**SEMESTER-II& IV – PAPER-2**  
**UBBTB20 /UABTB20- OPTIONAL ALLIED BOTANY-II /ALLIED BOTANY-II**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year II Sem	UBBTB20	Optional Allied Botany-II	Theory	Allied	4	4	40+60=100
II Year IV Sem	UABTB20	Allied Botany-II	Theory	Allied	4	4	40+60=100

**Course Outcomes (CO):**

On completion of the course, the students will be able to

1. Classify Angiosperms and identify the family with the characters .
2. Identify and analyse the histology of Plants.
3. Gain knowledge on Embryology of Plants.
4. Understand the key process of Plant Physiology.
5. Integrate the knowledge of Horticulture in growing Plants.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	H	H

**H-High(3), M-Moderate(2), L-Low(1)**

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	M	H	H	H

CO3	H	M	H	H	H	H
CO4	H	M	H	H	M	H
CO5	H	M	H	H	H	H

**Unit I: Taxonomy:**

**(12 hours)**

- 1.1 Bentham and Hooker's system of classification, Nomenclature. (K2, K3)
- 1.2 Study of characters and economic importance of the family Caesalpiniaceae. (K1, K2)
- 1.3 Study of characters and economic importance of the family Rubiaceae. (K2, K3)
- 1.4 Study of characters and economic importance of the family Asclepiadaceae. (K2, K4)
- 1.5 Study of characters and economic importance of the family Amaranthaceae. (K2, K4)
- 1.6 Study of characters and economic importance of the family Liliaceae. (K1, K3)

**Unit II: Plant Anatomy:****(12 hours)**

- 2.1 Tissues- Meristematic and Permanent tissue. (K1, K2)
- 2.2 Primary structure of Dicot stem. (K1, K3)
- 2.3 Primary structure of Monocot stem. (K2, K3)
- 2.4 Primary structure of Dicot root and Monocot root. (K1,K3)
- 2.5 Primary structure of Dicot leaf. (K1,K3)
- 2.6 Primary structure of Monocot leaf. (K3)

**Unit III: Embryology:****(12 hours)**

- 3.1 Structure of mature Anther. (K2,K3)
- 3.2 Structure of Ovule. (K2,K4)
- 3.3 Types of Ovules. (K3)
- 3.4 Structure of Embryo sac. (K3)
- 3.5 Structure of Pollen grain. (K3)
- 3.6 Structure of Dicot embryo, Parthenocarpy. (K1,K3)

**Unit IV: Plant Physiology:****(12 hours)**

- 4.1 Absorption of Water. (K1,K2)
- 4.2 Transpiration. (K3,K4)
- 4.3 Photosynthesis - Light reaction, Calvin cycle. (K1,K3)
- 4.4 Respiration - Glycolysis, Fermentation, Krebs's Cycle. (K2,K3)
- 4.5 Electron transport system. (K1,K3)
- 4.6 Growth hormones - Auxins, Gibberellins and application. (K1, K3)

**Unit V: Plant propagation methods:****(12 hours)**

- 5.1 Tissue Culture-*Invitro* Culture method. (K1,K2)
- 5.2 Plant tissue culture and its applications. (K1,K3)
- 5.3 Vegetative Propagation. (K2, K3)
- 5.4 Horticulture methods – Cutting – Stem Layering-ground layering and air layering. (K2,K3)
- 5.5 Grafting- Cleft, Bark grafting. (K2,K3)
- 5.6 Terrace garden, Kitchen garden. (K3)

## SEMESTER I & II

### UBBTC20/ UABTC20- OPTIONAL ALLIED BOTANY PRACTICAL /ALLIED BOTANY PRACTICAL

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year I and II Sem	UBBTC20	Optional Allied Botany Practical	Practical	Allied	2	2	40+60=100
II Year III and IV Sem	UABTC20	Allied Botany Practical	Practical	Allied	2	2	40+60=100

#### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Identify and describe the plants in technical terms belonging to the families prescribed in the theory syllabus.
2. Distinguish and analyse the microscopic and macroscopic study of Cryptogams.
3. Examine the internal features of Dicot and Monocot- root, stem and leaf.
4. Interpret the Physiology experiments.
5. Illustrate the horticultural practices- cutting, layering and grafting.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	H	H

**H-High(3), M-Moderate(2), L-Low(1)**

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	M	H	H	H
CO2	H	M	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	M	H	H	M	H
CO5	H	M	H	H	H	H

#### 1.Taxonomy:

1.1 Describe the plants in technical terms belonging to the following families  
Caesalpiniaceae, Rubiaceae, Asclepiadaceae, Amaranthaceae and Liliaceae

## **2. Anatomy:**

- 2.1 Sectioning of Dicot and Monocot stem
- 2.2 Sectioning of Dicot and Monocot root
- 2.3 Sectioning of Dicot and Monocot leaf

## **3. Demonstration of Physiology experiments:**

- 3.1 Potato osmoscope
- 3.2 Ganong's potometer
- 3.3 Ganong's light screen experiment
- 3.4 Test tube and funnel experiment
- 3.5 Ganong's respiroscope

## **4. Observation of microscopic and macroscopic materials/photomicrographs:**

- 4.1 Algae, Fungi, Bryophyta, Pteridophyta and Gymnosperms
- 4.2 Embryology
- 4.3 Ecology
- 4.4 Cytology
- 4.5 Biotechnology
- 4.6 Horticulture.

## **Reference Books:**

- 1. Gamble, J.S.- The Flora of Presidency of Madras. Vol. I, II and III. Bishen Singh and Mahendra Pal Singh, Dehra Dun. 1919-1925.
- 2. Dr. Ashok M. Bendrea and Dr. Ashok Kumar – A text book of Practical Botany –I,II ,Rastogi Publications, New Delhi, 2009-2010.

## SEMESTER-I & II – SKILL BASED ELECTIVE

### USBTA120/ USBTA220– HERBAL THERAPY AND COSMETOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year I / II Sem	USBTA120 USBTA220	Herbal therapy and Cosmetology	Theory	Skill based elective	2	2	40+60=100

#### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Acquire knowledge in the basics of medicinal plants.
2. Get an insight into the therapeutic values of Indian system of medicine.
3. Identify the herbs and formulate herbal medicines for skin care.
4. Identify the herbs and formulate herbal medicines for hair care.
5. Evaluate the importance of herbs used in herbal cosmetics.

#### Unit I: Herbs:

(6hours)

- 1.1 Herbs – definition, division, distribution. (K2, K3)
- 1.2 Elementary knowledge of herbs. (K1)
- 1.3 Importance of Medicinal plants. (K3)
- 1.4 Role of medicinal plants in human health care. (K3)
- 1.5 Plants in folk religion – *Aegle marmelos*, *Ficus benghalensis*. (K2)
- 1.6 *Curcuma domestica* and *Sesamum indicum*. (K2,K3)

#### Unit II: Indian system of medicines:

(6hours)

- 2.1 Indian system of medicines –AYUSH - Ayurveda, Unani (K2, K3)
- 2.2 Siddha and Homeopathy (K1,K3)
- 2.3 Therapeutic values of Naturopathy (K4)
- 2.4 Traditional knowledge and utility of some medicinal plants in Tamil Nadu -*Solanum trilobatum*, *Cardiospermumhalicacabum* (K3)
- 2.5 *Vitex negundo*, *Adathoda vasica* (K2,K3)
- 2.6 *Azadirachta indica* and *Eclipta alba* (K1,K3)

#### Unit III: Skin care:

(6 hours)

- 3.1 Herbal care for facial skin ( K1, K2)
- 3.2 Formulation of face pack for dry (K2)
- 3.3 Formulation of face pack for oily skin (K2)
- 3.4 Formulation of face pack for normal skin (K3)
- 3.5 Herbal remedy for skin disorders - pimple, acne ( K3)
- 3.6 Herbal remedy for skin disorders - boiles, black heads and tans (K3, K4)

**Unit IV: Hair care:****(6 hours)**

- 4.1 Herbal care for hair (K2, K3)
- 4.2 Formulation of hair oil (K3)
- 4.3 Formulation of hair tonics (K3)
- 4.4 Herbal remedy for dandruff (K1,K4)
- 4.5 Herbal remedy for Premature greying (K3)
- 4.6 Herbal remedy for hairloss (K1,K2)

**Unit V: Herbal Cosmetics:****(6 hours)**

- 5.1 Herbal cosmetics – Meaning, advantage and disadvantage (K1, K3)
- 5.2 Preparation of Herbal shampoo (K3)
- 5.3 Herbal tooth paste (K3)
- 5.4 Herbal soap (K2,K3)
- 5.5 Role of herbs in skin care - Tulasi and Aloe vera (K2, K3)
- 5.6 Role of herbs in hair care –Henna and Coconut (K2)

**Text Books:**

1. Kumar, N.C. - An Introduction to Medical Botany, Emkay Publications, NewDelhi. 1993
2. Kapoor L.D - Hand book of Ayurvedic medicinal plants, CRC press Anes books, New Delhi, 2005

**Reference Books:**

1. Sivarajan, V.V and Balasubramaniyan, I - Ayurvedic Drugs and their Plant Sources. Oxford and IBH, New Delhi, 1994.
2. Ambaster - Wealth of India. CSIR Publications, New Delhi, 1996.
3. Herbal Cosmetics - H.Pande, Asia Pacific Business press, New Delhi.

2. <https://youtu.be/p5zb17r0f3U>
3. <https://youtu.be/arVcJITMAAtQ>
4. <https://youtu.be/c2d0UFRjlpw>
5. <https://youtu.be/eJmAY2OWrs4>

**SEMESTER-I & II-SKILL BASED ELECTIVE****USBTB121/ USBTB221– HORTICULTURE**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
I Year I / II Sem	USBTB121 USBTB221	Horticulture	Theory	Skill based elective	2	2	40+60=100

**Course Outcomes (CO):**

On completion of the course, the students will be able to,

1. Apply the principles of the cultivation of economically important horticultural crops.
2. Analyze the different methods of plant propagation in horticultural crops.
3. Evaluate the importance of floriculture in indoor gardening.
4. Plan and execute the different types of garden layouts and design.
5. Develop the skill for vegetable and fruit processing, its preservation and preparation of value added products.

**Unit I: Introduction to Horticulture:****(6hours)**

- 1.1 Importance and scope of Horticulture (K2)
- 1.2 Divisions and requirements of horticulture(K1, K2)
- 1.3 Soil types (K2)
- 1.4 Irrigation and nutrition (K3, K4)
- 1.5 Cultivation of economically important plant - Rose (K3)
- 1.6 Cultivation of economically important plant – Mango (K3)

**Unit II: Plant propagation:****(6hours)**

- 2.1 Methods of plant propagation (K2, K3)
- 2.2 Cutting- stem, root, leaf and leaf bud(K1,K3)
- 2.3 Layering - Simple, air, tip and mound (K1,K3)
- 2.4 Grafting - cleft and bark(K3)
- 2.5 Budding - chip and patch (K3)
- 2.6 Role of plant growth regulator in horticulture. (K2,K3)

**Unit III: Indoor gardening:****(6 hours)**

- 3.1 Potted plants and hanging basket (K1, K2)
- 3.2 Hydroponics (K1, K2)
- 3.3 Bonsai -Training, watering and pruning (K2)
- 3.4 Flower arrangement (K2,K3)
- 3.5 Cut flowers ( K3)
- 3.6 Flower decoration -displays, bouquets and wreaths (K3, K4)

**Unit IV: Outdoor gardening:****(6 hours)**

- 4.1 Landscaping (K2, K3)
- 4.2 Rockery and arches (K2,K3)
- 4.3 Terrace gardening (K3)
- 4.4 Kitchen gardening - plan and principles (K1,K4)
- 4.5 Classification of vegetables and fruits (K1,K3)
- 4.6 Layout for a model college garden.(K1,K2)

**Unit V: Fruits and vegetable preservation:****(6 hours)**

- 5.1 Preparation of Jam, jelly (K1, K3)
- 5.2 Preparation of squash, sauce (K2, K3)
- 5.3 Preparation of pickle, ketchup (K2)
- 5.4 Use of preservatives – chemicals, sugar (K1,K3)
- 5.5 Brim for fruits (K3)
- 5.6 Vegetable canning, bottling and levelling (K1,K2)

**Text Books:**

1. Manibushan Rao. K. - Text book of horticulture. McMillan publication. Co., New York, 1991
2. Sheela V.L - Horticulture. MJP Publishers, 1959

## SEMESTER-V & VI – NON-MAJOR ELECTIVE

### UGBTA520/ UGBTA620– EDIBLE MUSHROOM CULTIVATION

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
III Year V / VI Sem	UGBTA520 UGBTA620	Edible Mushroom Cultivation	Theory	Non- Major Elective	3	2	40+60=100

#### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Plan the cultivation of mushroom for self employment activity
2. Identify the medicinal and nutritional value of mushroom
3. Evaluate the cultivation of Oyster mushroom
4. Develop the technical skills for both cultivation and preservation of mushroom
5. Establish a commercial mushroom production Unit.

#### Unit I: Introduction to Mushroom:

(9hours)

- 1.1 Biology of edible mushroom (K2, K3)
- 1.2 *Agaricus* sp.(K1, K3)
- 1.3 *Calocybe* sp. (K3)
- 1.4 *Volvariella* sp. (K3)
- 1.5 *Pleurotus* sp. (K1, K2)
- 1.6 Scope of edible mushroom cultivation in India. (K2,K3)

#### Unit II: Medicinal and nutritional value of Mushroom:

(9hours)

- 2.1 Nutrient Profile of Mushroom- Protein, aminoacids, (K2, K3)
- 2.2 Calorific values, carbohydrates, fats, vitamins & minerals. (K1,K3)
- 2.3 Medicinal properties (K4)
- 2.4 Disease cured and prevented by the consumption of edible mushroom (K3)
- 2.5 Poisonous mushrooms(K2,K3)
- 2.6 Types of edible mushroom available in India (K3)

#### Unit III: Cultivation technology:

(9 hours)

- 3.1 Infrastructure, substrates, polythene bag, vessels, inoculation loop, low cost stove, culture rack, mushroom Unit, water sprayer, tray ( K1, K2)
- 3.2 Preparation of spawn (K1, K2)
- 3.3 Substrate preparation- Steam pasteurization, Hot water treatment (K2)
- 3.4 Mushroom bed preparation, Spawning of substrate (K2,K3)
- 3.5 Crop management- Incubation and fruit body induction, Harvesting (K3)
- 3.6 Factors influencing mushroom cultivation (K3)

**Unit IV: Preservation and value added mushroom products: (9 hours)**

- 4.1 Short term storage- Refrigeration (K2, K3)
- 4.2 Long term storage - Freezing, dry Freezing, drying, canning (K2,K3)
- 4.3 Food preparations - soup powder, pickles, chips (K3)
- 4.4 Mushroom recipes - cutlets , samosa, curry, manchurian(K1,K4)
- 4.5 Beverages (K1,K3)
- 4.6 Dietary Supplements (K1,K2)

**Unit V: Establishment of mushroom Unit: (9 hours)**

- 5.1 Plans and procedure (K1, K3)
- 5.2 Role of TIIC and DIC in promoting edible mushroom cultivation (K2, K3)
- 5.3 Research centers- National level and regional level (K2)
- 5.4 Cost benefit ratio- Marketing in India and abroad (K1,K3)
- 5.5 Export value (K2, K3)
- 5.6 Economics of a small scale model (K1,K2)

**Text Books:**

1. Marimuthu, T. - Oyster Mushroom. Department of Plant Pathology, Tamil Nadu Agricultural University, Coimbatore, 1991.
2. Pathak, V.N. and Yadav, N. - Mushroom Production and Processing Technology. Agrobios, Jodhpur, 1998.

**Reference Books:**

1. Kaul, T.N. - Introduction to mushroom science, Oxford & IBH Co., Pvt. Ltd., New Delhi, 1999.
2. Bahl, N. - Handbook on mushrooms. Oxford & IBH Publishing Co., Pvt. Ltd., 2000.
3. Philip G. Miles, Shu-Ting Chang -Mushroom biology, World Scientific, 1997.

## SEMESTER-IV

II Year- B.A / B.Sc. / B.Com / B.B.A / BCA

### UNEVS20– ENVIRONMENTAL STUDIES

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/ W	Credits	Marks
II Years IV Sem	UNEVS20	Environmental Studies	Theory	General Paper	2	2	40+60=100

#### COURSE OUTCOMES (CO):

On completion of the course, the students will be able to,

1. Gain knowledge on multidisciplinary nature of environmental studies
2. Understand the Ecosystem, its structure and function
3. Understand the conservation of biodiversity
4. Gain knowledge on Environmental pollution, causes and its effects
5. Apply the laws in prevention of environment.

#### UNIT I: Multidisciplinary nature of environmental studies: (6 hours)

- 1.1 Definition, scope and importance (K2, K3)
- 1.2 Need for public awareness (K1, K3)
- 1.3 Natural resources: Renewable and non-renewable resources (K3, K4)
- 1.4 Forest Resources: Use and over-exploitation, deforestation (K3, K4)
- 1.5 Water Resources: Use and over-utilisation of surface and ground water (K1, K2)
- 1.6 Mineral Resources: Use and exploitation, environmental effects of extracting and Food resources (K2,K3)

#### UNIT II: Ecosystem: (6 hours)

- 2.1 Concept of an ecosystem (K2, K3)
- 2.2 Structure and functions of an ecosystem (K1, K3)
- 2.3 Energy flow in the ecosystem-Water cycle and carbon cycle (K4)
- 2.4 Food chain, food web and ecological pyramids (K3)
- 2.5 Structure and functions of forest and grassland ecosystem (K2,K3)
- 2.6 Structure and functions of desert and aquatic ecosystem (K1,K3)

#### UNIT III: Biodiversity and its Conservation: (6 hours)

- 3.1 Definition: Genetic, Species, Ecosystem Diversity ( K1, K2)
- 3.2 Biogeographic classification of India (K1, K2)
- 3.3 Value of biodiversity: consumptive, productive use, social, ethical, aesthetic (K2, K4)
- 3.4 Hot spots of biodiversity, Endangered and endemic species of India (K2,K3)
- 3.5 Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts( K3, K4)
- 3.6 Conservation of biodiversity: in-situ and ex-situ (K3, K4)

#### UNIT IV: Environmental pollution: (6 hours)

- 4.1 Definition, causes, effects and control measures of air, water, soil and noise pollution (K2, K3)
- 4.2 Solid waste management: causes, effects and control measures of urban and industrial

waste (K2,K3)

4.3 Climate change, global warming, (K3)

4.4 Acid rain, ozone layer depletion (K3)

4.5 Disaster management: floods, earthquakes, cyclones, landslides (K1,K3)

4.6 Rainwater harvesting (K1,K2)

**UNIT V: Human Population and Environment:**

**(6 hours)**

5.1 Environmental acts- Environment Protection Act (1986), (K1, K3)

5.2 Air (Prevention and Control of Pollution Act 1981), Water (Prevention and Control of Pollution Act 1976 (K2, K3)

5.3 Wildlife Protection Act (1972), Forest Conservation Act (1980) (K2)

5.4 Population explosion – family welfare program (K1,K3)

5.5 Infectious diseases and Water related diseases (K2, K3)

5.6 Role of information technology in environmental conservation. (K1,K2)

**TEXT BOOKS:**

1. Dr. V. Balu – Environmental Studies. 2004.

2. N. Arumugam – Concepts of Ecology, 2014.

**REFERENCE BOOKS:**

1. Verma and Agarwal – Environmental Biology, 2015.

2. Anubha Kaushik & Kaushik .C .P(2008)-Perspectives in Environmental studies (3rd Edition )New age International publishers.

3. Environmental studies, Edition: Periyar EVR college, Trichy, Jazym Publications,Trichy, 2004.

**PATTERN OF QUESTION PAPER**

**CONTINUOUS ASSESSEMENT EXAMINATION**

**(Units I, II & III)**

**Time: 1 Hour**

**Maximum Marks: 25**

**Section - A (10 × 1 = 10 Marks)**

Answer ALL questions

(At least THREE questions from each Unit)

**Section - B (5 × 2 = 10 Marks)**

Answer any FIVE questions out of 8

(At least TWO questions from each Unit)

**Section - C (1 × 5 = 5 Marks)**

Answer any ONE question out of 3

(One questions from each Unit)

**SEMESTER EXAMINATION**  
**(Complete Syllabus)**

**Time: 2 Hour**

**Maximum Marks: 60**

**Section - A ( $30 \times 1 = 30$  Marks)**

Answer ALL questions

(SIX questions from each Unit)

**Section - B ( $5 \times 2 = 10$  Marks)**

Answer any FIVE questions out of 8

(At least ONE question from each Unit)

**Section - C ( $4 \times 5 = 20$  Marks)**

Answer any FOUR question out of 6

(At least ONE question from each Unit)

# ECONOMICS

## SEMESTER I

### UCCOB20 - BUSINESS ECONOMICS I

Year	Course Code	Title of the course	Course type	Course category	No. of Hours	Credits	Marks
I	UCCOB20	Business Economics –I	Theory	Core	5	4	40+60

#### Course Objective:

1. To familiarize the students with the basic concepts of micro economics.
2. To Make students understand the demand analysis in business applications.
3. To familiarize the students with the protection and cost structure under different stages of production.
4. To understand the pricing and output decisions under various market structure.
5. To help students understand and apply the various decision tools to understand the market

#### Course Outcome (CO):

On the successful of completion of the course, students will be able

1. To understand the concepts of demand, nature and cost of production and its relationship to business operations.
2. To apply demand analysis to relevant economic issues
3. To analyse the causes and consequences of different market conditions
4. To integrate the concept of price and output decisions of firms under various market structure.
5. To apply marginal analysis to the firm under different market conditions.

#### COs consistency with POs

CO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
1	H	H	M	M	H	H
2	H	H	H	M	H	H
3	H	H	H	H	H	H
4	H	H	H	M	M	H
5	H	H	H	H	H	H

Low – L, Medium – M, High - H

#### COURSE SYLLABUS

##### Unit I: Nature and scope of Economics

15 Hours

1. Introduction & Definition of Business Economics.
2. Nature and Scope of Business Economics.

3. Relationship with other disciplines Micro & Macro.
4. Concepts applied in Business Economics.
5. Role and responsibilities of Business Economics.
6. Objectives of Business Economics

**Unit II: Consumer Behaviour & Indifferent Curve Analysis**

**15 Hours**

1. Meaning of Utility.
2. Law of Diminishing & Marginal Utility.
3. Law of Equity- Marginal Utility.
4. Indifference Curve Analysis.
5. Indifferent Schedule.
6. Indifference Curve & Indifference Map.

**Unit III: Demand Analysis**

**15 Hours**

1. Meaning of Demand, Law of Demand.
2. Individual demand and Market demand.
3. Reasons for the downward sloping of the demand curve.
4. Types of Elasticity of Demand curve.
5. Measurement of Elasticity of demand.
6. Demand forecasting.

**Unit IV: Factors of Production**

**15 Hours**

1. Meaning of different factors of production.
2. Production Possibility Curve.
3. Law of Returns to Scale.
4. Diminishing Returns to Scale.
5. Law of variable Proportions.
6. Internal and External economics and diseconomies.

**Unit V: Cost Revenue and Supply**

**15 Hours**

1. Concept of Cost of Production.
2. Different Cost of Concept – Nominal & Real cost, Implicit and explicit cost, opportunity cost, Short- run & Long run cost, Variable cost and fixed cost, Total cost, Marginal cost, Marginal cost, Average cost.
3. Theory of cost & Break even Analysis – Profit Maximization and Sales Maximization.
4. Meaning of Supply: Functions of Supply and Classifications.
5. Cost – Output relationship.
6. Cost Control & Cost Reduction.

