems.
2. To construct the ability of students to work independently and do in-depth study of various notions of number theory.

**Course Outcomes (CO)**

The learners will be able to

1. Learn about some important results in the theory of numbers including the prime number theorem, Chinese remainder theorem, Wilson's theorem and their consequences.
2. Learn about number theoretic functions, modular arithmetic and their applications.
3. Familiarize with modular arithmetic and find primitive roots of prime and composite numbers.
4. Know about open problems in number theory, namely, the Goldbach conjecture and twin-prime conjecture.
5. Apply public crypto systems, in particular, RSA.

**(L-Low, M-Moderate, H-High)**

## Course Syllabus

### **Unit I: Distribution of Primes and Theory of Congruencies** (18 hours)

- 1.1 Linear Diophantine equation, Prime counting function (K1,K2)
- 1.2 Prime number theorem, Goldbach conjecture (K1,K2)
- 1.3 Twin-prime conjecture, Odd perfect numbers conjecture (K1,K2,K3)
- 1.4 Fermat and Mersenne primes, Congruence relation and its properties (K1, K2, K3, K4)
- 1.5 Linear congruence and Chinese remainder theorem (K1, K2, K3)
- 1.6 Fermat's little theorem, Wilson's theorem. (K1, K2, K3)

### **Unit II: Number Theoretic Functions** (18 hours)

- 2.1 Number theoretic functions for sum and number of divisors (K1, K2, K3)
- 2.2 Multiplicative function (K1, K2)
- 2.3 The Möbius inversion formula (K1, K2)
- 2.4 Greatest integer function (K1, K2)
- 2.5 Euler's phi-function and properties (K1, K2, K3, K4)
- 2.6 Euler's theorem. (K1, K2)

### **Unit III: Primitive Roots** (18 hours)

- 3.1 Order of an integer modulo  $n$  (K1, K2)
- 3.2 Primitive roots for primes (K1, K2, K3)
- 3.3 Composite numbers having primitive roots (K1, K2, K3)
- 3.4 Definition of quadratic residue of an odd prime (K1, K2)
- 3.5 Euler's criterion (K1, K2)
- 3.6 Problems (K1, K2, K3, K4)

### **Unit IV: Quadratic Reciprocity Law** (18 hours)

- 4.1 The Legendre symbol and its properties (K1, K2)
- 4.1 The Legendre symbol and its properties-problems (K1, K2, K3, K4)
- 4.2 Quadratic reciprocity (K1, K2)
- 4.4 Quadratic reciprocity – problems (K1, K2, K3, K4)
- 4.5 Quadratic congruencies with composite moduli (K1, K2, K3)
- 4.6 Quadratic congruencies with composite moduli –problems (K1, K2, K3, K4)

### **Unit-V: Applications** (18 hours)

- 5.1 Public key encryption (K1, K2, K3, K4)
- 5.2 Public key encryption (continued) (K1, K2, K3, K4)
- 5.3 RSA encryption and decryption with applications in security systems (K1, K2, K3, K4)
- 5.4 RSA encryption and decryption with applications in security systems (K1, K2, K3, K4)
- 5.5 RSA encryption and decryption with applications in security systems (K1, K2, K3, K4)
- 5.6 RSA encryption and decryption with applications in security systems (K1, K2, K3, K4)

**USMAC20 – Mathematics for Competitive Examinations**

<b>Year: III</b> <b>SEM: V</b>	<b>Course Code:</b> USMAC20	<b>Title of the Course:</b> Mathematics for Competitive Examinations	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>MARKS</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To improve the numerical ability and logical thinking of the students.
2. To prepare the students for various competitive examinations.

**Course Outcomes (CO)**

The learners will be able to

1. Apply the concepts of average, percentage, ratio and proportion to solve real life problems.
2. Think critically and solve problems.
3. Improve their creative thinking and make decisions in real life situations.
4. Determine the number of possible outcomes in a problem and calculate the probability of events for more complex outcomes.
5. Analyse and compare the given data to use analytic techniques that are simple and effective to solve problems.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Arithmetical Ability (6 hours)

Number system, Progression, Average, Ratio and Proportion (K1, K2, K3, K4)

### Unit II: Arithmetical Ability (Continued) (6 hours)

Percentage, Profit and Loss, Interest, Time and Work, Time, Speed and Distance, Work and Wages (K1, K2, K3, K4)

### Unit III: Arithmetical Ability (Continued) (6 hours)

Ages, Boats and Streams, Clocks and Calendar, Logarithms, Simplifications, Height and Distance (K1, K2, K3, K4)

### Unit IV: Probability (6 hours)

Permutations and Combinations, Probability (K1, K2, K3, K4)

### Unit V: Data Interpretation (6 hours)

Tabulation, Bar graph, Pie chart, Line graph (K1, K2, K3, K4)

**Course Objectives**

1. To introduce the concepts of linear algebra.
2. To familiarize the concepts of linear transformation and their matrices.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the concepts of basis, linear dependence and independence.
2. Analyze the concepts of dual spaces in vector space and inner product space.
3. Understand the concepts of linear transformation, characteristic roots and characteristic vectors.
4. Obtain the matrix for linear transformations.
5. Acquire knowledge about determinants, trace and transpose by linear transformations.

## Course Syllabus

### Unit I Vector Spaces (18 hours)

- 1.1 Definition and examples of vector spaces (K1, K2, K3)
  - 1.2 Subspaces and homomorphisms (K1, K2, K3,)
  - 1.3 Quotient Spaces, Internal and External direct sum (K1, K2, K3, K4)
  - 1.4 Linear span, Linear independence (K1, K2, K3)
  - 1.5 Basis, Properties of basis (K1, K2, K3)
  - 1.6 Dimensions of a vector space. (K1, K2, K3, K4)
- (Chapter 4: Sections 4.1, 4.2)

### Unit II: Vector Spaces (Continued) (18 hours)

- 2.1 Dual Spaces –  $\text{Hom}(V, W)$ ,  $\text{Hom}(V, V)$  and  $\text{Hom}(V, F)$  (K1, K2, K3)
  - 2.2 Definition and examples of Inner Product Spaces (K1, K2, K3)
  - 2.3 Norm of a vector and Schwarz inequality (K1, K2, K3)
  - 2.4 Orthogonal vectors and Orthogonal complement (K1, K2,)
  - 2.5 Orthonormal sets (K1, K2, K3)
  - 2.6 Gram-Schmidt orthogonalization process. (K1, K2, K3, K4)
- (Chapter 4: Sections 4.3, 4.4)

### Unit III: Linear Transformations (18 hours)

- 3.1 Definition of algebra and linear transformations (K1, K2,)
  - 3.2 Minimal polynomial for linear transformations (K1, K2, K3)
  - 3.3 Regular and Singular linear transformations (K1, K2, K3)
  - 3.4 Range and rank of a linear transformation (K1, K2, K3)
  - 3.5 Characteristic roots of a linear transformation (K1, K2, K3)
  - 3.6 Characteristic vectors (K1, K2, K3, K4)
- (Chapter 6: Sections 6.1, 6.2)

### Unit IV Linear Transformations (Continued) (18 hours)

- 4.1 Definition of matrix of a linear transformation (K1, K2,)
  - 4.2 Computation of matrices of linear transformation (K1, K2, K3, K4)
  - 4.2 Isomorphism of  $A(V)$  onto  $F_n$  (K1, K2, K3)
  - 4.3 Computation of the matrix of linear transformations from a known basis (K1, K2, K3, K4)
  - 4.4 Similar linear transformations (K1, K2, K3)
  - 4.5 Triangular form (K1, K2, K3, K4)
- (Chapter 6: Sections 6.3, 6.4)

### Unit V Linear Transformations (Contd.) (18 hours)

- 5.1 Trace of a matrix and properties (K1, K2)
  - 5.2 Trace of a linear transformation (K1, K2, K3)
  - 5.3 Transpose of a matrix and properties (K1, K2, K3)
  - 5.4 Determinants – definition and properties (K1, K2, K3)
  - 5.5 Cramer's Rule (K3, K4)
  - 5.6 Cayley-Hamilton theorem (K3, K4)
- (Chapter 6: Sections 6.8, 6.9)

**Text Book:**

1. I.N. Herstein – Topics in Algebra – John Wiley & Sons, Inc, Second Edition, 2006

**SEMESTER – VI**  
**UCMAM20 – Real Analysis II**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code:</b> UCMAM20	<b>Title of the Course:</b> Real Analysis-II	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To create an interest and to deepen the knowledge of students in concepts of real analysis.
2. To make the students think logically and objectively.
3. To make the students understand the difference between the Riemann and Lebesgue integrability.

**Course Outcomes (CO)**

The learners will be able to

1. Understand some properties of metric spaces like openness, closedness, boundedness and totally boundedness.
2. Know the fundamental concepts of complete and compact metric space.
3. Apply the properties of Riemann integrable functions.
4. Assimilate the concept of partition on an interval in  $\mathbb{R}$  and understand about lebesgue integrability.
5. Acquire knowledge about measurable functions and their properties.

CO5	H	H	H	M	M	H

**Course Syllabus**

**Unit I: Connectedness and Completeness**

**(18 hours)**

- 1.1 Open sets (K1, K2)
  - 1.2 Closed sets (K1, K2)
  - 1.3 Simple problems based on open and closed sets. (K1, K2, K3)
  - 1.4 Theorems on open sets and closed sets (K1, K2, K3, K4)
  - 1.5 Bounded sets (K1, K2, K3, K4)
  - 1.6 Totally bounded sets (K1, K2, K3, K4)
- (Chapter 5 – 5.4, 5.5, Chapter 6 – Sections 6.3)

**Unit II: Compactness and Continuity**

**(18 hours)**

- 2.1 Definition of Complete metric space (K1, K2)
  - 2.2 Examples of Complete metric space (K1, K2, K3)
  - 2.3 Theorems on Complete metric space (K1, K2, K3, K4)
  - 2.4 Contraction (K1, K2, K3, K4)
  - 2.5 Definition and example of Compact metric spaces (K1, K2, K3)
  - 2.6 Theorems on Compact metric space (K1, K2, K3, K4)
- (Chapter 6 – Section 6.4, 6.5)

**Unit III: The Riemann Integral**

**(18 hours)**

- 3.1 Sets of measure zero (K1, K2, K3, K4)
  - 3.2 Definition of the Riemann integral (K1, K2)
  - 3.3 Definition of Riemann upper sum and lower sum (K1, K2)
  - 3.4 Properties of the Riemann integral. (K1, K2, K3, K4)
  - 3.5 Theorems on Riemann integral (K1, K2, K3, K4)
  - 3.6 Simple problems (K1, K2, K3)
- (Chapter 7 – Sections 7.1, 7.2, 7.4)

**Unit IV: The Lebesgue Integral**

**(18 hours)**

- 4.1 Length of open sets and closed sets (K1, K2, K3, K4)
  - 4.2 Inner and Outer measure (K1, K2, K3, K4)
  - 4.3 Measurable sets (K1, K2)
  - 4.4 Properties of measurable sets. (K1, K2, K3, K4)
  - 4.5 Theorems on measurable sets (K1, K2, K3, K4)
  - 4.6 Symmetric difference and its theorem (K1, K2, K3, K4)
- (Chapter 11 – Sections 11.1, 11.2, 11.3)

**Unit V: The Lebesgue Integral (Continued)**

**(18 hours)**

- 5.1 Definition and example of Measurable functions (K1, K2, K3)
  - 5.2 Theorems on measurable functions (K1, K2, K3, K4)
  - 5.3 Definition and existence of the Lebesgue integral for bounded function (K1, K2, K3, K4)
  - 5.4 Theorems on Lebesgue integral (K1, K2, K3, K4)
  - 5.5 Properties of the Lebesgue integral for bounded measurable functions. (K1, K2, K3, K4)
  - 5.6 Relationship between Riemann and Lebesgue integral (K1, K2, K3, K4)
- (Chapter 11 – Sections 11.4, 11.5, 11.6)

--------------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the students to the beautiful and elegant theory of graphs.
2. To study and develop the concepts of different graphs

**Course Outcomes (CO)**

The learners will be able to

1. Understand the basic graph theory concepts
2. Analyse the connectedness in graphs using vertices and edges.
3. Identify the uniqueness of paths using tree concepts.
4. Acquire wide knowledge of mathematical principles of graphs
5. Understand the emerging research topics based on graphs

## Course Syllabus

### Unit I: Graphs and Subgraphs (18 hours)

- 1.1 Introduction to Graphs- subgraphs ( K1,K2)
- 1.2 Degree of a vertex ( K1,K2, K3, K4)
- 1.3 Isomorphism of graphs ( K1,K2, K3, K4)
- 1.4 Independent sets and coverings(simple theorems) ( K1,K2, K3, K4)
- 1.5 Intersection graphs and line graphs (definition and examples) ( K1,K2, K3, K4)
- 1.6 Operations on graphs. ( K1,K2, K3, K4)

### Unit II: Connectedness and components (18 hours)

- 2.1 Walks, Trails and Paths (problems and simple theorems) (K1, K2, K3, K4)
- 2.2 Connectedness and components - cut point (problems and simple theorems) (K1, K2, K3, K4)
- 2.3 Bridge (problems and simple theorems) (K1, K2, K3, K4)
- 2.4 Block (problems and simple theorems) (K1, K2, K3, K4)
- 2.5 Vertex Connectivity (K1, K2, K3, K4)
- 2.6 Edge Connectivity(K1, K2, K3, K4)

### Unit III: Trees (18 hours)

- 3.1 Tree – Introduction (K1, K2)
- 3.2 Forest (K1, K2)
- 3.3 Equivalent property of tree (K1, K2, K3, K4)
- 3.4 Spanning tree (K1, K2, K3, K4)
- 3.5 Centre of a tree (K1, K2, K3, K4)
- 3.6 Results in Centre of a tree (K1, K2, K3, K4)

### Unit IV: Eulerian and Hamiltonian Graphs (18 hours)

- 4.1 Eulerian graphs (K1, K2, K3, K4)
- 4.2 Equivalent property of Eulerian graphs (K1, K2, K3, K4)
- 4.3 Hamiltonian graphs (K1, K2, K3, K4)
- 4.4 Property of Hamiltonian graphs (K1, K2, K3, K4)
- 4.5 Simple problems in Hamiltonian graphs (K1, K2, K3, K4)
- 4.6 Algorithm (K1, K2, K3, K4)

### Unit V - Planarity and colourability (18 hours)

- 5.1 Planarity-definition (K1, K2)
- 5.2 Planarity properties (K1, K2, K3, K4)
- 5.3 Characterisation of planar graph (K1, K2, K3, K4)
- 5.4 Colourability (K1, K2, K3, K4)
- 5.5 Chromatic number (K1, K2, K3, K4)
- 5.6 Index (K1, K2, K3, K4)

**Text Books:**

1. S. Arumugam and S. Ramachandran, Invitation to Graph Theory, SITECH Publications, India Pvt. Ltd., 2006

**SEMESTER – VI**  
**UEMAE20 - Discrete Mathematics**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code:</b> UEMAE20	<b>Title of the Course:</b> Elective - II B: Discrete Mathematics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>HOURS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of basic discrete mathematics, thereby enhancing the logical thinking of the students with regard to discrete domain.
2. To train the students in the applications of the discrete mathematical structures.
3. To construct the ability of students to work independently and do in-depth study of various notions of discrete mathematics.

**Course Outcomes (CO)**

The learners will be able to

1. Learn about partially ordered sets.
2. Understand lattices and their types.
3. Understand Boolean algebra and Boolean functions, logic gates, switching circuits and their applications.
4. Solve real-life problems using finite-state and Turing machines.
5. Assimilate various graph theoretic concepts and familiarize with their applications.

## Course Syllabus

### Unit I: Partially Ordered Sets

(18 hours)

- 1.1 Definitions, examples and basic properties of partially ordered sets (poset) (K1,K2)
- 1.2 Order isomorphism, Hasse diagrams (K1, K2, K3, K4)
- 1.3 Dual of a poset, Duality principle (K1, K2, K3)
- 1.4 Maximal and minimal elements (K1, K2, K3)
- 1.5 Least upper bound and greatest upper bound (K1, K2, K3)
- 1.6 Building new poset, Maps between posets (K1, K2, K3, K4)

### Unit II: Lattices

(18 hours)

- 2.1 Lattices as posets (K1, K2, K3)
- 2.2 Lattices as algebraic structures (K1, K2, K3)
- 2.3 Sub lattices (K1, K2)
- 2.4 Products and homomorphisms – Definitions and examples (K1, K2, K3, K4)
- 2.5 Properties of modular and distributive lattices (K1, K2)
- 2.6 Complemented, relatively complemented and sectionally complemented lattices (K1, K2)

### Unit III: Boolean Algebras and Switching Circuits

(18 hours)

- 3.1 Boolean algebras, De Morgan's laws (K1, K2)
- 3.2 Boolean homomorphism, Representation theorem (K1, K2)
- 3.3 Boolean polynomials, Boolean polynomial functions (K1, K2, K3)
- 3.4 Disjunctive and conjunctive normal forms (K1, K2)
- 3.5 Minimal forms of Boolean polynomials (K1, K2, K3)
- 3.6 Quine-McCluskey method, Karnaugh diagrams, Switching circuits(K1, K2, K3, K4)

### Unit IV: Finite-State and Turing Machines

(18 hours)

- 4.1 Finite-state machines with outputs (K1, K2, K3)
- 4.2 Finite-state machines with no output (K1, K2, K3)
- 4.3 Deterministic finite-state automaton (K1, K2, K3)
- 4.4 Nondeterministic finite-state automaton (K1, K2, K3)
- 4.5 Turing machines – Definitions (K1, K2)
- 4.6 Turing machines - examples and computations (K1, K2, K3, K4)

### Unit V: Graphs

(18 hours)

- 5.1 Definition, examples and basic properties of graphs (K1, K2)
- 5.2 Königsberg bridge problem (K1, K2, K3)
- 5.3 Subgraphs – Pseudographs - Complete graphs - Bipartite graphs (K1, K2)
- 5.4 Isomorphism of graphs - Paths and circuits - Eulerian circuits - Hamiltonian cycles (K1, K2)
- 5.5 Adjacency matrix - Weighted graph - Travelling salesman problem (K1, K2, K3)

## 5.6 Shortest path and Dijkstra's algorithm (K1, K2, K3)

**SEMESTER – VI**  
**UEMAF20 - Object Oriented Programming Using C++**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code:</b> UEMAF20	<b>Title of the Course:</b> Elective - III: Object Oriented Programming Using C++	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 4	<b>CREDITS</b> 3	<b>HOURS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	--	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of object oriented programming with C++, thereby enhancing the logical thinking of the students with regard to programming.
2. To train the students to apply the programming concepts of C++ to mathematical investigations and problem solving.
3. To construct the ability of students to work independently and do in-depth study of various notions of programming.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the basics of programming in C++ such as tokens, data types, operators etc.
2. Use the Decision making-branching and looping statements in C++ programming.
3. Handle the concept of arrays and the concept of the user define functions.
4. Express the uses of structures and pointers.
5. Understand and apply the programming concepts of C to problem solving.

## Course Syllabus

### Unit I: Principles of OOP and Introduction to C++, Tokens

(12 hours)

- 1.1 Basic concepts of object oriented programming – Benefits of OOP (K1, K2)
  - 1.2 Structure of C++ Program - Tokens - Keywords (K1, K2, K3, K4)
  - 1.3 Identifiers and constants - Basic data types (K1, K2, K3, K4)
  - 1.4 User defined data types - Derived data types (K1, K2, K3, K4)
  - 1.5 Symbolic constants – Type compatibility - Declaration of variables (K1, K2, K3, K4)
  - 1.6 Dynamic Initialization of variables – Reference variables (K1, K2, K3, K4)
- (Chapter 1: Sections 1.5 -, 1.6; Chapter 2: Sections 2.6; Chapter 3: Sections 3.2 - 3.6, 3.8-3.13)

### Unit II: Operators, Expressions and Control Structures

(12 hours)

- 2.1 Operators in C++ - Scope Resolution Operator (K1, K2, K3, K4)
  - 2.2 Member Dereferencing operators – Memory management operators (K1, K2, K3, K4)
  - 2.3 Manipulators – Type cast operator (K1, K2, K3, K4)
  - 2.4 Expressions and their types – Special assignment expressions (K1, K2, K3, K4)
  - 2.5 Implicit conversions – Operator overloading (K1, K2, K3, K4)
  - 2.6 Operator precedence – Control structures (K1, K2, K3, K4)
- (Chapter 3: Sections 3.14 - 3. 25)

### Unit III: Functions in C++, Classes and Objects

(12 hours)

- 3.1 Introduction- Function prototyping-Call by reference-Return by reference (K1, K2, K3, K4)
  - 3.2 Inline functions-Default arguments-const arguments-Function overloading (K1, K2, K3, K4)
  - 3.3 Specifying a class-Defining member functions-A C++ program with class (K1, K2, K3, K4)
  - 3.4 Making an outside function inline-Nesting of member functions -Private member functions (K1, K2, K3, K4)
  - 3.5 Arrays within a class – Memory allocation for objects – Static data members – Static member functions – Arrays of objects (K1, K2, K3, K4)
  - 3.6 Objects as function arguments – Friendly functions – Returning objects – const member functions – Pointers to members (K1, K2, K3, K4)
- (Chapter 4: Sections 4.1, 4.3 – 4. 8, 4.10; Chapter 5: Sections 5.3- 5.18.)

### Unit IV: Constructors and Destructors, Operator Overloading

(12 hours)

- 4.1 Introduction – Constructors (K1, K2, K3, K4)
  - 4.2 Parameterized constructors – Multiple constructors in a class (K1, K2, K3, K4)
  - 4.3 Constructors with default arguments – Copy constructor (K1, K2, K3, K4)
  - 4.4 const objects – Destructors (K1, K2, K3, K4)
  - 4.5 Defining operator overloading – Overloading unary operators – Overloading binary operators (K1, K2, K3, K4)
  - 4.6 Overloading binary operators using friends-Rules for overloading operators (K1, K2, K3, K4)
- (Chapter 6: Sections 6.1- 6.5, 6.7, 6.10, 6.11; Chapter 7: Sections 7.2 – 7.5, 7.8)

## **Unit V: Inheritance, Pointers, Managing console I/O Operations**

**(12 hours)**

- 5.1 Introduction – Defining derived classes – Single inheritance (K1, K2, K3, K4)
- 5.2 Making a private member inheritable – Multilevel inheritance (K1, K2, K3, K4)
- 5.3 Multiple inheritance – Hierarchical inheritance (K1, K2, K3, K4)
- 5.4 Hybrid inheritance – Virtual base classes – Abstract classes (K1, K2, K3, K4)
- 5.5 Pointers – Pointers to Objects – this pointer (K1, K2, K3, K4)
- 5.6 Introduction – C++ streams – C++ stream classes – Unformatted I/O Operations – Formatted console I/O operations – Managing output with manipulators (K1, K2, K3, K4)  
(Chapter 8: Sections 8.1 – 8.10; Chapter 9: Sections 9.2 – 9. 4; Chapter 10: Sections 10.1– 10.6)

**SEMESTER – VI**  
**UEMAG20 - Elective Practical II: C++**

<b>Year: III</b> <b>SEM: VI</b>	<b>Course Code:</b> UEMAG20	<b>Title of the Course:</b> Elective Practical II : C++	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>HOURS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce students to the concept of basic programming, thereby enhancing the logical thinking of the students with regard to programming.
2. To train the students to apply the programming concepts of C to mathematical investigations and problem solving.
3. To enhance the ability of students to work independently and do in-depth study of various notions of programming.

**Course Outcomes (CO)**

The learners will be able to

1. Implement programs with class and constructors.
2. Write programs that perform operations using derived data types and functions.
3. Demonstrate a thorough understanding of arrays by designing and implementing programs that search and sort arrays.
4. Use inheritance properties that promote code reuse in C++.
5. Overload functions and operators in C++.

CO	PSO

<b>CO4</b>	H	H	H	M	M	H
<b>CO5</b>	H	H	H	M	M	H

**(L-Low, M-Moderate, H-High)**

1. Simple program using class and object.
2. Find largest of three numbers using all types of constructors.
3. Calculation of Mean and Standard Deviation.
4. Selection sort.
5. Product of matrices.
6. String manipulation.
7. Operator overloading (Unary)
8. Arrays of Object.
9. Function Overloading.
10. Implementing Inheritance. (Multiple)

**SEMESTER – VI**  
**USMAD20 - Fuzzy Set Theory**

<b>Year : III</b> <b>SEM : VI</b>	<b>Course Code :</b> USMAD20	<b>Title Of The Course :</b> Fuzzy Set Theory	<b>Course Type :</b> Theory	<b>Course Category :</b> SBE	<b>H/W</b> 2	<b>CREDITS</b> 2	<b>MARKS</b> 100
--------------------------------------	---------------------------------	--	--------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To explain the emergence of fuzzy set from an historical perspective.
2. To introduce the basic concepts of the existing research topic fuzzy sets.

**Course Outcomes (CO)**

The learners will be able to

1. Distinguish between classical crisp set and fuzzy set using characteristic function and membership function respectively.
2. Understand the operations on the fuzzy set which are generalization of crisp set operations.
3. Represent the notion of fuzzy relational equations based upon the max-min composition.
4. Model fuzzy graphs which provides provision to represent different types of relationships
5. Know about the fuzzy number which is a special form of a fuzzy set on the set of real numbers.

CO5	H	H	H	M	M	H

(L-Low, M-Moderate, H-High)

## Course Syllabus

### UNIT I: Fuzzy Sets

(6 hours)

Sets - Operation of Sets - Characteristics of Crisp Set - Definition of fuzzy set - Expanding concepts of fuzzy set - Standard Operation of Fuzzy Set (K1, K2, K3, K4)  
(Chapter 1: Sections 1.1-1.6)

### UNIT II: The Operation of Fuzzy Set

(6 hours)

Standard operations of Fuzzy Set - Fuzzy Complement - Fuzzy Union - Fuzzy Intersection – Other Operations in Fuzzy Set - T-norms and T-conorms (K1, K2, K3, K4)  
(Chapter 2: Sections 2.1-2.6)

### UNIT III: Fuzzy Relation and Composition

(6 hours)

Crisp relation - Properties of Relation on a Single Set - Fuzzy relation - Extension of fuzzy set (K1, K2, K3, K4)  
(Chapter 3: Sections 3.1-3.4)

### UNIT IV: Fuzzy Graph and Relation

(6 hours)

Fuzzy Graph - Characteristics of fuzzy relation - Classification of fuzzy relation - Other Fuzzy Relations (K1, K2, K3, K4)  
(Chapter 4: Sections 4.1 - 4.4)

### UNIT V: Fuzzy Number

(6 hours)

Concept of fuzzy number - Operation of fuzzy number - Triangular fuzzy number - Other types of fuzzy numbers (K1, K2, K3, K4)  
(Chapter 5: Sections 5.1 – 5.4)

### Text Book:

1. Kwang H. Lee - First course on Fuzzy Theory and Applications – Springer-Verlag Berlin Heidelberg, New York, 2005.

## ASSESSMENT METHODS

### 1. For Core/Elective Papers

**Semester Examination (100 Marks)**

**Time: 3 Hours**

**Section A – 10 x 2 = 20 marks**

Answer **all** questions

10 questions (2 questions from each unit)

**Section B – 5 x 7 = 35 marks**

Answer **all** questions

5 questions with internal choice (1 question from each unit)

**Section C – 3 x 15 = 45 marks**

Answer **any three** questions

5 questions (1 question from each unit)

**CA Examination (50 Marks)**

**Time: 1 Hour 30 Minutes**

**Section A – 7 x 2 = 14 marks**

Answer **all** questions

7 questions

**Section B – 3 x 7 = 21 marks**

Answer **any three** questions

3 out of 5 questions

**Section C – 1 x 15 = 15 marks**

Answer **any one** question

2 questions (1 question from each unit)

### 2. For Elective Practical: C and C++

**External Assessment (60 Marks)**

Record – 10 marks

Viva – 5 marks

Semester Practical – 45 marks (Time: 3 Hours)

**Internal Assessment (40 Marks)**

Observation – 10 marks

Perfection – 5 marks

CA practical – 25 marks (Time: 1 Hour 30 Minutes)

### 3. For Skill Based Electives

**For SBE III: Numerical Methods and SBE VI: Fuzzy Set Theory**

**Semester Examination (60 Marks)**

**Time: 2 Hours**

**Section A – 10 x 2 = 20 marks**

Answer **all** questions

10 questions (2 questions from each unit)

**Section B – 4 x 5 = 20 marks**

Answer **any four** questions

5 questions (1 question from each unit)

**Section C – 2 x 10 = 20 marks**

Answer **any two** questions

5 questions (1 question from each unit)

**CA Examination (30 Marks)**

**Time: 1 Hour**

**Section A – 5 x 2 = 10 marks**

Answer **all** questions

5 questions

**Section B – 2 x 5 = 10 marks**

Answer **any two** questions

4 questions (2 questions from each unit)

**Section C – 1 x 10 = 10 marks**

Answer **any one** question

2 questions (1 question from each unit)

**For SBE IV: R Programming Language**

**External Assessment (60 Marks)**

Record – 10 marks

Viva – 5 marks

Semester Practical – 45 marks (Time: 2 Hours)

**Internal Assessment (40 Marks)**

Observation – 10 marks

Perfection – 5 Marks

CA Practical – 25 marks (Time: 1 Hour)

**For SBE V: Mathematics for Competitive Examinations**

**Semester Examination (60 Marks)**

**Time: 2 Hours**

60 multiple choice questions (1 mark for each question)

**CA Examination (30 Marks)**

**Time: 1 Hour**

30 multiple choice questions (1 mark for each question)

## UG ALLIED PAPERS

### SEMESTER – I

#### UCBAB20 – Business Mathematics and Statistics I

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: I</b>	UCBAB20	Business Mathematics and Statistics - I	Theory	Core	5	4	100

#### Course Objectives

1. To introduce mathematical applications in business and management, thereby enhancing the logical thinking of the students with regard to problem solving.
2. To train the students to apply statistical techniques in business and management, thereby enhancing the decision making skills of the students.

#### Course Outcomes (CO)

The learners will be able to

1. Apply the concept of matrices in solving business problems.
2. Analyze and demonstrate differentiation skills in economics and business.
3. Apply graphical methods to interpret statistical data.
4. Apply the statistical techniques in business.
5. Solve a range of problems using the techniques covered.

<b>CO5</b>	H	H	M	L	M	H

(Low-L, Medium - M, High - H)

## Course Syllabus

### Unit I: Matrices

(15 hours)

- 1.1. Definition, Types of matrices (K1, K2, K3, K4)
- 1.2 Matrix operations, Determinant of a matrix (K1, K2, K3, K4)
- 1.3 Singular and non-singular matrices (K1, K2, K3, K4)
- 1.4 Inverse of a matrix by co-factor method (K1, K2, K3, K4)
- 1.5 Rank of a matrix (K1, K2, K3, K4)
- 1.6 Solution of system of linear simultaneous equations using Cramer's rule (K1, K2, K3, K4)

### Unit II: Differentiation

(15 hours)

- 2.1 Differentiation (K1, K2, K3, K4)
- 2.2 Derivatives of standard functions  $x^n$ ,  $e^x$ ,  $\log x$ , constant ( without proof ) (K1, K2, K3, K4)
- 2.3 Rules of differentiation ( Addition, difference, product, quotient ) (K1, K2, K3, K4)
- 2.4 Chain rule, Successive differentiation (up to second derivative) (K1, K2, K3, K4)
- 2.5 Uses: Marginal Concepts, Elasticity of demand, Increasing and decreasing functions (K1, K2, K3, K4)
- 2.6 Maxima and minima, break - even point. (K1, K2, K3, K4)

### Unit III: Classification and Graphical Representation

(15 hours)

- 3.1 Introduction, meaning of classification, chief characteristics of classification, objects of classification rules of classification (K1, K2, K3, K4)
- 3.2 Frequency distribution, individual observations (K1, K2, K3, K4)
- 3.3 Discrete frequency distributions continuous frequency distribution (K1, K2, K3, K4)
- 3.4 Frequency distribution, graph of frequency distribution (K1, K2, K3, K4)
- 3.5 Histogram (K1, K2, K3, K4)
- 3.6 Frequency polygon, frequency curve. (K1, K2, K3, K4)

### Unit IV: Measures of Central Tendency

(15 hours)

- 4.1 Arithmetic mean (K1, K2, K3, K4)
- 4.2 Median (K1, K2, K3, K4)
- 4.3 Mode (K1, K2, K3, K4)
- 4.4 Empirical formulae, Combined and Weighted arithmetic mean (K1, K2, K3, K4)
- 4.5 Geometric mean (K1, K2, K3, K4)
- 4.6 Harmonic mean. (K1, K2, K3, K4)

### Unit V: Measures of Dispersion and Skewness

(15 hours)

- 5.1 Range (K1, K2, K3, K4)
- 5.2 Quartile deviation (K1, K2, K3, K4)
- 5.3 Mean deviation (K1, K2, K3, K4)
- 5.4 Standard deviation (K1, K2, K3, K4)
- 5.5 Karl Pearson's coefficient of skewness (K1, K2, K3, K4)
- 5.6 Bowley's coefficient of skewness. (K1, K2, K3, K4)

## Course Syllabus

### Unit I: Mathematics of Finance

(15 hours)

- 1.1 Mathematics of finance (K1, K2, K3, K4)
- 1.2 Simple and Compound interest (K1, K2, K3, K4)
- 1.3 Discount on bills (K1, K2, K3, K4)
- 1.4 Pay roll wages (K1, K2, K3, K4)
- 1.5 Commission (K1, K2, K3, K4)
- 1.6 Annuities (K1, K2, K3, K4)

### Unit II: Integration

(15 hours)

- 2.1 Integration, Indefinite integrals, Standard forms (K1, K2, K3, K4)
- 2.2 Integration of  $x^n$ ,  $\frac{1}{x}$ ,  $e^x$  (K1, K2, K3, K4)
- 2.3 Basic theorems on integration, Integration (K1, K2, K3, K4)
- 2.4 Integration by substitution ( $ax+b$ ,  $e^{ax+b}$ ,  $f'(x)/f(x)$ ) (K1, K2, K3, K4)
- 2.5 Integration by partial fractions (K1, K2, K3, K4)
- 2.6 Integration by parts, Uses of Economics. (K1, K2, K3, K4)

### Unit III: Correlation and Regression

(15 hours)

- 3.1 Correlation (K1, K2, K3, K4)
- 3.2 Karl Pearson's coefficient of correlation (K1, K2, K3, K4)
- 3.3 Spearman's rank correlation (K1, K2, K3, K4)
- 3.4 Regression (K1, K2, K3, K4)
- 3.5 Simple regression equations (K1, K2, K3, K4)
- 3.6 Regression coefficients. (K1, K2, K3, K4)

### Unit IV: Index Numbers

(15 hours)

- 4.1 Various methods of construction of index numbers, Unweighted index numbers. (K1, K2, K3, K4)
- 4.2 Weighted index numbers, Quantity index numbers, Value index numbers (K1, K2, K3, K4)
- 4.3 Test of consistency of index numbers, Time reversal test, Factor reversal test (K1, K2, K3, K4)
- 4.4 Chain base and fixed base index numbers (K1, K2, K3, K4)
- 4.5 Base shifting, Consumer price index (K1, K2, K3, K4)
- 4.6 Aggregate method, Family budget method. (K1, K2, K3, K4)

### Unit V: Probability

(15 hours)

- 5.1 Permutation and Combination (K1, K2, K3, K4)
- 5.2 Trial, Event, Sample space (K1, K2, K3, K4)
- 5.3 Mutually exclusive events, Exhaustive events, Independent events (K1, K2, K3, K4)
- 5.4 Classical definition of probability, Axiomatic definition of probability (K1, K2, K3, K4)
- 5.5 Addition and multiplication theorems (without proof) (K1, K2, K3, K4)
- 5.6 Problems (K1, K2, K3, K4)

**SEMESTER – III**  
**UCBAG20 – Operations Research I**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> UCBAG20	<b>Title of the Course:</b> <b>Operations Research I</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the use of quantitative methods and techniques for effective decision making
2. To provide a detailed knowledge about mathematical, transportation and assignment models.
3. To analyse any real life system with limited constraints and depict it in a model form.
4. To examine the aspects of business and marketing with respect to operations research.

**Course Outcomes (CO)**

The learners will be able to

1. Understand and solve linear programming problems.
2. Identify and develop the operational research models such as graphical and simplex method.
3. Comprehend advanced linear programming problems using Big M method.
4. Construct and solve transportation models and assignment models.
5. Analyze and evaluate assignment models.

## Course Syllabus

### **Unit I: Introduction and Mathematical Formulation (18 hours)**

- 1.1 Operations research: Definition (K1, K2, K3, K4)
- 1.2 Scope, Characteristics (K1, K2, K3, K4)
- 1.3 Models of operations research: Iconic (K1, K2, K3, K4)
- 1.4 Analogue, Symbolic model (K1, K2, K3, K4)
- 1.5 Linear programming (K1, K2, K3, K4)
- 1.6 Formulation. (K1, K2, K3, K4)

### **Unit II: Linear Programming (18 hours)**

- 2.1 Linear Programming: Graphical method (problems: part I) (K1, K2, K3, K4)
- 2.2 Graphical method (problems: part II) (K1, K2, K3, K4)
- 2.3 Graphical method (problems: part III) (K1, K2, K3, K4)
- 2.4 Regular simplex Method (problems: part I) (K1, K2, K3, K4)
- 2.5 Regular simplex Method (problems: part II) (K1, K2, K3, K4)
- 2.6 Regular simplex Method (problems: part III) (K1, K2, K3, K4)

### **Unit III: Linear Programming (18 hours)**

- 3.1 Linear programming: Big 'M' method (problems part I) (K1, K2, K3, K4)
- 3.2 Big 'M' method (problems part II) (K1, K2, K3, K4)
- 3.3 Big 'M' method (problems part III) (K1, K2, K3, K4)
- 3.4 Duality (problems part I) (K1, K2, K3, K4)
- 3.5 Duality (problems part II) (K1, K2, K3, K4)
- 3.6 Duality (problems part III) (K1, K2, K3, K4)

### **Unit IV: Transportation Model (18 hours)**

- 4.1 Transportation Problem (K1, K2, K3, K4)
- 4.2 Initial basic feasible solution using North West Corner rule(K1, K2, K3, K4)
- 4.3 Initial basic feasible solution using least cost method and Vogel's approximation method (K1, K2, K3, K4)
- 4.4 Degeneracy, Unbalanced Transportation problem (K1, K2, K3, K4)
- 4.5 Maximization problem(K1, K2, K3, K4)
- 4.6 Test of Optimality using MODI method (K1, K2, K3, K4)

### **Unit V: Assignment Model (18 hours)**

- 5.1 Assignment problems (K1, K2, K3, K4)
- 5.2 Minimal assignment problems (K1, K2, K3, K4)
- 5.3 Unbalanced Assignment problems (K1, K2, K3, K4)
- 5.4 Restricted Assignment problems (K1, K2, K3, K4)
- 5.5 Maximization problem in Assignment (K1, K2, K3, K4)
- 5.6 Maximization problems in Assignment Problems (K1, K2, K3, K4)

**Text Books:**

-----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To improve problem solving skills of students and make them to use the skills in daily life problems
2. To improve knowledge in Sequencing Problems, Queuing theory and Network Analysis.

**Course Outcomes (CO)**

The learners will be able to

1. Utilize the concepts of Operation research in real life experiments and plan the Sequencing of jobs through machines.
2. Evaluate the critical path and project duration in CPM.
3. Compute the Probability of meeting the scheduled dates in PERT and compare CPM and PERT.
4. Acquire the solutions for Game of two players in Game theory.
5. Analyze the queuing theory for single channel problems.

**(Low-L, Medium - M, High - H)**

## Course Syllabus

### Unit I: Sequencing Problems

(18 hours)

- 1.1 Introduction – Definition of Sequencing (K1, K2)
- 1.2 Basic steps – Job assigning through machines (K1, K2)
- 1.3 Processing n jobs through two machines (K1, K2, K3, K4)
- 1.4 Processing n jobs through three machines (K1, K2, K3, K4)
- 1.5 Processing two jobs through m machines (K1, K2, K3, K4)
- 1.6 Processing n jobs through m machines (K1, K2, K3, K4)

### Unit II: Network Analysis: CPM Computations

(18 hours)

- 2.1 Introduction – Network diagram representation (K1, K2)
- 2.2 Rules for constructing the network (K1, K2)
- 2.3 Numbering the events – Different time Calculation (K1, K2, K3, K4)
- 2.4 CPM representation in Tabular form (K1, K2, K3, K4)
- 2.5 Total, Independent and free float Calculations (K1, K2, K3, K4)
- 2.6 Calculation of CPM and Project duration (K1, K2, K3, K4)

### Unit III: Network Analysis: PERT Computations

(18 hours)

- 3.1 Network diagram representation (K1, K2)
- 3.2 Basic Steps in PERT (K1, K2)
- 3.3 Difference between PERT and CPM (K1, K2, K3, K4)
- 3.4 Calculation of Critical path and Project duration (K1, K2, K3, K4)
- 3.5 Probability of meeting the scheduled dates (K1, K2, K3, K4)
- 3.6 Calculation of project duration for the scheduled dates (K1, K2, K3, K4)

### Unit IV: Game Theory

(18 hours)

- 4.1 Introduction characteristic of Games- Definition (K1, K2)
- 4.2 Meaning for Saddle points (K1, K2)
- 4.3 Game without Saddle points (K1, K2, K3, K4)
- 4.4 Games without Saddle points – Mixed Strategy
- 4.5 Basic Steps -Dominance property (K1, K2)
- 4.6 Games problems using Dominance property (K1, K2, K3, K4)

### Unit V: Queuing Theory

(18 hours)

- 5.1 Introduction - Meaning – Queuing theory (K1, K2)
- 5.2 Various types of Queuing Model (K1, K2)
- 5.3 Single channel Queuing theory (infinite capacity only) (K1, K2, K3, K4)
- 5.4 Different formulae (without derivation) - Concepts
- 5.5 Calculation of Single Channel systems (K1, K2, K3, K4)
- 5.6 Problems solving using Queuing theory (K1, K2, K3, K4)

**Text Books:**

1. Kalavathy. S - Operations Research, 2<sup>nd</sup> Edition - Vikas Publishing Ltd., 2002.
2. Vittal P.R. - Introduction to Operations Research, 1<sup>st</sup> Edition - Margham Publishers – 1999.

---------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide an opportunity to master mathematical applications in Economics, Finance, Commerce and Management.
2. To develop the ability of students to deal with numerical and quantitative issues in business.
3. To have a strong understanding of statistical applications in Economics and Management.
4. To enable the use of statistical techniques wherever relevant.

**Course Outcomes (CO)**

The learners will be able to

1. Apply the knowledge in matrices in solving business problems.
2. Analyze and demonstrate differentiation skills in economics and business.
3. Apply statistical and graphical techniques wherever relevant.
4. Apply the concepts, tools and techniques in business statistical analysis.
5. Solve a range of problems using the techniques covered.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Matrices

(15 hours)

- 1.1 Definition, Types of matrices (K1, K2, K3, K4)
- 1.2 Matrix operations, Determinant of a matrix (K1, K2, K3, K4)
- 1.3 Singular and non-singular matrices (K1, K2, K3, K4)
- 1.4 Inverse of a matrix by co-factor method (K1, K2, K3, K4)
- 1.5 Rank of a matrix (K1, K2, K3, K4)
- 1.6 Solution of system of linear simultaneous equations using Cramer's rule (K1, K2, K3, K4)

### Unit II: Differentiation

(15 hours)

- 2.1 Differentiation (K1, K2, K3, K4)
- 2.2 Derivatives of standard functions  $x^n$ ,  $e^x$ ,  $\log x$ , constant (without proof) (K1, K2, K3, K4)
- 2.3 Rules of differentiation (Addition, difference, product, quotient) (K1, K2, K3, K4)
- 2.4 Chain rule, Successive differentiation (up to second derivative) (K1, K2, K3, K4)
- 2.5 Uses: Marginal Concepts, Elasticity of demand, Increasing and decreasing functions (K1, K2, K3, K4)
- 2.6 Maxima and minima, break - even point. (K1, K2, K3, K4)

### Unit III: Classification and Graphical Representation

(15 hours)

- 3.1 Introduction, meaning of classification, chief characteristics of classification, objects of classification rules of classification (K1, K2, K3, K4)
- 3.2 Frequency distribution, individual observations (K1, K2, K3, K4)
- 3.3 Discrete frequency distributions continuous frequency distribution (K1, K2, K3, K4)
- 3.4 Frequency distribution, graph of frequency distribution (K1, K2, K3, K4)
- 3.5 Histogram (K1, K2, K3, K4)
- 3.6 Frequency polygon, frequency curve. (K1, K2, K3, K4)

### Unit IV: Measures of Central Tendency

(15 hours)

- 4.1 Arithmetic mean (K1, K2, K3, K4)
- 4.2 Median (K1, K2, K3, K4)
- 4.3 Mode (K1, K2, K3, K4)
- 4.4 Empirical formulae, Combined and Weighted arithmetic mean (K1, K2, K3, K4)
- 4.5 Geometric mean (K1, K2, K3, K4)
- 4.6 Harmonic mean. (K1, K2, K3, K4)

### Unit V: Measures of Dispersion and Skewness

(15 hours)

- 5.1 Range (K1, K2, K3, K4)
- 5.2 Quartile deviation (K1, K2, K3, K4)
- 5.3 Mean deviation (K1, K2, K3, K4)
- 5.4 Standard deviation (K1, K2, K3, K4)
- 5.5 Karl Pearson's coefficient of skewness (K1, K2, K3, K4)
- 5.6 Bowley's coefficient of skewness. (K1, K2, K3, K4)

**Text Books:**

----------------------------------	--------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To deepen the knowledge of statistical concepts and to introduce the concepts of Operations Research.
2. To demonstrate and apply the concepts of probability and game theory.

**Course Outcomes (CO)**

The learners will be able to

1. Gain practical knowledge of correlation and regression.
2. Understand the basic concepts of index numbers.
3. Learn the ideas of possible outcomes.
4. Develop mathematical skills to optimize transportation and assignment problem.
5. Propose the best strategy using decision making methods under uncertainty and game theory.

## Course Syllabus

### Unit I: Correlation and Regression

(15 hours)

- 1.1 Introduction (K1,K2)
- 1.2 Scatter Diagram (K1,K2,K3)
- 1.3 Karl Pearson's coefficient of correlation (K1, K2, K3, K4)
- 1.4 Spearman's Rank correlation(K1, K2, K3)
- 1.5 Methods of forming the regression equations (K1, K2, K3)
- 1.6 Properties of regression lines and coefficients. (K1, K2, K3, K4)

### Unit II: Index Numbers

(15 hours)

- 2.1 Various methods of construction of index numbers (K1, K2)
- 2.2 Methods, Simple Aggregate, Weighted Aggregate (K1, K2, K3, K4)
- 2.3 Quantity Index numbers, Value Index numbers (K1, K2, K3, K4)
- 2.4 Test of consistency of index numbers, Time reversal test, Factor reversal test (K1, K2, K3, K4)
- 2.5 Base shifting (K1, K2, K3)
- 2.6 Consumer price index, Family budget method.(K1,K2,K3)

### Unit III: Probability

(15 hours)

- 3.1 Permutation, Combination (K1, K2)
- 3.2 Definitions of Trial, Event, Sample space, Mutually Exclusive Cases, Exhaustive events, Independent events (K1, K2, K3)
- 3.3 Classical definition of probability (K1, K2)
- 3.4 Axiomatic Definition of probability (K1, K2)
- 3.5 Addition and multiplication theorem (without proof) (K1, K2)
- 3.6 Problems (K1, K2, K3, K4)

### Unit IV: Transportation and Assignment model

(15 hours)

- 4.1 Transportation model: Initial basic feasible solution (K1, K2, K3, K4)
- 4.2 Test for Optimality (K1, K2, K3, K4)
- 4.3 MODI method (omit degeneracy) (K1, K2, K3, K4)
- 4.4 Assignment Model: Assignment problem (K1, K2, K3, K4)
- 4.5 Minimal assignment problem (K1, K2, K3, K4)
- 4.6 Hungarian method. (K1, K2, K3, K4)

### Unit V: Game Theory

(15 hours)

- 5.1 Introduction (K1)
- 5.2 Meaning (K1, K2)
- 5.3 The Maximin and Minimax principles (K1, K2, K3, K4)
- 5.4 Saddle point (K1, K2, K3, K4)
- 5.5 Games without saddle points (Mixed strategies) (K1, K2, K3, K4)
- 5.6 Dominance property (Excluding graphical and LPP methods) (K1, K2, K3, K4)

**Text Books:**

1. P. A. Navnitham - Business Statistics and Operations Research - Jai Publishers, Trichy 2007.

**Course Objectives**

1. To introduce the basic concepts of matrices
2. To improve problem solving skills in Trigonometry
3. To introduce various methods to solve equations
4. To introduce differential and integral calculus

**Course Outcomes (CO)**

The learners will be able to

1. Understand the basic concepts of matrices
2. Apply the theory of equations and find roots using Newton's and Horner's method.
3. Acquire problem solving skills in trigonometry.
4. Compute radius of curvature, centre of curvature, evolutes and involutes.
5. Apply the techniques of integral calculus.

## Course Syllabus

### Unit I: Matrices (18 hours)

- 1.1 Symmetric, Skew symmetric, Hermitian, Skew Hermitian (K1, K2, K3, K4)
- 1.2 Orthogonal, Unitary matrices (K1, K2, K3, K4)
- 1.3 Eigen values and Eigen vectors (K1, K2, K3, K4)
- 1.4 Cayley-Hamilton Theorem (without proof) (K1, K2, K3, K4)
- 1.5 Verification and computation of inverse (K1, K2, K3, K4)
- 1.6 Diagonalisation of a matrix (K1, K2, K3, K4)

### Unit II: Theory of Equations (18 hours)

- 2.1 Polynomial equations (K1, K2, K3, K4)
- 2.2 Irrational roots – Complex roots (K1, K2, K3, K4)
- 2.3 Reciprocal equations (K1, K2, K3, K4)
- 2.4 Descarte's Rule of signs (K1, K2, K3, K4)
- 2.5 Approximation of roots of polynomial equation by Newton's method (K1, K2, K3, K4)
- 2.6 Horner's methods (K1, K2, K3, K4)

### Unit III: Trigonometry (18 hours)

- 3.1 Expansions of  $\sin\theta$ ,  $\cos\theta$ ,  $\tan\theta$  (K1, K2, K3, K4)
- 3.2 Expansions of  $\sin\theta$ ,  $\cos\theta$ ,  $\tan\theta$  (continued) (K1, K2, K3, K4)
- 3.3 Expansion of  $\sin^n \theta$ ,  $\cos^n \theta$  (K1, K2, K3, K4)
- 3.4 Expansions of  $\sin\theta$ ,  $\cos\theta$ ,  $\tan\theta$  in terms of  $\theta$  (K1, K2, K3, K4)
- 3.5 Expansions of  $\sin\theta$ ,  $\cos\theta$ ,  $\tan\theta$  in terms of  $\theta$  (continued) (K1, K2, K3, K4)
- 3.6 Logarithm of a complex number (K1, K2, K3, K4)

### Unit IV: Differential Calculus (18 hours)

- 4.1 Curvature (K1, K2, K3, K4)
- 4.2 Radius of curvature in Cartesian Coordinates (K1, K2, K3, K4)
- 4.3 Polar Coordinates, (K1, K2, K3, K4)
- 4.4 p-r equations (K1, K2, K3, K4)
- 4.5 Evolutes (K1, K2, K3, K4)
- 4.6 Involutives (K1, K2, K3, K4)

### Unit V: Integral Calculus (18 hours)

- 5.1 Integration by parts (K1, K2, K3, K4)
- 5.2 Bernoulli's formula (K1, K2, K3, K4)
- 5.3 Reduction formulae  $\sin^n x$  (K1, K2, K3, K4)
- 5.4 Reduction formulae  $\cos^n x$  (K1, K2, K3, K4)
- 5.5 Reduction formulae  $\tan^n x$ ,  $\operatorname{cosec}^n x$  (K1, K2, K3, K4)
- 5.6 Reduction formulae  $\sec^n x$ ,  $\cot^n x$  (K1, K2, K3, K4)

-----------------------------	-------------------------------------	--	------------------------------------	--	------------------	----------------------	----------------------

**Course Objectives**

1. To introduce concepts of vector calculus
2. To teach methods of solving partial differential equations
3. To introduce Laplace transforms and Fourier Series

**Course Outcomes (CO)**

The learners will be able to

1. Understand the use of vector calculus in science and engineering.
2. Understand the applications of Green's, Gauss divergence and Stoke's Theorems.
3. Find the complete, singular and general integral of partial differential equations.
4. Understand the basic concepts of Laplace Transforms.
5. Determine the nature of the Fourier series and find its coefficients

## Course Syllabus

### Unit I: Differentiation of vectors (18 hours)

- 1.1 Scalar and vector point functions (K1, K2, K3, K4)
- 1.2 Differentiation of vectors (K1, K2, K3, K4)
- 1.3 Differential operators (K1, K2, K3, K4)
- 1.4 Directional derivatives (K1, K2, K3, K4)
- 1.5 Gradient (K1, K2, K3, K4)
- 1.6 Divergence and Curl (K1, K2, K3, K4)

### Unit II: Integration of vectors (18 hours)

- 2.1 Line Integral (K1, K2, K3, K4)
- 2.2 Surface Integral (K1, K2, K3, K4)
- 2.3 Volume Integral (K1, K2, K3, K4)
- 2.4 Green's theorem statement and application (K1, K2, K3, K4)
- 2.5 Gauss's theorem statement and application (K1, K2, K3, K4)
- 2.6 Stoke's theorem statement and application (K1, K2, K3, K4)

### Unit III: Partial Differential Equations (18 hours)

- 3.1 Formation of Partial Differential equations by eliminating arbitrary constants (K1, K2, K3, K4)
- 3.2 Formation of Partial Differential equations by eliminating arbitrary functions (K1, K2, K3, K4)
- 3.3 Solutions of standard types of first order differential equations –  $f(p,q) = 0$  (K1, K2, K3, K4)
- 3.4 Solution of  $f(x,p,q) = 0$ ;  $f(y,p,q) = 0$ ;  $f(z,p,q) = 0$  (K1, K2, K3, K4)
- 3.5 Solution of  $f_1(x,p) = f_2(y,q)$  (K1, K2, K3, K4)
- 3.6 Solution of  $z = px+qy+f(p,q)$  (K1, K2, K3, K4)

### Unit IV: Laplace Transformations (18 hours)

- 4.1 Definition of Laplace transforms (K1, K2, K3, K4)
- 4.2 Laplace transforms of standard functions (K1, K2, K3, K4)
- 4.3 Laplace transforms – problems (K1, K2, K3, K4)
- 4.4 Laplace transforms – problems (continued) (K1, K2, K3, K4)
- 4.5 Inverse Laplace Transforms (K1, K2, K3, K4)
- 4.6 Solving ordinary differential equations of second order with constant coefficients using Laplace transforms (K1, K2, K3, K4)

### Unit V: Fourier Series (18 hours)

- 5.1 Definition of Fourier series (K1, K2, K3, K4)
- 5.2 Fourier series –Problems (K1, K2, K3, K4)
- 5.3 Finding Fourier coefficients for a given periodic function with period  $2\pi$  (K1, K2, K3, K4)
- 5.4 Odd functions (K1, K2, K3, K4)
- 5.5 Even function (K1, K2, K3, K4)
- 5.6 Half range series.(K1, K2, K3, K4)

-----------------------------------	--------------------------------	---	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the concepts of Numerical Analysis.
2. To provide suitable and effective methods called numerical methods, for obtaining approximate representative numerical results of problems.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the operators and their properties, form a forward and backward difference table.
2. Execute interpolation methods using forward and backward differences when the data is equally distributed.
3. Exhibit interpolation procedures using central differences when the data is equally distributed.
4. Use divided differences for interpolation when the data is unequally distributed.
5. Implement curve fitting and method of moments.

## Course Syllabus

### Unit I: Finite Differences

(18 hours)

- 1.1 Forward Differences table and Backward differences table (K1,K2)
- 1.2 Differences of polynomial and factorial polynomial (K1,K2,K3)
- 1.3 Reciprocal factorial and Polynomial in Factorial Notation (K1,K2,K3)
- 1.4 Error propagation in difference table (K1, K2, K3, K4)
- 1.5 Other differences operators (K1,K2,K3,K4)
- 1.6 Summation of series (K1,K2,K3,K4)

### Unit II: Interpolation

(18 hours)

- 2.1 Introduction (K1, K2)
- 2.2 Newton's Forward interpolation formula (K1, K2, K3, K4)
- 2.3 Newton's backward interpolation formula (K1, K2, K3, K4)
- 2.4 Error in polynomial interpolation (K1, K2, K3, K4)
- 2.5 Equidistant terms with one or more missing terms (K1, K2, K3, K4)
- 2.6 Introduction and Form a central difference table (K1, K2)

### Unit III: Central Difference Table

(18 hours)

- 3.1 Gauss Forward Interpolation formula (K1, K2, K3, K4)
- 3.2 Gauss backward Interpolation formula (K1, K2, K3, K4)
- 3.3 Stirling's Formula (K1, K2, K3, K4)
- 3.4 Bessel's Formula (K1, K2, K3, K4)
- 3.5 Laplace – Everett's formula (K1, K2, K3, K4)
- 3.6 Relation between Bessel's and Laplace – Everett's formula (K1, K2, K3, K4)

### Unit IV: Interpolation with Unequal intervals

(18 hours)

- 4.1 Properties of divided difference (K1, K2, K3)
- 4.2 Relation between divided differences and forward differences (K1, K2, K3)
- 4.3 Newton's divided difference formula (K1, K2, K3, K4)
- 4.4 Lagrange's interpolation formula and its problem (K1, K2, K3, K4)
- 4.5 Inverse interpolation and Lagrange's method (K1, K2, K3, K4)
- 4.6 Iterative method (K1, K2, K3, K4)

### Unit 5: Empirical Laws and Curve Fitting

(18 hours)

- 5.1 The Linear law and Laws Reducible to linear law (K1, K2, K3)
- 5.2 Method of Group of Averages and Equations involving three constants (K1, K2, K3, K4)
- 5.3 Principles of least squares and Fitting a Straight line and Parabola (K1, K2, K3, K4)
- 5.4. Fitting the Exponential Curve and Curve  $y = a^x$  (K1, K2, K3, K4)

5.5 Sum of squares of Residuals (K1, K2, K3, K4)

5.6 Method of moments (K1, K2, K3, K4)

**Course Objectives**

1. To familiarize the students with finding root of equations, solving systems of linear algebraic equation, numerical integration and differentiation.
2. To solve differential equation with boundary value problems.

**Course Outcomes (CO)**

The learners will be able to

1. Obtain numerical solutions of algebraic and transcendental equations.
2. Find numerical solutions of system of linear equations.
3. Use numerical methods to do differentiation.
4. Use numerical methods to do integration.
5. Solve ordinary differential equations using numerical methods.

## Course Syllabus

### **Unit I: Solutions of Algebraic and Transcendental Equations (18 hours)**

- 1.1 Bisection Method (K1, K2, K3, K4)
- 1.2 Iteration Method (K1, K2, K3, K4)
- 1.3 Newton Raphson Method (K1, K2, K3, K4)
- 1.4 Regular Falsi Method (K1, K2, K3, K4)
- 1.5 Horner's method (K1, K2, K3, K4)
- 1.6 Graffe's root squaring method (K1, K2, K3, K4)

### **Unit II: Solutions of Simultaneous Linear Algebraic Equations (18 hours)**

- 2.1 Gauss Elimination Method (K1, K2, K3, K4)
- 2.2 Gauss – Jordan Method (K1, K2, K3, K4)
- 2.3 Jacobi's Method (K1, K2, K3, K4)
- 2.4 Gauss- Seidel Method (K1, K2, K3, K4)
- 2.5 Crout's method (K1, K2, K3, K4)
- 2.6 Inverse Crout's method (K1, K2, K3, K4)

### **Unit III: Numerical Differentiation and Numerical Integration (18 hours)**

- 3.1 Newton's forward difference formula (K1, K2, K3, K4)
- 3.2 Newton's backward difference formula (K1, K2, K3, K4)
- 3.3 Derivatives using Stirling's formula (K1, K2, K3, K4)
- 3.4 Maxima and Minima (K1, K2, K3, K4)
- 3.5 Trapezoidal Rule, Simpson's One-Third Rule, Simpson's Three-Eight Rule (K1, K2, K3, K4)
- 3.6 Weddle's Rule and Romberg Method (K1, K2, K3, K4)

### **Unit IV: Numerical Solution of Ordinary Differential Equations (18 hours)**

- 4.1 Taylor's series Method for simultaneous first order and higher order differential equations (K1, K2, K3, K4)
- 4.2 Picard's method of successive approximations (K1, K2, K3, K4)
- 4.3 Picard's method for first order differential equations (K1, K2, K3, K4)
- 4.4 Picard's method for second order differential equations (K1, K2, K3, K4)
- 4.5 Euler's method and Improved Euler's method (K1, K2, K3, K4)
- 4.6 Modified Euler's method (K1, K2, K3, K4)

### **Unit V Numerical Solution of Ordinary Differential Equations (Continued) (18 hours)**

- 5.1 Runge – Kutta method and Higher order R-K methods (K1, K2, K3, K4)
- 5.2 Runge – Kutta methods for simultaneous first order Equations (K1, K2, K3, K4)
- 5.3 Runge – Kutta methods for simultaneous second order Equations (K1, K2, K3, K4)
- 5.4 Predictor – Corrector Method (K1, K2, K3, K4)
- 5.5 Milne's Method (K1, K2, K3, K4)
- 5.6 Adams – Bashforth Method (K1, K2, K3, K4)

**Text Book:**

**Course Objectives**

1. To provide basic mathematical concepts required for computer applications.
2. To introduce the notion of relations and functions
3. To learn simple methods in algebra

**Course Outcomes (CO)**

The learners will be able to

1. Understand the concepts of Mathematical logic and compute the operators on Symbolic logic.
2. Acquire knowledge about relations and functions.
3. Assess real life simple problems with permutation, combination and probability.
4. Know about matrices and their types.
5. Differentiate standard trigonometric functions.

## Course Syllabus

### Unit I: Symbolic logic (18 hours)

- 1.1 Symbolic logic (K1, K2, K3)
- 1.2 Logical operator (K1, K2, K3)
- 1.3 Conditional and bi-conditional operators (K1, K2, K3)
- 1.4 Converse, Inverse, Contra positive (K1, K2, K3)
- 1.5 Tautology and Contradiction (K1, K2, K3, K4)
- 1.6 Algebra of Propositions (K1, K2, K3, K4)

### Unit II: Relations and Functions (18 hours)

- 2.1 Relation (K1, K2, K3)
- 2.2 Equivalence relation (K1, K2, K3)
- 2.3 Partition, Partial order relation (K1, K2, K3, K4)
- 2.4 Functions, Inverse (K1, K2, K3, K4)
- 2.5 Composition of functions (K1, K2, K3)
- 2.6 Properties of functions (K1, K2, K3, K4)

### Unit III: Algebra (18 hours)

- 3.1 Probability (K1, K2, K3)
- 3.2 Probability (simple problems) (K1, K2, K3, K4)
- 3.3 Permutations (K1, K2, K3, K4)
- 3.4 combinations (K1, K2, K3, K4)
- 3.5 Combinatorial arguments (K1, K2, K3, K4)
- 3.6 Boolean algebra (K1, K2, K3)

### Unit IV: Matrices (18 hours)

- 4.1 Types of matrices (K1, K2, K3)
- 4.2 Matrix operations, Symmetric and skew symmetric, Hermitian and skew-Hermitian (K1, K2, K3)
- 4.3 Orthogonal and Unitary (K1, K2, K3, K4)
- 4.4 Rank of a matrix (K1, K2, K3, K4)
- 4.5 Solution of system of linear equations using matrices (K1, K2, K3, K4)
- 4.6 Cramer's rule (K1, K2, K3)

### Unit V: Differential calculus (18 hours)

- 5.1 Differentiation of standard function  $x^n$  (K1, K2, K3)
- 5.2 Differentiation of standard function  $e^x$  (K1, K2, K3)
- 5.3 Differentiation of standard function  $\log x$  (K1, K2, K3)
- 5.4 Differentiation of standard functions  $\sin x$ ,  $\cos x$ ,  $\tan x$  (K1, K2, K3)
- 5.5 Chain Rule (K1, K2, K3)

## 5.6 Successive differentiation (up to second derivative) (K1, K2, K3)

-----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To enrich the knowledge of students on statistical methods which play a major role in computer applications
2. To demonstrate sampling techniques and to employ statistical methods of analysis to make inference

**Course Outcomes (CO)**

The learners will be able to

1. Analyse the statistical data using measures of central tendency and graphs.
2. Provide an overall description of a set of data using measures of dispersion.
3. Apply the concept of regression and correlation in business problems.
4. Make decisions using hypothesis testing.
5. Apply the Chi-square test for independence as well as goodness of fit.

**(Low- L, Medium - M, High - H)**

## Course Syllabus

### **Unit 1: Introduction of Statistics and Measurements of Central Tendency (18 hours)**

- 1.1 Definition of Statistics, Classification and Tabulation (K1, K2)
- 1.2 Graphical representation of numerical data (K1, K2, K3)
- 1.3 Formation of frequency distribution ( K1, K2, K3)
- 1.4 Mean and its types (K1, K2, K3, K4)
- 1.5 Median and its types( K1, K2, K3, K4)
- 1.6 Mode and its types ( K1, K2, K3, K4)

### **Unit II: Measures of Dispersion (18 hours)**

- 2.1 Basic definition of Measures of Dispersion (K1, K2)
- 2.2 Sums on range (K1, K2)
- 2.3 Sums on quartile deviation (K1, K2, K3)
- 2.4 Sums on Mean deviation about mean and median (K1, K2, K3, K4)
- 2.5 Sums on Standard deviation (K1, K2, K3, K4)
- 2.6 Sums on coefficient of Variation (K1, K2, K3, K4)

### **Unit III: Correlation and Regression (18 hours)**

- 3.1 Definitions of Correlation and its types (K1, K2)
- 3.2 Karl Pearson's Co-efficient of correlation (K1, K2, K3, K4)
- 3.3 Bivariate Correlation (K1, K2, K3, K4)
- 3.4 Spearman Rank Correlation (K1, K2, K3, K4)
- 3.5 Regression equations (K1, K2, K3, K4)
- 3.6 Regression Co-efficient (K1, K2, K3, K4)

### **Unit IV: Tests of Hypothesis (18 hours)**

- 4.1 Basic definition of hypothesis (K1, K2)
- 4.2 Test for single and difference between means (K1, K2, K3, K4)
- 4.3 Test for single standard deviation and difference standard deviation (K1, K2, K3, K4)
- 4.4 Test for small correlation coefficient (K1, K2, K3, K4)
- 4.5 Small samples-Test for single and difference between means (K1, K2, K3, K4)
- 4.6 Paired t-test (K1, K2, K3, K4)

### **Unit V: Chi-Square Test and Goodness of Fit (18 hours)**

- 5.1 Definitions of Chi-Square test (K1, K2)
- 5.2 Properties (K1, K2)
- 5.3 Sums on Chi-Square test (K1, K2, K3, K4)
- 5.4 Goodness of Fit (K1, K2, K3, K4)
- 5.5 Contingency table (K1, K2, K3, K4)
- 5.6 Test for Independence of Attributes (K1, K2)

**SEMESTER – III**  
**UABSA20 – Biostatistics I**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> UABSA20	<b>Title of the Course:</b> Biostatistics – I	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>MARKS</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To deepen the knowledge in various statistical concepts which play an important role in the field of biological sciences.
2. Recognize the importance data collection and its role in determining scope of inference.
3. To apply appropriate statistical methods for analyzing one or two variables.