**TEXT BOOKS**

4	H	H	H	H	M	H
5	H	H	H	H	H	H

Low – L, Medium – M, High – H

#### Course Syllabus

##### Unit I: Market Structure

- 1.1 Meaning and types of Market Structure (K1, K2, K3, K4)
- 1.2 Perfect Competition: Features – Price and Output Determination (K1, K2, K3, K4)
- 1.3 Monopoly: Features – Price and Output Determination (K1, K2, K3, K4)
- 1.4 Price Discrimination (K1, K2, K3, K4)
- 1.5 Monopolistic Competition: Price and Output Determination (K1, K2, K3, K4)
- 1.6 Oligopoly and Duopoly market (K1, K2)

## **Unit II: Pricing Policy**

- 2.1 Meaning and Objectives of Pricing Policies (K1, K2, K3, K4, K5)
- 2.2 Meaning Determining Pricing Policies(K1, K2, K3, K4, K5)
- 2.3 Different Pricing Methods(K1, K2, K3, K4, K5)
- 2.4 Specific Pricing Problems(K1, K2, K3, K4, K5)
- 2.5 Export Prices(K1, K2, K3, K4, K5)
- 2.6 Public Pricing(K1, K2, K3, K4, K5)

## **Unit III: Factor Pricing**

- 3.1 Ricardian Theory of Rent – Quasi Rent (K1, K2, K3, K4, K5)
- 3.2 Marginal Productivity theory of Wage – Modern theory of Wage(K1, K2, K3, K4, K5)
- 3.3 Liquidity theory of Interest – Modern theory of Interest (K1, K2, K3, K4, K5)
- 3.4 Innovation theory of Profit (K1, K2, K3, K4, K5)
- 3.5 Risk theory of Profit(K1, K2, K3, K4, K5)
- 3.6 Uncertainty theory of Profit (K1, K2, K3, K4, K5)

## **Unit IV: National Income**

- 4.1 Different concepts of National Income(K1, K2, K3, K4, K5)
- 4.2 Gross National Product (GNP) & Net National Product (NNP)(K1, K2, K3, K4, K5)
- 4.3 National Income at factor cost(K1, K2, K3, K4, K5)
- 4.4 Personal Income – Disposable Income(K1, K2, K3, K4, K5)
- 4.5 Measurement of National Income(K1, K2, K3, K4, K5)
- 4.6 Difficulties of National Income (K1, K2, K3, K4, K5)

## **Unit V: Inflation and Trade cycles**

- 5.1 Meaning of Inflation (k1, k2)
- 5.2 Causes of Inflation – Types of Inflation(K1, K2, K3, K4, K5)
- 5.3 Inflationary Gap(K1, K2, K3, K4, K5)
- 5.4 Philips Curve(K1, K2, K3, K4, K5)
- 5.5 Meaning of trade cycles(K1, K2, K3, K4, K5)
- 5.6 Characteristics of trade cycles.(K1, K2, K3, K4, K5)

### **Text Books:**

4	H	H	H	H	M	H
5	H	H	H	H	H	H

(Low – L, Medium – M, High –H)

### Course Syllabus

#### Unit I: Growth and Development

(15 Hours)

- 1.1 Difference between Growth and Development (K1, K2, K3)
- 1.2 Characteristics of Underdeveloped Economy (K1, K2, K3, K4)
- 1.3 Factors determining Economic Development (K1, K2, K3, K4)
- 1.4 Obstacles to Economic Development (K1, K2, K3, K4)
- 1.5 Human Development Index (K1, K2, K3, K4)
- 1.6 Gender Development Index (K1, K2, K3, K4)

#### Unit II: Planning in India

(15 Hours)

- 2.1 Origin and Development of Planning (K1, K2, K3)
- 2.2 Types of Planning – Planning in India (K1, K2, K3)
- 2.3 History of Planning in India (K2, K3)
- 2.4 Objectives of Planning & Different Planning periods (K2, K3, K4)
- 2.5 Achievements and Failures of Planning (K1, K2, K3)
- 2.6 NITI Aayog (K2, K3, K4)

#### Unit III: Agriculture

(15 Hours)

- 3.1 Role of Agriculture in Indian Economy (K1, K2, K3)
- 3.2 Land Reforms (K2, K3)
- 3.3 Green Revolution (K2, K3, K4)
- 3.4 Agricultural Credit – Causes of Low productivity in Indian Agriculture (K2, K3, K4)
- 3.5 Agricultural Price Policy. (K2, K3, K4)
- 3.6 Food Security Act (K2, K3, K4)

#### Unit IV: Industry in India

(15 Hours)

- 4.1 Role of Industry in Indian Economy (K1, K2, K3)
- 4.2 Industrial Policy Resolution 1948, 1956 (K1, K2, K3, K4)
- 4.3 Industrial Policy Resolution 1991 (K3, K4)

- 4.4 Industrial Sickness (K3, K4)
- 4.5 Industrial Dispute (K2, K3, K4)
- 4.6 Trade Unions in India (K3, K4)

### **Unit V: Economic Reforms in India**

**(15 Hours)**

- 5.1 Liberalisation, Privatisation, Globalisation (LPG). (K1, K2, K3, K4)
- 5.2 Disinvestment Policy (K1, K2, K3)
- 5.3 Public Sector (K3, K4)
- 5.4 Private Sectors (K2, K3, K4)
- 5.5 Globalisation and its Impact on Indian Economy. (K3, K4, K5)
- 5.6 Foreign Direct Investment in India (FDP) (K3, K4)

4	H	M	M	H	M	H
5	H	H	H	H	H	H

(Low – L, Medium – M, High – H)

## **Course Syllabus**

### **Unit I: Foreign Trade**

- 1.1 Difference between Internal and External Trade or (Inter-regional versus International Trade)(K1, K2)
- 1.2 Importance of International Trade(K1, K2, K3)
- 1.3 Theories of International trade(K1, K2, K3, K4, K5)
- 1.4 Adam Smith – Ricardo(K1, K2, K3, K4, K5)
- 1.5 Haberler's theory of International Trade(K1, K2, K3, K4, K5)
- 1.6 Heckscher – Ohlin Theory(K1, K2, K3, K4, K5)

### **Unit II: Terms of Trade and Balance of Payments**

- 2.1 Different concept of Terms of trade: (Net Barter Terms of Trade-Gross Barter Trade-Income Terms of Trade)(K1, K2, K3, K4, K5)
- 2.2 Balance of Payments (BOP): Meaning – structure
- 2.3 Balance of Payments and Balance of Trade(K1, K2, K3)
- 2.4 Disequilibrium in BOP and Balance of Trade(K1, K2, K3, K4, K5)
- 2.5 Causes of disequilibrium in BOP(K1, K2, K3)
- 2.6 Measures for correcting disequilibrium(K1, K2, K3, K4)

### **Unit III: Free Trade and Protection**

- 3.1 Free Trade: Introduction to Free Trade(K1, K2, K3)
- 3.2 Case for Free Trade(K1, K2, K3)
- 3.3 Case against Free Trade(K1, K2, K3)
- 3.4 Gain of Free Trade(K1, K2, K3)
- 3.5 Introduction to protection, meaning(K1, K2, K3)
- 3.6 Arguments for and against Protection(K1, K2)

### **Unit IV: Tariff**

- 4.1 Tariff: Meaning and Types – Effects of Tariff(K1, K2)
- 4.2 Quotas: Meaning and types(K1, K2)
- 4.3 Effect of Quotas on Import –Export Management(K1, K2, K3, K4)
- 4.4 Non- Tariff: Quantitative restriction(K1, K2, K3)
- 4.5 Voluntary Export Restraints- Export procedure and Documents(K1, K2)
- 4.6 Export Finance (K1, K2, K3, K4)

### **Unit V: International Organisation**

- 5.1 IBRD (World Banks): Introduction, history, functions(K1, K2, K3)
- 5.2 IBRD Financial model and services(K1, K2, K3)
- 5.3 IMF: Introduction, history, functions, member countries, leadership(K1, K2, K3)
- 5.4 IMF: Uses, Impact, Criticism(K1, K2, K3)
- 5.5 WTO: Introduction, history, functions, Organization structure(K1, K2, K3)
- 5.6 WTO: Decision making, agreements, criticism(K1, K2, K3)

<b>4</b>	H	M	H	M	M	H
<b>5</b>	H	H	H	H	H	M

(Low– L, Medium– M, High–H)

**Course Syllabus**

**Unit I: Introduction**

**(9 Hours)**

- 1.1 Women Entrepreneurship: Meaning and Definition
- 1.2 Characteristics of entrepreneurs

- 1.3 Types of Women Entrepreneurship
- 1.4 Functions of Women Entrepreneurship
- 1.5 Evolution of Women Entrepreneurship in India
- 1.6 Role of Women Entrepreneurship

**Unit II: Opportunities and Challenges**

**(9 Hours)**

- 2.1 Women Entrepreneurs
- 2.2 Opportunities for an entrepreneurial career
- 2.3 Challenges faced by Women Entrepreneurship
- 2.4 Measures to improve Women Entrepreneurship
- 2.5 Factors influencing the Women Entrepreneurship
- 2.6 Entrepreneurial motivation concept

**Unit III: Role of financial Institutions**

**(9 Hours)**

- 3.1 SIDBI, DIC, CEDOK, RUDSETI: Objectives and Functions
- 3.2 SFC, EDIL,: Objectives and Functions
- 3.3 Long-term and short-term financing
- 3.4 Women Empowerment and Entrepreneurial Programmes
- 3.5 Women Empowerment through Entrepreneurial Programmes
- 3.6 Success Stories

**Unit IV: Government Schemes and Institutional Support**

**(9 Hours)**

- 4.1 Bharatiya Mahila Bank, Annapurna Scheme
- 4.2 Stree Shakti, Orient Mahila Vikas Yojana Scheme
- 4.3 Dena Shakti Scheme, Udyogini Scheme
- 4.4 Cent Kalyani Scheme
- 4.5 Mahila Udyam Nithi Scheme
- 4.6 Mudra yojana Scheme for Women etc.,

**Unit V: Project Identification and Formulation**

**(9 Hours)**

- 5.1 Meaning of Project
- 5.2 Project Identification, Project Selection
- 5.3 Project Formulation (Steps)
- 5.4 Significance, Contents
- 5.5 Planning Commission's Guidelines for formulating a project report
- 5.6 Specimen of a project report

**Suggested Readings:**

## SEMESTER I & II

### USECA121 - SKILL BASED ELECTIVE: STATISTICS FOR ECONOMICS

<b>Year: I Sem: I &amp; II</b>	<b>Course Code</b> USECA121	<b>Title of the Course</b> Statistics for Economics	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b>	<b>Credits</b>	<b>Marks</b> <b>100</b> 40+60
--	------------------------------------	---	----------------------------------	------------------------------------	------------	----------------	-------------------------------------

#### Unit I

- 1.1 **Introduction:** Definitions, Functions, and Importance of Statistics
- 1.2 Sources of data
- 1.3 Methods of collecting data: primary and secondary data
- 1.4 Census and Sampling: Methods of sampling
- 1.5 Classification and Tabulation of data
- 1.6 Presentation of statistical data: Diagrams and Graphs.

#### Unit II

- 2.1 **Measures of Central Tendency**
- 2.2 Properties, Merits and Demerits
- 2.3 Mean, Median
- 2.4 Geometric Mean
- 2.5 Harmonic Mean
- 2.6 Mode

#### Unit III

- 3.1 **Measures of Dispersion:** Meaning
- 3.2 Range
- 3.3 Quartile Deviation, Mean Deviation
- 3.4 Standard Deviation
- 3.5 Variance, Coefficient of variation
- 3.6 Lorenz Curve – Merits and Demerits.

#### Unit IV

- 4.1 **Correlation and Regression-** Meaning
- 4.2 Types of Correlation
- 4.3 Measurement: Karl Pearson Co-efficient of Correlation
- 4.4 Spearman's Rank correlation
- 4.5 Differences between Correlation and Regression
- 4.6 Regression equations.

## Unit V

- 5.1 **Analysis of Time Series and Index Number** – Meaning of Time Series
- 5.2 Components of Time Series
- 5.3 Index Number: Meaning, Problems in the Construction of Index Numbers
- 5.4 Methods of construction of Index Number
- 5.5 Laspeyre's Method
- 5.6 Paasche's method and Fisher's Index number.

முடியரசன் - மனத்தூய்மை (K1, K2, K3)

சுரதா - நெய்தல் நீர் (K1, K2, K3)

1.2 உரைநடை - வணக்கம் வகுப்பறையே!

முனைவர்சகோ. அ. ஆரோக்கியஜெயசீலி 1. உடலினை உறுதி செய் (K3, K4)

2. பலமும் வளமும் (K3, K4)

1.3 இலக்கிய வரலாறு - இருபதாம் நூற்றாண்டு மரபுக் கவிஞர்கள் (K3, K4)

1.4 வாழ்க்கை வரலாறு - மாயூரம் வேதநாயகம் பிள்ளை (K2, K3)

1.5 சிறுகதை - திறந்த ஜன்னல் - புதுமைப்பித்தன் (K2, K3)

1.6 இலக்கணம் - அகர வரிசைப்படுத்துதல் (K1, K2, K3)

பொது அறிவு - மொழிக் குடும்பம் (K1, K2, K3)

## அலகு - 2

(18 மணி நேரம்)

### கவிதைகள்

2.1 கண்ணதாசன்- புதியதோர் உலகு செய்வோம் (K1, K2, K3)

பட்டுக்கோட்டை கல்யாணசுந்தரம் - உயர்வும் தாழ்வும் (K1, K2, K3)

கவிக்கோ அப்துல் ரகுமான் - நான் யார்? (K1, K2, K3)

நா.காமராசன் - குழந்தை (K1, K2, K3)

இன்குலாப் - ஒரு சிலை உயிர்ப்பில்லாது (K1, K2, K3)

மு.மேத்தா - இரவல் முகங்கள் (K1, K2, K3)

2.2 உரைநடை- வணக்கம் வகுப்பறையே!

முனைவர் சகோ. அ. ஆரோக்கியஜெயசீலி 3. வளருமா தமிழ்? (K3, K4)

4. கற்றது மறவாமை (K3, K4)

2.3 இலக்கிய வரலாறு - இருபதாம் நூற்றாண்டு புதுக்கவிஞர்கள் (K3, K4)

2.4 வாழ்க்கை வரலாறு - அன்னை செசிரா (K2, K3)

2.5 சிறுகதை - செய்த கணக்கு - சி. சு. செல்லப்பா (K2, K3)

2.6 இலக்கணம் - ஒரு பொருள் குறித்த பலசொற்கள் (K1, K2, K3)

பொது அறிவு - சிறப்புப் பெயர்கள் (K1, K2, K3)

## அலகு 3

(18 மணி நேரம்)

### கவிதைகள்

3.1 சிற்பி - நள்ளிரவுத் தொலைப்பேசி (K1, K2, K3)

வைரமுத்து - எதிர்காலம் (K1, K2, K3)

அழ. வள்ளியப்பா - பறவை வரம் (K1, K2, K3)

அறிவுமதி - காதல் 10 (K1, K2, , K3)

பாலை நிலவன் - விவசாயம் செய்வது எப்படி? (K1, K2, K3)

தரிசன பிரியன் - திரு. குரல் (K1, K2, K3)

3.2 உரைநடை - வணக்கம் வகுப்பறையே!

முனைவர் சகோ. அ. ஆரோக்கியஜெயசீலி 5. முகம் பார்த்து (K3, K4)

6. ஒவ்வொரு படியாய் (K3, K4)

3.3 இலக்கிய வரலாறு - சிறுகதை இலக்கியம் (K3, K4)

3.4 வாழ்க்கை வரலாறு - கா. மு. ஷெரிப் (K2, K3)

3.5 சிறுகதை - பால் வடியும் முகம் - ஜெயகாந்தன் (K2, K3)

3.6 இலக்கணம் - சொற்பிழைகளைக் களைதல் (K1, K2, K3)

பொது அறிவு - முக்கிய நாட்கள் (K1, K2, K3)

**அலகு 4**

(18 மணி நேரம்)

**கவிதைகள்**

4.1 தமிழ்ச்சி தங்கப் பாண்டியன் - எஞ்சோட்டுப்பெண் (K1, K2, K3)

இளம்பிறை - ஆடாதோர் உண்டோ? (K1, K2, K3)

லிவிங் ஸ்மைல் வித்யா - மரணம் மட்டுமா மரணம் (K1, K2, K3)

கா.தமிழ் வேங்கை - ஞெகிழி (K1, K2, K3)

மரகதமணி - எனது இயற்கை (K1, K2, K3)

சக்தி ஜோதி - மகள், சமையலறை உலகிலிருந்து (K1, K2, K3)

4.2 உரைநடை - வணக்கம் வகுப்பறையே!

முனைவர் சகோ. அ. ஆரோக்கியஜெயசீலி 7. நின்னே போல் உள்ளன (K3, K4)

8. நம் அனைவருக்குமான இல்லம் (K3, K4)

9. கண் இமைக்காமல் (K3, K4)

4.3 இலக்கிய வரலாறு - நவீன இலக்கியத்தில் பெண் படைப்பாளிகள் (K3, K4)

4.4 வாழ்க்கை வரலாறு - மூவலூர் இராமாமிர்தம் அம்மையார் (K2, K3)

## Course Syllabus

### அலகு 1

(18 மணிநேரம்)

#### செய்யுள்

- 1.1 நற்றிணை - பாலைத்திணை (பாடல் எண் : 110) (K1, K2)  
குறுந்தொகை - நெய்தல் திணை (பாடல் எண் : 397) (K1, K2)  
குறிஞ்சித்திணை (பாடல் எண் : 143) (K1, K2)  
ஐங்குறுநூறு - மருதத்திணை (பாடல் எண்கள் : 2, 8) (K1, K2)  
அகநானூறு - பாலைத்திணை (பாடல் எண் : 173) (K1, K2)  
கலித்தொகை- முல்லைக்கலி (பாடல் எண் : 110) (K1, K2)
- 1.2 உரைநடை- கலித்தொகை காட்டும் பண்பாடு – பேரா. ம. திருமலை (K3, K4)
- 1.3 இலக்கிய வரலாறு- சங்ககாலம் – சங்ககால சிறப்பியல்புகள் (K3, K4)
- 1.4 தன்வரலாறு - முள் – முத்துமீனாள் (K3, K4)
- 1.5 இலக்கணம் - தொல்காப்பியம் அறிமுகம் (K1, K2, K3)
- 1.6 பொதுஅறிவு - TNPSC – மாதிரி வினாக்கள் - சங்க இலக்கியம் (K1, K2, K3)

### அலகு 2

(18 மணிநேரம்)

#### செய்யுள்

- 2.1 புறநானூறு - பாடாண்திணை (பாடல் எண்கள் : 35, 163) (K1, K2)  
பதிற்றுப்பத்து - ஆறாம் பத்து (பாடல் எண் : 57) (K1, K2)  
திருக்குறள் - அன்புடைமை (8), இனியவை கூறல் (10) வெகுளாமை (31),  
ஊக்கமுடைமை (60) நட்பாராய்தல் (80) (K1, K2)
- 2.2 இலக்கிய வரலாறு - எட்டுத்தொகை (K3, K4)
- 2.3 உரைநடை - மனிதனும் அழகும் – திரு.வி.கலியாணசுந்தரனார் (K3, K4)
- 2.4 தன்வரலாறு (தொடர்ச்சி) - முள் – முத்துமீனாள் (K3, K4)
- 2.5 இலக்கணம் - அகப்பொருள் (K1, K2, K3)
- 2.6 பொதுஅறிவு - TNPSC மாதிரி வினாக்கள் - சங்க இலக்கியம் (K1, K2, K3)

### அலகு 3

(18 மணிநேரம்)

#### செய்யுள்

- 3.1 நாலடியார் - பொறையுடைமை (பாடல் எண்கள் : 72,75,76) (K1, K2)  
நான்மணிக்கடிகை - பாடல் எண்கள் : 4,17,46 (K1, K2)  
இனியவை நாற்பது - பாடல் எண்கள் : 12,16,30 (K1, K2)  
பழமொழி - பாடல் எண்கள்: 40,126,111(K1, K2)

- 3.2 இலக்கிய வரலாறு - பத்துப்பாட்டு (K3, K4)  
 3.3 உரைநடை - ஒப்புரவு - டாக்டர் கா. மீனாட்சி சுந்தரம் (K3, K4)  
 3.4 குறுநாவல் - கிடை - கி. ராஜ நாராயணன் (K3, K4)  
 3.5. இலக்கணம் - ஐந்திணைகள் அறிமுகம்(K3, K4)  
 3.6 பொதுஅறிவு - TNPSC மாதிரி வினாக்கள் - அற இலக்கியம் (K1, K2, K3)

#### அலகு 4

(18 மணிநேரம்)

#### செய்யுள்

- 4.1 இன்னா நாற்பது - பாடல் எண்கள் : 23,27,32 (K1, K2)  
 ஆசாரக்கோவை - பாடல் எண்கள் : 16,18,50 (K1, K2)  
 ஏலாதி - பாடல் எண்கள் : 7, 9, 13 (K1, K2)  
 4.2 இலக்கிய வரலாறு - பதினெண் கீழ்க்கணக்கு நூல்கள் (K3, K4)  
 4.3 உரைநடை - விழிகள் உள்முகமாக - முனைவர் அப்துல் காதர்(K3, K4)  
 4.4 குறுநாவல் - கிடை - கி. ராஜ நாராயணன்(K3, K4)  
 4.5 இலக்கணம் - புறப்பொருள் விளக்கம் (K1, K2, K3)  
 4.6 பொதுஅறிவு - TNPSC மாதிரி வினாக்கள் - அற இலக்கியம்(K1, K2, K3)

#### அலகு 5

(18 மணிநேரம்)

#### செய்யுள்

- 5.1 நானாற்பது - பாடல் எண்கள் : 13,17,19(K1, K2)  
 திரிகடுகம் - பாடல் எண்கள் : 6,12, 20 (K1, K2)  
 5.2 இலக்கிய வரலாறு - பதினெண் கீழ்க்கணக்கு நூல்கள் (K3, K4)  
 5.3 உரைநடை - தொலைக்காட்சி கலாச்சாரம்- க. அ. பஞ்சாங்கம்(K3, K4)  
 5.4 குறுநாவல் - கிடை - கி. ராஜ நாராயணன்(K3, K4)  
 5.5 இலக்கணம் - தொடர்ப்பிழை (K1, K2, K3)  
 5.6 பொது அறிவு - TNPSC மாதிரி வினாக்கள் - இலக்கணம் (K1, K2, K3)

**QUESTION PAPER PATTERN**  
**PART I – HINDI**  
**SEMESTER – IV**  
**ULHND20- HINDI PAPER- IV**  
**(SHORT STORY, ONE ACT PLAY, HISTORY OF HINDI LITERATURE (MODERN PERIOD) AND GENERAL ESSAY)**

**Section – A (10x2 = 20 marks)**

Q.1- Q.3 (from One Act Play)

Q.4- Q.6 (from Short Story)

Q.7 – Q.10 (from Authors)

**Section – B (5x7= 35 marks)**

**Answer three annotations (Either or)**

Q. 11a. or 11b. }  
Q. 12a. or 12b. } Annotations from One Act Play  
Q. 13a. or 13b. }

Q. 14a. or 14b. Fill up with suitable Karak (Case - endings) (7 sentences)

Q. 15a. or 15b. Match the following: Author - Works (7)

**Section – C (3x15 = 45 marks)**

**Answer any three questions.**

Q.16. Essay from One Act Play

Q.17. Essay from Short Story

Q.18. Literary notes on 2 authors out of 4

Q.19. Essay from Devanagari Lipi

Q.20. General Essay (1 out of 3)

**SEMESTER - I**  
**ULFRA20 - FRENCH PAPER –I**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> ULFRA20	<b>Title of the Course:</b> <b>French Paper –I</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
<b>Sem: I</b>							

**COURSE OUTCOMES:**

**Course Outcomes**

<b>COs</b>	<b>Statements</b>	<b>Bloom's Level</b>
<b>CO1</b>	express self and participate in conversations on familiar topics	<b>L1</b>
<b>CO2</b>	communicate in contexts relevant to oneself, others, work place and place of study	<b>L1</b>

**SEMESTER - I**  
**ULURA20 – URDU PAPER - I**  
**PROSE, GRAMMAR & LETTER WRITING**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> ULURA20	<b>Title of the Course:</b> Prose, Grammar & Letter Writing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
--------------------------	--------------------------------	--	-------------------------------	---------------------------------	------------	---------------------	---------------------

**Course Objectives**

1. To promote students' proficiency in the basics of Urdu.
2. To accelerate their zeal to cultivate Writing Skills.
3. To strengthen their reading and receptive skills.

**Course Learning Outcomes (CLO)**

1. Students will acquire the required academic efficiency
2. They will be learning the techniques of exemplary writing.
3. They will develop ability to foster fast reading of Texts.

**Unit – I**

1. Sair Pahlay Darwesh Ki – Meer Amman Dehalvi
2. Umeed Ki Khushi – Sir Syed
3. Letter To The Principal Seeking Leave

**Unit – II**

1. Mirza Ghalib Ke Akhlaq Wa Adat – Moulana hali
2. Zubaida Khatoon – Abdul Haleem Sharar
3. Zameer Auruskikhismien
4. Letter To The Manager Of A Firm Seeking Employment

**Unit – III**

1. Noor Jhan – Mohamed Hussain Azad
2. Sawere Jo Kal Ankh Meri Khuli – Patras Bukhari
3. Sifat Auruskikhimein
4. Letter To A Publisher Of Book Seller Placing Order For Books

**Unit – IV**

1. Khud Gharaz Dost – Duputi Nazeer Ahmed
2. Sir Syed Marhoom Aur Urdu Literature – Allama Shibli
3. Letter To The Father / Guardian Asking Money For Payment Of College Fees

**Unit – V**

1. Letter To A Friend Inviting Him To Your Sister's Marriage
2. Sifat Auruskikhim
3. Fe'l Auruskikhimein
4. Lawazim-E-Isim
5. Alamat-E-Fael "Nay" Aur Alamat-E-Mafo'ol "Ko" Kequaide

**Text Books**

1. BOOK PRESCRIBED: "ADAB-E-JAMEEL"

Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam.

**SEMESTER - II**  
**ULURB20 – URDU PAPER - II**  
**MANZOOMATH, GHAZALIATH & TRANSLATION**

<b>Year:</b> I	<b>Course Code:</b> ULURB20	<b>Title of the Course:</b> Manzoomath, Ghazaliath & Translation	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
<b>Sem:</b> II							

**Course Objectives**

1. To enhance students' creative thinking.
2. To trigger the literary skills dormant in them.
3. To train them to advance their Translation Skills.

**Course Learning Outcomes (CLO)**

1. Students will be able to expand the frontiers of their creative intellect.
2. Their fascination for Literature will get doubled or tripled.
3. The translation skills will help them professionally.

**Unit – I**

1. Nagma-E-Hasrath – Akbar Allahbadi
2. Meer Taqi Meer - Hasthiapnihabbab Ki Si Hai
3. Khaja Meer Dard - Tohmaten Chand ApneZimmz Dhar Chale

**Unit – II**

1. Qaumi Geeth – Allama Iqbal
2. Shaik Ibrahim Zauq - Layihayathaayeqaza Le Chali
3. Mirza Ghalib - Dil Hi To Hai Na Sang WaKhisht

**Unit – III**

1. Nisar Main Teri Galiyon Ke – Faiz Ahmed Faiz
2. Momin Khan Momin - Adam Mein Rehthe
3. Jigar Muradabade - Dil Gaya RonaqHayathGayi

**Unit – IV**

1. Wo Nabion Mein Rahmath Laqab Pane Wala - Masaddas Hali
2. Firaq - Sar Mein Soudabhinahin
3. Kawish Badri - Az Sare Nav Fikr Ka Aaghaaz Karna Chahiye
4. A General Passage Translation from English to Urdu

**Unit – V**

1. Taj Mahal – Sahirludhyanwi
2. Shakir Naithi - Shahid Maqsood Ek Din Rubaroo Ho Jayega
3. Parveen - Chalna Ka HosalaNaye
4. A General Passage Translation from English to Urdu

**Text Books**

BOOK PRESCRIBED: “ADAB-E-JAMEEL” Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam

**SEMESTER - III**  
**ULURC20 – URDU PAPER - III**  
**AFSANA, MAZMOON NAWESI & MUKALAMA NIGARI**

<b>Year:</b> <b>I</b>	<b>Course</b> <b>Code:</b> ULURC20	<b>Title of the Course:</b> Afsana, Mazmoon Nawesi & Mukalama Nigari	<b>Course</b> <b>Type:</b> Theory	<b>Course</b> <b>Category:</b> Core	<b>H/W</b>	<b>Credits</b> <b>3</b>	<b>Marks</b>  100
--------------------------	--	---	---	---	------------	----------------------------	-------------------------

**Course Objectives**

1. To arouse interest for Non-Detailed Texts.
2. To equip them with ample knowledge to pen their own articles.
3. To instill in them a flair for translation.

**Course Learning Outcomes (CLO)**

1. Students will care more for Non-Detailed Texts on par with Detailed Texts.
2. They will sharpen necessary skills to draft essays on varied themes.
3. They will succeed in their official routine with their ability to translate.

**Unit – I**

- 1.Kafan – Prem Chand
- 2.Jamun Ka Ped – Krishan Chander

**Unit – II**

- 1.Khush Naseeb – Ali Akbar Amburi
- 2.Dard Ka Ehsas – Ameerunnisa

**Unit – III**

- 1.Bhola – Rajender Singh Bedi
- 2.Naya Qanoon – Saadath Husain Manto

**Unit – IV**

- 1.Noor-O-Nar – Ali Abbas Hussani
- 2.Aakhr Paisa Bach Hi Gaya – B.S.Ramaiya

**Unit – V**

- 1.Guldasta-E-Mazameen-O-Inshapardazi By **Mohammed Arif Khan**
2. A General Passage For Translation From Urdu To English

**Text Books**

BOOK PRESCRIBED: “ADAB-E-JAMEEL” Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam.

**SEMESTER - IV**  
**ULURD20 – URDU PAPER - IV**  
**DRAMA, RUBAYIATH & HISTORY OF URDU LITERATURE**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> ULURD20	<b>Title of the Course:</b> Drama, Rubayiath & History Of Urdu Literature	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
<b>Sem:</b> <b>IV</b>							

**Course Objectives**

1. To promote students' knowledge of various literary genres like Drama.
2. To effectuate their caliber to pen poems of their own.
3. To motivate them to build lively conversations.

**Course Learning Outcomes (CLO)**

1. Students will learn to excel in the art of reading Plays.
2. They will hoan their faculty of imagination.
3. They will emerge as exponents of good conversation.

**Unit – I**

1. Darwazakholdo-Krishan Chander [First Quarter]
2. Agoosh-E- Lihad Mein Jab Ke Sona Hoga - Anees
3. Gulshan Mein Phiroou–Anees
4. Meer Taqi Meer

**Unit – II**

1. Darwazakholdo-Krishan Chander [Second Quarter]
2. GhafLatKihansihse Aah BharnaAcha –AkberAllahbadi
3. Har Ek Se Sun NayeFasana Ham Ne – Aker Allahbadi
4. Mirza Ghalib

**Unit – III**

1. Darwazakholdo-Krishan Chander [Third Quarter]
2. Gunche Teri Zindagi Pe DilHalth Hai -- Josh
3. Gunche Teri Zindagi Pe DilHalth Hai – Josh
4. Sir Syed Ahmed Khan

**Unit – IV**

1. Darwaza kholdo-Krishan Chander [Last Quarter]
2. Mufliis Hun Na Dowlath Hai Na Sermaya Hai --Amjad
3. Is Naam Ki Zindagi Mein KuchJaan To Ho – Amjad
4. Moulana Hali
5. Prem Chand

**Unit – V**

1. Roshan Nahi Karta JalaDethe Hain –Asghar Vellori
2. DhoondaThoKithabon Mein Sadaqath Na Mili –Asghar Vellori
3. AkberAllahbadi
4. Allama Iqbal
5. Krishan Chandar

**Text Books**

----------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce mathematical applications in business and management, thereby enhancing the logical thinking of the students with regard to problem solving.
2. To train the students to apply statistical techniques in business and management, thereby enhancing the decision making skills of the students.

**Course Outcomes (CO)**

The learners will be able to

**CO1:** Apply the concept of matrices in solving business problems.

**CO2:** Analyze and demonstrate differentiation skills in economics and business.

**CO3:** Apply graphical methods to interpret statistical data.

**CO4:** Apply the statistical techniques in business.

**CO5:** Solve a range of problems using the techniques covered.

## **Course Syllabus**

### **Unit I: Matrices**

**(15 hours)**

- 1.1. Definition, Types of matrices (K1, K2, K3, K4)
- 1.2 Matrix operations, Determinant of a matrix (K1, K2, K3, K4)
- 1.3 Singular and non-singular matrices (K1, K2, K3, K4)
- 1.4 Inverse of a matrix by co-factor method (K1, K2, K3, K4)
- 1.5 Rank of a matrix (K1, K2, K3, K4)
- 1.6 Solution of system of linear simultaneous equations using Cramer's rule (K1, K2, K3, K4)

### **Unit II: Differentiation**

**(15 hours)**

- 2.1 Differentiation (K1, K2, K3, K4)
- 2.2 Derivatives of standard functions  $x^n$ ,  $e^x$ ,  $\log x$ , constant ( without proof ) (K1, K2, K3, K4)
- 2.3 Rules of differentiation ( Addition, difference, product, quotient ) (K1, K2, K3, K4)
- 2.4 Chain rule, Successive differentiation (up to second derivative) (K1, K2, K3, K4)
- 2.5 Uses: Marginal Concepts, Elasticity of demand, Increasing and decreasing functions (K1, K2, K3, K4)
- 2.6 Maxima and minima, break - even point. (K1, K2, K3, K4)

### **Unit III: Classification and Graphical Representation**

**(15 hours)**

- 3.1 Introduction, meaning of classification, chief characteristics of classification, objects of classification rules of classification (K1, K2, K3, K4)
- 3.2 Frequency distribution, individual observations (K1, K2, K3, K4)
- 3.3 Discrete frequency distributions continuous frequency distribution (K1, K2, K3, K4)
- 3.4 Frequency distribution, graph of frequency distribution (K1, K2, K3, K4)
- 3.5 Histogram (K1, K2, K3, K4)
- 3.6 Frequency polygon, frequency curve. (K1, K2, K3, K4)

### **Unit IV: Measures of Central Tendency**

**(15 hours)**

- 4.1 Arithmetic mean (K1, K2, K3, K4)
- 4.2 Median (K1, K2, K3, K4)
- 4.3 Mode (K1, K2, K3, K4)
- 4.4 Empirical formulae, Combined and Weighted arithmetic mean (K1, K2, K3, K4)
- 4.5 Geometric mean (K1, K2, K3, K4)
- 4.6 Harmonic mean. (K1, K2, K3, K4)

### **Unit V: Measures of Dispersion and Skewness**

**(15 hours)**

- 5.1 Range (K1, K2, K3, K4)
- 5.2 Quartile deviation (K1, K2, K3, K4)
- 5.3 Mean deviation (K1, K2, K3, K4)

5.4 Standard deviation (K1, K2, K3, K4)

5.5 Karl Pearson's coefficient of skewness (K1, K2, K3, K4)

5.6 Bowley's coefficient of skewness. (K1, K2, K3, K4)

CO4	H	H	M	L	M	H
CO5	H	H	H	L	H	H

**(Low - L, Medium - M, High - H)**

## Course Syllabus

### Unit I: Mathematics of Finance

(15 hours)

- 1.1 Mathematics of finance (K1, K2, K3, K4)
- 1.2 Simple and Compound interest (K1, K2, K3, K4)
- 1.3 Discount on bills (K1, K2, K3, K4)
- 1.4 Pay roll wages (K1, K2, K3, K4)
- 1.5 Commission (K1, K2, K3, K4)
- 1.6 Annuities (K1, K2, K3, K4)

### Unit II: Integration

(15 hours)

- 2.1 Integration, Indefinite integrals, Standard forms (K1, K2, K3, K4)
- 2.2 Integration of  $x^n$ ,  $\frac{1}{x}$ ,  $e^x$  (K1, K2, K3, K4)
- 2.3 Basic theorems on integration, Integration (K1, K2, K3, K4)
- 2.4 Integration by substitution ( $ax+b$ ,  $e^{ax+b}$ ,  $f'(x)/f(x)$ )(K1, K2, K3, K4)
- 2.5 Integration by partial fractions (K1, K2, K3, K4)
- 2.6 Integration by parts, Uses of Economics. (K1, K2, K3, K4)

### Unit III: Correlation and Regression

(15 hours)

- 3.1 Correlation (K1, K2, K3, K4)
- 3.2 Karl Pearson's coefficient of correlation (K1, K2, K3, K4)
- 3.3 Spearman's rank correlation (K1, K2, K3, K4)
- 3.4 Regression (K1, K2, K3, K4)
- 3.5 Simple regression equations (K1, K2, K3, K4)
- 3.6 Regression coefficients. (K1, K2, K3, K4)

### Unit IV: Index Numbers

(15 hours)

- 4.1 Various methods of construction of index numbers, Unweighted index numbers. (K1, K2, K3, K4)
- 4.2 Weighted index numbers, Quantity index numbers, Value index numbers (K1, K2, K3, K4)
- 4.3 Test of consistency of index numbers, Time reversal test, Factor reversal test (K1, K2, K3, K4)
- 4.4 Chain base and fixed base index numbers (K1, K2, K3, K4)
- 4.5 Base shifting, Consumer price index (K1, K2, K3, K4)
- 4.6 Aggregate method, Family budget method. (K1, K2, K3, K4)

### Unit V: Probability

(15 hours)

- 5.1 Permutation and Combination (K1, K2, K3, K4)
- 5.2 Trial, Event, Sample space (K1, K2, K3, K4)

- 5.3 Mutually exclusive events, Exhaustive events, Independent events (K1, K2, K3, K4)
- 5.4 Classical definition of probability, Axiomatic definition of probability (K1, K2, K3, K4)
- 5.5 Addition and multiplication theorems (without proof) (K1, K2, K3, K4)
- 5.6 Problems (K1, K2, K3, K4)

**Text Books:**

**SEMESTER – III**  
**UCBAG20 – Operations Research I**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> UCBAG20	<b>Title of the Course:</b> <b>Operations Research I</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the use of quantitative methods and techniques for effective decision making
2. To provide a detailed knowledge about mathematical, transportation and assignment models.
3. To analyse any real life system with limited constraints and depict it in a model form.
4. To examine the aspects of business and marketing with respect to operations research.

**Course Outcomes (CO)**

The learners will be able to

**CO1:** Understand and solve linear programming problems.

**CO2:** Identify and develop the operational research models such as graphical and simplex method.

**CO3:** Comprehend advanced linear programming problems using Big M method.

**CO4:** Construct and solve transportation models and assignment models.

**CO5:** Analyze and evaluate assignment models.

**(Low-L, Medium - M, High - H)**

## **Course Syllabus**

### **Unit I: Introduction and Mathematical Formulation (18 hours)**

- 1.1 Operations research: Definition (K1, K2, K3, K4)
- 1.2 Scope, Characteristics (K1, K2, K3, K4)
- 1.3 Models of operations research: Iconic (K1, K2, K3, K4)
- 1.4 Analogue, Symbolic model (K1, K2, K3, K4)
- 1.5 Linear programming (K1, K2, K3, K4)
- 1.6 Formulation. (K1, K2, K3, K4)

### **Unit II: Linear Programming (18 hours)**

- 2.1 Linear Programming: Graphical method (problems: part I) (K1, K2, K3, K4)
- 2.2 Graphical method (problems: part II) (K1, K2, K3, K4)
- 2.3 Graphical method (problems: part III) (K1, K2, K3, K4)
- 2.4 Regular simplex Method (problems: part I) (K1, K2, K3, K4)
- 2.5 Regular simplex Method (problems: part II) (K1, K2, K3, K4)
- 2.6 Regular simplex Method (problems: part III) (K1, K2, K3, K4)

### **Unit III: Linear Programming (18 hours)**

- 3.1 Linear programming: Big 'M' method (problems part I) (K1, K2, K3, K4)
- 3.2 Big 'M' method (problems part II) (K1, K2, K3, K4)
- 3.3 Big 'M' method (problems part III) (K1, K2, K3, K4)
- 3.4 Duality (problems part I) (K1, K2, K3, K4)
- 3.5 Duality (problems part II) (K1, K2, K3, K4)
- 3.6 Duality (problems part III) (K1, K2, K3, K4)

### **Unit IV: Transportation Model (18 hours)**

- 4.1 Transportation Problem (K1, K2, K3, K4)
- 4.2 Initial basic feasible solution using North West Corner rule(K1, K2, K3, K4)
- 4.3 Initial basic feasible solution using least cost method and Vogel's approximation method (K1, K2, K3, K4)
- 4.4 Degeneracy, Unbalanced Transportation problem (K1, K2, K3, K4)
- 4.5 Maximization problem(K1, K2, K3, K4)
- 4.6 Test of Optimality using MODI method (K1, K2, K3, K4)

### **Unit V: Assignment Model (18 hours)**

- 5.1 Assignment problems (K1, K2, K3, K4)
- 5.2 Minimal assignment problems (K1, K2, K3, K4)
- 5.3 Unbalanced Assignment problems (K1, K2, K3, K4)

5.4 Restricted Assignment problems (K1, K2, K3, K4)

5.5 Maximization problem in Assignment (K1, K2, K3, K4)

5.6 Maximization problems in Assignment Problems (K1, K2, K3, K4)

**Text Books:**

**SEMESTER – IV**  
**UCBAI20 – Operations Research II**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: IV</b>	UCBAI20	Operations Research - II	Theory	Core	6	6	100

**Course Objectives**

1. To improve problem solving skills of students and make them to use the skills in daily life problems
2. To improve knowledge in Sequencing Problems, Queuing theory and Network Analysis.

**Course Outcomes (CO)**

The learners will be able to

**CO1:** Utilize the concepts of Operation research in real life experiments and plan the Sequencing of jobs through machines.

**CO2:** Evaluate the critical path and project duration in CPM.

**CO3:** Compute the Probability of meeting the scheduled dates in PERT and compare CPM and PERT.

**CO4:** Acquire the solutions for Game of two players in Game theory.

**CO5:** Analyze the queuing theory for single channel problems.

CO	PSO

CO5	H	H	H	L	H	H

**(Low-L, Medium - M, High - H)**

## **Course Syllabus**

### **Unit I: Sequencing Problems (18 hours)**

- 1.1 Introduction – Definition of Sequencing (K1, K2)
- 1.2 Basic steps – Job assigning through machines (K1, K2)
- 1.3 Processing n jobs through two machines (K1, K2, K3, K4)
- 1.4 Processing n jobs through three machines (K1, K2, K3, K4)
- 1.5 Processing two jobs through m machines (K1, K2, K3, K4)
- 1.6 Processing n jobs through m machines (K1, K2, K3, K4)

### **Unit II: Network Analysis: CPM Computations (18 hours)**

- 2.1 Introduction – Network diagram representation (K1, K2)
- 2.2 Rules for constructing the network (K1, K2)
- 2.3 Numbering the events – Different time Calculation (K1, K2, K3, K4)
- 2.4 CPM representation in Tabular form (K1, K2, K3, K4)
- 2.5 Total, Independent and free float Calculations (K1, K2, K3, K4)
- 2.6 Calculation of CPM and Project duration (K1, K2, K3, K4)

### **Unit III: Network Analysis: PERT Computations (18 hours)**

- 3.1 Network diagram representation (K1, K2)
- 3.2 Basic Steps in PERT (K1, K2)
- 3.3 Difference between PERT and CPM (K1, K2, K3, K4)
- 3.4 Calculation of Critical path and Project duration (K1, K2, K3, K4)
- 3.5 Probability of meeting the scheduled dates (K1, K2, K3, K4)
- 3.6 Calculation of project duration for the scheduled dates (K1, K2, K3, K4)

### **Unit IV: Game Theory (18 hours)**

- 4.1 Introduction characteristic of Games- Definition (K1, K2)
- 4.2 Meaning for Saddle points (K1, K2)
- 4.3 Game without Saddle points (K1, K2, K3, K4)
- 4.4 Games without Saddle points – Mixed Strategy
- 4.5 Basic Steps -Dominance property (K1, K2)
- 4.6 Games problems using Dominance property (K1, K2, K3, K4)

### **Unit V: Queuing Theory (18 hours)**

- 5.1 Introduction - Meaning – Queuing theory (K1, K2)
- 5.2 Various types of Queuing Model (K1, K2)
- 5.3 Single channel Queuing theory (infinite capacity only) (K1, K2, K3, K4)
- 5.4 Different formulae (without derivation) - Concepts
- 5.5 Calculation of Single Channel systems (K1, K2, K3, K4)
- 5.6 Problems solving using Queuing theory (K1, K2, K3, K4)

**Text Books:**

1. Kalavathy. S - Operations Research, 2<sup>nd</sup> Edition - Vikas Publishing Ltd., 2002.
2. Vittal P.R. - Introduction to Operations Research, 1<sup>st</sup> Edition - Margham Publishers – 1999.

**Reference Books:**

1. Premkumar Gupta and Hira D.S. - Introduction to Operations Research, 1<sup>st</sup> Edition – S.Chand Company Ltd., 1998.

## SEMESTER – I/II

### UVEDA20 – CHRISTIAN DOCTRINE

Year:I Sem: I/II	Course Code UVEDA22	Title of the Course Christian Doctrine	Course Type Theory	Course Category	H/W 1	Credits -	Marks -
------------------------	---------------------------	--	--------------------------	--------------------	----------	--------------	------------

#### Course Objectives:

1. To make the students understand the sacred liturgy as encountering Christ at various moments.
2. To introduce to the students the signs and symbols of the liturgy in order to make them participate with greater enthusiasm.
3. To develop in the students the desire to know about the importance of the seven sacraments and their significance in their life.
4. To impart to the students the knowledge about the liturgical year and its impact in Christian life.

#### Course Learning Outcomes:

1. Able to make the students value all forms of liturgy as a means to grow in their spiritual life.
2. Active participation through the signs and symbols present in the liturgy
3. Able to perceive the significance of the Sacraments received at various moments of life
4. Imbibe the knowledge about the celebration of solemnities of Our Lord's feasts, Marian feasts and feast of the apostles and saints occurring each liturgical year.

#### Unit I: Liturgy

- 1.1 Introduction – The celebration of the Christian mysteries through liturgy
- 1.2 Liturgy in the life of the Church and the individual
- 1.3 Origin of the liturgy – Essence of every liturgy – The seven sacraments of the church – sacraments of initiation, healing, communion and mission.
- 1.4 Effect of sacraments – signs and symbols of liturgy – music in the liturgy
- 1.5 Celebration of liturgical year – Impact of Sunday liturgy – liturgy of the hours

( Refer YouCat: Q.No. 166 to 192)

#### Unit II: Sacraments of initiation: Baptism & Confirmation

- 2.1 Introduction – Meaning of Baptism – Administration of Baptism
- 2.2 Requirement for baptism – adherence of the church to infant baptism
- 2.3 Baptism, the way to Salvation – Significance of Baptism – effect of Baptism
- 2.4 Confirmation – Scripture based on Confirmation – Significance of Confirmation
- 2.5 Requirement and administration of confirmation.

( Refer YouCat: Q.No. 193 to 207)

#### Unit III: Sacrament of initiation: Holy Eucharist

- 3.1 Holy Eucharist – Institution of the Holy Eucharist – Importance of the Holy Eucharist

- 3.2 Various names of the Holy Eucharist – Essential parts of the Holy mass
- 3.3 Structure of the Holy mass – Celebration of the Holy Eucharist
- 3.4 The significance of Holy Eucharist in the Church – Tabernacle – the reverence and worship due to the Lord present in the tabernacle
- 3.5 Participation of the faithful in the Holy Eucharist – Preparation of the faithful to the Holy Eucharist – Effect of Holy Eucharist in one's life.  
(Refer YouCat: Q.No. 208 to 223)

#### **Unit IV: Sacraments of Healing: Confession**

- 4.1 Introduction – Names that indicate the sacrament of confession
- 4.2 Need for the Sacrament of reconciliation – institution of the sacrament of penance
- 4.3 Preparation for the sacrament of confession - penance
- 4.4 Essential elements of confession – Significance of examination of conscience and confession of sins
- 4.5 Authority of priest over the remission of sins – positive effects of confession  
(Refer YouCat: Q.No. 224 to 239)

#### **Unit V: Sacrament of healing: Anointing of the sick**

- 5.1 Interpretation of sickness in Old Testament – Jesus' compassion towards sick
- 5.2 Church's Mission to take care of the sick
- 5.3 Significance of Sacrament of anointing of the sick
- 5.4 Administration of the anointing of the sick – effects of the anointing of the sick
- 5.5 Viaticum – the meaning and its significance  
(Refer YouCat: Q.No. 240 to 247)

#### **Books for study:**

Michael J. Miller -YouCat – Youth Catechism of the Catholic Church with a foreword by Pope Benedict XVI, Asian Trading Corporation, Bengaluru, India (2010)

#### **Books for reference:**

Catechism of the Catholic Church –published by Theological Publications in India, New Delhi (1994)

Cyril de Souza, SDB and Thomas Kalathuveetil, SDB, Introducing the Catechism of the Catholic Church, Kristu Jyoti Publications, Bangalore (1994)

Compendium: Catechism of the Catholic Church – Vaigarai Publishing house, Dindigul, South India (2006).

Laravoire, Louis Morrow, Our Catholic Faith – Revised Edition for India, Sisters of Mary Immaculate, Krishnagar, West Bengal (2002).

Morissette Herve, C.S.C., Listen to the River, Youth Catechesis in Parables on the mysteries of Faith, The Holy Cross Fathers, Bangalore (1990)

Michael J. Walsh, Commentary on the Catechism of the Catholic church, St. Pauls' Publications, Bandra, Mumbai (1996)

## SEMESTER – III/IV

### UVEDA20 – CHRISTIAN DOCTRINE

<b>Year: II</b> <b>Sem:</b> III/IV	<b>Course Code</b> UVEDA22	<b>Title of the Course</b> Christian Doctrine	<b>Course Type</b> Theory	<b>Course Category</b>	<b>H/W</b> 1	<b>Credits</b> -	<b>Marks</b> -
--	-------------------------------	--	------------------------------	------------------------	-----------------	---------------------	-------------------

#### Course Objectives:

1. To make the students understand the element of Faith in the Trinitarian God as the basic necessity for Christian living.
2. To introduce to the students the creeds that we profess in the Holy Eucharistic celebration and difference between the apostles creed and the Nicene creed
3. To develop in the students the desire to know about the existence of the Holy Spirit from the beginning of the Church and in each one's life to guide us in the right path.
4. To impart to the students the vitality of the one Holy Catholic Church and their participation and contribution towards it for its sanctity.
5. To teach the students the Ten Commandments, its implications and its demands for Christian living.

#### Course Learning Outcomes:

1. Able to make the students value the Catholic Faith received at Baptism and to deepen it.
2. Knowing the different Creeds and profess them meaningfully acknowledging their faith in the Triune God and the teachings of the Catholic Church.
3. Able to perceive the significance of the role of the Holy Spirit, the who sanctifies us, guides us and lead us Sacraments received at various moments of life
4. Imbibe the knowledge about the Ten Commandments with its implications and demands that enable to lead a life worthy of our Christian Call.

#### Unit I: Christian Profession of Faith

- 1.1 The meaning of Faith in one's life – Expression of faith in Creed – Faith in the Trinitarian God.
- 1.2 The Apostle's Creed – The Nicene Creed
- 1.3 The belief in one God – God as truth – God as love
- 1.4 God as one, in three persons – The Trinitarian God – God as Father - Jesus, the second person of the Trinity – Holy Spirit, the third person of the Trinity
- 1.5 The World-creation of God – the theory of evolution of science - Science and spirituality.**  
**(Refer YouCat: Q.No. 25 to 48)**

#### Unit II: Faith in God, the Father, Son and Holy Spirit (Trinity)

- 2.1 Belief in One God - God as Father, Creator
- 2.2 Belief in Jesus Christ, the Only Begotten Son of God - the Christ Jesus, true God and true man
- 2.3 Death and Resurrection of Jesus - Ascension

- 2.4 Belief in the Holy Spirit - Pentecost – the outpouring of the Holy Spirit on the disciples
- 2.5 Holy Spirit in the life of the Church – Holy Spirit in my life – Each individual as the temple of the Holy Spirit  
**(Refer YouCat: Q.No. 37,71-79, 113-120)**

### **Unit III: The Holy Catholic Church**

- 3.1 Church with Christ as Head – God’s presence in the Church
- 3.2 The task of the Church – The church being the people of God
- 3.3 The Church as the Body of Christ, Bride of Christ and Temple of the Holy Spirit
- 3.4 The Church being Holy, Catholic and Apostolic Church – Relation between Jews and the Church
- 3.5 Lay Vocation – Pope, the Leader of the Church – Responsibility of Pope - Infallibility of Pope  
**(Refer YouCat: Q.No. 121-143 )**

### **Unit IV: Ten Commandments (1 – 3)**

- 4.1 Introduction – Scriptural Background of the Ten commandments – Significance of the Ten Commandments
- 4.2 The First Commandment – Worship due to God – the meaning of the First Commandment - Do’s and Don’ts of the First Commandment
- 4.3 Images and Statues in the Catholic Church – its purpose and significance
- 4.4 The Second Commandment – its meaning and implications – the sign of the cross – the significance of the name given at baptism
- 4.5 The Third Commandment – Jesus’ dealing with Sabbath day – Sunday as the Lord’s day  
**(Refer YouCat: Q.No. 348-366 )**

### **Unit V: Ten Commandments (4– 5)**

- 5.1 The Fourth Commandment – Family in God’s plan of Creation – irreplaceability of families - role of families in the Church
- 5.2 The respect due to Parents – the respect due to Children – Living the Christian Faith as a family
- 5.3 God’s precedence over family – Respect to authorities in family and in state
- 5.4 The fifth commandment – the importance of preserving one’s life and that of others – the reason for church to oppose capital punishment
- 5.5 Abortion – Sin against the 5<sup>th</sup> Commandment – Right to life and human dignity
- 5.6 Protection of physical and spiritual integrity of human being – Importance to one’s health – drugs as self-destruction – Donation of organs – Christian’s duty toward the dying  
**( Refer YouCat: Q.No. 367-399 )**

**Books for study:**

Michael J. Miller -YouCat – Youth Catechism of the Catholic Church with a foreword by Pope Benedict XVI, Asian Trading Corporation, Bengaluru, India (2010)

**Books for reference:**

Catechism of the Catholic Church –published by Theological Publications in India, New Delhi (1994)

Cyril de Souza, SDB and Thomas Kalathuveetil, SDB, Introducing the Catechism of the Catholic Church, Kristu Jyoti Publications, Bangalore (1994)

Compendium: Catechism of the Catholic Church – Vaigarai Publishing house, Dindigul, South India (2006).

Laravoire, Louis Morrow, Our Catholic Faith – Revised Edition for India, Sisters of Mary Immaculate, Krishnagar, West Bengal (2002).

Morissette Herve, C.S.C., Listen to the River, Youth Catechesis in Parables on the mysteries of Faith, The Holy Cross Fathers, Bangalore (1990)

## SEMESTER – V/VI

### UVEDA20 – CHRISTIAN DOCTRINE

Year:III Sem: V/VI	Course Code UVEDA22	Title of the Course Christian Doctrine	Course Type Theory	Course Category	H/W 1	Credits -	Marks -
--------------------------	---------------------------	--	--------------------------	--------------------	----------	--------------	------------

#### Course Objectives:

1. To make the students understand marriage as sacrament and the nature of Christian marriage
2. To instill in the students the essential elements of Christian marriage and the challenges of married life
3. To inculcate to the students the sacredness of sexuality and the sexual ethics in marriage
4. To impart to the students the pastoral and practical tips for successful married life and the ways to handle conflicts in married life.
5. To teach the students the canonical and pastoral implications of marriage and annulment procedures.

#### Course Learning Outcomes:

1. Able to make the students understand the nature of the Christian marriage as Sacrament
2. Know the essential elements of Christian marriage according to the teachings of the Catholic Church and the challenges of the married life
3. Able to perceive the sacredness of sexuality in marriage and get to know about the natural family planning.
4. Imbibe the knowledge about the canonical and pastoral implications of marriage and annulment procedures.

#### Unit I:

- 1.1 What is marriage – scriptural understanding of marriage – marriage as sacrament
- 1.2 Marriage as covenant – is Christian marriage a covenant or contract?
- 1.3 Nature of Christian marriage – purpose and properties of marriage
- 1.4 Essential elements of marriage – Conjugal love – commitment that last forever
- 1.5 Marriages in India according to various religions – Salient features of married life in India – challenges of married life in India.