**Course Outcomes (CO)**

The learners will be able to

1. Frame a relevant frequency distribution for a given biological data.
2. Determine mean, median, mode for biological data.
3. Compute measures of dispersion.
4. Understand probability concepts.
5. Gain knowledge of correlation and regression and its applications.

## Course Syllabus

### **Unit I: Frequency Distributions** (18 hours)

- 1.1 Introduction (K1)
  - 1.2 Frequency distribution (K1, K2, K3)
  - 1.3 Univariate frequency distribution (K1, K2, K3, K4)
  - 1.4 Bivariate frequency distribution (K1, K2, K3, K4)
  - 1.5 Diagrams –Histogram – Frequency polygon – Frequency curve (K1, K2, K3, K4)
  - 1.6 Characteristics of a frequency distribution (K1, K2, K3, K4)
- (Chapter – 5: Section 5.1-5.4)

### **Unit II: Measures of Central Tendency and Location** (18 hours)

- 2.1 Introduction (K1)
  - 2.2 Mean, Median (K1, K2, K3, K4)
  - 2.3 Quartiles, Deciles, Percentiles and Mode (K1, K2, K3, K4)
  - 2.4 Position of averages - Selection of the Appropriate Measure of Central Tendency (K1, K2)
  - 2.5 Geometric mean (K1, K2, K3, K4)
  - 2.6 Harmonic mean. (K1, K2, K3, K4)
- (Chapter – 6: Section 6.1 – 6.9)

### **Unit III: Measures of Dispersion** (18 hours)

- 3.1 Introduction (K1)
  - 3.2 Range (K1, K2, K3, K4)
  - 3.3 Interquartile Range (K1, K2, K3, K4)
  - 3.4 Mean deviation (K1, K2, K3, K4)
  - 3.5 Variance and Standard deviation (K1, K2, K3, K4)
  - 3.6 Alternate methods to find Standard Deviation-Coefficient of Variation. (K1, K2, K3, K4)
- (Chapter – 7: Sections 7.1-7.7)

### **Unit IV: Probability** (18 hours)

- 4.1 Introduction (K1)
  - 4.2 The probability Scale (K1, K2)
  - 4.3 Measurement of Probability (K1, K2)
  - 4.4 Laws of probability for independent events (K1, K2, K3, K4)
  - 4.5 Problems on probability (K1, K2, K3, K4)
  - 4.6 Conditional probability (K1, K2, K3, K4)
- (Chapter -8: Sections 8.1-8.5)

### **Unit V: Linear Regression and Correlation** (18 hours)

- 5.1 Introduction (K1)
  - 5.2 Scatter diagram (K1, K2)
  - 5.3 Correlation and Regression (K1, K2)
  - 5.4 Properties of Correlation and Regression (K1, K2)
  - 5.5 Correlation Coefficient (Rank correlation coefficient) (K1, K2, K3, K4)
  - 5.6 Regression Equations. (K1, K2, K3, K4)
- (Chapter – 13: Sections 13.1 – 13.5)

**Text Book:**

**SEMESTER – IV**  
**UABSB20 – Biostatistics II**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: IV</b>	UABSB20	Biostatistics – II	Theory	Allied	6	5	100

**Course Objectives**

1. To deepen the knowledge in various statistical concepts which play an important role in the field of biological sciences.
2. To understand interval estimation and hypothesis testing.
3. To interpret statistical results effectively in real life problems.

**Course Outcomes (CO)**

The learners will be able to

1. Apply probability distributions such as Binomial, Poisson and Normal to solve real life problems.
2. Recognize the importance of data collection and its role in determining scope of inference.
3. Execute the test of hypothesis for large and small samples drawn from a normal population.
4. Perform and apply Chi-square test
5. Carry out analysis of variance using F test.

**(Low-L, Medium - M, High - H)**

## **Course Syllabus**

### **Unit I: Probability Distributions**

**(18 hours)**

- 1.1 Introduction (K1)
  - 1.2 Binomial distribution (K1, K2, K3, K4)
  - 1.3 Binomial frequency distribution (K1, K2, K3, K4)
  - 1.4 Poisson distribution (K1, K2, K3, K4)
  - 1.5 Poisson frequency distribution (K1, K2, K3, K4)
  - 1.6 Normal distribution. (K1, K2, K3, K4)
- (Chapter – 9: Sections 9.1-9.4)

### **Unit II: Sampling**

**(18 hours)**

- 2.1 Introduction (K1)
  - 2.2 Definitions (K1)
  - 2.3 Types of Population (K1, K2, K3)
  - 2.4 Sample (K1, K2, K3, K4)
  - 2.5 Sampling variation and Bias - Non-Probability Sampling Techniques (K1, K2, K3, K4)
  - 2.6 Probability Sampling Techniques – Listing of Population - Sample size (K1, K2, K3, K4)
- (Chapter – 10: Sections 10.1-10.9)

### **Unit III: Tests of significance and Estimation**

**(18 hours)**

- 3.1 Introduction (K1)
  - 3.2 Procedure for Large Samples (K1, K2)
  - 3.3 Problems based on large samples (K1, K2, K3, K4)
  - 3.4 Procedure for Small samples: Examples (K1, K2, K3, K4)
  - 3.5 Estimation: Example for Large Samples (K1, K2, K3, K4)
  - 3.6 Estimation: Examples for Small Samples. (K1, K2, K3, K4)
- (Chapter – 12: Sections 12.1-12.6)

### **Unit IV: The Chi Square Test**

**(18 hours)**

- 4.1 Introduction (K1)
  - 4.2 The formula for Chi Square (K1, K2)
  - 4.3 Distribution of Chi Square (K1, K2, K3)
  - 4.4 Degrees of freedom (K1, K2, K3)
  - 4.5 Some applications of Chi Square (K1, K2, K3, K4)
  - 4.6 Misuse of Chi Square Test. (K1, K2)
- (Chapter – 14: Sections 14.1-14.5)

### **Unit V: Analysis of Variance**

**(18 hours)**

- 5.1 Snedecor's F-Distribution (K1, K2, K3, K4)
  - 5.2 Analysis of Variance (K1, K2, K3, K4)
  - 5.3 One way classification - Completely Randomised Design (K1, K2, K3, K4)
  - 5.4 Two way classification - Randomised Block Design (K1, K2, K3, K4)
  - 5.5 Latin Square Design (K1, K2, K3, K4)
  - 5.6 Merits and demerits of analysis of variance (K1, K2)
- (Chapter - 13: Sections 13.19 – 13.20)

**Text Books:**

1. P. S. S. Sundar Rao, J. Richard – An Introduction to Bio Statistics, 3<sup>rd</sup> Edition – Prentice Hall of India Pvt. Ltd., 2001.

**SEMESTER – I**  
**UAMST20 – Medical Statistics**

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> UAMST20	<b>Title of The Course :</b> Medical Statistics	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	--------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the basic concepts of statistics.
2. To make decisions based on statistical representation related to hospital administration.

**Course Outcomes (CO)**

The learners will be able to

1. Solve basic mathematical problems using matrices
2. Use various differentiation techniques
3. Give graphical representation of statistical data
4. Understand the concepts related to statistics
5. Analyze problems related to statistical measures

**(L-Low, M-Moderate, H-High)**

## Course Syllabus

### **Unit I: Matrices** (15 hours)

- 1.1 Definition - Types of matrices (K1, K2)
- 1.2 Matrix operations - Determinant of a matrix (K1, K2, K3, K4)
- 1.3 Singular and non-singular matrices (K1, K2, K3, K4)
- 1.4 Inverse of a matrix by co-factor method (K1, K2, K3, K4)
- 1.5 Rank of a matrix (K1, K2, K3, K4)
- 1.6 Solution of system of linear simultaneous equations using Cramer's rule (K1, K2, K3, K4)

### **Unit II: Differentiation** (15 hours)

- 2.1 Derivatives of standard functions  $x^n$ ,  $e^x$ ,  $\log x$ , constant (without proof) (K1, K2, K3)
- 2.2 Rules of differentiation (Addition, difference, product, quotient) (K1, K2, K3, K4)
- 2.3 chain rule, Successive differentiation (up to 2<sup>nd</sup> derivative) (K1, K2, K3, K4)
- 2.4 Uses: Marginal Concepts, Elasticity of demand (K1, K2, K3, K4)
- 2.5 Increasing and decreasing functions (K1, K2, K3, K4)
- 2.6 maxima and minima – break - even point (K1, K2, K3, K4)

### **Unit III: Classification and Graphical Representation** (15 hours)

- 3.1 Introduction - meaning of classification - chief characteristics of classification (K1, K2)
- 3.2 Objects of classification - rules of classification (K1, K2)
- 3.3 Frequency distributions (K1, K2, K3, K4)
- 3.4 Cumulative frequency distribution - bivariate frequency distributions (K1, K2, K3, K4)
- 3.5 Graph of frequency distribution - histogram (K1, K2, K3, K4)
- 3.6 frequency polygon - frequency curve (K1, K2, K3, K4)

### **Unit IV: Measures of Central Tendency** (15 hours)

- 4.1 Arithmetic mean (K1, K2, K3, K4)
- 4.2 Median (K1, K2, K3, K4)
- 4.3 Mode – Empirical formulae (K1, K2, K3, K4)
- 4.4 Combined and Weighted arithmetic mean (K1, K2, K3, K4)
- 4.5 Geometric mean (K1, K2, K3, K4)
- 4.6 Harmonic mean (K1, K2, K3, K4)

### **Unit V: Measures of Dispersion and Skewness** (15 hours)

- 5.1 Range - quartile deviation (K1, K2, K3, K4)
- 5.2 mean deviation (K1, K2, K3, K4)
- 5.3 Standard deviation (K1, K2, K3, K4)
- 5.4 Karl Pearson's and Bowley's coefficient of Skewness (K1, K2, K3, K4)
- 5.5 Correlation (K1, K2, K3, K4)
- 5.6 Regression (K1, K2, K3, K4)

**Text Books:**

**UAORA20 – Operations Research**

<b>Year: I</b>	<b>Course Code:</b> UAORA20	<b>Title Of The Course :</b> Operations Research	<b>Course Type :</b> Theory	<b>Course Category:</b> Allied II	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>SEM: II</b>							

**Course Objectives**

1. To introduce the techniques of solving problems in the field of industry, marketing and finance
2. To create awareness about optimization in the utility of resources

**Course Outcomes (CO)**

The learners will be able to

1. Understand the basic operations research concepts and solve linear programming problems.
2. Analyze real-life situation using transportation models.
3. Assign jobs to different machines using assignment models.
4. Use knowledge of Network Analysis in Hospital Administration.
5. Acquire wide knowledge in Game Theory.

## Course Syllabus

- Unit I: Introduction and Linear Programming** (15 hours)
- 1.1 Operations research
  - 1.2 : Definition – Scope (K1, K2)
  - 1.3 Characteristics (K1, K2)
  - 1.4 Linear programming (K1,K2)
  - 1.5 Formulation (K1,K2, K3)
  - 1.5 Graphical method (K1, K2, K3, K4)
  - 1.6 Regular simplex method (Simple Problems) (K1, K2, K3, K4)
- Unit II: Transportation Model** (15 hours)
- 2.1 Transportation Problem – Introduction (K1, K2)
  - 2.2 Initial basic feasible solution (North West Corner) (K1, K2, K3, K4)
  - 2.3 Initial basic feasible solution (Least Cost VAM) (K1, K2, K3, K4)
  - 2.4 Unbalanced Transportation problem (K1, K2, K3, K4)
  - 2.5 Maximization problem (K1, K2, K3, K4)
  - 2.6 Test of Optimality using MODI method (excluding Degeneracy) (K1, K2, K3, K4)
- Unit III: Assignment Model** (15 hours)
- 3.1 Assignment problem – Introduction (K1, K2)
  - 3.2 Minimal assignment problem - Balanced (K1, K2, K3, K4)
  - 3.3 Minimal assignment problem - Unbalanced (K1, K2, K3, K4)
  - 3.4 Restricted Assignment problem (K1, K2, K3, K4)
  - 3.5 Maximization problem – Balanced (K1, K2, K3, K4)
  - 3.6 Maximization problem – Unbalanced (K1, K2, K3, K4)
- Unit IV: Network Analysis: CPM and PERT Computations** (15 hours)
- 4.1 Construction – The Network – Numbering the events (K1, K2)
  - 4.2 Different time calculations – representation in tabular form (K1, K2, K3, K4)
  - 4.3 Total, Independent and Free float (K1, K2, K3, K4)
  - 4.4 Calculation of critical path and project duration (K1, K2, K3, K4)
  - 4.5 Basic steps in PERT – Difference between CPM and PERT (K1, K2, K3, K4)
  - 4.6 Calculation of critical path and project duration (K1, K2, K3, K4)
- Unit V: Game Theory** (15 hours)
- 5.1 Game theory – Meaning – Saddle point (K1, K2)
  - 5.2 Pure Strategy (K1, K2, K3, K4)
  - 5.3 Mixed Strategy (K1, K2, K3, K4)
  - 5.4 Dominance property (K1, K2, K3, K4)
  - 5.5 Solving 2 x m game using graphical method (excluding L.P.P) (K1, K2, K3, K4)
  - 5.6 Solving n x 2 game using graphical method (excluding L.P.P) (K1, K2, K3, K4)

<b>Year:</b> III	<b>Course Code:</b> UGMAAn20	<b>Title of the Course:</b> Mathematics for Competitive Examinations	<b>Course Type:</b> Theory	<b>Course Category:</b> Non-Major Elective	<b>H/W</b> 3	<b>CREDITS</b> 3	<b>MARKS</b> 100
<b>SEM:</b> V / VI							

**Course Objectives**

1. To revitalize the basic knowledge of mathematics and problem solving skills.
2. To enhance logical, analytical and critical thinking of learners.
3. To help the learners to acquire satisfactory competency using verbal and nonverbal reasoning
4. To help the students to prepare for various competitive examinations.

**Course Outcomes (CO)**

The learners will be able to

1. Gain critical thinking and numerical ability to solve problems.
2. Apply the concepts of quantitative aptitude to solve real life problems.
3. Interpret and use data represented in different forms
4. Reason out verbally and non-verbally
5. Write various competitive exams for higher studies and jobs

## Course Syllabus

### UNIT I: Numerical Ability (9 hours)

Numbers, H.C.F. & L.C.M. of Numbers, Simplification, Decimal Fractions, Square Roots & Cube Roots, Averages, Percentage, Ratio and Proportion. (K1, K2, K3, K4)

### UNIT II: Numerical Ability (Continued) (9 hours)

Ages, Time and Work, Time and Distance, Profit and Loss, Simple Interest, Compound Interest, Permutation & Combination, Probability (K1, K2, K3, K4)

### UNIT III: Data Interpretation (9 hours)

Tabulation, Bar Graphs, Pie Charts, Line graphs (K1, K2, K3, K4)

### UNIT IV: Verbal Reasoning (9 hours)

Series, Classification, Coding - Decoding, Blood Relations, Puzzles (K1, K2, K3, K4)

### UNIT V: Verbal Reasoning (Continued) (9 hours)

Direction Sense Test, Alphabet test, Ranking and Time sequence test, Statements & Arguments, Statements & Conclusions (K1, K2, K3, K4)

#### Text Books:

1. Dr. R. S. Aggarwal – A Modern Approach to Verbal and Non-Verbal Reasoning – Revised Edition – 2019 – S. Chand and Co.
2. Dr. R. S. Aggarwal – Quantitative Aptitude – Seventh Edition – S. Chand and Co., 2019

#### Reference Books:

1. Abhijit Guha, Quantitative Aptitude for Competitive Examinations, McGraw Education Series, 5<sup>th</sup> Edition 2019
2. Dinesh Khattar, Quantitative Aptitude for Competitive Examinations, Pearson India, Edition 2019.
3. Sarvesh K. Verma, Quantitative Aptitude Quantum CAT 2018, Arihant publication, Edition 2018.

## ASSESSMENT METHODS

### 1. For Allied Papers

#### Semester Examination (100 Marks)

Time: 3 Hours

##### Section A – $10 \times 2 = 20$ marks

Answer **all** questions

10 questions (2 questions from each unit)

##### Section B – $5 \times 7 = 35$ marks

Answer **all** questions

5 questions with internal choice (1 question from each unit)

##### Section C – $3 \times 15 = 45$ marks

Answer **any three** questions

5 questions (1 question from each unit)

#### CA Examination (50 Marks)

Time: 1 Hour 30 Minutes

##### Section A – $7 \times 2 = 14$ marks

Answer **all** questions

7 questions

##### Section B – $3 \times 7 = 21$ marks

Answer **any three** questions

3 out of 5 questions

##### Section C – $1 \times 15 = 15$ marks

Answer **any one** question

2 questions (1 question from each unit)

### For NME: Mathematics for Competitive Examinations

#### Semester Examination (100 Marks)

Time: 3 Hours

100 multiple choice questions (1 mark for each question)

#### CA Examination (50 Marks)

Time: 1 Hour 30 Minutes

50 multiple choice questions (1 mark for each question)

# Department of Microbiology (UG)

## SYLLABUS AND REGULATIONS

Under

### OUTCOME-BASED EDUCATION

2020

(Effective for the Batch of Students Admitted from 2020-2021)

### AUXILIUM COLLEGE (Autonomous)

*(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)*

**Gandhi Nagar, Vellore-632 006.**

### Programme Outcomes (PO)

On completion of the UG Programme, students will be able to;

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

### Programme Specific Outcomes (PSO)

On completion of the UG Programme in Microbiology, students will be able to;

**PSO1:** Acquire an in depth knowledge on the fundamental concepts and scope of Microbiology and its related fields.

**PSO2:** Realize the application oriented aspects of Microbiology and assimilate the technical skills in basic, medical and applied microbiology.

**PSO3:** Develop and execute oral and writing skills necessary for effective communication of discipline specific information and experimental results.

**PSO4:** Understand and explain the diversity of microorganisms and its interaction with the environment for sustainable development.

**PSO5:** Efficiently work as a team involving multiple disciplines with social and ethical values.

**PSO6:** Attain higher knowledge by developing competency in the field of Microbiology assuring and enhancing entrepreneurial skills for the betterment of the society.

## SEMESTER – I

### UCMBA20 - FUNDAMENTALS OF MICROBIOLOGY

Year I	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: I	UCMBA20	Fundamentals of Microbiology	Theory	Core	6	5	100

#### Course Objective:

To provide basic knowledge on the structure of bacteria, fungi, algae, protozoa, virus along with the principles of microscopy and the control of microbial growth by physical and chemical methods.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the history, recent developments and scope of Microbiology.

**CO2:** Demonstrate microscopy with deep knowledge on the sample preparation and staining techniques.

**CO3:** Discuss important aspects of microbial evolution and diversity by employing classical techniques of microbial identification.

**CO4:** Explain the ultra-structure, arrangement and function of a bacterial cell.

**CO5:** Perform the sterilization and disinfection techniques

## **COURSE SYLLABUS**

### **UNIT I: History and Scope of Microbiology. (15 hours)**

- 1.1 Definition and Scope of Microbiology. (K1,K2)
- 1.2 History and recent developments- Spontaneous generation Vs Biogenesis. (K1,K2)
- 1.3 Contribution of Louis Pasteur, Robert Koch, Antony Van Leewenhoek. (K1,K2)
- 1.4 Sergei N. Winogradsky, Joseph Lister, Wilkn Beijerink. (K1,K2)
- 1.5 Alexander flemming, Selman A. Waksman, Emil Christian Hansen, Hans Christian Gram. (K1,K2)
- 1.6 Impact of Microbiology and the future. (K1,K2)

### **UNIT II: Microscopy and Staining methods. (15 hours)**

- 2.1 Microscopy and principle of working - Simple, compound, Dark Field, Phase contrast. (K1,K2, K3)
- 2.2 Fluorescent and Electron Microscope - its types (SEM and TEM). (K1,K2, K3)
- 2.3 Staining methods: Dyes and its uses – Simple staining. (K1,K2, K3)
- 2.4 Differential staining - Gram staining and Acid fast staining (Zeihl Neelson method). (K1,K2, K3)
- 2.5 Special staining techniques - Spore staining, Capsule staining (negative staining). (K1,K2, K3)
- 2.6 Flagella staining and Alberts staining for metachromatic granules. (K1,K2, K3)

### **UNIT III: Microbial evolution and diversity. (15 hours)**

- 3.1 Microbial evolution & diversity - Endosymbiotic theory. (K1,K2)
- 3.2 Binomial Nomenclature of Microbes. (K1,K2, K3)
- 3.3 Classification Five Kingdom concept (Whittaker Classification) - Eight Kingdom concept (Cavalier smith). (K1,K2)
- 3.4 Prokaryotes and eukaryotes – their differences. (K1,K2)
- 3.5 Classical techniques of Microbial identification- Morphological, Physiological and biochemical properties. (K1,K2, K3,K4)
- 3.6 General introduction to Fungi, Algae, Virus and protozoa. (K1,K2)

### **UNIT IV: Morphology and Anatomy of Bacteria. (15 hours)**

- 4.1 Morphological shape, structure and arrangement of bacteria- Anatomy of Bacteria. (K1,K2)
- 4.2 Ultrastructure and functions of cell wall (Gram positive and Gram negative cell wall). (K1,K2)
- 4.3 Cytoplasmic membranes. (K1,K2)
- 4.4 Flagella- structure and arrangement, Pili / fimbriae. (K1,K2)

4.5 Capsule - Slime layer, cytoplasmic inclusions and granules. (K1,K2)

4.6 Spore - process of sporulation. (K1,K2)

**UNIT V: Methods of Sterilization and Disinfection.**

**(15 hours)**

5.1 Overview on Sterilization– Principles and Methods of Sterilization. (K1,K2, K3)

5.2 Dry heat sterilization - Incineration and Hot air Oven- principle and uses. (K1,K2, K3)

5.3 Moist heat sterilization – Pasteurization, Tyndallization and Autoclave- principle and uses.  
(K1,K2, K3)

5.4 Filtration, Radiation- ionizing and non-ionizing and Sterilization control. (K1,K2, K3)

5.5 Disinfection - Chemical disinfectants and its uses – fumigation. (K1,K2, K3)

5.6 Phenol coefficient test. (K1,K2, K3, K4)

## SEMESTER – II

### UCMBB20 -MICROBIAL PHYSIOLOGY AND METABOLISM

Year I	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: II	UCMBB20	Microbial Physiology and Metabolism	Theory	Core	6	5	100

#### Course Objective:

The course is designed to familiarize students with basic concepts of microbial growth and metabolism along with an in-depth knowledge on the morphology and reproduction of fungi and algae.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Discuss on various physical and chemical growth requirements of bacteria.

**CO2:** Practically apply the knowledge in preparation of culture media for bacterial growth and identification.

**CO3:** Equip with various techniques employed to measure microbial growth and evaluate different classes of antibiotics and their mode of actions.

**CO4:** Explain the structural similarities and differences among various groups of fungi and algae along with its physiological properties.

**CO5:** Outline microbial transport systems and mechanisms of energy conservation in metabolism.

H – HIGH (3), M – MODERATE (2), L – LOW (1)

## **COURSE SYLLABUS**

### **UNIT I: Nutrition requirement and types of Microorganisms. (15 hours)**

- 1.1 Nutritional requirement of Microorganisms- Macro and Micro elements (K1,K2)
- 1.2 Nutritional types of Microorganisms – phototrophs and chemotrophs. (K1,K2)
- 1.3 Nutritional types of Microorganisms lithotrophs and organotrophs. (K1,K2)
- 1.4 Nutritional types of Microorganisms autotrophs and heterotrophs. (K1,K2)
- 1.5 Uptake of nutrients into the cell -Transport of nutrients by active method. (K1,K2)
- 1.6 Uptake of nutrients into the cell -Transport of nutrients by passive method. (K1,K2)

### **UNIT II: Culture media, types and culture techniques. (15 hours)**

- 2.1 Culture Media and its types. (K1,K2,K3)
- 2.2 Preparation of culture media. (K1,K2,K3)
- 2.3 Pure culture techniques - Streak, spread, pour plate techniques. (K1,K2,K3)
- 2.4 Factors affecting growth of bacteria- pH, temperature, oxygen. (K1,K2,K3)
- 2.5 Capnophilic organisms. (K1,K2,K3)
- 2.6 Preservation of cultures- aerobic and anaerobic culture techniques- Lyophilization. (K1,K2,K3)

### **UNIT III: Microbial growth and Antimicrobial chemotherapy. (15 hours)**

- 3.1 Microbial growth (Population doubling time / generation time) – Growth curve of Bacteria. (K1,K2,K3)
- 3.2 Measurement of microbial growth (cell number, cell mass). (K1,K2,K3)
- 3.3 Batch and continuous culture- Synchronous growth. (K1,K2,K3)
- 3.4 Control of microbial growth by antimicrobial drugs & Antibiotics- An introduction. (K1,K2)
- 3.5 Drugs inhibiting cell wall, cell membrane, protein and nucleic acid synthesis. (K1,K2)
- 3.6 Antimicrobial drug resistance. (K1,K2)

### **UNIT IV: Morphology, reproduction and cultivation of fungi and algae. (15 hours)**

- 4.1 Fungi- Morphology, reproduction and cultivation of yeast (*Saccharomyces*). (K1,K2,K3)
- 4.2 Morphology, reproduction and cultivation of Molds (*Aspergillus*, *Penicillium*, *Rhizopus* and *Mucor*). (K1,K2,K3)
- 4.3 Algae- Morphology and reproduction of *Chlamydomona* and *Volvox*. (K1,K2)
- 4.4 Algae- Morphology and reproduction of *Chlorella*, *Ulothrix* and *Diatoms*. (K1,K2)
- 4.5 Classification and Salient feature of Cyanobacteria. (K1,K2)
- 4.6 Cultivation of Cyanobacteria. (K1,K2, K3)

**UNIT V: Microbial metabolism.****(15 hours)**

- 5.1 Enzymes – classification- coenzymes (functions of TPP, NAD, NADP, FMN, FAD and Coenzyme A). (K1,K2)
- 5.2 Basic concepts of Microbial Metabolism – enzymes involved. (K1,K2)
- 5.3 Mechanism of ATP Synthesis- Krebs cycle. (K1,K2)
- 5.4 Glycolysis. (K1,K2)
- 5.5 Electron transport chain – oxidative phosphorylation. (K1,K2)
- 5.6 Photophosphorylation- types (Cyclic and Non-cyclic). (K1,K2)

**TEXT BOOKS:**

## SEMESTER –II

### UCMBC20 – CORE PRACTICAL I: BASIC TECHNIQUES IN MICROBIOLOGY

Year I	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: II	UCMBC20	Basic techniques in Microbiology	Practical	Core	3	4	100

#### Course Objective:

The candidate will gain hands-on training and acquire adequate skill required to identify microorganism through staining techniques, sterilize and prepare culture media, inoculate observe and distinguish the growth patterns of microorganisms in different media.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Perform cleaning, sterilization of glasswares and prepare culture media.

**CO2:** Examine the different morphological forms of microbes.

**CO3:** Analyze and employ different staining methods for the identification of bacteria.

**CO4:** Competently cultivate bacteria in different types of media and identify their sensitivity and resistance.

**CO5:** Use Classical techniques for the identification of bacteria based on their biochemical properties.

#### COURSE SYLLABUS

1. Sterilization: Principle & Methods –Dry heat, Moist heat, Filtration, fumigation and radiation.
2. Microscopy – Bright field Microscope.
3. Smear Preparation and simple staining technique.

4. Differential staining - Gram Staining and Acid fast staining.
5. Negative staining for capsule.
6. Motility Demonstration in Hay infusion broth.
7. Culture media preparation - Basal media, Enriched media, Differential media and selective media.
8. Pure culture techniques – Serial dilution, pour plate, spread plate & streak plate techniques.
9. Demonstration of Bio-chemical Characteristics - Indole, Methyl red, Voges Proskauer, Citrate, TSI test, Urease test and Sugar fermentation test.
10. Antibiotic sensitivity test – Kirby Bauer Disc Diffusion method.
11. Morphology of Fungi - LPCB wet mount preparation.
12. Examination of pond water sample – algae and protozoa.

## SEMESTER – III

### UCMBD20 - BASIC IMMUNOLOGY AND MICROBIAL GENETICS- I

Year II	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: III	UCMBD20	Basic Immunology and Microbial Genetics -I	Theory	Core	6	5	100

#### Course Objective:

The syllabus is designed to provide basic knowledge on immunity and organs of immune system, types of antigens and antibody interactions and the role of DNA as a basic unit of gene expression.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the history of immunology and immunohaematology.

**CO2:** Discuss the overall organization of the immune system and differentiate the humoral and cell mediated immune mechanisms.

**CO3:** Explain about types of antigen, antibody and apply the principles and techniques involved in antibody production.

**CO4:** Describe the structure of DNA & RNA with their physical & chemical properties.

**CO5:** Familiarize with the process involved in the replication of DNA.

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

#### UNIT I: History of immunology and Immunohaematology. (15 hours)

1.1 History of Immunology- contributions of Elie metchnikoff. (K1,K2)

1.2 Contributions of Louis Pasteur and Edward Jenner. (K1,K2)

1.3 Immunohaematology- blood grouping, Rh typing. (K1,K2)

- 1.4 Rh incompatibility- Haemolytic disease of the newborn. (K1,K2)
- 1.5 Normal Microbial flora of the human body and its function. (K1,K2)
- 1.6 Gnotobiotic animals, their interaction and uses. (K1,K2)

**UNIT II: Structure and function of immune system. (15 hours)**

- 2.1 Structure and functions of cells of the immune system- B cells, T cells. (K1,K2)
- 2.2 Functions of NK cells, phagocytic cells, Mast cells. (K1,K2)
- 2.3 Primary Lymphoid organs (Thymus and Bone marrow). (K1,K2)
- 2.4 Secondary Lymphoid organs (Lymph node and Spleen), MALT, GALT, BALM. (K1,K2)
- 2.5 Immunity – Types of Immunity – Humoral and Cell mediated immunity. (K1,K2)
- 2.6 Innate and Acquired immunity. (K1,K2)

**UNIT III: Antigen and Antibodies, types and function. (15 hours)**

- 3.1 Antigens- properties, types of antigen- haptens, adjuvants. (K1,K2)
- 3.2 Immunoglobulins- General Structure. (K1,K2)
- 3.3 Types of immunoglobulins, properties and its functions. (K1,K2)
- 3.4 Theories of antibody formation. (K1,K2)
- 3.5 Monoclonal and polyclonal antibodies. (K1,K2)
- 3.6 Production of Monoclonal antibodies and their applications. (K1,K2,K3)

**UNIT IV: Introduction to genetics and nucleic acids, its types and function. (15 hours)**

- 4.1 Genetics – Historical Introduction – Discovery of DNA Structure, Nucleic acids – DNA & RNA as Genetic Material. (K1,K2)
- 4.2 Nucleosomes, Repetitive DNA, highly repetitive DNA, Satellite and mini satellite DNA - forms of DNA. (K1,K2)
- 4.3 Types of RNA- mRNA, tRNA ,rRNA. (K1,K2)
- 4.4 Post transcriptional and translational modification. (K1,K2)
- 4.5 Genetic code. (K1,K2)
- 4.6 Central Dogma of Molecular biology. (K1,K2)

**UNIT– V: Functioning of bacterial genetic material. (15 hours)**

- 5.1 Organization & functioning of bacterial genetic material. (K1,K2)
- 5.2 Gene and Gene concept. (K1,K2)
- 5.3 Plasmids – characteristics, Structure, types and functions. (K1,K2)
- 5.4 Mechanism of DNA Replication- enzymes involved. (K1,K2)
- 5.5 Semi conservative method of replication- experimental proof. (K1,K2)
- 5.6 Types of replication- rolling circle and theta model of replication. (K1,K2)

**SEMESTER – IV**  
**UCMBE20 – APPLIED IMMUNOLOGY AND MICROBIAL GENETICS- II**

Year II	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM : IV</b>	UCMBE20	Applied Immunology and Microbial Genetics -II	Theory	Core	5	5	100

**Course Objective:**

The syllabus is designed to familiarize students on the antigen antibody reactions *in vivo* and *ex vivo* and an in depth understanding on the central dogma of molecular biology.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Outline and apply the basic principle and mechanism of antigen and antibody reactions.

**CO2:** Discuss on the significance of autoimmune diseases, hypersensitivity reactions and interpret on different types of vaccine and vaccination schedule.

**CO3:** Explain the gene transfer mechanisms between the prokaryotes and eukaryotes.

**CO4:** Identify mutations and DNA repair mechanisms.

**CO5:** Comprehend the process of protein synthesis and the methods of gene expression.

<b>CO5</b>	H	M	H	L	L	L

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

**COURSE SYLLABUS**

**UNIT I: Antigen –Antibody reactions.**

**(15 hours)**

- 1.1 Antigen and Antibody interaction *in vitro* – Zone phenomenon- Lattice hypothesis. (K1,K2,K3)
- 1.2 Agglutination reactions- Direct, indirect, Haemagglutination inhibition test, Coombs test. (K1,K2,K3)
- 1.3 Precipitation reactions- Ring test, slide test, tube test, Precipitation reaction in gel-immunoelectrophoresis, CIE, Single diffusion in one dimension, double diffusion in one

dimension, single diffusion in two dimension and double diffusion in two dimension, Counter Immunoelectrophoresis. (K1,K2,K3)

1.4 ELISA- direct and indirect. (K1,K2,K3)

1.5 RIA and flow cytometry. (K1,K2,K3)

1.6 Western blotting. (K1,K2,K3)

**UNIT II: Complements cascade and Antigen- antibody reactions invivo. (15 hours)**

2.1 Complements, components and pathways (classical and alternate pathways). (K1,K2)

2.2 Hypersensitivity reactions and its types ((Types I to V). (K1,K2)

2.3 Transplantation immunology. (K1,K2)

2.4 Autoimmune diseases (Rheumatoid Arthritis, Systemic Lupus Erythematosus, Myasthinia gravis, Thrombocytopaenia and Hashimoto thyroiditis). (K1,K2)

2.5 Vaccine- Definition, types and functions. (K1,K2)

2.6 Immunization Schedule. (K1,K2,K3)

**UNIT III: Gene transfer mechanisms. (15 hours)**

3.1 Gene transfer mechanism – Griffith experiment. (K1,K2)

3.2 Transformation – Definition, competent cell, transfection. (K1,K2, K3)

3.3 Mechanism of transformation and transformation frequency. (K1,K2,K3)

3.4 Transduction – Definition, generalized, abortive and specialized transduction. (K1,K2,K3)

3.5 Conjugation – Definition, U Tube experiment (K1,K2,K3)

3.6 Hfr, F<sup>+</sup>, F<sup>-</sup>, F' conjugation. (K1,K2,K3)

**UNIT IV: Mutation and DNA repair mechanisms. (15 hours)**

4.1 Mutation and its types – transition, transversion. (K1,K2)

4.2 Spontaneous (Frame shift mutation, mis sense mutation and non sense mutation). (K1,K2)

4.3 Induced mutation. (K1,K2,K3)

4.4 Detection and isolation of auxotrophic mutants - Replica plating and Ames test. (K1,K2,K3)

4.5 DNA repair mechanisms- photoreactivation, (K1,K2)

4.6 Excision repair and SOS repair. (K1,K2)

**UNIT V: Gene expression system. (15 hours)**

5.1 Protein synthesis (initiation, elongation, termination) in Prokaryotes. (K1,K2)

5.2 Protein synthesis (initiation, elongation, termination) in Eukaryotes. (K1,K2)

5.3 Operon- Definition, structure and function. (K1,K2)

5.4 Overview on the Gene expression system. (K1,K2)

5.5 Concept of Lactose operon. (K1,K2)

5.6 Tryptophan operon – Attenuation control. (K1,K2)

## SEMESTER – IV

### UCMBF20 – CORE PRACTICAL II: BASIC AND APPLIED IMMUNOLOGY

Year II	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : IV	UCMBF20	Basic and Applied Immunology	Practical	Core	3	4	100

#### Course Objective:

To impart hands on training on various agglutination and precipitation reaction and to provide an insight in identifying the cells of immune system.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Identify the ABO blood groups and its Rh types.

**CO2:** Enumerate and observe various granulocytic and agranulocytic cells of immune system.

**CO3:** Perform serological diagnosis for the detection of typhoid, syphilis, rheumatoid factor and anti streptolysin 'o'.

**CO4:** Demonstrate the direct and indirect pregnancy testing procedure.

**CO5:** Quantitate the antigens and antibodies by performing immunodiffusion techniques.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	L	M	L	L	H
CO3	H	M	L	M	M	H

CO4	H	M	H	L	L	L
CO5	H	H	H	L	L	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

1. Blood Grouping & Rh typing.
2. Differential counting.
3. Enumeration of WBC using Haemocytometer.
4. Enumeration of RBC using Haemocytometer.

5. Isolation of Buffy coat by wintrobes tube.
6. Widal test (Qualitative slide test and Quantitative tube test).
7. Rapid Plasma Reagin test.
8. Pregnancy test –Direct dip stick method and Indirect slide test.
9. Latex Agglutination- Anti Streptolysin ‘o’ test.
10. Latex Agglutination-Rheumatoid factor.
11. Treponema Pallidum Haemagglutination test (TPHA).
12. Precipitation reaction in Gel -Ouchterlony Double Diffusion.
13. Precipitation reaction in Gel - Radial Immuno Diffusion.

#### **REFERENCE BOOKS:**

## SEMESTER V

### UCMBG20- MEDICAL BACTERIOLOGY AND MYCOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : V	UCMBG20	Medical Bacteriology and Mycology	Theory	Core	5	5	100

#### Course Objective:

To enable students understanding on medically important bacteria and fungi, the concepts, epidemiology and development of microbial diseases and the principles behind prevention and treatment of such diseases.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the importance of Host-Parasite relationships and demonstrate the collection of various clinical specimens and processing it.

**CO2:** Explain about the diseases caused by the bacterial pathogens, prevention and treatment.

**CO3:** Discuss the different modes of transmission of bacterial diseases and its preventive measures.

**CO4:** Compare the morphological classification of fungi, and isolation of fungi from clinical specimen.

**CO5:** Compile the common mycotic diseases, their pathogenicity and various antifungal agents used for treatment.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	L	M	L	L	H
CO3	H	M	L	M	M	H
CO4	H	M	M	H	M	H
CO5	H	M	H	L	L	M

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	L	M
CO2	H	H	H	M	L	M
CO3	H	H	H	L	L	L
CO4	H	H	H	M	L	M
CO5	H	H	H	L	L	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Infection, its types and processing of clinical specimens. (10 hours)**

- 1.1 Normal Microbial flora of human body. (K1,K2)
- 1.2 Host parasite relationship. (K1,K2)
- 1.3 Infection and types of infection (Primary, Secondary, Reinfection , cross infection, Nosocomial and Iatrogenic infection). (K1,K2)
- 1.4 Virulence factors of bacteria causing infection. (K1,K2)
- 1.5 Specimen collection, Transport and storage. (K1,K2,K3)
- 1.6 Specimen processing (Blood, Urine, CSF, Sputum and other body fluids). (K1,K2,K3)

### **UNIT II: Bacterial pathogens-I. (20 hours)**

- 2.1 Morphology, classification, antigenic structure, cultural characteristics, pathogenicity, laboratory diagnosis, preventive measures and treatment of Human pathogens – *Staphylococcus aureus*, *Streptococcus pyogenes*, *Streptococcus pneumoniae*. (K1,K2,K3)
- 2.2 *Neisseriae meningitidis* and *Neisseriae gonorrhoeae*, *Corynebacterium diphtheria*. (K1,K2,K3)
- 2.3 *Mycobacterium tuberculosis* and *Mycobacterium leprae*, *Bacillus anthracis*. (K1,K2,K3)
- 2.4 *Clostridium botulinum*, *Clostridium tetani* and *Clostridium perfringens*. (K1,K2,K3)
- 2.5 Family – Enterobacteriaceae- *Escherichia coli* and *Klebsiella*. (K1,K2,K3)
- 2.6 Family – Enterobacteriaceae - *Salmonella*, *Shigella* and *Proteus*. (K1,K2,K3)

### **UNIT III: Bacterial pathogens –II and Hospital waste disposal. (15 hours)**

- 3.1 Morphology, classification, antigenic structure, cultural characteristics, pathogenicity, laboratory diagnosis, preventive measures and treatment of *Vibrio cholerae* and *Vibrio parahaemolyticus*, *Pseudomonas aeruginosa*. (K1,K2,K3)
- 3.2 *Brucella abortus*, *Bordetella pertussis*, *Haemophilus influenzae*. (K1,K2,K3)
- 3.3 *Treponema pallidum*, *Chlamydiae* and *Rickettsiae*. (K1,K2,K3)
- 3.4 Zoonotic diseases. (K1,K2,K3)
- 3.5 Hospital acquired infection and their control. (K1,K2,K3)
- 3.6 Hospital waste disposal. (K1,K2,K3)

### **UNIT IV: General Mycology - yeasts of Medical importance. (15 hours)**

- 4.1 General introduction to Mycology. (K1,K2)
- 4.2 Morphology of fungi. (K1,K2,K3)
- 4.3 Classification of fungi of medical importance. (K1,K2)
- 4.4 Detection and recovery of fungi from clinical specimens. (K1,K2,K3)
- 4.5 Yeasts of medical importance – *Candida albicans*, (K1,K2,K3)
- 4.6 *Cryptococcus neoformans*. (K1,K2,K3)

**UNIT V: Common Mycotic diseases.****(15 hours)**

- 5.1 Dermatophytes and agents of superficial mycosis – *Trichophyton*, *Epidermophyton* and *Microsporum*. (K1,K2,K3)
- 5.2 Dimorphic fungi causing systemic mycoses – Histoplasmosis. (K1,K2)
- 5.3 Coccidioidomycosis. (K1,K2)
- 5.4 Blastomycosis. (K1,K2)
- 5.5 Mycotic mycetoma. (K1,K2)
- 5.6 Antifungal agents. (K1,K2,K3)

**TEXT BOOKS:**

## SEMESTER V

### UCMBH20 - FOOD, DAIRY AND INDUSTRIAL MICROBIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: V	UCMBH20	Food, Dairy and Industrial microbiology	Theory	Core	5	5	100

#### Course Objective:

To provide basic knowledge on food preservation, causes of spoilage, control and preventive measures from harmful microorganisms. The course is also designed for the learners to acquire idea about fermentation technology and commercially important microbial products.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Understand the role of microorganisms in food and the factors influencing their growth

**CO2:** Apply the principles and procedures involved in preservation of food.

**CO3:** Identifying the spoilage causing microorganisms in various foods and analysing the significance of food borne and milk borne diseases in association with public health.

**CO4:** Formulate knowledge on the fermentation process with adequate information on the fermentors and identifying industrially important microorganisms.

**CO5:** Discuss on the industrial production and purification of sauerkraut, cheese, yoghurt, organic solvents, beverages, vitamins and growth factors

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	L	M	L	L	H
CO3	H	M	L	M	M	H
CO4	H	M	M	H	M	H
CO5	H	M	H	L	L	M

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	M	L	H
CO2	H	M	H	L	L	H
CO3	H	H	M	L	L	H
CO4	H	M	M	L	L	H
CO5	H	H	H	L	M	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Microorganism important in food microbiology and food preservation methods.**

**(15 hours)**

- 1.1 Food as Substrate for Microorganisms.(K1,K2)
- 1.2 Microorganisms important in food microbiology; Molds, yeasts and bacteria – General characteristics- Classification and importance. (K1,K2)
- 1.3 Principles of food preservation – Asepsis – Removal of microorganisms – anaerobic conditions. (K1,K2, K3)
- 1.4 Food preservation using high temperature – Canning. (K1,K2, K3)
- 1.5 Food preservation using low temperature. (K1,K2, K3)
- 1.6 Food preservation by Drying – Food additives. (K1,K2, K3)

### **UNIT II: Contamination and spoilage of foods.**

**(15 hours)**

- 2.1 Contamination, spoilage and preservation of cereal and cereal products. (K1,K2, K3)
- 2.2 Contamination, spoilage and preservation of vegetables and fruits. (K1,K2, K3)
- 2.3 Contamination, spoilage and preservation of meat and meat products. (K1,K2, K3)
- 2.4 Contamination, spoilage and preservation of milk and milk products. (K1,K2, K3)
- 2.5 Contamination, spoilage and preservation of Poultry, fish and other sea foods.(K1,K2,K3)
- 2.6 Spoilage of canned foods. (K1,K2,K3)

### **UNIT III: Food and milk borne diseases.**

**(15 hours)**

- 3.1 Food borne illness – General introduction to etiological agents, treatment, prevention and control measures (K1,K2,K3)
- 3.2 Food intoxication and Food infection. (K1,K2,K3)
- 3.3 Bacterial food borne diseases. (K1,K2,K3)
- 3.4 Non – bacterial food borne diseases (viral and parasitic). (K1,K2,K3)
- 3.5 Mycotoxicosis and Mycotoxins. (K1,K2,K3)
- 3.6 Milk borne diseases. (K1,K2,K3)

### **UNIT IV: Bioreactors and fermentation.**

**(15 hours)**

- 4.1 Bioreactors – Principle, types. (K1,K2,K3)
- 4.2 Design and functional Characteristics of bioreactors. (K1,K2,K3)
- 4.3 Mode of operation and control. (K1,K2,K3)
- 4.4 Primary and secondary metabolites. (K1,K2)
- 4.5 Fermentation – Types of fermentation – Batch and continuous fermentation. (K1,K2,K3)
- 4.6 Dual (or) multiple, surface and submerged fermentation. (K1,K2,K3)

**UNIT V: Fermented products and industrial production of organic solvents, beverages, vitamins and growth factors. (15 hours)**

5.1 Fermentation- fermented vegetables – sauerkraut. (K1,K2,K3)

5.2 Fermented dairy products – cheese, yoghurt. (K1,K2,K3)

5.3 Production of organic solvents: ethanol, acetone. (K1,K2,K3)

5.4 Beverages: wine, beer. (K1,K2,K3)

5.5 Organic acid: citric acid, acetic acid. (K1,K2,K3)

5.6 Production of Vitamins and growth factors: Vitamin B2 (Riboflavin), Vitamin B12, Vitamin C. (K1,K2,K3)

**TEXT BOOKS:**

## SEMESTER V

### UCMBI20 - MOLECULAR BIOLOGY AND rDNA TECHNOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : V	UCMBI20	Molecular biology and rDNA technology	Theory	Core	4	5	100

#### Course Objective:

Familiarize the students understanding on the concepts of recombinant DNA technology and strategies involved in gene manipulations.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Compare the use of various cloning vectors in gene cloning techniques and the application of genetic engineering and strain improvement using mutational rDNA technology.

**CO2:** Apply the strategies of gene cloning techniques and identify rDNA clones.

**CO3:** Compile the techniques of nucleic acid hybridization and DNA amplification.

**CO4:** Explain the procedure involved and applications of enzyme and algal biotechnology.

**CO5:** Discuss on the methods involved in the Production, of pharmaceutical products and the importance of Gene therapy.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO5	H	H	H	L	M	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: Vectors - cloning and expression.

(15 hours)

1.1 Historical perspectives – Plasmids – Vectors. (K1,K2,K3)

1.2 Psc101, P<sup>BR322</sup>, Ti plasmid. (K1,K2,K3)

1.3 Bacteriophage vectors-  $\lambda$  (lamda) and M 13 phage. (K1,K2,K3)

1.4 cosmid (pJB8), YAC (pYAC3). (K1,K2,K3)

- 1.5 Introduction to principles and applications of genetic recombinant technology. (K1,K2,K3)
- 1.6 Strain improvement in the production of biotechnologically useful products (mutational rDNA technology). (K1,K2,K3)

**UNIT II: Strategies of gene cloning techniques. (15 hours)**

- 2.1 Restriction endonucleases- nomenclature, its types. (K1,K2,K3)
- 2.2 Enzyme Ligase and its function. (K1,K2,K3)
- 2.3 DNA manipulative enzymes- DNA Polymerases and its types. (K1,K2,K3)
- 2.4 DNA modifying enzymes- Alkaline phosphatase, polynucleotide kinase, Terminal deoxynucleotidyl transferase. (K1,K2,K3)
- 2.5 Gene cloning techniques – Isolation and identification of rDNA clones. (K1,K2,K3)
- 2.6 Genomic and cDNA libraries. (K1,K2,K3)

**UNIT III: Nucleic acid hybridization and DNA amplification. (15 hours)**

- 3.1 Overview on Nucleic acid hybridization. (K1,K2)
- 3.2 Solution and Filter hybridization – Dot blot. (K1,K2,K3)
- 3.3 Insitu hybridization -colony and plaque hybridization. (K1,K2,K3)
- 3.4 Southern, northern, western methods of hybridization. (K1,K2,K3)
- 3.5 DNA amplification technique – Polymerase Chain Reaction. (K1,K2,K3)
- 3.6 Restriction Fragment Length Polymorphism. (K1,K2,K3)

**UNIT IV: Enzyme and algal biotechnology. (15 hours)**

- 4.1 Enzyme biotechnology – source selection. (K1,K2,K3)
- 4.2 Extraction and purification of enzymes. (K1,K2,K3)
- 4.3 Enzyme immobilization techniques (physical binding, cross linking, entrapment) - their application – products produced. (K1,K2,K3)
- 4.4 Microbial algal technology – Cultivation methods of *Spirulina*. (K1,K2,K3)
- 4.5 Exploitation of microalgae for food and feed. (K1,K2,K3)
- 4.6 Fuel (Methane, hydrogen) and Drug production from microalgae.(K1,K2,K3)

**UNIT V: Biotechnological application in the production of pharmaceuticals.(15 hours)**

- 5.1 Production of Humulin. (K1,K2)
- 5.2 Production of Interferon. (K1,K2)
- 5.3 Tissue plasminogen Activator. (K1,K2)
- 5.4 Recombinant vaccine (HBs Ag). (K1,K2)
- 5.5 Production of antibiotics- Penicillin, Streptomycin and Tetracycline. (K1,K2)
- 5.6 Gene therapy- Definition, Gene therapy methods. (K1,K2)

## SEMESTER V

### UEMBA20- ELECTIVE I A: FUNDAMENTALS OF CELL BIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : V	UEMBA20	Elective I A: Fundamentals of Cell Biology	Theory	Core Elective	4	4	100

#### Course Objective:

To facilitate the students understanding on the basic concepts and principles of cell biology.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Compare the difference between plant cell and animal cell.

**CO2:** Analyze the basic components of prokaryotic and eukaryotic cells and the chemistry of its macromolecules and differentiate the roles of each cell organelles with its functions.

**CO3:** Compile the ultrastructure and function of nucleus and nucleolus.

**CO4:** Discuss on the different stages of cell division in prokaryotic and eukaryotic cells.

**CO5:** Outline the basic principles of osmosis, cell signalling and signal transduction.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	M
CO2	H	H	H	L	L	M
CO3	H	H	H	M	M	L
CO4	H	H	H	M	M	M
CO5	H	H	H	M	M	M

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	H	L	M
CO2	H	M	H	M	L	M
CO3	H	M	H	L	L	L
CO4	H	M	H	L	L	L
CO5	H	M	H	L	L	L

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: Cell organization.

**(12 hours)**

1.1 Overview of Cell organization and types of cell. (K1,K2)

1.2 Structural organization of prokaryotic cell. (K1,K2)

1.3 Structural organization of eukaryotic cell. (K1,K2)

1.4 Structure of plant cell. (K1,K2)

1.5 Structure of animal cell. (K1,K2)

1.6 Structure of Virus cell. (K1,K2)

**UNIT II: Components and functions of organelles. (12 hours)**

2.1 Structure and function of mitochondria. (K1,K2)

2.2 Structure and function of endoplasmic reticulum- rough and smooth. (K1,K2)

2.3 Structure and function of ribosomes and golgi vesicles. (K1,K2)

2.4 Lysosomes, chloroplast, peroxisomes and glyoxysomes. (K1,K2)

2.5 Extracellular matrix- collagen, microtubules, microfilaments. (K1,K2)

2.6 Centrioles, basal bodies, cilia and flagella. (K1,K2)

**UNIT III: Cytogenetics. (12 hours)**

3.1 Nucleus- Nuclear membrane, Nucleolus, Nuclear pore and annulus. (K1,K2)

3.2 Cytogenetics- an overview. (K1,K2)

3.3 Structure of chromosomes. (K1,K2)

3.4 Nucleosomes - Giant chromosomes. (K1,K2)

3.5 Polytene Chromosomes. (K1,K2)

3.6 Lamp brush chromosomes. (K1, K2)

**UNIT IV: Mitosis and Meiosis I and II. (12 hours)**

4.1 Overview of Cell cycle. (K1, K2)

4.2 Cell division- Mitosis. (K1, K2)

4.3 Meiosis I and II. (K1, K2)

4.4 Cytoplasmic matrix- compounds of matrix- inorganic compound-water. (K1, K2)

4.5 Organic compound- carbohydrates, lipids and proteins. (K1, K2)

4.6 Protein structure and synthesis. (K1, K2)

**UNIT V: Molecular organization of animal cell membrane. (12 hours)**

5.1 Cell biology- Overview on molecular organization of animal cell membrane. (K1, K2)

5.2 Membrane lipids,proteins and carbohydrates. (K1, K2)

5.3 The fluid mosaic model and artificial membranes. (K1, K2)

5.4 Mitochondrial membrane. (K1, K2)

5.5 Red cell membrane. (K1, K2)

5.6 Cell wall components and role of cell wall. (K1, K2)

## SEMESTER V

### UEMBB20 - ELECTIVE I B: ENTREPRENEURIAL MICROBIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: V	UEMBB20	Elective I B: Entrepreneurial Microbiology	Theory	Core Elective	4	4	100

**Course Objective:** To facilitate the students understanding on the concepts of entrepreneurship such as Planning, decision making, leadership, organizations and authority.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Explain the historical development of industrial microbiology and outline on the importance of entrepreneur development and risk assessment.

**CO2:** Analyze the microbial cells as fermented products.

**CO3:** Demonstrate the procedures involved in mushroom cultivation and its storage method.

**CO4:** Utilize various microorganisms as biofertilizers.

**CO5:** Design and use patent in the development of entrepreneurship.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	H	H	L	L	H
CO3	H	M	M	M	M	M
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	M	H	H
CO2	H	H	H	H	M	H
CO3	H	M	H	M	L	M
CO4	H	H	H	M	L	H
CO5	H	H	H	L	L	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: Entrepreneur Development.

(12 hours)

1.1 Entrepreneur development and activity. (K1,K2,K3,K4)

1.2 Institutes involved in Entrepreneurial development. (K1,K2,K3,K4)

1.3 Government contributions to Entrepreneurs. (K1,K2,K3,K4)

1.4 Risk assessment in Entrepreneurship. (K1,K2,K3,K4)

1.5 Industrial Microbiology- Definition and History. (K1,K2)

1.6 Scope of Industrial Microbiology. (K1,K2,K3)

**UNIT II: Microbial cells as fermented products. (12 hours)**

2.1 Microbial cells as fermentation products – Brewers and Baker’s yeast. (K1,K2,K3)

2.2 Food and feed yeasts. (K1,K2,K3)

2.3 Bacterial insecticides. (K1,K2,K3)

2.4 Legume inoculants - Algae. (K1,K2,K3)

2.5 Enzymes as fermentation products- bacterial and fungal amylases. (K1,K2,K3)

2.6 Enzymes as fermentation products - proteolytic enzymes. (K1,K2,K3)

**UNIT III: Mushroom cultivation. (12 hours)**

3.1 History of Mushroom cultivation in India. (K1,K2)

3.2 Common edible mushrooms cultivated in India. (K1,K2)

3.3 Preparation of compost and composting. (K1,K2,K3)

3.4 Spawn and spawning. (K1,K2,K3)

3.5 Methods used in Cultivation of *Agaricus bisporous* and *Agaricus campestris*. (K1,K2,K3)

3.6 Methods used in Cultivation *Volvariella volvaciae*. (K1,K2,K3)

**UNIT IV: Biofertilizers. (12 hours)**

4.1 Chemical fertilizers versus biofertilizers. (K1,K2)

4.2 Biofertilizer- Historical background. (K1,K2)

4.3 Organic farming. (K1,K2,K3)

4.4 Methods involved in the production of Bacterial biofertilizers. (K1,K2,K3)

4.5 Methods involved in the production of algal biofertilizers. (K1,K2,K3)

4.6 The importance of *Rhizobium* sp., *Azospirillum* sp., *Azotobacter* sp., as biofertilizers.  
(K1,K2)

**UNIT V: Patenting and Fermentation economics. (12 hours)**

5.1 Patent and secret process. (K1,K2)

5.2 History of patenting. (K1,K2)

5.3 Composition, subject matter for patenting. (K1,K2)

5.4 Characteristics of a patent, inventor, infringement, cost of patent. (K1,K2)

5.5 Patents in India and other countries. (K1,K2)

5.6 Fermentation economics. (K1,K2)

**TEXT BOOKS:**

## SEMESTER VI

### UCMBJ20: MEDICAL VIROLOGY & PARASITOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : VI	UCMBJ20	Medical Virology and Parasitology	Theory	Core	5	5	100

#### Course Objective:

To provide in depth knowledge on diseases caused by medically important, its epidemiology and control measures.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

CO1: Explain the properties, classification and cultivation of viruses.

CO2: Outline on the zoonotic and arthropod borne diseases.

CO3: Discuss about the oncogenic viruses and brief out on the importance of antiviral drugs and vaccines.

CO4: Describe the classification of parasites and demonstrate the laboratory diagnosis of parasitic diseases.

CO5: Compile the information on common parasites, protozoan and metazoan diseases.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	H	H	L	L	H
CO3	H	M	M	M	M	M
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	H	L	M
CO2	H	L	H	M	L	M
CO3	H	M	H	L	L	M
CO4	H	H	H	M	L	L
CO5	H	L	H	L	L	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: General properties of virus.

**(15 hours)**

1.1 General properties of virus. (K1,K2)

1.2 Detection of viruses and antigens in clinical specimens. (K1,K2,K3)

1.3 Serological diagnosis of virus infections. (K1,K2,K3)

1.4 Cultivation of viruses – egg inoculation and tissue culture. (K1,K2,K3)

1.5 Structure and properties of viroids. (K1,K2)

1.6 Prions. (K1,K2)

**UNIT II: Viral diseases - I.**

**(15 hours)**

2.1 Arthropod borne virus (Chickungunya virus, Dengue, Japanese Encephalitis, West Nile fever, Yellow fever). (K1,K2)

2.2 Rodent borne viral diseases (Lassa, Hanta and Ebola virus). (K1,K2)

2.3 Picorna viruses (Polio, Rhino Virus). (K1,K2)

2.4 Hepatitis viruses ( Type A, B and C), Rabies virus. (K1,K2)

2.5 Orthomyxo ( H1N1 Influenza) and Paramyxo viruses ( Measles, Mumps). (K1,K2)

2.6 SARS, MERS, SARS CoV2. (K1,K2)

**UNIT III: Viral diseases -II.**

**(15 hours)**

3.1 Pox viruses, Adeno viruses, Herpes Simplex virus. (K1,K2)

3.2 Reo virus, Rota virus. (K1,K2)

3.3 Human immunodeficiency virus. (K1,K2)

3.4 Oncogenic virus (Papilloma virus and Polyoma virus). (K1,K2)

3.5 Antiviral drugs and Interferon. (K1,K2)

3.6 Viral vaccines. (K1,K2)

**UNIT IV: Introduction to Medical parasitology and common protozoan diseases. (15 hours)**

4.1 Introduction to Medical Parasitology – Classification of parasites. (K1,K2)

4.2 Laboratory diagnosis of common parasitic diseases. (K1,K2)

4.3 Common protozoan diseases – Amoebiasis, Giardiasis. (K1,K2)

4.4 Trypanosomiasis. (K1,K2)

4.5 Malaria. (K1,K2)

4.6 Toxoplasmosis and Leishmaniasis. (K1,K2)

**UNIT V: Common metazoan diseases.**

**(15 hours)**

5.1 Morphology, Pathogenicity, clinical manifestation and Lab diagnosis of Ascariasis. (K1,K2, K3)

5.2 Hookworm. (K1,K2,K3)

5.3 Filariasis. (K1,K2,K3)

5.4 Hydatidosis. (K1,K2,K3)

5.5 Fasciolopsis. (K1,K2,K3)

5.6 Taenia infection.(K1,K2,K3)

**TEXT BOOKS:**

## SEMESTER VI

### UCMBK18 - MICROBIAL ECOLOGY AND SOIL MICROBIOLOGY

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : VI	UCMBK20	Microbial Ecology and Soil Microbiology	Theory	Core	5	5	100

#### Course Objective:

To facilitate students understanding on the microorganisms present in their environments and their habitat, microbial interaction, biogeochemical cycling and waste management.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Compare the role of microbial communities in the environment and discuss on the significance of Aero and Water Microbiology

**CO2:** Assess on the microbiological aspects of management of sewage and design the treatment procedures.

**CO3:** Outline on the importance of bioremediation and biodegradation of xenobiotic compounds.

**CO4:** Familiarize with microorganisms of soil and their role in biogeochemical cycle.

**CO5:** Comprehend the importance of plant- microbe interactions.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	M
CO2	H	H	H	L	L	M
CO3	H	M	M	H	M	M
CO4	H	M	H	H	M	M
CO5	H	M	H	M	M	M

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	H	L	M
CO2	H	L	H	M	L	M
CO3	H	M	H	L	L	M
CO4	H	H	H	M	L	L
CO5	H	L	H	L	L	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: Aero Microbiology and Water Microbiology.

(15 hours)

- 1.1 Microbes of air, Droplet, Droplet nuclei, aerosol. Assessment of air quality, solid- liquid impingement method. (K1,K2,K3,K4)
- 1.2 Brief account of air borne transmission of microbes and diseases. (K1,K2)
- 1.3 Microbiology of water – Types of water- potability of water (K1,K2)

- 1.4 Microbial assessment of water quality. (K1,K2,K3,K4)
- 1.5 Brief account on water borne diseases. (K1,K2)
- 1.6 Municipal water treatment method process. (K1,K2,K3,K4)

**UNIT II: Sewage treatment. (15 hours)**

- 2.1 Sewage– Chemical and Microbiological characteristic of sewage. (K1,K2)
- 2.2 Types of wastes - Characterization of solid and liquid waste (K1,K2)
- 2.3 Sewage treatment methods– Primary treatment. (K1,K2,K3)
- 2.4 Sewage treatment - Secondary, anaerobic – methanogenesis, aerobic – trickling filters , activated sludge, oxidation pond. (K1,K2,K3)
- 2.5 Tertiary treatment- sewage disinfection. (K1,K2,K3)
- 2.6 Utilization of solid and liquid wastes- saccharification – gasification – composting. (K1,K2,K3)

**UNIT III: Biodeterioration and remediation. (15 hours)**

- 3.1 Bioaugmentation, recalcitrants/xenobiotic compounds -Bioremediation, biodeterioration- Definition. (K1,K2)
- 3.2 Deterioration of paper. (K1,K2,K3)
- 3.3 Deterioration of leathers. (K1,K2,K3)
- 3.4 Deterioration of wood. (K1,K2,K3)
- 3.5 Deterioration of textiles /fabrics. (K1,K2,K3)
- 3.6 Metal corrosion – Biocorrosion. (K1,K2,K3)

**UNIT IV: Microbiology of soil. (15 hours)**

- 4.1 Microorganisms in soil – qualitative and quantitative microflora of different soils. (K1,K2,K3)
- 4.2 Role of microorganisms in soil fertility. Enumeration of microorganisms in soil. (K1,K2,K3)
- 4.3 Factors affecting soil microflora – moisture, pH, temperature, organic matter, agronomic practices. (K1,K2,K3)
- 4.4 Bio-Geo chemical cycles – Nitrogen cycle (K1,K2)
- 4.5 Phosphorus cycle and sulphur cycle. (K1,K2)
- 4.6 Carbon cycle and iron cycle. (K1,K2)

**UNIT V: Plant - Microbe interactions. (15 hours)**

- 5.1 Overview on Plant Microbe interactions. (K1,K2)
- 5.2 Inter relationships between plants and Microorganisms – Rhizosphere, Rhizoplane, Phyllosphere, Spherosphere – their importance in plant growth. (K1,K2)
- 5.3 Mycorrhiza – ecto and endo mycorrhiza – AM fungi – distribution and importance. (K1,K2, K3)
- 5.4 Lichens and their role. (K1,K2)

5.5 Symbiotic Nitrogen fixation - Root nodule bacteria. (K1,K2, K3)

5.6 Non- symbiotic nitrogen fixation (K1,K2,K3)

**TEXT BOOKS:**

## SEMESTER VI

### UEMBC20- ELECTIVE II A: MARINE MICROBIOLOGY

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: VI	UEMBC20	Elective II A: Marine Microbiology	Theory	Core Elective	4	4	100

#### Course Objective:

To facilitate students understanding on the ecological role of microorganisms in marine environment.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline about the different marine environment and compare the microbial communities in the aquatic environment.

**CO2:** Discuss adaptations strategies of various extremophilic microorganisms, extremozymes and their importance in biotechnology.