#### Unit II:

- 2.1 What makes a marriage into existence – what is consent – nature and object of consent
- 2.2 Defects of consent – Diriment impediments of Marriage – Canonical form of marriage.
- 2.3 Marriage and family – the plan of God for marriage and the family
- 2.4 The role of the Christian family – pastoral care of the family in difficult cases
- 2.5 Family in personal life and society – family life in Tamil culture

### **Unit III:**

- 3.1 Sexuality and Christian marriage – a vocation to unity through sex
- 3.2 Sex in marriage – the sacrament of sexuality
- 3.3 Reproductive dimension of sex - The reproductive system of male and female
- 3.4 Natural family planning – Artificial means of Birth control – Sterilization
- 3.5 Abortion – Sexual ethics – Lust – sexual life – Chastity and sex education.

### **Unit IV:**

- 4.1 Pastoral and practical tips for a successful marriage life
- 4.2 How to handle the conflicts in married life gracefully – stages of conflicts and managing the conflicts with Christian values of forgiveness and love
- 4.3 The family that prays together stays together – benefits of couple prayer
- 4.4 Stories about couples who pray together – Life examples of faithful and committed love
- 4.5 A special intimacy – conjugal harmony and happiness.

### **Unit V:**

- 5.1 Canonical and pastoral implications of marriage
- 5.2 Canonical separation – Annulment procedures
- 5.3 Annulment and divorce – dispensations
- 5.4 Favour of faith cases – about marriage tribunal
- 5.5 Practical questions regarding marriage.

### **Books for Study and Reference:**

**John Paul II**, Apostolic Exhortation, *Familiaris consortio*, 22 November 1981, St Paul's Publication, 1982, pp. 20-26; 28-88; 108-125.

**Francis I**, Post Synodal Apostolic Exhortation, *Amorislaetitia*, 19 March 2016, Carmel International Publishing House, Kerala, India, 2016.

**SKILL BASE ELECTIVE – NCC**

**Programme Objective**

To develop character, Comradeship, Discipline, Secular Outlook, Spirit of Adventure, Sportsmanship, Ideals of Selfless service among the youth of the country

To Create a Human Resource of organized, Trained and motivated youth

To provide leadership in all walks of life and always be available for the service of the Nation

To provide a suitable environment and to motivate the youth to take up a career in the Armed Forces.

**Programme Outcome**

- ☐ PO1: Make NCC as an Important Part of the Society.
- ☐ PO2: Teach Positive Thinking and Attitude to the Youths
- ☐ PO3: Mold the Youth of the Entire Country into United, Secular And Disciplined Citizens of The Nation.
- ☐ PO4: Provide An Ideal Platform for The Youth To Showcase Their Potential In Nation Building.
- ☐ PO5: Instill Spirit of Secularism and United India by Organizing National Integration Camps All Over the Country.
- ☐ PO6: Reach Out to The Youths of Friendly Foreign Countries Through Youth Exchange Programs (YEP).

## SEMESTER I

### USNCA120 - ORGANISATIONAL TRAINING

#### Course Objective

- 1.The main object of this course is to acquaint the cadets to expand the scope of National Cadet Corps training and reach out ultimate goal of unity.
- 2.To know the origin and the conceptualization of NCC
3. To know the command and learning objective of Drill
4. To develop the in-depth knowledge on physical and mental hygiene
5. To know the preventive measures of contagious disease
6. To have an in-depth knowledge on adventure training.

#### Course Outcomes

1. Reach out to Maximum Youth through its organizational Structure
2. Gain knowledge on the organizational structure of National Cadet Corps and their training
3. Understand the problems and prospects of training in various fields
4. Increase the self-confidence , self-awareness and self-perception
5. Instills adventurous spirit and develops courage to face the challenges

H – High(3)      M – Moderate (2)      L- Low (1)

## **UNIT I(NCC Organization)**

Aims and objectives of NCC - Cardinal points of NCC-Organization of NCC – Structure – NCC staff – Training in NCC and the NCC song – incentives to cadets – incentives by the Central Government and State Government – Duties , Responsibilities and conduct by NCC cadets – NCC camps: Reece, selection of camp site, camp hygiene , camp appointments

## **UNIT II (Foot Drill Basics)**

Aims and objectives of learning the drill commands and its importance- General word of commands - Attentions-Stand at ease-Turning and inclining at the Halt – Sizing, Forming up in Three Ranks, Numbering and close order march and Dressing – Saluting at the Halt, Getting on Parade, Falling out and Dismissing- Arms Drill – Ceremonial Drill

## **UNIT III (Physical and Mental Hygiene)**

Structure and Functioning of the Human body – introduction – Skeletal and Muscular system – Classification - Personal Hygiene – introduction – important Component of Food hygiene – Sanitation – Sources of Refuse – Disposal of waste Products – Physical and Mental Hygiene

## **UNIT IV (First-Aid)**

Infectious and Contagious Diseases – Introduction – Classification – Preventive Measures - First aid in Common Medical Emergencies – injuries to internal organs – Reasoning and treatment – Burns and Scalds – Snake, Scorpion and Dog Bite – Foreign Bodies – Asphyxia – First aid in case of Electric Shocks – Insensibility or Unconsciousness – Artificial Respiration – First aid for different type of fractures.

## **UNIT V (Adventure Training)**

Introduction – Para Sailing – Parasailing Gear – Types – Safety Tips – Slithering – General information – Equipment – uses and techniques – Rock climbing – Cycling and Trekking – Trekking Gear and Tips – Safety Measures.

## **(Practical - Drill Movements)**

### **Text book:**

Study material will be provided

**Book for Reference:**

1) Pamphlets issued by the Ministry of Defense

2) DG NCC training directive.

## SEMESTER II

### USNCB220 - NATIONAL INTEGRATION AND TRAINING

#### Course Objective

1. The main objective of the course is to become a main source of National integration by making National Cadet Corps as one of the greatest cohesive force of our Nation irrespective of any caste, creed, religion or region.
2. To know about the necessity of National Integration and unity
3. To have an indepth knowledge on constitutions of India.
4. To know about the organization and working of National Disaster Management Authority
5. To develop skill related to civil defence services
6. To develop skill on Foot drill

#### Course Outcome

On completion of the course, the cadets will be able to

1. Understand the relevance of National Cadet Corps in National integration
2. Understand the importance of the fundamental rights and duties of constitution of India
3. Gain knowledge of the various types of Natural Disasters and take measures to minimize losses of all types
4. Understand its vast trained resource in Civil Defence .
5. Gain knowledge on foot drill.

CO5	M	L	M	H	H	H

H – High(3)    M – Moderate (2)    L- Low (1)

## **UNIT I (National Integration)**

Introduction – Importance – Necessity of National Integration – factors affecting National Integration – Measures - Relevance of NCC in National integration – slogans of National integration – images – Role of NCC in Nation Building – NCC and National Integration

## **UNIT II (Constitutions of India)**

Introduction – Preamble – fundamental rights and duties – Directive Principles of State policy – National Flag, National Emblem, National Anthem and National Song

Unity in Diversity – Introduction – Fundamental of unity in diversity - Heritage of India – Festivals of India – Freedom struggle and Nationalist Movement in India – End of rule of East India Company – Nationalist Movements in India

## **UNIT III (Disaster Management)**

Disaster Management – introduction – National Disaster Management Authority – Organisation of NDMA – Structure – National Disaster Response Force – Types of Disasters – Classification – Essential services and their Maintenance – Role of NCC cadets in Maintaining Essential Services – Traffic Control during Natural Disasters under police supervision – Assistance during Natural Disasters – Effects - Do's and Don'ts for NCC cadets performing disaster Management duties .

## **UNIT IV(Civil Defence )**

Civil defence – Introduction – Civil defence organisation – Civil Defence services and their duties. Fire fighting – Introduction – Causes and Prevention of Fire – Mode of Spread – Fire fighting extinguisher – Fire fighting Parties – Fire fighting Equipments

## **UNIT V (Foot Drill II)**

Marching-length of pace and time in marching in quick time and halt-slow march and halt-side pace-pace forward and to the rear-Turning on the march and wheeling-saluting on the march-Marching time-forward march and halt in quick march-Changing step-Strength of Samman guard – Guard of Honour.

**(Practical – Arms Drill )**

**Text book:**

Study material will be provided

**Book for Reference:**

- 1) Pamphlets issued by the Ministry of Defence
- 2) DG NCC training directive.

## **SEMESTER III**

### **USNCC320 - DEFENSIVE MECHANISM**

#### **Course Objective**

1. The main object of this course is to acquaint the cadets be aware of defensive Mechanism and the role of Cadets in maintaining essential trainings
2. To have a complete knowledge on basics of weapon training used by NCC cadets
- 3.To learn various skills on yogasanas
- 4.To know the art of using the field effectively and weapon
- 5.To learn the medication and administration by the nurses
- 6.To develop the skill related to obstacles.

#### **Course Outcome**

On completion of this course the cadets will be able to

1. Understand the different types of weapons and develop the quality of immediate and implicit obedience to orders
2. Gain knowledge on the functioning of a nurse, in one's own home, taking care of the establishment and reducing the intensity and the frequency of sickness to the barest minimum.
3. Demonstrate basic skills associated with yoga activities including strength, flexibility and muscular endurance.
4. Promote cardiovascular endurance, flexibility, muscular strength and endurance.
5. To develop the quality of immediate and implicit obedience to orders.

CO5	M	H	L	L	L	M

H – High(3)    M – Moderate (2)    L- Low (1)

### **UNIT I (Basics of Weapon Training)**

Characteristics of .22 Rifle – introduction - Stripping, Assembling, Cleaning and Sight Setting – Loading, Cocking and Unloading - Lying Position and Hold – Trigger Control and Firing a Shot – Range Procedure and Safety Precautions – Theory of Group and Snap Shooting – Short Range Firing (.22 Rifle), Aiming and alteration of sight - Characteristics of 7.62mm SLR and 5.56mm INSAS – Technical Data of infantry weapons

### **UNIT II (Yoga)**

Introduction – Definition – Purpose – Potential Benefits – Potential Problems - Types of Asana  
The concept of yoga – meaning and definition of Yoga- Scope of yoga – Aims and objective of yoga – Types of Yoga Asanas (Suryanamarkas (12ways) – VajaraAsanas)

### **UNIT III (Home Nursing)**

Home Nursing – Introduction – Qualities of a Good Nurse – The Roller Bandage and its application – Sick room: Preparation, Cleaning, Lighting and ventilation – Pulse, Respiration and Temperature taking and recording – Observation of the sick: signs and symptoms to be noted – Feeding a helpless patient – Medicines and their administration – Fever, infection, disinfection and specific infectious diseases – Operation: After care, Dressing of Wounds – Poisons and First Aid. Women health and sanitation.

#### **UNIT IV(Field Craft and Battle Craft)**

Introduction – Field Craft – Description of Ground – Indication of Ground – Observation and Concealment – Fundamental of Correct use of Cover - Judging distance - Introduction– Over estimation and under estimation - Indication and recognition of targets – Movements with and without Arms- Battle Craft – Field Signal – Section Formation – Fire and Movement- Section Battle Drill- Fire Control orders – Types and Conduct of Patrols

#### **UNIT V(Obstacle Training)**

Obstacle Training – Introduction – Obstacle Course – Straight balance, clear jump, Gate vault, Zig- zag balance, high wall, double ditch, right hand vault, left hand vault, ramp – Safety Measures – Benefits.

#### **(Practical – Obstacle Training)**

##### **Text book:**

Study material will be provided

##### **Book for Reference:**

- 1) Pamphlets issued by the Ministry of Defence
- 2) DG NCC training directive.

**SEMESTER IV**  
**USNCD420 - ELEMENTS OF TRAINING SKILLS**

**Course Objective**

1. The main object of this course is to appraise Cadets about various elements of training skills & enhancing the same through application of life skills.
2. To learn various types of communication
3. To have an in-depth knowledge on art of getting thing done through others.
4. To develop the skill of influencing the others
5. To learn the skill of identification among the universe
6. To learn the interview skill.

**Course Outcome**

1. Build self-confidence, self-esteem and also enable the cadets to adapt to situations and people.
2. Learn from their own experience, perceptions, insight, stories, books, parents, teachers, religion, media, culture etc.
3. Establish an agreed set of team guidelines.
4. Work in groups and teams that help alotof tolerance and time to come to conclusions and make decisions.
5. Do tasks alone and accomplish a shared task or goal together.

CO4	M	H	L	L	L	M
CO5	M	L	M	H	H	M

H – High(3)      M – Moderate (2)      L- Low (1)

## **UNIT I (Communication Skill)**

Communication skills – introduction – understanding basics of Communication – different ways of Communication – Components of Effective Communication – Common barriers to effective Communication – types – Measures

Decision making and Problem solving – Practicing decision making and Problem solving – coping with stress and emotions – stress management techniques – understanding emotions and feelings

## **Unit II (Leadership Skill)**

Leadership Traits – introduction – Types – important Leadership Traits – Indicators of Good Leadership – Development of the indicators of Good Leadership – Leadership and Motivation – Factors – Case studies – Moral values and Character Traits – Honour Code Concept - Leadership case studies.

## **Unit III (Motivational Skill)**

Motivation - discipline and duty of a good citizen – leadership Traits – Personality / Character Development – Types of Leadership – Values/ Code of Ethics – Perception – Communication Including Inter-Personal – Effect of Leadership with Historical Examples – Customs of Services – Importance of Group / Team Work

## **UNIT IV (Personality Development skill)**

Personality Development – introduction – Life skill vs other skill – concept of Life skill – use of core skills in daily life – Factors influencing Personality – Self awareness

Empathy – introduction – Empathy , Sympathy and Altruism – importance of Empathizing with others – Critical and Creative thinking – Characteristics of the creative person

## **UNITV: (Interview Skill)**

Change your Mindset – introduction – how to change your mindset – Time Management – Essentials – Time wasters – Principles – Social skills , Etiquettes and Manners – Types – how to

improve your social skills – Importance of Group/ team work - Types and characteristics of Groups – interview skills – Career counseling and counselor – Need and its importance.

**(Practical – Posture and Weapon Training)**

**Text book:**

Study material will be provided

**Book for Reference:**

- 1) Pamphlets issued by the Ministry of Defense
- 2) DG NCC training directive.

## SEMESTER V

### UGNCA520 - TECHNIQUES AND SERVICE ACTIVITIES

#### Course Objective

1. The main object of this course is to acquaint Cadets with Map Reading techniques conventional signs, bearings, uses of Service Protractor and the civic Responsibility
2. To learn the various techniques on Map
3. To learn the function of communication used in war field
4. To develop various skill related to community development programmes
5. To have an insight knowledge on various laws and Acts
6. To know the social security schemes.

#### Course Outcome

##### On completion of this course, the Cadets will be able to

1. Gain knowledge on various types of Maps and its uses by finding out their own position from map to ground and ground to map
2. Understand the quality of communication and makes people respect the view point of others.
3. To find solution to complex problems
4. Understand the implications of NGOs and their contribution to the society
5. Develop new research parks in Rural and Development Sectors

CO5	M	H	L	L	L	M

H – High(3)      M – Moderate (2)      L- Low (1)

## **UNIT I (Map Reading Techniques)**

Introduction to Map - Conventional signs – Scales and grid systems- Methods of Expressing a Scale – Topographical Forms – Technical Terms – Relief, Contour and Gradients - Cardinal points and Types of North – Magnetic Variation - Types of Bearing and uses of Service Protector – Prismatic Compass – Types - Setting a map – Finding own position- Map to Ground and Ground to Map – Night March.

## **UNIT II (Communication)**

Communication – Introduction – Importance – Methods of Communication – Types of Communications – Advantages and Disadvantages – Communication Media – RS ANPRC-25 – Characteristic of Walkie Talkie – Line Communication – Functions – Latest trends and Developments – Advantages and Disadvantages – Types of Satellites

## **UNIT III (Social Service Activities)**

Basic of social service – introduction – Methods – Types - weaker sections in the society and their needs – Classes of Society – Needs of the weaker sections – Contribution of NCC cadets – Rural Development Programmes – its need – objectives – Important Rural Development Programmes - NGOs and their role and contribution – List of Top ten NGO's in India- Community Development activities

Social evils – drug abuse – family planning – corruption – counter terrorism – eradication of illiteracy – Aids awareness programme – cancer awareness programme.

## **UNIT IV (Law and Acts)**

Right to Information Act – introduction – Right to information Act 2005 – Scope – Important Provisions of the Act

Right to Education Act – Definition – Highlights of RTE Act

Protection of Children and POSCO Act – Definition – Punishment under the Act – Methods for Reporting and Recording -

## **UNIT V( Civil Responsibilities )**

Civic Responsibilities – introduction – importance – characteristics of responsible citizen – Swatchh Bharat Abhiyan – Contribution of youth towards social welfare – Role of NCC – Social Security schemes – Types – Benefits – New social Security schemes of Government – Governments New Development initiatives – Aadhar, Digital India , BHIM Act, Make in India , Start up India, Skill India , Mudra Bank

### **(Practical – Map Reading)**

#### **Text book:**

Study material will be provided

#### **Book for Reference:**

- 1) Pamphlets issued by the Ministry of Defense
- 2) DG NCC training directive.

## SEMESTER VI

### UGNCB620 - SPECIALIZED SUBJECT IN ARMY

#### Course Objective

1. The main object of the course is to familiarize with the outline organization of infantry battalion and its salient features and to acquaint Cadets with the task and roles of Combat Support Arms and Services
2. To know the importance of the Past and renowned Generals
3. To know the commands of the Armed Forces
4. To know the essential of Environment and Ecology
5. To know the traffic duty during the disaster
6. To learn in detail the counter terrorism and poster training.

#### Course Outcome

On completion of this course, the Cadets will be able to

1. Prepare them to join in Armed Forces
2. Understand the importance of Military History and the biography of Field Marshals
3. To develop consciousness among common people to control all pollution
4. To Develop the Personality of Cadets, build their physique and understand the cadets correct postures
5. Develop the personality of cadets and make them to be more self-reliant

CO	PO1	PO2	PO3	PO4	PO5	PO6

CO5	M	H	L	L	L	M

H – High(3)      M – Moderate (2)      L- Low (1)

## **UNIT I(Military History)**

Introduction – Importance/ necessity of Studying Military History - Biography of Field Marshal K.M. CARIAPPA , Field Marshal SAM MANEKSHA and renowned Generals - Indian Army War Heroes PVC – Study of Battles of Indo- Pak War1965,1971 and Kargil 1999 – PVC Awardees.

## **UNIT II (Armed Forces)**

Basic organization of Armed Forces – Basic organization of Army – Task and role of fighting Arms, Supporting Arms – Commands of Army, Navy and Air Force – Supporting Services of Army - Task and role of Fighting Arms , supporting Arms and Services – Badges and Ranks – Honours and Awards - concept of Combined Defence services

## **UNIT III (Environment and Ecology)**

Natural Resources – Introduction – Basic information and its Types –Conservation and Management of Natural Resources – Need – Methods – Water Conservation and Rain water Harvesting – Practices for water conservation – Rain water Harvesting – Types – Waste Management – Type of Waste – Disposal and Management of Waste – Energy Conservation – Reason for increase in energy conservation – Measures.

## **UNIT IV(Disaster Management - II)**

Introduction – Traffic Control during Disaster under Police Supervision - Disaster Management during Flood/Cyclone - Disaster Management during Earth Quake - Setting up Relief Camp during Disaster Management - Assistance in Removal of Debris - Collection and Distribution of Aid Material - Message Services.

## **UNIT V (Counter Terrorism)**

Counter Terrorism – Introduction – Terrorism and Terrorist methods – History of Terrorism in India – Types – Funding – Types of Terrorist Act – Counter Terrorism measures.

Posture Training – Aims and Principles – Analysis – Causes – Balanced alignment and Exercise – Balanced Diet – Correct Standing and Exercises – Correct walking and Exercises.

**(Practical- Self Defence )**

**Text book:**

Study material will be provided

**Book for Reference:**

- 1) Pamphlets issued by the Ministry of Defense
- 2) DG NCC training directive.

**UGHIB520/UGHIB620 -Non-Major Elective: History of Indian Constitution  
SEMESTER V/VI**

<b>Year:</b> III	<b>Course Code:</b> UGHIB520/ UGHIB620	<b>Title of the Course:</b> History of Indian Constitution	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100 40+60
<b>Sem:</b> V/VI							

**Course Objectives:**

1. To help the students to understand the know the Basics of Indian Constitution and its Governance
2. To help the students to assimilate the powers and functions of the President, Vice-Prime Minister, Prime Minister and Central Council of Ministers.
3. To enable the students to know the functions of the Judiciary

**Course Learning Outcomes (CLOS):**

**After completion of the course the student will able to :**

1. Gain Knowledge on the growth of Legislatures during the British Period
2. Acquire Knowledge on the Nature & the special features of the Indian Constitution
3. Enhance Knowledge on the Rights and Duties of the Indian Constitution in the Present Situation
4. Understand the Legal Structure of Indian Political System and became the Agents of Social Change
5. Analyze the functions of the Indian Judiciary System and become the Agents of Social Change

## **Unit I:**

Historical background- Growth of Legislatures from 1773 to 1892- Minto-Morely Reforms- Mont ford reform 1919- Government of India Act 1935.

1.1.Historical Background-Growth of Legislatures from 1773 to 1892; Regulating Act of 1773- Pitt's India Act of 1784

1.2.Charter Act of 1793-Charter Act of 1813-Charter Act of 1833-Charter Act of 1853

1.3.Government of India Act of 1858-Indian Council Act of 1861-Indian Council Act of 1

1.4.Minto-Morley Reforms of 1909-Montague Chelmsford Reforms of 1919

1.5.Government of India Act of 1935.

## **Unit II:**

India Independence Act of 1947- Salient features of the Constitution- National Symbols.

2.1.Indian Independence Act of 1947-Salient features of Indian Constitution

2.2.Constituent Assembly-Preamble-

2.3.Type of the Constitution

2.4.Fundamental Rights-Fundamental Duties

2.5.National Symbols of India.

## **Unit III:**

Union Government- President- Prime Minister and the Council of Ministers- Parliament- Functions – Legislation- Ordinary Bills- Money Bills- Financial Bills

3.1.President: Powers and Functions of the President-Emergency Powers

3.2.Prime Ministers-Powers and Functions.

3.3.Council of Ministers-Ministers and their portfolios-Parliament.

3.4.Lok Sabha -Rajya Sabha-Powers and Functions of the Parliament

3.5.Legislation-Procedure for Passing a Bills-Ordinary Bills-Money Bills-Financial Bills.

## **Unit IV:**

State Government- Governor –Chief Minister- Council of Ministers- Special Category Status states of India

- 4.1 Governor-Powers and Functions of the Governor
- 4.2. Chief Minister and the Council of Ministers
- 4.3. Ministers and their Portfolios
- 4.4. State Legislative Assembly –Legislative Council
- 4.5. Special Status to States of India

**.Unit V:**

Judiciary- Supreme Court- High Courts- Judicial Review- Amendments of the Constitution .

- 5.5. Supreme Court-Its Function-Judicial Review
- 5.2. State Judiciary: High Court
- 5.3. Subordinate Courts-Amendments of the Constitution
- 5.4. Procedure for the Amendment of the Constitution
- 5.5. Simple Majority of Parliament-Special Majority of the Parliament

**Books for Study and Reference:**

1. A.C.Kapur- Constitutional History of India- S.Chand & Co. Pvt.Ltd, New Delhi-1976

<b>Year : II</b> <b>SEM :III</b>	<b>Course Code :</b> UACAA20	<b>Title Of The Course :</b> Mathematical Foundations	<b>Course Type :</b> Theory	<b>Course Category :</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 6	<b>MARKS</b> 100
-------------------------------------	---------------------------------	--	--------------------------------	----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide basic mathematical concepts required for computer applications.
2. To introduce the notion of relations and functions
3. To learn simple methods in algebra

**Course Outcomes (CO)**

The learners will be able to

**CO1:** Understand the concepts of Mathematical logic and compute operators on Symbolic logic.

**CO2:** Acquire knowledge about relations and functions.

**CO3:** Assess real life simple problems with permutation, combination and probability.

**CO4:** Know about matrices and their types.

**CO5:** Differentiate standard trigonometric functions.

## Course Syllabus

### Unit I: Symbolic logic (18 hours)

- 1.1 Symbolic logic (K1, K2, K3)
- 1.2 Logical operator (K1, K2, K3)
- 1.3 Conditional and bi-conditional operators (K1, K2, K3)
- 1.4 Converse, Inverse, Contra positive (K1, K2, K3)
- 1.5 Tautology and Contradiction (K1, K2, K3, K4)
- 1.6 Algebra of Propositions (K1, K2, K3, K4)

### Unit II: Relations and Functions (18 hours)

- 2.1 Relation (K1, K2, K3)
- 2.2 Equivalence relation (K1, K2, K3)
- 2.3 Partition, Partial order relation (K1, K2, K3, K4)
- 2.4 Functions, Inverse (K1, K2, K3, K4)
- 2.5 Composition of functions (K1, K2, K3)
- 2.6 Properties of functions (K1, K2, K3, K4)

### Unit III: Algebra (18 hours)

- 3.1 Probability (K1, K2, K3)
- 3.2 Probability (simple problems) (K1, K2, K3, K4)
- 3.3 Permutations (K1, K2, K3, K4)
- 3.4 combinations (K1, K2, K3, K4)
- 3.5 Combinatorial arguments (K1, K2, K3, K4)
- 3.6 Boolean algebra (K1, K2, K3)

### Unit IV: Matrices (18 hours)

- 4.1 Types of matrices (K1, K2, K3)
- 4.2 Matrix operations, Symmetric and skew symmetric, Hermitian and skew-Hermitian (K1, K2, K3)
- 4.3 Orthogonal and Unitary (K1, K2, K3, K4)
- 4.4 Rank of a matrix (K1, K2, K3, K4)
- 4.5 Solution of system of linear equations using matrices (K1, K2, K3, K4)
- 4.6 Cramer's rule (K1, K2, K3)

### Unit V: Differential calculus (18 hours)

- 5.1 Differentiation of standard function  $x^n$  (K1, K2, K3)
- 5.2 Differentiation of standard function  $e^x$  (K1, K2, K3)
- 5.3 Differentiation of standard function  $\log x$  (K1, K2, K3)
- 5.4 Differentiation of standard functions  $\sin x$ ,  $\cos x$ ,  $\tan x$  (K1, K2, K3)
- 5.5 Chain Rule (K1, K2, K3)
- 5.6 Successive differentiation (up to second derivative) (K1, K2, K3)

**SEMESTER – IV**  
**UACAB20 – Statistical Methods**

<b>Year: II</b>	<b>Course Code: UACAB20</b>	<b>Title of the Course: Statistical Methods</b>	<b>Course Type: Theory</b>	<b>Course Category: Core</b>	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
-----------------	-----------------------------	---	----------------------------	------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To enrich the knowledge of students on statistical methods which play a major role in computer applications
2. To demonstrate sampling techniques and to employ statistical methods of analysis to make inference

**Course Outcomes (CO)**

The learners will be able to

- CO1: Analyse the statistical data using measures of central tendency and graphs.  
 CO2: Provide an overall description of a set of data using measures of dispersion.  
 CO3: Apply the concept of regression and correlation in business problems.  
 CO4: Make decisions using hypothesis testing.  
 CO5: Apply the Chi-square test for independence as well as goodness of fit.

CO	PSO

CO4	M	H	H	H	H	L
CO5	H	H	H	M	L	H

**(Low- L, Medium - M, High - H)**

## **Course Syllabus**

### **Unit 1: Introduction of Statistics and Measurements of Central Tendency (18 hours)**

- 1.1 Definition of Statistics, Classification and Tabulation (K1, K2)
- 1.2 Graphical representation of numerical data (K1, K2, K3)
- 1.3 Formation of frequency distribution ( K1, K2, K3)
- 1.4 Mean and its types (K1, K2, K3, K4)
- 1.5 Median and its types( K1, K2, K3, K4)
- 1.6 Mode and its types ( K1, K2, K3, K4)

### **Unit II: Measures of Dispersion (18 hours)**

- 2.1 Basic definition of Measures of Dispersion (K1, K2)
- 2.2 Sums on range (K1, K2)
- 2.3 Sums on quartile deviation (K1, K2, K3)
- 2.4 Sums on Mean deviation about mean and median (K1, K2, K3, K4)
- 2.5 Sums on Standard deviation (K1, K2, K3, K4)
- 2.6 Sums on coefficient of Variation (K1, K2, K3, K4)

### **Unit III: Correlation and Regression (18 hours)**

- 3.1 Definitions of Correlation and its types (K1, K2)
- 3.2 Karl Pearson's Co-efficient of correlation (K1, K2, K3, K4)
- 3.3 Bivariate Correlation (K1, K2, K3, K4)
- 3.4 Spearman Rank Correlation (K1, K2, K3, K4)
- 3.5 Regression equations (K1, K2, K3, K4)
- 3.6 Regression Co-efficient (K1, K2, K3, K4)

### **Unit IV: Tests of Hypothesis (18 hours)**

- 4.1 Basic definition of hypothesis (K1, K2)
- 4.2 Test for single and difference between means (K1, K2, K3, K4)
- 4.3 Test for single standard deviation and difference standard deviation (K1, K2, K3, K4)
- 4.4 Test for small correlation coefficient (K1, K2, K3, K4)
- 4.5 Small samples-Test for single and difference between means (K1, K2, K3, K4)
- 4.6 Paired t-test (K1, K2, K3, K4)

### **Unit V: Chi-Square Test and Goodness of Fit (18 hours)**

- 5.1 Definitions of Chi-Square test (K1, K2)
- 5.2 Properties (K1, K2)
- 5.3 Sums on Chi-Square test (K1, K2, K3, K4)
- 5.4 Goodness of Fit (K1, K2, K3, K4)
- 5.5 Contingency table (K1, K2, K3, K4)
- 5.6 Test for Independence of Attributes (K1, K2)

**Text Book:**

**Course Objectives**

1. To introduce the basic concepts of matrices
2. To improve problem solving skills in Trigonometry
3. To introduce various methods to solve equations
4. To introduce differential and integral calculus

**Course Outcomes (CO)**

The learners will be able to

**CO1:** Understand the basic concepts of matrices

**CO2:** Apply the theory of equations and find roots using Newton’s and Horner's method.

**CO3:** Acquire problem solving skills in trigonometry.

**CO4:** Compute radius of curvature, centre of curvature, evolutes and involutes.

**CO5:** Apply the techniques of integral calculus.

## Course Syllabus

### Unit I: Matrices

(18 hours)

- 1.1 Symmetric, Skew symmetric, Hermitian, Skew Hermitian (K1, K2, K3, K4)
- 1.2 Orthogonal, Unitary matrices (K1, K2, K3, K4)
- 1.3 Eigen values and Eigen vectors (K1, K2, K3, K4)
- 1.4 Cayley-Hamilton Theorem (without proof) (K1, K2, K3, K4)
- 1.5 Verification and computation of inverse (K1, K2, K3, K4)
- 1.6 Diagonalisation of a matrix (K1, K2, K3, K4)

### Unit II: Theory of Equations

(18 hours)

- 2.1 Polynomial equations (K1, K2, K3, K4)
- 2.2 Irrational roots – Complex roots (K1, K2, K3, K4)
- 2.3 Reciprocal equations (K1, K2, K3, K4)
- 2.4 Descarte's Rule of signs (K1, K2, K3, K4)
- 2.5 Approximation of roots of polynomial equation by Newton's method (K1, K2, K3, K4)
- 2.6 Horner's methods (K1, K2, K3, K4)

### Unit III: Trigonometry

(18 hours)

- 3.1 Expansions of  $\sin n\theta$ ,  $\cos n\theta$ ,  $\tan n\theta$  (K1, K2, K3, K4)
- 3.2 Expansions of  $\sin n\theta$ ,  $\cos n\theta$ ,  $\tan n\theta$  (continued) (K1, K2, K3, K4)
- 3.3 Expansion of  $\sin^n \theta$ ,  $\cos^n \theta$  (K1, K2, K3, K4)
- 3.4 Expansions of  $\sin \theta$ ,  $\cos \theta$ ,  $\tan \theta$  in terms of  $\theta$  (K1, K2, K3, K4)
- 3.5 Expansions of  $\sin \theta$ ,  $\cos \theta$ ,  $\tan \theta$  in terms of  $\theta$  (continued) (K1, K2, K3, K4)
- 3.6 Logarithm of a complex number (K1, K2, K3, K4)

### Unit IV: Differential Calculus

(18 hours)

- 4.1 Curvature (K1, K2, K3, K4)
- 4.2 Radius of curvature in Cartesian Coordinates (K1, K2, K3, K4)
- 4.3 Polar Coordinates, (K1, K2, K3, K4)
- 4.4 p-r equations (K1, K2, K3, K4)
- 4.5 Evolutes (K1, K2, K3, K4)
- 4.6 Involute (K1, K2, K3, K4)

### Unit V: Integral Calculus

(18 hours)

- 5.1 Integration by parts (K1, K2, K3, K4)
- 5.2 Bernoulli's formula (K1, K2, K3, K4)
- 5.3 Reduction formulae  $\sin^n x$  (K1, K2, K3, K4)
- 5.4 Reduction formulae  $\cos^n x$  (K1, K2, K3, K4)
- 5.5 Reduction formulae  $\tan^n x$ ,  $\operatorname{cosec}^n x$  (K1, K2, K3, K4)
- 5.6 Reduction formulae  $\sec^n x$ ,  $\cot^n x$  (K1, K2, K3, K4)

-----------------------------	----------------------------------	---	---------------------------------	-------------------------------------	------------------	----------------------	----------------------

**Course Objectives**

1. To introduce concepts of vector calculus
2. To teach methods of solving partial differential equations
3. To introduce Laplace transforms and Fourier Series

**Course Outcomes (CO)**

The learners will be able to

- CO1.** Understand the use of vector calculus in science and engineering.  
**CO2.** Understand the applications of Green’s, Gauss divergence and Stoke’s Theorems.  
**CO3.** Find the complete, singular and general integral of partial differential equations.  
**CO4.** Understand the basic concepts of Laplace Transforms.  
**CO5.** Determine the nature of the Fourier series and find its coefficients

## Course Syllabus

### Unit I: Differentiation of vectors

(18 hours)

- 1.1 Scalar and vector point functions (K1, K2, K3, K4)
- 1.2 Differentiation of vectors (K1, K2, K3, K4)
- 1.3 Differential operators (K1, K2, K3, K4)
- 1.4 Directional derivatives (K1, K2, K3, K4)
- 1.5 Gradient (K1, K2, K3, K4)
- 1.6 Divergence and Curl (K1, K2, K3, K4)

### Unit II: Integration of vectors

(18 hours)

- 2.1 Line Integral (K1, K2, K3, K4)
- 2.2 Surface Integral (K1, K2, K3, K4)
- 2.3 Volume Integral (K1, K2, K3, K4)
- 2.4 Green's theorem statement and application (K1, K2, K3, K4)
- 2.5 Gauss's theorem statement and application (K1, K2, K3, K4)
- 2.6 Stoke's theorem statement and application (K1, K2, K3, K4)

### Unit III: Partial Differential Equations

(18 hours)

- 3.1 Formation of Partial Differential equations by eliminating arbitrary constants (K1, K2, K3, K4)
- 3.2 Formation of Partial Differential equations by eliminating arbitrary functions (K1, K2, K3, K4)
- 3.3 Solutions of standard types of first order differential equations –  $f(p,q) = 0$  (K1, K2, K3, K4)
- 3.4 Solution of  $f(x,p,q) = 0$ ;  $f(y,p,q) = 0$ ;  $f(z,p,q) = 0$  (K1, K2, K3, K4)
- 3.5 Solution of  $f_1(x,p) = f_2(y,q)$  (K1, K2, K3, K4)
- 3.6 Solution of  $z = px+qy+f(p,q)$  (K1, K2, K3, K4)

### Unit IV: Laplace Transformations

(18 hours)

- 4.1 Definition of Laplace transforms (K1, K2, K3, K4)
- 4.2 Laplace transforms of standard functions (K1, K2, K3, K4)
- 4.3 Laplace transforms – problems (K1, K2, K3, K4)
- 4.4 Laplace transforms – problems (continued) (K1, K2, K3, K4)
- 4.5 Inverse Laplace Transforms (K1, K2, K3, K4)
- 4.6 Solving ordinary differential equations of second order with constant coefficients using Laplace transforms (K1, K2, K3, K4)

### Unit V: Fourier Series

(18 hours)

- 5.1 Definition of Fourier series (K1, K2, K3, K4)
- 5.2 Fourier series –Problems (K1, K2, K3, K4)
- 5.3 Finding Fourier coefficients for a given periodic function with period  $2\pi$  (K1, K2, K3, K4)

- 5.4 Odd functions (K1, K2, K3, K4)
- 5.5 Even function (K1, K2, K3, K4)
- 5.6 Half range series.(K1, K2, K3, K4)

**Text Book:**

**SEMESTER - I**  
**ULURA20 – URDU PAPER - I**  
**PROSE, GRAMMAR & LETTER WRITING**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> ULURA20	<b>Title of the Course:</b> Prose, Grammar & Letter Writing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
<b>Sem:</b> <b>I</b>							

**Course Objectives**

1. To promote students' proficiency in the basics of Urdu.
2. To accelerate their zeal to cultivate Writing Skills.
3. To strengthen their reading and receptive skills.

**Course Learning Outcomes (CLO)**

1. Students will acquire the required academic efficiency
2. They will be learning the techniques of exemplary writing.
3. They will develop ability to foster fast reading of Texts.

**Unit – I**

1. Sair Pahlay Darwesh Ki – Meer Amman Dehalvi
2. Umeed Ki Khushi – Sir Syed
3. Letter To The Principal Seeking Leave

**Unit – II**

1. Mirza Ghalib Ke Akhlaq Wa Adat – Moulana hali
2. Zubaida Khatoon – Abdul Haleem Sharar
3. Zameer Auruskikhismien
4. Letter To The Manager Of A Firm Seeking Employment

**Unit – III**

1. Noor Jhan – Mohamed Hussain Azad
2. Sawere Jo Kal Ankh Meri Khuli – Patras Bukhari
3. Sifat Auruskikhimein
4. Letter To A Publisher Of Book Seller Placing Order For Books

**Unit – IV**

1. Khud Gharaz Dost – Duputi Nazeer Ahmed
2. Sir Syed Marhoom Aur Urdu Literature – Allama Shibli
3. Letter To The Father / Guardian Asking Money For Payment Of College Fees

**Unit – V**

1. Letter To A Friend Inviting Him To Your Sister's Marriage
2. Sifat Auruskikhim
3. Fe'l Auruskikhimein
4. Lawazim-E-Isim
5. Alamat-E-Fael "Nay" Aur Alamat-E-Mafo'ol "Ko" Kequaide

**Text Books**

1. BOOK PRESCRIBED: "ADAB-E-JAMEEL"

Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam.

**SEMESTER - II**  
**ULURB20 – URDU PAPER - II**  
**MANZOOMATH, GHAZALIATH & TRANSLATION**

<b>Year:</b> <b>I</b>	<b>Course</b> <b>Code:</b>	<b>Title of the Course:</b>	<b>Course</b> <b>Type:</b>	<b>Course</b> <b>Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem:</b> <b>II</b>	ULURB20	Manzoomath, Ghazaliath & Translation	Theory	Core		3	100

**Course Objectives**

1. To enhance students' creative thinking.
2. To trigger the literary skills dormant in them.
3. To train them to advance their Translation Skills.

**Course Learning Outcomes (CLO)**

1. Students will be able to expand the frontiers of their creative intellect.
2. Their fascination for Literature will get doubled or tripled.
3. The translation skills will help them professionally.

**Unit – I**

1. Nagma-E-Hasrath – Akbar Allahbadi
2. Meer Taqi Meer - Hasthiapnihabbab Ki Si Hai
3. Khaja Meer Dard - Tohmaten Chand Apne Zimmz Dhar Chale

**Unit – II**

1. Qaumi Geeth – Allama Iqbal
2. Shaik Ibrahim Zauq - Layihayathaayeqaza Le Chali
3. Mirza Ghalib - Dil Hi To Hai Na Sang WaKhisht

**Unit – III**

1. Nisar Main Teri Galiyon Ke – Faiz Ahmed Faiz
2. Momin Khan Momin - Adam Mein Rehthe
3. Jigar Muradabade - Dil Gaya Ronaq Hayath Gayi

**Unit – IV**

1. Wo Nabion Mein Rahmath Laqab Pane Wala - Masaddas Hali
2. Firaq - Sar Mein Soudabhinahin
3. Kawish Badri - Az Sare Nav Fikr Ka Aaghaaz Karna Chahiye
4. A General Passage Translation from English to Urdu

**Unit – V**

1. Taj Mahal – Sahirludhyanwi
2. Shakir Naithi - Shahid Maqsood Ek Din Rubaroo Ho Jayega
3. Parveen - Chalna Ka Hosala Naye
4. A General Passage Translation from English to Urdu

**Text Books**

BOOK PRESCRIBED: “ADAB-E-JAMEEL” Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam

**SEMESTER - III**  
**ULURC20 – URDU PAPER - III**  
**AFSANA, MAZMOON NAWESI & MUKALAMA NIGARI**

<b>Year:</b> <b>I</b>	<b>Course</b> <b>Code:</b> ULURC20	<b>Title of the Course:</b> Afsana, Mazmoon Nawesi & Mukalama Nigari	<b>Course</b> <b>Type:</b> Theory	<b>Course</b> <b>Category:</b> Core	<b>H/W</b>	<b>Credits</b> <b>3</b>	<b>Marks</b>  100
--------------------------	--	---	---	---	------------	----------------------------	-------------------------

**Course Objectives**

1. To arouse interest for Non-Detailed Texts.
2. To equip them with ample knowledge to pen their own articles.
3. To instill in them a flair for translation.

**Course Learning Outcomes (CLO)**

1. Students will care more for Non-Detailed Texts on par with Detailed Texts.
2. They will sharpen necessary skills to draft essays on varied themes.
3. They will succeed in their official routine with their ability to translate.

**Unit – I**

- 1.Kafan – Prem Chand
- 2.Jamun Ka Ped – Krishan Chander

**Unit – II**

- 1.Khush Naseeb – Ali Akbar Amburi
- 2.Dard Ka Ehsas – Ameerunnisa

**Unit – III**

- 1.Bhola – Rajender Singh Bedi
- 2.Naya Qanoon – Saadath Husain Manto

**Unit – IV**

- 1.Noor-O-Nar – Ali Abbas Hussani
- 2.Aakhr Paisa Bach Hi Gaya – B.S.Ramaiya

**Unit – V**

- 1.Guldasta-E-Mazameen-O-Inshapardazi By **Mohammed Arif Khan**
2. A General Passage For Translation From Urdu To English

**Text Books**

BOOK PRESCRIBED: “ADAB-E-JAMEEL” Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam.

**SEMESTER - IV**  
**ULURD20 – URDU PAPER - IV**  
**DRAMA, RUBAYIATH & HISTORY OF URDU LITERATURE**

<b>Year:</b> <b>I</b>	<b>Course Code:</b> ULURD20	<b>Title of the Course:</b> Drama, Rubayiath & History Of Urdu Literature	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b>	<b>Credits</b> 3	<b>Marks</b> 100
<b>Sem:</b> <b>IV</b>							

**Course Objectives**

1. To promote students' knowledge of various literary genres like Drama.
2. To effectuate their caliber to pen poems of their own.
3. To motivate them to build lively conversations.

**Course Learning Outcomes (CLO)**

1. Students will learn to excel in the art of reading Plays.
2. They will hoan their faculty of imagination.
3. They will emerge as exponents of good conversation.

**Unit – I**

1. Darwazakholdo-Krishan Chander [First Quarter]
2. Agoosh-E- Lihad Mein Jab Ke Sona Hoga - Anees
3. Gulshan Mein Phiroou–Anees
4. Meer Taqi Meer

**Unit – II**

1. Darwazakholdo-Krishan Chander [Second Quarter]
2. GhafLatKihansihse Aah BharnaAcha –AkberAllahbadi
3. Har Ek Se Sun NayeFasana Ham Ne – Aker Allahbadi
4. Mirza Ghalib

**Unit – III**

1. Darwazakholdo-Krishan Chander [Third Quarter]
2. Gunche Teri Zindagi Pe DilHalth Hai -- Josh
3. Gunche Teri Zindagi Pe DilHalth Hai – Josh
4. Sir Syed Ahmed Khan

**Unit – IV**

1. Darwaza kholdo-Krishan Chander [Last Quarter]
2. Mufliis Hun Na Dowlath Hai Na Sermaya Hai --Amjad
3. Is Naam Ki Zindagi Mein KuchJaan To Ho – Amjad
4. Moulana Hali
5. Prem Chand

**Unit – V**

1. Roshan Nahi Karta JalaDethe Hain –Asghar Vellori
2. DhoondaThoKithabon Mein Sadaqath Na Mili –Asghar Vellori
3. AkberAllahbadi
4. Allama Iqbal
5. Krishan Chandar

**Text Books**

1. BOOK PRESCRIBED: “ADAB-E-JAMEEL” Published by Dept. of Urdu, C. Abdul Hakeem College, Melvisharam.

## SEMESTER – I/II

### UVEDA20 – VALUE EDUCATION

Year:I Sem: I/II	Course Code UVEDA22	Title of the Course Value Education	Course Type Theory	Course Category	H/W 1	Credits -	Marks -
------------------------	---------------------------	---	--------------------------	--------------------	----------	--------------	------------

#### Course Objectives:

1. To understand good manners and etiquette
2. To identify their goals in life
3. Able to differentiate between love and infatuation

#### Course Outcomes

1. To develop good manners and learn to respect others.
2. To improve self-esteem and to set goals.
3. To enhance their emotional intelligence and to know about their importance.

## **E) PROGRAMME OUTCOMES (PO)**

**PO1:**Attain knowledge and understand the principles and concepts in the respective discipline.

**PO2:**Acquire and apply analytical, critical and creative thinking, and problem-solving skills

**PO3:**Effectively communicate general and discipline-specific information, ideas and opinions.

**PO4:**Appreciate biodiversity and enhance eco-consciousness for sustainable development of the society

**PO5:**Emulate positive social values and exercise leadership qualities and team work.

**PO6:**Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

## F) PROGRAMME S OUTCOMES (PSO)

### PSO1: Disciplinary knowledge

- i. Define major concepts in psychology and explain the theoretical perspectives of the fields in Psychology.
- ii. Capability of demonstrating comprehensive knowledge of Psychology and understanding of one or more disciplines which form a part of the undergraduate programme of study.

### PSO2: Problem solving

Ability to handle various life situations confidently and competently.

### PSO3: Self-directed learning

Ability to work independently and do in-depth study of various concepts of Psychology.  
Learn independently through self-reflection and evaluation of one's strengths and weaknesses

### PSO4: Employability Skills

Ability to gain employment and be successful in their chosen occupation which benefits the recipients, the workforce, the community and themselves.

### PSO5: Research-related skills

- i. Capability for inquiring about appropriate questions relating to the concepts in various fields of Psychology.
- ii. To know about the advances in various branches of Psychology

### PSO6: Communication skills

- i. Developing an understanding of the growing discipline of psychology and developing necessary skills to be effective in her communicative skills.
- ii. Use effective and fluent written, oral and visual communication to convey ideas and concept

I/I	UCPYA20	General psychology - I	Theory	Core	5	5	40+60=100

**OBJECTIVE:** To introduce students to the basic concepts of the field of psychology with an emphasis on applications of psychology in everyday life.

**COURSE OUTCOMES (CO):**

On completion of the course, the students will be able to:

- Understand the origin of psychology as science and acquire knowledge of the various scientific methods used in psychology to understand human behaviour
- Define the concepts and explain sensation, perception and attention
- Demonstrate the structural features of Consciousness
- Explain the role of Learning, and compare the various theories of learning
- To understand the fundamental processes of Memory

CO 5	L	M	H	M	M	M

**UNIT I:****[18 Hours]**

- 1.1 Psychology - Definition – Goals (K1,K2)
- 1.2 Pseudo psychology(K1,K2,K3)
- 1.3 The History of Psychology – Schools - Modern Perspectives – Psychology in India(K1,K2,K3,K4)
- 1.4 Psychology: The Science – Methods: Introspection – Observation – Survey – Experiment Case Study – Correlation Research(K1,K2,K3,K4)
- 1.5 Scope of Psychology - Branches of basic Psychology (K1,K2,K3,K4)
- 1.6 Branches of applied Psychology(K1,K2,K3)

**UNIT II:****[18 Hours]**

- 2.1 Sensation: Meaning – Psychophysics -Thresholds – Weber’s Law – Adaptation (K1,K2,K3,K4)
- 2.2 Basic sensation: Vision – Hearing – Touch and other Skin senses – Olfaction- Gustation (K1,K2,K3,K4)
- 2.3 Kinesthetic sense – Vestibular sense (K1,K2,K3,K4)
- 2.4 Perception: Meaning– Organizing principles of perception –Constancies-Pattern perception, Distance perception- Errors in Perception - Illusion – Types; Hallucinations – Types(K1,K2,K3,K4)
- 2.5 Extra Sensory Perception. - Factors that influence perception – Depth perception (K2,K3,K4)
- 2.6 Attention: Meaning – Types – Determinants(K2,K3,K4)

**UNIT III:****[18Hours]**

- 3.1 Consciousness - States of Consciousness: Consciousness – Definition –Types(K1,K2,K3)
- 3.2 Natural State of Consciousness: Biological Rhythms – Circadian Rhythms(K1,K2,K3,K4)
- 3.3 Waking States of Consciousness – Sleep – Functions – Stages –(K1,K2,K3,K4)
- 3.4 Sleep Disorders – Dream – Theories. (K2,K3,K4)
- 3.5 Altered States of Consciousness: meaning – Hypnosis – Use of Drugs – Meditation (K1,K2,K3,K4)
- 3.6 Other Altered States. Sensory deprivation: Near death Experience- Lucid dreaming(K1,K2,K3,K4)

**UNIT IV:****[18 Hours]**

- 4.1 Learning: Definition – Nature(K1,K2,K3,K4)
- 4.2 Association Learning: Classical Conditioning – Basic Principles(K1,K2,K3,K4)
- 4.3 Operant Conditioning – Basic Principles – Reinforcement – Types (K2,K3)
- 4.4 Punishment – Types(K2,K3,K4)
- 4.5 Schedules of Reinforcement – Shaping – Learned Helplessness; Similarities and Differences between Classical Conditioning and Operant Conditioning(K1,K2,K3,K4)
- 4.6 Social and Cognitive Learning: Latent Learning – Insight Learning – Observational Learning(K1,K2,K3,K4)

**UNIT V:****[18 Hours]**

5.1 Memory: Definition (K1,K2)

5.2 Memory Process: Encoding – Storage – Retrieval (K1,K2,K3)

5.3 The information processing model – Sensory memory – Short term memory – Long term memory(K1,K2,K3,K4)

5.4 Forgetting: Meaning – Forgetting curve- Causes – Memory(K1,K2,K3,K4)

5.5 Theories of forgetting (K1,K2,K3,K4)

5.6 Brain – Improving memory(K1,K2,K3)

## SEMESTER – I

### UCPYB20 - BIOLOGICAL PSYCHOLOGY - I

<u>Year/ Sem</u>	<u>Course Code</u>	<u>Title of the Course</u>	<u>Course Type</u>	<u>Course Category</u>	<u>H/W</u>	<u>Credits</u>	<u>Marks 100</u>
I/I	UCPYB20	Biological Psychology - I	Theory	Core	5	5	40+60=100

#### OBJECTIVES:

- To explore the biological basis of experience and behaviour.
- To develop an understanding of the influence of behaviour, cognition, and the environment on bodily system.
- To develop an appreciation of the neurobiological basis of psychological function and dysfunction.

#### COURSE OUTCOMES (CO)

On completion of the course, the students will be able to:

- Comprehend human biology and its influence on human behaviour
- Outline the Foundations of behaviour and brain activity
- Demonstrate the structure and functions of the Neurons
- Explain the role of Neurotransmitter
- Demonstrate and summaries the structure and functions of the developement of the central nervous system
- To understand the influence of various Hormones on behaviour

CO 3	H	H	H	M	M	M
CO 4	H	M	H	M	H	H
CO 5	H	M	H	M	M	M

**UNIT I:****[18 Hours]**

- 1.1 Foundations of behaviour - Introduction: meaning of biological psychology(K1,K2,K3)
- 1.2 Viewpoints to explore Biology of Behaviour- Approaches that relate brain and behaviour(K1,K2,K3,K4)
- 1.3 Levels of analysis - Correlating brain anatomy with behaviour(K2,K3)
- 1.4 Recording brain activity (K2,K3,K4)
- 1.5 Effects of brain damage(K2,K3)
- 1.6 Effects of brain stimulation (K1,K2,K3)

**UNIT II:****[18 Hours]**

- 2.1 Neurons- features of the Nervous System: An overview(K1,K2,K3,K4)
- 2.2 Meninges, Ventricular system and production of cerebrospinal fluid. (K1,K2,K3,K4)
- 2.3 Cells of the Nervous System: Neurons, Supporting cells(K2,K3,K4)
- 2.4 The blood-brain barrier (K1,K2,K3)
- 2.5 Neural Communication: An overview, Measuring electrical potentials of axons(K1,K2,K3)
- 2.6 The Membrane Potential: Balance of two forces, The Action Potential, Conduction of the action potential(K1,K2,K3,K4)

**UNIT III:****[18 Hours]**

- 3.1 Communication between Neurons: Structure of synapses(K1,K2,K3,K4)
- 3.2 Neurotransmitter: meaning- types(K1,K2,K3)
- 3.3 Release of the Neurotransmitter: Activation of receptors(K1,K2,K3)
- 3.4 Postsynaptic potentials- Termination of postsynaptic potentials(K1,K2,K3,K4)

**UNIT IV:****[18 Hours]**

- 4.1 Nervous System: Development of the central nervous system(K1,K2,K3,K4)
- 4.2 Brain: The forebrain, The hind brain, midbrain & forebrain(K1,K2,K3)
- 4.3 Division of Nervous System: Central Nervous System, The Peripheral Nervous System(K1,K2,K3,K4)
- 4.4 Division of Nervous System: Spinal nerves, Cranial nerves(K2,K3)
- 4.5 The Autonomic Nervous system – Sympathetic (K2,K3)
- 4.6 The Autonomic Nervous System Parasympathetic(K2,K3)

**UNIT V:****[18 Hours]**

- 5.1 Hormonal actions- General principles of hormonal actions(K1,K2,K3,K4)
- 5.2 Hormonal action on cellular mechanisms- Hormonal influence on growth and activity(K2,K3)
- 5.3 Feedback control mechanisms in regulating secretion of hormones(K2,K3)
- 5.4 Endocrine glands and its specific hormones: Pituitary- Pineal- Thyroid- Parathyroid(K1,K2,K3,K4)
- 5.5 Pancreas- Adrenal- Gonads(K2,K3)

## SEMESTER – I

### UAPMA20 – ALLIED I: PRINCIPLES OF MANAGEMENT

<u>Year/ Sem</u>	<u>Course Code</u>	<u>Title of the Course</u>	<u>Course Type</u>	<u>Course Category</u>	<u>H/W</u>	<u>Credits</u>	<u>Marks 100</u>
I/I	UAPMA20	Principles of management	Theory	Allied	5	5	40+60=100

#### OBJECTIVE:

To provide employment opportunities to people, To provide a safe working environment with strict safety measures for its employees to work without fear and anxiety

#### COURSE OUTCOMES(CO):

On completion of the course, the students will be able to:

- 1) Identify and apply appropriate management techniques for managing business
- 2) Have a conceptual knowledge about the planning and decision making.
- 3) Apply the concept of organising for the effective functioning of a management.
- 4) Evaluate leadership style to anticipate the consequences of each leadership style.
- 5) Demonstrate the techniques for controlling and coordination.