**CO3:** Identify the kinetics of aquatic microbial population and microbial interactions – symbiosis and antagonism.

**CO4:** Describe about the marine food borne and water borne pathogens.

**CO5:** Explain the production and biotechnological applications of novel marine microbial products.

CO5	H	H	H	H	L	H

H – HIGH (3), M – MODERATE (2), L – LOW (1)

#### COURSE SYLLABUS

##### UNIT I: The marine environment.

(12 hours)

1.1 Marine environment - sea-benthic & littoral zone. (K1,K2)

1.2 Saltpan. (K1,K2)

1.3 Mangroves. (K1,K2)

- 1.4 Estuarine microbes. (K1,K2)
- 1.5 Microbial loop. (K1,K2)
- 1.6 Marine microbial community - planktons, bacteria, fungi, protozoa. (K1,K2)

**UNIT II: Extremophiles and their growth environment. (12 hours)**

- 2.1 Survival at extreme environments – starvation. (K1,K2)
- 2.2 Adaptive mechanisms in thermophilic, psychrophilic microorganisms. (K1,K2)
- 2.3 Alkalophilic microorganisms. (K1,K2)
- 2.4 Barophilic microorganisms and Osmophilic microorganisms. (K1,K2)
- 2.5 Hyperthermophiles microorganisms. (K1,K2)
- 2.6 Halophiles - importance in biotechnology. (K1,K2)

**UNIT III: Microbe- Microbe interactions. (12 hours)**

- 3.1 Microbe-microbe interactions – Lichens. (K1,K2)
- 3.2 Antagonistic interactions - amensalism, mycoparasitism. (K1,K2)
- 3.3 Animal-microbe interaction - Ectosymbiosis of Protozoa, Ruminant symbiosis. (K1,K2)
- 3.4 Plant-microbe interaction – *Rhizobium*. (K1,K2)
- 3.5 Plant-microbe interaction – *Mycorrhizae*. (K1,K2)
- 3.6 *Anabaena* - sponge. (K1,K2)

**UNIT IV: Marine pathogens. (12 hours)**

- 4.1 Marine food borne pathogens & Water borne pathogens – An overview. (K1,K2)
- 4.2 *Aeromonas*. (K1,K2)
- 4.3 *Vibrio*. (K1,K2)
- 4.4 *Salmonella*. (K1,K2)
- 4.5 *Pseudomonas*. (K1,K2)
- 4.6 *Leptospira*. (K1,K2)

**UNIT V: Marine microbial products. (12 hours)**

- 5.1 Production and applications of marine microbial products - pigments – Astaxanthin. (K1,K2)
- 5.2 Production and applications of marine microbial products -  $\beta$  carotene. (K1,K2)
- 5.3 Production and applications of marine microbial products – enzymes. (K1,K2)
- 5.4 Production and applications of marine microbial products – antibiotics. (K1,K2)
- 5.5 Production and applications of marine microbial products – polysaccharide. (K1,K2)
- 5.6 Sea food preservation methods. (K1,K2)

**TEXT BOOKS:**

## SEMESTER VI

### UEMBD20 - ELECTIVE II B: MICROBIAL NANOTECHNOLOGY

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: VI	UEMBD20	Elective II B: Microbial Nano Technology	Theory	Core Elective	4	4	100

#### Course Objective:

To facilitate students understanding on microbial nanotechnology and its applications.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline evolution of nanoscience and hurdles in the development of nanotechnology.

**CO2:** Understand the use spectroscopy for nanotechnology research.

**CO3:** Discuss the role of microscopy in nanotechnology research.

**CO4:** Utilize nano materials for drug development and its application in nuclear medicine.

**CO5:** Apply nanotechnology for air and water treatment and become familiar with nanoscience education in India and abroad.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	M	M	H
CO2	H	H	H	L	L	M
CO3	H	M	M	H	L	M

CO4	H	H	H	M	M	M
CO5	H	H	H	M	H	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT I: History and evolution of Nano Science.

(12 hours)

1.1 Definition – Evolution of Nano science. (K1,K2)

1.2 Need of Nano technology. (K1,K2)

1.3 Hurdles for Nanotechnology development. (K1,K2)

1.4 Factors affecting the manufacturing process of nano materials. (K1,K2)

1.5 Role of physicists, chemists, computer scientists, engineers in nanotechnology. (K1,K2)

1.6 Role of Medical doctors, biologists in nano technology. (K1,K2)

**UNIT II: Spectroscopy in nanotechnology research. (12 hours)**

- 2.1 Spectroscopy- An overview. (K1,K2)
- 2.2 Importance of spectroscopy in nano technology research. (K1,K2)
- 2.3 Mass spectroscopy. (K1,K2)
- 2.4 Infra-red spectroscopy. (K1,K2)
- 2.5 Raman spectroscopy. (K1,K2)
- 2.6 Ultra violet-visible spectroscopy. (K1,K2)

**UNIT III: Microscopy in nanotechnology research. (12 hours)**

- 3.1 Microscopy in nanotechnology research- An over view. (K1,K2)
- 3.2 Atomic force microscope. (K1,K2)
- 3.3 Scanning electron microscope. (K1,K2)
- 3.4 Transmission electron microscope. (K1,K2)
- 3.5 Magnetic resonance force microscopy. (K1,K2)
- 3.6 Nano probes for nucleic and hybridization detection. (K1,K2)

**UNIT IV: Nanotechnology for drug development and medical applications. (12 hours)**

- 4.1 Nanotechnology for drug development and medical applications. (K1,K2)
- 4.2 Nanotechnology for drug solubilization and drug delivery. (K1,K2)
- 4.3 Diagnosis using nanomaterials. (K1,K2)
- 4.4 Nanotherapy for cancer treatment. (K1,K2)
- 4.5 Nanotherapy for interior artery embolisms. (K1,K2)
- 4.6 Radioactive tubereene cages in Nuclear medicine. (K1,K2)

**UNIT V: Cleaning the air with nanotechnology. (12 hours)**

- 5.1 Cleaner environment with Nanotech. Cleaning the air with Nanotechnology. (K1,K2)
- 5.2 Nanotechnology for water treatment. (K1,K2)
- 5.3 Microbial nanoparticles used in cleaning air. (K1,K2)
- 5.4 Nanocarbon ball as deodorizer in fermentation process. (K1,K2)
- 5.5 Possible harm from Nanomaterials. (K1,K2)
- 5.6 Nanoscience in India – Nanoscience education abroad – ethics and society. (K1,K2)

**TEXT BOOKS:**

## SEMESTER VI

### UEMBE20: ELECTIVE III A: CYANOBACTERIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: VI	UEMBE20	Elective III A: Cyanobacteriology	Theory	Core Elective	4	4	100

#### Course Objective:

To provide an understanding on the structure, genomics, molecular regulation and applications of Cyanobacteria.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the diversity of cyanobacteria.

**CO2:** Discuss on the genomics of Cyanobacteria.

**CO3:** Explain the molecular biology of Cyanobacteria.

**CO4:** Describe the molecular regulation in Cyanobacteria.

**CO5:** Demonstrate the mass cultivation and applications of Cyanobacteria.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	M	M	H
CO2	H	H	H	L	L	M

CO4	H	M	H	M	L	M
CO5	H	H	H	H	H	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT-I: Introduction to cyanobacteria.

(12 hours)

- 1.1 Overview on cyanobacteriology. (K1,K2)
- 1.2 Introduction: Origins of life. (K1,K2)
- 1.3 Photosynthesis in cyanobacteria. (K1,K2)
- 1.4 Diversity of cyanobacteria. (K1,K2)
- 1.5 Fossil history of cyanobacteria. (K1,K2)
- 1.6 The Oceanic Cyanobacterial Picoplankton. (K1,K2)

##### UNIT-II: Genomics of Cyanobacteria.

(12 hours)

- 2.1 Gene transfer in cyanobacteria in nature. (K1,K2)
- 2.2 Gene transfer to cyanobacteria in lab. (K1,K2,K3)

- 2.3 Molecular ecology of Cyanobacteria. (K1,K2)
- 2.4 Environmental genomics of cyanobacteria. (K1,K2)
- 2.5 Comparative genomics of marine cyanobacteria. (K1,K2)
- 2.6 Stress response-regulatory system and regulated genes. (K1,K2)

**UNIT-III: Molecular Biology of Cyanobacteria. (12 hours)**

- 3.1 Molecular Biology of Cyanelles and Chloroplast Origins and Evolution. (K1,K2)
- 3.2 Supramolecular Membrane Organization. (K1,K2)
- 3.3 Phycobilisome and Phycobiliprotein Structures. (K1,K2)
- 3.4 The Use of Cyanobacteria in the Study of the Structure and Function of Photosystem II. (K1,K2)
- 3.5 The Cytochrome Complex. (K1,K2)
- 3.6 Photosystem I in Cyanobacteria. (K1,K2)

**UNIT-IV: Biochemistry and molecular regulation in cyanobacteria. (12 hours)**

- 4.1 The Biochemistry of cyanobacteria. (K1,K2)
- 4.2 Molecular Regulation of Carbon Dioxide Metabolism in Cyanobacteria. (K1,K2)
- 4.3 Genetic Analysis of Cyanobacteria. (K1,K2)
- 4.4 Heterocyst development. (K1,K2)
- 4.5 Heterocyst Metabolism. (K1,K2)
- 4.6 Differentiation of Hormogonia. (K1,K2)

**UNIT-V: Applications of Cyanobacteria. (12 hours)**

- 5.1 Mass cultivation of cyanobacteria under outdoor and indoor conditions. (K1,K2)
- 5.2 Cyanobacteria as a source of fine chemicals: polysaccharides and bioactive molecules. (K1,K2,K3)
- 5.3 Cyanobacteria as a source of pigments and antioxidants. (K1,K2,K3)
- 5.4 Cyanobacteria as a source of lipids and polyunsaturated fatty acids. (K1,K2,K3)
- 5.5 Cyanobacteria as biofertilizer for paddy cultivation. (K1,K2,K3)
- 5.6 Hydrogen production by cyanobacteria: Mechanism, progress and prospects. (K1,K2)

**TEXT BOOKS:**

1. Samit Ray. (2006). Cyanobacteria. 1<sup>st</sup> edition. New Age International Pvt Ltd Publishers.
2. Percy M. Gault and Harris J. Marler. (2009) .Handbook on Cyanobacteria: Biochemistry, Biotechnology and Applications (Bacteriology Research Developments), Nova Science publishers, Inc.

## SEMESTER VI

### UEMBF20 - ELECTIVE III B - ADVANCED MICROBIOLOGY

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: VI	UEMBF20	Elective III B: Advanced Microbiology	Theory	Core Elective	4	4	100

#### Course Objective:

To provide the learners an overview on the advanced aspects of Microbiology

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Utilize microorganisms in the preparation of cosmetics.

**CO2:** Evaluate the biological potential in samples return from satellites and solar system.

**CO3:** Discuss the role of antimicrobial fabrics, carpets, tiles, colourants and produce bacteriostatic sanitary napkins and towels.

**CO4:** Comprehend on paper, rubber and plastic Microbiology

**CO5:** Analyze the methods for producing its antimicrobial products.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	M	M	H
CO2	H	H	M	L	L	M
CO3	H	M	L	H	M	H

CO5	H	H	M	M	H	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	H	H
CO2	H	H	H	M	L	L
CO3	H	H	H	L	M	H
CO4	H	M	H	L	M	H
CO5	H	H	H	L	H	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

##### UNIT-I: Cosmetic Microbiology.

(12 hours)

1.1 Definition; Preparations of Skin whitening compositions from microbes like Ascomycetes and Black yeast. (K1,K2, K3)

1.2 Preparations of Skin whitening compositions- enzymes. (K1,K2, K3)

1.3 Preparations of Skin whitening compositions- Mineral yeast ferments. (K1,K2,K3)

1.4 Microbial Production of Alpha Arbutin. (K1,K2,K3)

1.5 Microbial production of Hyaluronic acid. (K1,K2,K3)

1.6 Kojic acid and their use in Cosmetics preparations. (K1,K2)

**UNIT–II: Space Microbiology. (12 hours)**

2.1 Introduction to Space Microbiology. (K1,K2)

2.2 Monitoring of astronauts microbial flora. (K1,K2,K3)

2.3 Alterations in the load of medically important microorganisms. (K1,K2)

2.4 ESA STONE experiment. (K1,K2,K3,K4)

2.5 Evaluating the Biological Potential in Samples Returned from Planetary Satellites. (K1,K2, K3,K4)

2.6 Evaluating the Biological Potential of Small Solar System Bodies. (K1,K2,K3,K4)

**UNIT–III: Textile Microbiology. (12 hours)**

3.1 Introduction to Textile Microbiology. (K1,K2)

3.2 Antimicrobial fabrics. (K1,K2)

3.3 Antimicrobial garments. (K1,K2)

3.4 Antimicrobial carpets. (K1,K2)

3.5 Antimicrobial colorants. (K1,K2)

3.6 Bacteriostatic sanitary napkins and towels. (K1,K2,K3)

**UNIT–IV: Paper and Rubber Microbiology. (12 hours)**

4.1 Paper Microbiology- Introduction & Definition. (K1,K2)

4.2 Antimicrobial papers and its production. (K1,K2)

4.3 Antimicrobial currency. (K1,K2)

4.4 Rubber Microbiology – Introduction & Definition. (K1,K2)

4.5 Note on Antimicrobial rubbers. (K1,K2)

4.6 Antimicrobial rubber compositions. (K1,K2)

**UNIT–V: Plastic Microbiology. (12 hours)**

5.1 Definition- Bacteriostatic plastics. (K1,K2)

5.2 Antimicrobial plastic composition and production. (K1,K2)

5.3 Antiseptic plastics. Fungistatic plastics: Definition and production. (K1,K2)

5.4 Production of plastics materials from microorganisms. (K1,K2,K3)

5.5 Methods for producing anti-microbial plastic product. (K1,K2,K3,K4)

5.6 Plastic article containing a metallic bactericidal agent. Casein plastic. (K1,K2,K3)

**TEXT BOOKS:**

## SEMESTER VI

### UCMBL20- CORE PRACTICAL III: MEDICAL MICROBIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : VI	UCMBL20	Medical Microbiology	Practical	Core	3	4	100

#### Course Objective:

To provide hands on training on laboratory skills in the field of Diagnostic Microbiology.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Demonstrate collection, transport and processing of clinical specimens.

**CO2:** Perform staining techniques for the identification of bacteria.

**CO3:** Isolate and identify the bacterial pathogens from various clinical specimens.

**CO4:** Prepare culture media for the cultivation of microorganisms.

**CO5:** Analyze the clinical specimens for the examination of pathogenic fungi and parasites.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	H
CO2	H	H	H	L	L	M
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	M	L	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	L	M
CO2	H	H	H	M	L	M
CO3	H	H	H	L	L	H
CO4	H	H	H	M	L	H
CO5	H	H	H	M	L	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

#### COURSE SYLLABUS

1. General requirements of collections transport of clinical specimens – Direct examinations – Staining of specimens – Methods of enriched, Selective and enrichment culture techniques used to isolate organisms from clinical materials.
2. Simple, differential and special staining of clinical materials ie., Throat Swab, vaginal Swab, pus, urine, sputum, stool etc.,
3. Quantitative urine analysis.

4. Isolation and identification of bacterial pathogens from clinical specimens their biochemical reactions- catalase, oxidase, coagulase, IMViC, TSI, urease and MMTP.
5. Antimicrobial Sensitivity testing and determination of MIC and quality control.
6. Wet mount examinations of stool for parasites (saline and iodine).
7. KOH and LPCB preparation for skin and nail scrapings, for fungi.
8. Estimation of worm burden in stool. Floatation and sedimentation techniques of stool examination.
9. Germ tube test, Assimilation, fermentation tests for yeasts.
10. Identification of pathogenic microbes including viruses in slides \ smears \ Specimens as Spotters.

**SEMESTER VI**  
**UCMBM20 - CORE PRACTICAL IV: ECOLOGY, FOOD AND DAIRY**  
**MICROBIOLOGY**

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : VI	UCMBM20	Ecology, food and Dairy Microbiology	Practical	Core	3	4	100

**Course Objective:**

To provide hand on experience on isolation and characterization of microbes from different food sources, agricultural and environmental samples.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Assess the microbiological quality of raw milk by MBRT and Standard Plate Count test.

**CO2:** Identify and enumerate bacteria and fungi from the spoiled foods and Rhizosphere soil.

**CO3:** Apply the technique for the isolation of yeast from food sources.

**CO4:** Analyze the potability of water by MPN test.

**CO5:** Perform the microbial test to detect soil fertility and isolate, cultivate Rhizobium from root nodule.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	L	L	H
CO2	H	H	H	M	L	M
CO3	H	H	H	M	L	M

CO4	H	H	H	M	L	H
CO5	H	H	H	H	M	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

**COURSE SYLLABUS**

1. Isolation of microorganisms from air by Settle plate technique.
2. Isolation and counting of faecal bacteria from water.
3. Water analysis by MPN technique
  - i. Presumptive coli form test

- ii. Confirmed coli form test
  - iii. Completed coli form test.
4. Enumeration of number of bacteria in milk by Standard plate count method.
  5. Methylene blue reductase test to assess the quality of milk.
  6. Isolation of Lactobacilli and Staphylococcus from curd.
  7. Examination of common house hold mold – LPCB wet mount.
  8. Isolation of bacteria and fungi from Spoiled food.
  9. Isolation of yeast from food sources – Grapes and Sugarcane juice.
  10. Isolation & Enumeration of bacteria and fungi from Rhizosphere soil.
  11. Microbial test for Soil fertility – Phosphate Solubilization and Nitrate reduction test.
  12. Isolation of *Rhizobium* from root nodule.

**USMBA20 – SKILL BASED ELECTIVE: MUSHROOM TECHNOLOGY**

Year II	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM: III</b>	USMBA20	Mushroom Technology	Theory	Skill Based Elective	2	2	100

**Course Objective:**

The course will provide adequate hands on experience in handling and cultivation of edible mushrooms. The subject content is designed to develop an entrepreneur.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Communicate information about scope and importance of mushrooms.

**CO2:** Formulate media used for cultivation of mushroom and select the appropriate methods for spawn production.

**CO3:** Demonstrate mushroom cultivation technology and its preservation

**CO4:** Compile in detail about edible and poisonous mushrooms.

**CO5:** Utilize the nutritional and medicinal values of mushrooms.

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

**COURSE SYLLABUS**

**UNIT I: History and scope of mushroom cultivation. (6 hours)**

- 1.1 Introduction to mushroom cultivation. (K1,K2)
- 1.2 History to mushroom cultivation. (K1,K2)
- 1.3 Scope and importance of mushroom cultivation. (K1,K2)
- 1.4 Present status of mushroom industry in India. (K1,K2)
- 1.5 Mushroom research and development. (K1,K2)

1.6 National and international agencies. (K1,K2)

**UNIT II: Pure culture for spawn production. (6 hours)**

2.1 Pure Culture- Media- Preparation. (K1,K2,K3)

2.2 Maintenance of mother culture in test tube slants -Petri plates - saline bottle - poly propylene bags. (K1,K2,K3)

2.3 Spawn production- spawning. (K1,K2,K3)

2.4 Types of spawning. (K1,K2,K3)

2.5 Compost and composting. (K1,K2,K3)

2.6 Storage and transportation. (K1,K2,K3)

**UNIT III: Cultivation technology. (6 hours)**

3.1 Cultivation Technology - Infrastructure - culture rack. (K1,K2,K3)

3.2 Thatched house. (K1,K2,K3)

3.3 Substrates – vessels. (K1,K2,K3)

3.4 Inoculation methods. (K1,K2,K3)

3.5 Mushroom bed preparation. (K1,K2,K3)

3.6 Preservation technology- long term storage - short term storage. (K1,K2,K3)

**UNIT IV: Edible mushrooms cultivated in India. (6 hours)**

4.1 Types and importance of edible mushroom cultivated in India. (K1,K2)

4.2 *Agaricus bisporus*. (K1,K2,K3)

4.3 *Pleurotus* sps. (K1,K2,K3)

4.5 *Volvariella volvacea* (K1,K2,K3)

4.6 *Calocybe indica*. (K1,K2,K3)

4.7 Mushroom contamination.(K1,K2)

**UNIT V: Nutritional and Medicinal Value of mushroom. (6 hours)**

5.1 Nutritional value of mushrooms. (K1,K2)

5.2 Medicinal values of Mushroom. (K1,K2)

5.3 Preparation of low calorie foods – the mushroom recipes. (K1,K2, K3)

5.4 Marketing values of mushrooms in India. (K1,K2)

5.5 Export value of mushrooms. (K1,K2)

5.6 Poisonous Mushrooms. (K1,K2)

## SKILL BASED ELECTIVE

(B.Sc Microbiology - Semester IV)

### USMBB20 – SKILL BASED ELECTIVE: BIOINSTRUMENTATION

Year II	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM : IV	USMBB20	Bioinstrumentation	Theory	Skill Based Elective	2	2	100

#### Course Objective:

To provide an in depth knowledge on handling various laboratory instruments with a keen idea about its principle of working.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the working principles of various laboratory equipment.

**CO2:** Demonstrate various types of centrifugation.

**CO3:** Discuss on the different techniques of gel electrophoresis and comprehend the methods of blotting

**CO4:** Compile the techniques of chromatography.

**CO5:** Explain principle and usage of various spectrophotometres.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	L	L	M

CO5	H	H	H	L	L	M

H – HIGH (3), M – MODERATE (2), L – LOW (1)

#### COURSE SYLLABUS

##### UNIT I: Basic science equipments and its uses.

(6 hours)

1.1 Buffers, molar and normal solutions. (K1,K2)

1.2 pH meter, pH electrodes - calomel and glass electrodes. (K1, K2)

1.3 Hot Air oven, Autoclave. (K1, K2, K3)

1.4 Incubator. (K1, K2, K3)

1.5 Water bath shaker. (K1, K2, K3)

1.6 Laminar air flow- its application and uses. (K1, K2, K3)

**UNIT II: Centrifuge and its application.**

**(6 hours)**

1.1 Centrifugation- Definition- Principle. (K1, K2, K3)

1.2 Types of centrifuges - low speed and high speed. (K1, K2, K3)

1.3 Ultra centrifuge. (K1, K2, K3)

1.4 Differential centrifugation. (K1, K2, K3)

1.5 Density gradient centrifugation. (K1, K2, K3)

1.6 Applications of centrifuge. (K1, K2, K3)

**UNIT III: Electrophoresis.**

**(6 hours)**

3.1 Electrophoresis - SDS – PAGE. (K1, K2, K3)

3.2 Agarose gel electrophoresis. (K1, K2, K3)

3.3 Southern blotting. (K1, K2, K3)

3.4 Northern blotting. (K1, K2, K3)

3.5 Western blotting. (K1, K2, K3)

3.6 DOT blotting. (K1, K2, K3)

**UNIT IV: Chromatographic techniques.**

**(6 hours)**

4.1 Chromatography – paper. (K1, K2, K3)

4.2 Thin layer chromatography. (K1, K2, K3)

4.3 Column chromatography. (K1, K2, K3)

4.4 Ion exchange chromatography. (K1, K2, K3)

4.5 Gas chromatography. (K1, K2, K3)

4.6 HPLC- its application and uses. (K1, K2, K3)

**UNIT V: Spectrophotometry.**

**(6 hours)**

5.1 Colorimetry, (K1, K2, K3)

5.2 Spectrometry – Principle of work. (K1, K2, K3)

5.3 Types- UV and visible spectrophotometer. (K1, K2, K3)

5.4 Flame photometry. (K1, K2, K3)

5.5 FACS. (K1, K2, K3)

5.6 Biosensors – its application and uses. (K1, K2, K3)

**SKILL BASED ELECTIVE**  
**(B.Sc Microbiology- Semester V & VI )**

**USMBC20 – SKILL BASED ELECTIVE: DIAGNOSTIC MICROBIOLOGY**

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM: V &amp; VI</b>	USMBC20	Diagnostic Microbiology	Theory	Skill Based Elective	2	2	100

**Course Objective:**

To provide the learners an overview on clinical Microbiology, laboratory organization and various diagnostic approaches from traditional to molecular methods.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

- CO1:** Explain general safety regulations and guidelines of microbiology laboratory.  
**CO2:** Apply procedures in the collection and transport of clinical specimens.  
**CO3:** Examine and identify the pathogenic microorganisms from clinical specimens.  
**CO4:** Perform serological and molecular methods for the diagnosis of diseases.  
**CO5:** Determine the sensitivity and resistance pattern of bacterial pathogens to various antibiotics.

<b>CO5</b>	H	H	H	L	M	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Philosophy of Diagnostic Microbiology. (5 hours)**

- 1.1 Purpose and philosophy of Diagnostic Microbiology. (K1,K2)
- 1.2 Organization of clinical microbiology laboratory. (K1,K2)
- 1.3 Responsibility of clinical microbiology laboratory. (K1,K2)
- 1.4 Laboratory safety: General safety considerations – biohazards. (K1,K2)
- 1.5 Practices specific to Microbiology. (K1,K2)
- 1.6 Classification of biological agents on the basis of hazards. (K1,K2)

### **UNIT II: Collection of clinical specimens. (5 hours)**

- 2.1 Collection of bacterial, viral, fungal and protozoan diseases associated clinical specimens- An overview.(K2,K3,K4)
- 2.2 Oral cavity and throat swab. .(K2,K3,K4)
- 2.3 Skin Scrapping. .(K2,K3,K4)
- 2.4 Blood. .(K2,K3,K4)
- 2.5 CSF.(K2,K3,K4)
- 2.6 Urine and faeces. (K2,K3,K4)

### **UNIT III: Examination and processing of clinical samples. (5 hours)**

- 3.1 Examination of clinical sample by staining - Gram stain. (K2,K3,K4)
- 3.2 Ziehl – Neelson staining for tuberculosis. (K2,K3,K4)
- 3.3 Giemsa stained thin blood film for malaria. (K2,K3,K4)
- 3.4 LPCB for fungal identification (K2,K3,K4)
- 3.5 Culture based techniques- processing of various clinical specimens. (K2,K3,K4)
- 3.6 Culture for the growth of fungi. (K2,K3,K4)

### **UNIT IV: Serological and Molecular diagnosis. (9 hours)**

- 4.1 Serological Methods – Agglutination based methods: WIDAL. (K2,K3,K4)
- 4.2 Automated methods: ELISA. (K2,K3,K4)
- 4.3 Immunodiffusion. (K2,K3,K4)
- 4.4 Immunoelectrophoresis. (K2,K3,K4)
- 4.5 Western blotting. (K2,K3,K4)
- 4.6 Nucleic acid based methods - PCR. (K2,K3,K4)

### **UNIT V: Antimicrobial sensitivity. (6 hours)**

- 5.1 Importance and determination of resistance/sensitivity of bacterial pathogens using disc diffusion method. (K2,K3,K4)
- 5.2 Determination of minimal inhibitory concentration (MIC) of an antibiotic by serial double dilution method and E test – importance of MIC determination. (K2,K3,K4)
- 5.3 Antimycotic susceptibility testing –reporting and resulting. (K2,K3,K4)
- 5.4 Computerization. (K1,K2,K3)
- 5.5 Quality assurance. (K1,K2,K3)
- 5.6 Safe disposal of specimens and biohazards. (K1,K2,K3)

**USMBD20 – SKILL BASED ELECTIVE: NUTRACEUTICALS AND FUNCTIONAL FOODS**

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM:</b> V & VI	USMBD20	Nutraceuticals and functional foods	Theory	Skill Based Elective	2	2	100

**Course Objective:** To familiarize students on the basic nutraceutical constituents of different foods and its role in health benefits.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Explain the historical perspective, classification, scope and future prospects of nutraceuticals.

**CO2:** Discuss the nutraceuticals constituents present in various food products and the role of probiotics and prebiotics as nutraceuticals.

**CO3:** Analyze food as remedies for the common disorders.

**CO4:** Outline genetically modified plants which are commercially available and their applications.

**CO5:** Communicate the pharmaceutical applications of genetically engineered plants.

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Basics of nutraceuticals. (6 hours)**

- 1.1 Introduction to nutraceuticals – The link between nutrition and medicine. (K1,K2)
- 1.2 Historical perspective. (K1,K2)
- 1.3 Sources of nutraceuticals. (K1,K2)
- 1.4 Classification of nutraceuticals. (K1,K2)
- 1.5 Scope. (K1,K2)
- 1.6 Future prospects of Nutraceuticals. (K1,K2)

### **UNIT II: Colonic functional foods. (6 hours)**

- 2.1 Colonic functional foods – Probiotics. (K1,K2)
- 2.2 Prebiotics. (K1,K2)
- 2.3 Synbiotics – Health aspects of functional colonic foods. (K1,K2)
- 2.4 Milk ingredients as functional foods. (K1,K2)
- 2.5 Brief idea about some Nutraceutical rich supplements e.g. Caffeine. (K1,K2).
- 2.6 Green tea. (K1, K2)

### **UNIT III: Food as remedies. (6 hours)**

- 3.1 Food as Remedies- An overview. (K1,K2)
- 3.2 Nutraceutical remedies for common disorders like Arthritis. (K1,K2)
- 3.3 Bronchitis and circulatory problems. (K1,K2)
- 3.4 Hypoglycemia and nephrological disorders. (K1,K2)
- 3.5 Liver disorders and Osteoporosis. (K1,K2)
- 3.6 Psoriasis and Ulcers. (K1,K2)

### **UNIT IV: Genetically modified foods as nutraceuticals. (6 hours)**

- 4.1 Wild crop and genetically modified crops- Definition and uses. (K1,K2)
- 4.2 Nutraceuticals from genetically modified foods: *Bacillus thuringiensis* corn. (K1,K2)
- 4.3 Indian Bt egg plant. (K1,K2)
- 4.4 Purple tomato - tearless onion. (K1,K2)
- 4.5 Rainbow cauliflower. (K1,K2)
- 4.6 Calgene- FLAVR SAVR tomato. (K1,K2)

### **UNIT V: Plant pharmaceuticals as nutraceuticals**

- 5.1 Nutraceuticals from plant pharmaceuticals. (K1,K2)
- 5.2 Beta-carotene in rice (Golden rice). (K1,K2)
- 5.3 Transgenic “heart-healthy” Canola oil. (K1,K2)
- 5.4 Edible vaccine. (K1,K2)
- 5.5 Hepatitis B vaccine in maize. (K1,K2)

## 5.6 Cholera vaccine in potatoes. (K1,K2)

### **TEXT BOOKS:**

## USMBE20 – SKILL BASED ELECTIVE: COSMETOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: V & VI	USMBE20	Cosmetology	Theory	Skill Based Elective	2	2	100

### Course Objective:

To provide adequate knowledge on cosmeceuticals, personal care and hygiene products and familiarize with the skills in formulation science required to scientifically design and develop products.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Give information about significance of cosmetics and adulteration of natural products.

**CO2:** Formulate face packs, hair oils for different types of skin and hair.

**CO3:** Analyze the structure, function and types of skin.

**CO4:** Outline the biology of hair, hair growth cycle and scalp hygiene and utilize the natural herbs for skin, hair and oral care preparations.

**CO5:** Communicate the cosmeceutical applications of micro and macroalgae.

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

### COURSE SYLLABUS

#### UNIT I: Cosmetics and its significance.

(6 hours)

1.1 Cosmetics – Definition and purpose. (K1,K2)

1.2 Classification of cosmetics. (K1,K2)

1.3 Significance and its importance. (K1,K2)

- 1.4 Stability of product forms and quality control. (K1,K2)
- 1.5 Adulteration of Natural products: Qualitative method of detection. (K1,K2)
- 1.6 Quantitative methods of detection of adulteration. (K1,K2)

**UNIT II: Role of cosmetics in facial skin care. (6 hours)**

- 2.1 Structure and function of skin. (K1,K2)
- 2.2 Types of Skin. (K1,K2)
- 2.3 Differences between baby's skin and adult skin. (K1,K2)
- 2.4 Formulations of face packs for dry, oily and normal skins. (K1,K2, K3)
- 2.5 Herbal remedy for skin disorders- pimple, acne, boils, black heads, white heads, and open pores. (K1,K2, K3)
- 2.6 Skin care in different seasons. (K1,K2, K3)

**UNIT III: Hair Care. (6 hours)**

- 3.1 Structure and function of hair. (K1,K2)
- 3.2 Types of hair and Hair growth cycles. (K1,K2)
- 3.3 Defects in hair shaft. (K1,K2)
- 3.4 Processes involved in hair growth and color formation in hair. (K1,K2)
- 3.5 Role of scalp hygiene. (K1,K2)
- 3.6 Formulations of hair oils and hair tonics- remedy for dandruff, premature greying and hair loss. (K1,K2,K3)

**Unit IV: Role of Herbs in Cosmetics / Herbal cosmetics. (6 hours)**

- 4.1 Hair care preparation: Henna, Amla (K1,K2,K3)
- 4.2 Hibiscus, Bhringaraj. (K1,K2,K3)
- 4.3 Skin Care preparation: Aloe vera. (K1,K2,K3)
- 4.4 Turmeric, Sandal wood. (K1,K2,K3)
- 4.5 Oral care preparation: Babool. (K1,K2,K3)
- 4.6 Neem, Clove. (K1,K2,K3)

**UNIT V: Algae in Cosmetics. (6 hours)**

- 5.1 Microalgae and macroalgae- An introduction. (K1,K2)
- 5.2 Chlorophyceae (green algae). (K1,K2)
- 5.3 Phaeophyceae (brown algae). (K1,K2)
- 5.4 Rhodophyceae (red algae). (K1,K2)
- 5.5 Applications of algae in cosmetics: sunscreen, moisturizer, anti-aging,whitening and hair care. (K1,K2,K3)
- 5.6 Cosmetic products using algal metabolites. (K1,K2)

**TEXT BOOKS:**

**UAMBA20 – ALLIED III: MICROBIOLOGY –I**

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM: III</b>	UAMBA20	Allied III: Microbiology-I	Theory	Allied	4	4	100

**Course Objective:**

To make the students know about the third major component of the biotic system and provide a detailed insight on the study of microbes.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Discuss history, recent developments and microscopy.

**CO2:** Utilize techniques of sterilization, pure culture and staining.

**CO3:** Outline classification and anatomy of bacteria.

**CO4:** Compare structural characteristics of algae, fungi and protozoa.

**CO5:** Demonstrate measurement of microbial growth and explain classification of antibiotics with its mode of action.

<b>CO5</b>	H	M	M	M	L	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: History of Microbiology and Microscopy. (12 hours)**

- 1.1 Definition and scope of Microbiology-History and recent Developments, Spontaneous generation and Biogenesis. (K1,K2)
- 1.2 Contribution of Louis Pasteur, Antony Van Leuwenhoek, Joseph Lister, Robert Koch. (K1,K2)
- 1.3 Edward Jenner, Emil Christian Hansen, Hans Christian Gram, Alexander Fleming. (K1,K2)
- 1.4 Microscopy – Bright field Microscopy, Dark field Microscopy. (K1,K2, K3)
- 1.5 Phase contrast Microscope and Fluorescence Microscope. (K1,K2)
- 1.6 Electron Microscopy – TEM & SEM. (K1,K2)

### **UNIT II: Basic techniques in Microbiology. (12 hours)**

- 2.1 Sterilization of glass wares. (K1, K2, K3)
- 2.2 Culture media and its types. (K1, K2, K3)
- 2.3 Preparation of basal media. (K1, K2, K3)
- 2.4 Pure culture techniques – spread plate, pour plate and streak plate techniques.(K1,K2, K3)
- 2.5 Serial dilution and Standard plate count methods. (K1,K2, K3)
- 2.6 Staining techniques – simple and differential (Grams staining and Acid fast staining). (K1,K2, K3)

### **UNIT III: Binomial nomenclature and Anatomy of bacteria. (12 hours)**

- 3.1 Brief outline on bacterial classification- Binomial Nomenclature of Microbes. (K1,K2)
- 3.2 Morphology of bacteria - size, shape and arrangement of bacteria. (K1,K2)
- 3.3 Anatomy of Bacteria – Cell wall (Gram positive and Gram negative). (K1,K2)
- 3.4 Cytoplasmic membrane. (K1,K2)
- 3.5 Flagella –structure and arrangement, capsule, pili .(K1,K2)
- 3.6 Spore and sporulation. (K1,K2)

### **UNIT IV: Structural characteristics of algae, fungi and protozoa. (12 hours)**

- 4.1 Structural characteristics of Microalgae- An overview. (K1,K2)
- 4.2 *Oscillatoria, Volvox, Chlorella*. (K1,K2,K3)
- 4.3 Structural characteristics of fungi – An overview. (K1,K2)
- 4.4 Yeast- *Saccharomyces* and its reproduction. (K1,K2)
- 4.5 Molds - *Aspergillus, Penicillium, Rhizopus, Mucor*. (K1,K2, K3)
- 4.6 Protozoa (*Entamoeba* and *Plasmodium*). (K1,K2, K3)

### **UNIT V: Growth of Microorganism and their control. (12 hours)**

- 5.1 Measurement of microbial growth (turbidity, biomass, cell count). (K1,K2, K3)
- 5.2 Growth curve. (K1,K2, K3)

- 5.3 Preservation of culture (Lyophilization, Liquid N<sub>2</sub>). (K1,K2)
- 5.4 Antibiotics – Definition, classification and mode of action. (K1,K2)
- 5.5 Antibiotics inhibiting cell wall and cell membrane synthesis. (K1,K2)
- 5.6 Antibiotics inhibiting nucleic acid and protein synthesis. (K1,K2)

**ALLIED MICROBIOLOGY**  
**( B.Sc Biochemistry- Semester IV)**  
**UAMBB20- ALLIED IV: MICROBIOLOGY – II**

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM: IV</b>	UAMBB20	Allied IV: Microbiology-II	Theory	Allied	4	4	100

**Course Objective:** To make the students know about the third major component of the biotic system and provide a detailed insight on the significance microbes in different environments.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Discuss the role of microorganisms in soil and biogeochemical cycles.

**CO2:** Disseminate knowledge on the potability of water, purification of municipal water supplies and sewage treatment process

**CO3:** Communicate sources of airborne pathogens and the diseases caused.

**CO4:** Explain Food borne diseases and outline on the contamination, spoilage and preservation of food.

**CO5:** Compile on different types of fermentation and fermented microbial product.

<b>CO5</b>	H	H	H	L	L	H

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Microbiology of soil and Biogeochemical cycle. (12 hours)**

- 1.1 Microbiology of soil - Microbes in soil. (K1,K2)
- 1.2 Rhizosphere, rhizoplane and phylloplane. (K1,K2)
- 1.3 Nitrogen fixation (symbiotic and non-symbiotic) - nitrifying and denitrifying bacteria. (K1,K2)
- 1.4 Biogeochemical cycle – Carbon cycle, Nitrogen cycle. (K1,K2)
- 1.5 Sulphur cycle and phosphorus cycle. (K1,K2)
- 1.6 Phosphate solubilizers and sulphur bacteria -Bacterial Biofertilizers. (K1,K2)

### **UNIT II: Microbiology of water. (12 hours)**

- 2.1 Microbiology of water – types of water – potable water. (K1,K2)
- 2.2 Municipal water purification. (K1,K2)
- 2.3 Sewage treatment process – An overview. (K1,K2)
- 2.4 Primary, Secondary and tertiary treatment process. (K1,K2)
- 2.5 Sewage disinfection and disposal. (K1,K2)
- 2.6 Water borne diseases. (K1,K2)

### **UNIT III: Aero Microbiology. (12 hours)**

- 3.1 Microbiology of air- An overview. (K1,K2)
- 3.2 Indoor and outdoor microflora. (K1,K2)
- 3.3 Distribution and source of airborne organisms – Droplet, Droplet nuclei and Infectious dust. (K1,K2)
- 3.4 Assessment of air quality. (K1,K2, K3)
- 3.5 Air sanitation. (K1,K2, K3)
- 3.6 Airborne diseases. (K1,K2)

### **UNIT IV: Food Microbiology (12 hours)**

- 4.1 Food Microbiology – An introduction. (K1,K2)
- 4.2 Food preservation techniques- asepsis, high temperature and low temperature. (K1,K2,K3)
- 4.3 Food preservation techniques – drying, radiation and food additives. (K1,K2, K3)
- 4.4 Microbial spoilage of food - vegetables and fruits, cereal and cereal products. (K1,K2)
- 4.5 Microbial spoilage of food – meat and meat products, milk and milk products. (K1,K2)
- 4.6 Food borne diseases. (K1,K2)

### **UNIT V: Fermentation and Industrial production. (12 hours)**

- 5.1 Fermentation- types of fermentation. (K1,K2)
- 5.2 Fermentor- structure and types. (K1,K2)
- 5.3 Industrial production – Antibiotic (Penicillin). (K1,K2)

5.4 Industrial production - alcohol (Ethanol). (K1,K2)

5.5 Industrial production - organic acid (acetic acid). (K1,K2)

5.6 Industrial production - Vitamin (B12). (K1,K2)

**ALLIED PRACTICAL**  
**UAMBC20 - ALLIED PRACTICAL: MICROBIOLOGY**

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM:</b> IV	UAMBC20	Allied Practical: Microbiology	Practical	Allied	2	2	100

**Course Objective:**

To provide hands on training in basic and applied Microbiological techniques.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Perform cleaning & sterilization of glasswares.

**CO2:** Analyze the concept of simple and differential staining method and Prepare basal media for the cultivation of bacteria.

**CO3:** Assess and enumerate microorganisms present in different environment.

**CO4:** Examine the quality of milk sample.

**CO5:** Demonstrate the morphology of algae and fungi.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

1. Cleaning of glasswares.
2. Sterilization of Glassware and culture media.
3. Microscopy- Bright field compound Microscope.
4. Preparation of bacterial smear and simple staining.
5. Grams staining Technique.
6. Hanging drop method for testing motility of bacteria.
7. Preparation of culture media – Nutrient agar, Nutrient broth, Agar slant.
8. Enumeration of microorganism in air by open plate count method.
9. Enumeration of bacteria from soil and water samples by standard plant count method.
10. Assessment of quality of milk by MBRT test.
11. Morphology of Fungi- Lacto phenol cotton blue wet mount preparation.
12. Observation of pond water for the presence of microorganism.

## NON-MAJOR ELECTIVE

(For B.Sc /B.C.A/B.Com/B.B.A- Semester V and Semester VI)

### UGMBA20 – NON MAJOR ELECTIVE: FOOD MICROBIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: V & VI	UGMBA20	Food Microbiology	Theory	Non Major Elective	3	2	100

#### Course Objective:

To provide in depth knowledge on the significance microorganisms associated with food.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the scope of food microbiology

**CO2:** Acquire knowledge on the role of microorganisms in food.

**CO3:** Prepare fermented dairy products and formulate the traditional Indian fermented products.

**CO4:** Communicate the significance of food borne diseases in association with public health.

**CO5:** Explain about the genetically modified plants which are commercially available and their applications.

CO2	H	M	H	M	L	M
CO3	H	H	H	L	M	H
CO4	H	L	H	L	L	M
CO5	H	L	H	L	L	M

H – HIGH (3), M – MODERATE (2), L – LOW (1)

## **COURSE SYLLABUS**

### **UNIT I: Food Microbiology and its scope. (9 hours)**

- 1.1 Food Microbiology- Definition, Scope of Food Microbiology. (K1,K2)
- 1.2 Importance of microbes in food Microbiology - Bacteria. (K1,K2)
- 1.3 Importance of microbes in food Microbiology – Yeast. (K1,K2)
- 1.4 Importance of microbes in food Microbiology – Mold. (K1,K2)
- 1.5 Probiotics- its health benefits. (K1,K2)
- 1.6 Single cell proteins - its health benefits. (K1,K2)

### **UNIT II: Fermented dairy products. (9 hours)**

- 2.1 Fermented dairy products: Yogurt and Dahi. (K1,K2)
- 2.2 Acidophilus milk. (K1,K2)
- 2.3 Koumiss. (K1,K2)
- 2.4 Kefir. (K1,K2)
- 2.5 Cheese- their production. (K1,K2)
- 2.6 Therapeutic values of Fermented milk. (K1,K2)

### **UNIT III: Traditional Indian fermented foods. (9 hours)**

- 3.1 Traditional Indian fermented foods - Idli / dosa. (K1,K2,K3)
- 3.2 Papad, bread. (K1,K2)
- 3.3 Soy sauce. (K1,K2)
- 3.4 Sauerkraut, pickle. (K1,K2, K3)
- 3.5 Edible mushroom – their health benefits. (K1,K2)
- 3.6 Mushroom recipies – indian and western. (K1,K2, K3)

### **UNIT IV: Food borne illness. (9 hours)**

- 4.1 Food-borne illness- An introduction. (K1,K2)
- 4.2 Food intoxication (Staphylococcus and Clostridium). (K1,K2)
- 4.3 Food infection- Bacterial. (K1,K2)
- 4.4 Food infection – Viral. (K1,K2)
- 4.5 Food infection - Parasitic. (K1,K2)
- 4.6 Prevention and control measures. (K1,K2, K3)

### **UNIT V: Genetically modified foods. (9 hours)**

- 5.1 Genetically modified foods: Indian BT egg plant. (K1,K2)
- 5.2 Golden Rice. (K1,K2)
- 5.3 Purple tomato - tearless onion. (K1,K2)
- 5.4 Rainbow cauliflower. (K1,K2)
- 5.5 Methionine enriched oil. (K1,K2)
- 5.6 Calgene FLAVR SAVR tomato. (K1,K2)

**TEXT BOOKS:**

## NON-MAJOR ELECTIVE

(For B.Sc /B.C.A/B.Com/B.B.A- Semester V and Semester VI)

### UGMBB20 – NON MAJOR ELECTIVE: WASTE WATER MICROBIOLOGY

Year III	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: V & VI	UGMBB20	Waste water Microbiology	Theory	Non Major Elective	3	2	100

#### Course Objective:

To provide in depth knowledge on the significance of waste water and on waste water and its treatment cum recycling methods.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Use the available technologies for physical, chemical and biological treatment of municipal water.

**CO2:** Demonstrate the microbiological analysis of potable water and brief out water borne diseases.

**CO3:** Outline bioremediation of pesticides, heavy metals and oil spills.

**CO4:** Explain the sewage treatment process.

**CO5:** Utilization of solid and liquid waste.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	L	H	L	L	H
CO2	H	M	H	M	L	M
CO3	H	H	H	L	M	H
CO4	H	L	H	L	L	M
CO5	H	L	H	L	L	M

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	L	M
CO2	H	M	H	L	M	M
CO3	H	M	H	L	H	H
CO4	H	H	H	L	M	H
CO5	H	M	H	L	M	M

**H – HIGH (3), M – MODERATE (2), L – LOW (1)**

## **COURSE SYLLABUS**

### **UNIT I: Microbiology of water and treatment of municipal water supplies. ( 9 hours)**

- 1.1 Microbiology of water. (K1,K2)
- 1.2 Types of water. (K1,K2)
- 1.3 Potability of water. (K1,K2)
- 1.4 Sources of drinking water. (K1,K2)
- 1.5 Treatment method of municipal water supplies – Sedimentation and filtration. (K1,K2)
- 1.6 Disinfection of water- chlorination. (K1,K2)

### **UNIT II: Detection of potability of water and water borne diseases. ( 9 hours)**

- 2.1 Indicators of faecal contamination. (K1, K2)
- 2.2 Methods to detect potability of water samples: Standard qualitative procedure: Most Probable Number test. (K1,K2, K3)
- 2.3 Membrane filtration technique. (K1,K2, K3)
- 2.4 Water-borne diseases- An overview. (K1,K2)
- 2.5 Bacterial, viral and Protozoal water borne diseases- their etiological agents and clinical symptoms. (K1,K2)
- 2.6 Prevention and control measures. (K1,K2, K3)

### **UNIT III: Water pollution. ( 9 hours)**

- 3.1 Water Pollution – Definition, sources of water pollution. (K1, K2)
- 3.2 Pollution of water bodies by heavy metals. (K1, K2)
- 3.3 Removal of heavy metals by biosorption. (K1, K2)
- 3.4 Removal of pesticides. (K1, K2)
- 3.5 Marine oil spill pollution. (K1, K2)
- 3.6 Removal of oil spills by using microorganisms. (K1, K2)

### **UNIT IV: Sewage treatment process. ( 9 hours)**

- 4.1 Characteristics of sewage and objectives in sewage treatment. (K1, K2)
- 4.2 Biological treatment of sewage: preliminary treatment. (K1, K2)
- 4.3 Secondary treatment - activated sludge process. (K1, K2)
- 4.3 Trickling filters. (K1, K2)
- 4.4 Anaerobic sludge digestion. (K1, K2)
- 4.5 Household waste water treatment. (K1, K2, K3)

**UNIT V: Utilization of solid and liquid waste. ( 9 hours)**

- 5.1 Utilization of solid and liquid waste: Industrial re-use of effluents. (K1, K2)
- 5.2 Municipal reuse of effluent. (K1, K2)
- 5.3 Agricultural reuse of effluent (crop irrigation). (K1, K2)
- 5.4 SCP production. (K1, K2)
- 5.5 Composting (fertilizer). (K1, K2)
- 5.6 Aquaculture. (K1, K2)

**TEXT BOOKS:**

# Department of Physics (UG)

## SYLLABUS AND REGULATIONS

Under

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*  
**Gandhi Nagar, Vellore-632 006**

**Department of Physics (UG)**  
**OUTCOME BASED EDUCATION - 2020**  
**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighbouring districts.

**B) NAME OF THE PROGRAMME: B.Sc. Physics**

**Vision:**

To prepare the students for quality physics education and equip them with skills for higher studies.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

Students who have completed their higher Secondary with Physics and Maths are eligible.

### D) List of Courses

Sem	Part	Paper Code	Title of the Paper	Hour s/ Week	Exam		Credits	Marks
					Th	Pr

### **E) Programme Objectives (PO)**

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

### **F) Programme Specific Outcomes (PSO)**

**PSO1:** Students are expected to acquire knowledge in physics, including the major premises of Properties of matter and sound, Thermal Physics, Classical and quantum mechanics, electricity and Magnetism, electronics, optics, Relativity and modern physics.

**PSO2:** Students are also expected to develop skills in Physics for competitive Examinations.

**PSO3:** Analyze physical problems and develop correct solutions using natural laws.

**PSO4:** Students will develop the proficiency in the skill of data using a variety of laboratory instruments.

**PSO5:** Students will realize and develop an understanding of the impact of physics and science on society.

**PSO6:** Prepare the student to successfully compete for employment and to offer a wide range of applications.

**SEMESTER – I**  
**UCPHA20 – Properties of Matter and Acoustics**

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> UCPHA20	<b>Title of the Course:</b> Properties of Matter and Acoustics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To give introduction to different properties of matter namely elasticity, mass, viscosity and surface tension.
2. To make the students to understand the concept of bending, uniform bending and non-uniform bending of the beam.
3. To understand the concept of ultrasonics and its applications.

**Course Outcomes (CO)**

1. The properties of solids especially knowledge of elasticity help the students to identify the materials suitable for the construction of buildings, houses etc.
2. Learn the basics of properties of matter, how Young's modulus and rigidity modulus are defines and how they are evaluated for different shapes of practical relevance.
3. Properties of fluids especially knowledge of viscosity and surface tension help the students in their daily life and agriculture
4. Study the behaviour of the progressive wave
5. Learn the fundamentals of harmonic oscillator model, including free, damped and forced oscillators.

**(Low - L, Medium – M, High - H)**

## Course Syllabus

### Unit I: Elasticity

(12 hours)

- 1.1 Stress-Strain - Types- Hooke's law - Basic ideas of elastic moduli - Young's modulus-Rigidity Modulus- Bulk Modulus (K1, K2)
- 1.2 Behaviour of a wire under progressive tension - Work done in stretching and Twisting a wire (K3)
- 1.3 Twisting couple on a cylinder (K3)
- 1.4 Determination of Rigidity modulus and moment of inertia using torsional pendulum (with and without mass) (K3, K4)
- 1.5 Determination of  $q$ ,  $n$ ,  $\sigma$  by Searle's method (K3, K4)
- 1.6 Compound pendulum, moment of inertia - determination of radius of gyration using graph method. (K3, K4)

### Unit II: Bending of Beams

(12 hours)

- 2.1 Bending of beams - Expression for bending moment (K1, K3)
- 2.2 Cantilever- Determination of Young's Modulus by cantilever oscillations (K2, K4)
- 2.3 Non-uniform bending- Determination of Young's Modulus by Koenig's method (K2, K3, K4)
- 2.4 Uniform bending- Expression for Elevation (K2, K3, K4)
- 2.5 Experiment to determine young's modulus using pin and microscope (K3, K4)
- 2.6 Expression of Poisson's ratio- Relationship between the three moduli of elasticity (K3, K4)

### Unit III: Surface Tension

(15 hours)

- 3.1 Definition and dimension of surface tension, Excess of pressure, Problems and its relation between curvatures (K1, K2, K3, K4)
- 3.2 Jaeger's method and variation of surface tension with temperature - Drop weight method (K1, K2, K3, K4)
- 3.3 **Viscosity:** Viscosity definition, stream line flow, turbulent flow- Reynold's number, Searle's Viscometer, Meyer's formula for the rate of flow of a gas through a capillary tube. (K1, K2, K3, K4).
- 3.4 Poissuille's formula, Comparison of Viscosity using Oswald's Viscometer Stoke's formula, determination of co-efficient of viscosity (K3, K4)
- 3.5 **Osmosis:** Osmosis and osmotic pressure, Laws of osmotic pressure - Determination of osmotic pressure by Berkeley and Hartley method (K3, K4)
- 3.6 Osmosis and vapor pressure of a solution, Osmosis and boiling point of a solution (K3, K4)

#### **Unit IV: Waves and Oscillations**

**(15 hours)**

- 4.1 Progressive wave – properties and characteristics of progressive wave (K1,K2)
- 4.2 Simple harmonic motion – Expression for free oscillations (K3)
- 4.3 Expression for Damped and Forced oscillations (K3, K4)
- 4.4 Expression for velocity of sound in a string - Determination of frequency of the vibrator in transverse and longitudinal mode using Melde's string (K2, K3, K4)
- 4.5 Determination of Specific gravity of solid and liquid by Melde's string (K3, K4)
- 4.6 Reverberation Time - Sabine's Formula (Derivation only) - Absorption coefficient Acoustic aspects of halls and auditorium (K2, K3)

#### **Unit 5: Ultrasonics**

**(15 hours)**

- 5.1 Introduction - characteristic properties of ultrasonic waves (K1,K2)
- 5.2 Stationary waves and resonance (Half wave length and quarter wave length resonance) Attenuation and Sources of ultra sound (K2,K3)
- 5.3 Piezoelectric method and Magnetostriction Method (K3,K4)
- 5.4 Low frequency/high intensity applications (Welding, Echo Sounder, sensor for temperature and pressure) (K3,K4)
- 5.5 High frequency/ low intensity applications (NDT, Holography) (K3,K4)
- 5.6 Different types of scans and its clinical Applications (Obstetrics, Examination of heart) SONAR (K3,K4)

#### **Books for Study:**

1. Murugesan. R.S. - Properties of Matter, 1<sup>st</sup> Edition- Chand & Co.Pvt Ltd., NewDelhi, Reprint 2005.
2. D. S. Mathur - Elements of Properties of Matter, 1<sup>st</sup> Edition - Shyamala CharitableTrust, New Delhi, 2005.
3. Brijilal & Subramaniam N. - Properties of Matter, 1<sup>st</sup> Edition - Vikas PublicationHouse, New Delhi, 2001.
4. Brijilal & Subramaniam N – Textbook of Sound, 1<sup>st</sup> Edition - Vikas PublicationHouse, New Delhi, 2005.
5. M. N. Srinivasan - Textbook of Sound – Himalayan Publication, 1991.
6. Brijilal & Subramaniam N - Waves and Oscillations - Vikas Publication House, New Delhi,1994.

#### **Reference Books:**

1. K. Halliday, R. Resnick and K.S. Krane and J. Walker - Fundamentals of Physics, 6<sup>th</sup> Edition - Wiley, N.Y., 2001.
2. R. P .Feymann, R.B., Leighton and M. Sands - The Feynmann Lectures on Physics, Vol 1,2 and 3-Narosa, New Delhi,1998,Vol.1,1<sup>st</sup> Edition, 1998, Vol 2. 2<sup>nd</sup> Edition, 1998, Vol.3.3<sup>rd</sup> Edition, 2001.

3. Arora C.L - Mechanics and Properties of Matter, 1<sup>st</sup> Edition - Chand & Co. Pvt. Ltd., New Delhi, 1999.

**SEMESTER – II**  
**UCPHB20 – THERMAL PHYSICS AND STATISTICAL MECHANICS**

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> UCPHB20	<b>Title of the Course:</b> Thermal Physics and Statistical Mechanics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the law of thermodynamics and their applications.
2. To acquire knowledge about classical and quantum theory of radiation.
3. To understand the basic of statistical mechanics.

**Course Outcomes (CO)**

The learners will be able to

1. Become familiar with various thermodynamic process and work done in each of these processes.
2. Have a clear understanding about Reversible and irreversible process
3. Learn the working of a Carnot engine, and knowledge of calculating change in entropy for various processes.
4. Realize the importance of Thermo dynamical functions and applications of Maxwell's relations.
5. Learn the relation between the entropy and probability.

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I: Thermal Conduction and Radiation**

**(16 hours)**

- 1.1 Coefficient of Thermal Conductivity - Thermal Diffusivity (K1, K2)
- 1.2 Rectilinear Flow of Heat along a Bar - Forbe's method - Lee's Disc Method (K3,K4)
- 1.3 Relation between Thermal and Electrical Conductivities - Wiedemann - Franz Law and Stefan's Law (K1,K2)
- 1.4 Derivation of Newton's Law of Cooling from Stefan's Law and Laboratory determination of Stefan's Constant (K3, K4)
- 1.5 Planck's Quantum Theory of Radiation-Deduction of Wien's Law and Raleigh-Jeans Law from Planck's Law (K1,K3,K4)
- 1.6 Solar Constants - Temperature of the Sun - Solar Spectrum (K2)

### **Unit II: Thermodynamics – I**

**(14 hours)**

- 2.1 Introduction – Thermodynamic system- Zeroth Law of Thermodynamics Quasistatic process (K1, K2)
- 2.2 Statement of First Law of Thermodynamics - Statement of Second Law (K1, K2)
- 2.3 Heat Engines and Ideal Heat Engine - Concept of Entropy-Entropy of an Ideal Gas Reversible and Irreversible Process and their entropy (K2,K3)
- 2.4 Carnot Theorem and Proof of Carnot Theorem (K2, K3,K4)
- 2.5 Construction and working of Internal Combustion Engine - Petrol and Diesel Engines(K3, K4)
- 2.6 First Latent Heat Equation – Clausis-Clapeyron equation and Second Latent Heat Equation (K4)

### **Unit III: Thermodynamics – II**

**(15 hours)**

- 3.1 Thermodynamic Scale of Temperature or Work Scale of Temperature and its Relation to Perfect Gas Scale (K4)
- 3.2 Entropy Temperature Diagram (K3)
- 3.3 Maxwell's Thermodynamic Equations and its Applications (K4)
- 3.4 Thermodynamic Potentials - Free Energy – Enthalpy - Internal energy – Helmholtz free energy – Significance of thermodynamic potentials (K1,K2)
- 3.5 Gibbs function - Gibb's Helmholtz Equation - Third Law of Thermodynamics (K1,K3)
- 3.6 Phase transition expression for the first order and second order transition (K3, K4)

### **Unit IV: Low Temperature Physics**

**(15 hours)**

- 4.1 Introduction – Production of low temperature – Joule Thomson effect-Joule Kelvin Effect (Temperature of inversion) (K3)
- 4.2 Kammerling Onne's Method - Liquefaction of Hydrogen- Liquefaction of Helium(K3)

- 4.3 Helium I and II - Lambda Point, Viscosity- thermal conductivity- Rolling films (K3,K4)
- 4.4 Production of low temperature - adiabatic demagnetization
- 4.5 Practical applications of Low Temperature (K3)
- 4.6 Refrigerators - Air Conditioning Machines (K3, K4)

#### **Unit V: Statistical Mechanics**

**(15hours)**

- 5.1 Definition of Phase-Space - Micro and Macro States (K1, K2)
- 5.2 Different types of Ensembles - Definition and relation between entropy and Probability (K1)
- 5.3 Expression for Maxwell Boltzmann Statistics (K4)
- 5.4 Maxwell's law of Distribution energy (K3)
- 5.5 Expression for Fermi Dirac Statistics (K3, K4)
- 5.6 Derivation for Bose Einstein Statistics - Comparison of Three Statistics (K3,K4)

#### **Books for Study:**

1. Brijilal and Subrahmanyam S. - Heat and Thermodynamics – Chand & Co., New Delhi, Reprint 1998.
2. D.S. Mathur - Heat and Thermodynamics - Sultan Chand & Sons, New Delhi, V Edition, 2005
3. Arora. C.L. – A Textbook of Heat and Thermodynamics - Chand & Co., New Delhi, Reprint 1998.
4. Dr. D. Jayaraman and Dr.K.Ilangovan – Thermal Physics and Statistical Mechanics- S. Viswanathan publishers 2016.

#### **Books for Reference:**

1. A.B.Gupta and H.Roy – Thermal Physics – Books and Allied Pvt. Ltd., Reprint 2005
2. D.Halliday, R.Resnick and J.Walker – Fundamental of Physics, 6<sup>th</sup> Edition - Wiley N.Y., 2001
3. Roy - Thermal and Statistical Physics – S Chand & Co.,2001
4. R.Murugesan – Thermal Physics – S.Chand& Co. Publication, Reprint 2004

**SEMESTER – III**  
**UCPHD20 – Mathematical Methods and Classical Mechanics**

<b>Year:</b> II	<b>Course Code:</b> UCPHD20	<b>Title of the Course:</b> Mathematical Methods and Classical Mechanics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

1. To introduce the students the basic methods of applied mathematics to solve the physical problems that arises in conventional physics such as electricity and magnetism, classical and quantum mechanics and spectroscopy.
2. To make the students acquire the mathematical skills in solving the basic numerical problems.
3. To demonstrate knowledge and understanding of following fundamental concepts in dynamics of system of particle, motion of rigid body.
4. To represent the equations of motion for complicated mechanical systems using the Lagrangian and Hamiltonian formulations of classical mechanics.

**Course Outcomes (CO)**

The learners will be able to

1. Learn about gradients, divergence and curl in orthogonal curvilinear and their typical applications in physics
2. Learn about special type of matrices that are relevant in physics and get introduced to special functions like gamma function, beta function, delta function, dirac delta function, Bessel functions and their recurrence relations
3. Analyse statistical data using measures of central tendency, dispersion. Learn the methods of skewness like Karl-Pearson coefficient, Bowleys coefficient
4. Learn about the mechanics of moving particles and the constraints. The measure of position of moving particle and the parameters required to describe the state of system. Lagrange's equation deals with position, momentum and total energy of system in motion
5. Learn about Hamiltonian functions and differences between Lagrangian and Hamiltonian. It deals with various physical applications

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Vector algebra and Matrices

(14 hours)

- 1.1 Gradient of a scalar field – Physical Interpretation - Line, surface and volume integrals (K1, K2)
- 1.2 Divergence and curl of vector function and its physical significance (K3, K4)
- 1.3 Gauss divergence theorem - Application of vector to hydrodynamics- heat flow in solids- gravitation and electromagnetic field(K4)
- 1.4 Introduction to matrices - Review of algebraic operations of matrices - Properties of matrix multiplication (K3)
- 1.5 Eigen value - Eigen vectors(K4)
- 1.6 Characteristics equation of matrix – Cayley Hamilton’s theorem - Diagonalization of matrices(K4)

### Unit II: Special function

(14 hours)

- 2.1 Beta function - Symmetry property of beta function– Evaluation of beta function (K1, K2, K3)
- 2.2 Gamma function - Evaluation of gamma function (K1, K2, K3)
- 2.3 Legendre’s differential equation and Legendre’s functions (K4)
- 2.4 Generating functions of Legendre’s polynomial (K2)
- 2.5 Orthogonal properties of Legendre’s polynomials - Recurrence formulae (K4)
- 2.6 Recurrence formulae - Bessel’s differential equation(K4)

### Unit III: Statistics

(14 hours)

- 3.1 Introduction to statistics - Measures of central tendency (K1, K2)
- 3.2 Measure of arithmetic mean, median, mode (K1, K3)
- 3.3 Measure of dispersion, Range, Quartile deviation, mean deviation and standard deviation (K2, K3, K4)
- 3.4 Measure of skewness - Karl Pearson’s coefficient of skewness (K4)
- 3.5 Bowley’s coefficient of skewness (K4)
- 3.6 Distribution models - binomial, Poisson and normal distribution (K4)

**Unit IV: Classical Mechanics I****(14 hours)**

- 4.1 Mechanics for a system of particles - constraints – Holonomic and non-Holonomic constraints(K1)
- 4.2 Degrees of freedom - Generalized coordinates (K2)
- 4.3 Principle of virtual work(K1, K2)
- 4.4 D'Alembert principle - Lagrange's equation from D'Alembert principle- Lagrange's equation for system containing dissipative forces (K3, K4)
- 4.5 Applications of Lagrange's equation –Spherical pendulum - simple pendulum, - compound pendulum (K4)
- 4.6 Central force - Equation of motion and first integrals (K4)

**Unit V: Classical Mechanics II****(14 hours)**

- 5.1 Phase –Space (K1)
- 5.2 Hamiltonian function – Hamilton's equation – Physical significance of Hamiltonian function (K2, K3)
- 5.3 Applications of Hamiltonian equations – Simple pendulum, compound Pendulum (K4)
- 5.4 Poisson's bracket - Properties of Poisson's bracket (K3,K4)
- 5.5 Relation between Lagrange and Poisson bracket (K4)
- 5.6 Application of Lagrangian and Hamiltonian for a charged particle (K4)

**Books for Study:**

1. Sathya Prakash - Mathematical Physics – S.Chand & Sons, Reprint 2006.
2. P.N. Arora, Sumeet Arora – Comprehensive Statistical Methods – S. Chand Publication, 2012.
3. Guptha Kumar - Classical Mechanics – Pragathi Prakashan, 2008.
4. J Medhi - Statistical Methods: An Introductory Text - New age International Publications, 2013.
5. N G Das – Statistical Methods- McGraw-Hill Companies, 2018.

**Reference Books:**

1. B.D.Gupta – Mathematical Physics, 3<sup>rd</sup> Edition – Vikas Publishing House Pvt. Ltd., 2007.
2. B.S.Rajput – Mathematical Physics – Pragati Prakashan Publication, 2005.
3. H.K.Dass – Mathematical Physics - S.Chand and Co. Ltd., 2007.
4. Herbert Goldstein – Classical mechanics – Narosa Publications, 2001.
5. H.K.Dass -Statistical mechanics - S.Chand and Co. Ltd., 2014.

**SEMESTER – IV**  
**UCPHE20 – Optics**

<b>Year:</b> II	<b>Course Code:</b> UCPHE20	<b>Title of the Course:</b> OPTICS	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> IV							

**Course Objectives**

1. Students understand the dual nature of light through the different branches of optics like Geometrical optics and Physical optics.
2. To teach them the aberration in lenses in optical instruments.
3. To teach the basic concepts and working of interference, diffraction and polarization.
4. To explain the students about important application of interference, diffraction and polarization.