CO5	M	H	H	L	H	H

## **UNIT-I**

- 1.1 Management -importance-definition(K1,K2,K3,K4)
- 1.2 Nature-scope-process(K1,K2,K3,K4)
- 1.3 Role & functions-levels-management(K1,K2,K3,K4)
- 1.4 As a science-management(K1,K2,K3)
- 1.5 As a profession-contribution of henry fayol & f.w.taylor in management(K1,K2,K3,K4)

## **UNIT-II**

- 2.1 Planning-nature-importance-types(K1,K2,K3,K4)
- 2.2 Steps in planning-objectives-policies(K1,K2,K3,K4)
- 2.3 Procedures-and methods(K1,K2,K3,K4)
- 2.4 Decision-process of decision making-types of decision(K1,K2,K3,K4)

## **UNIT-III**

- 3.1 Organizing (K1,K2)
- 3.2 Types of organizing structure(K1,K2,K3,K4)
- 3.3 Span of control(K1,K2,K3)
- 3.4 Departmentation(K1,K2,K3)
- 3.5 Informal organization(K1,K2,K3)

## **UNIT-IV**

- 4.1 Authority- delegation - decentralization (K1,K2,K3,K4)
- 4.2 Difference between authority - staffing (K1,K2,K3)
- 4.3 Sources of recruitment (K1,K2,K3)
- 4.4 Selection process - training - directing (K1,K2,K3)
- 4.5 Nature and purpose of directing (K1,K2,K3)
- 4.6 Motivation (Maslow's need hierarchy theory only)(K1,K2,K3,K4)

## **UNIT-V**

- 5.1 Introduction(K1,K2)
- 5.2 meaning of coordination(K1,K2,K3,K4)
- 5.3 Definition of coordination by different authors(K1,K2,K3,K4)
- 5.4 Need/Importance of coordination (K1,K2,K3,K4)
- 5.5 Types of coordination(K1,K2,K3,K4)
- 5.6 Techniques of coordination(K1,K2,K3,K4)
- 5.7 Coordination & cooperation(K1,K2,K3,K4)

## SEMESTER – II

### UCPYC20 - GENERAL PSYCHOLOGY – II

<u>Year/ Sem</u>	<u>Course Code</u>	<u>Title of the Course</u>	<u>Course Type</u>	<u>Course Category</u>	<u>H/W</u>	<u>Credits</u>	<u>Marks 100</u>
I/II	UCPYC20	General Psychology - II	Theory	Core	5	5	40+60=100

**OBJECTIVE:** Provide an overview of the basic concepts in psychology to help in better communication and enhance adjustment in life and work.

#### **COURSE OUTCOMES (CO):**

On completion of the course, the students will be able to:

- Understand the basic aspects of cognition and behaviour
- Demonstrate the process of motivation and frustration
- Explain the underlying principles of physiological basis of emotion and stress
- Elaborate on the attributes of creativity and Intelligence
- Compare and contrast the various approaches of personality

CO/PSO	PSO

CO 3	L	M	H	H	H	M
CO 4	H	M	H	H	M	H
CO 5	H	H	M	H	H	M

**UNIT I:****[18 Hours]**

- 1.1 Cognition: Meaning – Cognitive Psychology(K1,K2,K3)
- 1.2 Types of cognition: – Mental Imagery – Concept, Problem solving- Steps(K1,K2,K3,K4)
- 1.3 Barriers to Effective problem solving(K2,K3)
- 1.4 Strategies of problem solving: Algorithms, Heuristic, Decision making – Step(K1,K2,K3,K4)
- 1.5 Reasoning – Inductive and Deductive reasoning(K2,K3)
- 1.6 Language: Nature - Main Components of Language – Phonemes- Morphemes  
Syntax - Semantics – Pragmatics(K1,K2,K3,K4)

**UNIT II:****[18 Hours]**

- 2.1 Motivation: Definition – Needs – Biological Needs – Social Needs - Psychological Needs (K1,K2,K3,K4)
- 2.2 Theories of Motivation: Instincts – Drive-reduction theory – Arousal – Incentive (K2,K3,K4)
- 2.3 Opponent-Process – Cognitive theories – Social cognitive theory – Need theories(K2,K3,K4)
- 2.4 Classification of Motives: Physiological motives – Psychological motives(K2,K3,K4)
- 2.5 Conflict: Meaning- Types(K1,K2,K3)
- 2.6 Frustration: Meaning- Causes(K2,K3,K4)

**UNIT III:****[18 Hours]**

- 3.1 Emotion: Meaning – Basic emotions- Components (K1,K2,K3)
- 3.2 Physiology of emotion - Expression of emotion(K2,K3)
- 3.3 Theories of Emotions(K2,K3,K4)
- 3.4 Stress: Definition – Four variations - Stressors – Effects (K1,K2,K3,K4)
- 3.5 General Adaptation Syndrome – Individual differences - Coping mechanism.(K1,K2,K3,K4)

**UNIT IV:****[18 Hours]**

- 4.1 Intelligence: Definition - Concept of IQ (K1,K2,K3)
- 4.2 Individual differences in Intelligence –Mental retardation(K2,K3,K4)
- 4.3 Mentally gifted – Assessment of Intelligence(K2,K3,K4)
- 4.4 Emotional Intelligence: Meaning ,Characteristics(K1,K2,K3)
- 4.5 Creativity: Definition- Nature – Steps - Characteristics of creative people(K1,K2,K3,K4)
- 4.6 Creativity tests(K2,K3)

**UNIT V:****[18 Hours]**

- 5.1 Personality: Definition - Theories – Psychoanalytic(K1,K2,K3,K4)
- 5.2 Neo Freudian: Jung –Adler - Karen Horney – Erikson (K2,K3,K4)
- 5.3 Behavioristic view – Social Cognitive view (K2,K3,K4)
- 5.4 Humanism and Personality: Roger’s theory – Maslow’s theory (K1,K2,K3,K4)
- 5.5 Trait Theories Psychology – Allport – Cattell - The Big Five Factors(K2,K3,K4)
- 5.6 Assessment of Personality, Uses of Personality tests(K1,K2,K3,K4)

**TEXTBOOK:**

CO 5	M	M	H	H	H	H

**UNIT I:****[18 Hours]**

- 1.1 Rhythms of waking and sleeping: Endogenous cycles(K1,K2,K3)
- 1.2 Setting and resetting the biological clock- Mechanisms of the biological clock(K2,K3,K4)
- 1.3 Sleep and brain mechanisms: Sleep and other interruptions of consciousness, the onset of sleep and hypnagogic hallucinations(K1,K2,K3,K4)
- 1.4 Stages of sleep. Paradoxical or REM sleep, Brain mechanisms of wakefulness and arousal(K1,K2,K3,K4)
- 1.5 Brain functions in REM sleep- Functions of sleep(K1,K2,K3)
- 1.6 Dreaming: REM sleep and dreaming. Biological perspectives on dreaming(K1,K2,K3)

**UNIT II:****[18 Hours]**

- 2.1 Development of the brain- Maturation of the vertebrate brain(K1,K2,K3)
- 2.2 Growth and development of neurons (K1,K2,K3)
- 2.3 New neurons later in life- Path finding by axons(K1,K2,K3)
- 2.4 Determinants of neuronal survival(K2,K3)
- 2.5 Neural plasticity: Meaning- Plasticity after brain damage(K1,K2,K3)

**UNIT III:****[18 Hours]**

- 3.1 Thirst: Mechanisms of water regulation- Osmotic thirst(K1,K2,K3)
- 3.2 Hypovolemic thirst and sodium specific hunger(K1,K2,K3,K4)
- 3.3 Hunger: Digestion and food selection(K2,K3,K4)
- 3.4 Short- and long-term regulation of feeding-Brain mechanisms(K2,K3,K4)
- 3.5 Eating Disorders(K2,K3,K4)

**UNIT IV:****[18 Hours]**

- 4.1 Emotions: Introduction, Emotions and Autonomic arousal (K1,K2,K3)
- 4.2 James-Lange theory(K3,K4)
- 4.3 Brain areas associated with emotions- The functions of emotions(K1,K2,K3)
- 4.4 Attack and Escape Behaviours: Attack behaviours(K1,K2,K3)
- 4.5 Escape - Fear and anxiety(K1,K2,K3)
- 4.6 Stress and Health(K2,K3)

**UNIT V:****[18 Hours]**

- 5.1 Memory: Localized representations of memory(K1,K2,K3)
- 5.2 Types of memory- The hippocampus (K1,K2,K3)
- 5.3 Theories on the function of the hippocampus(K2,K3,K4)
- 5.4 Other types of amnesia: Korsakoff's syndrome(K2,K3,K4)
- 5.5 Alzheimer's Disease(K1,K3,K4)
- 5.6 The role of the other brain areas(K1,K2,K3)

## SEMESTER-II

### UAOBA20 – ALLIED II: ORGANIZATIONAL BEHAVIOR

<u>Year/ Sem</u>	<u>Course Code</u>	<u>Title of the Course</u>	<u>Course Type</u>	<u>Course Category</u>	<u>H/W</u>	<u>Credits</u>	<u>Marks 100</u>
<u>I / II</u>	<u>UAOBA20</u>	Organizational behavior	<u>Theory</u>	<u>Allied</u>	<u>5</u>	<u>5</u>	<u>40+60=100</u> <u>0</u>

#### UNIT-I

- 1.1 Meaning -nature-importance-role(K1,K2,K3)
- 1.2 Historical development of OB(K1,K2,K3,K4)
- 1.3 Organizational as a social system-social technical system(K1,K2,K3,K4)
- 1.4 Open system-factors influencing of OB(K1,K2,K3,K4)
- 1.5 Environmental factors-constraints over organization and managerial performance.(K1,K2,K3,K4)

#### UNIT-II

- 2.1 Meaning of group dynamic-reason for formation of group(K1,K2,K3,K4)
- 2.2 Characteristic of group(K1,K2,K3,K4)
- 2.3 Theories of group dynamics(K1,K2,K3,K4)
- 2.4 Types of group in organization-group cohesiveness(K1,K2,K3,K4)
- 2.5 Group decision making process-small group behavior(K1,K2,K3,K4)

#### UNIT-III

- 3.1 Leadership concept-characteristic leadership theories(K1,K2,K3,K4)
- 3.2 Leadership styles-managerial grid(K1,K2,K3,K4)
- 3.3 Leadership effectiveness(K1,K2,K3,K4)
- 3.4 Motivation-financial and non financial(K1,K2,K3,K4)
- 3.5 Theories of motivation(K1,K2,K3,K4)
- 3.6 Morale-meaning-characteristic-determinant of morale(K1,K2,K3,K4)

#### UNIT-IV

- 4.1 Organizational culture-definition-determinance of organizational culture(K1,K2,K3,K4)
- 4.2 Characteristics-types-fuctions-organizational climate(K1,K2,K3,K4)
- 4.3 Determinance of organizational climate-distinguish between organizational climate and culture(K1,K2,K3,K4)
- 4.4 Organizational effectiveness and approaches to organizational effectiveness(K1,K2,K3,K4)
- 4.5 Organizational conflicts-definition-features-sources of conflicts-different stages of conflicts-measures to stimulate conflicts.(K1,K2,K3,K4)

## **UNIT-V**

5.1 Management of changes-meanings-importance(K1,K2,K3,K4)

5.2 Resistance to change-causes(K1,K2,K3)

5.3 Dealing with resistance(K1,K2,K3)

5.4 Concept of social change and organization causes factors contribution to organization change(K1,K2,K3,K4)

5.5 Organization development-meaning-process(K1,K2,K3,K4)

**AUXILIUM COLLEGE (Autonomous)**  
**(Accredited by the NAAC with A+ Grade with a CGPA of 3.55 in**  
**the 3<sup>rd</sup> Cycle) Gandhi Nagar, Vellore – 632 006**

**ACADEMIC PROGRAMME – REGULATIONS (PG)**

**With effect from the Academic Year 2021 - 2022**

Auxilium College, an autonomous institution, follows the Semester pattern with Choice Based Credit System (CBCS) of evaluation, requiring 3 years of study for an Undergraduate Degree Programme and 2 years of study for a Postgraduate Degree Programme. The duration of a semester is 90 days of instruction.

The CBCS offers internal assessment, inter-departmental academic collaboration and course credits. It offers freedom to the departments to design the course structure, to frame rules pertaining to academic programmes and also to introduce new study programmes. It aims at making the academic programme student-oriented, interdisciplinary, flexible and relevant to the times. Under this system, the students will have ample freedom to select the electives to suit their interest, aptitude and needs.

A curriculum is a programme of studies and/or activities (curricular, co-curricular and extra curricular). Arising from the basic needs and moving on to individual, social and cultural needs, the curriculum attempts to fulfill the ideal needs also, such as moral, intellectual, aesthetic and spiritual needs.

### **Credit System**

The Autonomous status of the College offers a student the benefits of Choice Based Credit System. Every paper is allotted a certain number of credits. A student is awarded the specified credits on obtaining a pass in the respective paper.

The student has abundant opportunities during the course of study to obtain additional credits by doing Optional Certificate Courses offered by different Programmes of the College. This facility will strengthen the academic potential of the student, as it provides flexibility in the choice of courses offered beyond the framework of the respective discipline of study. The introduction of the CBCS ensures compatibility with the academic norms practiced in other educational institutions of repute in India and abroad.

The structure of undergraduate programmes provides a wide range of choice for students to opt for courses based on their eligibility, aptitude and career goals. The undergraduate curriculum will include the following categories of courses in order to accomplish a holistic approach to undergraduate education.

**Structure of Postgraduate Degree Programmes as  
per R.C. No. 2909/M1/08 dated 02.05.2008**

**(a) Core Courses**

**(b) Major Electives**

**(c) Human Rights**

**(i) Core Course**

Each Programme has a set of Core courses spread over four Semesters. The syllabi of the Core courses will help the student to acquire an in-depth knowledge in the course and to stay abreast with the recent developments in the respective discipline. This Programme includes Project work.

**(ii) Major Electives**

Each department offers a course in Major electives which consists of three/four papers spread over the course of study.

**(iii) Human Rights Education**

A course in Human Rights Education is offered in the II Semester. It is mandatory for every student to obtain a pass in this Paper.

**(iv) Teaching and Research Aptitude**

A course in Teaching and Research Aptitude is offered in the III Semester. It is aimed to assess the teaching and research capabilities of the students. Common classes will be held outside normal working hours.

**(v) Independent Elective course**

It was made mandatory for all the Pg Students to take up one independent elective course every semester with effect from 2018 onwards.

**(vi) Online Course**

Each semester a student should complete one course conducted by -----  
This is to make the student gain more knowledge other than their own courses.

**Medium of Instruction and Examination**

The medium of instruction and examination will be English.

## Distribution of Hours:

Postgraduates: 15 Weeks/Semester

Course	Hours/Week				Total Credits
	Sem I	Sem II	Sem III	Sem IV	
<b>Core (Including Practical and Project)</b>	<b>25</b>	<b>23</b>	<b>25</b>	<b>25</b>	<b>65</b>
<b>Major Electives</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>20</b>
<b>Human Rights</b>	<b>-</b>	<b>2</b>	<b>-</b>	<b>-</b>	<b>2</b>
<b>Teaching and Research Aptitude</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>Total</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>90 Credits</b>

## Requirements of Attendance

1. The minimum requirement of attendance for a candidate is 75% per semester, to enable her to appear for the Semester Examinations.
2. If the attendance of a candidate is between 65 - 75%, due to any of the following reasons, the candidate is eligible to appear for the current Semester Examinations only after obtaining condonation from the Principal, by payment of the prescribed Condonation Fee:
  - a. Prolonged illness
  - b. Major surgery
  - c. Accident, which requires a long period of rest

The reason for the long period of absence should be informed to the Principal and the sanction obtained, within a week from the commencement of absence.

If the attendance of a candidate is between 50% - 65% in a semester, she is not eligible to appear for the current Semester Examinations. But she is permitted to appear for the arrear courses, if any. She is also permitted to move to the next Semester.

If the attendance of a candidate is below 50%, she is not eligible to continue her studies but can complete the Programme by re-joining the same Semester in the following academic year, if vacancy is available. She should obtain the approval from the University through the concerned Head of the Department and the Principal.

### **TESTING, ASSESSING AND VALUATION**

There are two components in the Valuation and Assessment of a student - Internal and External. These are implemented through

1. Continuous Assessment (CA) during the Semester for 40 marks. It consists of two written tests and an innovative component.
2. Semester Examination (SE) at the end of the Semester for 100 marks which will be converted to 60.

The maximum marks for each Paper shall be 100.

Each Postgraduate Programme consists of four Semesters.

### **Continuous Assessment (CA):**

1. The Continuous Assessment of each student will be done by the respective Departments.
2. Each written test is of two hours duration for 50 marks. The tests will be conducted centrally. The average of two such CA is calculated for 35 marks.
3. The innovative component is for 5 marks, conducted during the class hours by the Staff member in charge of the course, in the form of assignments/ quiz/ seminars /presentations/Online/Open Book/Viva Voce/ Group work/ Mini Project/Exhibition, etc. The topic and time for submission/ presentation will be announced by the staff member in charge of the course in advance. Each student should explain and defend her presentation.
4. **Syllabus of not less than two units shall be included for each CA.**
  5. **A retest for CA will be conducted for a student only if a student is absent due to NSS/NCC/Sports camps on prior written permission obtained through the concerned staff member.**
  6. **There is no passing minimum for CA.**
  7. **There is no provision for improvement in CA.**

### **Semester Examinations (SE)**

1. A student should register herself to appear for the Semester Examinations by payment of the prescribed fee.
2. The Semester Examinations will be in the form of a comprehensive examination covering the entire syllabus in each course. It will be of 3 hours duration, irrespective of the number of credits allotted to it.

### **Valuation of Answer Scripts**

1. There shall be single valuation for Postgraduate Courses. The Panel of Examiners will consist of internal and external examiners.
2. The valuation will be centralised.
3. A student has a maximum period of five years from the Date of Admission to clear all the courses prescribed for the Programme at the time of her admission. After the fifth year, to complete the programme, the student has to appear for an examination in the same/equivalent paper offered under the revised syllabus structure.
4. Fraction of final marks in CA and SE shall be rounded off to the nearest integer.

### ***Revaluation***

1. A student can apply for the photocopy of answer scripts, if needed, on payment of the prescribed fee.
2. A student can apply for revaluation of any paper, on payment of the prescribed fee within the specified date. Receipt of the photocopy of the answer script is a pre-requisite for revaluation.

### **Supplementary Examination**

After the declaration of the results of the final semester, a student who has only one paper in any semester can apply by the specified date, for Supplementary Examination, either for reappearance or for improvement. This facility is available only for those students who have not obtained a pass due to one paper. The examination will be conducted and results published within a month of the first publication of the result.

### **Improvement:**

The facility to improve one's performance in any paper(s) is offered to all the students. A student, who wishes to improve her performance in any paper(s), may apply for the examination in the same, if the examination is conducted in that paper(s) during that particular semester/ Supplementary Examination.

This provision is available till the Supplementary Examination after the final semester examination.

### **Note:**

A student can report any grievance regarding CA or SE, to the Controller of Examinations, who in turn, will present the same to the Examination Committee, chaired by the Principal.

### **CA and SE for Laboratory and Practical Work**

<b>CA</b>		<b>SE</b>	
<b>Components</b>	<b>Marks</b>	<b>Components</b>	<b>Marks</b>
<b>Performance during regular practicals</b>	<b>10</b>	<b>Record</b>	<b>10</b>
<b>Regularity and submission of Observation Notebook and Record</b>	<b>5</b>	<b>Practical Examination</b>	<b>45</b>
<b>Practical Examination</b>	<b>25</b>	<b>Viva Voce</b>	<b>5</b>
<b>Total</b>	<b>40</b>	<b>Total</b>	<b>60</b>

### **Passing Minimum:**

A candidate shall be declared to have passed in a course if she secures 50% and above in the SE. If a candidate fails in any paper, she shall be required to appear only for the SE in the respective paper.

### **Classification of Successful Candidates:**

### **Conversion of Marks to Grade Points and Letter Grade:**

<b>Range of Marks</b>	<b>Grade Points</b>	<b>Letter Grade</b>	<b>Description</b>
<b>90 - 100</b>	<b>9.0 – 9.5</b>	<b>O</b>	<b>Outstanding</b>
<b>80 – 89</b>	<b>8.0 – 8.9</b>	<b>D+</b>	<b>Excellent</b>
<b>75 – 79</b>	<b>7.5 – 7.9</b>	<b>D</b>	<b>Distinction</b>
<b>70 – 74</b>	<b>7.0 – 7.4</b>	<b>A+</b>	<b>Very Good</b>
<b>60 – 69</b>	<b>6.0 – 6.9</b>	<b>A</b>	<b>Good</b>
<b>50 – 59</b>	<b>5.0 – 5.9</b>	<b>B</b>	<b>Average</b>
<b>00 – 49</b>	<b>0.0</b>	<b>U</b>	<b>Re-appear</b>
<b>ABSENT</b>	<b>0.0</b>	<b>AA</b>	<b>ABSENT</b>

### Calculation of Grade Point Average

Based on the grades obtained by a candidate, the Grade Point Average (GPA) is calculated as follows:

**Grade Point Average (GPA) =**

$$\frac{\sum CiGi}{i}$$

$$\sum_i C_i$$

i.e.,  $GPA = \frac{\text{Sum of the multiplication of Grade Points by the credits of the courses}}{\text{Sum of the credits of the courses in a Semester}}$

Where

$C_i$  = Credits earned for course  $i$  in any semester

$G_i$  = Grade Point obtained for course  $i$  in any semester

**For the Entire Programme:**

Based on the grades obtained by a candidate for the entire programme, the Cumulative Grade Point Average (CGPA) is calculated as follows:

**Cumulative Grade Point Average (CGPA) =**

$$\frac{\sum C_i G_i}{\sum C_i}$$

$$\frac{\sum_{i=1}^n G_{ni}}{\sum_{i=1}^n C_{ni}}$$

i.e., CGPA = Sum of the multiplication of Grade Points by the credits of the entire programme  
 Sum of the credits of the courses of the entire programme

Where

$C_i$  = Credits earned for course  $i$  in any semester

$G_{ni}$  = Grade Point obtained for course  $i$  in any semester

$n$  refers to the Semester in which such courses were credited.

The final classification is based on the following Grade Conversion Table:

<b>CGPA</b>	<b>GRADE</b>	<b>CLASSIFICATION OF FINAL RESULT</b>
<b>9.5 – 10.0</b>	<b>O+</b>	<b>First Class with Exemplary*</b>
<b>9.0 and above but below 9.5</b>	<b>O</b>	
<b>8.5 and above but below 9.0</b>	<b>D++</b>	<b>First Class with Distinction*</b>
<b>8.0 and above but below 8.5</b>	<b>D+</b>	
<b>7.5 and above but below 8.0</b>	<b>D</b>	
<b>7.0 and above but below 7.5</b>	<b>A++</b>	<b>First Class</b>
<b>6.5 and above but below 7.0</b>	<b>A+</b>	<b>First Class</b>
<b>6.0 and above but below 6.5</b>	<b>A</b>	
<b>5.5 and above but below 6.0</b>	<b>B+</b>	<b>Second Class</b>
<b>5.0 and above but below 5.5</b>	<b>B</b>	
<b>0.0 and above but below 5.0</b>	<b>U</b>	<b>Re-appear</b>

**\* The candidates who have passed in the first appearance and within the prescribed semester of the P.G. programme only are eligible.**

### **Ranking of Successful Candidates**

**Ranking will be based on CGPA. Candidates who passed in all the examinations prescribed for the Programme in the very first appearance only are eligible for ranking.**

### **Malpractices:**

**Resolved that the following norms be followed in dealing with the cases of malpractices in CA/Semester Examinations.**

<b>S.No.</b>	<b>Nature of Malpractice</b>	<b>Action Suggested</b>
<b>1.</b>	<b>Appeal by a candidate for favourable consideration or mercy in the answer script</b>	<b>Warn the candidate</b>
<b>2.</b>	<b>Letter of appeal for favourable consideration, promising bribe in cash or kind.</b>	<b>Cancel the examination taken in that particular Course only</b>
<b>3.</b>	<b>Candidate writing her own name in any part of the answer book</b>	<b>Warn the candidate</b>
<b>4.</b>	<b>Candidate writing her own Register Number in any part of the answer book other than on the front page</b>	<b>Warn the candidate</b>
<b>5.</b>	<b>Possessing notes or books relevant to the course of the examination</b>	<b>Cancel the examination taken in that particular Course only</b>
<b>6.</b>	<b>Possessing notes or books relevant to the course of the examination (repeated)</b>	<b>Cancel the examinations taken previously and not to allow to appear for the remaining examinations in that Semester</b>

7.	Using or copying from notes or books relevant to the course of the examination	Cancel the examination taken in that particular Course only
8.	Using or copying from the answer scripts of other candidates	Cancel the examination taken by both the candidates in that particular Course only
9.	Inserting pre-written answer sheet(s) brought from outside, in the main answer book.	Cancel the examinations taken previously and not to allow to appear for the remaining examinations in that Semester
10.	Threatening or assaulting the Invigilator or behaving in any insubordinate manner	Cancel the examination taken
11.	Manhandling or injuring any examination personnel	Cancel the examination taken
12.	Impersonation	Cancel the examination taken and debar from the examination for the next three years
13.	Tampering with spelling/ name/initials in any certificate	The candidate has to produce fresh certificates and a fine of 1,000/-
14.	Tampering with the Date of Birth in the certificate issued by the College	The candidates should not be permitted to appear for any examination of this College for a period of two years from the date of submission of documents and not to pursue any course of studies for the corresponding period

15.	<b>Tampering with the Grade Certificate or any other Certificate issued by the College</b>	<b>The College will retain the tampered certificate and duplicate certificate will not be issued for three years from the date of presentation of documents. The candidate should not pursue any course of studies in this College for the corresponding period</b>
-----	--	---

**Important Note:**

**The decision of the Principal shall be final in all matters pertaining to the Academic Programme.**

**M.A..English**

### **Programme Outcomes (POs)**

#### **On completion of the PG Programme, students will be able to:**

**PO1:**Attain an in-depth knowledge in the respective domains augmented through self-learning.

**PO2:**Assimilate and apply principles and concepts towards skill development and employability.

**PO3:**Apply critical and scientific approaches to address problems and find solutions.

**PO4:**Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:**Integrate issues of social relevance in the field of study.

**PO6:**Persist in life-long learning for personal and societal progress.

#### **On completion of M.A. Programme in English, students will be able to**

**PSO1:** Demonstrate wide knowledge of literary periods and movements, intellectual, linguistic, religious, and artistic influences

**PSO2:**Analyse and interpret Literature using traditional, modern, and contemporary theories and approaches

**PSO3 -** Appreciate and discuss varying opinion of literary works (K4)

**PSO4:** Critically interpret emerging traditions of literature, culture and thought in the canon of new literatures

**PSO5:** Demonstrate skills in Research Methods and tools to initiate and attempt research projects in Literature and Language

**PSO6:** Innovate and apply the skills of oral, written communication and analytical skills in the prospective areas of teaching, training, writing, editing, translating, publishing, advertising etc.

**5.4 Formal Elements of Fiction:** Plot Construction, Narrative point of View, Characterization

**5.5 Formal Elements of Fiction:** Setting, Tone, Style, Symbolism and Irony.

#### **5.6 Close Reading & Critical Interpretation:**

To facilitate a deeper understanding of the period when the novel rose to dominate the literary marketplace, defining the form and its modes of representing the private lives of individuals. The critical reading includes the late eighteenth century which saw a medieval revival, in which writers venerated and imitated archaic language and forms. The important development of this movement was the Gothic novel, which typically features such forbidden themes as incest, murder, necrophilia, atheism, and sexual desire.

## Course Syllabus

### Unit I

Introduction to William Shakespeare K1,K2,K3,K4 (10 Hours)

1.1 Life

1.2 Plays & Sonnets

1.3 Language, Audience and Theatre

**(Detailed Plays)**

Tragedy: Hamlet K3.K4,K5 (10 Hours)

1.4 Shakespearean Tragedy

1.5 Sources, Plot, overview and Themes

1.6 Analysis and Criticism

### Unit II

Comedy: Twelfth Night K3,K4,K5 (15 Hours)

2.1 Shakespearean Comedy

2.2 Sources, Plot, overview and Themes

2.3 Analysis and Criticism

Last Plays: The Tempest K3,K4,K5 (15 Hours)

2.4 Tragicomedy

2.5 Sources, Plot overview, Themes and Motifs

## 2.6 Analysis and Criticism

### **Unit III**

K2,K3,K4

(10 Hours)

#### **(Non - Detailed Plays)**

3.1 Roman Plays

3.2 Antony and Cleopatra

3.3 Sources, Plot Overview, Themes and Motifs

3.4 Analysis and Criticism

3.5 Problem Plays

3.6 Measure for Measure

### **Unit IV Shakespeare and Theory I**

K3,K4,K5,K6

(10 Hours)

4.1 Structuralism

4.2 Roman Jakobson – The Structures of Sonnet 129.

4.3 Freudian Psychoanalysis

4.4 Ernest Jones – Reading the Oedipus Complex in Ernest Jones .

4.5 Feminism - Virginia Woolf

4.6 Shakespeare and the Question of Female Authorship. From Jonathan Gil Harris, *Shakespeare and Theory*. New York: Oxford University Press, 2012.

### **Unit V Shakespeare and Theory II**

K3,K4,K5,K6

(10 Hours)

5.1 Maxism

5.2 Karl Marx

5.3 *Timon of Athens* and the Power of Money

5.4 Post Structuralist Marxism

5.5 Terry Eagleton

5.6 Language and Reification in *Macbeth* and *Twelfth Night*.

#### **Books for Study:**

1. Shakespeare, William, Ed Chaise McEacheru. *The Tempest*. New Delhi: The Arden Shakespeare Bloomsbury, 2013.
2. Shakespeare, William, Ed Chaise McEacheru. *Twelfth Night*. New Delhi: The Arden Shakespeare Bloomsbury, 2013.

3. Shakespeare, William, Ed John Wilder. *Antony and Cleopatra*. The Arden Shakespeare New Delhi: Bloomsbury, 2013.
4. Shakespeare, William, Ed By J.W. Lever. *Measure for Measure*. London & New York: Rutledge, 1988.
5. Shakespeare, William, Ed by Ann Thompson and Neil Taylor. *Hamlet*. New Delhi: Bloomsbury, 2006.
6. Shakespeare, William. *Antony and Cleopatra*. New York: Palgrave Macmillan, 1987.

1.4 **Terms/ Concepts:** Allography; arbitrariness; author; bricoleur; convention; deviation; diachronic and synchronic; diacritical; difference; digital and analogic communication; écriture; formulaic literature; function; functions of language; heterobiography, homology; hymen; langue and parole; linguistic paradigm; nominalism; post-structuralism; reference; sign; speech; structure in dominance; syntagmatic and paradigmatic; structuralism; textualist; transgressive strategy.

1.5 Structuralism

**Text:** Roland Barthes                      The Death of the Author

**Analysis**                                      Micheal Ryan pg. 25-31

1.6 Poststructuralism

**Text:** Jacques Derrida                      Structure, Sign and Play in the Discourse of Human Sciences

**Analysis**                                      Micheal Ryan Pg.83-84

## Unit II

K2-K5

(18 hours)

### Psychoanalysis

2.1 Historical Background

2.2 **Terms:** Abject; alterity; archetypal criticism; arche-writing; body; censorship; chora; condensation and displacement; contiguity; cross talk; desire; disavowal; double-bind; fetishism; figure and ground; fort/da; gaze; Gestalt; hommelette; imaginary/symbolic/real; intersubjectivity; jouissance; linguistic paradigm; méconnaissance; mirror stage; *Nachtraglichkeit*; Name-of-the – Father; object-relations theory/ criticism; objet a/objet A; other; overdetermination; panoptism/ panopticism; phallogentrism; pleasure; point de capiton; primary process, projection characters; psychoanalytic criticism; repression; revisionism; schizoanalysis; scopophilia/scopophobia; scotomization; sinthom; slippage; solution from above/below; subject and subjectivity; symptom; syntagmatic and paradigmatic; topographical model of the mind, transference; True-Real; Unconscious.

2.3 **Text:**Harold Bloom                      Poetry, Revisionism and Repression

**Analysis:***Young Goodman Brown: Id versus Superego*

Guerin Wilfred L., Earle Labour et al. *A Handbook of Critical Approaches to Literature*. New York: OUP, 1999

## **Marxism**

### 2.4 Historical Background

**2.5 Terms:** Absence; against the grain; alienation; alienation effect; always-already; aura; base and superstructure; class; coherence; co-optation; Copernican revolution; critical theory; dialectics; economism; English; epistemological break; fetishism; flaneur; formation; Frankfurt school; gest; hegemony ; homology; ideologeme; ideology; incorporation; instance; intellectuals; interpellation; legitimation; literary mode of production; Marxist literary theory and criticism; materialism; moment; Montage; myth; popular; praxis; problematic; realism; reification; slippage; structure in dominance; structure of feeling; subject and subjectivity;

### **2.6 Text:** Marxist Criticism Terry Eagleton

From Welder, Dennis. *Literature in the Modern World: Critical Essays and Documents*. Reprinted. New York: Oxford UP, 2008. Print.

Analysis: Silence, Violence and Souther Agrarian Class Conflict in William Faulkner's *Barn Burning*

## **Unit III**

**K2-K5**

**(18 hours)**

## **Post colonialism**

### 3.1 Historical Background

**3.2 Terms:** Affiliation; Africanist/Nationalist; Alterity; Authenticity; Bolekaja Critics; Comprador; Contamination; Creolization; Diaspora literature; Disidentification; Double Colonization; Double consciousness; double-voiced; dubbing; ethnoscope; Eurocentric; fictograph; hybrid/hybridization; imagined community; liminal; marvellous realism; master narrative; mediascape; mimicry; nation/nationalism; nativism; négritude, neo-Tarzanism; Nomad; orature; orientalism; other; passing; postcolonialism; relativism; relexification; subaltern; transculturation; west.

### **3.3 Text:** Chinua Achebe Colonialist Criticism

From Chinua Achebe. *Hope and Impediments. Selected Essays 1965-87*

**Analysis:** Colonialism and Authenticity: V.S.Naipaul's *The Mimic Men*  
From *The Empire Writes Back* –Pg 87-90

## **Multiculturalism**

### 3.4 Historical Background

**3.5 Terms** Binary/binarism; bricoleur; culture; cultural studies; fiction; formulaic literature; myth; New Historicism and cultural materialism; Sapir-Whorf hypothesis; script; structures of feeling; thick description/thin; utterance.

### **3.6 Text:** Overlapping Territories, Intertwined Histories – Edward W. Said

**Analysis:** Victims Already: Violence and Threat in Nadine Gordimer's *Once upon a Time*

## **Unit IV**

**(18 hours)**

## **Reader Response Theory**

#### 4.1 Historical Background

**4.2 Terms/ Concepts** Appreciation; code; coduction; cross talk; ecological validity, exegesis; genre; hermeneutics; ideation; interpretation; intrepretative communities; interrogate; intersubjectivity; jouissance; meaning and significance; ontological status; open and closed texts; oppositional reading; parabolic text; performance; politeness; prepublication/postpublication reading; punctuation; readerly and writerly text; readers and reading; reading community; reading position; reception theory; self consumingartcraft; sense and reference; sub-text; suspense; theme and thematics; topic; transactional theory of the literary work.,

#### 4.3 Stanley Fish

Is There a Text in the Class?

### **New Historicism**

#### 4.4 Historical Background

**4.5 Terms:** Circulation; emplotment; energy; exchange; New Historicism and Cultural Materialism; resonance; structure

#### 4.6 Text: Professing the Renaissance: The Poetics and Politics of Culture – Louis A. Montrose

**Analysis:** To His Coy Mistress: Implied Culture versus Historical Fact

### **Unit V**

**K2-K5**

**(18 hours)**

### **Ecocriticism**

#### 5.1 Historical Background

#### **5.2 Terms**

Ecofeminism, Ecology, Deep Ecology, Eco-consciousness, Logocentricism, Phallogentrism, Ecosystem, Biosphere or Ecosphere, Anthropocentric, Biocentric, Environmental Crisis, Symbiosis, Nature and Culture, Environmental Psychology, Ecocentric Egalitarianism, Ecosion, Green theory, Eco poetics, Eco-centric values, Apocalypse, Ozone depletion, Global warming, Deforestation, Survival of the fittest, Sense of self and Sense of place, Landscape theory.

#### **5.3 Text:**

Glen. A. Love. Revaluing Nature: Toward an Ecological Criticism - (Page 225-238)

**Analysis:** Walden: H.D.Thoreau- American pastoral Pg 48-56

From Greg Garrard. *Ecocriticism*. Routledge. London and New York. 2007.

### **Memory Studies**

#### **5.4 Historical Background**

Astrid Erll

2.1 Communicative Language Teaching K2,K4

2.2 Competency-Based Language Teaching K2,K3

2.3 Task-Based Language Teaching K3,K4

2.4 Cooperative Language Learning K3, K4

2.5 Content Based Instruction K3, K4

2.6 Neurolinguistic Programming (NLP) K3, K4

**Unit III: Alternative twentieth-century approaches and methods**

**(15 Hours)**

3.1 The Natural Approach	K3.K4
3.2 Total Physical Response	K3, K4
3.3 The Silent Way	K3, K4
3.4 Community Language Learning	K3, K4
3.5 The Lexical Approach	K3, K4
3.6 The post-methods era	K3, K4

#### **Unit IV: Four basic Skills (LSRW)**

**(20 Hours)**

4.1 Tasks for Language teachers, Using the Tasks	K5, K6
4.2 Carrying out small scale research in the classroom	K5, K6
Devising and evaluating Tasks	
4.3 Lesson Planning, Syllabus, Tests, Assessment	K5, K6
4.4 Practical Lesson management	K5, K6
4.5 Using Websites for Language Teaching	K4, K5
4.6 Micro-Teaching and Self Observation	K5, K6

#### **Unit V: Teaching Literature**

**(20 Hours)**

5.1 Theories of Teaching Literature (pg 21-41)	K3, K4
5.2 Methods of Teaching Literature (Pg42-61)	K3, K4
5.3 Teaching Poetry (Pg62-78)	K4, K5
5.4 Teaching Drama (Pg79- 87)	K4, K5
5.5 Teaching Fiction (Pg88-102)	K4, K5
5.6 Teaching Literature in Dark Times	K4, K5

## RESEARCH PROJECT

### Course Outcomes (CO)

On Completion of the Course the Learners will be able to:

1. Demonstrate knowledge of research methods, theories and research context in Literature and Language teaching
2. Explain a research problem/question foregrounded against the relevant literary context and/or research context
3. Apply relevant and result-yielding research methods, approaches and theories to the conduct of qualitative and quantitative research
4. Organise and evaluate the relevant sources of scientific evidence to construct a well-supported, research statement and/or logical argument
5. Devise a framework of expository writing to present the trajectory, context and outcome of the research

CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

### **Preliminary Requirements:**

- Knowledge of the types of Research, Deductive and Inductive Arguments, Critical Approach, Research ethics, Bibliography.
- The research work must be strictly an individual sincere work, the result of ardent study and pursuit of excellence. The work should not exceed 10,000 words and there will be viva- voce by an examiner.
- This module gives the opportunity to undertake supervised work on a dissertation in Literature or English Language Teaching up to 10,000 words, on a topic of one's choice agreed with the Guide/supervisor.
- **It is strongly recommended that the student must be motivated to begin the Preliminary reading and survey of related secondary sources for the dissertation in the first summer term and vacation holidays.**
- The students can be encouraged to present papers in the conferences and to publish in the proposed topic.

### **Essential Reading**

a) Where And How To Find Secondary Literature

b) How to Write a Scholarly Paper

From *An Introduction to Literary Studies*- Mario Klarer Pub.London,Routledge. 2004

c)The Undergraduate Dissertation

From *In Pursuit of English Studies*.Barry,Peter.New Delhi, Bloomsbury.2014

d)Gupta,Suman.ThePlace of Theory In LiteraryDisciplines

From DaSousa, Delia Correa and W.R.Owens. *The Handbook to Literary Research*, second Edition. Routledge: Taylor and Francis Group, The Open University Abingdon-Oxon. 2010.

### **End-Semester Examination 100 Marks**

#### 1. Question Paper Pattern A:

Section A – Annotations 150 words – 4 questions out of 6 (4x5 = 20)

Section B – Short Answers - 300 words - either/or pattern (4x5 = 20)

Section C – Essays - 900 words - 4 questions out of 6 (4x15 = 60)

#### 2. Question Paper Pattern B:

Section A – Short Questions 80 words – 10 questions out of 12 (10x2 = 20)

Section B – Short Answers - 300 words - either/or pattern (4x5 = 20)

Section C – Essays - 900 words - 4 questions out of 6 (4x15 = 60)

#### 3. Question Paper Pattern C:

Independent Elective I A, II A, IIIA, IV A

Section A – (1x20 = 20)

Objective Type questions on Identification:

Section B – (1x20 = 20)

Objective Type questions on History and Theory of Literary Criticism:

Section C – (1x40 = 40)

Objective Type questions on Cultural and Historical Contexts:

#### 4. Question Paper Pattern D:

Independent Elective – Course I B, II B, III, IV B

Answer any five questions out of 8 - 5x20=100

**SEMESTER – II**  
**PCCOG20 – Research Methodology**

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: II</b>	PCCOG20	Research Methodology	Theory	Core	5	4	100

**Course Objectives**

To introduce to the students the concept of research, process of conducting research, methods and techniques of presenting research report

**Course Outcomes (CO)**

The learners will be able to

1. To understand the concept of research methodology
2. To collect and compile data for the purpose of research
3. To get in depth knowledge on sampling and sampling methods
4. To analyse and present the data using statistical tools
5. To construct research report

**COs consistency with POs**

## **Course Syllabus**

### **Unit I: Introduction to Research**

**(15 hours)**

- 1.1 Research – Definition – Characteristics – Nature and scope - Social Science research – Usefulness of social science research (K1, K2, K3)
- 1.2 Approaches to Research – Historical Approach- Descriptive Approach – Case study Approach – Experimental Approach – Exploratory research Approach (K2, K3, K4)
- 1.3 Research Process – meaning – stages in research work- Formulation of Research Problem (K2, K3, K4)
- 1.4 Survey Of literature – determining the sources of information – screening and compiling the information-presenting the relevant information – review of concept – review of past studies (K1, K2, K3)
- 1.5 Research Design - Meaning – Content – features of Good research design – Types – Factors affecting Research Design (K1, K2 , K3, K4)
- 1.6 Hypothesis- Meaning – Definition – Need – Formulation of Hypothesis – Characteristics of Hypothesis - Types of Hypothesis – Test of Hypothesis – General problems in testing Hypothesis (K2, K3, K4)

### **Unit II: Nature and Collection of Data**

**(15 hours)**

- 2.1 Nature of Data – meaning – classification of Data : Primary and Secondary data – Source of information (K1, K2, K3)
- 2.2 Secondary data- sources- problems in using the data- selection of appropriate method of data collection (K1, K2, K3)
- 2.3 Interview technique – meaning – types – Merits and demerits of interview as a method of Data collection – How to make interview successful (K3, K4, K5)
- 2.4 Observation – Meaning – Definition – Types – Merits and Limitation – Steps to make Observation successful (K3, K4, K5)
- 2.5 Questionnaire Method – Meaning – Definition – Types of Questionnaire – Features of

good Questionnaire- Pilot study – Merits and Demerits (K3, K4, K5)

2.6 Schedule Method - Meaning – Features – Distinction between Questionnaire and Schedule- Use of Schedules (K1, K2, K3)

**Unit III: Sampling (15 hours)**

3.1 Sampling – introduction – merits and demerits of sampling (K2, K3)

3.2 Law of sampling (K2, K3)

3.3 Essentials of sampling (K3, K4, K5)

3.4 Methods of Sampling (K2, K3)

3.5 Determination of Sample Size – Factors determining sample size (K2, K3)

3.6 Sampling and Non – sampling errors (K3, K4)

**Unit IV: Statistical Techniques and Research Presentation (15 hours)**

4.1 Statistical Analysis- measures of central tendency ((K3, K4, K5)

4.2 Measures of Dispersion (K3, K4, K5)

4.3 Skewness and Kurtosis (K3, K4, K5)

4.4 Simple Correlation – Karl Pearson’s Coefficient of Correlation – Spearman’s Rank Correlation Coefficient (K3,K4,K5)

4.5 Linear Regression Model ( K4, K5, K6)

4.6 Diagrammatic and Graphical Representation – Interpretation of results – Percentages – Bar Diagrams – Pie charts (K2, K3, K4, K5)

**Unit V: Research Reports (15 hours)**

5.1 Research Reports (K1, K2, K3)

5.2 Structure and Components of Reports(K2, K3, K4)

5.3 Types of Reports (K1, K2, K3)

5.4 Features of Good Research Report (K1, K2, K3)

5.5 Foot Notes and Citation (K1, K2, K3)

5.6 Plagiarism and consequences of Plagiarism (K1, K2, K3)

**Theory : Problems – 80:20**

## **Course Syllabus**

### **Unit I: Correspondent Banking System**

**(15 hours)**

- 1.1 Correspondent Banking – Meaning – Functions – Bank Account (K1,K2, K4)
- 1.2 Electronic modes of Transmission/ Payment Gateways – SWIFT, CHIPS, CHAPPS, etc.  
(K1, K2 & K3)
- 1.3 NRI Banking – NRE Account - Facilities to NRIs – Loans and Advances (K1, K2, K3, K4)
- 1.4 Exchange Control Guidelines for exporters – facilities for Exporters – Export Finance - Exporters Gold Card scheme – Forfeiting and factoring (K2,K3, K4)
- 1.5 Exchange Control Guidelines for importers – Import Finance (K2,K3, K4)
- 1.6 Trade credit – Supplier’s credit and buyer’s credit (K2,K3)

### **Unit II: Letter of Credit**

**(15 hours)**

- 2.1 Documentary Letter of credit – Meaning – Definition – Types of LC - Operation of Letter of credit (K1, K2, K3)
- 2.2 UCPDC 600 and Important Articles (K2, K4)
- 2.3 Liabilities, Responsibility and Rights of the Parties to LC- Risk Relating to LC Transactions (K2, K3)
- 2.4 Document under Letter of Credit (K1, K2, K4)
- 2.5 Stand by letter of credit (K2, K3)
- 2.6 Uniform Rules for Bank- to- Bank Reimbursements-525 (K2, K4)

### **Unit III: Foreign Exchange and its Operation**

**(15 hours)**

- 3.1 Foreign Bank – Meaning – Foreign Branch – Meaning –Foreign Exchange Rate and Foreign Exchange Business – Definition – Foreign Exchange Markets – Factors determining exchange rates (K1, K2, K3)
- 3.2 Exchange Rate mechanism Foreign exchange Dealing Room Operations – Management and Control of a Dealing Room (K2, K4)
- 3.3 RBI / FEDAI Guidelines (K2, K3, K4)

3.4 Basics of Foreign Exchange Derivatives (K1, K2, K3)

3.5 Risk – meaning – definition – Risks in foreign exchange operations (K1, K2)

3.6 Management of risk and guidelines on Risk management (K2, K4)

**Unit IV: Risk Management (15 hours)**

4.1 Risk Management in Foreign Trade – Role of ECGC – Introduction – Definition of Risk and Risks in International Trade – Country Risk (K1, K2, K3)

4.2 Export Credit in International Trade – ECGC of India – Role and Products - ECGC Policies and financial Guarantees - Other aspects relating to ECGC Policies and Guarantees (K2, K4)

4.3 EXIM Bank - Role – Functions and Facilities (K1, K2, K3)

4.4 RBI: Role and Exchange Control Regulations in India – Foreign Exchange Management Act (1999) (K1, K2, K3)

4.5 FEDAI: Role – Rules (K1, K2, K3, K4)

4.6 External Commercial borrowings – American Depository Receipts (K1, K2, K3)

**Unit V: Balance Sheet Management (15 hours)**

5.1 Components of Assets and Liabilities in Bank's Balance Sheet – Banks Profit and loss account (K1, K2, K3)

5.2 Asset and Liability Management – Significance- Purpose and Objective (K1, K2, K4)

5.3 Banking Regulation and Capital (K1, K2, K4)

5.4 Capital Adequacy- The Basel-II (K1, K2, K4)

5.5 Supervisory Review Process (K1, K2, K4)

5.6 Market Discipline (K1, K2, K3)

## **Course Syllabus**

### **Unit I: Introduction (15 hours)**

- 1.1 International Marketing Management – Meaning – Definition – Scope (K1, K2, K3)
- 1.2 International Marketing Vs Domestic Marketing (K1, K2, K3)
- 1.3 Need and Importance of International Marketing (K1, K2, K3)
- 1.4 Problems and Challenges in International Marketing (K1, K2, K3)
- 1.5 Reasons for rapid Internationalization (K1, K2, K3)
- 1.6 Global Marketing of Services (K1, K2, K3)

### **Unit II: Product Planning for Export (15 hours)**

- 2.1 Need for product planning – Product Life Cycle in International Marketing (K2, K3, K4)
- 2.2 Packaging – Role of IIP in Export packaging (K2, K3, K4)
- 2.3 Pricing for Export – factors determining prices (K2, K3, K4)
- 2.4 Role of price and non-price factors in International marketing (K2, K3, K4)
- 2.5 Marginal cost pricing – Elements of costs for export price quotations – Impact (K2, K3, K4)
- 2.6 Quotations – Export price strategy (K2, K3, K4)

### **Unit III: Promotion of Product internationally (15 hours)**

- 3.1 Nature of International Advertising – Unified or Diversified Advertising Strategy (K2, K3, K4)
- 3.2 Promotional Methods – Campaign Design – Generic promotion in International Marketing (K2, K3, K4)
- 3.3 Market entry and Overseas Distribution System - Methods of entry in the foreign market (K2, K3, K4)
- 3.4 Channels of Distribution – Elements of Distribution Policy (K2, K3, K4)
- 3.5 Factors affecting channels of decisions (K2, K3, K4)
- 3.6 Exporting through agents or distributors – Role of Export Trading Houses (K2, K3, K4)

### **Unit IV: Market Research (15 hours)**

- 4.1 Overseas Market Research – Meaning and Need (K3, K4)
- 4.2 Designing and testing of a Questionnaire (K3, K4)
- 4.3 Conduct of Overseas Market Research (K3, K4)
- 4.4 Marketing plan for exports (K3, K4)

### **Unit V: Risks and Risk Management in International Marketing (15 hours)**

- 5.1 Risks and Management of Risks in International Marketing (K3, K4, K5)
- 5.2 Export Documentation (K3, K4)

- 5.3 Role of Export Documentation (K3, K4)
- 5.4 Significance of some export documents (K3, K4)
- 5.5 Common defects in export documents (K3, K4, K5)
- 5.6 Processing of an Export Order (K3, K4)

5	M	M	M	H	H	M

Low – L, Medium – M, High - H

## **Course Syllabus**

### **Unit I: Introduction (15 hours)**

- 1.1 Derivative – Definition – Meaning (K1, K2)
- 1.2 Characteristics of derivatives (K1, K2)
- 1.3 Objectives of derivatives (K1, K2)
- 1.4 Types of derivatives (K1, K2)
- 1.5 Instruments of derivatives (K1, K2)
- 1.6 Policies in financial risk (K1, K2)

### **Unit II: Future Contracts (15 hours)**

- 2.1 Forward contract structure (K1, K2, K3)
- 2.2 Features, forward spread agreement (K1, K2)
- 2.3 Exchange rate agreement (K1, K2)
- 2.4 Forward exchange rates in India, value of forward contract (K1, K2)
- 2.5 Forward rates computation, forward contract (K1, K2, K3)
- 2.6 Delivery cancellation, extension, terms & conditions (K1, K2, K3)