**Course Outcomes (CO)**

1. To make the students understand different types of lenses and the aberrations in it
2. Learn about dispersion by thin prism and dispersion without deviation; deviation without dispersion of prism
3. Study about interference and various interferometers used for the applications like wavelength and resolution determination and refractive index of gases
4. Learn about the concept of diffraction. Its types Fresnel's and Fraunhofer diffraction experiments and applications
5. Study about polarization, its experiments Laurent's half shade polarimetry and applications

CO5	H	M	L	M	H	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I: Geometrical Optics (14 hours)**

- 1.1 Lens and its types (K1)
- 1.2 Optic center of the lens - Principal foci and Principal points - Thick lens formula(K1,K2)
- 1.3 Power of thick lens - Defects in lenses - various defects and its minimizing method (K2, K3)
- 1.4 Method of minimizing spherical aberration - contact method and out of contact method – Chromatic aberration in lenses (K3)
- 1.5 Conditions for achromatic aberration of two thin lenses in contact and out of contact(K3 , K4)
- 1.6 Basic ideas of eyepiece - Ramsden's and Huygen's eyepiece and comparison(K4)

### **Unit II: Dispersion (14 hours)**

- 2.1 Dispersion - Prism - Explanation of VIBGYOR- application (K1)
- 2.2 Dispersion produced by a thin prism - angular dispersion (K1, K2)
- 2.3 Dispersive power of a prism - resolving power of a prism (K2, K3)
- 2.4 Combination of prisms to produce - dispersion without deviation and deviation without dispersion (K3)
- 2.5 Achromatic prism - Direct vision spectroscope-constant deviation spectrometer (K3,K4)
- 2.6 Determination of refractive index of the material of small angled prism (K4)

### **Unit III: Interference (14 hours)**

- 3.1 Interference - condition for interference - theory of interference in reflected system (K1, K2)
- 3.2 Interference in thin films- Thin films - air wedge - Determination of diameter of a thin wire by air wedge method - test for optical flatness (K2, K3)
- 3.3 Newton's rings- Determination of refractive index of a liquid (K4)
- 3.4 Michelson's interferometer - theory - application - determination of wavelength and resolution of spectral lines (K4)
- 3.5 Refractive index of gases - Jamin's and Rayleigh's interferometer - Fabry - Perot interferometer (K3, K4)
- 3.6 Holography – Principle - construction and reconstruction –application(K1, K3, K4)

#### **Unit IV: Diffraction**

**(14 hours)**

- 4.1 **Diffraction:** Fresnel's Diffraction (K1)
- 4.2 Fresnel's ideas of wave fronts - Fresnel's explanation of rectilinear propagation of light - half period zones (K1, K2, K3)
- 4.3 Comparison of half period one and convex lens - Diffraction at a circular aperture, straight edge (K2, K3)
- 4.4 **Fraunhofer diffraction:** Fraunhofer diffraction at single slits and double slits - theory of plane diffraction grating - determination of wavelength using grating (K3, K4)
- 4.5 Dispersive power of a grating - absent spectra - overlapping spectra - resolving power of a grating (K2, K3)
- 4.6 Difference between prism and grating - difference between Fresnel and Fraunhofer diffraction(K3, K4)

#### **Unit V: Polarization**

**(14 hours)**

- 5.1 Polarisation - Double refraction by Huygens explanation of double refraction in uniaxial crystals (K1, K2)
- 5.2 Nicol prism as a polarizer and analyser (K3, K4)
- 5.3 Quarter and half wave plates - production and detection of a plane- circularly and elliptically polarized light (K4)
- 5.4 Optical activity - Fresnel's explanation - experimental verification(K3)
- 5.5 Specific rotatory power - determination of specific rotatory power by Laurent's half shade polarimeter (K3)
- 5.6 Kerr effect and Faraday Effect -LCDs (K3, K4)

#### **Books for Study:**

1. Subramanyam, Brijlal – A Text of Optics – S.Chand & Co. Ltd., 2006.
2. Murugesan R – Optics and Spectroscopy - S.Chand & Co. Ltd., 2005.

#### **Reference Books:**

1. Khanna D.R, Gulati H.R. - Optics - S.Chand and Co. Ltd., Reprint 2002.
2. Raj M.G. - Fundamentals of Optics – Anmol Publications Ltd., New Delhi, 1996.
3. C.L.Arora – Optics, 1<sup>st</sup> Edition - S.Chand and Co. Ltd., New Delhi, 1999.
4. Eugene Hecht - Optics, 4<sup>th</sup> Reprint – Pearson Education Publication, 2004.

**SEMESTER – V**  
**UCPHG20 – Electricity and Magnetism**

<b>Year:</b> III	<b>Course Code:</b> UCPHG20	<b>Title of the Course:</b> Electricity and Magnetism	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

**Course Objectives**

1. To make the students understand the principles and theory of electrostatics, current electricity, thermo electricity, electromagnetism and alternating current.
2. To familiarize the students with different kinds of magnetism such as para, dia, Ferro and anti-ferro magnetism and the various theories of magnetism.

**Course Outcomes (CO)**

The learners will be able to

1. Solve mathematical problems involving electric and magnetic forces, fields, and various electro-magnetic devices and electric circuits.
2. Develop explicit problem-solving strategies that emphasize qualitative analysis steps to describe and clarify the problem.
3. Import knowledge of Transient current, Alternate current
4. To present a clear & consistent picture of the Ballistic galvanometer, Figure of merit, Capacitances, Emf of cells
5. Gain confidence in their ability to apply mathematical methods to understand electromagnetic problems to real-life situations

## Course Syllabus

### Unit I: Electrostatics

(16 hours)

- 1.1 Coulomb's law – Permittivity of free space – Relative permittivity (K1,K2)
- 1.2 Gauss Law – statement – proof of Gauss' law – differential form of Gausslaw (K1,K2,K3)
- 1.3 Applications of Gauss Law – Electric field due to a uniformly charged sphere (K3,K4)
- 1.4 Electric Potential – electric potential as line integral of electric field – Relation between electric potential and electric field (K1,K2,K3)
- 1.5 Potential due to a uniformly charged conducting sphere (K1,K2,K3)
- 1.6 Electric dipole – dipole moment – Electric Potential and Electric field due to a dipole Poisson's and Laplace's equations. (K1,K2,K3,K4)

### Unit II: Capacitors & Thermoelectricity

(15 hours)

- 2.1 Capacitance – Definition - Principle – Energy of a charged capacitor (K1,K2)
- 2.2 Loss of energy on sharing of charges – Force of attraction between the plates of a charged capacitor (K3,K4)
- 2.3 Electrometers - construction and working of Quadrant electrometer - Theory of quadrant electrometer – Heterostatic and Idiostatic uses (K1,K2,K3,K4)
- 2.4 Thermoelectricity – Seebeck effect - Peltier Effect – Thomson effect - Expression for Peltier and Thomson co- efficiencies (K1,K2,K3,K4)
- 2.5 Thermodynamics of thermocouple - Thermo-electric diagrams and its uses (K1,K2,K3,K4)
- 2.6 Potentiometer – principle - Emf of thermocouple using Potentiometer. (K1,K2,K3,K4)

### Unit III: DC and AC circuits

(15 hours)

- 3.1 Transient current (DC) – Growth and decay of current in a circuit containing inductance and resistance (LR) – time constant (K2,K3,K4)
- 3.2 Growth and decay of charge in a circuit containing capacitance and resistance (CR) – time constant - Determination of high resistance by leakage (K3,K4)
- 3.3 Growth and decay of charge in LCR circuit – Conditions for oscillations (K3,K4)
- 3.4 Alternating current – Peak, average and RMS values of AC voltage (K1,K2,K3,K4)
- 3.5 AC circuit containing Resistance, inductance and Capacitance (series resonant circuit) resonant frequency (K2,K3,K4)
- 3.6 Power in AC circuit. (K1,K2)

### Unit IV: Electromagnetism

(14 hours)

- 4.1 Biot and Savart's law (Vector treatment) (K3)
- 4.2 Magnetic induction due to a circular coil carrying current – Force on a current carrying conductor placed in a uniform magnetic field (K3,K4)
- 4.3 Moving coil Ballistic Galvanometer – Construction and theory – Damping correction

- Conditions for dead beat – conditions for ballistic (K1,K2,K3,K4)
- 4.4 Current and voltage sensitivities of moving coil galvanometer - Experimental method for figure of merit (K1,K2,K3,K4)
- 4.5 Absolute capacity of a capacitor – Comparison of capacitances - Comparison of EMFs of cells (K1,K2,K3,K4)
- 4.6 Self-inductance and Mutual inductance - self inductance of a long solenoid – mutual inductance of co-axial solenoids – Eddy current and its uses. (K1,K2,K3,K4)

### **Unit V: Magnetism**

**(15 hours)**

- 5.1 Magnetic Induction (B) – Magnetization (M) – Magnetic susceptibility - Permeability (K1,K2)
- 5.2 Relation between B, H and M (K3)
- 5.3 Hysteresis – Hysteresis curve - Experiment to draw M-H curve (hysteresis – horizontal model) (K3,K4)
- 5.4 Importance of hysteresis curves – choice of magnetic materials - Ferrites- Properties of dia, para and ferro magnetic materials (K1,K2,K3,K4)
- 5.5 Langevin's theory of dia and para magnetism (K4)
- 5.6 Weiss theory of ferro magnetism. (K3,K4)

### **Books for Study:**

1. R.Murugesan – Electricity and Magnetism – S.Chand & Co. Ltd., New Delhi, 2009.
2. D.N. Vasudeva – Electricity and Magnetism – S.Chand & Co. Ltd., New Delhi, 2009.

### **Books for Reference:**

1. David J.Criffitts – Introduction to Electro Dynamics – Prentice Hall of India Pvt. Ltd., New Delhi 2002.
2. Duggal B.D. and Chabra C.L – Fundamentals of Electricity and Magnetism Shoban Lal Nagin. Chand & Co. Jallundui, Delhi, 1997.
3. Halliday D., R.Resnich and J.Walker – Fundamentals of Physics, 6<sup>th</sup> Edition – WileyNew York, 2001.
4. Tayal D.C. - Electricity and Magnetism – Himalayan Publishing House, Bangalore, 1999.
5. Tewari K.K. – Electricity and Magnetism – S.Chand& Co. Ltd., New Delhi, 2001.

**SEMESTER – V**  
**UCPHH20 – Atomic Physics and Spectroscopy**

<b>Year:</b> III	<b>Course Code:</b> UCPHH20	<b>Title of the Course:</b> Atomic Physics And Spectroscopy	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide the students with basic ideas of properties of atoms and ions when subjected to Electric and magnetic fields.
2. To make the students to acquire the knowledge about the salient features of vector atom model and to explain the fine structure of spectral lines.
3. To provide a brief understanding of the principles of Spectroscopy.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the observed dependence of atomic spectral lines on externally applied electric and magnetic fields.
2. Analyse the types of photo electric cells.
3. Realize the theories explaining the structure of atoms and the origin of the observed spectra.
4. Identify the atomic effect such as Zeeman Effect and its types
5. List the different types of atomic spectra

## Course Syllabus

### Unit I: Positive Ray Analysis (14 hours)

- 1.1 Overview of Positive Ray Analysis and its properties (K1,K2)
- 1.2 Determine the value of  $e/m$  using Thomson's parabola method (K3,K4)
- 1.3 Aston's mass spectrograph(K4)
- 1.4 Dempster's mass spectrograph(K3)
- 1.5 Critical potentials (ionization and excitation potential) (K1,K2)
- 1.6 Experimental determination of critical potentials-Frank and Hertz experiment-Davis and Goucher's experiment. (K1,K2,K3,K4)

### Unit II: Photo Electric Effect (14 hours)

- 2.1 Photo electric emission and laws (K1,K2)
- 2.2 Determination of  $e/m$  using Lenard's experiment(K3,K4)
- 2.3 Richardson and Compton experiment(K3,K4)
- 2.4 Einstein's photoelectric equation – Experimental Verification of Einstein's photoelectric equation by Millikan's experiment (K3,K4)
- 2.5 Photoelectric cells-photo-emissive cell - photo-voltaic cell - photoconductive cell- (K3,K4)
- 2.6 Applications of photo electric cell – Photo multiplier tube (K2,K3)

### Unit III: Vector Atom Model (15 hours)

- 3.1 Vector Atom Model-Spatial Quantization – Electron spin (K1,K2,K3)
- 3.2 Quantum numbers of electrons (K1,K2,K3)
- 3.3 Coupling scheme -L-S and j-j Couplings (K2,K3)
- 3.4 Pauli's Exclusion Principle and Electronic configuration of elements and periodic classification (K4)
- 3.5 Magnetic dipole moment of electron due to orbital and spin motion- Bohr magneton (K2,K4)
- 3.6 Stern and Gerlach experiment - Spin Orbit Coupling (K2,K4)

### Unit IV: Fine Structure of Spectral Lines (16 hours)

- 4.1 Overview of Spectral terms and notations, Selection rules, Intensity rule and interval rule ((K1,K2,K3)
- 4.2 Fine structure of Sodium D lines (K3)
- 4.3 Spectrum of Helium (K3)
- 4.4 Zeeman effect (experimental arrangement for the normal Zeeman effect (K2,K3)
- 4.5 Larmor's theorem(K2,K3)
- 4.6 Debye's explanation of normal Zeeman effect-Anomalous Zeeman effect- Theoretical explanation-Lande's  $g$  factor and explanation of splitting of D1 and D2 lines of sodium – Coalescence of spectral lines. (K1,K2,K3,K4)

**Unit V: Spectroscopy (K1 to K4)****(16 hours)**

- 5.1 Electromagnetic spectrum - Laws of Absorption Spectrum (K1,K2,K3)
- 5.2 UV rays -Sources of UV –detection –IR rays- Sources – Detection (K1,K2,K3)
- 5.3 Double Beam Spectrophotometer (K3)
- 5.4 Scattering of light - Rayleigh’s scattering(K2)
- 5.5 Raman effect-Experimental study of Raman effect-Quantum theory of Raman effect (K2,K3,K4)
- 5.6 Comparison of Raman and IR Spectra (K2)

**Books for Study:**

1. N.Brijial & N.Subrahmanyam-Atomic and nuclear physics-S. Chand & Co. Publication, New Delhi, 2005.
2. R.Murugesan Kiruthiga sivaprasanth-Modern Physics-S.Chand-First edition 2007.
3. S.N.Ghoshal-Atomic Physics-S.Chand&Co.Publication New Delhi,2006.
4. B.K.Sharma-Spectroscopy-GOEL publishing House-20th Edition,2007.
5. O.D.Tyagi and M.Yadav-A Text book of Spectroscopy-Anmol Publications,1996.

**Books for Reference:**

1. Atomic and molecular physics - C.L.Arora- S.Chand & Co.Publication, New Delhi.
2. Atomic and molecular physics-Raj Kumar-Campus Books International First edition 2003.
3. Text book of Atomic Physics-D.K.Jha-Discovery Publishing house, New Delhi,2004.
4. Gurdeep Chatwal and Sham Anand-Spectroscopy-Himalaya Publishing House, 2009.

**SEMESTER – V**  
**UCPHH20 – Basic Electronics**

<b>Year:</b> III	<b>Course Code:</b> UCPHI20	<b>Title of the Course:</b> BASIC ELECTRONICS	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

**Course Objectives**

1. To give knowledge of some basic electronic components and circuits.
2. To acquire the knowledge about the characteristics and working principles of semiconductor diodes, transistors, FET, UJT and SCR.
3. Analysis the working of semiconductor circuits such as rectifiers, Amplifiers, oscillators, and multivibrators.

**Course Outcomes (CO)**

1. Learn the basic role of semiconductor and its working principle.
2. Identify and explain the various current components in a transistor.

3. Have a clear understanding about different types of oscillators and its working functions.
4. Analysis the I-V characteristic of semiconductor diodes, transistors, FET, UJT and SCR.
5. Realize the importance of special device and its applications.

## Course Syllabus

### Unit I: Semiconductor Devices and Rectifiers

(14 hours)

- 1.1 Semiconductors -P-type and N-type- PN junction diode (K1,K2,K3)
- 1.2 V-I characteristics -PN junction diode (K4)
- 1.3 Zener diode -Zener diode as a voltage regulator (K1, K2,K4)
- 1.4 Half wave and full wave rectifiers -theory of full wave rectifier- Bridge rectifiers-expression for efficiency and ripple factor for half wave and full wave rectifiers (K1, K2, K3, K4)
- 1.5 Filters-Types of filter circuits -Action of filter circuits - $\pi$  section filter (K1,K2,K3, K4)
- 1.6 Diode voltage doubler- Diode voltage multiplier -Clipping and Clamping (K1,K2,K3, K4)

### Unit II: Transistors and Amplifiers

(14 hours)

- 2.1 Junction transistors- CB, CE modes configuration (K1, K3)
- 2.2 Relationship between  $\alpha$ ,  $\beta$  of a transistor (K4)
- 2.3 Transistor amplifier- Methods of transistor biasing -voltage divider Method (K1,K2,K3, K4)
- 2.4 Two-port representation of a transistor -h-parameters -AC equivalent circuit of a transistor amplifier (common emitter only), expressions for current gain, voltage gain, input, impedance, output admittance and power gain (K1, K2,K3,K4)

- 2.5 RC coupled amplifier -Frequency response curve (K3,K4).
- 2.6 Power amplifiers- Classification of amplifiers-class A power amplifier- Push -pull amplifiers, class B power amplifier-Emitter follower (K3,K4).

### **Unit III : Oscillators**

**(14 hours)**

- 3.1 Feedback in amplifier-Positive and negative Feedback-Advantages of negative feedback (K2, K3)
- 3.2 Oscillators -Oscillations in tank circuit (K1, K2)
- 3.3 Barkhausen Criterion (K3, K4)
- 3.4 Hartley and Colpitts oscillators(K3, K4)
- 3.5 Phase shift and Wien Bridge oscillators (K3,K4)
- 3.6 Expressions for the frequency of oscillation and conditions for oscillations in hparameters(K4)

### **Unit IV: Special devices**

**(14 hours)**

- 4.1 Field effect transistor –JFET– construction and working – Output characteristics (K1, K3, K4)
- 4.2 Difference between FET and bipolar transistor(K2)
- 4.3 Parameters of JFET (K3)
- 4.4 Description and working of MOSFET- Depletion and Enhancement type MOSFETS (K3, K4)
- 4.5 Construction, working and V-I-characteristics UJT (K3, K4)
- 4.6 Construction, working and V-I characteristics of Silicon controlled rectifier (K3,K4).

### **Unit V: OP-AMP and Multivibrators**

**(12 hours)**

- 5.1 Differential amplifier - differential gain (K3,K4)
- 5.2 Common mode rejection ratio (CMRR) (K3,K4).
- 5.3 Operational amplifiers- characteristics of an ideal OP-AMP (K3,K4)
- 5.4 Expression for voltage gain, inverting and non-inverting amplifier (K3,K4)
- 5.5 Voltage follower, Summer, Differentiator, Integrator (K2,K3,K4)
- 5.6 Multivibrators, astable, monostable and Bistable multivibrator using transistors and op-amp (K3,K4)

### **Books for Study:**

1. Mehta V.K. – Principles of Electronics, 6<sup>th</sup> Edition – S.Chand& Co. Ltd., 2003.
2. Badge M.K. Singh S.P. – Elements of Electronics - S.Chand& Co. Ltd., 2002.
3. Subramanyam .A - Applied Electronics – The National Publishing Company, 2006.

### **Books for Reference:**

1. Theraja B.L. Basic Electronics – S.Chand and Co. Pvt. Ltd., 2000.
2. Chattopadhyaya – Foundation of Electronics – New Age International Pvt. Ltd., Publishers, New Delhi, 1999.

3. Gupta and Kumar – Hand Books of Electronics, 24<sup>th</sup> Revised Edition – Pragathi Prakasham, 1998.
4. Theodre F.Bogart – Electric Circuit, 2<sup>nd</sup> Edition – Glenco Pvt.Ltd., 1996.
5. Puri & Chand – Handbook of Electronics – Anmol Publication, Reprint, 1996.
6. Albert Paul Nalvino – Principles of Electronics, 6<sup>th</sup> Edition - Tata McGraw Hill Publications Co., 1999.
7. Sedha R.S. – Applied Electronics - S.Chand and Co. Pvt. Ltd., 2019.

### SEMESTER – V

#### UEPHA20 – Elective IA: Digital Electronics and Communication

<b>Year:</b> III	<b>Course Code:</b> UEPHA20	<b>Title of the Course:</b> Elective IA: Digital Electronics and Communication	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

#### Course Objectives

1. To analyze logic processes and implement logical operations using logic circuits.
2. To understand the design and operation of arithmetic circuits, logic families, flip flop and counters.
3. To analyze different parameters of analog communication techniques.
4. To introduce students the concept and theory of signals and systems needed in electronics and telecommunication fields

#### Course Outcomes (CO)

The learners will be able to

1. Learn the fundamental operation of logic circuit.
2. Express the basic design and operation of arithmetic circuits.
3. Convert different type of codes and number systems which are used in digital communication system.
4. To introduce students to the basic idea of signal, modulation and demodulation techniques of analog communication.
5. To understand the concept, working principle, block diagram and key applications of AM and FM transmitting & receiving system.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Boolean algebra and Logic gates

(12 hours)

- 1.1 Decimal and binary systems -Decimal to binary and binary to decimal conversion (K1,K2)
- 1.2 Boolean operations, logic expressions, rules and laws of Boolean algebra (K4)
- 1.3 DeMorgan's theorems -Simplification of Boolean expressions using Boolean algebra Techniques (K1, K2,K4)
- 1.4 Fundamental products-Sum of products - Karnaugh map- pair, quads and octet (K3)
- 1.5 AND gate - OR gate - NOT gate - NAND gate - NOR gate (K2, K4)
- 1.6 EX – OR and EX – NOR gates – NAND and NOR as universal gates (K2, K4)

### Unit II: Arithmetic Circuits and Logic Families

(12 hours)

- 2.1 Introduction of Arithmetic circuits (K1)
- 2.2 Adders- Half Adder - Full Adder (K2,K3)
- 2.3 Subtractor - Half Subtractor (K2,K3)
- 2.4 Parallel binary adders- BCD adder (K3,K4)
- 2.5 Multiplexers and De-Multiplexers with suitable example (K3, K4)
- 2.6 Digital logic family- RTL NOR gate-DTL NAND gate- TTL NAND gate - Characteristics of TTL family(K3, K4)

### Unit III: Flip Flop and Counters, D/A Conversion & A/D Conversion

(13 hours)

- 3.1 RS flip flop -clock pulses- clocked RS flip flop- Preset and clear, JK flip flop- Race around condition- JK Master slave flip flop- D flip flop- T flip flop(K2,K3)
- 3.2 Asynchronous counter-3 bit binary counter - Mod 7 counter (K2, K3)
- 3.3 Operation of synchronous counters- mod8 parallel counter (K3, K4)
- 3.4 Combination counter-Decade counter (K3, K4)
- 3.5 Binary weight- Resistance divider method – Binary ladder method (K3,K4).
- 3.6 Simultaneous equation (K4)

### Unit IV: Modulation and Demodulation

(12 hours)

- 4.1 Modulation- Amplitude modulation- Mathematical analysis of AM wave (K1,K3,K4)
- 4.2 Modulation index (modulation factor) - Power in AM wave (K1, K2)
- 4.3 Frequency modulation - expression for frequency modulated wave(K1, K3)

- 4.4 Demodulation -Ratio Detector (K1, K2, K4)  
 4.5 Block diagram of AM transmitting system- AM receiver: Principle of Superhetrodyne receiver (K3,K4)  
 4.6 Block diagram of FM transmitting & receiving system (K3, K4)

**Unit V: Propagation of Radio Waves and Radar (13 hours)**

- 5.1 Antenna- Dipole and Folded type Antennas-array of antennas (K1,K2)  
 5.2 Propagation of Radio waves -Propagation of ground waves- Space wave propagation- Skywave propagation (K3,K4).  
 5.3 Skip distance and maximum usable frequency and Fading (K1,K2)  
 5.4 The ionosphere- Effect of ionosphere on propagation of radio waves - Eccles Larmor theory (K3,K4)  
 5.5 Principle, working and applications of Radar (K1,K2,K3,K4)  
 5.6 Range equation for radar and Duplexer (K3, K4)

**Book for Study:**

1. Malvino and Leech – Digital Principles and Applications, 5<sup>th</sup> Edition – Tata McGraw Hill, 2002.
2. A.Subramanyam - Applied Electronics –National Publishing Company, 2006.
3. R.Murugesan Kiruthiga Sivaprasath - Modern Physics – S.Chand, 2007.

**Books for Reference:**

1. Mano Morris – Digital Logic and Computer Designs, 23<sup>rd</sup> Edition – Prentice Hall Publication, 2000.
2. R.S. Sedha – A Textbook of Electronics – S.Chand Publication, 2001.
3. Gupta & Kumar - Handbook of Electronics – PragatiPrakasan Publication, 2002..
4. T.L.Floyd – Digital Fundamentals, 3<sup>rd</sup> Edition – Universal Book Stall, New Delhi, 2002.
5. V.K.Puri – Digital Electronics, 5<sup>th</sup> Reprint – Tata McGraw Hill Publication, 2003.

**SEMESTER – V  
 UEPHB20 – Elective – IB: Astro and Plasma Physics**

<b>Year:</b> III	<b>Course Code:</b> UCPHB20	<b>Title of the Course:</b> Elective – IB: Astro and Plasma Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

**Course Objectives**

1. To understand various astrophysical phenomena by applying the knowledge obtained in Plasma Physics

2. To study and help to understand a solid grounding in fundamental plasma physics.
3. To acquire the knowledge about variety of structures we can see in the universe from stars and planetary systems, to galaxies and clusters of galaxies.

### Course Outcomes (CO)

The learners will be able to

1. Learn the basic theories about the sun and solar system.
2. Learn the most fascinating and important astrophysical phenomena.
3. Have a clear understanding about visible matter in the universe
4. Study the various phases of the interstellar medium inside galaxies
5. Study in detail about Cosmic Rays, Galaxy and Instrumentation

(Low- L, Medium - M, High - H)

### Course Syllabus

#### Unit I: Theories about solar system and the sun

(12 hours)

- 1.1 Theories on solar system like Geo-centric theory and Helio-centric theory (K1,K2,K3)
- 1.2 Kepler's laws of gravitation and Newton's law of gravitation- Basic ideas of the solar system (K1,K2).
- 1.3 The Sun and temperature distribution near the photosphere (K3,K4).
- 1.4 Chromosphere boundary and solar granulation (K3,K4).
- 1.5 Study the basic concepts chromospheres, Spicules, plages and filaments, solar

corona and Solar flares (K2,K3)

1.6 Radio emission from the sun, solar wind and syroheliometer (K1,K2,K3,K4).

## **Unit II: Stars**

**(12 Hours)**

2.1 Colour Index of stars, stellar evolution and birth of a star (K1, K2,K3)

2.2 Maturity, ageing of stars and death of a star (K1,K3,K4)

2.3 Types of stars such as binary, multiple, variable, erupting and exploding stars (K1, K2,K3, K4)

2.4 Nebulae, Novae and Super Novae (K1, K2,K3,K4).

2.5 White dwarfs and electrons in white dwarfs(K3,K4).

2.6 Study of neutron stars, pulsars, quasars and black holes (K1,K3,K4).

## **Unit III: Cosmic Rays, The Galaxy and Instrumentation**

**(12 hours)**

3.1 Cosmic rays and discovery of cosmic rays (K2, K3).

3.2 Latitude effect, azimuth effect, altitude effect and longitude effect (K3,K4).

3.3 Primary cosmic rays and secondary rays (K1,K2)

3.4 Cosmic ray showers and vanallen belts (K3, K4).

3.5 The Galaxy, hubble's law and general structure of galaxy(K1,K2,K3,K4).

3.6 Astronomical Instruments: Reflecting and refracting telescopes, radio telescopes and hubble space telescope (HST) (K1, K3,K4).

## **Unit IV: Basic concepts of Plasma**

**(12 hours)**

4.1 Introduction to plasma and composition and characteristics of plasma (K1,K3)

4.2 Collisions, elastic collisions, Inelastic collisions and space plasma (K2,K3)

4.3 Interstellar space plasma and earth's atmospheric plasma (K3)

4.4 Atmosphere of other planets (K3, K4)

4.5 Nuclear reactions in steller plasma (K3,K4)

4.6 Proton-Proton cycle (K3, K4)

## **Unit V: Characteristics and Applications of Plasma**

**(12 hours)**

5.1 Properties of plasma in a magnetic field (K3,K4)

5.2 Force on plasma in a magnetic field (K3)

5.3 Current in magnetized plasma (K3)

5.4 Collisions in fully ionized magneto-plasmas and pinch effect. (K3,K4)

5.5 Applications of plasma (K4)

5.6 Controlled thermonuclear reactions, Heating and confinement of plasma Stellarator and tokamak (K3, K4)

**Books for Study:**

1. K.S.Krishnaswamy – Astro Physics: A Modern Perspective – New Age International Pvt. Ltd., New Delhi, 2002.
2. G.K.Sasidharan – The Great Universe – S.Chand& Company Ltd., New Delhi, 2008.
3. R.Murugeshan Kiruthiga Sivaprasath – Modern Physics–S.Chand &Co.Publication, 2007.

**Books for Reference:**

1. BaidyananthBasu – An Introduction to Astro Physics – Prentice Hall of India, 2004.
2. V.B.Bhatia – Textbook of Astronomy and Astro Physics with Elements of Cosmology – Narosa Publishing House, New Delhi, 1998.
3. R.R.Danial – Concepts of Space Science – University Press, Reprint 2002.
4. K.CosmicKapoor – Space Book – Lotus Press, 2005.
5. Goswami – Elements of Plasma Physics – New Central Book Agency, Reprint 2000.

**SEMESTER – VI**  
**UCPHJ20 – NUCLEAR PHYSICS**

<b>Year:</b> III	<b>Course Code:</b> UCPHJ20	<b>Title of the Course:</b> NUCLEAR PHYSICS	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> VI							

**Course Objectives**

1. To understand the basic properties of nucleus.
2. To expose to the students the processes of Radioactivity, nuclear fission, nuclear fusion and their applications in various fields.
3. To introduce a brief account of the elementary particles and cosmic rays.

**Course Outcomes (CO)**

The learners will be able to

1. Demonstrate a knowledge of fundamental aspects of the structure of the nucleus, radioactive decay, nuclear reactions and the interaction of radiation and matter.
2. Discuss nuclear and radiation physics connection with other physics disciplines – solid state, elementary particle physics, radiochemistry.
3. Describe experimental techniques used (or developed) for nuclear physics purposes semiconductor detectors and discuss their influence on development of new technologies.
4. Students learn about nuclear models, nuclear reactions, and radioactivity. Students might also examine nuclear imaging, dosimetry, and isotopic dating in a course focusing on nuclear science's applications.
5. Explore an application of nuclear and radiation physics and communicate their understanding to a group of their peers in a short presentation.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Properties of Nuclei and Nuclear Structure (15 hours)

- 1.1. Introduction and overview – Classification of nuclei (K1, K2)
- 1.2. General properties of Nucleus and Binding energy – Mass defect - Packing fraction – Nuclear Stability (K1,K2,K3)
- 1.3. Nuclear forces – Meson theory of Nuclear forces (K3,K4)
- 1.4. Nuclear models – Liquid drop model – Weizacker's semi empirical mass formula (K3,K4)
- 1.5. Shell model – Evidences for magic numbers (K2,K3)
- 1.6. Collective Model (K3)

### Unit II: Radioactivity (15 hours)

- 2.1 Fundamental laws of radio activity – Laws of radioactive disintegration – Mean life – Half life (K1,K2,K3)
- 2.2 Measurement of decay constants – Law of successive disintegration – Age of the earth (K3,K4)
- 2.3 Biological effects of nuclear radiations (K2,K3)
- 2.4 Discovery of natural radioactivity – Gamow's Theory of alpha decay - Alpha ray spectra (K2,K3,K4)
- 2.5 Beta decay – Beta decay spectra – Origin of the line and continuous spectrum (K3,K4)
- 2.6 Neutrino theory of beta decay – Gamma ray spectra – Origin of gamma rays – Nuclear isomerism (K3,K4)

### Unit III : Particle Detectors and Particle Accelerators (15 hours)

- 3.1 **Particle Detectors:** Geiger Muller Counter (K4)
- 3.2 Wilson Cloud Chamber (K3)
- 3.3 Bubble Chamber (K3)
- 3.4 Scintillation counter -ionization chamber (K2,K3)
- 3.5 **Particle Accelerators:** Linear Accelerator – Betatron (K2,K3,K4)
- 3.6 Synchrocyclotron – Protonsynchrotron (K3,K4)

**Unit IV: Artificial Transmutation of Elements****(15 hours)**

- 4.1 Artificial transmutation of elements (K1,K2)
- 4.2 Nuclear reactions - Q value for a nuclear reaction (K3,K4)
- 4.3 Types of nuclear reactions – Conservation laws of nuclear reaction – Threshold energy of an endoergic reaction (K2,K3,K4)
- 4.4 Discovery of neutron – Detection and properties of neutron (K3)
- 4.5 Thermal neutrons - Induced radioactivity (K3)
- 4.6 Applications of radio isotopes in medicine, agriculture, industry – Carbon dating (K3,K4)

**Unit V: Nuclear Fission and Fusion****(15 hours)**

- 5.1 Discovery – Nuclear fission – Calculation of energy in amu - Energy released in fission - Bohr wheeler's theory of nuclear fission (K2,K3,K4)
- 5.2 Chain reaction – atom bomb – nuclear reactors (K2)
- 5.3 Power reactor – Breeder reactor (K3,K4)
- 5.4 Nuclear fusion – source of stellar energy - thermo nuclear reaction (K3,K4)
- 5.5 Carbon – nitrogen cycle, proton – proton cycle – Hydrogen bomb (K2,K3)
- 5.6 Elementary particles – Baryons – Hyperons – leptons – mesons – the quark model. (K1,K2,K3,K4)

**Books for Study:**

1. R.Murugesan Kiruthiga Sivaprasath - Modern Physics – S.Chand, 2007.
2. M L Pandya & R P S Yadav - Elements of Nuclear physics – Ramnath Meerut Publication, 7<sup>th</sup> reprint, 2006.
3. D.C.Tayal- Nuclear Physics – Himalaya Publishing House, 2006.
4. B.N. Srivatsav - Basic Nuclear Physics, 17<sup>th</sup> Edition – Pragathi Prakasham, 2001.

**Reference Books**

**SEMESTER – VI**  
**UCPHK20 – Relativity and Quantum Mechanics**

<b>Year:</b> III	<b>Course Code:</b> UCPHK20	<b>Title of the Course:</b> Relativity and Quantum Mechanics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> VI							

**Course Objectives**

1. Understand the concept of constant relative motion of different bodies in different frames of references
2. To introduce students to the concept of special relativity and its applications to Physical Sciences
3. To make the students understand the inadequacy of classical mechanics and the birth of quantum mechanics.
4. To study role of uncertainty in quantum physics.
5. To impart the knowledge about the postulates and the basic principles of quantum mechanics and operator formulation.
6. Students learn the concept of wave function and Schrodinger equation and their applications using spherically symmetric potentials.

**Course Outcomes (CO)**

The learners will be able to

1. Understand the concept of constant relative motion of different bodies in different frames of references
2. To introduce students to the concept of special relativity and its applications to Physical Sciences
3. To make the students understand the inadequacy of classical mechanics and the birth of quantum mechanics.
4. To study role of uncertainty in quantum physics.
5. To impart the knowledge about the postulates and the basic principles of quantum mechanics and operator formulation.

## Course Syllabus

### Unit I: Relativity

(15 hours)

- 1.1 Postulates of special theory of relativity-Galilean transformation equation- Michelson-Morley Experiment (K1,K2,K3,K4)
- 1.2 Lorentz transformation equations(K3,K4)
- 1.3 Length contraction and Time dilation (K1,K2,K3)
- 1.4 Relativity of simultaneity and Addition of velocities (K1,K2,K3)
- 1.5 Variation of mass with velocity and Mass energy relation (K1,K2,K3,K4)
- 1.6 Minkowski's four dimensional space and Elementary ideas of general theory of relativity and its significance - Red Shift.(K3,K4)

### Unit II: Wave Nature of Matter

(15 hours)

- 2.1 De Broglie wavelength - Phase velocity and group velocity of de Broglie waves – relationship between phase velocity and group velocity (K3,K4)
- 2.2 Experimental study of matter waves – Davisson and Germer's experiment – G. P. Thomson's experiment (K1,K2,K3,K4)
- 2.3 Wavelength of motion of particles like electron – Electron microscope (K1,K2,K3,K4)
- 2.4 Heisenberg's uncertainty principle – $\gamma$ - ray microscope (K2,K3)
- 2.5 Application – Diffraction of electron beam by single slit and Non- existence of electrons inside the nucleus (K1,K2,K3,K4)
- 2.6 Explanation of Bohr radius - Minimum energy of Simple Harmonic Oscillator. (K3,K4)

### Unit III: Schrodinger Equation

(15 hours)

- 3.1 Failures of Classical mechanics - Wave function - Physical interpretation of wave function - Postulates of quantum mechanics (K1,K3,K4)
- 3.2 Operators for physical quantities (K2,K3,K4)
- 3.3 Eigen value equation - Eigen values and Eigen functions (K2,K3)
- 3.4 Schrodinger's equation -Time dependent and time independent equation (K1,K3,K4)
- 3.5 Expectation values – Expectation values of observables (K2,K3)
- 3.6 Ehrenfest's theorem (K4)

**Unit IV: One dimensional Problem****(15 hours)**

- 4.1 Free particle solution of Schrodinger's equation (K3,K4)
- 4.2 Bound state problems: Particle in a box (K3,K4)
- 4.3 Wave equation and solution for the particle - Eigen values of energy (K2,K3,K4)
- 4.4 Normalization of the wave functions (K1, K3)
- 4.5 Simple harmonic oscillator– Square well potential of finite depth (K3,K4)
- 4.6 Rectangular potential barrier - Tunneling effect. (K4)

**Unit V: Spherically Symmetric Potential Problems:****(15 Hours)**

- 5.1 Schrodinger equation in Spherical polar coordinates (K1,K3)
- 5.2 Reduction of two body problems in to one body problem (K3)
- 5.3 Hydrogen atom – Wave equations for the hydrogen atom - Separation of variables- Azimuthal, polar and Radial wave equations (K1,K2,K3,K4)
- 5.3 Solution for Azimuthal and polar wave equation (K1,K2,K3,K4)
- 5.5 Rigid Rotator- Moment of inertia of a rigid rotator (K1,K3,K4)
- 5.6 Wave equation for rigid rotator and its energy levels- wave functions for the rigid rotator. (K3,K4)

**Books for Study:**

1. R.Murugesan – Modern Physics – S.Chand Publication – Reprint 2007 (Units I, III, V – Rigid Rotator)
2. Arthur Beiser – Concepts of Modern Physics – McGraw Hill Publication, 2003.
3. S.P.Singh, M.K.Badge& Kamal Singh – Quantum Mechanics – S.Chand & Co. Ltd., Reprint 2001(Unit – IV )
4. G.Aruldass – Introduction to quantum mechanics – Prentice Hall of India, Reprint 2005 (Unit – IV)
5. D.Devanathan, - Introduction to Quantum Mechanics – Narosa Publications, 2019.
6. Kamal Singh, S.P.Singh – Elements of Quantum Mechanics – S.Chand publications – Edition 2005 (Unit V)

**Books for Reference:**

1. Gupta Kumar Sharma – quantum Mechanics - Jai Prakash Nath Publications, 2017.
2. B.K.Agarwal – quantum Mechanics – Lokbharathi Publications, 2003
3. Sathyaprakash - Mathematical physics – S.Chand & Sons, Reprint 2006.
4. Sathyaprakash – Advanced quantum mechanics - S.Chand & Sons, Reprint 2006.

## SEMESTER – VI

### UEPHC20 – Elective – II A: Solid State Physics and Material Science

<b>Year:</b> III	<b>Course Code:</b> UEPHC20	<b>Title of the Course:</b> Elective - II A: Solid State Physics and Material Science	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To have background about solid materials and crystal structure.
2. To understand the fundamentals of polarization mechanisms in dielectric materials.
3. To characterize the properties of solids and dynamic lattice vibrations arrangements of atoms
4. To study electrons in solids and key features distinguishing metals, insulators and semiconductors and defects in crystals.
5. To learn superconductivity and magnetism.

#### Course Outcomes (CO)

The learners will be able to

1. Building blocks of crystals, Bravais lattices, crystal structure, reciprocal lattice
2. To learn lattice dynamics, phonons, density of states, specific heat, thermal conductivity
3. To study electron theory, free model theory, band theory of metals, semiconductors and electrical conductivity
4. Learn the basic properties of superconductors in the frame of BCS theory
5. To study the dielectric property of various materials

(Low- L, Medium - M, High – H)

## **Course Syllabus**

### **Unit I: Crystal Structure**

**(14 hours)**

- 1.1 Crystal lattice – Primitive and unit cell – seven classes of crystals – Bravais lattice – Miller indices (K1, K2)
- 1.2 Structure of crystals - simple cubic - face centered cubic structure - body centered cubic structure - hexagonal close packed structure(K4, K5)
- 1.3 Reciprocal lattices - properties of reciprocal lattice(K3, K4)
- 1.4 Bragg's law - Determination of crystal structure (K4, K5)
- 1.5 The Laue method of X – ray diffraction (K4, K5)
- 1.6 Powder crystal method (Debye- Scherrer method) (K4, K5)

### **Unit II: Band Theory of Solids and Defects**

**(14 hours)**

- 2.1 Energy band in solids (K1)
- 2.3 Electron in a periodic potential (K3, K4)
- 2.3 Brillouin zones (K1, K2)
- 2.4 Brillouin zones construction(K3, K4)
- 2.4 Crystal imperfections (K3)
- 2.5 Point defects - line defects - surface defects(K4)
- 2.6 Effects of crystal imperfections(K3)

### **Unit III: Dielectric properties**

**(14 hours)**

- 3.1 Dielectrics - Dielectric polarizability - Dielectric constant (K1, K2)
- 3.2 Different types of electric polarization (Ionic, electronic and orientational polarization) (K3, K4)
- 3.3 Frequency and temperature effects on polarization (K3, K4)
- 3.4 Dielectric loss - Local field or internal field - Clausius – Mosotti Relation -determination of dielectric constant (K2, K3, K4)
- 3.5 Dielectric breakdown (K2)
- 3.6 Properties of different types of insulating materials (K3, K4)

### **Unit IV: Bonding in Crystals and Lattice Vibrations**

**(14 hours)**

- 4.1 Types of bond in crystals- Ionic, covalent, metallic, Vanderwaal's and Hydrogen bonding (K1, K2, K3)
- 4.2 Phonons of mono atomic one dimensional lattice (K3, K4)
- 4.3 Specific heat of solids – Atomic heat - Dulong and Petit's (K3, K4)
- 4.4 Einstein's theory of specific heat (K4)
- 4.5 Debye's theory of specific heat (K4)
- 4.6 Cohesive energy of ionic crystals (K2, K3)

## **Unit V: Superconductivity**

**(14 hours)**

- 5.1 Introduction - Properties of superconductors(K1, K2)
- 5.2 Type I and Type II superconductors (K2, K3)
- 5.3 BCS theory of super conductors - Cooper pair - Electron – Lattice – electron interaction(K3, K4)
- 5.4 Meissner effect - Ac Josephson effect of superconductors(K4)
- 5.5 Dc Josephson effect of superconductors(K4)
- 5.6 High temperature superconductors - Application of superconductors (K3)

### **Books for Study:**

1. R.Murugesan, Kiruthiga Sivaprasath - Modern Physics, First Edition - Ltd, NewDelhi, 2007.
2. Gupta Kumar – Solid State Physics, 9<sup>th</sup> Edition - K.Nath & Co. Education, 2006.
3. S.O.Pillai - Solid State Physics, 6<sup>th</sup> Edition - S.Chand& Co., 2005.
4. D Velmurugan – Elements of Crystallography – M J P Publishers, 2008.

### **Books for Reference:**

1. H.C.Guptha - Solid State Physics - Vikas Publishing House, 2013.
2. S.L.Kakani - Solid State Physics: Theory, Application and Problems – 2005.
3. P.K.Palaniswamy - Solid State Physics - SciTech Publication, 2003.
4. J.P.Srinivastva - Elements of Solid State Physics - Prentice Hall of India, 2004.
5. Wahab - Solid State Physics: Structure and Properties of Materials, 2<sup>nd</sup> Edition – Narosa Publishing Huse, 2008.
6. V Rajendran, A Marikani - Material Science – Tata McGraw Hill Publishing Company, 2005.

**SEMESTER – VI**  
**UEPHD20 – Elective – II B: Materials Science**

<b>Year:</b> III	<b>Course Code:</b> UEPHD20	<b>Title of the Course:</b> Elective - II B: Materials Science	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> VI							

**Course Objectives**

1. To brief the theory of the electrical, thermal, mechanical and magnetic properties of materials.
2. To understand the different types of materials and their characterization with respect to their applications
3. To understand the various properties of materials and its measure
4. To expose the students the different NDT available in industry

**Course Learning Outcomes (CO)**

The learners will be able to

1. To learn about the materials properties and corrosion-oxidation of material
2. Study about the thermal properties of material and its effect
3. Learn about the testing of material quality
4. To study the synthesis of nanoparticles and characterization of nanoparticles
5. To make the students to understand the future application of nano materials

CO5	H	H	M	L	M	M

(Low- L, Medium - M, High - H)

**Unit I: Material Classification – Corrosion and Oxidation** (14 hours)

- 1.1 Materials - Material classification - Properties of Engineering material - Mechanical properties (K1, K2)
- 1.2 Effect of heat treatment - Effect of atmospheric exposure (K2)
- 1.3 Creep - Creep resisting materials (K2, K3)
- 1.4 Factors influencing corrosion - Types of corrosion (K2, K3)
- 1.5 Basic mechanisms of corrosion - Corrosion testing (K4)
- 1.6 Oxidation - Corrosion control (K3, K4)

**Unit II: Properties of Materials** (14 hours)

- 2.1 Heat capacity - Specific heat - Thermal expansion - Melting Point (K1, K2)
- 2.2 Thermal conductivity - Thermal shock resistance – Thermal stability –Magnetic properties (K2)
- 2.3 Permeability –Superconductivity – Coercive force – Hysteresis (K2, K3)
- 2.4 Electrical property – Resistivity - Conductivity - Temperature coefficient of resistance(K2, K3)
- 2.5 Dielectric strength -Thermoelectricity - Optical properties (K3, K4)
- 2.6 Refractive index – Absorptive – Reflectivity (K3)

**Unit III: Non – destructive Testing** (14 hours)

- 3.1 NDT – Advantages of NDT - Defects in materials (K1, K2, K3)
- 3.2 Selection of the NDT method - Visual inspection (K3, K4)
- 3.3 Basic principle - Liquid penetration testing - Physical principle (K3)
- 3.4 Magnetic Particle Testing (MPT) - Principle of MPT – Sensitivity – Limitation (K3, K4)
- 3.5 Eddy Current Testing (ECT) – Principle - Instrument for ECT (K3, K4)
- 3.6 Eddy Current Testing (ECT) - Application –Limitations (K3, K4)

**Unit IV: Nano Technology** (14 hours)

- 4.1 Introduction to Nano technology – Position control – Self assembly (K1, K2, K3)
- 4.2 Positional devices – stiffness – Top- down method – Bottom-up method (K3, K4)
- 4.3 Enabling Technologies – Characteristics of Self assembly – Zeolitic materials (K2, K3, K4)
- 4.4 Application of Nano Technology – Scanning electron microscope (SEM) (K3, K4)
- 4.5 Transmission electron microscope (TEM) (K3, K4)
- 4.6 The Scanning tunneling microscope (K3, K4)

**Unit V: Nano Particles** (14 hours)

- 5.1 Fabrication of nano particles – Grinding with Iron balls – Gas condensation (K3, K4)
- 5.2 Laser ablation – Thermal and ultrasonic decomposition (K3, K4)
- 5.3 Atom optics - Sol Gels – precipitation of quantum dots (K3, K4)
- 5.4 Characterization of nanoparticles (K3)
- 5.5 Optical measurement – Electrical measurement (K3, K4)
- 5.6 Application of nanoparticles (K3)

### Books for Study:

1. O.P. Khanna – Material Science and Metallurgy – Dhanpat Raj Publication – Reprint 1998.
2. W.R.Fahrner (Ed) – Nanotechnology and Nano electronics – Springer Private Limited, 2006.
3. Richard Booker and Earl Boysen – Nano Technology – Wiley Publication, 2005.

2. M.Arumugam – Physics II – Anuradha Agencies, Reprint 2005.
3. K.Goser, P.Glosekotter, J.Dienststuhl – Nanoelectronics and Nano Systems – Springer Publication, 2008.

## SEMESTER – VI

### UEPHE20 – Elective III A: MICROPROCESSOR 8085

<b>Year:</b> III	<b>Course Code:</b> UEPHE20	<b>Title of the Course:</b> Elective III A: Microprocessor 8085	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> VI							

### Course Objectives

1. To provide a basic knowledge about computer language in binary system
2. To understand the fundamental concepts of conversion of binary into decimal and hexa decimal systems
3. To have a knowledge about basics logic gates and Flip flops
4. To familiarize with the concepts of Registers and multiplexers
5. To give a knowledge about the basics of ROM and RAM
6. To understand the concept of microprocessor bus structure and architecture of 8085.

### Course Outcomes (CO)

The learners will be able to

- 1 Develop an ability to convert from binary into decimal and hexa decimal system
- 2 Provide a clear internal behavior of a basic logic gates
- 3 Explain the principles of registers and the block diagram of multiplexers
- 4 Provide a comprehensive understanding about the usage of ROM and RAM and make the students to differentiate the working process of ROM and RAM.
- 5 Enable the learners to get an in-depth knowledge in microprocessor and how to execute an instruction using processor.

(Low- L, Medium - M, High - H)

## Course Syllabus

### Unit I: Digital Fundamentals and Architecture of 8085 (14 hours)

- 1.1 Binary and Hexa decimal system – Representation of negative numbers (K1,K3)
- 1.2 Binary coded decimal and basic logic gates – High impedance state (K2,K3)
- 1.3 D flip flop and D latches – Registers– Multiplexers and Demultiplexers (K2,K3,K4)
- 1.4 ROM and RAM – Microprocessor as CPU –Input and output unit (K2,K3,K4)
- 1.5 System and Bus structure – Execution of an instruction (K2,K3,K4)
- 1.6 Block diagram of Architecture of 8085 – Internal Register – Flag -ALU.(K3,K4)

### Unit II: Instruction Sets of 8085 (14 hours)

- 2.1 Machine language and assembly language (K3,K4)
- 2.2 Programmer's model of 8085 (K4)
- 2.3 Data transfer instructions I – Arithmetic, logic and special instructions (K2,K3,K4)
- 2.4 Assembly language to Hex code – Data transfer instruction II (K2,K3,K4)
- 2.5 Branch instructions – Stack and stack related instructions (K3,K4)
- 2.6 I/O and Machine control instructions - 8085 Addressing modes (K2,K4)

### Unit III: 8085 Instruction Timings (14 hours)

- 3.1 Introduction on 8085 instruction timings (K2,K3,K4)
- 3.2 Memory read cycle (K3,K4)
- 3.3 Memory Write cycle (K3,K4)
- 3.4 Wait states – Halt state (K2)
- 3.5 Timing diagrams for some instructions (MOV, MVI, LXI, STA, DCX)
- 3.6 Delay calculations. (K3,K4)

**Unit IV: Memory and I/O Interface****(14 hours)**

- 4.1 Memory interface basics (K1,K2)
- 4.2 Demultiplexing address/data bus (K1,K3)
- 4.3 Generating control signals – ROM / EPROM interface (2K X 8 EPROM, 4K X 8 ROM) (K1, K3)
- 4.4 RAM interface (2K X 8 RAM interface, 2K X 8 RAM interface using Decoders) (K1, K4)
- 4.5 IN instruction and its timing diagram – Out instruction and its timing diagram (K2,K3)
- 4.6 Memory mapped I/O –difference between Memory Mapped I/O and I/O Mapped I/O (K3,K4)

**Unit V: Interrupts****(14 hours)**

- 5.1 Introduction – INTR and INTA – RST 5.5, RST 6.5, RST 7.5 AND TRAP (K1,K3,K4)
- 5.2 Triggering levels – Priority levels (K2,K3,K4)
- 5.3 Programmable Peripheral Interface 8255(K4)
- 5.4 Simple programs- code conversion- 8 bit addition, subtraction (K3,K4)
- 5.5 Multiplication and division (K3,K4)
- 5.6 Arranging number in ascending and descending orders. (K3,K4)

**Book for Study:**

1. V.Vijayendran – Fundamentals of Microprocessor 8085 – Edition 2006

**Books for Reference:**

1. Ramesh Gaonkar – Microprocessor Architecture, Programming and Applications with 8085 – Penram International Publishing Private Limited.
2. Malvino – An Introduction to Microprocessor – Tata McGraw Hill Publication, 3<sup>rd</sup> Edition.
3. B. Ram – Fundamentals of Microprocessor and Microcomputer – Dhanpat Raj Publisher.
4. Ajit Pal – Microprocessor Principle and Applications – Tata McGraw Hill Publication.

## SEMESTER – VI

### UEPHF20 – Elective III B: Communication Physics

<b>Year:</b> III	<b>Course Code:</b> UEPHF20	<b>Title of the Course:</b> ELECTIVE III B: Communication Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
---------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To learn about the radio communication system and propagation of waves
2. To study about the microwave communications and generation of microwaves
3. Students understand the satellite communication system
4. To provide a basic idea of fiber optic communication
5. To help of the students understand the light sources of fiberoptics
6. To learn about the transmission lines and facsimile transmission

#### Course Outcomes (CO)

The learners will be able to

1. Students understand the direct waves and ground waves
2. Students understand the working of television and RADAR
3. Analyse the types of Kepler's law
4. Students understand the principles of fiber optics
5. Realize the LED, diodes, detectors

CO	PO					
	1	2	3	4	5	6
CO1	L	M	L	L	L	H
CO2	M	H	L	H	L	L
CO3	M	M	L	H	L	L

CO2	H	M	H	H	M	L
CO3	L	H	L	L	M	H
CO4	H	M	L	H	H	M
CO5	M	H	L	M	L	H

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Radio Communication System (14 hours)**

- 1.1 Propagation (K1,K2)
- 1.2 Direct waves and ground waves (K3)
- 1.3 Modulation amplitude modulation Generation of SSB Signal (K2,K3)
- 1.4 Detectors and its types (K3,K4)
- 1.5 Receivers, simple receiver (K3,K4)
- 1.6 Super heterodyne receiver (K4)

### **Unit: II Microwave Communication (14 hours)**

- 2.1 Generation of microwaves, klystron oscillator, reflex oscillator (K2)
- 2.2 Television picture tube ,iconoscope, image orthicon, scanning synchronization (K2,K3)
- 2.3 TV transmission, TV reception (K1,K2)
- 2.4 Fundamentals of colouring TV and RADAR (K2,K3)
- 2.5 RADAR equations, TYPES and PPI displace (K2,K3)
- 2.6 Automatic tracking RADAR ,applications of RADAR (K1,K2,K3)

### **Unit III: Satellite Communication (14 hours)**

- 3.1 Kepler's laws ,station keeping (K1,K2)
- 3.2 Satellite attitude, power system (K1,K2,K3)
- 3.3 Transmission path loss (K4)
- 3.4 Satellite earth station (K3,K4)
- 3.5 Satellite station (K2)
- 3.6 Introduction to Indian satellite (K3)

### **Unit IV: Fiber Optics Communication (14 hours)**

- 4.1 Principles of light transmission in a fiber (K2,K3,)
- 4.2 Propagation with in a fiber, effect of index profile on propagation (K1,K4)
- 4.3 Modes of propagation, listing of losses in fiber (K1,K2,K3)
- 4.4 Light sources of fiber optics (K2,K3,)
- 4.5 LED ,laser diodes, detectors (K2,K3,)
- 4.6 Photo diode, avalanche photo diode (K2,K3,)

### **Unit V: Transmission Line Facsimile Transmission (14 hours)**

- 5.1 Transmission lines, herts experiment (K1,K2)
- 5.2 Fundamentals of aerial (K2)
- 5.3 Radiation field, radiation resistance power radiated for a dipole antenna(K1,K2,K3)
- 5.4 Facsimile transmitter, cylindrical scanning (K2,K3)
- 5.5 Facsimile receiver, photographic reception (K2,K3)
- 5.6 Direct recording reception (K4)

### Book for Study:

1. A.Subramanyam - Applied Electronics –National Publishing Company, 2006.
2. R.Murugesan Kiruthiga Sivaprasath - Modern Physics – S.Chand, 2007.

### Books for Reference

1. Gupta and Kumar- Hand book of electronics, 24<sup>th</sup> revised edition- pragathi pragasham,1998
2. Puri & Chand - hand book of electronics - Anmol publications, Reprint 1996.
3. Albert Paul Nalvino – Principles of electronics, 6<sup>th</sup>Edition,Tata McGraw Hill publications co., 1999.
4. Sedha.R.S., Applied electronics -S.Chand and Co. Pvt.Ltd., 2009.
5. Dennis Reddy and John Coleman- Electronic communication – Tata McGraw Hill publications Co.,2000.

### SEMESTER – I / III UAPHA20 – Allied I: Physics I

<b>Year: I/II</b>	<b>Course Code:</b> UAPHA20	<b>Title of the Course:</b> ALLIED I: PHYSICS I	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem: I / III</b>							

### Course Objectives

1. To impart knowledge about Physics to the students of Mathematics and Chemistry
2. To apply the concepts of Physics to their core subject.

### Course Outcomes (CO)

The learners will be able to

1. Gains the knowledge of the properties of materials and its applications.
2. Understands the properties of liquids.
3. Able to understand the concepts of heat, superconductors and its application
4. Perceives the clear knowledge of the characteristic behaviour of sound with its applications.
5. Understand the properties of light

CO	PO					
	1	2	3	4	5	6
CO1	L	M	L	L	L	H
CO2	M	H	L	H	L	L
CO3	M	M	L	H	L	L
CO4	L	M	M	L	L	L
CO5	M	L	M	L	L	M

CO	PSO					
	1	2	3	4	5	6
CO1	M	H	L	H	L	L
CO2	H	M	M	M	M	M
CO3	M	L	L	L	M	H
CO4	L	M	H	M	H	M
CO5	H	H	M	H	H	M

(Low- L, Medium - M, High - H)

### Unit I: Elasticity

(14 hours)

- 1.1 Stress – Strain - Hooke's law – Definitions of Young's Modulus, rigidity and bulk modulus modulus–Definition of Poisson's ratio (K1, K2)
- 1.2 Energy stored in a stretched wire - problems (K2)
- 1.3 Bending of beams –Neutral axis - Expression for internal bending moment - Cantilever –Depression at the loaded end of a cantilever (K3, K4)
- 1.4 Experimental determination of Young modulus by non-uniform bending using pin and microscope– I form girders –Problems (K4)
- 1.5 Torsional couple – Potential energy stored in a twisted wire – Expression for couple per unit twist(K3, K4)
- 1.6 Torsional Pendulum - Experimental determination of rigidity modulus by Torsional oscillation (without masses) - Experimental determination of rigidity modulus by static torsion method. (K3, K4).

### Unit II: Properties of liquids

(14 hours)

- 2.1 **Viscosity:** Stream line and turbulent flow– critical velocity - Viscous force – Coefficient of viscosity of a liquid (K2)
- 2.2 Poiseuille's formula –Determination of coefficient of viscosity of liquid by Poiseuille's method - Problems (K2, K3)
- 2.3 Comparison of coefficient viscosities of two liquids using graduated burette - Ostwald's viscometer method. (K3)
- 2.4 Terminal velocity – Stokes law- Experimental determination of coefficient of viscosity of highly viscous liquid. (K2, K4)
- 2.5 **Surface Tension:** Definition – Excess of Pressure inside curved surface (curvilinear co-ordinates) – Spherical and cylindrical drops and bubbles - Problems (K3)
- 2.6 Determination of surface tension by the method of drops - Interfacial tension between two immiscible liquids – Determination of interfacial tension by the method of drops (K3, K4)

### Unit III : Heat

(14 hours)

- 3.1 Specific Heat of Capacity – Definition – Determination of specific heat of capacity of a liquid by method of mixtures – Half time radiation correction (K1, K2, K3, K4)

- 3.2 Specific heat capacity by Callender and Barne's method –Merits and demerits (K3,K4)
- 3.3 Newton's law of cooling –Statement - Determination of specific heat of a liquid using Newton's law of cooling. (K2,K3,K4)
- 3.4 Joule Kelvin effect –Definition - Temperature of inversion –Porous plug experiment – Results – Theory of Joule Kelvin effect (K2,K3,K4)
- 3.5 Liquefaction of air by Linde's Process - Liquefaction of Helium –Properties of Helium I and II - Lambda point. (K2,K3,K4)
- 3.6 Superconductors – Definition of type I and II Superconductors – Meissner effect - Applications – Magnetic levitation. (K1,K2,K3)

#### **Unit IV: Sound**

**(14 hours)**

- 4.1 Properties of sound – Longitudinal and transverse waves - Expression for Velocity of transverse vibrations along a stretched string - frequency of transverse vibrations along a stretched string (K1,K2,K4)
- 4.2 Laws of transverse vibrations of strings -Determination of A.C. frequency using Sonometer- Problems (K2,K3)
- 4.3 Ultrasonics–Piezo-electric effect – Inverse piezo-electric effect - Production of ultrasonic waves by Piezo electric oscillator (K2,K3,K4)
- 4.4 Definition of Magnetostriction- Production of ultrasonic waves by Magnetostriction oscillator (K2,K3,K4)
- 4.5 Applications of Ultrasonics– Scientific, industrial and medical applications. (K2,K3)
- 4.6 Acoustics of buildings – Definition of Reverberation – Reverberation time - Sabine's formula (Without derivation) – Absorption coefficient– Factors affecting the acoustics of buildings (K2,K4)

#### **Unit V: Optics**

**(14 hours)**

- 5.1 **Physical Optics:** Interference – Definition – Conditions for interference – interference in thin films (reflected light) (K1, K2, k4)
- 5.2 Newton's ring - Determination of radius of curvature of lens by forming Newton's rings(K2,K3,K4)
- 5.3 Air wedge – Expression for fringe width – Experiment to measure the diameter of a thin wire by air wedge method – Test for optical flatness. (K2,K3,K4)
- 5.4 Diffraction–Definition – Plane transmission Grating –construction - Theory of plane transmission grating– Experimental determination of wavelength using transmission grating – Problems (K1,K2,K4)
- 5.5 **Polarization:** Definition of polarization –Polarization by reflection (Brewster's law)– Double refraction - Optical activity – specific rotatory power (K1,K2,K4)
- 5.6 Function of a half shade – Determination Specific rotatory power of sugar solution using Laurent's half shade polarimeter– Uses of polarised light. (K3,K4)

#### **Books for Study:**

1. R.Murgeshan– Allied Physics –S.Chand & Co. Ltd., New Delhi, First Edition 2008.
2. Dr.Dhanalakshmi and Dr.R.Sabesan – Allied Physics – Popular Book Dept, 2005.

3. N.Brijilal and N.Subramaniam– Heat and Thermodynamics –S.Chand and Co. Ltd., New Delhi, 2008.
4. R.Murgeshan – Electricity and Magnetism – S.Chand & Co. Ltd, New Delhi, 2008.
5. R.Murgeshan and KiruthigaSivaprasath - Modern Physics –S.Chand& Co. Ltd., New Delhi, 2007.
6. V.K.Mehta– Principles of Electronics –S.Chand& Co. Ltd., Mew Delhi, 2008.

### Books for Reference:

1. D.S. Mathur– Elements of Properties of matter–Shyamalt Charitable Trust, New Delhi, 2007.
2. N.Brijilal and N.Subramaniam– Waves and oscillations –Vikas Publishing house Pvt. Ltd., 1992.
3. N.Brijilal and N.Subramaniam– A text book of Optics –S.Chand and Co. Ltd., New Delhi, 2004.
4. V.Rajendran and A.Marikani– Material Science - Tata McGraw Hill Publishing company Ltd., 2004.
5. P.Mani– A text book of Engineering Physics –Dhanam Publications, Chennai, 2013.

### SEMESTER – II / IV

#### UAPHB20 – Allied II: Physics II

Year: II	Course Code: UAPHB220	Title of the Course: ALLIED II: PHYSICS II	Course Type: Theory	Course Category: Allied	H/W 4	Credits 4	Marks 100
Sem: IV	/420						

### Course Objectives

1. To emphasize the significance of Physics to the students of Mathematics and Chemistry
2. To impart the knowledge of the various branches of Physics.

### Course Outcomes (CO)

1. Gain the knowledge about electricity and properties of magnetic materials.
2. Understand the importance of Wave mechanics.
3. Able to understand the concepts of nuclear reactions and the types of accelerators and detectors.
4. Perceive the fundamental knowledge about crystallography and the advancement in the field of communication
5. Learn about rectifiers, filters and opto-electronic devices with its applications

CO	PO					
	1	2	3	4	5	6
CO1	H	M	L	L	M	H
CO2	M	H	H	H	H	L
CO3	M	M	L	H	H	M
CO4	L	M	M	L	H	L
CO5	M	L	M	L	M	M

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	L	M	M	L
CO2	M	M	L	L	H	L
CO3	L	L	M	M	L	H
CO4	M	M	L	M	H	L
CO5	H	M	M	M	H	L

(Low- L, Medium - M, High - H)

### Unit I: Electricity and Magnetism

(12 hours)

- 1.1 Transient current (DC) – Growth and decay of current in a (LR circuit) circuit containing inductance and resistance –Decay of current in a (LR circuit) circuit containing inductance and resistance (K1, K2,K3)
- 1.2 Growth of a charge of a capacitor through resistor (RC-circuit) - Decay of charge of a capacitor through resistor (RC-circuit) – time constant (K3, K4)
- 1.3 Measurement of high resistance by Leakage method - problems (K3)
- 1.4 Magnetic Induction (B) – Magnetization (M) – Magnetic Susceptibility - Permeability – Relation between B, H and M (K1, K2, K3)
- 1.5 Properties of dia, para and ferro magnetic materials - Hysteresis loop – Definitions of Retentivity – Coercivity (K1, K2, K3)
- 1.6 Energy loss due to hysteresis– the importance of hysteresis curves –choice of magnetic materials (K2, K3, K4)

### Unit II: Wave Mechanics

(12 hours)

- 2.1 Wave mechanics – Dual nature of matter – De Broglie wave length– problems - Definition of phase velocity and group velocity – Relationship between them. (K1,K2,K3)
- 2.2 Experimental study of matter waves – Davisson and Germer’s experiment (K3, K4)
- 2.3 Heisenberg’s uncertainty principle – Applications – Determination of position of an electron with  $\gamma$  ray microscope (K1, K2, K3)
- 2.4 - Diffraction of electron beam through a slit - Proof for non-existence of electrons inside the nucleus. (K2, K3)
- 2.5 Wave function – Properties of wave function – Basic Postulates of wave mechanics (K1, K2)
- 2.6 Derivation of time dependent Schrödinger’s equation – Time independent

Schrödinger's Equation (K3, K4)

### **Unit III : Nuclear Physics**

**(12 hours)**

- 3.1 Artificial transmutation – Rutherford's experiment – Types of nuclear reactions (K1,K2,K3)
- 3.2 Energy balance in nuclear reactions and the Q-value – Q value equation for a nuclear reaction– Threshold energy of an endoergic reaction (K2,K3)
- 3.3 Neutron– Properties of neutron - Neutron Charge – Decay of neutron – Neutron diffraction- spin and Magnetic moment of neutron (K1, K2,K3)
- 3.4 Classification of Neutrons - Neutron detection – Boron Detectors (slow neutrons)- Proton recoil detectors (fast neutrons) (K3, K4)
- 3.5 Particle Accelerators – Linear Accelerator - Betatron (K3, K4)
- 3.6 Particle detectors – Wilson cloud chamber (K3, K4)

### **Unit IV: Crystallography, Fibre Optics and Optics**

**(14 hours)**

- 4.1 Crystal – Definition of unit cell – Miller Indices – Seven types of crystal systems (K1, K2,K3)
- 4.2 Definition of Bravais lattice - Definition of reciprocal lattice and its properties –Derivation of Bragg's law (K1, K2,K3)
- 4.3 Fibre Optics - Introduction – Optical fibre – Construction - Principle - Acceptanceangle and condition for propagation through optical fibre (K1, K3)
- 4.4 Classification of optical fibres– Single mode and multimode fibres– Step index and graded index fibres (K3).
- 4.5 Step index single mode fibre – Step index multimode fibre– Graded index multimode fibre – Fibre optic communication system with block diagram. (K3)
- 4.6 Laser – Principle – Types of laser - Semi conductor Laser –Nd-YAG Laser – Applications of laser. (K3, K4)

### **Unit V: Electronics**

**(14 hours)**

- 5.1 Rectifiers – Half and full wave rectifiers - Full-Wave Bridge Rectifier construction – working and Mathematical Analysis (K1, K2,K3)
- 5.2 Filters - Types of Filter circuits – Capacitor filter – Choke input filter -  $\pi$  section filter (K2, K3)
- 5.3 Zener Diode – Characteristics of Zener Diode –Zener diode as voltage regulator (K2, K3)
- 5.4 Opto-Electronic Devices : Photo Diode – Principle – Characteristics of Photo Diode – Applications – Alarm Circuit – Counter circuit (K3, K4)
- 5.5 Light Emitting Diode (LED) – Principle – Characteristics of LED – Applications –Power indicator – Seven Segment Display (K3, K4)
- 5.6 Solar Cell – Construction - Working - Characteristics – Uses (K4)

#### **Books for Study:**

1. R.Murgeshan– Allied Physics –S.Chand & Co. Ltd., New Delhi, First Edition, 2008.
2. Dr.Dhanalakshmi and Dr.R.Sabesan – Allied Physics – Popular Book Dept, 2005.

3. N.Brijilal and N.Subramaniam– Heat and Thermodynamics –S.Chand and Co. Ltd., New Delhi, 2008.
4. R.Murgeshan– Electricity and Magnetism –S.Chand & Co. Ltd, New Delhi, 2008.
5. R.Murgeshan and Kiruthiga Sivaprasath - Modern Physics –S.Chand& Co. Ltd., New Delhi, 2007.
6. V.K.Mehta– Principles of Electronics –S.Chand& Co. Ltd., New Delhi, 2008.

**Books for Reference:**

1. D.S. Mathur– Elements of Properties of matter–Shyamalt Charitable Trust, New Delhi, 2007.
2. M.Narayamurthi and others – A text book of Sound – The National Publishing company, Chennai, 1986.
3. N.Brijilal and N.Subramaniam– Waves and oscillations –Vikas Publishing house Pvt. Ltd.,1992.
4. N.Brijilal and N.Subramaniam– A text book of Optics –S.Chand and Co. Ltd., New Delhi, 2004.
5. V.Rajendran and A.Marikani– Material Science - Tata McGraw Hill Publishing company Ltd., 2004.
6. S.O.Pillai– Solid State Physics – New Age International (P) Ltd. Publishers, New Delhi, 2006.
7. P.Mani– A text book of Engineering Physics –Dhanam Publications, Chennai – 42, 4<sup>th</sup> edition, 2018.

## SEMESTER II

### UCPHC20 - PRACTICAL – I

(Any 16 experiments)

1. Compound Pendulum – Determination of  $g$  and  $k$ .
2.  $q$  by Non-Uniform Bending – Pin and Microscope.
3.  $q$  by Non-Uniform Bending – Optic Lever.
4. Torsional Pendulum – Rigidity modulus of a wire (without masses).
5.  $n$  by Static Torsion (Mirror and telescope method).
6. Surface tension and interfacial surface tension by drop weight method.
7. Focal Length and Refractive Index of Convex Lens (UV and Conjugate foci method for 'f' and direct reflection method for R).
8. Focal Length and Refractive Index of short focal Concave Lens (Combination method, in contact and out of contact methods for 'f' and direct reflection method for R).
9. Spectrometer -  $\mu$  of solid prism.
10. Specific heat capacity of a liquid – Method of Mixtures (Barton's correction).
11. Sonometer – Determination of AC Frequency of the given steel wire.
12. Sonometer – Determination of AC Frequency of the given Brass wire.
13. Potentiometer – Calibration of low range voltmeter.
14. Field along the axis of a coil –  $B_H$  using deflection magnetometer.
15. Torsional Pendulum –  $M$ ,  $n$  and  $I$  (with mass).
16. Lee's Disc – Thermal conductivity of bad conductors and emissivity.
17. Spectrometer -  $\mu$  of hollow prism.

**SEMESTER IV**  
**UCPHF20 - PRACTICAL – II**  
(Any 16 experiments)

1. Bifilar Pendulum .
2. Young's modulus of the beam-Uniform bending – Pin and Microscope.
3. Young's modulus of the beam-Uniform bending – Optical lever.
4. Young's modulus by cantilever – Mirror and Telescope method.
5. Surface Tension – Capillary rise method – Radius by Mercury Pellet method.
6. Sonometer – Specific gravity of Solids and Liquids.
7. Melde's String – Frequency of Vibrator.
8. Melde's String-Specific gravity of Solids and Liquids.
9. Air wedge- Determination of thickness of a thin wire.
10. Specific heat capacity of a liquid –Newton's law of cooling
11. Spectrometer – i-d curve .
12. Spectrometer - grating – normal incidence – standardization – wavelength of mercury lines.
13. Spectrometer – grating – Minimum deviation – wavelengths of mercury lines.
14. Potentiometer – Calibration of ammeter.
15. Potentiometer – Unknown Resistance and Specific resistance.
16. P.O Box- Measurement of temperature and co-efficient of Resistance.
17. Figure of Merit - Aperiodic Galvanometer.
18. Determination of M and  $B_H$  using deflection and vibration magnetometers – Tan A and Tan B position.

**SEMESTER VI**  
**UCPHL20- PRACTICAL III**  
(Any 16 experiments)

1. Young's modulus by Non uniform bending – Koenig's Method
2. Spectrometer – i-i' Curve.
3. Spectrometer – Dispersive power of a prism.
4. Spectrometer – Narrow angled prism.
5. Spectrometer –grating –normal incidence – dispersive power.
6. Spectrometer – prism – Cauchy's constant
7. Newton's rings – Determination of R and  $\mu$ .
8. Newton's rings - Refractive index of water.
9. Conversion of Galvanometer into Voltmeter and its calibration
10. Conversion of Galvanometer into Ammeter and its calibration.
11. Potentiometer – Calibration of high range Voltmeter.
12. Potentiometer – emf of thermocouple.
13. Deflection of Magnetometer - Tan C position.
14. Determination of  $B_H$  using Deflection-bar magnet - Null deflection method.
15. Vibration Magnetometer – Determination of  $B_H$  - Field along the axis of coil apparatus.
16. Mirror Galvanometer - emf of a thermocouple-Direct deflection method.
17. Quantity Sensitiveness of B.G.
18. Absolute capacity of a condenser – B.G.-Damping correction.
19. Comparison of Capacitances – B.G.
20. Comparison of EMF'S – B.G
21. Internal resistance of the cell – B.G.

**SEMESTER VI**  
**UCPHM20 – PRACTICAL IV: APPLIED ELECTRONICS**

**(Any 16 experiments)**

1. Construction of full wave rectifier-solid state (using 2 diodes).
2. Voltage stabilization using Zener diode and IC 7805.
3. Construction of dual power supply using 7812 and 7912.
4. Single stage amplifier using transistor- Frequency response, voltage gain and variation with load.
5. Construction of Hartley Oscillator (using transistor) –Frequency determination using CRO.
6. Construction of Colpitt's Oscillator (using transistor) –Frequency determination using CRO.
7. OR, AND gates using diodes, NOT using transistors.
8. NAND and NOR gates – Universal building block.
9. Verification of Demorgan's theorem.
10. OP – AMP - Inverting amplifier.
11. OP – AMP - Summer and subtractor.
12. FET – Characteristics.
13. Flip-flop - RS, JK, D using NAND gate.
14. Half adder, Full adder using logic gates.
15. Modulus Counters using 7490.
16. Simplification of Boolean equation using K-map using NAND gates only
17. Astable Multivibrator using IC 555.
18. Single stage amplifier using FET - Frequency response, voltage gain and variation with load.
19. Addition and subtraction using 8085.
20. Multiplication and division using 8085.
21. Code conversion binary to HEX.

**SEMESTER II**  
**UAPHC20: ALLIED PRACTICAL: PHYSICS**

(Any 15 experiments)

1. Young's modulus – Non- Uniform ending – Pin and microscope
2. Rigidity modulus by Torsional oscillations.
3. Rigidity modulus by static torsion method.
4. Surface tension of a liquid and interfacial tension between liquids by drop weight method (Densities being given)
5. Comparison of co-efficient of viscosity using burette method – (Radius using microscope).
6. Specific heat capacity of a liquid – Method of mixtures – Half time correction.
7. Sonometer – Determination of AC frequency using steel wire.
8. Focal length of a lens by distant object method, U-V method and Conjugate foci method.
9. Figure of merit of a galvanometer (Table galvanometer or mirror galvanometer)
10. Potentiometer – Calibration of low range voltmeter.
11. Potentiometer – Calibration of low range ammeter.
12. Determination of horizontal component of earth's magnetic induction using deflection magnetometer.
13. Air wedge – Determination of thickness of wire.
14. Newton's rings – Determination of radius of curvature.
15. Spectrometer – grating – Wavelength of mercury lines.
16. Zener diode – Characteristics study.
17. Construction of OR, AND, NOT gates using diodes and transistors and verification of truth table.

## SEMESTER –I/II

### USPHAn20 - SKILL BASED ELECTIVE:EVERYDAY PHYSICS

Year/ Semester 2020	Course Code	Title of The Course	Course Type	Course Category	H/ W	Credits	Marks
SEM: I/II	USPHAn20	Everyday Physics	Theory	SBE	2	-	60

#### Course Objectives

1. To make students aware of the concepts of Physics involved in day-to-day life.
2. To impart knowledge on basics of Electricity.
3. To learn safety precautions in handling electrical appliances.
4. To study the principles domestic electric appliances.

#### Course Outcomes (CO):

1. Appraise the importance of Physics in daily life.
2. Apply the knowledge to identify the components used in direct current machines
3. Describe the difference between alternating current and direct current.
4. Explain Electrical safety measurements
5. Examine the working of basic household appliances

CO	PO

CO1	M	M	M	H	H	L
CO2	M	H	L	L	M	H
CO3	H	L	H	H	M	L
CO4	M	L	H	M	M	L
CO5	M	M	H	M	L	H

(Low - L, Medium – M, High - H)

### Unit I: Laws of motion

- 1.1 Velocity – Acceleration – Force (K1,K2)
- 1.2 Momentum - Law of Conservation Momentum (K1,K2)
- 1.3 Newton’s Law’s of Motion (K3,K4)
- 1.4 Construction and Working of Aero planes (K3,K4)
- 1.5 Jet Planes – Rockets (K2,K3)
- 1.6 Relative Velocity - Apparent change in the velocity when trains move in the same and Opposite Directions. (K2,K3)

### Unit II: Circular motion

- 2.1 Circular Motion - Centripetal Force and its Applications (K3,K4)
- 2.2 Centrifugal Force (K1.K2)
- 2.3 Motion of a Cyclist along a Circular Path and Reason for Bending (K3,K4)
- 2.4 Centrifuge and its Applications (K3,K4)
- 2.5 Escape velocity – Orbital velocity – Parking orbits (K2,K3)

### Unit III: Semi-conductors

- 3.1 Energy – Law of Conservation Energy (K2,K3)
- 3.2 Basic concepts of atom- atomic number – mass number - isotopes - Nuclear Fission (K3,K4)
- 3.3 Chain reaction - Nuclear fusion (K2,K3)
- 3.4 Reactions Taking Place in Sun And Stars – Carbon nitrogen cycle – Proton – Proton cycle (K3,K4)
- 3.5 Semi conductors – doping – P-type n-type – semi conductor diode (K2,K3)
- 3.6 Light Emitting Diode (LED) and its Application - Seven segment display.(K3,K4)

#### **Unit IV: Electricity**

- 4.1 Current – Voltage – Ohm's law (K1,K2)
- 4.2 Photo Electric Effect (K2)
- 4.3 Principle, Construction and Working of Solar Cell (K3,K4)
- 4.4 Description and working of Emergency Lamp (K3,K4)
- 4.5 Sodium Vapour Lamp - Mercury Vapour Lamp. (K3,K4)

#### **Unit V: House Wiring Accessories**

- 5.1 House Wiring Accessories - Switches –Types of Switches (K1,K3,K4)
- 5.2 Lamp Holders – Types of Lamp Holders (K3,K4)
- 5.3 Ceiling Roses - Socket Outlets (K2)
- 5.4 Plugs – Wires and Cables (K1,K2)
- 5.5 Types of Wiring System (Tree And Distribution System) (K3,K4)
- 5.6 Supply of Electricity to Homes – Fuse – Earthing (K3,K4)

#### **Books for Study and Reference:**

1. M Arul Thalpathi - Basic and Applied Electronics – Com teck Publishers, 2005.
2. Dr. Prem Kumar – Basic Electrical and Electronics Engineering – Anuradha Publications, 2016.
3. Brijilal & Subramaniam.N. - Properties of Matter, 1<sup>st</sup> Edition - Vikas Publication House, New Delhi, 2001.
4. R.Murugesan – Modern Physics – S.Chand Publication – Reprint 2007.

### SEMESTER – III

#### USPHB320 - SKILL-BASED ELECTIVE: ELECTRICAL APPLIANCES - I

Year/ Semester	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
2020- 2021							
<b>SEM: III</b>	USPHB320	Skill-Based Elective: Electrical Appliances - I	Theory	-	2	-	60

#### Course Objectives

1. To give introduction to different electrical appliances.
2. To make the students of other discipline to understand the day-to-day applications of Physics.
3. To make the students apply the concepts of Physics and its application in electrical appliances.

#### Course Outcomes (CO)

1. Learn the effect of electric current and Safety precautions to be taken when working with electricity.
2. To Study the colour code for insulation wires
3. Study about supply of electricity to homes.
4. Study about different types of lamps and the behaviour of Lamps in series and lamps in parallel connection.
5. Study the construction and working of domestic appliances.

CO	PO					
	1	2	3	4	5	6
CO1	M	M	M	H	H	L
CO2	M	M	H	H	M	H
CO3	H	M	L	H	M	L
CO4	M	H	H	M	M	M
CO5	M	L	H	M	H	L

(Low - L, Medium – M, High - H)

## **Unit I: Electric Current**

- 1.1 Effects of electric current (K1,K2)
- 1.2 Safety precautions to be taken when working with electricity (K1,K2)
- 1.3 Causes of fire on electrical appliances (K1,K2)
- 1.4 Precautions and remedial measures (K1,K2)
- 1.5 Fuse (K1,K2)
- 1.6 Earthing (K2,K3)

## **Unit II: AC and DC**

- 2.1 AC and DC (K1,K2,K3)
- 2.2 Single phase and three phase connections (K3,K4)
- 2.3 RMS and peak values (K2,K3)
- 2.4 Star and delta connection, overloading (K3,K4)
- 2.5 Earthing and short circuiting (K2,K3)
- 2.6 Colour code for insulation wires (K1,K2)

## **Unit III: Electrical Accessories**

- 3.1 House Wiring Accessories (K1,K2)
- 3.2 Switches, Types of Switches and circuit breaker (K1,K2,K3)
- 3.3 Lamp Holders, Types of Lamp Holders (K1,K2,K3)
- 3.4 Ceiling Roses, Socket Outlets, Plugs (K2,K3)
- 3.5 Wires and Cables (K1,K2)
- 3.6 Types of Wiring System (Tree And Distribution System)- Supply of Electricity to Homes (K3,K4)

## **Unit IV: Lamps**

- 4.1 Light effect (K1)
- 4.2 Working of electric bulb (K1,K2)
- 4.3 Carbon Arc lamps (K1,K2)
- 4.3 Sodium Vapour lamp (K1,K2,K4)
- 4.4 Mercury Vapour lamp (K1,K2,K4)
- 4.5 Grouping of lamps: Lamps in series and lamps in parallel (K1,K3)

## **Unit V: Domestic appliances**

- 5.1 Construction and working of domestic appliances (K1)
- 5.2 Electric iron box (K2,K3,K4)
- 5.3 Immersion heater (K2,K3)
- 5.4 Electric stove (K2,K3,K4)
- 5.5 Washing machine (K2,K3)
- 5.6 Air conditioner (K2,K3)

**Books for Study and Reference:**

1. Dr.P.Mani – A Textbook of Engineering Physics – Dhanam Publications, Chennai, 2011.
2. M.L.Anwani – Basic Electrical Engineering – DhanpatRai and Co., NaiSarak, Delhi, 2009.

## SEMESTER – IV

### USPHC420 - SKILL-BASED ELECTIVE: ELECTRICAL APPLIANCES - II

Year/ Semester 2020-2021	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
<b>SEM: IV</b>	USPHC420	Skill-Based Elective: Electrical Appliances - II	Theory	-	2	-	60

#### Course Objectives

1. To give introduction to different electrical appliances.
2. To make the students of other discipline to understand the day-to-day applications of Physics.
3. To make the students apply the concepts of Physics and its application in electrical appliances.

#### Course Outcomes (CO)

1. Learn the importance of passive components and charges.
2. To Study the behaviour of resistance and capacitance
3. Study the applications of electric and magnetic fields.
4. Study the behaviour electrical appliances like inverter, UPS and lamps.
5. Study the construction, working and applications of domestic appliances.

CO	PO					
	1	2	3	4	5	6
CO1	M	M	L	H	H	H
CO2	M	M	H	H	M	L
CO3	H	M	L	H	M	H
CO4	M	H	H	M	M	M
CO5	H	L	H	M	L	H

(Low - L, Medium – M, High - H)

## **Unit I: Passive Components and Charges**

- 1.1 Resistance (K1,K2)
- 1.2 Resistors in series and in parallel (K3,K4)
- 1.3 Capacitance (K1,K2)
- 1.4 Capacitors in series and in parallel (K3,K4)
- 1.5 Electrical Charge (K1,K2)
- 1.6 Current – Electrical Potential (K1,K2,K3)

## **Unit II: Electric Circuit**

- 2.1 Ohm's law (K1,K2)
- 2.2 Galvanometer, Ammeter (K1,K2)
- 2.3 Voltmeter and Multimeter (K1,K2)
- 2.4 Analog and Digital (K2)
- 2.5 Electrical Energy - Power – Watt – kWh (K3,K4)
- 2.6 Consumption and electrical power (K2)

## **Unit III: Electricity and Magnetism**

- 3.1 Electromagnetic Induction (K1,K2)
- 3.2 Self induction and Mutual induction (K3,K4)
- 3.3 Electromagnets (K1,K2)
- 3.4 Chokes (K1,K2)
- 3.5 Transformers (K3,K4)
- 3.6 Applications - Electric bell (K3,K4)

## **Unit IV: Electrical Appliance**

- 4.1 Inverter – UPS (K1,K2)
- 4.2 Generator and Motor (K1,K2,K3,K4)
- 4.3 Different types of windings (K1,K2)
- 4.4 Fluorescent lamps (K3,K4)
- 4.5 Street Lighting – Flood lighting (K1,K2,K3)
- 4.6 Electrical Fans (K1,K2)

## **Unit V :Domestic Appliances**

- 5.1 Wet Grinder – Mixer (K1,K2)
- 5.2 Stabilizer – Refrigerator (K1,K2,K3,K4)
- 5.3 Electromagnetic waves (K1,K2)
- 5.4 Applications – Microwave oven (K2,K3)
- 5.5 Television (K1,K2,K3)
- 5.6 Wi-Fi- Modem – LCD (K1,K2,K3)

**Books for study:**

1. Theraja B.L. Basic Electronics – S.Chand and Co. Pvt. Ltd., 2000.
2. A K Theraja- A text book in Electrical Technology- S chand& Co, 2014
3. Sedha R.S. – Text book of Applied Electronics -S.Chand and Co. Pvt. Ltd., 2000.

**SEMESTER VI**  
**USPHD520 – SKILL BASED ELECTIVE: PHYSICS FOR COMPETITIVE EXAMINATIONS**

<b>Year</b>	<b>Course Code</b>	<b>Title Of The Course</b>	<b>Course Type</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
2020							
<b>SEM: VI</b>	USPHD520	Skill Based Elective: Physics For Competitive Examinations	Theory	Elective	2	-	60

**Learning Objectives**

1. To make the students familiar with problems in Physics.
2. To prepare the students for various Entrance examinations.
3. To know the various applications of physics.
4. To summarize important topics in physics.

**Course Outcomes (CO)**

The learners will be able to

1. To know the basic laws in Physics and its applications
2. To learn the principle of optics and study the light experiments like Newton's ring and Air wedge.
3. To study and evaluate the problems in Electricity and magnetism.
4. To give an extended knowledge in atomic physics and nuclear physics to solve the problems.
5. To know the application of semiconductor materials in various electronic circuits.

CO	PO					
	1	2	3	4	5	6
CO1	M	L	M	H	M	H
CO2	L	M	L	H	M	H
CO3	H	M	H	L	M	H
CO4	M	H	H	M	H	M
CO5	M	M	L	M	H	H

(Low - L, Medium – M, High - H)

### Unit I: Mechanics and Waves

- 1.1 Newton's laws of motion and its application Conservative forces and frictional forces  
-Centrifugal and Coriolis forces (K1,K2,K3,K4)
- 1.2 Kepler's laws – Escape velocity and artificial satellite - Gravitational Law and field.  
(K1,K2)
- 1.3 Motion under a central force - Moments of Inertia and products of Inertia - Principal moments and axes (K2,K3)
- 1.4 Rigid body motion, fixed axis rotations - Bernoulli's theorem – Elasticity (K3,K4)
- 1.5 Waves and Simple Harmonic motion – Lissajous figures- Damped and Undamped oscillators (K1,K2,K3,K4)
- 1.6 Wave equation -Resonance – Doppler effect in sound- Ultrasonics and applications.  
(K1,K3,K4)

### Unit II: Light

- 2.1 Thick lens formulae - power of a lens - Fermat's Principle – Rayleigh criterion.(K1,K2)
- 2.2 Resolving power of a prism and grating - Conditions for constructive and destructive interferences. (K3,K4)
- 2.3 Newton's rings - Calculation of radius of curvature – Air wedge – Calculation of bandwidth. (K2,K3)
- 2.4 Fresnel and Fraunhofer diffraction (K3,K4)

2.5 Linear, circular and elliptic polarization - double refraction and optical rotation  
(K1,K2,K3)

2.6 Specific rotatory power of an optically active substance (K3,K4)

### **Unit III: Electricity and Magnetism**

3.1 Electric Charge - Coulomb law – Gauss law – Electric potential (K3,K4)

3.2 Capacitors – Energy stored in a capacitor–Dielectric and polarization  
(K2,K3)

3.3 Ampere’s law - BiotSavart law – Faraday’s laws of electromagnetic induction  
(K1,K2)

3.4 Self-inductance – Mutual inductance – Alternating currents. (K3,K4)

3.5 Growth and decay of current and charge in LR circuit – RC circuit – LCR circuit.  
(K3,K4)

3.6 Magnetic permeability and susceptibility, Dia, para and ferromagnetism,  
Measurement of susceptibility, Hysteresis loop. (K1,K2)

### **Unit IV: Atomic and Nuclear Physics**

4.1 Atomic physics: X-ray spectrum – Compton Effect (K1,K2)

4.2 Compton wavelength Photoelectric effect (K2,K3,K4)

4.3 Calculation of DeBroglie wavelength of electrons (K2,K3,K4)

4.4 Wave velocity and group velocity for DeBroglie waves (K3,K4)

4.5 Uncertainty principle - Pauli Exclusion Principle (K3,K4)

4.6 Mass defect - Binding energy – Radioactive disintegration law – half life – Q value  
of nuclear reactions – Nuclear fission and fusion (K1,K2,K3,K4)

### **Unit V: Electronics**

5.1 Semiconductors - Rectifiers (K2)

5.2 Zener diode as voltage regulator (K2,K3,K4)

5.3 Transistor as an Amplifiers – Relation between  $\alpha$  and  $\beta$  (K3,K4)

5.4 Feedback amplifier – Oscillators (K1,K2)

5.5 Amplitude and frequency modulation (K2,K3)

5.6 OR, AND, NOR and NAND gates – OP amps (K3,K4)

### **Books for Study:**

1. D S Mathur – Mechanics – S. Chand Publication, 2001.
2. Brijlal Subramaniam - Properties of Matter (Unit I) – Eurasia Publication House Pvt. Ltd., 2001
3. Nelkan and Parker – Advanced Level Physics – Heinemann Longmann Education International Publication, 1995. (Unit II)
4. C.L Arora - Simplified Course in B.Sc Physics – S.Chand, 1999. (Unit III)

5. S.L.Kakani – Objective Physics – S.Chand and co. Ltd., New Delhi, 2001. (Unit IV)
6. R.S.Sedha – Basic Electronics – S.Chand Publications, New Delhi, 2006 (Unit V)
7. Dr.N.K.Nayyar - Unique Quintessence of physics – Unique Publishers, 2010.

**Books for Reference:**

1. Dr.Surekha Singh – UGC CSIR/NET/JRF/SLET – UpkarPrakashan Publishers.
2. Karen Cummings, Priscilla Laws, Edward Redish, Patrick Cooney - Understanding Physics, 6<sup>th</sup> Edition – Wiley Student Education, 2005.
3. The Pearson Guide to Objective Physics – S.Chand Publishing House, 2007.
4. Sathya Prakash Arya – Objective Physics – MTG Books Publishers, 2007.
5. S.L.Kakani - Objective Physics, 10<sup>th</sup> Edition - S.Chand Publishing House, 2007.
6. K.C.Jain, C.LArora – Numerical Problems in Physics - S.Chand Publishing House, 2005

## SEMESTER VI

### USPHE620 – SKILL BASED ELECTIVE: MOBILE COMMUNICATION

Year 2020	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
SEM: VI	USPHE620	Mobile Communication	Theory	SBE	2	-	60

#### Course Objectives

1. To make the students acquire knowledge about mobile phones.
2. To have the basic understanding of working of cell phones.
3. To know the various applications radio propagation.
4. To understand the multiple access techniques in communication.

#### Course Outcomes (CO)

The learners will be able to

1. To know the basics generations of mobile communication
2. To learn the cellular concept and techniques
3. To study the mobile radio propagation and concepts of diffraction, scattering and interference.
4. To attain knowledge in cell coverage for signal and traffic.
5. To understand the concepts of multiple access techniques.

CO	PO					
	1	2	3	4	5	6
CO1	M	M	L	M	H	H
CO2	M	L	H	M	M	H
CO3	L	M	L	H	M	H
CO4	M	H	M	H	L	L
CO5	L	M	M	M	L	H

(Low - L, Medium – M, High - H)

## **Unit I: Introduction to Cellular Mobile Communication**

- 1.1 Zero generation - push to talk (K1,K2)
- 1.2 First generation – Advanced mobile phone system (K2,K3)
- 1.3 Second generation – Advantages and disadvantages (K3,K4)
- 1.4 Third generation (K1,K2,K3)
- 1.5 Fourth generation (K3,K4)

## **Unit II: Cellular Concept**

- 2.1 Frequency Reuse concept (K1,K2)
- 2.2 Channel Assignment (K1,K2)
- 2.3 Handoff technique (K2,K3)
- 2.4 Trunking and Grade of service (K3,K4)
- 2.5 Cell splitting – Cell sectoring (K2,K3)

## **Unit III: Mobile Radio Propagation**

- 3.1 Free Space propagation model (K1,K2)
- 3.2 Fraunhofer region (K1,K2)
- 3.3 Properties of Radio waves (K3,K4)
- 3.4 Concept of Reflection (K1)
- 3.5 Concept of Diffraction (K3,K4)
- 3.6 Scattering – Interference (K3,K4)

## **Unit IV: Cell coverage for Signal and Traffic**

- 4.1 Introduction - Cell coverage for Signal and Traffic (K3,K4)
- 4.2 Propagation in near in distance (K2,K3)
- 4.3 Curves for near in propagation (K2,K4)
- 4.4 Long distance propagation (K3)
- 4.5 Mobile to Mobile Propagation (K3,K4)
- 4.6 Doppler shift. (K3,K4)

## **Unit V: Multiple Access Techniques**

- 5.1 Introduction-Multiple Access Techniques (K1,K2)
- 5.2 FDMA (K3,K4)
- 5.3 TDMA (K4)
- 5.3 CDMA-Synchronous CDMA (K1,K2,K3,K4)
- 5.4 Soft handover – Hard handover (K1,K2)
- 5.5 Roaming – SDMA (K3,K4)

**Books for Study:**

- 1 G.K.Behera – Lopamudra: Mobile Communication – Sci-tech Publication Pvt.Ltd.,2009. (Unit I & V)
- 2 V.Jeyasri Arokiamary – Mobile Communication - Technical Publications, Pune, 2008. (Unit II & III.)
- 3 G.Radha Krishna – Cellular and Mobile Communications – BS Publications, 2010. (Unit IV)

**Books for Reference:**

1. T.G. Palanivelu, R.Nakkeeran - Wireless and Mobile Communication - PHI Learning Pvt Ltd., 2009.

## SEMESTER V & VI

### UGPHAn20 - NON MAJOR ELECTIVE: FUNDAMENTALS OF PHYSICS

Year 2020	Course Code	Title of the course	Course type	Course Category	H/w	Credits	Marks
<b>SEM: V &amp; VI</b>	UGPHA 520/620	NME: Fundamentals of Physics	Theory	Core	3	-	100

#### COURSE OBJECTIVES

1. To make the students understand the Kinetics & Kinematics
2. To impart Knowledge of Heat and Temperature
3. To provide a deep understanding of the sound and light
4. To present a clear & consistent picture of the Nuclear reactor, Atom bomb, production of X rays and explain the astronomy

#### COURSE OUTCOMES (CO)

1. To learn the Students understand the Newton's law's & applications
2. To highlight the importance of transmission of heat
3. To familiarize the ultrasonic and Laser
4. To help of the students understand the concepts of Nuclear fission and Nuclear fusion
5. To derive the equation for Newton's law of gravitation and satellite motion

CO	PO					
	1	2	3	4	5	6
CO1	H	L	M	H	M	L
CO2	M	M	H	L	M	H
CO3	H	L	H	H	L	H
CO4	L	H	H	M	M	M
CO5	M	M	L	M	M	L

(Low - L, Medium - M, High - H)

## **Unit I - Kinematics**

- 1.1 Position and displacement – velocity – speed (K1,K2)
- 1.2 Newton's law of motion – applications of Newton's third law (K1,K2)
- 1.3 Fundamental forces in nature (K1, K4)
- 1.4 Apparent weight of a man in lift (K3,K4)
- 1.5 Work – power – energy (K1,K2)
- 1.6 Applications of centripetal and centrifugal forces (K3,K4)

## **Unit II – Heat**

- 2.1 Heat – measures of heat(temperature) (K1,K2)
- 2.2 Specific heat – heat of fusion (K1,K2)
- 2.3 Heat of vaporization (K1)
- 2.4 Transmission of heat – conduction – Convection - radiation (K1, K4)
- 2.5 Peltier effect (K3,K4)
- 2.6 Super conductors - applications of super conductors (K1,K2)

## **Unit III: Sound and Light**

- 3.1 Sound - properties of sound - Ultrasonics - Different types of scans – medical applications of ultrasonics (K3,K4)
- 3.2 Clinical applications of different types of scans (obstetrics - early pregnancy kidney and liver) (K3,K4)
- 3.3 Acoustics of buildings – reverberation (K2,K3)
- 3.4 Acoustics aspects of hall and auditorium (K1,K2)
- 3.5 Light - properties of light - different types of lenses (K1,K2)
- 3.6 Human eye – defects of vision – laser – its medical applications (K1,K2)

## **Unit IV: Atomic and nuclear Physics**

- 4.1 Atom - nucleus - atomic number - mass number (K1,K2)
- 4.2 Nuclear fission - chain reaction – uncontrolled chain reaction (K1,K2,)
- 4.3 Application - atom bomb (K3,K4)
- 4.4 Controlled chain reaction - application - nuclear reactor (K3,K4)
- 4.5 Nuclear fusion – hydrogen bomb (K3,K4)
- 4.6 X – rays - production of X – rays properties of X - rays - medical applications of X – rays. (K1,K2,K3)

## **Unit V: Astronomy**

- 5.1 Gravitation - Newton's law of gravitation (K1)
- 5.2 Satellite motion - escape velocity – weightlessness in a satellite (K1, K4)
- 5.3 Geocentric theory – heliocentric theory (K1,K2)
- 5.4 Kepler's law - solar system - individual planets (K1,K2,)
- 5.5 Comets - asteroids - and other constituents of solar system - (K3,K4)
- 5.6 Formation of stars (K1,K2)

**Books for Reference:**

1. Brijial and N.Subramaniam - A Textbook of Optics - S.Chand & Co. Ltd., New Delhi, 2004.
2. Brijial and N.Subramaniam - Heat and Thermodynamics - S.Chand & Co. Ltd., New Delhi, 1998.
3. R.Murugesan - Properties of Matter - S.Chand & Co. Ltd., New Delhi, 2005.
4. Brijial and N.Subramaniam - A Textbook of Sound - N.Vikias Publishing House, New Delhi, 2006.
5. G.K.Sadidharan - The Great Universe - S.Chand & Co. Ltd., 2003.
6. K.S.Krishnaswamy - Astrophysics: A Modern Prespective - New Age International Pvt. Ltd., New Delhi, 2002.

# **Department of Communication Media (UG)**

## **SYLLABUS AND REGULATIONS**

Under

**OUTCOME-BASED**

**EDUCATION2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

# **B.Sc. Visual Communication**

## **OUTCOME BASED EDUCATION - 2020 (Effective for the Batch of Students Admitted from 2020-2021)**

### **A) INSTITUTION LEVEL**

#### **Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

#### **Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighbouring districts.

### **B) NAME OF THE PROGRAMME: B.Sc. Visual Communication**

#### **Vision:**

To enhance the logical reasoning, analytical thinking and problem-solving skills of the students and prepare them to be lifelong learners who will be socially responsible to navigate the complexities of a rapidly changing society.

### **C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

A candidate who has qualified in Higher Secondary Examination conducted by the Government of Tamil Nadu or an examination accepted as equivalent thereto is eligible for seeking admission to the B.Sc. Visual Communication Course.

**Course Duration:** The duration of the course is three academic years consisting of 6 semesters.

**Structure of the Course B.Sc. Visual Communication:**

Sem	Part	Subject Code	Title of Subject	Instruc-tional Hours/ Week	Exam Hours		Cre dits	Marks
					Th	Pr		
I	I	ULTAA20	Tamil Paper – I	6	3	-	3	40+60
	II	UENGA20	English Paper – I	6	3	-	3	40+60

### **SKILLED PAPERS**

**I Years – I Sem. - Basic Drawing (other Departments)**

**II Sem. Basic Drawing (other Departments)**

**II years – III Sem. - Art of story board (for Vis Com students)**

**IV Sem.–Introduction to Art Direction (for Vis Com students)**

**III years – V Sem. – E-content Production (for Vis Com students)**

**VI Sem. – Digital Publishing (for Vis.Com Students)**

**NON-MAJOR ELECTIVE (offered to other Departments)**

**III years – V and VI Semester– Advertisement**

**Alternative paper -Democracy and Media**

## PROGRAMME, B.Sc. VISUAL COMMUNICATION (2020-2021)

### PROGRAMME OUTCOMES (PO)

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

### PROGRAM SPECIFIC OUTCOME (PSO)

1. To Acquire Fundamental knowledge of Visual communication and the related study area.
2. To become competent enough to undertake the professional job as per the demands and requirements of the media and Entertainment Industry.
3. To become a socially responsible citizen with a global vision.
4. To get equipped with ICT competencies including Digital literacy.
5. To become ethically committed media professionals and entrepreneur by adhering to human values, Indian, and the Global culture.
6. To make women professionals in media and attain professional portfolios to become entrepreneurs to increase employability.

**SEMESTER - I**  
**UCVCA20 - INTRODUCTION TO VISUAL COMMUNICATION**

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> UCVCA20	<b>Title of the Course:</b> Introduction to Visual Communication	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objective:**

- To give an overview about the field of Visual communication and Visual language and to enable them to understand the various fields of work in this area

**Course Outcomes (CO)**

The Learners will be able to

CO1: Indicating the Basic Concepts of Communication.

CO2: Analyzing the concepts of Visual cues and Visual Theories.

CO3: Acquiring an in-depth knowledge in Visual Analysis and Visual Stereotypes

CO4: Identifying the Essential aspects of Visual Language.

CO5: Exploring the insights of Visuals in Media.

CO5	H	H	H	M	H	H

**(Low - L, Medium – M, High - H)**

## **Course Syllabus:**

### **Unit I: Basics of Visual Communication**

**(18 hours)**

- 1.1. Definition: communication. (K1, K2)
- 1.2. Need for and Importance of Communication. (K1, K2)
- 1.3. Introduction to Visual Communication: Sensing, Selecting and Perceiving (K1,K2,K3, K4)
- 1.4. Visual Cues: Color, Form, Depth. (K1, K2, K3, K4)
- 1.5. Eight Depth Factors. (K1, K2, K3, K4)
- 1.6. Movements. (K3, k4)

### **Unit II: Visual Theories and Persuasion**

**(18 hours)**

- 2.1. Sensory Theories of Visual Communication: Gestalt. (K3, k4)
- 2.2. Sensory Theories of Visual Communication: Constructivism. (K1, K2, K3, K4)
- 2.3. Perceptual Theories of Visual Communication: Semiotics –Charles sanders Peirce, (K1, K2, K3, K4)
- 2.4. Cognitive Theory, (K1, K2, K3, K4)
- 2.5. Visual Persuasion in Advertising, (K1, K2, K3, K4)
- 2.6. Visual Recurring. (K3, k4)

### **Unit III: Visual Stereotypes and Analysis**

**(18 hours)**

- 3.1. Visual Stereotypes: Reinforcing Stereotypes with Images.(K1, K2, K3, K4)
- 3.2. Visual Analysis: Composition.(K1, K2, K3, K4)
- 3.3. Semiotic Signs and Codes (K3, K4)
- 3.4. Cognitive Elements(K1, K2, K3, K4)
- 3.5. Purpose of the Work, (K3, K4)
- 3.6. Image Aesthetics (K3, K4)

### **Unit IV: Visual Language**

**(18 hours)**

- 4.1. Principles of Visual & other Sensory Perceptions. (K1, K2, K3, K4)
- 4.2. Color Psychology & theory (some aspects) (K1, K2, K3, K4)
- 4.3. Color symbolism, Visual Thinking (K3, K4)
- 4.4. Principles of Design (K1, K2, K3, K4)
- 4.5. Elements of Design(K1, K2, K3, K4)
- 4.6.Process of developing creative ideas, Visual Culture(K3, K4)

### **Unit V: Visuals in Media**

**(18 hours)**

- 5.1. Definition: Media. (K1, K2)
- 5.2. Types of Media – Traditional Media & folk Media (K1, K2, K3, K4)
- 5.3. Print Media, Electronic Media and New Media.(K1, K2, K3, K4)
- 5.4. Visual language.(K3, K4)
- 5.5.Visual pleasure. (K3, K4)
- 5.6. Concept of gaze. (K3, K4)

**Books for Study and Reference:**

1. Seeing is Believing: An introduction to visual communication, 4<sup>th</sup> edition, – Arthur Asa Berger, McGraw Publication, 2012
2. Paul Martin Lester – Visual Communication: Images with Messages, 5<sup>th</sup> Edition - Wadsworth Cengage Learning, 2011.

## SEMESTER I

### UCVEB20 - PRACTICAL - I - DRAWING AND DESIGN

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> UCVEB20	<b>Title of the Course:</b> Drawing and Design	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objective:

- To develop basic drawing and modeling skills in students and to enable them to expand their visual expression skills.

#### Course Outcomes(CO)

The Learners will be able to

CO1: Classifying the Basic Drawing Skills

CO2: Acquiring Knowledge about Geometrical Shapes, Alphabets and Numbers and create Still life.

CO3: Applying the Perspective Techniques in outdoor sketching using appropriate Lights and Shades

CO4: Practicing Colors Using Watercolor and Poster colors

CO5: Implementing the Techniques to create Animals Birds and Human Forms

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	M	H	M	H
CO3	H	H	M	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

(Low - L, Medium – M, High - H)

CO	PO

CO1	H	H	H	H	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low - L, Medium – M, High - H)

**Course Syllabus:****Exercises: Each exercise: 6 hours**

1. Basic geometrical shapes
2. Alphabets, Numbers and 3D Lettering
3. Still life
4. Overlaying (Geometrical Shapes, Irregular shapes)
5. Patterns and structure
6. Perspectives
7. Light and shades
8. Birds and Animal
9. Human form
10. Outdoor sketching
11. Human portrait with Light.
12. Water color Landscape.

Cognitive level: (K1, K2, K3, K4, K5)

The drawing record should contain exercise completed by each student on every practical class. All exercises must be in pencil, charcoal and different medium – water color, poster color.

The Internal Evaluation (40 Marks) is based on the exercises.

The Semester Examination (60 marks) is based on the practical examination (45 marks), Record (10 marks) and Viva Voce (5 marks)

## SEMESTER - I

### UAHCA20 - ALLIED - I HUMAN COMMUNICATION

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: I</b>	UAHCA20	Human communication	Theory	Allied	6	5	100

#### Objective:

- To enable students, understand the basic concepts of Human communication and the evolution of communication skills.

#### Course Outcomes(CO)

The Learners will be able to

CO1: Restating the Basic Concepts of Communication.

CO2: Acquiring Knowledge about the Barriers of Communication.

CO3: Describing the Various types of Verbal and Non Verbal Communication.

CO3: Acquiring in depth knowledge in Inter personal and Intra Personal communication.

CO4: Applying the Communication Skills in Public Speaking.

(Low - L, Medium – M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction to Communication and Language (18 hours)**

- 1.1. Human Communication what and why. (K1, K2)
- 1.2. Define Communication (K1, K2, K3)
- 1.3. Functions of Communication. (K1, K2)
- 1.4. Types - Western Models of communication: Aristotle Model of Communication, Lasswell Model, Shannon and Weaver Model of Communication. Eastern Models of Communication: Sadharanikaran Model. (K1, K2, K3)
- 1.5. Language: Power and nature of language. (K1, K2, K3)
- 1.6. Gender and culture of language. (K2, K3, K4)

### **Unit II: Verbal and Non-Verbal Communication (18 hours)**

- 2.1. Introduction to verbal communication (K1, K2, K3)
- 2.2. Functions of verbal and non-verbal communication. (K1, K2, K3)
- 2.3. Functions of non-verbal communication (K1, K2, K3)
- 2.4. Types of verbal communication (K1, K2, K3)
- 2.5. Types of non-verbal communication - Chronemics, Proxemics, Oculistics, Olfactics, Haptics, Kinesics, Chromatics, Silence (K1, K2, K3)
- 2.6. Characteristics of nonverbal communication (K1, K2, K3)

### **Unit III: Interpersonal and Intra Personal Communication (18 hours)**

- 3.1. Characteristics of Intrapersonal Communication. (K1, K2, K3)
- 3.2. Characteristics of Interpersonal Communication (K1, K2, K3)
- 3.3. Relational development and maintenance (K1, K2, K3)
- 3.4. Models of self-disclosure. (K1, K2, K3)
- 3.5. Group Communication and its characteristics, Types and Goals. (K1, K2, K3, K4)
- 3.6. Patterns of interaction - problem solving in groups. (K1, K2, K3, K4)

### **Unit IV: Listening and Speaking (18 hours)**

- 4.1. Listening - Misconceptions about listening. (K1, K2, K3)
- 4.2. Challenges of effective listening. (K1, K2, K3)
- 4.3. Types of informative speaking. (K1, K2, K3)
- 4.4. Informative VS persuasive speaking. (K1, K2, K3)
- 4.5. Techniques of informative speaking. (K1, K2, K3)
- 4.6. Building credibility as a speaker. (K1, K2, K3)

### **Unit V: Public Communication (18 hours)**

- 5.1. Public communication. (K1, K2, K3)
- 5.2. Effective public communication. (K1, K2, K3)
- 5.3. Purpose of Public communication (K1, K2, K3)
- 5.4. Speech structure. (K1, K2, K3)
- 5.5. Analyzing and Public speaking. (K1, K2, K3)
- 5.6. Rhetoric, persuasion and propaganda. (K1, K2, K3)

**(Low - L, Medium – M, High - H)**

Course Syllabus:

**Unit I: Introduction (15 hours)**

- 1.1. History of Photography. (K1, K2, K3)
- 1.2. Analog Photography. (K1, K2, K3)
- 1.3. Digital Photography. (K1, K2, K3)
- 1.4. Parts and function of a Digital Camera Works – The Sensor – Angle of View – Shutter Speed
- 1.5. Aperture – Focal Length – Depth of Field. (K1, K2, K3, K4)
- 1.6. Camera Features. (K1, K2, K3) , Camera Modes. (K1, K2, K3)

**Unit II: Camera Composition (15 hours)**

- 2.1. Composition – Rules – Subject – Focal Point – Centre of Interest – Rule of Thirds. (K1, K2, K3)
- 2.2. Perspective and choosing the Viewpoint. (K1, K2, K3)
- 2.3. Viewfinder and View Screen. (K1, K2, K3)
- 2.4. Exposure Controls. (K1, K2, K3)
- 2.5. Texture – Pattern – Shapes and Forms – Emphasis – Filters. (K1, K2, K3)
- 2.6. Basic Shots – High and Low Angle. (K1, K2, K3)

**Unit III: Color and Lighting (15 hours)**

- 3.1. Characteristics of Light and color. (K1, K2, K3)
- 3.2. Quality of light, guidelines for lighting (K1, K2, K3)
- 3.3. Color Temperature, Lighting Control and lighting equipment – Diffused Light – Bounced Light – Reflection Light – Refraction Light (K1, K2, K3)
- 3.4. Natural Light – Artificial Light – Flash Light – Portraiture Light (K1, K2, K3)
- 3.5. Three Point Lighting (K1, K2, K3)
- 3.6. Four Point Lighting (K1, K2, K3)

**Unit IV: Digital Imaging (15 hours)**

- 4.1. Lens and special lens Types. (K1, K2, K3)
- 4.2. Camera Types – Zoom Types. (K1, K2, K3)
- 4.3. Image Resolution – Types of Resolution. (K1, K2, K3)
- 4.4. Image File Format – Raster and Vector Formats, Properties of common image file format. (K1, K2, K3, K4)
- 4.5. Image Adjustment Tools. (K1, K2, K3)
- 4.6. Editing Digital image – Manipulating an Image. (K1, K2, K3)

**Unit V: Photography techniques (15 hours)**

- 5.1. Darkroom Techniques (K1, K2, K3)
- 5.2. Film Processing. (K1, K2, K3)
- 5.3. Developing and Printing. (K1, K2, K3)
- 5.4. Printer Resolution and its types. (K1, K2, K3)
- 5.5. Types of Photography: Nature – Architecture – Landscape – Wildlife – Sports – Fashion. (K1, K2, K3, K4)
- 5.6. Photo Journalism. (K1, K2, K3)

### **Books for Study and Reference:**

## SEMESTER - II

### UCVCD20 - PRACTICAL – III – PROFESSIONAL PHOTOGRAPHY

<b>Year: I</b> <b>Sem: III</b>	<b>Course Code:</b> UCVCD20	<b>Title of the Course:</b> Professional Photography	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objective:

- To enable students to try first-hand, the basic techniques of photography and to develop the skills for a good photographer

#### Course Outcomes (CO)

The Learners will be able to

CO1: Discussing the various parts and functions of the camera.

CO2: Acquiring knowledge in lighting and exposure techniques

CO3: Applying composition skills.

CO4: Utilizing the various filters and lenses.

CO5: Creating various genres of photography.

CO5	H	H	H	M	H	H

(Low - L, Medium – M, High - H)

## **Course Syllabus:**

Photography record / Album should include all the necessary details (colour, shutter speed, lens type etc..)

Final practical examination will test students' knowledge on photography (either viva or written exam or practical work on fundamentals of photography) the following exercises should be covered.

### **EXERCISES: 1 – 3 (20 hours), 3 – 6 (20 hours), 6 – 9 (20 hours)**

(Include the basic Elements and principles in photographic Composition)

1. Basic shots (Long, Mid, Close-up, low angle, high angle)
2. Portraiture
3. Reflection, play of light, shadow
4. Motion and freezing movement
5. Landscape (scenic, people, birds / animals, monuments)
6. Silhouette
7. Indoor Photography with three point lighting
8. Industrial, Sports/action
9. Advertising photography
10. Picture story assignment

Cognitive level: K1,K2,K3,K4,K5

The Internal Examination (40 Marks) is based on the exercises and Album preparation.

The Semester Examination (60 Marks) is based on the Practical Examination (45 Marks) and the Record (10 Marks) and Viva Voce (5 Marks)

## SEMESTER – II

### UABAA20 - ALLIED – II: BASICS IN ADVERTISING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> UABAA20	<b>Title of the Course:</b> Basics in Advertising	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

#### Objective:

- To provide a basic understanding about the field of Advertising and to develop skills in creating media advertisement.

#### Course Outcomes (CO)

The Learners will be able to

CO1: Discussing the basic concepts of advertising and its history.

CO2: Acquiring basic knowledge about advertising media.

CO3: Analyzing the process of layout designing for an advertisement.

CO4: Evaluate the impact of advertisement on society.

CO5: Creating an advertisement for print, radio and television.

(Low - L, Medium – M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction to Advertising (18 hours)**

- 1.1 Advertising – definition. (K1, K2)
- 1.2 History of advertising, Ads in India. (K2, K3)
- 1.3 Benefits of advertising. (K2, K4)
- 1.4 Role of advertising. (K2, K3)
- 1.5 Types of ads, Market segmentation. (K2, K3)
- 1.6 Functions of advertising.(K2, K4)

### **Unit II: Advertising Concepts (18 hours)**

- 2.1. Advertising agency (K1, K2)
- 2.2. Structure of Ad agency. (K2, K3)
- 2.3. Marketing Mix, Product Life Cycle, USP, Brand Image.(K2, K3)
- 2.4. Types of Advertising Media. (K2, K3,)
- 2.5. Media Planning.(K2, K3, K4)
- 2.6. Advertising codes of ASCI. (K2, K3, K4)

### **Unit III: The Process of Designing an Ad (18 hours)**

- 3.1. Process of Visualization. (K2, K3)
- 3.2. Copywriting and its techniques.(K2, K3)
- 3.3. Photography, Illustration. (K2, K3, K4)
- 3.4. Image Manipulation.(K2, K3)
- 3.5. Types of headline. (K2, K3)
- 3.6. Layout design – Grid, thumb nail, roughs and compressive layout, final output. (K1,K2, K3,K4)

### **Unit IV: Advertising and Society (18 hours)**

- 4.1. Social, psychological and economic effects of advertising on Society.(K1, K2, K3)
- 4.2. Current issues. (K2, K3)
- 4.3. Commercialism in advertising. (K2, K3)
- 4.4. Advertising and children, Advertising and women. (K1, K2, K3)
- 4.5. Ethics in Advertising. (K1, K2, K3)
- 4.6. Role of Advertising in Social Media.(K1, K2, K3, K4)

### **Unit V: Practical (18 hours)**

Practical assignments in advertising, Preparation of print, Preparation of Radio Ad, Preparing ads for specific target Group. (K1, K2, K3, K4)

### **Books for Study and Reference:**

1. S.N. Murthy, U Bhojana - Advertising an IMC Perspective - Excel Books, 2007
2. S. A. Chunawalla - Advertising, Sales and Promotion Management - Himalaya Publishing House, 2006
3. Frank Jefkins, Daniel Yadin – Advertising, 4<sup>th</sup> Edition - Pearson Education, 2006.
4. J.V. Vilanilam, A.K.Varghese - Advertising Basics: A Resource Guide for Beginners - Response Books, 2004

5. Sandage, Fryburger, Rotzoll - Advertising Theory and Practice, 11<sup>th</sup> Edition - AITBS Publishers, 2004
6. R.C.Bhatia - Marketing Communication and Advertising - Galgotia Publishers, 2003
7. John Philip Jones - International Advertising: Realities and Myths - Sage Publications, 2000
8. John Philip Jones - How Advertising Works - Sage Publications, 1998
9. Mahendra Mohan - Advertising Management: Concepts and Cases - Tata McGraw Hill, 1989
10. Robert Cluley - Essentials of Advertising, Kogan Page Publishers, February, 2017
11. Courtland L.Bovee - Advertising Excellence, Mc Graw Hill, 1995

**SKILLED BASED ELECTIVE**  
**BASIC DRAWING (I Years students of other Department)**

<b>Year: I</b> <b>Sem: II</b>	<b>Course code:</b> <b>USCMA120/ USCMA220</b>	<b>Title of the Course:</b> <b>Basic drawing</b>	<b>Course Type:</b> <b>Practical</b>	<b>Course Category:</b> <b>Skill Based Elective</b>	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--	---	---	--	-----------------	---------------------	---------------------

**Objective:**

- To develop basic drawing and modeling skills in students and to enable them to expand their visual expression skills.

**Course Outcomes (CO)**

The Learners will be able to

CO1: Classifying the Basic Drawing Skills.

CO2: Acquiring Knowledge about Geometrical Shapes, alphabets and Numbers to create Still life.

CO3: Identifying the concept of angles of Lighting and Shading.

CO4: Applying the Perspective Techniques in outdoor sketching using appropriate Lights and Shades.

CO5: Practicing the Design and patterns in the form of Zen tangle Art.

CO5	H	H	H	M	H	H

(Low - L, Medium – M, High - H)

**Course Syllabus:**

**Unit I: Basic Drawing**

**(2 hours)**

Basic structure of objects, drawing straight lines, the foundation of perspective, angles of lights and eye view. (K1, K2, K3)

**Unit II: Light and Shades**

**(2 hours)**

Lights and dimension –still life –lines and curves of different thickness-creative patterns –effects of lights –and differences-landscape. (K1, K2, K3, K4)

**Unit III: Perspective**

**(2 hours)**

Principles of Design-Balance-Emphasis, Proportion, Variety and Unity (K1, K2, K3, K4)

**Unit IV: Exercises:**

**(6 hours)**

1. Alphabets and numbers
2. Overlaying (Geometrical Shapes, Irregular shapes)
3. Patterns and structure in day-to-day life
4. Perspectives

Cognitive level: K1, K2, K3, K4, K5

The drawing record should contain exercise completed by each student on every practical class. All exercises must be in pencil and different medium – water color, poster color.

The Internal Evaluation (40 Marks) is based on the exercises.

The Semester Examination (60 marks) is based on the practical examination (45 marks), Record (10 marks) and Viva Voce (5 marks)

**SEMESTER III**  
**UCVCE20 - TELEVISION PRODUCTION**

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> UCVCE20	<b>Title of the Course:</b> Television Production	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objective:**

- To introduce to the students, the field of television media and to train them to produce any type of television programmes

**Course Outcomes (CO)**

The Learners will be able to

CO1: Describing the phases and development of television production.

CO2: Acquire an in-depth knowledge about preproduction stages of television production.

CO3: Explaining the camera operation techniques and implementation.

CO4: Analyze the lighting techniques and production management.

CO5: Acquire a profound knowledge in post-production techniques.

## **Course Syllabus:**

### **Unit I: Introduction to Television medium (15 hours)**

- 1.1. Introduction to Television production (K1, K2)
- 1.2. Origin of television in the World – The Coming of Indian Television (K1, K2, K3)
- 1.3. Phases and development of television (K1, K2, K3)
- 1.4. Generating ideas (K1, K2, K3)
- 1.5. Clustering and Brain storming (K2, K3)
- 1.6. The Production team members and their Responsibility (K2, K3, K4)

### **Unit II: Pre Production Activities (15 hours)**

- 2.1. Creative Script writing (K1, K2)
- 2.2. Screen play Writing (K1, K2, K3)
- 2.3. Talent, Casting, Makeup: Performer Techniques - Acting Techniques (K1, K2, K3)
- 2.4. Audition – Casting - Make up (K2, K3)
- 2.5. Indoor set - outdoors set (K2, K3)
- 2.6. Budget preparation. (K2, K3)

### **Unit III: Production Elements (15 hours)**

- 3.1. Basic Camera function and elements (K1, K2)
- 3.2. Parts of the Camera – Camera operations – techniques (K1, K2, K3)
- 3.3. Types of Cameras (K3, K4)
- 3.4. Framing a shot (K2, K3)
- 3.5. Angle and Movements (K2, K3, K4)
- 3.6. Single Camera set up and multiple camera set up. (K2, K3, K4)

### **Unit IV: Production (15 hours)**

- 4.1. Lighting - Lighting Instruments (K1, K2)
- 4.2. Lighting Techniques (K3, K4)
- 4.3. Production Standard NTSC, PAL, SECAM etc., (K2, K3, K4)
- 4.4. Various kinds of Mike and their Usage – Sound Pickup Pattern (K2, K3, K4)
- 4.5. The role of the Director - Art Direction (K2, K3, K4)
- 4.6. Scenery Properties and set Dressing - Floor Management - Production Management. (K2, K3, K4)

### **Unit V: Post Production (15 hours)**

- 5.1. Editing Functions (K2, K3, K4)
- 5.2. Aesthetic Principles of Continuity editing, complexity editing (K2, K3, K4)
- 5.3. Voice over (or) Narration (K3, K4)
- 5.4. Music – Dubbing (K2, K3, K4)
- 5.5. Video Editing: Linear Editing - Nonlinear Editing (K1, K2, K3, K4)
- 5.6. Types of Editing Modes (Assemble, Insert, Online Modes) (K1, K2, K3, K4)

**Exercises:** Presentation of Talk shows, Cultural Programs, News Desk etc,

### **Books for Study and Reference:**

1. KevalJ.Kumar - Mass Communication in India – 4<sup>th</sup> Edition Jaico Publications, 2011.

CO5	H	H	H	M	H	H

(Low - L, Medium – M, High – H)

## **Course Syllabus:**

### **Unit I: Introduction to script & script preparation (18 hours)**

- 1.1. Definition of scripts (K1, K2)
- 1.2. Script formats, Basics of script writing (K2, K3, K4)
- 1.3. The four models of writing (K1, K2, K3)
- 1.4. Script preparation–selecting and contracting with writers (K2, K3, K4)
- 1.5. Adapting the seven methods (K2, K3, K4)
- 1.6. Script review (K3, K4)

### **Unit II: Script development (18 hours)**

- 2.1. The stages of script development (K1, K2)
- 2.2. Three act structures for film and television (K2, K3)
- 2.3. Writing a script with and without dialogue (K2, K3, K4)
- 2.4. Dramatic structures and forms (K2, K3, K4)
- 2.5. Role of the script writer (K3, K4)
- 2.6. Screenplay- Story board – Shot, Scene and Sequence. (K3, K4)

### **Unit III: Television & Radio Formats (18hours)**

- 3.1. Television formats and genres (K1, K2, K3)
- 3.2. Script formats for corporate videos (K1, K2, K3)
- 3.3. Writing for interactive communication (writing for websites) (K2, K3, K4)
- 3.4. The golden Rule of writing for Radio (K2, K3, K4)
- 3.5. Radio formats (K2, K3, K4)
- 3.6. Genres( K3, K4)

### **Unit IV: Radio Programming (18 hours)**

- 4.1. Radio jingle (K1, K2, K3)
- 4.2. Drama for radio (K1, K2, K3)
- 4.3. Commercial advertisement for radio (K1, K2, K3)
- 4.4. PSA (Radio) (K1, K2, K3)
- 4.5. Creating word pictures (K3, K4)
- 4.6. Write a script for an entertainment show (radio).(K1, K2, K3,K4)

### **Unit V: Writing for Television (18 hours)**

- 5.1. Script Writing Software (K1, K2, K3)
- 5.2. Studio Binder, Script for PSA (K1, K2, K3)
- 5.3. Advertisement (K2, K3)
- 5.4. Short story(K3, K4)
- 5.5. Drama and Documentary (K3, K4)
- 5.6. News writing (K3, K4)

### **Books for Study and Reference:**

1. Keval J. Kumar - Mass Communication in India – 4<sup>th</sup> Revised Edition – Jaico Publication, 2011.

(Low - L, Medium – M, High - H)

## Course Syllabus:

### Unit I: Concepts of society

(18 hours)

- 1.1. The definition of society (K1, K2)
- 1.2. Essential elements of society (K1, K2)
- 1.3. Understanding Mass Media (K1, K2, K3)
- 1.4. Theories of society: the mass society theory, functionalism, uses and Gratification theory, social construction theory (K2, K3, K4)
- 1.5. Communication technology determinism (K3, K4)
- 1.6. The information society. (K3, K4)

### Unit II: Concept of culture

(18 hours)

- 2.1. The definition of culture, characteristics of culture, (K1, K2)
- 2.2 Components of culture, functions of culture. (K1, K2, K3)
- 2.3. Media and popular culture,(K1, K2, K3)
- 2.4. Mass media culture and development (K1, K2, K3)
- 2.5. Development communication, modernization, (K1, K2, K3)
- 2.6. Models of development, dependency/structuralism model.(K1, K2, K3, K4 )

### Unit III: Media Audience

(18 hours)

- 3.1. Reception, (K1, K2)
- 3.2. Audience positioning, (K1, K2,K3)
- 3.3. Subjectivity, Pleasure (K1, K2)
- 3.4. Audience dynamics (K3, K4)
- 3.5. Impact of Media on Society (K1, K2,K3)
- 3.6. Ecological perspectives.(K3, K4)

### Unit IV: Media Analysis:

(18 hours)

- 4.1. Media Text, (K1, K2)
- 4.2. Media Ideology, (K1, K2, K3)
- 4.3. Media and Realism (class, Gender, Race, Age, Minorities, children),(K1, K2, K3, K4)
- 4.4. Approaches to Media Analysis (K1, K2, K3)
- 4.5. Marxist theory, semiotics, (K1, K2, K3)
- 4.6. Psychoanalytic.(K1, K2 K3, K4)

### Unit V: Alternate Media

(18 hours)

- 5.1. Alternative approaches to developments, (K1, K2, K3)
- 5.2. Revival of modernization models, (K1, K2, K3)
- 5.3. Peculiarity of Indian Society, Media in Indian society, (K1, K2, K3, K4)
- 5.4. Internet initiatives for rural development,(K1, K2, K3, K4)
- 5.5. Communication for development (K1, K2, K3)
- 5.6. Sensationalism, 4G, VR, gaming, mobile addiction.(K1, K2, K3, K4)

### **Books for Study and Reference:**

## **Course Syllabus:**

### **Unit I: Introduction to Journalism (18 hours)**

- 1.1. Evolution of Journalism (K1, K2)
- 1.2. News, Types of news, News values (K1, K2, K3)
- 1.3. Structure of news story (K1, K2, K3)
- 1.4. Journalism ethics (K2, K3)
- 1.5. Functions of news (K3, K4)
- 1.6. Journalism in action (finding, choosing, sourcing, gathering, writing, editing and taking news further) (K1, K2, K3, K4)

### **Unit II: Print Journalism (18 hours)**

- 2.1. History of newspaper, Press council (K1, K2, K3)
- 2.2. Code of ethics of Indian journalist (K1, K2, K3)
- 2.3. News agencies (K1, K2,)
- 2.4. Newspaper organizations (ABC – RNI – INS - India Press council (K2, K3, K4)
- 2.5. Style of writing, journalist as investigator, journalist as entertainer (K3, K4)
- 2.6. Difference between newspaper and news magazine, Types of news magazine (K2, K3, K4)

### **Unit III: Electronic Journalism-Radio Journalism (18 hours)**

- 3.1. News flow in broadcast media (K1, K2, K3)
- 3.2. Basics of Radio News, Sources and contacts (K1, K2, K3)
- 3.3. Wire services, Components of News (K1, K2, K3)
- 3.4. Radio news room setup, Radio News Reporting, (K2, K3, K4)
- 3.5. News writing and presentation, Elements of editing, integrating audio bytes (K2, K3, K4)
- 3.6. Radio talks and discussions, radio interviews. Writing for packages- local, regional, national (Voice over, Sound on Tape) (K2, K3, K4)

### **Unit IV: Television Journalism (18 hours)**

- 4.1. TV News room work process (K1, K2, K3)
- 4.2. Basics of TV News, Structuring TV News (K1, K2, K3)
- 4.3. News gathering and writing (K1, K2, K3)
- 4.4. Integrating sound bites, visualization of News, voice-overs (K1, K2, K3)
- 4.5. TV interviews, Process of Live inputs, News Debates News analysis (K1, K2, K3, K4)
- 4.6. Gate keeping, News anchoring (K1, K2, K3)

### **Unit V: Online Journalism (18 hours)**

- 5.1. Newspapers and News reporting in the digital age (K1, K2, K3)
- 5.2. News flow in online media (K1, K2, K3)
- 5.3. Media differences in news coverage (K1, K2, K3)
- 5.4. Organization of online newspapers, Internet news producing strategies (K1, K2, K3, K4)
- 5.5. Future of internet news (K1, K2, K3)
- 5.6. Citizen journalism. (K1, K2, K3)

**Assignments:**

Students can produce their own production of tabloids, newspapers. Journals, magazine.

**Books for Study and Reference:**

**SEMESTER – IV**  
**USCMD420- SKILLED BASED ELECTIVE – IV: INTRODUCTION TO ART**  
**DIRECTION**

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> USCMD420	<b>Title of the Course:</b> Introduction to Art Direction	<b>Course Type:</b> Theory	<b>Course Category:</b> Skilled Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	---------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Objective of the Course**

1. This course examines the visual history and development of art direction and production design.
2. This course focuses on the Indian and Hollywood Art Department, their responsibilities and relationships both intra-departmentally and with the other crafts and departments.
3. This course focuses on introduction to set design and basics of set construction, design visualization.
4. Students will see how design elements enhance story theme, character, plot, tone, location, period, lighting techniques, cinematography, editing, and visual effects.
5. Students will learn budgeting, stage management and scheduling.
6. Students will design a mini set model.

**Course Outcomes (CO)**

The Learners will be able to

CO1: Explaining the basic concepts of art direction.

CO2: Analyzing the various works of the prominent art directors.

CO3: Acquiring in-depth knowledge about the creation of set models.

CO4: Compiling the technical aspects of set direction.

CO5: Acquiring the stage management skills.

## **Course Syllabus:**

### **Unit I: Introduction (15 hours)**

- 1.1. Research: Definition of research-Characteristics of Research (K1,K2,K3)
- 1.2. Research Process- Research Problem –Research Design (K1,K2,K3)
- 1.3. Types of Research –Anthropological Research, Historical Research (K1,K2,K3,K4)
- 1.4. Experimental Research (K1, K2, K3)
- 1.5. Content Analysis and other types- Hypothesis (K1, K2,K3)
- 1.6. Types of Hypothesis. (K1, K2,K3)

### **Unit II: Research Process (15 hours)**

- 2.1. Objective of the Research – Review of literature.(K1,K2,K3)
- 2.2. Research Design - Data collection.(K1,K2,K3,K4)
- 2.3. Survey methodology -Techniques and Analysis.(K1,K2,K3,K4)
- 2.4. Questionnaire, Audience Survey.(K1, K2,K3)
- 2.5. NRS-IRS,TAM-TRP, Election Related survey.(K1,K2,K3,K4)
- 2.6. Opinion poll, Exit poll.(K2, K3,K4)

### **Unit III: Research tools (15 hours)**

- 3.1. Sampling Definition.(K1, K2, K3)
- 3.2. Sampling Terminology.(K2, K3)
- 3.3. Principles of Sampling.(K1, K2, K3)
- 3.4. Aims in Selecting a Sample.(K1, K2, K3)
- 3.5. Types of Sampling: Probability Sampling.(K1, K2, K3, K4)
- 3.6. Non-Probability Sampling.(K1, K2, K3, K4)

### **Unit IV: Media Research methods (15 hours)**

- 4.1 Quantitative Research: Descriptive Research.(K1, K2, K3)
- 4.2 Co-Relation Research. - Participant observation.(K1, K2, K3, K4)
- 4.3. Interviews and Depth interview – focus group.(K2, K3)
- 4.4. Qualitative Research methods: Qualitative content Studies - case study- cross cultural Research-Action Research.(K1, K2, K3)
- 4.5. Ethno Methodological Research- Triangulation Method.(K1, K2, K3, K4)
- 4.6. Marketing Media Research.(K1, K2, K3)

### **Unit V: Data Analysis (15 hours)**

- 5.1. Data Analysis - Interpretation of Results.(K1, K2, K3)
- 5.2. Statistical analysis – Mean and standard deviation. (K1, K2, K3)
- 5.3. Chi square Test-T-test. (K1, K2, K3)
- 5.4. Computer Assisted handling and Analysis (SPSS). (K1, K2, K3)
- 5.5. Data Presentation – Charts and graphs. (K1, K2, K3, K4)
- 5.6. Preparing research report. (K1, K2, K3)

### **Practical Exposure:**

Pilot Study Research (Should be done by the students on their desired topic.)

**Books for Study and Reference:**

**Exercises: Each exercise carry**

(18 hours)

1. Key frame animation
2. Interactive card using buttons
3. Animated cartoon (story /Rhymes)
4. Online or Web Advertisements (horizontal and vertical)
5. Slide show using Transition

Cognitive Level: K1,K2,K3,K4.

The Internal Examination (40 Marks) is based on the Regular performance of exercises.

The Semester Examination (60 Marks) is based on the Practical Examination (45 Marks), Record (10 Marks) and Viva Voce (5 Marks)

**SEMESTER –V**  
**UCVCM20 -- PRACTICAL VI: INTERNSHIP**

<b>Year:</b> <b>III</b> <b>Sem: V</b>	<b>Course Code:</b> UCVCM20	<b>Title of the Course:</b> Internship	<b>Course Type:</b> Practical VI	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 4	<b>Marks</b> 100
---	--------------------------------	---	--	---------------------------------	-----------------	---------------------	---------------------

**Objective:**

- To train students in the field of television production with first-hand experience working in a television news organization for a month as an internee. One month training in media will expose the students to actual working conditions of daily on online news media or electronic media (TV and Radio studio). This internship is intended to enable students acquire field experience and journalistic skills of reporting, writing and editing for medium of their choice. Students will be required to maintain a journal recording their daily events in detail and submit a report on their activities at the end of the training.

**Course Outcomes (CO)**

The Learners will be able to

CO1: Outline the concepts of News production in Television Medium.

CO2: Acquiring an in-depth knowledge in the Respective Media Industry.

CO3: Compiling the Types of Work done in News Production.

CO4: Evaluating the Experience gained in News Production.

CO5: Substantiate the Report with proper documents.

Synopsis

1. Introduction
  - 1.1 About the Media in general
  - 1.2 About the Media Industry
  - 1.3 About the Team
  - 1.4 Areas of Field Experience
  - 1.5 Outstanding Individual Works
2. (Divide the successive Chapters based on Issue/Type of Work/Chronological Events, giving a detailed account of the work done, substantiating it with scripts, photographs, clippings of the telecast, etc.)
3. (Second Last Chapter) About the experiences and lessons learnt from them, categorized according to content.
4. Conclusion

Appendix A (Photographs: Workplace, Team)

Appendix B (Photographs: Reported Issues, Press Meets, etc)

Appendix C (Press Release, Hand-Outs, Notices, News Script samples, etc)

Cognitive Level: K1, K2, K3, K4.

The Internal Evaluation for 40 marks is based on the journal, proof of work (photographs, clippings, script, press release/handouts, etc collected during the internship), and the preparation of the final report.

The Semester examination (60 Marks) is based on the evaluation of the Internship Report (50 marks) and Viva-Voce (10 marks).

## SEMESTER V

### UCVCN20 - PROJECT: DOCUMENTARY PRODUCTION

<b>Year:</b> <b>III</b>	<b>Course Code:</b> UCVCN20	<b>Title of the Course:</b> Documentary Production	<b>Course Type:</b> Project	<b>Course Category:</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

#### Objective:

- To train students in short-film making or documentary making by putting into practice the techniques learned in television production and script writing through team work.

Students will specialize in Television production and prepare a group project on any chosen theme. The editing of the project should be done with the editing software that is taught to the students during the course. The master copy of the production in a DVD format must be submitted along with the script and the storyboard.

#### Course Outcomes (CO)

##### The Learners will be able to

- CO1: Analyzing the Concepts of Documentary production.  
 CO2: Implementing the Pre-Production process of Documentary.  
 CO3: Executing the Production process of Documentary.  
 CO4: Compile the Post Production Activities according to the Script.  
 CO5: Presenting the Documentation with Master Copy.

**Exercise:** Documentary - 5 to 7 minutes

1. Proposal Format to be given (5 hours)
2. Script Approval (10 hours)
3. Story Board (15 hours)
4. Documentation (15 hours)

Cognitive Level: K1, K2, K3, K4.

The Internal Evaluation (40 marks) is based on the production process and the model viva.

The Semester Evaluation (60 marks) is based on the Viva-voce and the quality of the production presented for the Examination.

## SEMESTER V

### USCMD520 – SKILL BASED ELECTIVE: E- CONTENT PRODUCTION

<b>Year: III Sem: V</b>	<b>Course Code: USCMD520</b>	<b>Title of the Course: E- Content Production</b>	<b>Course Type: Practical</b>	<b>Course Category: Skilled Based Elective</b>	<b>H/W 2</b>	<b>Credits 2</b>	<b>Marks 100</b>
---------------------------------	--------------------------------------	---	---------------------------------------	--	------------------	----------------------	----------------------

#### Objective:

To enable students know about the production process and techniques of e-content development, implementing effective e-content material for education field.

All students will specialize in e- content development and prepare an individual project with the help of required software and multimedia accessories. The final copy of the production must be submitted along with the script.

#### Course Outcomes (CO)

The Learners will be able to:

CO1: Describing the Planning Process of E-content development

CO2: Acquiring the In-depth knowledge about the E-content design

CO3: Selecting the Appropriate Methods to Implement the E-content design

CO4: Applying and testing the E-content course material

CO5: Executing and publishing the E-contents for formal education.

## **Course Syllabus:**

**Exercises Each Exercise carry: (10 hours )**

1. Students can choose any Program of their choice and Prepare E-Content for a course.
2. Production (video presentation, PowerPoint presentation etc)
3. Web Publishing (Overall presentation for uploading in the website)

Cognitive Level: K1, K2, K3, K4.

The Internal Evaluation (40 Marks) is based on the process of development of the campaign.

The Semester Evaluation (60 Marks) is based on the (45 Marks) practical examination on conduct of the campaign and submission of the report (10 marks) and Viva voce (5 Marks)

**SEMESTER VI**  
**UCVCO20 - MEDIA LAWS AND ETHICS**

<b>Year:</b> <b>III</b> <b>Sem: VI</b>	<b>Course Code:</b> UCVCO20	<b>Title of the Course:</b> Media laws and Ethics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objective:**

- To familiarize students with the framework of laws that apply to the field of electronic as well as print media

**Course Outcomes (CO)**

The Learners will be able to

CO1: Explaining the Concept of Media Laws and Rights

CO2: Reviewing Various Media Acts and its uses.

CO3: Acquire an in depth Knowledge in Media Laws.

CO4: Analyzing the Cyber Laws and Regulations.

CO5: Examine the Media Regulatory Authority Bodies.

## **Course Syllabus:**

### **Unit I: Media and Freedom (15 hours)**

- 1.1. Concept of media freedom, (K1, K2, K3)
- 1.2. Evolution of Article 19 (a), Rights and Restrictions, (K1, K2, K3)
- 1.3. Theories of the press, (K1, K2, K3)
- 1.4. Rights and Obligations of the media, (K1, K2, K3)
- 1.5. Components of Media Ethics, (K1, K2, K3)
- 1.6. IPC sections 124A, 108, 501, 144. (K1, K2, K3, K4)

### **Unit II: Media Persons and the law (15 hours)**

- 2.1. Defamation, Official Secrets Act, (K1, K2, K3)
- 2.2 Intellectual Property Rights, Issues of Privacy, (K1, K2, K3, K4)
- 2.3 Copyright Act, Obscenity, (K1, K2, K3)
- 2.4 Source Confidentiality, (K1, K2, K3)
- 2.5 Parliamentary Privileges Act, (K1, K2, K3)
- 2.6 Right to Information Act (K1, K2, K3, K4)

### **Unit III: Laws on Media Institutions (15 hours)**

- 3.1 Cable regulation Act, (K1, K2, K3)
- 3.2 Indian cinematography Act 1952, (K1, K2, K3)
- 3.3 Film censorship, (K1, K2, K3)
- 3.4 Contempt of Court, (K1, K2, K3)
- 3.5 Press and Registration of Books Act, (K1, K2, K3)
- 3.6 Regulation related to broadcast media (Indian Broadcasting code) (K1, K2, K3, K4)

### **Unit IV: Cyber Laws (15 hours)**

- 4.1. Laws regulating Foreign Direct Investment in media (K2, K3, K4)
- 4.2. IT Act, Cyber laws in India. (K2, K3, K4)
- 4.3. Cyber security concerns. (K2, K3, K4)
- 4.4. Preventive measures. (K3, K4, K5)
- 4.5. Penalties. (K2, K3, K4)
- 4.6. Network service providers' protection. (K2, K3, K4)

### **Unit V: Regulating Authorities (15 hours)**

- 5.1. Ministry of Information and Broadcasting. (K1, K2, K3)
- 5.2. Directorate of Advertising & Visual Publicity. (K2, K3,)
- 5.3. Directorate of Field Publicity. (K2, K3, K4)
- 5.4. Press Council. (K2, K3, 4k)
- 5.5. Central Board of Film Certification. (K3, K4,)
- 5.6. Advertising Standards Council of India, Telecom Authority. (K3, K4,)

**Books for Study and Reference:**

### UCVCP20 - INTRODUCTION TO ICT AND NEW MEDIA

<b>Year: III</b>	<b>Course Code:</b> UCVCP20	<b>Title of the Course:</b> Introduction to ICT and New Media	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b>  5	<b>Credits</b>  3	<b>Marks</b>  100
<b>Sem: VI</b>							

#### Objective:

- To give students a brief idea of the evolution of the Communication and Information Technology, its effects on Economics and working in the New Media

#### Course Outcomes (CO)

The Learners will be able to

CO1: Identifying the Concept of Internet and its Features.

CO2: Acquiring the Knowledge in Usage of ICT in Print Media.

CO3: Applying the Techniques of ICT in Electronic Media.

CO4: Implementing the ICT tools and techniques in New Media.

CO5: Analyzing the Connectivity issues in New Media.

**Unit I: Introduction to ICT** (15 Hours)

- 1.1. Evolution of ICT (4 stages). (K1, K2, K3)
- 1.2. From ARPANET to internet. (K2, K3, K4)
- 1.3. New Media as a Mass Medium. (K3, K4, K5)
- 1.4. Structure and features of Internet. (K1, K2, K3)
- 1.5. ISP, TCP/IP. (K2, K3, K4)
- 1.6. E-mail, WWW. (K2, K3, K4)

**Unit II: ICT for Print media** (15 Hours)

- 2.1. New source of news – blogs, citizen journalism. (K2, K3, K4)
- 2.2. Hyper-local news, the converged or single man journalist. (K2, K3, K4)
- 2.3. Change in News flow (K2, K3, K4)
- 2.4. Online-only Newspapers, e-Newspapers. (K2, K3, K4)
- 2.5. Replica editions. (K3, K4)
- 2.6. Limitations of online newspapers. (K2, K3, K4)

**Unit III: ICT for Electronic media** (15 Hours)

- 3.1. Scroll News (K1, K2, K3)
- 3.2. Image and video digitization. (K2, K3, K4)
- 3.3. Digitization of radio and television news (K2, K3, K4)
- 3.4. On-the-spot broadcast (K3, K4)
- 3.5. User-generated content. (K1, K2, K3, K4)
- 3.6. Privacy, Copyright issues. (K3, K4)

**Unit IV: ICT for New media** (15 Hours)

- 4.1. Traditional vs Web journalism. (K2, K3, K4)
- 4.2. Interactivity, Archiving (K1, K2, K3)
- 4.3. News feeds (K2, K3, K4)
- 4.4. Syndicated Content. (K3, K4)
- 4.5. Future: Evernet. (K3, K4)
- 4.6. Internet of things (K2, K3, K4)

**Unit V: Browsers & Servers** (15 Hours)

- 5.1. ISP and browsers. (K2, K3)
- 5.2. Server, Proxy server. (K2, K3)
- 5.3. Security Socket Layer. (K2, K3)
- 5.4. Firewalls Open Source, 4G. (K2, K3, K4)
- 5.5. Uplink and Downlink. (K2, K3, K4)
- 5.6. Last mile connectivity(K3, K4)

**Books for Study and Reference**

## **Course Syllabus:**

Developing a static web site with embedded multimedia elements using Dreamweaver, supported by Flash for graphics and animation, Swish for Flash authoring and Adobe Photoshop for image editing.

Introduction to Web design - Elements of Hypertext – markup language – heading section, body section, other HTML tags, advanced tags, frame tags – up linking the sites.

### **Kindly Note: Each exercise carries: 15 hours**

1. No objects / elements downloaded from the Internet should be used. The static images should be created by the student using appropriate software's.
2. A minimum of Five exercises should be carried out on each theme outlined above
3. At least FIVE complete web sites for different categories of products or organizations must be created for the record.
4. All exercises should be accompanied by "paper-page" and "paper-design" in record form along with the original file containing the exercises.
5. The above mentioned are the minimum requirement for external examination.

### **Order of details expected in the Record**

1. Bonafide Certificate
2. Table of Contents
3. Introduction
4. Software Specification
5. Web Content
6. Web Structure
7. Web Page Samples
8. Bibliography

(Cognitive Level : k1, k2, k3, k4)

The Internal Evaluation (40 Marks) is based on the process of development of the web page.

The Semester Evaluation (60 Marks) is based on the (45 Marks) practical examination on development of a small website with a minimum of 5 web pages, Record (10 marks) and Viva voce (5 Marks)

- 1.5. Implementation phase (K2, K3)
- 1.6. The evaluation phase. (k1, k2, k3)

### **Unit II: Types and Models of E-content (15 hours)**

- 2.1. Models of E-content development, SCORM Model (k1, k2, k3)
- 2.2. e-Publishing processes –e-Author, e-Editing, e-Publishing. (k2, k3, k4)
- 2.3. LMS-Learning Object Design. (k1, k2, k3)
- 2.4. Types of e-content-OER\_RLOS-E-Books. (k2, k3, k4)
- 2.5. Web content-video Streamer-Blogging. (k2, k3, k4)
- 2.6. Instructor`s role in the development of e-content. (k1, k2, k3, k4)

### **Unit III: Guidelines and presentations of E-content (15 hours)**

- 3.1. Guideline for E-content development. (k1, k2, k3)
- 3.2. UGC-E-content scheme-UGCINFONET-CEC. (k2, k3)
- 3.3. Content Management Systems – Templates, standard characteristics and, delivery, effectiveness of content. (k1, k2, k3)
- 3.4. Media: Animations, illustrations, slideshows, interactivities, Video, photographs and audio clips. Animation. (k1, k2, k3)
- 3.5. Self-running, non-interactive 2D animations. (k2, k3, k4)
- 3.6. Audio narrative of the onscreen-text. - Audio toggle on/Off-Video Streaming, Assessment and feedback options. (k1, k2, k3, k4)

### **Unit IV: E-Learning –Technology (15 hours)**

- 4.1. e-Learning and e-learners. (k1, k2, k3)
- 4.2. e-courses, e-learning ability. (k1, k2, k3)
- 4.3. Open educational resources – Learning authoring. (k2, k3, k4)
- 4.4. e-learning technologies-: Computer and Internet Enabled Learning. (k3, k4)
- 4.5. IP Learning – Mobile learning – Videoconferencing – VSAT. (k2, k3, k4)
- 4.6. Online learning – Web conferencing – Standalone e-learning – Assisted e-learning – e-Cooperative learning – Blended learning – Info Learning. (k1, k2, k3, k4)

### **Unit V: Future trends of E-content (15 hours)**

- 5.1. Present trends and future. (k2, k3, k4)
- 5.2. e-Content for different types of industries. (k2, k3, k4)
- 5.3. Education, marketing, training, agriculture, etc., (k1, k2, k3, k4)
- 5.4. Economics of e-content business. (k1, k2, k3, k4)
- 5.5. Budget and market Trends.(k3, k4)
- 5.6. Pedagogical issues in E-content development. (k1, k2, k3, k4)

**(Low - L, Medium – M, High - H)**

**Unit I: Managing Media** (15 hours)

- 1.1. Managing Media. (K1, K2, K3)
- 1.2. Concept of Management Principal Levels of Management. (K1, K2, K3)
- 1.3. Agenda setting - Management skills. (K1, K2, K3)
- 1.4. Management functions. (K1, K2)
- 1.5. Management roles – Strategic alliances. (K1, K2, K3)
- 1.6. Implications for management - Radio, TV and Cable. (K1, K2, K3, K4)

**Unit II: Operations and Structure of News Media companies** (15 hours)

- 2.1. Structure of Media companies. (K1, K2, K3)
- 2.2. Consolidation and Convergence. (K1, K2, K3)
- 2.3. Kinds of Media ownership. (K2, K3, K4)
- 2.4. Combining forces and news roles. (K2, K3)
- 2.5. Financial Management. (K1, K2, K3, K4)
- 2.6. Meeting financial goals – Budgeting - Cross media ownerships. (K2, K3, K4)

**Unit III: Electronic Media Management** (15 hours)

- 3.1. The internet and Electronic media management. (K1, K2, K3)
- 3.2. Online Management - utilization of the Internet. (K2, K3, K4)
- 3.3. The web department. (K2, K3, K4)
- 3.4. Web formations and management. (K2, K3, K4)
- 3.5. Revenue streams: advertising - e-Commerce. (K2, K3, K4)
- 3.6. ERP- Local Portal, live streaming, e-zines, web TV. (K1, K2, K3, K4)

**Unit IV: Ethics of Management** (15 hours)

- 4.1. Ethical codes and Ethical Norms of Media management. (K2, K3, K4)
- 4.2. Fairness doctrine. (K3, K4).
- 4.3. Controversies over programming. (K3, K4)
- 4.4. Ethics in news and public affairs. (K2, K3, K4)
- 4.5. Modern approaches to Management media conglomeration affecting media agenda. (K2, K3, K4).
- 4.6. Predatory marketing. (K3, K4).

**Unit V: Patterns of Media Organization and Ownership** (15 hours)

- 5.1. Case studies on Ownership of radio and television station. (k2, k3, k4)
- 5.2. Obtaining a Broadcast license. (k2, k3, k4)
- 5.3. Ownership limits. (k3, k4)
- 5.4. Station organization. (K3, k4)
- 5.5. Ownership patterns in cable television. (k3, k4)
- 5.6. Cable TV structure. (k3, k4)

## SEMESTER I

### UCZOA20 – INVERTEBRATA

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	UCZOA20	Invertebrata	Theory	Core	6	6	100

#### Objectives:

- To understand the systematic and functional morphology of various groups of Invertebrates.
- To study their economic importance, affinities and adaptations.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Discuss general classification, binomial nomenclature and Phylum Protozoa.

**CO2:** Explain the classification up to class level, type study and salient features of Phylum Porifera and Coelenterata.

**CO3:** Elaborate the classification up to class level, type study and salient features of Phylum Platyhelminthes and Aschelminthes.

**CO4:** Discuss the classification up to class level, type study and salient features of Phylum Annelida and Arthropoda.

**CO5:** Explain the classification up to class level, type study and salient features of Phylum Mollusca and Echinodermata.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	M	M
CO3	H	H	H	H	M	M
CO4	H	H	H	H	M	M
CO5	H	H	H	H	M	M

CO3	H	H	M	H	M	H
CO4	H	H	M	H	M	H
CO5	H	H	M	H	M	H

#### Unit I:

**(18 Hours)**

- 1.1: General character and outline classification of Invertebrata up to class level with examples - Structure, function and life cycle of all the type studies. (K1, K2).
- 1.2: Binomial nomenclature. (K1,K2, K3)
- 1.3: Phylum – Protozoa – General characters and classification. (K1, K2, K3)
- 1.4: Type study: *Plasmodium vivax*. (K1,K2, K3)
- 1.5: General essay: Nutrition in Protozoa. (K1, K2, K3)
- 1.6: General essay: Locomotion in Protozoa. (K1, K2, K3)

**Unit II:** (18 Hours)

- 2.1: Phylum – Porifera - General characters and classification. (K1, K2, K3)
- 2.2: Type study: Sycon. (K1, K2, K3)
- 2.3: General essay: Canal system in Sponges. (K1, K2, K3)
- 2.4: Phylum – Coelenterata - General characters and classification. (K1, K2, K3)
- 2.5: Type study: Obelia. (K1, K2, K3)
- 2.6: General essay: Corals and Coral Reef, Polymorphism. (K1, K2, K3)

**Unit III:** (18 Hours)

- 3.1: Phylum – Platyhelminthes- General characters and classification. (K1, K2, K3)
- 3.2: Type study: Tapeworm. (K1, K2, K3)
- 3.3: General essay: Helminth parasites in humans-*Wuchereria bancrofti*. (K1, K2, K3)
- 3.4: General essay: Parasitic adaptations in Helminthes. (K1, K2, K3)
- 3.5: Phylum: Aschelminthes - General characters and classification. (K1, K2, K3)
- 3.6: Type study: Ascaris. (K1, K2, K3)

**Unit IV:** (18 Hours)

- 4.1: Phylum: Annelida - General characters and classification. (K1, K2, K3)
- 4.2: Type study: Nereis. (K1, K2, K3)
- 4.3: General essay: Adaptive radiation in Polychaetes. (K1, K2, K3)
- 4.4: Phylum: Arthropoda- General characters and classification. (K1, K2, K3)
- 4.5: Type study: Prawn. (K1, K2, K3)
- 4.6: General essay: Social life in Insects, Peripatus and its affinities. (K1, K2, K3)

**Unit V:** (18 Hours)

- 5.1; Phylum: Mollusca- General characters and classification. (K1, K2, K3)
- 5.2: Type study: Freshwater Mussel. (K1, K2, K3)
- 5.3: General essay: Respiration in Mollusca. (K1, K2, K3)
- 5.4: Phylum: Echinodermata- General characters and classification.
- 5.5: Type study: Sea star. (K1, K2, K3)
- 5.6: General essay: Larval forms in Echinodermata and their significance. (K1, K2, K3)

**Books for study and Reference:**

**Text Books:**

1. Ekambaranatha Ayyar M, and T.N. Ananathakrishnan- Manual of Zoology Vol. I [Invertebrata], Parts I and II – S. Viswanathan (Printers and publishers) Pvt. Ltd; Madras, 1992.

**SEMESTER II**  
**UCZOB20– CHORDATA**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	UCZOB20	Chordata	Theory	Core	6	6	100

**Objectives:**

- To understand the systematic and functional morphology of various groups of Chordates.
- To study their affinities and adaptations to different modes of life.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Explain taxonomic status of vertebrates and its origin and Evolution.

**CO2:** Describe anatomy and functions of systems in vertebrates.

**CO3:** Discuss adaptive radiations in vertebrates.

**CO4:** Explain the salient features of chordates.

**CO5:** Explain the structural, functional and phylogenetic significance of chordates.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	M	M	M	M
CO4	H	H	M	M	M	M
CO5	H	H	M	H	M	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	H	M	H
CO2	H	H	M	H	M	H
CO3	H	H	M	H	M	M
CO4	H	H	M	H	M	M
CO5	H	H	M	H	M	M

**Unit I:**

**(18 Hours)**

1.1: General character and outline classification of Chordates up to class level. (K1, K2).

1.2: Protochordata: General characters and classification. (K1, K2).

1.3: Type study: Amphioxus. (K1, K2, K3)

1.4: Affinities of cephalochordates. (K1, K2, K3)

1.5: Retrogressive Metamorphosis in Ascidia. (K1, K2, K3)

1.6: General essay: Origin of Chordates. (K1, K2, K3)

**Unit II: Pisces****(18 Hours)**

- 2.1: Affinities of Cyclostomata. (K1, K2, K3)
- 2.2: Type study: Shark. (K1, K2, K3)
- 2.3: General essay: Migration in Fishes. (K1, K2, K3)
- 2.4: Accessory respiratory organs. (K1, K2, K3)
- 2.5: Parental care in Fishes. (K1, K2, K3)
- 2.6: Electric organs. (K1, K2, K3)

**Unit 3: Amphibia****(18 Hours)**

- 3.1: Type study: Frog. (K1, K2, K3)
- 3.2: General essay: Parental care in Amphibians. (K1, K2, K3)
- 3.3: Adaptive radiations in Amphibians. (K1, K2, K3)
- 3.4: **Reptilia** - Type study: Calotes. (K1, K2, K3)
- 3.5: General essay: Poison apparatus and biting mechanism in snakes. (K1, K2, K3)
- 3.6: Identification of poisonous and non-poisonous snakes. (K1, K2, K3, K4)

**Unit 4: Aves****(18 Hours)**

- 4.1: Type study: Pigeon. (K1, K2, K3)
- 4.2: General essay: Flight adaptations in birds. (K1, K2, K3)
- 4.3: Migration in birds. (K1, K2, K3)
- 4.4: Flightless birds. (K1, K2, K3)
- 4.5: Beaks in birds. (K1, K2, K3)
- 4.6: Feet in birds. (K1, K2, K3)

**Unit 5: Mammals****(18 Hours)**

- 5.1: Type study: Rabbit. (K1, K2, K3)
- 5.2: General essay: Dentition in mammals. (K1, K2, K3)
- 5.3: Adaptive radiations in Mammals. (K1, K2, K3)
- 5.4: Characteristics of Prototheria with examples. (K1, K2, K3)
- 5.5: Characteristics of Eutheria with examples. (K1, K2, K3)
- 5.6: Characteristics of Metatheria with examples. (K1, K2, K3)

**Books for study and Reference:****Text Books:**

1. Jordan, E.L and P.S Verma – Chordate Zoology and Elements of Animal Physiology, 10<sup>th</sup> Edition – S. Chand and Co. Ltd, Ram Nagar, New Delhi, 1995.
2. Ekambaranatha Ayyar M, and T.N. Ananathakrishnan- Manual of Zoology Vol. II [Chordata] – S. Viswanathan (Printers and publishers) Pvt. Ltd; Madras, 1992.

**Reference Books:**

## SEMESTER I & II

### UCZOC20 – CORE PRACTICAL – I: INVERTEBRATA AND CHORDATA

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I & II	UCZOC20	Core Practical-I	Practical	Core	3	4	100

#### Objectives:

- To obtain practical skills in dissection and display of the systems.
- To learn about adaptation, biological significance of animals.
- To understand the evolutionary significance and skeletal structures of animals.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Acquire knowledge about the digestive, circulatory and nervous system of arthropods and vertebrates.

**CO2:** Prepare mounting of the mouth parts of insects.

**CO3:** Analyze the biological significance of invertebrates and vertebrates.

**CO4:** Distinguish structure and function of invertebrates and vertebrates.

**CO5:** Justify the importance of evolutionary significance of animals, osteology and dentition in mammals.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### INVERTEBRATA

1. Dissections:
  - a) Major: Cockroach – Digestive and Nervous system.
  - b) Prawn: Digestive and Nervous system.
2. Minor: Mouth parts - Mosquito, House fly.  
 Prawn - Cephalic Appendages.  
 Thoracic Appendages.  
 Abdominal Appendages.
3. Study of museum specimen/ slides relevant to the types studied in theory:

- a) Biological significance
- b) Descriptive notes
- c) Structure and function
- d) Evolutionary significance

**SPOTTERS LIST: INVERTEBRATA**

1. ENTAMOEBA
2. VOLVOX
3. PLASMODIUM
4. TRYPANOSOMA
5. VORTICELLA
6. SYCON
7. SPONGE GEMMULE
8. EUPLECTELLA
9. HYALONEMA
10. OBELIA COLONY
11. OBELIA MEDUSA
12. ADAMSIA
13. ZOANTHUS
14. PHYSALIA
15. VELLELA
16. TAENIA SOLIUM
17. SCOLEX OF TAENIA SOLIUM
18. BLADDERWORM
19. ASCARIS MALE AND FEMALE
20. SCHISTOSOMA
21. WUCHERERIA
22. NEREIS ENTIRE
23. NEREIS PARAPODIUM
24. CHAETOPTERUS
25. ARENICOLA
26. TROCHOPHORE LARVA
27. PRAWN ENTIRE
28. PRAWN – DIGESTIVE SYSTEM
29. PRAWN – NERVOUS SYSTEM
30. PRAWN- APPENDAGES
31. NAUPLIUS LARVA
32. ZOEAL LARVA
33. MEGALOPA LARVA
34. PERIPATUS
35. LIMULUS
36. COCKROACH- DIGESTIVE SYSTEM
37. COCKROACH- NERVOUS SYSTEM
38. HOUSEFLY MOUTH PARTS
39. MOSQUITO MOUTH PARTS
40. UNIO ENTIRE
41. GLOCHIDIUM LARVA
42. RADULA OF PILA
43. CHITON
44. MYTILUS

45. OCTOPUS
46. SEA STAR ENTIRE
47. PEDICELLARIA OF SEA STAR
48. BIPINNARIA LARVA
49. HOLOTHURIA
50. SEA LILY

**CHORDATA:**

1. Dissections:
  - a) Major: Frog (Model) - Digestive, Arterial and Venous system.
  - b) Minor: Shark -Placoid scales.
  
2. Study of museum specimen/ slides relevant to the types studied in theory:
  - a) Biological significance.
  - b) Descriptive notes.
  - c) Structure and function.
  - d) Skeletal structure / Dentition.

**SPOTTERS LIST: CHORDATA**

1. AMPHIOXUS ENTIRE
2. ASCIDIA ENTIRE
3. ASCIDIAN TADPOLE
4. BALANOGLOSSUS ENTIRE
5. TORNARIA LARVA
6. PETROMYZON ENTIRE
7. AMMOCETES LARVA
8. BUCCAL FUNNEL OF PETROMYZON
9. SALPA
10. SHARK ENTIRE
11. SCALES- PLACOID, CTENOID
12. NARCINE
13. SACCOBRANCHUS
14. EXOCOETUS
15. ECHENEIS
16. HIPPOCAMPUS
17. FROG ENTIRE
18. FROG-DIGESTIVE SYSTEM
19. FROG-VENOUS SYSTEM
20. FROG- ARTERIAL SYSTEM
21. FROG-BRAIN
22. FROG-HYOID
23. FROG-PECTORAL AND PELVIC GIRDLE
24. ICHTHYOPHIS
25. SALAMANDER
26. AXOLOTYL LARVA
27. NECTURUS
28. ALYTES
29. RHACOPHORUS
30. CALOTES ENTIRE
31. CALOTES- HYOID
32. CALOTES-PECTORAL AND PELVIC GIRDLE

33. DRACO
34. CHAMAELEON
35. PYTHON
36. KRAIT
37. COBRA
38. COBRA-POISON APPARATUS
39. PIGEON ENTIRE
40. PECTEN OF BIRD
41. PIGEON FORE AND HIND LIMBS
42. SYNSACRUM OF BIRD
43. OSTRICH
44. PROTOTHERIA- PLATYPUS
45. METATHERIA - OPOSSUM
46. EUTHERIA – BAT
47. RABBIT ENTIRE
48. RABBIT – PECTORAL AND PELVIC GIRDLE
49. SKULL OF RABBIT
50. SKULL OF DOG

### SEMESTER III

#### UCZOD20 - CELL BIOLOGY AND BIOINSTRUMENTATION

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	UCZOD20	Cell Biology and Bioinstrumentation.	Theory	Core	7	6	100

#### Objectives:

- To learn the structure and function of various cellular components.
- To learn the basic principle, working and application of instruments.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Recall the cell theory, Distinguish between Prokaryotes and Eukaryotes.

**CO2:** Summarize the structure and functions of Cell Organelles.

**CO3:** Explain the structure and function of Nucleic acids.

**CO4:** Discuss the construction and applications of Microscopes, Centrifuges and Homogenizers.

**CO5:** Describe the types and applications of Chromatography and Electrophoresis.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	M	L	L
CO2	H	H	H	M	L	M
CO3	H	H	H	M	L	L
CO4	H	H	H	H	L	H
CO5	H	H	H	H	L	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6

CO2	H	M	H	L	M	H
CO3	H	H	H	L	M	L
CO4	H	H	H	L	M	H
CO5	H	H	H	L	M	H

#### Unit 1: Cell Biology:

(21 Hours)

1.1: Introduction to cell biology. (K1, K2)

1.2: Brief account on cell theory. (K1, K2)

1.3: Prokaryotes – PPLO. (K1, K2)

1.4: Eukaryotes- animal cell (Structure and Comparison). (K1, K2, K3)

1.5: Cell cycle. Cell division- Mitosis - Meiosis. (K1, K2, K3)

1.6: Structure and functions of Cell organelles - Cell membrane. (K1, K2, K3)

**Unit 2:** (21 Hours)

- 2.1: Structure and functions of Cell organelles - Mitochondria, Golgi complex. (K1, K2, K3, K4)
- 2.2: Structure and functions of Cell organelles- Endoplasmic reticulum, Ribosomes. (K1, K2, K3, K4)
- 2.3: Structure and functions of Cell organelles- Lysosome and Centriole. (K1, K2, K3, K4)
- 2.4: Structure and functions of Cell organelles- Nucleus and Nucleolus. (K1, K2, K3, K4)
- 2.5: Structure and functions of Cell organelles -Chromosomes. (K1, K2, K3, K4)
- 2.6: Structure and functions of Cell organelles -Giant Chromosomes-Polytene-Lamp brush chromosome. (K1, K2, K3, K4)

**Unit 3:** (21 Hours)

- 3.1: Nucleic acids: DNA- Ultra structure. (K1, K2, K3, K4)
- 3.2: DNA Replication. (K1, K2, K3, K4)
- 3.3: RNA – Structure and types. (K1, K2, K3, K4)
- 3.4: Genetic code. (K1, K2, K3, K4)
- 3.5: Protein synthesis. (K1, K2, K3, K4)
- 3.6: Gene regulation - Lac operon. (K1, K2, K3, K4)

**Unit 4: Bioinstrumentation:** (21 Hours)

- 4.1: Principle, construction and application of– Compound microscope. (K1, K2, K3)
- 4.2: Principle, construction and application of– Inverted Microscope. (K1, K2, K3)
- 4.3: Principle, construction and application of– TEM. (K1, K2, K3)
- 4.4: Principle, construction and application of– SEM. (K1, K2, K3)
- 4.5: Principle, construction and application of– Centrifuge-Ultracentrifuge- Differential centrifugation. (K1, K2, K3)
- 4.6: Cell Homogenization – Fractionation. (K1, K2, K3)

**Unit 5:** (21 Hours)

- 5.1: Chromatography – Paper. (K1, K2, K3)
- 5.2: Thin layer and Column. (K1, K2, K3)
- 5.3: HPLC. (K1, K2, K3, K4)
- 5.4: Electrophoresis – SDS PAGE Gel electrophoresis. (K1, K2, K3, K4)
- 5.5: Disc-gel electrophoresis. (K1, K2, K3, K4)
- 5.6: Immuno-electrophoresis. (K1, K2, K3)

**Books for study and reference:**

**Textbooks:**

## SEMESTER IV

### UCZOE20 – GENETICS AND EVOLUTION

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	UCZOE20	Genetics and Evolution	Theory	Core	5	4	100

#### Objectives:

- To learn the basics of Genes, heredity and variations.
- To learn the evolution of life and speciation.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Demonstrate the Mendelian inheritance. Understand the genetic interactions.

**CO2:** Discuss Linkage, Crossing over, cytoplasmic inheritance and sex determination.

**CO3:** Analyze the types of Gene Mutation, Chromosomal aberrations, syndromes and inborn errors in metabolism.

**CO4:** Explain Population Genetics

**CO5:** Recall the theories of Evolution, adaptations and human evolution.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
<b>CO1</b>	H	H	L	M	M	L
<b>CO2</b>	H	H	L	L	L	L
<b>CO3</b>	H	H	L	M	M	M
<b>CO4</b>	H	H	L	M	L	L
<b>CO5</b>	H	H	L	L	M	L

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
<b>CO1</b>	H	H	H	M	H	L
<b>CO2</b>	H	H	H	H	M	L
<b>CO3</b>	H	H	H	M	M	M
<b>CO4</b>	H	H	H	H	M	L
<b>CO5</b>	H	H	H	H	H	M

#### Unit 1: Genetics:

**(15 Hours.)**

1.1: Mendel's work. (K1, K2, K3)

1.2: Monohybrid cross and modifications of ratio. (K1, K2, K3)

1.3: Law of segregation. Law of independent assortment. (K1, K2, K3)

1.4: Dihybrid cross and modifications of ratio. (K1, K2, K3)

1.5: Genetic interactions- Epistasis, duplicate gene, complementary gene, atavism. (K1, K2, K3, K4)

1.6: Multiple alleles, blood grouping in man. (K1, K2, K3, K4)

**Unit 2:** (15 Hours)

- 2.1: Linkage and Crossing over. (K1, K2, K3, K4)
- 2.2: Sex linkage. (K1, K2, K3, K4)
- 2.3: Sex limited genes and sex influenced genes in Man. (K1, K2, K3, K4)
- 2.4: Cytoplasmic inheritance in Snail and Paramecium. (K1, K2, K3)
- 2.5: Non-disjunction and Gynandromorphs. (K1, K2, K3, K4)
- 2.6: Sex determination - Genic balance theory, theory of heterogenesis and environmental factors. (K1, K2, K3)

**Unit 3:** (15 Hours)

- 3.1: Gene mutation. (K1, K2, K3, K4)
- 3.2: Chromosomal aberrations. (K1, K2, K3, K4)
- 3.3: Genetic disorders – Chromosomal – Autosomal – Down Syndrome. (K1, K2, K3, K4)
- 3.4: Sex chromosomal – Turner's and Klinefelter's Syndrome. (K1, K2, K3, K4)
- 3.5: Inborn errors in Metabolism - Phenyl alanine metabolism. (K1, K2, K3, K4)
- 3.6: Genetic counseling. (K1, K2, K3, K4)

**Unit 4:** (15 Hours)

- 4.1: Gene Pool. (K1, K2, K3, K4)
- 4.2: Applied genetics: Population genetics. (K1, K2, K3, K4)
- 4.3: Hardy Weinberg Law. (K1, K2, K3)
- 4.4: Gene frequency, Factors affecting gene Frequency. (K1, K2, K3)
- 4.5: Pedigree Analysis. (K1, K2, K3, K4)
- 4.6: Eugenics, Euthenics and Euphenics. (K1, K2, K3)

**Unit 5: Evolution:** (15 Hours)

- 5.1: Theories of Evolution – Lamarck. (K1, K2, K3)
- 5.2: Theories of Evolution - Darwin. (K1, K2, K3)
- 5.3: Mimicry. (K1, K2, K3)
- 5.4: Isolation and Speciation. (K1, K2, K3)
- 5.5: Evolution of Man. (K1, K2, K3)
- 5.6: Geological time. (K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

## SEMESTER III & IV- CORE PRACTICAL II

### UCZOF20 - CELL BIOLOGY, BIOINSTRUMENTATION AND GENETICS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III & IV	UCZOF20	Core Practical-II	Practical	Core	3	4	100

#### Objectives:

- To obtain practical skills in preparation of slides and basic hematological techniques.
- To learn about cell organelles and nucleic acid.
- To understand the principles in genetics and bioinstrumentation.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Observe the structure of different types of tissue and the stages of cell division.

**CO2:** Demonstrate preparation of buccal smear and squash preparation of onion root tip.

**CO3:** Demonstrate the skill of focusing, calibrating a microscope and learn the principle, working of laboratory instruments.

**CO4:** Enumerate the Differential count of WBC, total count of WBC and RBC. Identify the blood group, simple Mendelian traits and syndromes.

**CO5:** Observe and study the life cycle of drosophila, polytene giant chromosome and the common mutants.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	M	M
CO2	H	H	H	L	M	M
CO3	H	H	H	M	M	M
CO4	H	H	H	M	M	M
CO5	H	H	H	L	M	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	H	M
CO2	H	H	H	L	H	M
CO3	H	H	H	L	H	H
CO4	H	H	H	L	H	H
CO5	H	H	H	L	H	M

#### CELL BIOLOGY

1. Spotters: Tissue slides – T. S. of bone, striated, non – striated and cardiac muscles, Neuron, ciliated epithelium, columnar epithelium, germinal epithelium-Human sperm and ovum.
2. Mitosis: Squash preparation of Onion root tip.
3. Meiosis: Slides
4. Buccal epithelium - smear preparation.

5. Micrometry.
6. Camera Lucida.
7. Total Count of RBC.
8. Total Count of WBC.
9. Differential Count of WBC.
10. Structure of DNA – Model.
11. Structure of rRna, mRNA, tRNA- Charts.
12. Structure and function of cell organells- 80s Ribosome, Golgi Body, Centriole, Mitochondria- Chart.
13. Bioinstrumentation – Homogenizer, Centrifuge, Gel Electrophoresis, Light Microscope, TEM, SEM.

### **GENETICS**

14. ABO blood grouping and Rh typing.
15. Study of Simple Mendelian traits in Human – Any 2 traits.
16. Karyotypic study of Syndromes: Klinefelter's syndrome, Turners syndrome and Down syndrome- Chart.
17. Giant chromosome of Chironomous larva- Permanent Slide.
18. Drosophila mutants - vestigial wing, white eye, yellow body.
19. Drosophila medium preparation and observation of life cycle.
20. Drosophila male and female.

## SEMESTER V

### UCZOG20 - DEVELOPMENTAL BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	UCZOG20	Developmental Biology	Theory	Core	5	5	100

#### Objectives:

- To study the process of development from germ cell to individual.
- To study the recent advancements in the reproductive biology.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Discuss gametogenesis and types of eggs and egg membranes.

**CO2:** Explain the mechanism and physiology of Fertilization, parthenogenesis and cleavage.

**CO3:** Explain gastrulation and organogenesis in mammals.

**CO4:** Discuss human reproduction

**CO5:** Discuss Assisted Reproductive Technologies.

CO/PSO	PSO

CO1	H	M	H	M	L	M
CO2	H	M	H	M	L	M
CO3	H	M	H	M	L	M
CO4	H	M	H	M	L	M
CO5	H	M	H	L	M	M

#### Unit I:

**(15 Hours)**

1.1: Introduction and history of Developmental Biology. (K1, K2, K3)

1.2: Spermatogenesis. (K1, K2, K3)

1.3: Oogenesis. (K1, K2, K3)

1.4: Eggs-Types of eggs. (K1, K2, K3)

1.5: Polarity and symmetry of eggs. (K1, K2, K3)

1.6: Egg membranes- Extra embryonic membranes in Chick. (K1, K2, K3)

#### Unit II:

**(15 Hours)**

2.1: Fertilization – Mechanism. (K1, K2, K3)

2.2: Physiology of Fertilization. (K1, K2, K3)

2.3: Theories of Fertilization. (K1, K2, K3)

- 2.4: Experimental works of Spemann and Mangold. (K1, K2, K3)
- 2.5: Parthenogenesis. (K1, K2, K3)
- 2.6: Cleavage. (K1, K2, K3)

**Unit III:**

**(15 Hours)**

- 3.1: Fate map. (K1, K2, K3, K4)
- 3.2: Morphogenetic movements and Gastrulation in Mammals. (K1, K2, K3)
- 3.3: Organogenesis in Mammal – Development of eye. (K1, K2, K3)
- 3.4: Development of Ear. (K1, K2, K3)
- 3.5: Development of Brain. (K1, K2, K3)
- 3.6: Development of Heart. (K1, K2, K3)

**Unit IV:**

**(15 Hours)**

- 4.1: Human reproduction - Puberty, Menstrual cycle and Menopause. (K1, K2, K3)
- 4.2: Classification of Placenta. (K1, K2, K3)
- 4.3: Placenta in Mammals. (K1, K2, K3)
- 4.4: Hormonal changes in pregnancy. (K1, K2, K3)
- 4.5: Parturition and Lactation. (K1, K2, K3)
- 4.6: Contraception- Merits- Demerits. (K1, K2, K3)

**Unit V:**

**(15 Hours)**

- 5.1: Assisted Reproductive Technology. (K1, K2, K3, K4)
- 5.2: Super Ovulation. Artificial insemination. (K1, K2, K3, K4)
- 5.3: Cryopreservation. (K1, K2, K3, K4)
- 5.4: In Vitro Fertilization (IVF), Test tube babies, Embryo transfer. (K1, K2, K3, K4)
- 5.5: Amniocentesis. (K1, K2, K3, K4)
- 5.6: Bio ethics. (K1, K2, K3, K4)

**Books for Reference:**

**Textbooks:**

1. P.S.Verma, V.K. Agarwal and Tyagi - Chordate Embryology, S.Chand and Co.,New Delhi 2007.
2. Arumugam N. - Developmental Biology- Saras Publication-15<sup>th</sup> edition 2014.

**Reference Books:**

3. Balinsky B.L - Introduction to Embryology, 5<sup>th</sup> Edition. First Indian, Reprint 2012.
4. Mohan P.Arora –Embryology- Himalaya Publishing House, 2011.
5. Veer Bala Rastogi, Jayaraj- Developmental Biology,2<sup>nd</sup> Edition, Kedar Nath Ram Nath. 1994.
6. Robert S. Mcewen- Vertebrate Embryology, 4<sup>th</sup> Edition, Oxford & IBH Publishing Co. 1949.
7. Bradley M.Patten, Bruce M. Carlson-Foundations of Embryology, 3<sup>rd</sup> Edition. Tata McGraw Hill Publishing Company Ltd. 1977.

**SEMESTER V**  
**UCZOH20 – PHYSIOLOGY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	UCZOH20	Physiology	Theory	Core	4	4	100

**Objectives:**

- To understand and appreciate the structure and function of organ systems.
- To study the basic physiological processes that supports life.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Interpret digestion and metabolism.

**CO2:** Analyse the interaction between circulatory system and respiratory system.

**CO3:** Analyse the function of excretory system and illustrate muscle contraction.

**CO4:** Illustrate the structure and function of nervous system.

**CO5:** Compare the structure and function of endocrine system.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	M	M	L
CO2	H	H	L	M	M	L
CO3	H	H	L	M	M	L
CO4	H	H	L	M	M	L
CO5	H	H	L	M	M	L

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	L	M	H
CO2	H	H	H	L	M	H
CO3	H	H	H	L	M	H
CO4	H	H	H	L	M	H
CO5	H	H	H	L	M	H

**Unit I:**

**(12 Hours)**

- 1.1: Introduction to Physiology. (K1, K2, K3)
- 1.2: Digestion- digestive system of man. (K1, K2, K3)
- 1.3: Process of digestion –absorption. (K1, K2, K3)
- 1.4: Metabolism of carbohydrate. (K1, K2, K3, K4)
- 1.5: Metabolism of protein. (K1, K2, K3, K4)
- 1.6: Metabolism of lipids. (K1, K2, K3, K4)

**Unit II:**

**(12 Hours)**

- 2.1: Circulation - structure and function of heart. (K1, K2, K3)
- 2.2: Cardiac cycle-Cardiac rhythm- factors affecting it. (K1, K2, K3)
- 2.3: Properties of cardiac muscles. (K1, K2, K3)
- 2.4: Respiration – Respiratory system of man.(K1, K2, K3)

2.5: Mechanism of gaseous exchange. (K1, K2, K3)

2.6: Role of hemoglobin in respiration. (K1, K2, K3)

**Unit III:**

**(12 Hours)**

3.1: Excretion -Structure of kidney and Nephron. (K1, K2, K3)

3.2: Physiology of urine formation. Hormonal regulation- urine formation. (K1, K2, K3)

3.3: Osmo- Iono regulation in man. (K1, K2, K3)

3.4: Muscles-Types of muscles. (K1, K2, K3)

3.5: Ultrastructure of skeletal muscle-composition. (K1, K2, K3)

3.6: Contraction – theories of contraction. (K1, K2, K3)

**Unit IV:**

**(12 Hours)**

4.1: Nervous system –Components of CNS. (K1, K2, K3)

4.2: Structure of human brain. (K1, K2, K3)

4.3: Structure of neuron, nerve impulse. (K1, K2, K3)

4.4: Synaptic transmission, neurotransmitters. (K1, K2, K3, K4)

4.5: Physiology of vision. (K1, K2, K3)

4.6: Physiology of hearing. (K1, K2, K3)

**Unit V:**

**(12 Hours)**

5.1: Endocrine system- Hypothalamus. (K1, K2, K3)

5.2: Structure and function of pituitary gland. (K1, K2, K3)

5.3: Structure and function of thyroid gland. (K1, K2, K3)

5.4: Structure and function of adrenal gland. (K1, K2, K3)

5.5: Structure and function of pancreas. (K1, K2, K3)

5.6: Sex hormones – estrogen and testosterone. (K1, K2, K3)

**Books for Study and Reference:**

**Text Books:**

1. P.S Verma, B.S Tyagi and VK. Agarwal- Animal Physiology -S.Chand and Co., Ltd, New Delhi, 1990.
2. Parameswaran, Anantakrishnan and Ananta subramanian - Outlines of Animal Physiology - S. Viswanathan (Printers and Publishers) Pvt. Ltd., 1975.
3. N. Arumugam and A MariakuttikanSaras Publication; 12th edition , January 2019.

**Reference Book:**

**SEMESTER V**  
**UCZOI20 – BIOSTATISTICS**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	UCZOI20	Biostatistics	Theory	Core	4	4	100

**Objectives:**

- To understand the basic concepts and application of biostatistics
- To understand the application of biostatistics in research findings

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Identify and collect different types of data and select samples for biological studies

**CO2:** Classify and tabulate the data and present them diagrammatically and graphically

**CO3:** Discuss theoretical distribution. Compute mean, median and mode.

**CO4:** Explain and compute measures of dispersion.

**CO5:** Compute t-test; F-test; Chi square test for biological studies.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	L	H	M	H	L	L
CO2	L	H	H	H	L	M
CO3	L	H	H	H	L	L
CO4	L	H	H	H	L	L
CO5	L	H	H	H	L	L

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	M	M	H
CO2	H	H	H	L	M	M
CO3	H	H	H	L	M	M
CO4	H	H	H	L	M	L
CO5	H	H	H	M	M	L

**Unit I:**

**(12 Hours)**

1.1: Biostatistics- Introduction, Definition and Scope. (K1, K2, K3)

1.2: Data Types of data- Raw data, Primary data, Secondary data. (K1, K2, K3)

1.3: Methods of collection of data. (K1, K2, K3, K4)

1.4: Constants and Variables - Discrete variables and continuous variables. (K1, K2, K3)

1.5: Sample- Need for sampling – Advantages and Disadvantages. (K1, K2, K3)

1.6: Methods of Sampling. (K1, K2, K3, K4)

**Unit II:****(12 Hours)**

- 2.1: Classification of Data- Types of Classification- Quantitative, Qualitative, Geographical, Chronological. (K1, K2, K3)
- 2.2: Tabulation- Components of Table. (K1, K2, K3)
- 2.3: Types of Tabulation- Simple, Complex, General and Special Purpose. (K1, K2, K3)
- 2.4: Diagrams- Types- Line, Pie, Bar simple, subdivided, multiple, percentage bar diagrams. (K1, K2, K3, K4)
- 2.5: Graphs- Types- Graph of time series- Line, Range Chart, Band Graph. (K1, K2, K3, K4)
- 2.6: Graph of frequency distribution- Histogram, Polygon, Cumulative frequency curve, Ogive. (K1, K2, K3, K4)

**Unit III:****(12 Hours)**

- 3.1: Theoretical (Frequency) distribution. Normal, Poisson and Binomial. (K1, K2, K3)
- 3.2: Measures of Central Tendency: Simple Arithmetic Mean, Median, Mode. (K1, K2, K3)
- 3.3: Mean-Individual and Grouped Observation, Discrete series. (K1, K2, K3, K4)
- 3.4: Mean-Continuous series. (K1, K2, K3, K4)
- 3.5: Median - Individual and Grouped Observation- Discrete series, Continuous series. (K1, K2, K3, K4)
- 3.6: Mode Individual Observation, Continuous series. (K1, K2, K3, K4)

**Unit IV:****(12 Hours)**

- 4.1: Dispersion- Measures of Dispersion- Absolute and Relative measures of dispersion. (K1, K2, K3)
- 4.2: Methods of measuring Dispersion. (K1, K2, K3, K4)
- 4.3: Mean Deviation- Individual and Grouped Observation, Discrete series, Continuous series. (K1, K2, K3, K4)
- 4.4: Standard Deviation - Individual and Grouped Observation-Discrete series.(K1, K2, K3, K4)
- 4.5: Standard Deviation - Continuous series. (K1, K2, K3, K4)
- 4.6: Standard Error -Coefficient of Variation. (K1, K2, K3, K4)

**Unit V:****(12 Hours)**

- 5.1: Hypothesis Testing Test for significance Small and Large samples. (K1, K2, K3)
- 5.2: Student's t test - Test for Significance of Means of Sample. (K1, K2, K3, K4)
- 5.3: Test for Significance of Difference between Two Sample mean. (K1, K2, K3, K4)
- 5.4: The Variance Ratio- F test (K1, K2, K3, K4)
- 5.5: Chi Square test and its significance. (K1, K2, K3, K4)
- 5.6: Contingency table – degree of freedom. (K1, K2, K3)

**SEMESTER VI**  
**UCZOJ20 – BIOTECHNOLOGY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UCZOJ20	Biotechnology	Theory	Core	4	4	100

**Objective:**

- To learn the basics of biotechnology this is the integration of biology and technology
- To study the application of the subject in various fields

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Explain the scope and branches of Biotechnology and summarize Genetic Engineering.

**CO2:** Describe Cloning strategies.

**CO3:** Explain Gene transfer mechanism and Blotting Techniques.

**CO4:** Demonstrate Animal Cell Culture and explain the applications of cell culture.

**CO5:** Discuss the applications of Genetic Engineering in various fields.

CO5	H	H	H	M	H	H

**Unit I:**

**(12 Hours)**

- 1.1: Biotechnology – Introduction, Scope and importance. (K1, K2, K3)
- 1.2: Definition and Branches of Biotechnology. (K1, K2, K3)
- 1.3: DNA Structure and Composition. (K1, K2, K3, K4)
- 1.4: Introduction to Gene. (K1, K2, K3, K4)
- 1.5: Introduction to Genetic Engineering. (K1, K2, K3)
- 1.6: Methodology of Genetic Engineering. (K1, K2, K3, K4)

**Unit II:**

**(12 Hours)**

- 2.1: Gene cloning – Cloning Strategies. Restriction Endonucleases. (K1, K2, K3, K4)
- 2.2: Cloning Vectors Plasmids – pBR322. (K1, K2, K3, K4)

- 2.3: Bacteriophages Lambda Phage. (K1, K2, K3, K4)
- 2.4: Cosmids – YAC. (K1, K2, K3, K4)
- 2.5: Ligases, Linkers and Adaptors, (K1, K2, K3, K4)
- 2.6: rDNA Technology – Construction of rDNA. (K1, K2, K3, K4)

**Unit III: (12 Hours)**

- 3.1: Gene Transfer Mechanism- Transformation, Transfection, Microinjection, Electroporation, Biolistics. Colony Hybridization, Plaque Hybridization. (K1, K2, K3, K4)
- 3.2: Expression of Cloned Genes. (K1, K2, K3, K4)
- 3.3: Sanger's Method of DNA Sequencing. (K1, K2, K3, K4)
- 3.4: Genomic Library; cDNA Library. (K1, K2, K3, K4)
- 3.5: Blotting Techniques Southern, Western, Northern Techniques. (K1, K2, K3, K4)
- 3.6: PCR and its Applications. (K1, K2, K3, K4)

**Unit IV: (12 Hours)**

- 4.1: Animal Cell Culture –Requirements of Cell Culture. Laboratory Equipments. (K1, K2, K3, K4)
- 4.2: Culture Media. (K1, K2, K3, K4)
- 4.3: Tissue Disaggregation; Primary and Secondary Cell Culture. (K1, K2, K3, K4)
- 4.4: Establishment of Cell Line –Monolayer Culture, Suspension Culture. (K1, K2, K3, K4)
- 4.5: Methods of Culture – Petridish, Test Tube, Flask Culture. (K1, K2, K3, K4)
- 4.6: Applications of Cell Culture. (K1, K2, K3, K4)

**Unit V: (12 Hours)**

- 5.1: Applications of Genetic Engineering in Medicine. (K1, K2, K3, K4)
- 5.2: Applications of Genetic Engineering in Agriculture. (K1, K2, K3, K4)
- 5.3: Applications of Genetic Engineering in Industry. (K1, K2, K3, K4)
- 5.4: SCP- Production of Spirulina. (K1, K2, K3, K4)
- 5.5: Genetically Modified Organisms- Transgenic Fish and Sheep. (K1, K2, K3, K4)
- 5.6: Introduction to Databases – Gen Bank, EMBL, DDBJ. (K1, K2, K3, K4)

## SEMESTER VI

### UCZOK20- ENVIRONMENTAL BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UCZOK20	Environmental Biology	Theory	Core	4	3	100

#### Objectives:

- To understand the network of the surrounding and other organism.
- To protect the environment and to use the resources sustainably.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain ecology its branches and abiotic and biotic components of ecosystem.

**CO2:** Discuss animal association, biogeochemical cycle and Ecosystem and its functions.

**CO3:** Discuss the structure and functions of terrestrial and aquatic ecosystems.

**CO4:** Describe the Characteristics of population, Community and Ecological Succession

**CO5:** Discuss the causes of pollution their control measures and wildlife management.

CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	H

#### Unit I:

**(12 Hours)**

1.1: Definition, Branches- Autecology – Synecology- Integrated. (K1, K2, K3)

1.2: Abiotic factors: Temperature-Thermal stratification. Range of Temperature tolerance, Effect of temperature on Plants and animals. (K1, K2, K3)

1.3: Light-Biological effects of light on plants and animals. (K1, K2, K3)

1.4: Water-Types and properties. (K1, K2, K3)

1.5: Soil- Soil profile-Pedogenesis. (K1, K2, K3)

1.6: Atmosphere- layers and functions. (K1, K2, K3)

#### Unit II:

**(12 Hours)**

2.1: Biotic factors: Intra and inter specific animal associations. (K1, K2, K3)

- 2.2: Biogeochemical cycles- Water, Carbon, Nitrogen, Phosphorus. (K1, K2, K3)
- 2.3: Structure of Ecosystem and functions. (K1, K2, K3, K4)
- 2.4: Energy flow, Productivity-primary and secondary. (K1, K2, K3, K4)
- 2.5: Ecological pyramids, food chain and food web. (K1, K2, K3, K4)
- 2.6: Decomposition and homeostasis.

**Unit III: (12 Hours)**

- 3.1: Terrestrial habitat-characters of biome, Tundra, Forest, Deserts. (K1, K2, K3)
- 3.2: Fresh water habitat-physico chemical nature. (K1, K2, K3, K4)
- 3.3: Adaptation of animals in lentic and lotic habitat. (K1, K2, K3)
- 3.4: Marine ecology-Characteristics, Zonation and stratification. (K1, K2, K3)
- 3.5: Inter-tidal zone (Rocky, Sandy & Muddy shore). (K1, K2, K3)
- 3.6: Mangroves. (K1, K2, K3)

**Unit IV: (12 Hours)**

- 4.1: Definition, characteristics-Density, Natality, Mortality. (K1, K2, K3)
- 4.2: Survivorship curves, Age pyramids. (K1, K2, K3)
- 4.3: Carrying capacity, Fluctuations, Equilibrium. (K1, K2, K3)
- 4.4: Population growth, Population dispersal, Density dependent factors. (K1, K2, K3)
- 4.5: Ecotone and Edge effect. (K1, K2, K3)
- 4.6: Ecological succession. (K1, K2, K3)

**Unit V: (12 Hours)**

- 5.1: Pollution- Causes and control- Air. (K1, K2, K3, K4)
- 5.2: Water, soil pollutions. (K1, K2, K3, K4)
- 5.3: Greenhouse effect, Global warming, Acid rains. (K1, K2, K3, K4)
- 5.4: Water treatment. (K1, K2, K3, K4)
- 5.5: Wild life conservation and its Management. (K1, K2, K3, K4)
- 5.6: Red data book, National parks and Wild life sanctuaries. (K1, K2, K3, K4)

**Books for Study and Reference:**

**Textbooks:**

1. Verma, P.S. and V.K. Agarwal- Environmental Biology, S. Chand & Co. Ltd, 1986.
2. Rastogi V.B. and M.S. Jayaraj- Animal Ecology and distribution of animals, Kedar Nath Ram Nath, Meerut-250 001, 1988-89.

**Reference Books:**

3. Clarke, G.L.- Elements of Ecology, John Wiley & Sons Inc, New York, London, 1954.
4. Eugene P. Odum- Fundamentals of Ecology, Saunders International Student Edition, W. B Saunders Company, Philadelphia, London, Toronto,1971.
5. Kotpal, R.L and N.P- Basic Concepts of Ecology, Vishal Publications, Delhi,1986.
6. Biswarup Mukherjee - Environmental Biology, Tata McGraw-Hill Publishing Company Ltd. New Delhi,1997.

## SEMESTER V

### UEZOA20- MAJOR ELECTIVE I A: ECONOMIC ZOOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	UEZOA20	Economic Zoology	Theory	Core Elective	5	5	100

#### Objectives:

- To learn the economic importance of animals
- To motivate the students to become entrepreneurs

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Demonstrate culture techniques of apiculture, sericulture, lac culture and vermiculture.

**CO2:** Illustrate the preparation and management of fish culture ponds.

**CO3:** Differentiate breeds of fowl and describe poultry and piggery management.

**CO4:** Discuss Dairy farming and tanning process.

**CO5:** Explain processing of wool, fur and obtains insight of pharmaceutical products from animals.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	M	H
CO2	H	H	H	M	M	H
CO3	H	H	H	M	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit I:

(15 Hours)

- 1.1: Introduction- Culture methods- equipments – Apiculture. (K1, K2, K3)
- 1.2: Apiculture- Products- disease and control measures. (K1, K2, K3)
- 1.3: Culture methods- equipments Sericulture. (K1, K2, K3)
- 1.4: Products- disease and control measures in Sericulture. (K1, K2, K3)
- 1.5: Culture methods- equipments Vermiculture. (K1, K2, K3)
- 1.6: Culture methods- equipments Lac culture. (K1, K2, K3)

#### Unit II:

(15 Hours)

- 2.1: Aquaculture-fresh water fishery-farm management. Seed collection-culture techniques.(K1,K2,K3)

- 2.2: Edible fishes. Equipments, nets and traps. (K1, K2, K3)
- 2.3: Marine fish culture. (K1, K2, K3)
- 2.4: Prawn culture. (K1, K2, K3)
- 2.5: Pearl culture. (K1, K2, K3)
- 2.6: By products of fishing industry- Diseases of Fish and prawn. (K1, K2, K3)

**Unit III:**

**(15 Hours)**

- 3.1: Poultry management – breeds of fowls - selection of breeds. (K1, K2, K3)
- 3.2: Fowl house – types of rearing – feeds. (K1, K2, K3)
- 3.3: Poultry products. (K1, K2, K3)
- 3.4: Preservation of eggs-by products of egg. (K1, K2, K3, K4)
- 3.5: Disease of fowls and control. (K1, K2, K3)
- 3.6: Piggery industry and byproducts. (K1, K2, K3)

**Unit IV:**

**(15 Hours)**

- 4.1: Dairy farming - breeds of milch animals. (K1, K2, K3)
- 4.2: Housing. (K1, K2, K3)
- 4.3: Feeds. (K1, K2, K3)
- 4.4: Disease and control. (K1, K2, K3)
- 4.5: Leather industry -processing of leather. (K1, K2, K3)
- 4.6: Tanning - oil and chrome tanning - finishing. (K1, K2, K3)

**Unit V:**

**(15 Hours)**

- 5.1: Wool – properties. (K1, K2, K3)
- 5.2: Wool- processing. (K1, K2, K3)
- 5.3: Fur industry – fur bearing animals. (K1, K2, K3)
- 5.4: Processing of fur. (K1, K2, K3)
- 5.5: Care of fur products. (K1, K2, K3)
- 5.6: Pharmaceutical products from animals. (K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

1. Ahsan J., and Sinha SP- Handbook of Economic zoology, S. Chand and Co., New Delhi, 2009.
2. Shukla GS, and Upadhyay SP- Economic Zoology, Ratogi Publication, Meerut, 1994.

**Reference Books:**

3. Mary Violet Christy A-Vermitechnology, MJP Publication Chennai,1976.
4. Ayyar TVT- Handbook of Economic Entomology for South India, Govt press, Madras, 1963.
5. Jhingran VG- Fish and fisheries of India, Hindustan Publishing Corp., New Delhi, 1982.
6. Jawaid Ahgan, Subhas Prasad Sinha- A Hand book on Economic Zoology, S. Chand & Co. Ltd., New Delhi, 2000.

## SEMESTER V

### UEZOB20 – MAJOR ELECTIVE IB: VERMICULTURE

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	UEZOB20	Vermiculture	Theory	Core Elective	5	5	100

#### Objectives:

- To learn the production and importance of organic fertilizers.
- To motivate students for self-employment.

#### Course Outcomes (CO):

On completion of the course the student will be able to...

**CO1:** Identify various groups of earthworms and impact of earthworm on soil.

**CO2:** Describe large and small scale composting methods.

**CO3:** Explain the factors affecting vermicomposting and preparation of vermibed.

**CO4:** Discuss the use of vermicompost and vermivash in agriculture and horticulture.

**CO5:** Elaborate the role of earthworm in agriculture, fishing, medicine and pollution and promotion of vermiculture.

CO/PO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

#### Unit I:

(15 Hours)

1.1: Introduction and scope of Vermiculture. (K1, K2, K3)

1.2: Ecological groups of earthworms – Epigeic, Endogeic, Anegic. (K1, K2, K3)

1.3: Varieties of Earthworm – Night crawlers – Field crawlers.(K1, K2, K3)

1.4: Manure worms – Red worms. (K1, K2, K3)

1.5: Physical and chemical effects of earthworm on soil.(K1, K2, K3)

1.6: Biological effects of earthworm on soil.(K1, K2, K3)

**Unit II:** (15 Hours)

- 2.1: Organic waste sources.(K1, K2, K3)
- 2.2: Vermi composting definition and methods.(K1, K2, K3)
- 2.3: Small scale Pit method.(K1, K2, K3)
- 2.4: Large scale pit method.(K1, K2, K3)
- 2.5: Four tanks method.(K1, K2, K3)
- 2.6: Two tank method. (K1, K2, K3)

**Unit III:** (15 Hours)

- 3.1: Factors affecting vermicomposting: pH.(K1, K2, K3)
- 3.2: Factors affecting vermicomposting Moisture, Temperature.(K1, K2, K3)
- 3.3: Factors affecting vermicomposting Light, location operation site.(K1, K2, K3)
- 3.4: Preparation of vermibed.(K1, K2, K3)
- 3.5: Collection of compost.(K1, K2, K3)
- 3.6: Separation of earthworm.(K1, K2, K3)

**Unit IV:** (15 Hours)

- 4.1: Application of vermicomposting in agriculture.(K1, K2, K3)
- 4.2: Application of vermicomposting horticulture practices.(K1, K2, K3)
- 4.3: Economics of Vermiculture.(K1, K2, K3)
- 4.4: Vermi wash.(K1, K2, K3)
- 4.5: Preparation of Vermiwash.(K1, K2, K3)
- 4.6: Uses of Vermi wash.(K1, K2, K3)

**Unit V:** (15 Hours)

- 5.1: Role of earthworm in agriculture.(K1, K2, K3)
- 5.2: Role of earthworm in fishing. (K1, K2, K3)
- 5.3: Role of earthworm in medicine.(K1, K2, K3)
- 5.4: Role of earthworm in pollution control.(K1, K2, K3)
- 5.5: Schemes and projects available for the promotion of Vermiculture.(K1, K2, K3)
- 5.6: Loans to start vermicomposting.(K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

1. Edwards, C.A., and Bother, B.- Biology of Earthworms – Chapman Hall Publishers and Co., London, 1996.
2. Ismail, S.A.- Vermitechnology – The Biology of Earthworms- Orient Longman Publishers – India, 1997.

**Reference Books:**

3. Ranganathan, L.S- Vermibiotechnology from soil health to human health – Agrobios – India. 2006
4. Talashikar, S.C- Earthworms in Agriculture – Agrobios – India, 2008.

## SEMESTER VI

### UEZOC20 – ELECTIVE - II A: MICROBIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UEZOC20	Microbiology	Theory	Core Elective	5	5	100

#### Objectives:

- To study about the hidden world of microbes.
- To learn about the beneficial and harmful microbes.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Describe the structure and function of bacteria and virus.

**CO2:** Apply the process of media preparation and bacterial culture.

**CO3:** Discuss the various sterilization techniques and chemotherapeutic agents.

**CO4:** Discuss the role of microbes in food production and preservation.

**CO5:** Discuss the disease causing microorganisms.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	M	L	L
CO2	H	H	H	M	L	L
CO3	M	H	H	M	M	L
CO4	H	H	H	M	L	M
CO5	H	H	L	M	L	L

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	L	H	M	M	M
CO2	H	H	H	M	M	H
CO3	H	H	H	L	M	H
CO4	H	H	H	M	M	H
CO5	H	H	H	M	L	M

#### Unit I:

(15 Hours)

1.1: Introduction to Microbiology. (K1, K2, K3)

1.2: Shape and Morphological arrangements of Bacteria. (K1, K2, K3)

1.3: Structure – Cell Wall, Cytoplasmic Membrane, Flagella, Nucleoid. (K1, K2, K3)

1.4: Plasmid, Riobsomes, Capsule. (K1, K2, K3)

1.5: Gram staining positive and negative. (K1, K2, K3)

1.6: Fine structure of virus- T<sub>4</sub> Bacteriophage. (K1, K2, K3)

**Unit II:****(15 Hours)**

- 2.1: Nutritional requirements of bacteria. (K1, K2, K3)
- 2.2: Culture Media- Agar- Blood and Beef. (K1, K2, K3)
- 2.3: Bacterial culture methods- Broth, Agar Plate, Agar Slant, Agar Stab, Roll Tube, Deep Media. (K1, K2, K3, K4)
- 2.4: Isolation of Pure culture- Serial Dilution Technique, Streak Plate Technique. (K1, K2, K3, K4)
- 2.5: Pour Plate Technique, Spread Plate Technique.
- 2.6: Maintenance of Bacterial Culture –Lyophilization, Cryopreservation by Liquid Nitrogen. (K1, K2, K3, K4)

**Unit 3:****(15 Hours)**

- 3.1: Control of Microorganisms: Sterilization- Physical: Autoclaving; Tyndallization. (K1, K2, K3, K4)
- 3.2: Physical: Flaming; Filtrations; Laminar flow hood. (K1, K2, K3, K4)
- 3.3: Chemical methods: Acids and Alkalies. (K1, K2, K3, K4)
- 3.4: Halogens; Chlorine; Phenol and its derivatives. (K1, K2, K3, K4)
- 3.5: Alcohols; Dyes; Detergents; Heavy metals. (K1, K2, K3, K4)
- 3.6: Chemotherapy-Antibiotics. (K1, K2, K3, K4)

**Unit 4:****(15 Hours)**

- 4.1: Microbiology of food: Role of microbes in food production. (K1, K2, K3, K4)
- 4.2: Non Dairy products - Meat and Fish Products. (K1, K2, K3, K4)
- 4.3: Fermented Vegetables- Bread. (K1, K2, K3, K4)
- 4.4: Alcoholic Beverages and Vinegar. (K1, K2, K3, K4)
- 4.5: Dairy Microbiology-Sources and Microorganisms in Milk, Pasteurization of milk, Dairy Products. (K1, K2, K3, K4)
- 4.6: Food poisoning and preservation. (K1, K2, K3, K4)

**Unit 5:****(15 Hours)**

- 5.1: Microorganisms, pathogenesis and prophylaxis. (K1, K2, K3, K4)
- 5.2: Bacterial: *Mycobacterium tuberculosis* (K1, K2, K3, K4)
- 5.3: Bacterial: *Salmonella typhi*. (K1, K2, K3, K4)
- 5.4: Viral: Hepatitis B. (K1, K2, K3, K4)
- 5.5: Viral: H1N1. (K1, K2, K3, K4)
- 5.6: Fungal: *Candida albicans*. (K1, K2, K3, K4)

**Books for Study and Reference:****Textbooks:**

- 1. Powar C.B., Dagainwala H.F. General Microbiology. Himlaya Publishing House. 2015.
- 2. Sharma P.D. - Microbiology - Rastogi Publication, 1998: 5<sup>th</sup> reprint, 2005-2006.

**Reference Books:**

## SEMESTER VI

### UEZOD20 – ELECTIVE - II B: BIOINSTRUMENTATION

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UEZOD20	Bioinstrumentation	Theory	Core Elective	5	5	100

**Objectives:**

- To understand the principle, construction and application of instruments.
- To aid the students to understand the usage of the instruments in research.

**Course Outcomes (CO):**

**On completion of the course the student will be able to...**

**CO1:** Apply the principle and construction of the instruments.

**CO2:** Demonstrate the usage of the instruments.

**CO3:** Illustrate the working method of various techniques.

**CO4:** Discuss the application of the techniques.

**CO5:** Apply the skill of instrumentation and micro techniques.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
<b>CO1</b>	H	H	M	H	L	L
<b>CO2</b>	H	H	M	H	L	L

<b>CO2</b>	H	H	H	L	M	M
<b>CO3</b>	H	H	H	L	M	M
<b>CO4</b>	H	H	H	L	M	M
<b>CO5</b>	H	H	H	L	M	M

**Unit I:**

**(15 Hours)**

1.1: Introduction.(K1, K2, K3)

1.2: Scope.(K1, K2, K3)

1.3: Importance and application of Bioinstrumentation.(K1, K2, K3)

1.4:Microscopes – Compound.(K1, K2, K3)

1.5: Fluorescent Microscope.(K1, K2, K3)

1.6: U-V Microscopes.(K1, K2, K3)

**Unit II:**

**(15 Hours)**

2.1: TEM, and SEM.(K1, K2, K3, K4)

2.2: Phase contrast.(K1, K2, K3)

2.3: Ocular and stage micrometer.(K1, K2, K3)

2.4: Camera Lucida.(K1, K2, K3)

- 2.5: Cell homogenization- Fractionation.(K1, K2, K3)  
2.6: Centrifugation and Isolation of Cellular components.(K1, K2, K3)

**Unit III:** (15 Hours)

- 3.1: Laboratory instruments- Autoclave, Hot air oven.(K1, K2, K3)  
3.2: Water bath, Incubator.(K1, K2, K3)  
3.3: Centrifuge, pH meter.(K1, K2, K3)  
3.4: Spectrophotometer.(K1, K2, K3)  
3.5: Hemoglobinometer, Hemocytometer.(K1, K2, K3)  
3.6: Microtome.(K1, K2, K3)

**Unit IV:** (15 Hours)

- 4.1: Electrophoresis- Zone.(K1, K2, K3, K4)  
4.2: Immunoelectrophoresis.(K1, K2, K3)  
4.3: SDS PAGE.(K1, K2, K3)  
4.4: Chromatography- Paper, Thin layer.(K1, K2, K3)  
4.5: Ion exchange chromatography.(K1, K2, K3)  
4.6: Gas chromatography.(K1, K2, K3)

**Unit V:** (15 Hours)

- 5.1: Micro technique.(K1, K2, K3)  
5.2: Fixation.(K1, K2, K3)  
5.3: Dehydration.(K1, K2, K3)  
5.4: Embedding.(K1, K2, K3)  
5.5: Sectioning. (K1, K2, K3)  
5.6: Staining.(K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

- 1.M. Prakash, C.K. Arora- Laboratory instrumentation, Anmol publications pvt ltd. First edition, 1998.
2. L. Veerakumari –Bioinstrumentation-MJP Publisher- 2019.

**Reference Books:**

## SEMESTER VI

### UEZOE20 – ELECTIVE -III A: IMMUNOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UEZOE20	Immunology	Theory	Core Elective	5	5	100

#### Objectives:

- To study the structure and function of immune system
- To understand the application of immunology in medical field

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Describe the primary and secondary lymphoid organs.

**CO2:** Categorize types of immunity and the cells involved in immunity.

**CO3:** Analyse the structure and function of antigens and antibodies.

**CO4:** Examine the antigen antibody reaction and its role in transplantation, hypersensitivity, autoimmunity and AIDS.

**CO5:** Analyse immunization and its importance in prevention of diseases.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	H	L	L
CO2	H	H	L	H	L	L
CO3	H	H	L	H	L	L
CO4	H	H	L	H	L	L

CO2	H	H	M	L	L	H
CO3	H	H	M	L	L	H
CO4	H	H	M	L	L	H
CO5	H	H	M	H	L	H

#### Unit I:

**(15 Hours)**

1.1: History and scope. (K1, K2, K3)

1.2: Lymphoid organs. - Primary and secondary. (K1, K2, K3)

1.3: Structure and role - Bone marrow – Thymus. (K1, K2, K3)

1.4: Structure and role - Lymph node. (K1, K2, K3)

1.5: Structure and role - Spleen. (K1, K2, K3)

1.6: Structure and role - Payer's patches and Kuffer cells. (K1, K2, K3)

#### Unit II:

**(15 Hours)**

2.1: Immunity types - Innate Active and Passive. (K1, K2, K3, K4)

- 2.2: Acquired Active and Passive. (K1, K2, K3, K4)
- 2.3: Characteristics of Immune response. (K1, K2, K3, K4)
- 2.4: Humoral and Cell mediated immunity. (K1, K2, K3, K4)
- 2.5: Cells involved in immune response – T. (K1, K2, K3, K4)
- 2.6: Cells involved in immune response - B Cells and Macrophages.(K1, K2, K3, K4)

**Unit 3:**

**(15 Hours)**

- 3.1: Antibodies – functions.(K1, K2, K3)
- 3.2: Immunoglobulin - structure and functions. (K1, K2, K3, K4)
- 3.3: Human Immunoglobulin Classes. (K1, K2, K3)
- 3.4: Antigens- Types. (K1, K2, K3)
- 3.5: Epitopes, Paratopes. (K1, K2, K3)
- 3.6: Adjuvants. (K1, K2, K3).

**Unit 4:**

**(15 Hours)**

- 4.1: Antigen Antibody reactions-Precipitation. (K1, K2, K3)
- 4.2: Agglutination, Cytolysis, Opsonization. (K1, K2, K3)
- 4.3: Transplantations and Graft rejections. (K1, K2, K3)
- 4.4: Hypersensitivity. (K1, K2, K3)
- 4.5: Autoimmunity. (K1, K2, K3)
- 4.6: AIDS/HIV. (K1, K2, K3)

**Unit 5:**

**(15 Hours)**

- 5.1: Viral and parasitic infections. (K1, K2, K3)
- 5.2: Principles and Types of vaccines used in humans. (K1, K2, K3)
- 5.3: Clinical Immunology – Immunization schedule for children. (K1, K2, K3)
- 5.4: Prevention of diseases in new born babies/children- Whooping cough. (K1, K2, K3)
- 5.5: Mumps. (K1, K2, K3)
- 5.6: Measles and Rubella. (K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

**SEMESTER VI**  
**UEZOF20 - ELECTIVE - III B: PARASITOLOGY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UEZOF20	Parasitology	Theory	Core Elective	5	5	100

**Objectives:**

- To learn the life cycle, disease and treatment of various parasites of Human
- To create awareness about health and hygiene

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Discuss about parasites.

**CO2:** Describe host parasite interaction.

**CO3:** Discuss pathology of protozoan parasites.

**CO4:** Describe the pathology of Helminth parasites.

**CO5:** Explain Arthropod role as parasites and vectors.

CO/PO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	M	H	L
CO2	H	H	L	M	H	L
CO3	H	H	L	M	H	L
CO4	H	H	L	M	H	L
CO5	H	H	L	M	H	L

CO3	H	H	H	M	M	M
CO4	H	H	H	M	M	M
CO5	H	H	H	M	M	M

**Unit 1:**

**(15 Hours)**

- 1.1: Terminology - nature of Parasitism.(K1, K2, K3)
- 1.2: Parasites and food habits.(K1, K2, K3)
- 1.3: Origin of parasitism-kinds of parasitism.(K1, K2, K3)
- 1.4: General relation to hosts.(K1, K2, K3)
- 1.5: Definitive and intermediate hosts.(K1, K2, K3)
- 1.6: Parasitic adaptation.(K1, K2, K3)

**Unit 2:**

**(15 Hours)**

- 2.1: Effects of parasites on hosts.(K1, K2, K3)
- 2.2: Immunity.(K1, K2, K3)

- 2.3: Age resistance.(K1, K2, K3)
- 2.4: Tolerance to injurious effects.(K1, K2, K3)
- 2.5: Spread to new hosts.(K1, K2, K3, K4)
- 2.6: Community spread.(K1, K2, K3, K4)

**Unit 3:**

**(15 Hours)**

- 3.1: Morphology, Life cycle, mode of infection, pathogenesis, treatment and prophylaxis of Protozoan parasites – *Plasmodium vivax*.(K1, K2, K3)
- 3.2: *Entamoeba histolitica*.(K1, K2, K3)
- 3.3: *Balantidium*.(K1, K2, K3)
- 3.4: *Leshmania*.(K1, K2, K3)
- 3.5: *Trypanosoma*.(K1, K2, K3)
- 3.6:*Giardia intestinalis*. (K1, K2, K3)

**Unit 4:**

**(15 Hours)**

- 4.1:Morphology, Life cycle, mode of infection, pathogenesis, treatment and prophylaxis of Helminthes parasites- *Ascaris*.(K1, K2, K3)
- 4.2: *Ancylostoma*.(K1, K2, K3)
- 4.3: *Wuchereria*. (K1, K2, K3)
- 4.4: *Schistoma*.(K1, K2, K3)
- 4.5: *Taenia solium*.(K1, K2, K3)
- 4.6: *Trichuris trichiura*. (K1, K2, K3)

**Unit 5:**

**(15 Hours)**

- 5.1: Parasitic Arthropods- degree of parasitism.(K1, K2, K3)
- 5.2: As vectors Indirect, direct and biological transmission.(K1,K2, K3)
- 5.3: Indirect, direct and biological transmission-Mosquitoes.(K1, K2, K3)
- 5.4: Indirect, direct and biological transmission- Flies.(K1, K2, K3)
- 5.5: Indirect, direct and biological transmission- Fleas and bugs.(K1, K2, K3)
- 5.6: Indirect, direct and biological transmission – Ticks and Mites. (K1, K2, K3)

**SEMESTER VI – CORE PRACTICAL III**  
**UCZOL20 – PHYSIOLOGY, DEVELOPMENTAL BIOLOGY, AND ECONOMIC ZOOLOGY.**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V & VI	UCZOL20	Core Practical-III	Practical	Core	3	5	100

**Objectives:**

- To obtain practical skills physiology.
- To learn about development of animals.
- To understand the economic importance of animals.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Demonstrate experiments in Physiology.

**CO2:** Demonstrate expertise in handling instruments.

**CO3:** Identify developmental stages, placenta and histology in development biology.

**CO4:** Apply equipments used in rearing techniques.

**CO5:** Discuss the economic importance of animals.

CO4	H	H	H	L	M	H
CO5	H	H	H	H	M	H

**PHYSIOLOGY:**

1. Detection of nitrogenous waste products in Fish Tank Water, Bird's Excreta and Cow's Urine.
2. Study of Human Salivary Amylase Activity in relation to pH.
3. Study of Human Salivary Amylase Activity in relation to Temperature.
4. Oxygen Consumption in Fish with reference to Body Weight.
5. Differential Count of WBC.
6. Estimation of Haemoglobin - Sahli's Method.
7. Kymograph, Respirometer.

**DEVELOPMENTAL BIOLOGY:**

1. Frog – 4 cell, 8 cell and 32 celled stages, Blastula, Gastrula.
2. Chick-18, 24, 48hr Embryos.
3. T.S of Testis and Ovary.
4. Human Ovum and Sperm.
5. Placenta - Sheep, Human, Yolk Sac Placenta of Shark.

**ECONOMIC ZOOLOGY:**

1. Spotters / Charts of equipments of sericulture and apiculture- Chandraki, Rearing tray, Rearing stand, Honey extractor, Smoker, Modern Hive.
2. Egg, Honey, Lac, Silk, Pearl, Hide and Leather
3. Edible fish: Tilapia, Anabas, Shark, Catla.
4. Field Visit Report.

**SEMESTER VI- COREPRACTICAL IV**  
**UCZOM20 – ENVIRONMENTAL BIOLOGY, BIOTECHNOLOGY,**  
**MICROBIOLOGY AND IMMUNOLOGY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	UCZOM20	Core Practical IV	Practical	Core	3	5	100

**Objectives:**

- To obtain practical skills Ecology, Immunology and Biotechnology.
- To learn about adaptation of animals to their ecosystem.
- To understand the basic interpretations in medical field.

**Course Outcomes:**

**On completion of the course the student will be able to...**

- CO1: Demonstrate procedures in Ecology and immunology.  
 CO2: Identify the adaptation of animals in the ecosystem.  
 CO3: Apply the principle, working and application of instruments used biotechnology.  
 CO4: Discuss microbes and the disease caused by them.  
 CO5: Describe Lymphoid organs and immunoglobulins.

CO3	H	H	H	H	M	L
CO4	H	H	H	H	M	L
CO5	H	H	H	H	M	L

**ENVIRONMENTAL BIOLOGY:**

1. Instruments - Rain gauge, Max-Min thermometer, Hygrometer, Luxmeter, Anemometer, Aneroid barometer.
2. Estimations - Oxygen, Carbon-dioxide, Salinity, Carbonate and Bicarbonate and pH in different water samples
3. Study of museum specimen based on Benthic, Sandy shore, Rocky shore and Flying adaptations.
4. Planktons: Fresh water and Marine Planktons five each(**Spotters**)

**BIOTECHNOLOGY:**

1. Plasmids pBR322
2. PCR
3. DNA sequencing- Sanger Method
4. Blotting techniques-Southern, Northern and Western

**MICROBIOLOGY:**

1. *Mycobacterium tuberculosis*,
2. *Salmonella typhi*,
3. *Clostridium tetani*,
4. *Vibrio cholerae*,
5. *Haemophilus influenzae*.

**IMMUNOLOGY:**

1. Blood grouping and Rh typing - Antigen and Antibody Reaction
2. Ig A, Ig G
3. Organs of immune system:TS of – Spleen, Thymus and Bone marrow

## SKILL-BASED COURSE - I

### USZOA120/USZOA220 - PUBLIC HEALTH AND HYGIENE

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I & II	USZOA120/ USZOA220	Public Health And Hygiene	Theory	Skill Based Elective	2	2	100

**Objective:**

- To highlight the various dimensions of human health with reference to nutrition, environment and disease.
- To gain basic knowledge about health and hygiene

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Impart knowledge about health and diseases.

**CO2:** Acquire knowledge about nutrition and classification of food.

**CO3:** Analyze the interaction and impact of the environment on health.

**CO4:** Expand knowledge about communicable diseases and its prevention.

**CO5:** Improve the quality of life through prevention and treatment of non-communicable disease.

CO/PSO	PSO

CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

**Unit 1:**

**(6 Hours)**

1.1: Introduction. (K1, K2, K3)

1.2: Terms and definitions. (K1, K2, K3)

1.3: Scope of Public Health and Hygiene. (K1, K2, K3)

1.4: Concepts of Health and Disease. (K1, K2, K3)

1.5: Sources and function of macro nutrients. (K1, K2, K3)

1.6: Sources and function of micro nutrients. (K1, K2, K3)

**Unit 2:**

**(6 Hours)**

2.1: Nutrition and Health. (K1, K2, K3)

2.2: Classification of foods. (K1, K2, K3)

2.3: Carbohydrates, Proteins, fats. (K1, K2, K3)

- 2.4: Vitamins deficiency, food hygiene. (K1, K2, K3)
- 2.5: Balance diet. (K1, K2, K3)
- 2.6: Nutritional requirements of special groups. (K1, K2, K3, K4)

**Unit 3:**

**(6 Hours)**

- 3.1: Environment and Health. (K1, K2, K3)
- 3.1: Pollution effect on health- Water, Air. (K1, K2, K3)
- 3.3: Pollution effect on health- Noise. (K1, K2, K3)
- 3.4: Pollution effect on health - Land. (K1, K2, K3)
- 3.5: Climate change. (K1, K2, K3)
- 3.6: Pandemic diseases. (K1, K2, K3)

**Unit 4:**

**(6 Hours)**

- 4.1: Epidemiology of Communicable Diseases. (K1, K2, K3)
- 4.2: A brief account of respiratory infections. (K1, K2, K3)
- 4.3: Measles. (K1, K2, K3)
- 4.4: Intestinal infections- Amoebiasis. (K1, K2, K3)
- 4.5: Arthropod borne diseases- Malaria. (K1, K2, K3)
- 4.6: STD and AIDS. (K1, K2, K3)

**Unit 5:**

**(6 Hours)**

- 5.1: Non – Communicable Diseases and Conditions. (K1, K2, K3)
- 5.2: Diabetes mellitus. (K1, K2, K3)
- 5.3: Obesity. (K1, K2, K3)
- 5.4: Mental health: Causes of mental ill-health. (K1, K2, K3)
- 5.5: Stress and strain. (K1, K2, K3)
- 5.6: Eating disorders. (K1, K2, K3)

**Books for Study and Reference:**

**Textbooks:**

1. Park J.E. and Park K. - A Textbook of Preventive and Social Medicine - M/S. Banarsidas Bhanot Publishers, Jabalpur, 1986.
2. Verma S. - Medical Zoology - Rastogi Publications, New Delhi, 1998.

**USZOC320– SERICULTURE**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	USZOC320	Sericulture	Theory	Skill Based Elective	2	2	100

**Objectives:**

- To help the non-science students to understand the life cycle and culture technique of silkworm
- To motivate the students for self-employment

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Enlist different variety of silkworms and their economic status

**CO2:** Explain about mulberry cultivation

**CO3:** Expand knowledge on utilizing silkworm rearing appliances.

**CO4:** Elucidate an indulgent of silkworm mounting, silkworm rearing, and silkworm reeling operations.

**CO5:** Indicate and identify diseases in silkworms and recognize their enemies to take necessary control measures.

CO5	H	H	H	M	M	H

**Unit 1:**

**(6 Hours)**

1.1: Scope of sericulture in India and in global market. (K1, K2, K3)

1.2: Economics; Central Silk Board (CSB). (K1, K2, K3)

1.3: Training Facilities in Sericulture. (K1, K2, K3)

1.4: Types of silk worm Mulberry, Tasar, Eri, Muga. (K1, K2, K3)

1.5: Life cycle of *Bombyx mori*. (K1, K2, K3)

1.6: Silk. (K1, K2, K3)

**Unit 2:**

**(6 Hours)**

2.1: Varieties of Mulberry. (K1, K2, K3)

- 2.2: Mulberry Cultivation. (K1, K2, K3)
- 2.3: Propagation, Plantation. (K1, K2, K3)
- 2.4: Manuring, Pruning. (K1, K2, K3)
- 2.5: Harvesting, Storing. (K1, K2, K3)
- 2.6: Transporting. (K1, K2, K3)

**Unit 3:**

**(6 Hours)**

- 3.1: Silkworm Rearing-Rearing House. (K1, K2, K3, K4)
- 3.2: Appliances used for Rearing, Feeding. (K1, K2, K3, K4)
- 3.3: Cleaning and Spinning. (K1, K2, K3)
- 3.4: Factors for rearing. (K1, K2, K3, K4)
- 3.5: Temperature. (K1, K2, K3)
- 3.6: Humidity. (K1, K2, K3)

**Unit 4:**

**(6 Hours)**

- 4.1: Rearing operations – Disinfection. (K1, K2, K3)
- 4.2: Brushing, Feeding. (K1, K2, K3)
- 4.3: Bed Cleaning, Spacing. (K1, K2, K3)
- 4.4: Care during Moulting, Mounting. (K1, K2, K3)
- 4.5: Harvesting of cocoons. (K1, K2, K3)
- 4.6: Storing. (K1, K2, K3)

**Unit 5:**

**(6 Hours)**

- 5.1: Silkworm Diseases and Control- Pebrine. (K1, K2, K3, K4)
- 5.2: Flacherie. (K1, K2, K3, K4)
- 5.3: Muscardine, Grasserie. (K1, K2, K3, K4).
- 5.4: Natural Enemies. (K1, K2, K3)
- 5.5: Cocoon Marketing. (K1, K2, K3)
- 5.6: Loans to start sericulture. (K1, K2, K3)

USZOD420-POULTRY KEEPING**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	USZOD420	Poultry Keeping	Theory	Skill based Elective	2	2	100

**Objectives:**

- To learn the types of breeds and housing methods for successful poultry keeping.
- To guide and motivate self-employment.

**Course Outcomes:**

On completion of the course the student will be able to...

**CO1:** Acquire Knowledge on different types of breeds of Fowls

**CO2:** Describe the essentials and maintenance of a good house

**CO3:** Compare the different types of rearing methods

**CO4:** Discuss the feeding requirements and its management

**CO5:** Explain the nutritive value and products of poultry. Identify Poultry diseases and vaccination Schedule.

**Unit 1:**

**(6 Hours)**

1.1: Introduction to Poultry Keeping- Importance. (K1, K2, K3)

1.2: Breeds of fowls- Desi Breeds. (K1, K2, K3)

1.3: Exotic Breeds- American Class. (K1, K2, K3)

1.4: Asiatic Class. (K1, K2, K3)

1.5: English Class. (K1, K2, K3)

1.6: Mediterranean Class. (K1, K2, K3)

**Unit 2:**

**(6 Hours)**

2.1: Essentials of a good house. (K1, K2, K3)

2.2: Maintenance-Summer and Winter. (K1, K2, K3)

- 2.3: Management of Free –Range System, Semi-Intensive System. (K1, K2, K3, K4)
- 2.4: Intensive System- Deep Litter System. (K1, K2, K3, K4)
- 2.5: Battery System, Folding Unit System. (K1, K2, K3, K4)
- 2.6: Equipments- Types of Feeder and Water troughs. (K1, K2, K3)

**Unit 3:**

**(6 Hours)**

- 3.1: Reproduction in Fowl- Male and Female Reproductive system. (K1, K2, K3)
- 3.2: How is egg formed? Types of Abnormal Eggs, Grading of Egg. (K1, K2, K3)
- 3.3: Breeding in Fowls- Cross Breeding- Selection of Best Layer. (K1, K2, K3)
- 3.4: Selection of Eggs, Fertility and quality of eggs. (K1, K2, K3)
- 3.5: Hatchery Equipment- Incubator, Egg tray, Tray Cart and Racks, Egg Candler, Chick boxes. (K1, K2, K3)
- 3.6: Natural and Artificial methods of Incubation and Hatching. (K1, K2, K3)

**Unit 4:**

**(6 Hours)**

- 4.1: Poultry Feeding –Food Ration. (K1, K2, K3)
- 4.2: Poultry feed ingredient – Energy rich feed stuffs, Protein-rich feed stuffs, Mineral and Vitamin Sources, Feed additives. (K1, K2, K3)
- 4.3: Nutrient requirement of Poultry, Feed formulation for different age groups.(K1, K2, K3, K4)
- 4.4: Feeding systems of Poultry, Feeding Management. (K1, K2, K3, K4)
- 4.5: Nutritive value of Egg, Preservation of Egg, Products of Egg- Albumen flakes, Frozen Yolk, Egg Powder. (K1, K2, K3, K4)
- 4.6: By products of Poultry, Processing of Meat. (K1, K2, K3)

**Unit 5: (6 hrs)**

- 5.1: Care and Management of Poultry- Layer, Grower, Broiler, Pullet. (K1, K2, K3)
- 5.2: Symptoms, Transmission, Treatment and Control of Ranikhet, Fowl Pox, Coryza, Coccidiosis, Polyneuritis. (K1, K2, K3, K4)
- 5.3: Egg Drop Syndrome, Avian Influenza, Fowl Cholera. (K1, K2, K3)
- 5.4: Chronic Respiratory Disease. (K1, K2, K3)
- 5.5: Endoparasitic and Ectoparasitic diseases. (K1, K2, K3)
- 5.5: Vaccination Schedule. (K1, K2, K3)

**SKILL-BASED ELECTIVE**  
**USZOE520 -ORNAMENTAL FISH KEEPING**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	V	USZOE520	Ornamental Fish Keeping	Theory	Core Elective	2	2	100

**Objectives:**

- To learn about the rearing techniques in fish keeping
- To motivate for self-employment

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Discuss the importance, design and maintenance of an aquarium.

**CO2:** Explain the aquarium plants and usage of various accessories required for an aquarium.

**CO3:** Discuss the feed requirement, formulation and various live bearing fishes.

**CO4:** Differentiate the Egg laying fishes, marine fishes and other organisms in an aquarium.

**CO5:** Attain understanding on loan availability and export potential.

CO5	H	H	H	M	M	H

**Unit 1:**

**(6 Hours)**

1.1: Construction of home aquarium: Materials used- wooden and metal frames. (K1, K2, K3)

1.2: Frameless tanks- Sealants and gums. (K1, K2, K3)

1.3: Design and construction of aquarium tank. (K1, K2, K3)

1.4: Accessories used in aquarium tanks- aerators, filters. (K1, K2, K3)

1.5: Heaters, thermostat, hand nets. (K1, K2, K3)

1.6: Gravel/pebble - objects. (K1, K2, K3)

**Unit 2:**

**(6 Hours)**

2.1: Aquarium plants. (K1, K2, K3)

2.2: Nutritional requirements. (K1, K2, K3)

2.3: Kinds of feed - live feeds - artificial feed. (K1, K2, K3)

- 2.4: Feed formulation - balanced diet. (K1, K2, K3, K4)  
2.5: Culture of live food organisms - Chironomous, mosquito larva, tubifex. (K1, K2, K3)  
2.6: Problems of over feeding. (K1, K2, K3)

**Unit 3:** (6 Hours)

- 3.1: Popular ornamental fish - live bearers - Red sword tail. (K1, K2, K3)  
3.2: Guppy, Molly. (K1, K2, K3)  
3.3: Egg layers - Gold fish, Siamese fighting fish, Gowrami. (K1, K2, K3)  
3.4: Angel fish, Oscar. (K1, K2, K3)  
3.5: Neon tetra, Discus. (K1, K2, K3)  
3.6: Fish handling. (K1, K2, K3)

**Unit 4:** (6 Hours)

- 4.1: Aquarium maintenance - water quality-pH. (K1, K2, K3, K4)  
4.2: O<sub>2</sub>, CO<sub>2</sub>, hardness. (K1, K2, K3)  
4.3: Ammonia, Nitrite and Nitrate. (K1, K2, K3)  
4.4: Common diseases - diagnosis – treatment. (K1, K2, K3)  
4.5: Common marine fish - Anemone fish, Butterfly fish. (K1, K2, K3)  
4.6: Other marine organism. (K1, K2, K3)

**Unit 5:** (6 Hours)

- 5.1: Budget for commercial scale. (K1, K2, K3)  
5.2: Loan availability. (K1, K2, K3)  
5.3: Credit policies. (K(K1, K2, K3)1, K2, K3)  
5.4: Export potentials. (K1, K2, K3)  
5.5: Value addition in ornamental fish culture. (K1, K2, K3)  
5.6: Transportation. (K1, K2, K3)

**SEMESTER VI**  
**SKILLBASED ELECTIVE**  
**USZOF620 - ANIMAL BEHAVIOUR**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
III	VI	USZOF620	Animal Behaviour	Theory	Core Elective	2	2	100

**Objective:**

- To learn the basics in behaviour of animal
- To help in designing the research work based on the behaviour of animals

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Familiarize with various techniques to study the animal behaviour in lab and in Wild.

**CO2:** Analyze the various modes of communication, locomotion foraging and Caching.

**CO3:** Comprehend the process of learning, memory, hormonal and neural systems.

**CO4:** Compute the social organization and to differentiate behaviour.

**CO5:** Study the adverse effects and cure for abnormal behaviour among the Wild domestic and pet animals.

CO5	H	H	M	H	H	M

**Unit 1:**

**(6 Hours)**

1.1: Introduction to Behavior. (K1, K2, K3)

1.2: Branches of Ethology. (K1, K2, K3)

1.3: Types of studying behavior- In Lab and In Wild- Ad libitum. (K1, K2, K3, K4)

1.4: Focal animal, Scan. (K1, K2, K3)

1.5: All occurrence, Sequence one Zero. (K1, K2, K3)

1.6: Constructing Ethogram, interpreting and presenting data. (K1, K2, K3, K4)

**Unit II:**

**(6 Hours)**

2.1: Rhythm. (K1, K2, K3)

2.2: Sleep. (K1, K2, K3)

2.3: Methods and models of Communication. (K1, K2, K3)

2.4: Locomotion. (K1, K2, K3)

2.5: Foraging and Catching. (K1, K2, K3)

2.6: Nest construction. (K1, K2, K3)

**Unit III:**

**(6 Hours)**

3.1: Homing, Migration. (K1, K2, K3)

3.2: Territorialism, Courtships. (K1, K2, K3)

3.3: Parental care. (K1, K2, K3)

3.4: Play. (K1, K2, K3)

3.5: Learning. (K1, K2, K3)

3.6: Memory. (K1, K2, K3)

**Unit IV:**

**(6 Hours)**

4.1: Innate behavior – Neural and Hormonal control of behavior. (K1, K2, K3)

4.2: Social behavior – aggregation. Schooling in fish. (K1, K2, K3)

4.3: Flocking in birds. (K1, K2, K3)

4.4: Herding in mammals. (K1, K2, K3)

4.5: Social organization in insects. (K1, K2, K3)

4.6: Advantages of being social. (K1, K2, K3)

**Unit V:**

**(6 Hours)**

5.1: Abnormal behavior. (K1, K2, K3)

5.2: Wild animals under natural conditions and in Zoo. (K1, K2, K3)

5.3: Domestic livestock. (K1, K2, K3)

5.4: Pets- causes of abnormal behavior. (K1, K2, K3)

5.5: Prevention of abnormal behaviour. (K1, K2, K3)

5.6: Curing of Abnormal behavior. (K1, K2, K3)

## **PROGRAM OUTCOME (PO)**

### **Undergraduate Programme (UG)**

On completion of the UG Programme, students will be able to:

**PO1:** Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:** Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:** Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:** Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:** Emulate positive social values and exercise leadership qualities and team work.

**PO6:** Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

### **PROGRAM SPECIFIC OUTCOMES (PSO)**

**PSO1:** To understand and apply the knowledge of Accounting & finance in the domain of Commerce, Banking and Insurance.

**PSO2:** Identify, analyse and synthesize problems related to the field of Banking and Insurance.

**PSO3:** To encourage teamwork and skills for effective Collaboration towards the changing needs of the environment.

**PSO4:** Engaging in Lifelong Learning, apply ethical principles and excel as a socially committed individual having empathy for the needs of the society.

**PSO5:** Enhance Eco-consciousness for sustainable development of the society through application of green Banking and Insurance services.

**PSO6:** Acquire competence to efficiently handle technology and communicate in the field of Banking and Insurance Sector through internship and project.

**MAPPING OF PROGRAMME SPECIFIC OUTCOME WITH PROGRAMME

## **PATTERN OF QUESTION PAPER**

### **CONTINUOUS ASSESSMENT EXAMINATIONS: (50 Marks)**

**Time : 2 Hours**

**Section A – 7 x 2 = 14 marks**

Answer **all** questions

7 questions

**Section B – 3 x 7 = 21 marks**

Answer **any three** questions

3 out of 5 questions

**Section C– 1 x 15 = 15 marks**

Answer **any one** question

2 Questions (1 question from each unit)

**SBE :**

**Section A – 10 x 1 = 10 marks**

Answer **all** questions

**Section B - 2 x 5 = 10 marks**

Either or questions – Answer all

**Section C – 1 x 10 = 10 marks**

Answer **any one** question

2 Questions (1 question from each unit)

### **SEMESTER EXAMINATION (100 MARKS)**

**Time: 3 Hours**

**Section A – 10 x 2 = 20 marks**

Answer **all** questions

10 questions (2 questions from each unit)

**Section B – 5 x 7 = 35 marks**

Answer **all** questions

5 questions with internal choice (1 question from each unit)

**Section C – 3 x 15 = 45 marks**

Answer **any three** questions

5 questions (1 question from each unit)

**SBE**

**Section A – 10 x 2 = 20 marks**

Answer **all** questions

10 questions (2 questions from each unit)

**Section B – 4 x 5 = 20 marks**

Answer **4 out of 6** questions

**Section C – 2 x 10 = 20 marks**

Answer **any two out of three** question

## SEMESTER – I

### UCBIA20 - FUNDAMENTALS OF BANKING

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
SEM: I	UCBIA20	Fundamentals of Banking	Theory	Core	5	4	40+60

#### Course Objectives

- a. To Provide in-depth knowledge about the evolution of banks, banking structure in India and its function.

## **Course Syllabus**

### **Unit I: Introduction of Research and Research Process (15 Hours)**

- 1.1 Definition of Research – Meaning (K1)
- 1.2 Objectives (K1, K2)
- 1.3 Types of Research (K1, K2)
- 1.4 Research Process (K1, K2, K3)
- 1.5 Qualities of a Researcher – Criteria of Good research (K1, K2)
- 1.6 Problems Encountered in research (K1, K2, K3)

### **Unit II: Research Design (15 Hours)**

- 2.1 Defining Research Problem (K1)
- 2.2 Research Design – Features of Good Research Design (K1, k2)
- 2.3 Types of Research Design – Factors Affecting Research Design (K1, k2)
- 2.4 Hypothesis – Meaning – Definition (K1, k2)
- 2.5 Need for Hypothesis – Formulation of Hypothesis – Types of Hypothesis (K1, k2)
- 2.6 Test of Hypothesis – Type I and Type II Error. (K1, k2, k3)

### **Unit III: Sampling (15 Hours)**

- 3.1 Sampling – meaning (K1)
- 3.2 Techniques (K1, K2)
- 3.3 Types (K1, K2, K3)
- 3.4 Steps (K1, K2, K3)
- 3.5 Merits (K1, K2)
- 1.6 Demerits. (K1, K2)

### **Unit IV: Primary and Secondary Data (15 Hours)**

- 4.1 Collection of Primary and Secondary Data (K1, K2)
- 4.2 Sources of Secondary Data (K1, K2, K3)
- 4.3 Interview Techniques - Survey and Interview Method (K1, K2)
- 4.4 Interview Techniques - Merits and Demerits (K1, K2)
- 4.5 Questionnaire – Pre-Requisites of Using Questionnaire (K1, K2)
- 4.6 Structure and Unstructured Questionnaire (K1, K2, K3)

### **Unit V: Report Writing and SPSS Application (15 Hours)**

- 5.1 Measurement and Scaling Techniques (K1, K2)
- 5.2 Analysis (K1, K2)
- 5.3 Interpretation (K1, K2)
- 5.4 Report Writing (K1, K2, k3)
- 5.5 Application of SPSS (K1, k2, K3, K4)
- 5.6 Advantages of SPSS (K1, k2)

## **COURSE SYLLABUS:**

### **Unit I: Introduction to Banking**

**(8 Hours)**

- 1.1 Origin of Banking – Banker (K1, K2)
- 1.2 Banking and Other Business (K1, K2)
- 1.3 Customer – The relationship between a Banker and Customer (K1, K2)
- 1.4 General relationship (K1, K2)
- 1.5 Statutory Obligation to Honor Cheques (K1, K2, K3)
- 1.6 Banker's Lien – Duty to maintain secrecy of Customer's Account (K1, K2, K3)

### **Unit II: Banking Structure**

**(8 Hours)**

- 2.1 Indigenous Bankers – Commercial Banks – Cooperative Banks – RRBs (K1, K2)
- 2.2 Foreign Banks – Development Banks (DB) (K1, K2, K3)
- 2.3 Industrial Development Bank of India (IDBI) (K1, K2, K3)
- 2.4 Industrial Finance Corporation of India (IFCI) – Industrial Reconstruction Bank of India (IRBI) (K1, K2)
- 2.5 National Bank for Agricultural and Rural Development (NABARD) – Export and Import Bank (EXIM) – National Housing Bank (NHB) (K1, K2)
- 2.6 Small Banking – Non- Banking Financial Company (NBFC) (K1, K2)

### **Unit III: Reserve Bank of India**

**(8 Hours)**

- 3.1 Introduction - Reserve Bank of India – Meaning (K1, K2)
- 3.2 Functions of RBI – Monetary functions (K1, K2)
- 3.3 Functions of RBI – Non - Monetary functions (K1, K2)
- 3.4 Introduction - Credit Control (K1, K2)
- 3.5 Methods of Credit Control – Quantitative or General Methods (K1, K2, K3)
- 3.6 Methods of Credit Control – Quantitative or General Methods (K1, K2, K3)

### **Unit IV: Introduction to Digital Banking**

**(8 Hours)**

- 4.1 Introduction to Digital Banking (K1, K2)
- 4.2 Brief History - Need for Digital Channels (K1, K2)
- 4.3 Customer preference for Digital Banking (K1, K2)
- 4.4 Types of Cards (K1, K2, K3)
- 4.5 Cards - Features – Benefits (K1, K2)
- 4.6 Magnetic Strip Card and Euro pay Master card Visa (EMV) Technology (K1, K2)

### **Unit V: Modes of Digital Payment**

**(8 Hours)**

- 5.1 Automatic Teller Machine (ATM) - History – Product Features – Instant Money Transfer (IMT) (K1, K2, K3)
- 5.2 Cash Deposit Machine (CDM) – Mobile Banking – Product Features (K1, K2, K3)
- 5.3 Immediate Payment System (IMPS) (K1, K2)
- 5.4 Online Banking – Product Features – Point-of-Sale (POS) – Features – Types (K1, K2, K3)
- 5.5 Aadhaar Enabled Payment System (AEPS) – Real Time Gross Settlement (RTGS) (K1, K2, K3, K4)
- 5.6 National Electronic Funds Transfer (NEFT) (K1, K2, K3, K4)

## **COURSE SYLLABUS:**

- Unit – I:** (6 Hours)
- 1.1 Set off and Carry forward of Losses (K1,K2,K3)
  - 1.2 Speculation Income (K1,K2,K3)
  - 1.3 Specific Business Income (K1,K2,K3)
  - 1.4 Horse Race Income (K1,K2,K3)
  - 1.5 Clubbing of Income (K1,K2,K3)
  - 1.6 Deemed Income (K1,K2,K3)
- Unit – II:** (6 Hours)
- 2.1 Gross Total Income (K1,K2,K3)
  - 2.2 Deductions form Gross Total Income (K1, K2,K3)
  - 2.3 Computation of Total Income (K1,K2,K3)
  - 2.4 Tax Deducted at Source (K1,K2,K3)
  - 2.5 Tax Collected at Source (K1,K2,K3)
  - 2.6 Computation of Tax Liability (K1,K2,K3)
- Unit – III** (6 Hours)
- 3.1 E-filing Practice: Introduction to E-filing (K1,K2,K3)
  - 3.2 E-filing different from the regular filling of returns (K1,K2,K3)
  - 3.3 Benefits – Limitation (K1,K2,K3)
  - 3.4 Types of E- Filing (K1,K2,K3)
  - 3.5 E-Filing process – IT Returns – Relevant Notification – E Filing security (K1,K2,K3)
  - 3.6 Introduction to GST – GSTIN - Procedure for Registration (K1, K2,K3)
- Unit – IV** (6 Hours)
- 4.1 Tax Return (K1,K2,K3)
  - 4.2 Tax Return Online (K1, K2, K3)
  - 4.3 Instructions for filling the Tax Return online (K1, K2, K3)
  - 4.4 ITR Tax -payer Guide Part I and Part II (K1, K2, K3)
  - 4.5 Instructions for Filing out ITR Forms (K1, K2, K3)
  - 4.6 Instructions for Filing out GST Forms (K1, K2, K3)
- Unit – V** (6 Hours)
- 5.1 XBRL Meaning (K1, K2)
  - 5.2 An introduction to Extensible business reporting language (XBRL) (K1, K2)
  - 5.3 E- filling procedure towards XBRL (K1, K2)
  - 5.4 E-Filing of ROC (K1, K2)
  - 5.5 Digital Signature (K1, K2, K3)
  - 5.6 Verification of Electronic Records. (K1, K2)

**Course Objectives**

- a. To enable students to acquire Competency in case of verbal
- b. To acquire knowledge in analytical skills
- c. To develop students to acquire Competency in case of non-verbal
- d. To make students aware of general knowledge related to Competitive exams.
- e. To provide Computer literacy related to the field

**Course Outcomes (CO)**

The Learners will be able to

- ☐ Demonstrate the knowledge in verbal reasoning.
- ☐ Demonstrates analytical skills in Mathematical operation
- ☐ Able to show skills in non -verbal reasoning
- ☐ Acquire updated knowledge in current affairs
- ☐ Demonstrate the knowledge of Computer technology.

## Course Syllabus

### Unit – I Verbal Reasoning – I (15 Hours)

- 1.1 Analogy Test (K1, K2, K3)
- 1.2 Coding – Decoding (K1, K2, K3)
- 1.3 Blood relations (K1, K2, K3)
- 1.4 Direction sense test (K1, K2, K3)
- 1.5 Sitting arrangement - Logical arrangement of words (K1, K2, K3)
- 1.6 Data Sufficiency - analytical reasoning statements, assumptions, arguments, and conclusion. (K1, K2, K3)

### Unit – II Verbal Reasoning – II (15 Hours)

- 2.1 Comparison of ranks – Logical based Venn diagrams (K1, K2, K3, K4)
- 2.2 Logical alphabet, number and time sequence test (K1, K2, K3, K4)
- 2.3 Letter series – Number series (K1, K2, K3, K4)
- 2.4 Mathematical operations (K1, K2, K3, K4)
- 2.5 Number Puzzles – Clock (K1, K2, K3, K4)
- 2.6 Calendar – Arithmetical Reasoning. (K1, K2, K3, K4)

### Unit – III Non -Verbal Reasoning (15 Hours)

- 3.1 Completion of series – Analogy (K1, K2, K3, K4)
- 3.2 Classification (K1, K2, K3, K4)
- 3.3 Counting of figures – Completion of figures (K1, K2, K3, K4)
- 3.4 Mirror image – Water Image (K1, K2, K3, K4)
- 3.5 Dot situation (or placement) (K1, K2, K3, K4)
- 3.6 English for competitive examination. (K1, K2, K3, K4)

### Unit – IV General Awareness (15 Hours)

- 4.1 History of India – Geography (K1, K2)
- 4.2 Economics – International Trade (K1, K2)
- 4.3 India's five years plans (K1, K2)
- 4.4 Banking – Indian Constitution – Culture (K1, K2)
- 4.5 Everyday Science- Sports – Books and Authors – Honors and Awards – Days and Commission (K1, K2)
- 4.6 Current Affairs (K1, K2)

### Unit – V Computer Knowledge (15 Hours)

- 5.1 Definition of computers – The Language of the Computer, Software – The History of Computers (K1, K2)
- 5.2 The development of computers – The characteristics of a computer – The different computing systems (K1, K2)
- 5.3 The need of computer literacy – Representing Information in computers (K1, K2)
- 5.4 Some Popular Operating systems (K1, K2)
- 5.5 Role of computers in Banking (K1, K2)
- 5.6 Important terms linked in Computer Technology (K1, K2)

**Textbooks:**

## SEMESTER I

### UCHAB20 – FOUNDATION IN HOSPITAL ADMINISTRATION

<b>Year : I Sem: I</b>	<b>Course Code:</b> UCHAB20	<b>Title of the Course:</b> Foundation in Hospital Administration	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objectives

1. To understand the overall healthcare systems.
2. To develop effective communication skills.
3. To develop essential analytical skills.
4. To develop effective computer skills.
5. To develop the personality skills of an individual.

#### COURSE OUTCOMES (CO)

1. Understand the functions of various healthcare systems and learn relevant medicalterminology.
2. Understand, recognize the importance of communication skills and develop iteffectively.
3. Understand and enhance analytical skills.
4. Understand, recognise the importance of computer skills and develop it.
5. Develop the personality skills of an individual.

CO	PO					
	1	2	3	4	5	6
CO1	H	M	M	L	L	M
CO2	H	M	M	L	L	M
CO3	H	H	M	L	L	M
CO4	H	M	M	L	L	M
CO5	H	M	M	L	L	M

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	M	L	L	L
CO2	L	M	L	L	L	M
CO3	M	H	H	L	M	L
CO4	L	M	L	M	L	L
CO5	L	L	M	M	L	L

(Low - L, Medium - M, High - H)

#### Syllabus

##### Unit I: Over view of health services

Medicine - Alternative Medicine (K1, K2)

Hospitals - Types of Hospitals (K1, K2, K3)

Types of Patient - Hospital Departments (K1, K2, K3)

Diseases, treatment and technology (K1, K2, K3)  
Medical Vocabulary (K1, K2, K3)  
Current Trends in Healthcare (K1, K2, K3)

#### **Unit II: Communication skills**

Communication - Compelling Communication (K1, K2, K3)  
Enhancing group activity – Interpersonal Listening (K1, K2, K3)  
Teamwork - Verbal Communication (K1, K2, K3)  
Written Communication (K1, K2, K3)  
Audio-visual Presentations (K1, K2, K3)  
Etiquette (K1, K2, K3)

#### **Unit III: Analytical Skills**

Creativity - Problem-solving (K1, K2, K3)  
Critical Thinking- Solve problems - Decision making (K1, K2, K3)  
Logical thinking - Understanding and analyzing issues and problems (K1, K2, K3)  
Diagramming Numerical techniques and analysis (K1, K2, K3)  
Study and research skills (K1, K2, K3)  
SWOT Analysis (K1, K2, K3)

#### **Unit IV: Computer skills**

Microsoft Office - Spreadsheets (K1, K2, K, K4)  
PowerPoint (K1, K2, K, K4)  
Access (K1, K2, K, K4)  
Excel (K1, K2, K, K4)  
Email Web and Social Skills (K1, K2, K, K4)  
Graphic and Writing Skills (K1, K2, K, K4)

#### **Unit V: Personality Development**

Time management (K1, K2, K, K4)  
Thinking Skills - Determination and Persistence (K1, K2, K, K4)  
Presentation Skills (K1, K2, K, K4)  
Developing Leadership Skills (K1, K2, K, K4)  
Interpersonal Skills (K1, K2, K, K4)  
Positive attitude – Integrity – Treat people with respect (K1, K2, K, K4)

#### **Text Books**

1. Asha Kaul, Effective Communication Methods, PHI Learning, 2000.
2. Peter Norton, Introduction to Computers, Tata McGraw-Hill, 6<sup>th</sup> Edition, 2008.

#### **Reference Books**

1. V.K.Mahajan, Health Education, 2002.
2. John Adair, Effective Communication (Revised Edition): The most important management skill of all (Most Important Management Tool of All) Paperback–Unabridged, 2009.
3. B.S. Sijwali and Indu Sijwali, A new approach to reasoning verbal & nonverbal,

2014.

**SEMESTER I**  
**UAMST20 – ALLIED I: MEDICAL STATISTICS**

<b>Year:</b> I	<b>Course Code:</b> UAMST20	<b>Title of the Course:</b> Medical Statistics	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-------------------	--------------------------------	---	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Objectives**

1. To introduce the basic concepts of statistics.
2. To make decisions based on statistical representation related to hospital administration.

**COURSE OUTCOMES (CO)**

1. Solve basic mathematical problems using matrices
2. Use various differentiation techniques
3. Give graphical representation of statistical data
4. Understand the concepts related to statistics
5. Analyze problems related to statistical measures

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	L	H
CO2	H	M	M	M	M	H
CO3	L	L	L	L	L	H
CO4	H	H	L	M	M	H
CO5	M	M	M	M	M	H

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	L
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	L
CO4	H	H	H	H	H	L
CO5	H	H	H	H	H	M

(Low - L, Medium - M, High - H)

**Syllabus**

**Unit I: Matrices**

- Definition - Types of matrices (K1, K2)
- Matrix operations - Determinant of a matrix (K1, K2, K3, K4)
- Singular and non-singular matrices (K1, K2, K3, K4)
- Inverse of a matrix by co-factor method (K1, K2, K3, K4)
- Rank of a matrix (K1, K2, K3, K4)

Solution of system of linear simultaneous equations using Cramer's rule (K1, K2, K3, K4)

### **Unit II: Differentiation**

Derivatives of standard functions  $x^n$ ,  $e^x$ ,  $\log x$ , constant (without proof) (K1, K2, K3)

Rules of differentiation (Addition, difference, product, quotient) (K1, K2, K3, K4)  
chain rule, Successive differentiation (up to 2<sup>nd</sup> derivative) (K1, K2, K3, K4)

Uses: Marginal Concepts, Elasticity of demand (K1, K2, K3, K4)

Increasing and decreasing functions (K1, K2, K3, K4)

maxima and minima – break-even point (K1, K2, K3, K4)

### **Unit III: Classification and Graphical Representation**

Introduction - meaning of classification - chief characteristics of classification (K1, K2)

Objects of classification - rules of classification (K1, K2)

Frequency distributions (K1, K2, K3, K4)

Cumulative frequency distribution - bivariate frequency distributions (K1, K2, K3, K4)

Graph of frequency distribution - histogram (K1, K2, K3, K4)

frequency polygon - frequency curve (K1, K2, K3, K4)

### **Unit IV: Measures of Central Tendency**

Arithmetic mean (K1, K2, K3, K4)

Median (K1, K2, K3, K4)

Mode – Empirical formulae (K1, K2, K3, K4)

Combined and Weighted arithmetic mean (K1, K2, K3, K4)

Geometric mean (K1, K2, K3, K4)

Harmonic mean (K1, K2, K3, K4)

### **Unit V: Measures of Dispersion and Skewness**

Range - quartile deviation (K1, K2, K3, K4)

Mean deviation (K1, K2, K3, K4)

Standard deviation (K1, K2, K3, K4)

Karl Pearson's and Bowley's coefficient of Skewness (K1, K2, K3, K4)

Correlation (K1, K2, K3, K4)

Regression (K1, K2, K3, K4)

### **Textbooks:**

1. P.A. Navnitham, Business Mathematics and Statistics, Jai Publishers, Trichy, 2007.
2. R.S.N. Pillai and Bagavathi, Statistics, S. Chand and Company, New Delhi, 17<sup>th</sup> Edition, 1984.

### **Reference Books:**

1. S.P. Gupta, Statistical Methods, Sultan Chand, 2012.
2. Levin and Rubin, Statistics for Management, Pearson Publication, 8<sup>th</sup> Edition, 2017.

## SEMESTER I

### USHAA120 - SKILL BASED ELECTIVE I: LIFE SKILLS

<b>Year:</b> I	<b>Course Code:</b> USHAA120	<b>Title of the Course:</b> Life Skills	<b>Course Type:</b> Theory	<b>Course Category:</b> : Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 60
-------------------	---------------------------------	--	-------------------------------	--	-----------------	---------------------	--------------------

#### Objectives

1. To understand the importance of Basic Life Support (BLS).
2. To understand the essentials of Chemical and Radiation Safety.
3. To understand the significance of Hand Hygiene.
4. To understand the aspects of Occupational Health.
5. To understand the mandates of Fire Safety and Disaster Management.

#### COURSE OUTCOMES (CO)

1. Understand and deliver Basic Life Support (BLS) in case of emergency.
2. Recognise the sources and effects of radiation and learn the principles of Radiation Protection and Safety.
3. Understand and demonstrate the various steps of hand hygiene.
4. Comprehend several occupational health hazards and its preventive measures.
5. Acquire knowledge on the Fire Safety and Disaster Management and practical exposure to handle fire extinguishers.

CO	PO					
	1	2	3	4	5	6
CO1	H	H	M	L	L	M
CO2	H	L	M	L	L	M
CO3	H	L	M	L	L	M
CO4	H	L	M	L	L	M
CO5	H	L	M	L	L	M

CO	PSO					
	1	2	3	4	5	6
CO1	L	L	L	L	M	L
CO2	L	L	L	L	L	L
CO3	L	L	L	L	L	L
CO4	L	L	L	L	M	L
CO5	L	L	L	L	M	L

(Low - L, Medium - M, High - H)

## **Syllabus**

### **Unit I: Basic Life Support (BLS) and Chemical Safety**

- Immediate Life Support (ILS) (K1, K2, K3, K4)
- Sequence of Actions (K1, K2, K3, K4)
- Procedure (K1, K2, K3, K4)
- Choking (K1, K2, K3, K4)
- Chemical Safety (K1, K2, K3, K4)
- Physical, health and Environment Hazards (K1, K2, K3, K4)

### **Unit II: Radiation Safety**

- Safety Data Sheet (K1, K2, K3, K4)
- Personal Protective Equipment (K1, K2, K3, K4)
- Radiation Safety (K1, K2, K3, K4)
- Radiation and Radioactivity (K1, K2, K3, K4)
- Biological Effects – ALARA (K1, K2, K3, K4)
- General Radiation safety (K1, K2, K3, K4)

### **Unit III: Hand Hygiene**

- Hand hygiene techniques (K1, K2, K3, K4)
- Stages of effective hand hygiene (K1, K2, K3, K4)
- General rules of hand hygiene at work (K1, K2, K3, and K4)

### **Unit IV: Occupational Health**

- Introduction to OSHA (K1, K2, K3, K4)
- OSHA standards (K1, K2, K3, K4)
- Safe and Healthful workplace (K1, K2, K3, K4)
- Employer Responsibilities (K1, K2, K3, K4)

### **Unit V: Fire Safety and Disaster Management**

- Fire- Classes of fire (K1, K2, K3, K4)
- Types of Fire extinguisher - Dos and Don'ts during fire (K1, K2, K3, and K4)
- Disaster Management Preparedness – Response – Recovery – Mitigation (K1, K2, K3, K4)
- Types of disaster – Natural and Manmade disaster (K1, K2, K3, K4)
- Characteristics and phases of disaster (K1, K2, K3, K4)
- Disaster impact (K1, K2, K3, K4)

## **Text Books**

1. K.V.Ramani, Hospital Management: Text and Cases, 1<sup>st</sup> edition, Pearson EducationIndia, 2013.
2. D.C.Joshi, Mamta Joshi, Hospital Administration, Jaypee Brothers Medical Publishers, 2009.

**Reference Books**

1. National Disaster Management Guidelines, Hospital Safety: A publication of National Disaster Management, Authority Government of India, NDMA February, 2016.
2. OSHA Field Safety and Health Manual, Occupational Safety and Health Administration, (OSHA).
3. Patient safety assessment manual, WHO, 2<sup>nd</sup> Edition, 2016.

**SEMESTER II**  
**UCHAC20 – HEALTH CARE ETHICS**

<b>Year:</b> I	<b>Course Code:</b> UCHAC20	<b>Title of the Course:</b> Healthcare Ethics	<b>Course Type:</b> Theory	<b>Course Category:</b> : Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem:</b> II							

**Objectives**

1. To understand and recognize the roles, aspects and importance of business ethics.
2. To understand and distinguish the various aspects of social responsibilities of business.
3. To understand and recognize the fundamental aspects and legal implications of medical ethics.
4. To understand, recognize and interrelate various ethical issues within the healthcare context.
5. To develop and implement effective ethical systems in business and clinical areas of the hospital.

**COURSE OUTCOMES (CO)**

1. Understand and recognize the role of ethics in business.
2. Understand and recognize the social responsibilities of business entities towards staff, stakeholders and community.
3. Understand and interrelate fundamental aspects of medical ethics.
4. Recognize and infer various aspects of healthcare and research which may infringe on patient rights.
5. Distinguish various aspects of end and beginning of life ethical issues and ensure ethical compliance.

CO	PO					
	1	2	3	4	5	6
CO1	H	H	M	M	M	H
CO2	H	H	M	M	H	H
CO3	H	H	M	M	H	H
CO4	H	H	M	M	H	H
CO5	H	H	M	M	H	H

CO	PSO					
	1	2	3	4	5	6
CO1	M	L	L	M	M	H
CO2	M	L	L	H	M	H
CO3	H	M	L	M	M	H
CO4	H	M	L	L	M	H
CO5	H	H	M	L	L	H

(Low - L, Medium - M, High - H)

## **Syllabus**

### **Unit I: Corporate Ethics**

Role and importance of Business Ethics and Values in Business (K1, K2, K3)  
Definition of Business Ethics Impact on Business Policy (K1, K2, K3)  
Business Strategy and its impact (K1, K2, K3)  
Types of Ethical Issues – Bribes – Coercion – Deception – Theft – Unfair  
Discrimination (K1, K2, K3)  
Professional ethics (K1, K2, K3)  
Ethics in India (K1, K2, K3)

### **Unit II: Corporate Social Responsibility and Distributive Justice**

Corporate Social Responsibilities - Purpose (K1, K2, K3)  
Social Responsibilities towards Shareholders (K1, K2, K3)  
Employees – Customers, Dealers, Vendors and Government (K1, K2, K3)  
Examples of CSR in India (K1, K2, K3)  
Social Audit Principles (K1, K2, K3)  
Distributive Justice (K1, K2, K3)

### **Unit III: Codes of Conduct**

Principles of Medical Ethics (K1, K2, K3)  
International Code of Ethics (K1, K2, K3)  
Duties of a Doctor Patient –Paramedical (K1, K2, K3)  
Health Resources (K1, K2, K3)  
Malpractice and Negligence (K1, K2, K3)  
Medical Negligence (K1, K2, K3)

### **Unit IV: Professional and Personal**

Confidentiality: (Professional Secrecy) (K1, K2, K3)  
Rights of Patients (K1, K2, K3)  
Consent Informed Consent (K1, K2, K3)  
Privileged Communication (K1, K2, K3)  
Irrational Drug Therapy Human Experimentation (K1, K2, K3)  
Clinical Trials (K1, K2, K3)

### **Unit V: Emerging Issues**

Sex Pre-selection and Female Feticide (K1, K2, K3)  
Reproductive Medicine Ethical Issues in Transplantation (K1, K2, K3)  
Assisted Reproductive Technologies (K1, K2, K3)  
Surrogacy (K1, K2, K3)  
Abortion Euthanasia (K1, K2, K3)  
Organ Donation (K1, K2, K3)

### **Textbooks**

1. CM Francis, Medical Ethics, Jaypee, 2<sup>nd</sup> edition, 2007.

2. Shaw William, Business Ethics, Cenage Publishers, 2016.

**Reference Book**

1. Sankaran S, Business Ethics, Margham Publications, 2005.

2. Erich E.H. Loewy, Roberta Springer Loewy, Textbook of Healthcare Ethics, Springer, 2<sup>nd</sup> Edition, 2005.

3. Morrison, Elizabeth Furlong, Healthcare Ethics Critical Issues for the 21<sup>st</sup> century, 4<sup>th</sup> Edition, 2014.

**SEMESTER II**  
**UCHAD20 - MEDICAL TERMINOLOGY FOR ADMINISTRATION**

<b>Year:</b> I <b>Sem:</b> II	<b>Course Code:</b> UCHAD20	<b>Title of the Course:</b> Medical Terminology for Administration	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objectives**

1. To understand and recognize the whole organization of the body.
2. To understand and distinguish the various Muscular-Skeletal system.
3. To understand and distinguish the various Digestive system.
4. To understand and read standard medical abbreviations.
5. To understand and implement right usage of medical terms.

**COURSE OUTCOMES (CO)**

1. Understand and recognize the fundamentals of Anatomy and Physiology.
2. Comprehend various Musculoskeletal System of a human body.
3. Recognize and understand cardiovascular system, respiratory system, digestivesystem and excretory system.
4. Develop ability to read and understand medical documentation and medicalliterature.
5. Recognize and learn the meanings of Standard Medical Abbreviations.

CO	PO					
	1	2	3	4	5	6
CO1	H	L	H	L	L	M
CO2	H	L	H	L	L	M
CO3	H	L	H	L	L	M
CO4	H	L	H	L	L	M
CO5	H	L	H	L	L	M

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	L	L	L	L
CO2	M	H	L	L	L	L
CO3	M	H	L	L	L	L
CO4	H	H	L	L	M	M
CO5	M	H	L	L	L	L

(Low - L, Medium - M, High - H)

**Syllabus**

**Unit I: Anatomy and Physiology**

Definition of the terms Anatomy (K1, K2)

Definition of the terms Physiology (K1, K2)

Types of Anatomy Definition of terms used to describe the parts of the body (K1, K2)

Definition of various regions of the body (K1, K2)

The body as a whole organization of the body: Cells, tissues, organs (K1, K2)

Membranes and glands. (K1, K2)

## **Unit II: Anatomic and Physiological Description**

Musculoskeletal System Bone types, structure, functions Joints, structure and functions Ligaments, and tendons Muscles, types, structure and functions of muscles – Related Diseases, types of fractures. (K1, K2, K3)

Nervous System functions of neurons – Central, Peripheral nervous and Autonomous nerves systems Related Diseases (K1, K2, and K3)

Cardiovascular System Heart position, structure, conduction system, functions and cardiac cycle Blood vessels, Circulation of blood; Systemic, pulmonary and portal Blood pressure and pulse – Related Diseases (K1, K2, K3)

Lymphatic system Lymph vessels, glands, ducts and lymph circulation Lymph nodes in the body, spleen – Related Diseases (K1, K2, K3)

Respiratory System Structure and function of respiratory organs Physiology of respiration –Related Diseases. (K1, K2, K3)

Sensory organs: Structure and function of the Eye [vision], the Ear [hearing],and Taste [tongue]. (K1, K2, K3)

## **Unit III: Anatomic and Physiological Description**

Digestive System Structure and functions of organs of digestion and accessory organs Process of digestion and absorption – Related Diseases (K1, K2, K3)

Excretory Systems Structure and function of the organs of the Urinary system Structure and functions of Skin [Integumentary System] Regulation of body temperature – Related Diseases (K1, K2, K3)

Endocrine System Structure and functions of endocrine glands (Pituitary Pancreas, thyroid, parathyroid, thymus, adrenal) – Related Diseases (K1, K2, K3)

Sense Organs Structure and functions of Eye, Ear, Nose and tongue Physiology of vision, hearing and equilibrium – Related Diseases (K1, K2, K3)

Genito Urinary System Female reproductive system: Structure and functions of female reproductive organs [Uterus, fallopian tube, and ovary] menstrual cycle, menopause and process of reproduction Male reproductive system: Structure and functions of organs Diseases related to reproductive system, antenatal, maternal and neonatal conditions (K1, K2, and K3)

Psychiatry conditions – Anxiety, depression, mental retardation, personality disorder, psychosis, psycho physiologic disorder (K1, K2, K3)

## **Unit IV: Basic Medical Terminology**

Basic concepts (K1, K2)

Definition of medical terminology (K1, K2)

Purpose of learning Medical Terminology (K1, K2)  
Origin of Medical Terms (K1, K2)  
Derivations from other languages, living creatures, colors, weapons (K1, K2)  
Phobias (K1, K2)

#### **Unit V: Components of Medical Terms**

Roots Prefixes Suffixes (K1, K2)  
Systems wise Symptomatic (K1, K2)  
Diagnostic Terms related to whole body (K1, K2)  
Operative Terms related to whole body (K1, K2)  
Analysis of medical terms (K1, K2)  
Standard Medical Abbreviations (K1, K2)

#### **Text Books**

1. Mr. Immanuel Ratinaraj Asher – Introduction to Medical Terminology.
2. Mr. Immanuel Ratinaraj Asher – Handbook of Medical Record Policies and procedures – for Medical Record professionals.

#### **Reference Books**

1. Barbara J. Cohen and Ann De Petris, An Illustrated Guide: Medical Terminology, 1 February 2016.
2. Medical Review – Medical Abbreviations For Medical Students And Healthcare Professionals Kindle Edition, 2014.
3. Dorland – Dorland's Pocket Medical Dictionary, 29<sup>th</sup> Edition, 2013.

## SEMESTER – II

### UAORA20 - ALLIED II: OPERATIONS RESEARCH

<b>Year:</b> I	<b>Course Code:</b> UAORA20	<b>Title of the Course:</b> Operations Research	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> II							

#### Objectives

1. To introduce the techniques of solving problems in the field of industry, marketing and finance
2. To create awareness about optimization in the utility of resources

#### COURSE OUTCOMES (CO)

The learners will be able to

1. Understand the basic operations research concepts and solve linear programming problems.
2. Analyze real-life situation using transportation models.
3. Assign jobs to different machines using assignment models.
4. Use knowledge of Network Analysis in Hospital Administration.
5. Acquire wide knowledge in Game Theory.

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	L	H
CO2	H	M	M	M	M	H
CO3	L	L	L	L	L	H
CO4	H	H	L	M	M	H
CO5	M	M	M	M	M	H

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	L
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	L
CO4	H	H	H	H	H	L
CO5	H	H	H	H	H	M

(Low- L, Medium - M, High - H)

#### Unit I: Introduction and Linear Programming

Operations research: Definition – Scope (K1, K2)

Characteristics (K1, K2)

Linear programming (K1,K2)  
Formulation (K1,K2, K3)  
Graphical method (K1, K2, K3, K4)  
Regular simplex method (Simple Problems) (K1, K2, K3, K4)

### **Unit II: Transportation Model**

Transportation Problem – Introduction (K1, K2)  
Initial basic feasible solution (North West Corner) (K1, K2, K3, K4)  
Initial basic feasible solution (Least Cost VAM) (K1, K2, K3, K4)  
Unbalanced Transportation problem (K1, K2, K3, K4)  
Maximization problem (K1, K2, K3, K4)  
Test of Optimality using MODI method (excluding Degeneracy) (K1, K2, K3, K4)

### **Unit III: Assignment Model**

Assignment problem – Introduction (K1, K2)  
Minimal assignment problem - Balanced (K1, K2, K3, K4)  
Minimal assignment problem - Unbalanced (K1, K2, K3, K4)  
Restricted Assignment problem (K1, K2, K3, K4)  
Maximization problem – Balanced (K1, K2, K3, K4)  
Maximization problem – Unbalanced (K1, K2, K3, K4)

### **Unit IV: Network Analysis: CPM and PERT Computations**

Construction – The Network – Numbering the events (K1, K2)  
Different time calculations – representation in tabular form (K1, K2, K3, K4)  
Total, Independent and Free float (K1, K2, K3, K4)  
Calculation of critical path and project duration (K1, K2, K3, K4)  
Basic steps in PERT – Difference between CPM and PERT (K1, K2, K3, K4)  
Calculation of critical path and project duration (K1, K2, K3, K4)

### **Unit V: Game Theory**

Game theory – Meaning – Saddle point (K1, K2)  
Pure Strategy (K1, K2, K3, K4)  
Mixed Strategy (K1, K2, K3, K4)  
Dominance property (K1, K2, K3, K4)  
Solving 2 x m game using graphical method (excluding L.P.P) (K1, K2, K3, K4)  
Solving n x 2 game using graphical method (excluding L.P.P) (K1, K2, K3, K4)

### **Textbooks:**

1. Premkumar Gupta and Hira D.S. - Introduction to Operations Research, 1<sup>st</sup> Edition – S.Chand Company Ltd., 1998.
2. Vittal P.R - Introduction to Operations Research, 1<sup>st</sup> Edition - Margham Publishers – 1999.
3. V. Sundaresan, K.S. Ganapathy Subramanian and K. Ganesan - Resource Management Techniques - A.R. Publications, 2009.

### **Reference Books:**

1. Kalavathy. S - Operations Research, 2<sup>nd</sup> Edition - Vikas Publishing Ltd., 2002.
2. K. Pandian, C.Kayalvizhi - Applied Operations Research for Management, 2<sup>nd</sup> Edition -Thirumalaa Publications, 2004.
3. R.Paneerselvam - Operation Research -PHI Learning Pvt. Ltd., 2<sup>nd</sup> Edition 2006.

**SEMESTER II**  
**USHAB220 – SKILL BASED ELECTIVE II: PRACTICAL:**  
**COMMUNICATION SKILLS IN ENGLISH**

<b>Year:</b> I <b>Sem:</b> II	<b>Course Code:</b> USHAB220	<b>Title of the Course:</b> Communication Skills in English	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 60
--	---------------------------------	--	----------------------------------	---	-----------------	---------------------	--------------------

**Objectives**

1. To gain knowledge about the concepts of communication.
2. To communicate effectively by drafting letters for business and banking correspondence.
3. To develop English language skills in listening, speaking, reading and writing by having learners engage in a range of communicative tasks and activities.
4. To increase vocabulary through the study of word parts, use of context clues and Practice with a dictionary.
5. To develop public speaking abilities by giving opportunities to speak in class, both informally and formally.

**COURSE OUTCOMES (CO)**

1. Understand the elements, types, process and barriers in communication.
2. Develop the skill of communicating through drafting various types of letters for business and banking correspondence.
3. Improve the vocabulary for daily usage.
4. Be able to write discharge summary and consent form related to hospitals. Also prepare the students for group discussions and role plays.
5. Develop the skill to make students prepare PowerPoint presentations.

## Syllabus

### Unit I: Organization of the Hospital

- Over view of health services Types of Patient (K1, K2, and K3)
- Healthcare Models and Emerging Models Types of Hospitals (K1, K2, K3)
- Management Structure of Hospitals (K1, K2, K3)
- Hospital Committees (K1, K2, K3)
- Relationship with other Organization Essential Hospital Operations Indicator (K1, K2, K3)
- Current trends in healthcare (K1, K2, and K3)

### Unit II: Outpatient and Inpatient Service

- Outpatient Service Inpatient Service & Admitting Department (K1, K2, K3)
- Surgical Services and Operating Theatre – ICU (K1, K2, K3)
- Specialty Services Accident and Emergency (K1, K2, K3)
- Surgical Specialties and Anesthesiology Medical Specialties (K1, K2, K3)
- Community Medicine and Family Medicine Paramedical Services (K1, K2, K3)
- Alternative Health Care System (K1, K2, K3)

### Unit III: Nursing Service

- Objectives (K1, K2, K3)
- Responsibilities of Nursing Services (K1, K2, K3)
- Organization of Nursing Services (K1, K2, K3)
- Nursing Process (K1, K2, K3)
- Patient Care (K1, K2, K3)
- Ward Management (K1, K2, K3)

### Unit IV: Hospital Infection Control

- Surveillance and Reporting of Infection (K1, K2, K3)
- Roots of spread of infection High Risk areas in Hospital
- Employee Health (K1, K2, K3)
- Preventing Transmission of Infection (K1, K2, K3)
- Infection control committee Hospital infection control programme (K1, K2, K3)
- Biomedical Waste Disposal (K1, K2, K3)

### Unit V: Clinical Support Services

- Chaplain and Counseling (K1, K2, K3)
- Pharmacy – Laboratories Blood Bank (K1, K2, K3)
- Occupational therapy – Physiotherapy Speech therapy (K1, K2, K3)
- Radiology Diagnostics service (K1, K2, and K3)
- Nuclear Medicine Catheterization Lab (K1, K2, K3)

## Radiation therapy ALC (K1, K2, K3)

### **Textbooks**

## Syllabus

### Unit I: Introduction to Concepts

- Definition of Accounting – Financial Accounting (K1, K2)
- Functions of Financial Accounting (K1, K2)
- Limitations (K1, K2)
- Meaning of Accounting Principles (K1, K2, K3)
- Accounting Concepts (K1, K2, K3)
- Conventions – Features (K1, K2)

### Unit II: Double Entry System

- System of Book keeping (K1, K2)
- Single Entry System – Double Entry System (K1, K2, K3)
- Meaning of Debit and Credit – Advantages of Double Entry System (K1, K2, K3)
- Distinction between Double Entry and Single Entry (K1, K2, K3)
- Accounting Equation – Rules for Accounting Equation (K1, K2, K3, K4)
- Uses of Computer in Accounting (K1, K2)

### Unit III: Journal and Ledger

- Accounting Cycle – Introduction (K1, K2)
- Journal and Journalizing (K1, K2, K3, K4)
- Classification of Accounts (K1, K2)
- Ledger – Meaning of Ledger (K1, K2)
- Method of preparing an Account – Posting in the Ledger – Balancing of Ledger (K1, K2, K3, K4)
- Distinction between Journal and Ledger (K1, K2)

### Unit IV: Books of Accounts

- Subsidiary Books – Preparation of different Subsidiary Books (K1, K2)
- Sales Book – Sales Returns Book (K1, K2, K3, K4)
- Purchase Book – Purchase Return Book (K1, K2, K3, K4)
- Cash Book – Types- Petty Cash Book (K1, K2, K3, K4)
- Bill Receivable Book – Bills Payable Book (K1, K2, K3, K4)
- General Journal or Journal Proper (K1, K2)

### Unit V: Final Accounts

- Trial Balance – Meaning (K1, K2)
- Definition – Objectives (K1, K2)
- Preparation of Manufacturing Account (K1, K2, K3)
- Final Accounts – Trading Account (K1, K2, K3)
- Profit and Loss Account (K1, K2, K3)

Balance Sheet with adjustments (Simple problems) (K1, K2, K3, K4)

## Syllabus

### Unit I: Introduction to Health Economics

Introduction to Economics and Basic Problems of Economy (K1, K2, K3)

Types of Economy and Microeconomics and Macroeconomics (K1, K2, K3)

Circular Flow and Interdependence of Economic Activity, Scarcity and Efficiency (K1, K2, K3)

Managerial Economics and basic economic concepts (K1, K2, K3)

Introduction to Health Economics (K1, K2, K3)

The relevance of Health Economics and the size and scope of the Health Economy (K1, K2, K3)

### Unit II: Basic Microeconomics: Concepts in Health Economics

Basic concepts of market (K1, K2, K3)

Basic Elements of Demand and Supply (K1, K2, K3)

Market equilibrium (K1, K2, K3)

Elasticity of demand and supply (K1, K2, K3)

Approaches to consumer behavior (K1, K2, K3)

Demand for Health (K1, K2, K3)

### Unit III: Production and Cost of Healthcare

Production Function (K1, K2, K3)

Isoquants and Marginal Products (K1, K2, K3)

Elasticity of Substitution (K1, K2, K3)

Cost Function (K1, K2, K3)

Economies of Scale (K1, K2, K3)

Technological Change (K1, K2, K3)

### Unit IV: Economic Evaluation and Markets in Healthcare

Economic Evaluation (K1, K2, K3)

Types of market (K1, K2, K3)

Markets in Healthcare (K1, K2, K3)

Government Interventions in Healthcare (K1, K2, K3)

Health Financing from Various Sources (K1, K2, K3)

Health Insurance and TPA (K1, K2, K3)

**Unit V: Economics of Health Programs**

Environmental Influences on Health and its Economic Impact (K1, K2, K3)

Healthcare System in Different Countries (K1, K2, K3)

Economics Impact of Tobacco use (K1, K2, K3)

Economics Impact of Alcohol use (K1, K2, K3)

Models of Addiction (K1, K2, K3)

Aging of Population (K1, K2, K3)

**Textbooks**

## Syllabus

### Unit I: Understanding Supply Chain

- Introduction – Definition- Importance of supply chain (K1, K2, K3)
- Objective- Process of Supply chain Decision Phases (K1, K2, K3)
- Competitive and Supply Chain Strategies (K1, K2, K3)
- Value Chain (K1, K2, K3)
- Efficiency and Responsiveness (K1, K2, K3)
- Achieving Strategic Fit- Scope (K1, K2, K3)

### Unit II: Drivers of Supply Chain and Distribution Network

- Framework Facilities Inventory (K1, K2, K3)
- Transportation Information (K1, K2, K3)
- Sourcing Pricing (K1, K2, K3)
- Factors influencing distribution network (K1, K2, and K3)
- Types of Distribution Network (K1, K2, K3)
- Service factor and Cost factor (K1, K2, and K3)

### Unit III: Demand and Planning in Supply Chain

- Forecasting- Meaning- Definition (K1, K2, K3)
- Forecasting Methods (K1, K2, K3)
- Aggregate planning in supply chain management (K1, K2, and K3)
- Levers in aggregate planning (K1, K2, K3)
- Pricing in supply chain management- Multiple Customer Segment (K1, K2, K3)
- Perishable Products Seasonal Demand Bulk and Spot Contracts (K1, K2, K3)

### Unit IV: IT and Coordination in Supply Chain Management

- Role of IT in supply chain management (K1, K2, K3)
- Customer Relationship Management (K1, K2, K3)
- Internal Supply Chain Management (K1, K2, K3)
- Supplier Relationship Management (K1, K2, K3)
- Coordination in supply chain management- Bullwhip Effect (K1, K2, K3)
- Obstacles and Levers in coordination (K1, K2, K3)

### Unit V: Logistics Management in Healthcare Sector

- Flow of Logistics in Healthcare sector (K1, K2, K3)
- Application in Hospitals (K1, K2, K3)
- Features in LSCM in health sector (K1, K2, K3)
- Models (K1, K2, K3)
- Analysis in the logistics system. (K1, K2, K3)

## Framework of logistics in Healthcare sector (K1, K2, K3)

### **Textbooks**

1. Chopra S and P Mendil, Supply Chain Management: Strategy, Planning and Operations, Pearson Education, 2<sup>nd</sup> Edition, 2006.
2. Ronald H Ballou and Samir K. Srivastava, Business Logistics/ Supply Chain Management, 5<sup>th</sup> Edition, 2012.

### **Reference Books**

(Low - L, Medium - M, High - H)

## **Syllabus**

### **Unit I: Self-Management**

- Self-awareness (K1, K2, K3)
- Dimensions of Personality Development (K1, K2, K3)
- Interpersonal Relations (K1, K2, K3)
- Types of complexes (K1, K2, K3)
- Emotional Intelligence (K1, K2, K3)
- SWOT analysis (K1, K2, K3)

### **Unit II: Stress Management**

- Meaning, definition and sources of stress (K1, K2, K3)
- Lifestyle stressors (K1, K2, K3)
- Symptoms of stress (K1, K2, K3)
- Guidelines to reduce stress (K1, K2, K3)
- Workplace humor (K1, K2, K3)
- Anger Management (K1, K2, K3)

### **Unit III: Time Management**

- Tips for Time Management (K1, K2, K3)
- Advantages of Time Management (K1, K2, K3)
- Common mistakes student make in time management (K1, K2, K3)
- Goals of Time Management (K1, K2, K3)
- Procrastination (K1, K2, K3)
- Techniques of conquering procrastination (K1, K2, K3)

### **Unit IV: Situations Management**

- Conflict Management (K1, K2, K3)
- Crisis Management (K1, K2, K3)
- Event Management (K1, K2, K3)
- Responsible use of technology (K1, K2, K3)
- Responsible use of social media (K1, K2, K3)
- Change management (K1, K2, and K3)

### **Unit V: Health and Nutrition Management**

- Need for a healthy diet (K1, K2, and K3)
- Balanced diet (K1, K2, K3)
- Meditation (K1, K2, K3)
- Simple exercises for a healthy living (K1, K2, K3)
- Lifestyle and disease (K1, K2, K3)
- Health and hygiene (K1, K2, K3)

## Syllabus

### Unit I: Introduction

- Introduction, scope and objectives of HRM (K1, K2, K3)
- HRM Planning need and advantages (K1, K2, K3)
- HRM planning process (K1, K2, K3)
- Human Resource Information System (K1, K2, K3)
- Difference between HRM and personnel management. (K1, K2, K3)
- Qualities of HR Manager (K1, K2, K3)

### Unit II: HR Functions I

- Recruitment (K1, K2, K3)
- Selection (K1, K2, K3)
- Induction and Orientation (K1, K2, K3)
- Performance Appraisal (K1, K2, K3)
- Methods of Performance Appraisal (K1, K2, K3)
- Training (K1, K2, K3)

### Unit III: HR Functions II

- Talent acquisition and retention (K1, K2, K3)
- Career planning (K1, K2, K3)
- Quality work life (K1, K2, K3)
- Job Analysis (K1, K2, K3)
- Job design (K1, K2, K3)
- Participative Management (K1, K2, K3)

### Unit IV: Welfare Measures and Disputes

- Employee welfare (K1, K2, K3)
- Safety Programs (K1, K2, K3)
- Health (K1, K2, K3)
- Job stress (K1, K2, K3)
- Trade Union (K1, K2, K3)
- Causes and Settlement of Disputes (K1, K2, K3)

### Unit V: Ethics and Challenges

- Separations (K1, K2, K3)
- HR audit (K1, K2, K3)
- Values and Ethics in HRM (K1, K2, K3)
- Ethical issues in HRM (K1, K2, K3)

Challenges in HRM (K1, K2, K3)

Evolution of Human Resource management and its role in hospitals (K1, K2, K3)

**Textbooks**

1. Aswatappa, Human Resource Management and Personnel Management, Tata McGraw Hill Publications, Eighth Edition, 2017.
2. V.S.P.Rao, Human Resource Management: Text and Cases, Excel Books, 3rd Edition, 2010.

## **Syllabus**

### **Unit I: Public Relations and Marketing**

- PRO – Objectives (K1, K2, K3)
- Functions (K1, K2, K3)
- Methods of PRO (K1, K2, K3)
- Dealing with the Press and the Public (K1, K2, K3)
- Reception and Front Office (K1, K2, K3)
- Duties of receptionist (K1, K2, K3)

### **Unit II: Material Management**

- Purchase (K1, K2, K3)
- Procurement- Quote (K1, K2, K3)
- 2.3 CRS (K1, K2, K3)
  - Quality and Quantity (K1, K2, K3)
  - Stores (K1, K2, K3)
  - Warehouse & Distribution (K1, K2, K3)

### **Unit III: Medical Records & Billing and Insurance**

- Function & Importance of MRD (K1, K2, K3)
- Registration and Appointment System (K1, K2, K3)
- Storage and Organization of Medical Records Planning and Managing the MRDepartment (K1, K2, K3)
- Billing system (OP and IP) & Cash Collection (K1, K2, K3)
- Patient Deposit and Prepayment Systems- Smartcards (K1, K2, K3)
- Company and Credit Patients Health Insurance (K1, K2, K3)

### **Unit IV: Engineering Services**

- Hospital Planning and Design (K1, K2, K3)
- Civil Engineering and Buildings Maintenance (K1, K2, K3)
- Electrical Engineering Mechanical Engineering (K1, K2, K3)
- Biomedical Engineering-Water Supply and Sewage (K1, K2, K3)
- Central Medical Gas- Environment Engineering- Bioengineering (K1, K2, K3)
- Management information System- Air Condition Engineering (K1, K2, K3)

### **Unit V: Support Services**

- Central Sterile Supply- Department Human Resource (K1, K2, K3)
- Finance Department – Laundry (K1, K2, K3)
- Housekeeping- Estate Management (K1, K2, K3)

Transport- Nutrition & Dietary – Mortuary (K1, K2, K3)  
Telemedicine – Audit (K1, K2, K3)  
Security – Fire and Disaster (K1, K2, K3)

**SEMESTER IV**  
**UCHAJ20 - INTRODUCTION TO RESEARCH METHODOLOGY**

<b>Year:</b> II <b>Sem:</b> IV	<b>Course Code:</b> UCHAJ20	<b>Title of the Course:</b> Introduction to Research Methodology	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objectives**

1. To understand and apply research approaches techniques and strategies in the appropriate manner for managerial decision making.
2. To apply a range of quantitative and / or qualitative research techniques to business and management problems / issues.
3. To demonstrate knowledge and understand data analysis and interpretation in relation to the research process.
4. To illustrate various types of data and methods for collecting data.
5. To utilize statistical tools to analyze aspects of research and to draft research report.

**COURSE OUTCOMES (CO)**

1. Understand the various types of research and apply it in real life study.
2. Distinguish the types of research design, understand the concept of Hypothesis and formulate the same.
3. Comprehend the various types of sampling techniques, scaling techniques and measurements.
4. Distinguish various types of data collection methods and enable the students to draft questionnaire incorporating the scaling techniques.
5. Enable the students to analyze data using statistical packages and to follow a systematic process to write a research report.

## Syllabus

### Unit I: Introduction

- Definition of research – meaning – objectives (K1, K2)
- Types of research (K1, K2, K3, K4)
- Research process (K1, K2, K3)
- Qualities of a researcher (K1, K2)
- Criteria of good research (K1, K2, K3, K4)
- Problems encountered in research (K1, K2, K3)

### Unit II: Research Design

- Defining research problem (K1, K2)
- Research design- Features of good research design (K1, K2, K3)
- Types of research design – factors affecting research design (K1, K2, K3)
- Hypothesis- Meaning – Definition – Need for hypothesis (K1, K2, K3, K4)
- Formulation of hypothesis – Types of hypothesis (K1, K2, K3, K4)
- Test of hypothesis – Type I and Type II error (K1, K2, K3, K4)

### Unit III: Sampling and Scaling

- Sampling techniques (K1, K2, K3)
- Types of sampling (K1, K2, K3, K4)
- Merits and demerits of Probability Sampling (K1, K2, K3)
- Merits and demerits of Non Probability Sampling (K1, K2, K3)
- Scaling – Types (K1, K2, K3, K4)
- Measurements – Classification (K1, K2, K3)

### Unit IV: Data Collection

- Collection of primary and secondary data (K1, K2, K3)
- Interview techniques (K1, K2, K3)
- Survey and interview method – merits and demerits (K1, K2, K3)
- Questionnaire – pre requisites of using questionnaire (K1, K2, K3, K4)
- Structured and Unstructured questionnaire (K1, K2, K3, K4)
- Types of secondary data (K1, K2, K3)

### Unit V: Data analysis and Report writing

- Steps in report writing (K1, K2, K3, K4)
- Introduction to Statistical Packages (K1, K2, K3)
- Descriptive: Percentage Analysis – Charts (K1, K2, K3, K4)
- Inferential Analysis: Mean- Median- Mode (K1, K2, K3, K4)
- Range- Variance- Standard Deviation (K1, K2, K3, K4)
- Correlation – Regression- Chi-square – ANOVA (Only Theory) (K1, K2, K3)

**Textbooks**

1. C.R. Kothari, Research Methodology Methods and Techniques, New Age International Publishers, 4<sup>th</sup> Edition, 2019.
2. P. Ravilochanan, Research Methodology, Margham Publication, First Edition 2012.

**Reference books**

1. B.N. Ghosh, Scientific Methods and Social Research, Sterling Publishers Pvt. Ltd., Delhi, 4<sup>th</sup> Edition 2015.
2. Dipak Kumar Bhattacharyya, Research Methodology, Excel Books, 2<sup>nd</sup> Edition, 2006.
3. Ajai Gaur, Statistical Methods for practice and Research, 1<sup>st</sup> Edition, 2006.

## SEMESTER IV

### UCHAK20 - ACCOUNTING FOR HOSPITAL ADMINISTRATORS – II

<b>Year:</b> II <b>Sem:</b> IV	<b>Course Code:</b> UCHAK20	<b>Title of the Course:</b> Accounting for Hospital Administrators II	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
---	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Objectives

1. To understand the evolution and role of cost and management accounting in business and its application in decision making.
2. To compute core financial ratios that communicates essential information.
3. To familiarize the concepts of cost accounting and material control with pricing methods.
4. To present and analyze variety of managerial decisions by preparing cash and funds flow statement.
5. To apply and analyze various tools and techniques of management accounting and determine optimal managerial decision.

#### COURSE OUTCOMES (CO)

1. Gain knowledge in basic concepts, tools and techniques of management accounting.
2. Be able to analyze the annual reports of an organisation and interpret the required financial information by calculating various ratios.
3. Classify the costs to better understand the business expenses and prepare cost sheet by breaking cost based on its types.
4. Prepare funds flow statement, cash flow statement and evaluate the fund movements and cash position of an organization.
5. Apply the cost, volume and profit concepts, prepare various budgets like cash budget, production budget, sales budget that aids in decision making.

(Low - L, Medium - M, High - H)

## Syllabus

### Unit I: Introduction

Introduction to Management Accounting – Meaning - Characteristics (K1, K2, K3)  
Principles – Scope – Objectives/Functions/Role (K1, K2, K3)  
Advantages – Limitations of Management (K1, K2, K3)  
Tools and Techniques of Management Accounting (K1, K2, K3)  
Introduction to Cost Accounting - Functions - Limitations (K1, K2, K3)  
Need for Cost Accounting - Difference between Cost & Management Accounting (K1, K2, K3)

### Unit II: Ratio Analysis

Ratio Analysis Calculation of various ratios (K1, K2, K3)  
Profitability ratios (K1, K2, K3, K4)  
Liquidity ratios (K1, K2, K3, K4)  
Solvency ratios (K1, K2, K3, K4)  
Turnover ratios (K1, K2, K3, K4)  
Capital Structure ratios (K1, K2, K3, K4)

### Unit III: Funds Flow and Cash Flow

Funds Flow Analysis – Working Capital (K1, K2, K3, K4)  
Current Assets – Current Liabilities (K1, K2, K3, K4)  
Preparation of Funds Flow Statement (Simple problems with sale of Fixed Assets under Indirect Method) (K1, K2, K3, K4)  
Cash Flow Analysis – Meaning – Importance (K1, K2, K3, K4)  
Difference between Funds Flow and Cash Flow (K1, K2, K3, K4)  
Preparation of Cash Flow Statement (Simple problems with sale of Fixed Assets under Indirect Method) (K1, K2, K3, K4)

### Unit IV: Cost Accounting

Classification of costs – Methods of Costing (K1, K2, K3)  
Elements of Cost sheet (K1, K2, K3, K4)  
Pricing of Materials – Methods of pricing (K1, K2, K3)  
FIFO (K1, K2, K3, K4)  
LIFO (K1, K2, K3, K4)  
Process Costing (K1, K2, K3, K4)

### Unit V: Marginal Costing & Budgetary Control

Marginal Costing – Meaning – Introduction to all concepts (K1, K2, K3)  
Cost Volume Profit Analysis excluding managerial decision making (K1, K2, K3, K4)

Budget and Budgetary Control – Meaning – Explanation – Advantages – Disadvantages (K1, K2, K3)

Types of Budgets – Cash Budget (K1, K2, K3, K4)

Flexible Budget (K1, K2, K3, K4)

Production Budget (K1, K2, K3, K4)

Sales Budget (K1, K2, K3, K4)

**Note: 80% Problems and 20% Theory**

### **Textbooks**

1. Khan and Jain, Management Accounting, Tata McGraw Hill, New Delhi, 2007.
2. R.S.N.Pillai and Bagavathi, Management Accounting, S. Chand and Co., NewDelhi, 2010.

## Syllabus

### Unit I: Introduction to Marketing and Service Marketing

- Basic Marketing concepts (K1, K2, K3)
- Evolution of marketing concepts (K1, K2, K3)
- Marketing and service marketing mix (K1, K2, K3)
- Concept of service (K1, K2, K3)
- Classification of service (K1, K2, K3)
- Challenges and issues in services marketing. (K1, K2, K3)

### Unit II: Building Service Model

- Growth of service (K1, K2, K3)
- Career opportunities in service sector (K1, K2, K3)
- Planning and creating services (K1, K2, K3)
- Development of new services (K1, K2, K3)
- Distribution of services (K1, K2, K3)
- Pricing Service (K1, K2, K3)

### Unit III: Competition Analysis and Strategies

- Competitive Threats (K1, K2, K3)
- Competition analysis (K1, K2, K3)
- Competitive Advantage (K1, K2, K3)
- Service failures and Recovery (K1, K2, K3)
- Service branding (K1, K2, K3)
- Promotion (K1, K2, K3)

### Unit IV: Customer Behavior

- Consumer behavior in services (K1, K2, K3)
- Customer expectations and perceptions of service (K1, K2, K3)
- Service quality (K1, K2, K3)
- Determinants of service quality (K1, K2, K3)
- CRM (K1, K2, K3)
- Framework of CRM (K1, K2, K3)

### Unit V: Delivering and Performing of Services

- Managing service demand (K1, K2, K3)
- Managing service capacity (K1, K2, K3)
- A Service encounter (K1, K2, K3)
- Moment of truth (K1, K2, K3)
- Service Interaction Process (K1, K2, K3)
- Enhancing employee participation and customer participation (K1, K2, K3)

## Syllabus

### Unit I: Introduction to Quality

- Concept and definitions - Dimensions of service quality (K1, K2, K3)
- History of quality principles (K1, K2, K3)
- Customer and types of customer - Continuous quality improvement (K1, K2, K3)
- Seven tools of quality - Check Sheet - Control chart (K1, K2, K3)
- Stratification - Pareto chart - Histogram - Scatter Diagram (K1, K2, K3)
- 5s - Six Sigma - Kaisen - Lean Management and Reengineering (K1, K2, K3)

### Unit II: Healthcare Quality

- Healthcare Quality and the patients (K1, K2, K3)
- Basic concepts of Healthcare quality (K1, K2, K3)
- Variation in medical practice and implication for quality (K1, K2, K3)
- Quality improvement system (K1, K2, K3)
- Need for healthcare quality management in hospitals (K1, K2, K3)
- Measure and improve patient care experience (K1, K2, K3)

### Unit III: Patient Safety and Medical Errors

- Scope of Patient Safety Considerations in Healthcare (K1, K2, K3)
- Use of Patient Safety Considerations in Healthcare (K1, K2, K3)
- Clinical and Operational Issues (K1, K2, K3)
- Improve patient safety (K1, K2, K3)
- Adverse event (K1, K2, K3)
- Using Technology to Improve Patient Safety (K1, K2, K3)

### Unit IV: Audit & Accreditation in Healthcare

- Clinical quality (K1, K2, K3)
- Auditing - Meaning - Types (K1, K2, K3)
- Auditing - steps and benefits (K1, K2, K3)
- Accreditation ISO - NABH (K1, K2, K3)
- JCI and other standards (K1, K2, K3)
- Benefits of accreditation (K1, K2, K3)

### Unit V: Organization and Roles in Quality

- Quality Policy (K1, K2, K3)
- Quality Steering committee (K1, K2, K3)
- Quality Council (K1, K2, K3)

Quality team (K1, K2, K3)

Healthcare performance indicator (K1, K2, K3)

Importance and concept of patient safety - Implementing strategies (K1, K2, K3)

## Syllabus

### Unit I: Introduction

- Nature and concept of OB (K1, K2, K3)
- Challenges of OB (K1, K2, K3)
- Ethical issues in OB (K1, K2, K3)
- Role of OB (K1, K2, K3)
- OB model (K1, K2, K3)
- Hawthorne Experiments (K1, K2, K3)

### Unit II: Perception and Learning

- Nature of human behavior (K1, K2, K3)
- Models of man (K1, K2, K3)
- Perception (K1, K2, K3)
- Managerial applications of developing perceptual skills (K1, K2, K3)
- Learning (K1, K2, K3)
- Factors affecting learning (K1, K2, K3)

### Unit III: Personality and Group Dynamics

- Personality theories (K1, K2, K3)
- Measurement of personality (K1, K2, K3)
- Attitude (K1, K2, K3)
- Attitudes relevant for OB (K1, K2, K3)
- Group Dynamics (K1, K2, K3)
- Types of group dynamics (K1, K2, K3)

### Unit IV: Conflict

- Organization Conflict (K1, K2, K3)
- Role conflict (K1, K2, K3)
- Conflict resolution (K1, K2, K3)
- Stress (K1, K2, K3)
- Coping strategies of stress (K1, K2, K3)
- Management by objectives (K1, K2, K3)

### Unit V: Motivation and Leadership Theories

- Maslow's need hierarchy theory (K1, K2, K3)
- Herzberg two factor theory (K1, K2, K3)
- Vroom's expectancy theory and McClelland's need theory (K1, K2, K3)
- X and Y theory (K1, K2, K3)

Leadership theories (K1, K2, K3)

Leadership styles (K1, K2,

## Syllabus

Each student shall belong to a team of 5 and are required to prepare the report on the basis of investigation carried out in a particular problem area identified by them in a hospital. The report should demonstrate the capability of the students for some creative potential and original approach to solve the practical problems in day today activities in a hospital.

The report should include surveys, interpretation, planning and design of improved integrated management systems in a hospital, presented in a comprehensive manner and viva voce examination will be conducted on the basis of the report.

### Evaluation Pattern

- The mode of evaluating the project will consist of two parts. One on the basis of report writing and the other will be through Viva Voce Examination
- The valuation of the report writing and Viva Voce Examination will be done by the internal and external examiner.
- 60 marks will be awarded for report writing and 20 marks for overall review and 20 marks for oral examination.
- Project will be for a period of 1 month which will be during the II year in the month of May.
- Each team should find a reputed hospital to carry out her investigation with the approval of the department.
- After completing the Project, the students should get an Attendance Certificate from the hospital.

The following are the components for report writing

Content	40 Marks
Methodology	10 Marks
Layout	10 Marks
Overall Performance Review	20 Marks (CA – 80 Marks)
Viva Voce	(Semester 20 Marks)
Oral Presentation	10 Marks
Question and Answer	10 Marks

## SEMESTER V

### UEHAC20 - ELECTIVE II A: HEALTHCARE INSURANCE

<b>Year:</b> III	<b>Course Code:</b> UEHAC20	<b>Title of the Course:</b> Health Care Insurance	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> V							

#### Objectives

1. To understand the evolution of Health Insurance in India, the basics of Insurance and its role in economic development.
2. To familiarize with the role of regulatory bodies of Insurance sectors.
3. To comprehend the various policies of Health Insurance.
4. To equip with the knowledge of basic principles, tools, methods and process of underwriting.
5. To understand the claim management process in health insurance.

#### COURSE OUTCOMES (CO)

1. Acquire knowledge on basic terminologies of insurance and describe the role of health insurance for individuals.
2. Understand the various types of health insurance policies offered to individuals in India and the rules that govern and protect policy holders.
3. Familiarize with various health insurance policies offered by Government for poorer sections of the society.
4. Understand the basic tools and principles of underwriting and the rules governing the same.
5. Comprehend the claims management in insurance and understand the role of Third Party Administrators (TPA).

## **Syllabus**

### **Unit I: Introduction**

- Electronic Banking: Traditional Banking Vs E-Banking (K1, K2, K3)
- Facets of E-Banking (K1, K2, K3)
- E-Banking transactions - Truncated cheque and Electronic cheque (K1, K2, K3)
- Models for E-banking - Complete centralized solution - Features CCS - Cluster approach (K1, K2, K3)
- Hi tech Bank with in Bank Advances of E-Banking (K1, K2, K3)
- Constraints in E-Banking (K1, K2, K3)

### **Unit II: Online Banking**

- Online Banking - Introduction - Concept and meaning (K1, K2, K3)
- The electronic delivery channels - Need for computerization (K1, K2, K3)
- Automatic Teller Machine (ATM) at home –Electronic Fund Transfer (EFT) uses(K1, K2, K3)
- Computerization in clearing houses (K1, K2, K3)
- Tele banking on home computers (K1, K2, K3)
- Electronic Money Transfer uses of EMT (K1, K2, K3)

### **Unit III: E Banking in India**

- Updating Bank saving accounts –Computer bank branches (K1, K2, K3)
- Financial Transaction Terminals (FTT) (K1, K2, K3)
- E-Cheque - Magnetic Ink Character Recognition (MICR) and Cheques (K1, K2, K3)
- E-Banking in India – Procedure – Programmes - Components (K1, K2, K3)
- How to go on net for Online Banking (K1, K2, K3)
- Advantages - Limitations (K1, K2, K3)

### **Unit IV: Security I**

- E-Banking Security – Introduction - Need for security (K1, K2, K3)
- Security concepts - Privacy –Survey - Findings on security attack - Cybercrimes (K1, K2, K3)
- Reasons for Privacy Tampering Encryption –Meaning - The encryption process (K1, K2, K3)
- Cryptogram – Cryptanalyst - Cryptography - Types of Cipher systems – Code systems (K1, K2, K3)
- Cryptography – Cipher – Decipher – Jumbling - Asymmetric (K1, K2, K3)
- Crypto system - Data Encryption Standard (DES) (K1, K2, K3)

### **Unit V: Security II**

- E-Builder solutions Digital certificate - Digital Signature & Electronic Signature(K1, K2, K3)
- E-Security solutions — solutions providers – E-locking technique – E-lockingservices - Netscape security solutions (K1, K2, K3)
- Pry Zone – E - software security - Internet Transactions - Transaction security(K1, K2, K3)
- PKI Sierras - Internet solutions –security devices (K1, K2, K3)
- Public Key Infrastructure (PKI) - Firewalls Secure Ledger (FSL) (K1, K2, K3)
- Secure Electronic Transaction (SET) (K1, K2, K3)

**Text Books**

1. C.S. Rayudu, E-Business, Himalaya Publishing House. 2015
2. IIBF, Bank Financial Management, Paperback, 2018.

**Reference Books**

1. Peter Rose, Sylvia Hudgins Bank Management and Financial Services Paperback, 1Jul 2017.
2. N S Toor, Arundeeep Toor, Skylark Publication's Bank Financial Management Guide For Caiib Q&A By N. S.Toor & Arundeeep Toor (9th Edition) Paperback, 2018.
3. Bhushan Dewan, E-Commerce, S Chand, 2001.

**Practical II E-banking**

1. Commenting on the correctness of documents like Cheque.
2. Responding to stimulated exercises on Customer/ Bank Employee Complaints.
3. Format of Letter of Credit.
4. Examining the working Mechanisms of ATMs and ETAs.
5. Working Knowledge of Telebanking
6. Knowledge of working Mechanisms of Encryption and E-Security.
7. Learning Internet Transactions Firewalls.

**SEMESTER V**  
**UGHAA521 – NON MAJOR ELECTIVE I: MANAGEMENT**  
**INFORMATIONSYSTEMS**

<b>Year:</b> III <b>Sem:</b> V	<b>Course Code:</b> UGHAA521	<b>Title of the Course:</b> Management Information Systems	<b>Course Type:</b> Theory	<b>Course Category:</b> Non Major Elective I	<b>H/W</b> 3	<b>Credits</b> 4	<b>Marks</b> 100
---	---------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Objectives**

1. To enable and understand the basic concepts of management information systems.
2. To analyze operational and tactical information systems in functional areas of business.
3. To develop skills in planning and development with the management information system.
4. To acquire skills to organize management information systems.
5. To learn and understand the concept of Hospital Information System.

**COURSE OUTCOMES (CO)**

1. Identify strategic uses of information systems in management.
2. Evaluate operational and tactical information systems in functional areas of business including marketing, finance and human resource.
3. Enhance skills in planning, analyzing and designing information systems.
4. Realize the roles and responsibility of information system professionals to control issues related to information theft.
5. Gain Knowledge in various Hospital Management software used for prescribing medicines, laboratory reports and logistics and inventory management.

CO5	H	L	M	M	H	H

(Low - L, Medium - M, High - H)

## **Syllabus**

### **Unit I: Introduction to Information Systems and application in Functional Business Areas**

- A Manager's view of Information Systems (K1, K2, K3)
- An Introduction to concepts of system and Organizations (K1, K2, K3)
- Strategic Uses of Information Technology (K1, K2, K3)
- Business Process in Engineering (K1, K2, K3)
- Information Technology (K1, K2, K3)
- Information Technology and Business Process (K1, K2, K3)

### **Unit II: Applications of Information Systems**

- Applications to Operational Information systems to Business -  
Operation marketing information system (K1, K2, K3)
- Operational human resource information system (K1, K2, K3)
- Tactical and Strategic Information systems to Business (K1, K2, K3)
- Tactical accounting and financial information system (K1, K2, K3)
- Tactical marketing information system (K1, K2, K3)
- Tactical human resource information system (K1, K2, K3)

### **Unit III: Planning and Development of Information Systems**

- Information systems Planning (K1, K2, K3)
- Critical Success Factors (K1, K2, K3)
- Business System Planning (K1, K2, K3)
- System development life cycle (K1, K2, K3)
- System Analysis. (K1, K2, K3)
- Evaluating alternative design (K1, K2, K3)

### **Unit IV: Organization of Information systems**

- Introduction - Centralized/ De-Centralized/ Distributed Data Processing (K1, K2, K3)
- Allocation of Responsibilities in Distributed Data Processing (K1, K2, K3)
- Effective Organization of Information Processing Activities (K1, K2, K3)
- Roles & Responsibilities of Information Systems Professionals (K1, K2, K3)
- Career paths and Management of Data Processing (K1, K2, K3)
- The Organization and Management of End-User Computing (K1, K2, K3)

### **Unit V: Hospital Information systems (HIS)**

- Introduction to HIS- Definition - Need of HIS- Functional areas of HIS
- Utilization of HIS - Structure of HIS - Importance of HIS (K1, K2, K3)
- Managing information in hospitals, Functional areas in a hospital, structuring of HIS, users and access control - Development and implementation (K1, K2, K3)
- Hospital Management Software (HMS) - Application of MIS - Hospital Information Systems (HIS) or Hospital Information Technology (HIT) – Telemedicine (K1, K2, K3)
- Laboratory Information System (LIS)
- Health information management - Logistic and Supply chain
- Data analytics - Electronic Health - E-governance (K1, K2, K3)

3. S.A Kelkar, Hospital Information Systems: A Concise Study, Prentice Hall India Learning Private Limited, 2010.

## SEMESTER V

### USHAE520 - SKILL BASED ELECTIVE V: PRACTICAL: ACCOUNTING PACKAGES

<b>Year:</b> III <b>Sem:</b> V	<b>Course Code:</b> USHAE520	<b>Title of the Course:</b> Accounting Packages	<b>Course Type:</b> Practical	<b>Course Category:</b> Skill Based Elective V	<b>H / W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
---	---------------------------------	--	----------------------------------	---	-------------------	---------------------	---------------------

#### Objectives

1. To introduce the students to the Basic of Accounts and the usage of Tally for accounting purpose.
2. To acquaint students with the accounting concept, tools and techniques influencing business organization will be liable for preparation of financial statements in the modern technological era.
3. To enable the students to record the business transactions and manage the accounts information for an organization using the popular Tally Business Accounting Software.
4. To enable the students to explore to and acquire skills in respect of most sophisticated computerized accounting procedures and practices so as to help them serve better the vast accounting needs of every commercial organization.
5. To enable the students ready with required skill for employability in the job market.

#### COURSE OUTCOMES (CO)

1. Gain knowledge in various accounting packages and the basics of Tally ERP 9.0
2. Be trained in creating company, enter accounting vouchers and to print profit and loss and Balance Sheet.
3. Prepare inventory and stock items for an organisation and print the stock summary report.
4. Understand how to create and maintain cost categories, cost centres of a product for easy processing of sales and purchase inventories.
5. Analyse the financial statements using ratio analysis and interpreting the results thereof.

(Low - L, Medium - M, High - H)

## Syllabus

### Unit I: Introduction

Introduction to Accounting Software Packages : Marg – Zip books – Profit Books – Money Manager Ex – Quick Books – Zoho Books – Vyapar – MProfit – Marg ERP – Tally (K1)

### Unit II: Profit & Loss and Balance Sheet

Journal, ledger accounts – Trial Balance – Trading and Profit and Loss account – Profit and Loss account – Balance Sheet - Display Balance Sheet – Profit and Loss Account – Display trial balance (K5)

### Unit III: Inventory and Stock

Fundamentals of Inventory – Stock Groups – Stock categories – Godowns /Locations –Units of Measure Stock items (K5)

### Unit IV: Cost Categories

Cost Categories – Cost Centers – Inventory Master Creation: Stock groups – Entering Vouchers; Voucher types – How to enter Voucher – Different Types of Accounting Vouchers (Payments / Receipt, Journal, Sales and Purchase) (K5)

### Unit V: Introduction to Ratio Analysis

Ratio Analysis (K5)

### Lab Exercises

1. Trading and profit and loss account of a company
2. Balance Sheet of the Company
3. Cost category and cost center
4. Inventory and stock

### Textbooks

1. Namrata Agarwal, Tally 9, Dreamtech Press, 2<sup>nd</sup> Edition, 2013.
2. A.K.Nadhani, K.K.Nadhani, Implementing Tally 9, BPB Publications, 2<sup>nd</sup> Edition, 2007.

**SEMESTER VI**  
**UCHAP20 - PUBLIC HEALTH AND COMMUNITY**

<b>Year:</b> III <b>Sem:</b> VI	<b>Course Code:</b> UCHAP20	<b>Title of the Course:</b> Public Health and Community	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 8	<b>Credits</b> 4	<b>Marks</b> 100
--	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objectives**

1. To understand the history and antiquity of medicine.
2. To understand the concepts and definition of health and disease.
3. To understand the basic definitions and uses of Epidemiology.
4. To understand and differentiate communicable and non-communicable diseases.
5. To explore the health status, information and statistics in India.

**COURSE OUTCOMES (CO)**

1. Understand the history of medicine, dawn of scientific medicine and healthcare revolution.
2. Analyze the principles of health management and planning cycle and various health delivery systems.
3. Understand the uses of Epidemiology and concepts of screening for disease.
4. Realize and differentiate communicable and non-communicable diseases and conceptualize various National Health Planning in India and its impact.
5. Understand the importance of nutrition and health, environment and health in health status.

**(Low L, Medium – M, High H)**

## **Syllabus**

### **Unit I: History of Medicine Overview**

- Medicine in antiquity (K1, K2, K3)
- Scientific approach (K1, K2, K3)
- Modern medicine (K1, K2, K3)
- Healthcare revolution (K1, K2, K3)
- Concept of health and health diseases (K1, K2, K3)
- Man and medicine (K1, K2, K3)

### **Unit II: Concepts of Health and Disease**

- Definition on health Determinants of Health (K1, K2, K3)
- Dimensions of Health (K1, K2, K3)
- Concept of Disease Concepts of Prevention (K1, K2, K3)
- Health Management and Planning Principles of Health Management and Planning cycle (K1, K2, K3)
- Healthcare of the community (K1, K2, K3)
- Health Delivery System (K1, K2, K3)

### **Unit III: Principles of Epidemiology**

- Definitions and basic measurement of epidemiology (K1, K2, K3)
- Epidemiologic methods (K1, K2, K3)
- Descriptive epidemiology (K1, K2, K3)
- Uses of epidemiology (K1, K2, K3)
- Screening for Disease (K1, K2, K3)
- Sensitivity and specificity (K1, K2, K3)

### **Unit IV: Disease: Concept, Cause and Control**

- Communicable diseases (K1, K2, K3)
- Non-communicable diseases - Control of non-communicable diseases (K1, K2, K3)
- National health planning in India, NHP (K1, K2, K3)
- Health programmes in India (K1, K2, K3)
- Reproductive and child health programme – Immunization Leprosy & TB (K1, K2, K3)
- HIV/AIDS programmes (K1, K2, K3)

### **Unit V: Health Status and Statistics in India and its Determinants**

- Nutrition and health (K1, K2, K3)
- Social science and medicine (K1, K2, K3)
- Environment and health (K1, K2, K3)
- Health information and statistics (K1, K2, K3)
- Mental health service (K1, K2, K3)
- Alcohol and its dependence (K1, K2, K3)

**Textbooks**

1. Park K, Park's Textbook of Preventive and Social Medicine, Banarsidas Bhanot, Jabalpur, India, 24<sup>th</sup> Edition, 2017.
2. Virginia Berridge, Public Health: A Very Short Introduction, Paperback, 2016.

**UCHAQ20 - MATERIALS AND EQUIPMENT MANAGEMENT**

<b>Year:</b> III <b>Sem:</b> VI	<b>Course Code:</b> UCHAQ20	<b>Title of the Course:</b> Materials and Equipment Management	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 8	<b>Credits</b> 4	<b>Marks</b> 100
--	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Objectives**

1. To understand the structure and overall functioning of the materials management.
2. To identify, differentiate and analyze the functions of materials management departments.
3. To recognize, evaluate and design the inventory control system for economical functioning of the hospital.
4. To categorize, plan and implement audits of inventory and materials system.
5. To develop, organize and implement the materials management system in the hospital.

**COURSE OUTCOMES (CO)**

1. Understand the need and importance of materials management in the hospital.
2. Develop and manage a purchase system for the hospital.
3. Plan and implement equipment purchase and develop audit and maintenance systems for hospital equipment.
4. Understand, interrelate various aspects of receiving and inspection and stores in materials management.
5. Recognize the importance of value and inventory management in materials management and select the appropriate methods for sustainable economic functioning.

CO5	H	M	M	M	L	M

(Low - L, Medium - M, High - H)

## **Syllabus**

### **Unit I: Materials Management**

Introduction Definition and Function (K1,K2,K3)  
Goals and Objectives of Materials Management (K1,K2,K3)  
Materials Cycle (K1,K2,K3)  
Functions of Materials Manager (K1,K2,K3)  
Problems and Issues in Hospitals (K1,K2,K3)  
Information Systems for Materials Management (K1,K2,K3)

### **Unit II: Purchasing**

Objectives and Elements of Purchasing (K1,K2,K3)  
Purchasing System (K1,K2,K3)  
Purchasing Cycle (K1,K2,K3)  
Purchase Procedures Legal and Ethical Aspects (K1,K2,K3)  
Conditions of Contract (K1,K2,K3)  
Financial Rules - Arbitration (K1,K2,K3)

### **Unit III: Equipment Purchase and Maintenance**

Planning of Equipment (K1,K2,K3)  
Selection of Equipment (K1,K2,K3)  
Import of Equipment (K1,K2,K3)  
Equipment Utilization and Operation (K1,K2,K3)  
Equipment Repair and Maintenance (K1,K2,K3)  
Equipment Audit (K1,K2,K3)

### **Unit IV: Inspection, Storage and Distribution of Materials**

Planning - Consideration of Stores (K1,K2,K3)  
Inspection of Materials (K1,K2,K3)  
Verification of Materials (K1,K2,K3)  
Storage of Materials (K1,K2,K3)  
Distribution of Materials (K1,K2,K3)  
Condemnation and Disposal (K1,K2,K3)

### **Unit V: Scientific Inventory Management**

Codification and Standardization (K1,K2,K3)  
Value Analysis (K1,K2,K3)  
Inventory Control - Lead Time - Safety Stock and Reorder level (K1,K2,K3)  
Economic Order Quantity (EOQ) (K1,K2,K3)  
Selective Controls (K1,K2,K3)  
Case Studies on Inventory Control (K1,K2,K3, K4)

**Textbooks**

**(Low - L, Medium - M, High - H)**

**Syllabus**

Each student shall be required to prepare the report on the basis of training undergone by her in a hospital. The report should demonstrate the capability of the students in studying the hospital and its services and activities in totality.

## Evaluation Pattern

- Each student should undergo the training separately.
- The mode of evaluating the student will consist of two parts. One on the basis of report writing and the other will be through Viva Voce.
- The valuation of the report writing will be by the internal examiner while for the oral examination an external examiner will be called for.
- 60 marks will be awarded for report writing and 20 marks for overall review and 20 marks for oral examination.
- Training will be for a period of 3 months which will be during the last semester of the course.
- Each student should find a reputed hospital to carry out her investigation with the approval of the department.
- After completing her training, the student should get an Attendance Certificate from the hospital.

The following are the components for report writing

Content	50 Marks
Layout	10 Marks
Overall Performance Review	CA – 60 Marks
Viva Voce	Semester 40 Marks
Oral Presentation	20 Marks
Question and Answer	20 Marks

**SEMESTER VI**  
**UGHAB620 - NON MAJOR ELECTIVE II: PRACTICALS: ADVANCED EXCEL**

<b>Year:</b> III <b>Sem:</b> VI	<b>Course Code:</b> UGHAB620	<b>Title of the Course:</b> Advanced Excel	<b>Course Type:</b> Practical	<b>Course Category:</b> Non Major Elective	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 100
--	---------------------------------	---	----------------------------------	---	-----------------	---------------------	---------------------

**Objectives**

1. To introduce the students to the basic of Microsoft Excel.
2. To acquaint students with spreadsheet concept, functions, formula; graphing tools and tables.
3. To enable the students to use a spreadsheet to track data and automatically see sums averages and totals.
4. To enable the students to explore and acquire skills in respect of most sophisticated computerized data analysis and documentation procedures and practices so as to help them serve better in an organization.
5. To enable the students ready with required skill for employability in the job market.

**COURSE OUTCOMES (CO)**

1. Gain knowledge in basics and advanced Microsoft Excel.
2. Be trained in creating worksheet, enter data set and can perform all arithmetic operations using formulas.
3. Prepare and can calculate the pay roll of employees in an organization.
4. Understand how to create and extract pivot table from the data set.
5. Analyze the data sets using various graphic tools and functions.

(Low-L, Medium – M, High - H)

## **Syllabus**

### **Unit I: Introduction to Microsoft Excel**

Entering and Revising Data - Moving Data within a Workbook - Finding and Replacing Data - Correcting and Expanding Upon Worksheet Data - Defining a Table - Naming Groups of Data - Creating Formulas to Calculate Values - Finding and Correcting Errors in Calculations (K5)

### **Unit II : Formatting and Filters**

Formatting Cells- Defining Styles - Applying Workbook Themes and Table Styles - Adding Images to Worksheets - Limiting Data That Appears on Your Screen - Manipulating List Data - Defining Valid Sets of Values for Ranges of Cells (K5)

### **Unit III: Creating Dynamic Lists by Using PivotTables**

Sorting Data Lists-- Looking Up Information in a Data List - Analyzing Data Dynamically by Using Pivot Tables - Filtering, Showing, and Hiding PivotTable Data Editing PivotTables - Formatting PivotTables -Creating PivotTables from External Data (K5)

### **Unit IV: Analyzing Alternative Data Sets**

Defining an Alternative Data Set -Defining Multiple Alternative Data Sets - Varying Your Data to Get a Desired Result by Using Goal Seek - Finding Optimal Solutions by Using Solver - Analyzing Data by Using Descriptive Statistics - Consolidating Multiple Sets of Data into a Single Workbook - Grouping Multiple Sets of Data (K5)

### **Unit V: Creating Charts and Graphics 235**

Creating Chart - Customizing the Appearance of Charts - Finding Trends in Your Data - Adding Graphics to Spreadsheet - Creating Dynamic Charts by Using Pivot Charts - Creating Diagrams by Using Smart Art (K5)

### **Text Books**

1. Curtis D. Frye, Step by Step Microsoft Excel 2007, Microsoft Press, 2012.
2. John Walkenbach, Microsoft Excel 2016 Bible, John Wiley & Sons, 2015.

### **Reference books**

1. Paul McFedries, Excel 2016 Formulas and Functions, Pearson Publications, 2016.
2. [www.coursera.org](http://www.coursera.org)

## Practical List

1. Create a Worksheet with entering 10 Patient's data of a hospital with necessary formatting and sorting.
2. Create a worksheet and perform various arithmetic operations.
3. Find out total hours worked in a week by the employees in a company using arithmetic operator and fill the details using auto fill operation.
4. Calculate the total salary of all sales representative after adding the commission of 2% for each sale.
5. Create a mark list for 5 students in five subjects, and calculate the total average, minimum and maximum mark in each subject and results as pass or fail. Insert chart for input values
6. Create a sales and profit report for the first quarter and calculate the 10% Bonus, which is 10% of the Profit. .
7. Create a Pivot table and extract the medicine imported from a data set in a year by a company and insert pivot chart
8. Create an eligibility list for the second round of interview among the candidates those who scored above 60% marks in their first round.

**SEMESTER VI**  
**USHAF620 - SKILL BASED ELECTIVE VI: SOCIAL**  
**ENTREPRENEURSHIP**

<b>Year:</b> III <b>Sem:</b> VI	<b>Course Code:</b> USHAF620	<b>Title of the Course:</b> Social Entrepreneurship	<b>Course Type:</b> Theory	<b>Course Category:</b> Skill Based Elective VI	<b>H/ W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
--	---------------------------------	---	-------------------------------	---	----------------------	---------------------	---------------------

**Objectives**

1. To understand the difference between social entrepreneurship with other entrepreneurial and social work.
2. To learn various types of social enterprise.
3. To understand the concept of sustainable development.
4. To identify the opportunities of social entrepreneurship.
5. To develop the business model for social entrepreneurship.

**COURSE OUTCOMES (CO)**

**AUXILIUM COLLEGE (Autonomous)**  
(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)  
**Gandhi Nagar, Vellore – 632006**

**Department of Botany**

The Department of Botany offers Allied and Optional Allied Course in Botany to the students of Zoology and Chemistry Department. It also offers interdisciplinary course as Skill Based Elective and Non-Major Elective to I UG and III UG of all the disciplines.

**On completion of the UG Programme, students will be able to:**

**PO1:**Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:**Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:**Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:**Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society.

**PO5:**Emulate positive social values and exercise leadership qualities and teamwork.

**PO6:**Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

**Programme Specific Outcomes (PSO)**

**PSO1:**Understand the basics of Botany

**PSO2:**Gain knowledge of the diversity of the Plant kingdom

**PSO3:**Utilize the knowledge to understand the metabolism of Plants

**PSO4:**Apply the knowledge to develop a sustainable environment

**PSO5:**Acquire skills for self-employment as Agripreneurs

**PSO6:**Affirm the opportunities to become an entrepreneur

### Structure of the course

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year I Sem	UBBTA20	Optional Allied Botany-I	Theory	Allied	4	4	40+60=100
I Year II Sem	UBBTB20	Optional Allied Botany-II	Theory	Allied	4	4	40+60=100
I Year I and II Sem	UBBTC20	Optional Allied Botany Practical	Practical	Allied	2	2	40+60=100
II Year III Sem	UABTA20	Allied Botany-I	Theory	Allied	4	4	40+60=100
II Year IV Sem	UABTB20	Allied Botany-II	Theory	Allied	4	4	40+60=100
II Year III and IV Sem	UABTC20	Allied Botany Practical	Practical	Allied	2	2	40+60=100
I Year I / II Sem	USBTA120 / USBTA220	Herbal therapy and Cosmetology	Theory	Skill based elective	2	2	40+60=100
I Year I / II Sem	USBTB121 / USBTB221	Horticulture	Theory	Skill based elective	2	2	40+60=100
III Year V / VI Sem	UGBTA520 / UGBTA620	Edible Mushroom Cultivation	Theory	Non- Major Elective	3	2	40+60=100
II Years IV Sem	UNEVS20	Environmental Studies	Theory	General Paper	2	2	40+60=100

### Pattern of Question Paper for Semester

#### Theory/NME- Total Marks 100

Section A (Answer ALL) -  $10 \times 2 = 20$

Section B (either OR) -  $5 \times 7 = 35$

Section C (3 out of 5) -  $3 \times 15 = 45$

#### Practical - Total Marks 60

**Practical:** 45 Marks

**Record:** 10 Marks

**Viva:** 5 Marks

#### SBE - Total Marks 60

Section A (Answer all)  $10 \times 2 = 20$

Section B (4 out of 6)  $4 \times 5 = 20$

Section C (2 out of 3)  $2 \times 10 = 20$

## SEMESTER-I& III – PAPER-1

### UBBTA20/UABTA20– OPTIONAL ALLIED BOTANY-I/ALLIED BOTANY-I

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year I Sem	UBBTA20	Optional Allied Botany-I	Theory	Allied	4	4	40+60=100
II Year III Sem	UABTA20	Allied Botany-I	Theory	Allied	4	4	40+60=100

#### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Outline the general characters, life cycle and economic importance of Algae and Fungi.
2. Distinguish the general characters of Bacteria and Virus
3. Understand the general characters and life cycle of Bryophyta, Pteridophyta and Gymnosperms.
4. Upgrade the knowledge in Cell biology and Genetics
5. Identify the pathogens and the applications of Plants in agriculture.

**H-High(3), M-Moderate(2), L-Low(1)**

#### Unit I: Algae and Fungi:

(12 hours)

1.1 General characters of Algae. (K2)

1.2 Structure, reproduction and life cycle of *Nostoc* and *Sargassum*. (K1, K3)

- 1.3 Economic importance of Algae. (K4)
- 1.4 General characters of Fungi. (K2)
- 1.5 Structure, reproduction and life cycle of *Yeast and Agaricus*. (K1, K2)
- 1.6 Economic importance of Fungi. (K3)

**Unit II: Bacteria and Virus: (12 hours)**

- 2.1 General characters of Bacteria (K2)
- 2.2 Structure and reproduction of *E.coli*. (K3)
- 2.3 Economic importance of Bacteria. (K4)
- 2.4 General characters of Viruses. (K2)
- 2.5 Structure of TMV and Bacteriophage. (K2,K3)
- 2.6 Structure of COVID-19. (K3)

**Unit III: Bryophyta, Pteridophyta and Gymnosperms: (12 hours)**

- 3.1 General characters of Bryophyta. (K1, K2)
- 3.2 Structure and life cycle of *Funaria*. (K2, K3)
- 3.3 General characters of Pteridophyta. (K1, K2)
- 3.4 Structure and life cycle of *Lycopodium*. (K2, K3)
- 3.5 General characters of Gymnosperms. (K1, K2)
- 3.6 Structure and life cycle of *Cycas*. (K3, K4)

**Unit IV: Cell Biology and Genetics: (12 hours)**

- 4.1 Ultra structure of Prokaryotic and Plant Eukaryotic cell. (K2, K3)
- 4.2 Cell organelles- Ultra structure and functions of Chloroplast, Mitochondria and Nucleus. (K2,K3)
- 4.3 Cell division- Mitosis and Meiosis (K3)
- 4.4 Genetics-Mendelism-Monohybrid and Dihybrid cross. (K1,K4)
- 4.5 Back cross, Law of dominance, Law of segregation. (K1,K3)
- 4.6 Incomplete dominance, Law of independent assortment. (K1,K2)

**Unit V: Ecology, Crop Management and Applied Botany: (12 hours)**

- 5.1 Ecosystem - structure and functions, Food chain and Food web. (K2, K3)
- 5.2 Ecological Pyramid, Adaptation of Plants- Hydrophytes, Xerophytes. (K1,K2)
- 5.3 Symptoms, causative organism and control measures of Tobacco Mosaic disease. (K3)
- 5.4 Symptoms, causative organism and control measures of Citrus canker. (K2, K3)
- 5.5 Symptoms, causative organism and control measures of Tikka disease of groundnut. (K3)
- 5.6 Biopesticides – BT, Biofertilizers in Agriculture (Azolla and BGA), Mycorrhiza. (K3)