### **Unit III: Forward Contracts (15 hours)**

- 3.1 Forward contract structure & features specifications (K1, K2, K3)
- 3.2 Mechanism of trading, types of trading, determining gains & issues (K1, K2)
- 3.3 Daily settlement, stock exchange of future contracts (CBOT & CME) (K1, K2)
- 3.4 Principle of forward & future contract, option on future (K1, K2)
- 3.5 Hedging in future & regulations of future contract (K1, K2, K3)
- 3.6 Difference: forward & future contract (K1, K2, K3)

### **Unit IV: Option Contracts (15 hours)**

- 4.1 Options structure & features (K1, K2, K3)
- 4.2 Options terminology, market margin requirement (K1, K2)
- 4.3 Taxation of option pricing, option pricing model (K1, K2)

4.4 Principles of option pricing, option pricing model (K1, K2)

4.5 Binomial model, Black Schole model (K1, K2, K3)

4.6 Stock option, determining option premium, option pricing strategies (K1,K2,K3, K4)

### **Unit V: Hedging**

**(15 hours)**

5.1 Hedging of foreign exchange and its exposure (K1, K2, K3)

5.2 Hedging with the money market (K1, K2)

5.3 Current options (K1, K2)

5.4 Currency future (K1, K2)

5.5 Internal Hedging strategy (K1, K2, K3)

5.6 Speculation in foreign exchange & money market (K1,K2,K3, K4)

### **Textbook:**

Low – L, Medium – M, High - H

## **Course Syllabus**

### **Unit I: General Foundations and Demand Analysis**

- 1.1 General Foundations of Managerial Economics - Economic Approach (K1, K2, K3)
- 1.2 Circular Flow of Activity (K1, K2, K3)
- 1.3 Firm - Nature of the Firm - Objectives of Firms (K1, K2, K3)
- 1.4 Demand Analysis and Estimation - Individual, Market and Firm demand -Determinants of demand (K1, K2, K3, K4, K5)
- 1.5 Elasticity measures and Business Decision Making (K2, K3, K4)
- 1.6 Demand Forecasting (K2, K3, K4)

### **Unit II: Law of Proportions and Cost functions**

- 2.1 Law of Variable Proportions (K1, K2, K3, K4, K5, K6)
- 2.2 Theory of the Firm (K1, K2, K3)
- 2.3 Production Functions in the Short and Long Run (K1, K2, K3, K4)
- 2.4 Cost Functions – Determinants of Costs – Cost Forecasting - Short Run and Long Run Costs
- 2.5 Type of Costs (K1, K2, K3)
- 2.6 Analysis of Risk and Uncertainty (K1, K2, K4)

### **Unit III: Markets and Competition**

- 3.1 Product Markets -Determination Under Different Markets – Market Structure (K1, K2, K3)
- 3.2 Perfect Competition – Monopoly (K1, K2, K3, K4)
- 3.3 Monopolistic Competition (K1, K2, K3, K4)
- 3.4 Duopoly – Oligopoly (K1, K2, K3, K4)
- 3.5 Pricing and Employment of Inputs Under Different Market Structures (K1, K2, K3, K4)
- 3.6 Price Discrimination - Degrees of Price Discrimination (K1, K2, K3, K4)

### **Unit IV: National Income, Business Cycles, Fiscal and Monetary Policies**

- 4.1 Introduction to National Income – National Income Concepts (K1, K2, K3)
- 4.2 Models of National Income Determination (K1, K2, K3, K4)
- 4.3 Economic Indicators (K1, K2, K3)

4.4 Technology and Employment - Issues and Challenges (K1, K2)

4.5 Business Cycles – Phases– Management of Cyclical Fluctuations (K1, K2, K3)

4.6 Fiscal and Monetary Policies (K1, K2, K3)

### **Unit-V Macro Economics**

5.1 Macro Economic Environment (K1, K2, K3)

5.2 Economic Transition in India (K1, K2, K3, K4)

5.3 Liberalization, Privatization and Globalization (K1, K2, K3)

5.4 Business and Government (K1, K2, K3)

5.5 Public-Private Participation (PPP) (K1, K2, K3)

5.6 Industrial Finance - Foreign Direct Investment(FDIs) (K1, K2, K3)

### **Textbook:**

**SEMESTER – III**  
**PCCOI20 – Advanced Cost and Management Accounting**

<b>Year:</b> II	<b>Course Code:</b> PCCOI20	<b>Title of the Course:</b> Advanced Cost and Management Accounting	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

To teach the students the advanced techniques in Cost and Management Accounting, enabling corporate reporting and decision making

**Course Outcomes (CO)**

The learners will be able to

1. To teach the students the advanced techniques in Cost and Management Accounting, enabling corporate reporting and decision making
2. Compute profits or losses of processes through equivalent production units
3. Analyse the profitability of contracts by preparing Contract Accounts
4. Ascertain and assess variances in material, labour, overheads and sales using Variance Analysis
5. Prepare Funds flow statement and find out the increase or decrease in working capital

**COs consistency with POs**

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

(Low - L, Medium – M, High - H)

**COs consistency with PSOs**

CO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
1	H	M	H	H	M	M
2	H	H	M	H	H	M
3	H	M	H	M	M	M
4	H	M	H	M	H	H
5	M	M	M	H	H	M

Low – L, Medium – M, High - H

## **Course Syllabus**

### **Unit I: Costing Concepts, Process and Contract Costing (15 hours)**

- 1.1. Uniform Costing- Inter-firm Comparison (K1, K2, K3)
- 1.2. Cost Reduction and Cost Control - Activity Based Costing (K1, K2, K3)
- 1.3. Process Costing - Ascertainment of Equivalent Production Units (K1, K2, K3)
- 1.4. Process Costing - Inter Process Profits (K1, K2, K3)
- 1.5. Contract Costing - Cost Plus Contract (K1, K2, K3)
- 1.6. Contract Costing – Escalation Clause (K1, K2, K3)

### **Unit II: Managerial Decision Making (15 hours)**

- 2.1. Decision Making – Marginal Costing (K2, K3, K4)
- 2.2. Limiting or Key Factor – Selling Price Decision (K2, K3, K4)
- 2.3. Pricing of Export Sales (K2, K3, K4)
- 2.4. Sales Mix Decision - Plant shut down Decision (K2, K3, K4)
- 2.5. Differential Cost Analysis (K3, K4, K5)
- 2.6. Practical Applications of Differential Cost Analysis (K3, K4, K5)

### **Unit III: Standard Costing and Variance Analysis (15 hours)**

- 3.1. Standard Costing and Variance Analysis- Material (K2, K3, K4)
- 3.2. Standard Costing and Variance Analysis- Labour (K2, K3, K4)
- 3.3. Standard Costing and Variance Analysis- Overheads (K2, K3, K4)
- 3.4. Standard Costing and Variance Analysis- Sales (K2, K3, K4)
- 3.5. Standard Costing and Variance Analysis- Profit (K2, K3, K4)
- 3.6. Problems on Material and Labour Variances together (K3, K4, K5)

### **Unit IV: Funds Flow Analysis (15 hours)**

- 4.1. Funds Flow Statement - Calculation of changes in Working Capital (K2, K3, K4)
- 4.2. Calculation of Funds from operations (K2, K3, K4)

4.3. Preparation of Funds Flow Statement without adjustments (K2, K3, K4)

4.4. Preparation of Fund Flow Statement with adjustments (K2, K3, K4)

### **Unit V: Cash Flow Analysis**

**(15 hours)**

5.1 Calculation of Cash from operations (K2, K3, K4)

5.2. Calculation of Cash from Operating activities (K2, K3, K4)

5.3. Calculation of Cash from Investing activities (K2, K3, K4)

5.4. Calculation of Cash from Financing activities (K2, K3, K4)

5.5. Preparation of Cash Flow Statement (K2, K3, K4)

### **Theory: Problems – 20: 80**

**SEMESTER – III**  
**PCCOJ20 – Services Marketing**

<b>Year:</b> II	<b>Course Code:</b> PCCOJ20	<b>Title of the Course:</b> Services Marketing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

To make the students aware of the basic concepts of various Services and their Marketing aspects

**Course Outcomes (CO)**

The learners will be able to

1. To understand the concept of services marketing and services sectors in India
2. To analyse and forecast demand situations and patterns in service sectors
3. To develop skills on producing products to meet out the needs of target market
4. To segment market into different groups based on various factors
5. To get insight knowledge on consumer behaviour and need for customer relationship management

**COs consistency with POs**

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

(Low - L, Medium – M, High - H)

**COs consistency with PSOs**

CO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
1	H	M	H	H	M	M
2	M	H	M	H	H	H
3	H	M	M	M	M	M
4	H	M	M	M	H	H
5	M	M	M	H	H	M

Low – L, Medium – M, High - H

## **Course Syllabus**

### **Unit I: Introduction**

**(15 hours)**

- 1.1 Introduction to services marketing - Meaning and Definition (K1, K2, K3)
- 1.2 Differentiating goods from services - characteristics of services (K2, K3, K4)
- 1.3 Reasons for the growth of service sector (K2, K3, K4)
- 1.4 Career opportunities in service sector (K1, K2, K6)
- 1.5 The service sector in Indian Economy - Reasons for the growth of service sector in India (K1, K2, K3)
- 1.6 Key service businesses in India (K2, K3, K4, K6)

### **Unit II: Product Mix**

**(15 hours)**

- 2.1 Service demand management - Demand situation - Demand patterns - Demand variations (K2, K3, K4, K5)
- 2.2 Demand forecasting methods - Demand management - Waiting line management (K2, K3, K4)
- 2.3 Basic service package - Customer value hierarchy - Flower of service (K3, K4, K5)
- 2.4 Development of new service - Service product mix, Service Life cycle Management (K2, K3, K4)
- 2.5 Pricing of a service - objectives, approaches & strategies (K2, K3, K4, K5)
- 2.6 Service: transaction, location, provider - Distribution - Flow of service - Channels of Distribution (K2, K3, K4, K5, K6)

### **Unit III: Market Segmentation**

**(15 hours)**

- 3.1 Market Segmentation - Approaches to Market Segmentation - Bases for Market Segmentation - Technographic segmentation (K1, K2, K3, K4)
- 3.2 Criteria for Market Segmentation - Stages in Market Segmentation (K1, K2, K3, K4)
- 3.3 Competitive threats: from industry perspective, market perspective (K1, K2, K3)
- 3.4 Competition analysis - Competitive strategies - Achieving competitive analysis (K1, K2, K3)

3.5 Perception of Service Quality - Determinants of Service Quality - Process of service Quality Management (K1,K2,K3, K4)

3.6 The GAP Model of service quality – SERVQUAL - Research on service quality (K2,K3,K4,K5, K6)

**Unit IV: Consumer Behaviour (15 hours)**

4.1 Consumer Behavior - Introduction - buyers, consumers, customers (K1, K2, K3)

4.2 Factors influencing Consumer Behaviour – Development of consumer expectations (K1, K2, K5, K6)

4.3 Service Perception - Consumer purchase decision process (K2, K3, K4)

4.4 Process of Strategies Planning - Steps in strategic planning (K2, K3, K4)

4.5 Market oriented service strategy - Service triangle (K2, K3, K4)

4.6 Service marketing mix - Strategy implementation, evaluation & control (K2, K3, K4)

**Unit V: Customer Relationship Management in different areas (15 hours)**

5.1 CRM - benefits, successful drives and frame work (K2, K3, K4)

5.2 Goals of CRM - Organizational system for CRM – ERM -Interaction process (K2, K3, K4)

5.3 CRM budget, the interaction process, e-CRM & its types (K2, K3, K5)

5.4 The marketing of banking services (K1, K2)

5.5 Consumer expectations from industries & business (K1,K2,K3)

5.6 Consumer movement in India, legal & administrative mechanism for consumer protection in India (K2,K3,K5,K6)

**SEMESTER – III**  
**PCCOK20 – Advanced Business Statistics**

<b>Year:</b> II	<b>Course Code:</b> PCCOK20	<b>Title of the Course:</b> Advanced Business Statistics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

To teach the students the application of statistical techniques for interpreting and drawing conclusion for business problems.

**Course Outcomes (CO)**

The learners will be able to

1. Determine and use partial and multiple correlation and regression.
2. Create awareness on non-parametric tests and their application in research real life situation.
3. Frame and test a hypothesis and ability to determine statistical significance between two variables.
4. Apply and compute chi-square and test a hypothesis on specific value of population variance.
5. Apply, compute and interpret f-distribution and ANOVA.

**COs consistency with POs**

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

(Low - L, Medium – M, High - H)

CO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
1	H	M	H	H	M	M
2	M	H	M	H	H	M
3	H	M	M	M	M	M
4	H	H	M	M	H	H
5	M	M	M	H	H	M

Low – L, Medium – M, High - H

## Course Syllabus

### **Unit I: Partial and Multiple Correlations and Regressions (15 hours)**

1.1 Correlation – Meaning – Importance – Zero order, first order and second order Correlation – Properties of correlation – significance of Correlation coefficient (K1,K2,K3)

1.2 Partial Correlation (K3,K4, K5, K6)

1.3 Part Correlation (K3,K4, K5, K6)

1.4 Multiple Correlation (K3,K4, K5, K6)

1.5 Multiple Regression- least Square regression model (K3,K4, K5, K6)

1.6 Multiple regression- alternative model for least square regression (K3,K4, K5, K6)

### **Unit II: Non – Parametric Tests (15 hours)**

2.1 Non- Parametric test – meaning – characteristic - Merits and limitation (K1 & K2)

2.2 Sign test – one sample sign test – paired sample sign test – sign test for large sample (K3,K4, K5, K6)

2.3 Mann- Whitney U- test (K3,K4, K5, K6)

2.4 One Sample Run Test (K3,K4, K5, K6)

2.5 Kruskal-Wallis test ( H Test ) (K3,K4, K5, K6)

2.6 Spearman's Rank Correlation (K3,K4, K5, K6)

### **Unit III: Testing of Hypotheses (Z and T- Test) (15 hours)**

3.1 Hypothesis testing – Procedure of testing Hypothesis – Types of error in testing hypothesis (K1,K2,K3)

3.2 Hypothesis testing for Population parameter with Large samples ( z- test ) – Test for specified mean – Test for equality of 2 mean – test for specified standard deviation – Test for equality of 2 standard deviation (K3,K4, K5, K6)

3.3 Hypothesis testing for Population parameter with Large samples ( z- test ) – Test for specified Proportion - Test for equality of 2 Proportion- Test for observed small Correlation coefficient – Test for observed high Correlation coefficient –Test for difference between 2 observed high correlation coefficient (K3,K4, K5, K6)

- 3.4 Hypothesis testing for population mean With Small Samples- Properties –Uses of t-distribution (K1,K2,K3)
- 3.5 T- test: significance of the mean of a random sample- testing difference between mean of two sample (independent sample ) (K3,K4, K5, K6)
- 3.6 T- test: hypothesis testing for difference between mean of two sample ( Dependent / Paired observation ) – testing significance of observed correlation coefficient (K3,K4, K5, K6)

**Unit IV: Chi-square Distribution (15 hours)**

- 4.1 Chi square Distribution – properties of  $\chi^2$  distribution condition for application on Chi-square distribution (K1,K2,K3)
- 4.2 Test of Independency (K3,K4, K5, K6)
- 4.3 Test of goodness of fit (I) (K3,K4, K5, K6)
- 4.4 Test of goodness of fit (II) (K3,K4, K5, K6)
- 4.5 Test of Population variance (K3,K4, K5, K6)
- 4.6 Test for homogeneity (K3,K4, K5, K6)

**Unit V: F-Distribution and Analysis of Variance (15 hours)**

- 5.1 F- test – Assumptions – Applications (K1,K2)
- 5.2 F-test Or the Variance Ratio Test (K1, K3, K4, K5, K6)
- 5.3 Analysis of Variance – One Way Classification (I) (K3,K4, K5, K6)
- 5.4 Analysis of Variance – One Way Classification (II) (K3,K4, K5, K6)
- 5.5 Analysis of Variance – Two Way Classification (I) (K3,K4, K5, K6)
- 5.6 Analysis of Variance – Two Way Classification (II) (K3,K4, K5, K6)

**Theory: Problems – 20: 80**

**SEMESTER – III**  
**PCCOL20 – Human Resource Management**

<b>Year:</b> II	<b>Course Code:</b> PCCOL20	<b>Title of the Course:</b> Human Resource Management	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

To provide knowledge to the students regarding the management of Human Resources in organizations

**Course Outcomes (CO)**

The learners will be able to

1. Imbibe the knowledge on human resources management and its functions.
2. Design and analyse a job in organisation.
3. Evaluate a job in organisational structure.
4. Assimilate the knowledge on career development and to develop career path to employees of an organisation.
5. Identify and appraise performance of employees of an organisation.

**COs consistency with POs**

CO	PO					
	1	2	3	4	5	6

## **Course Syllabus**

### **Unit I: Introduction to Human Resource Management (15 hours)**

- 1.1. Human Resource Management – Evolution (K1, K2, K3)
- 1.2. Objectives – Responsibilities ( K2, K3)
- 1.3. Man Power Planning – Objectives ( K2, K3)
- 1.4. Man Power Planning – Elements ( K2, K3)
- 1.5. Process of Man Power Planning ( K2, K3)

### **Unit II: Job Analysis and Design (15 hours)**

- 2.1. Job Satisfaction – Concept – Determinants and measurements (K2, K3, K4)
- 2.2. Job Analysis – Methods of Job Analysis (K2, K3, K4)
- 2.3. Job Design – Job Description – Job Specification (K2, K3, K4)
- 2.4. Job Evaluation – Job Enrichment (K2, K3, K4)
- 2.5. Recruitment and Selection – Sources of Recruiting Human Resource (K2, K3, K4)
- 2.6. Selection process – Testing and Interviewing (K2, K3, K4)

### **Unit III: Career Planning Development and Evaluation (15 hours)**

- 3.1. Career Planning and Development – Stages and Process of Career Development(K3,K4)
- 3.2. Training, Placement and Development – Training Needs (K3,K4)
- 3.3. Training Programmes (K3, K4, K5)
- 3.4. Executive Development – Importance (K2, K3, K4)
- 3.5. Evaluation Process (K2, K3, K4)
- 3.6. Internal Mobility and Separation – Promotion, Transfer, Lay-off and Discharge (K2, K3, K4)

### **Unit IV: Performance Appraisal of Employee (15 hours)**

- 4.1. Appraising Employee Performance – Basic considerations (K1, K2, K3)
- 4.2. Methods of Performance Appraisal (K3, K4, K5)

4.3. Requisites of a Sound Performance Appraisal System (K2, K3, K4)

4.4. Employee Incentives and Benefits (K3, K4, K5)

4.5. Effective Measures of Incentives and Benefits (K3, K4, K5)

**Unit V: Grievances and Work life balance**

**(15 hours)**

5.1. Employee Grievances – Causes (K1, K2, K3)

5.2. Essentials of Sound Grievance Procedure - Redressal of Grievances (K2, K3, K4)

5.3. Employee Discipline – Objectives – Types – Enforcement of Discipline (K1, K2, K3)

5.4. Causes of Indiscipline – Procedure – Disciplinary actions (K2, K3)

5.5. Quality of Work Life – Concept and Determinants of Quality of Work Life (K2, K3, K4)

5.6. Recent Trends in HRM – Talent Management (K2, K3, K4)

**Textbook:**

**SEMESTER – III**  
**PCCOM20 – Internship Training Programme**

<b>Year:</b> II	<b>Course Code:</b> PCCOM20	<b>Title of the Course:</b> Internship Training Programme	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 2	<b>Credits</b> 2	<b>Marks</b> 100
<b>Sem:</b> III							

**Course Objectives**

To give practical training to students in the areas of accounts, taxation, human resource management, etc.

**Course Outcomes (CO)**

The learners will be able to

1. Handle the accounts of any type of concern
2. File Income tax returns of individuals, firms and other type of organisations
3. File GST returns of individuals, firms and other type of organisations
4. Conversant with the procedures for claiming Insurance claims on various occasions
5. Manage the human resource of organisations

**COs consistency with POs**

## Design of Internship Training Programme (ITP)

- **Period:** The Internship Training Programme (ITP) is for a period of 45 working days only, from December of the previous year to June of the next year (5 days in December, 4 days in April and balance days in May and June ), with a minimum of 5 hours and a maximum of 8 hours per day. The ITP shall be during the day only (8 a.m. to 6 p.m.)
- **Attendance:** The attendance of the trainee shall be strictly monitored by the Supervisor. If the trainee does not commence the training on the specified date or if the trainee is irregular during the programme, the same shall be immediately intimated to the Coordinator
- **Assignment:** The trainee shall be assigned work related to Audit / Finance and Accounts / H.R. / Stores or any other Commerce related areas.
- **Fortnightly Report:** To ensure proper utilisation of time by the trainee, a fortnightly report duly attested by the Supervisor after checking its authenticity shall be maintained and this report shall be finally submitted by the trainee to the Coordinator at the end of the training period.
- **Final Report by the trainee:** The trainee shall write a detailed report of the Training Programme, get it authenticated by the Supervisor and submit the same to the Coordinator of the Programme, based on which a *Viva voce* Examination shall be conducted.
- **Supervisor's Final Report:** After the completion of the programme the Supervisor shall fill up the 'Supervisor's Final Report' in the given format and send the same to the Coordinator within a week of completion of the Programme.
- **Viva voce Examination:** The trainee shall undergo a *Viva voce* Examination based on the Final report submitted by her. The *Viva voce* shall be conducted by an External Examiner.
- The allotment of marks for the Internship Training Programme is as follows:

Criteria	Marks
Internal Examiner ( ITP Report)	40
External Examiner ( ITP Report)	40

## **Course Syllabus**

### **Unit I: Concept of Total Quality Management**

- 1.1 Quality – Definition – Dimensions - Total Quality Management – Definition – Core Concepts of TQM – Basics (K1, K2, K3)
- 1.2 Principles of TQM – Quality Planning – Statements - Strategic Planning – Basic Concepts of TQM (K1, K2, K3)
- 1.3 Leadership – Role of Senior Manager – Quality Control – Quality Objective – Team Building (K1, K2, K3)
- 1.4 Barriers to Implementation of TQM – Factors Influencing Quality Cost (K1, K2, K3)
- 1.5 Cost of Quality – Analysis Techniques of Quality Cost (K1, K2, K3)
- 1.6 Economics of Quality – Quality Assurance (K1, K2, K3)

### **Unit II: Customer Satisfaction**

- 2.1 Customer Focus – Customer Satisfaction – Customer Perception of Quality – Customer Relations Management (K1, K2, K3)
- 2.2 Customer Complaints – Service Quality – Customer Retention (K1, K2, K3)
- 2.3 Customer Feedback – Supplier Relationship (K1, K2, K3)
- 2.4 Partnering, Sourcing, Supplier Selection (K1, K2, K3)
- 2.5 Rating, Certification (K1, K2, K3)
- 2.6 Relationship Development (K1, K2, K3)

### **Unit III: Continuous Process Improvement**

- 3.1 Continuous Process Improvement – PDSA cycle – Kaizen – Gemba Kaizen (K1, K2, K3)
- 3.2 5s of Continuous Process Improvement – Quality Circles (K1, K2, K3)
- 3.3 Re-engineering – Employee Involvement – Motivation – Empowerment (K1, K2, K3)
- 3.4 Teams – Recognition and Reward – Performance Appraisal (K1, K2, K3)
- 3.5 Benefits of Employee Involvement – Performance Measures (K1, K2, K3)
- 3.6 Basic Concept - Balanced Score Card – Performance Measure Presentation (K1, K2, K3)

#### **Unit IV: Seven tools of Quality and Bench Marking**

- 4.1 Seven tools of quality – Check Sheet – Pareto Diagram (K3, K4, K5)
- 4.2 Histograms – Flow chart – Causes and Effect diagrams (K3, K4, K5)
- 4.3 Control Charts – Scatter Diagrams - Bench Marking – Types (K3, K4, K5)
- 4.4 Bench Marking - Process – Shortcomings (K3, K4, K5)
- 4.5 Total Productive Maintenance – Concept (K3, K4, K5)
- 4.6 Improvement Needs (K3, K4, K5)

#### **Unit V: Quality Function Deployment**

- 5.1 Quality Function Deployment – Process – Benefits (K2, K3, K4)
- 5.2 House of Quality – Quality Management Systems – Need (K2, K3, K4)
- 5.3 Quality Management Systems - Principles – Revision of Standards – Documentation (K2, K3, K4)
- 5.4 Implementation – Auditing (K2, K3, K4)
- 5.5 Certification – ISO 9000: 2000 Quality system – ISO 14000 – Concepts (K1, K2, K3)
- 5.6 Certification – ISO 9000: 2000 Quality system – ISO 14000 – Requirement and Benefits (K1, K2, K3)

## Course Syllabus

### **Unit I: Introduction (12 hours)**

- 1.1 Enterprise Resource Planning (ERP) – Introduction – History (K1, K2, K3)
- 1.2 Common Myths about ERP – Reasons for growth of ERP Market – Advantage of ERP (K1, K2, K3)
- 1.3 Roadmap for successful implementation of ERP packages – Importance of ERP to a Company (K1, K2, K3)
- 1.4 Values created by ERP – Benefits of ERP system (K1, K2, K3)
- 1.5 Risks of ERP – Implementation of ERP – Challenges (K1, K2, K3)
- 1.6 Strategies and Process – Future directions and trends in ERP (K1, K2, K3)

### **Unit II: ERP and related technologies (12 hours)**

- 2.1 ERP and Related Technologies – Business Process Reengineering – Data Warehousing – Data Mining (K1, K2, K3)
- 2.2 Online Analytical Processing (OLAP) – Supply Chain Management (SCM) (K1, K2, K3)
- 2.3 Customer Relationship Management (CRM) – Business Process Reengineering – Evolution – Phases – Success in BPR (K1, K2, K3)
- 2.4 Data Warehousing – Related Terms – Data Warehousing System – System (K1, K2, K3)
- 2.5 Structure of Data Warehouse – Advantages (K1, K2, K3)
- 2.6 Obstacles and Uses of Data Warehouse (K1, K2, K3)

### **Unit III: Data Mining (12 hours)**

- 3.1 Data Mining – Meaning – Process – Advantages (K1, K2, K3)
- 3.2 Technologies used (K1, K2, K3)
- 3.3 OLAP – Meaning – Relationship with Data Warehousing (K1, K2, K3)
- 3.4 OLAP - Uses – Features – Styles (K1, K2, K3)
- 3.5 Product Life Cycle Management – Meaning – Benefits (K1, K2, K3)
- 3.6 Phases of Product Life Cycle – Product Life Cycle Management's support to product Life Cycle (K1, K2, K3)

### **Unit IV: Supply Chain Management and Security in ERP (12 hours)**

- 4.1 Supply chain Management – Evolution – Advantages – Business Benefits (K1, K2, K3)
- 4.2 Customer Relationship Management – Meaning – Function – Components – Uses – Features and Forms of CRM system – Benefits (K1, K2, K3)
- 4.3 Advanced Technology and ERP security – ERP Bolt –ons – Middleware – Computer crimes – Types (K1, K2, K3)
- 4.4 Security and ERP – Physical Access – Restrictions – Passwords – Firewalls – Backup (K1, K2, K3)
- 4.5 Emerging Security solutions – Human security concerns (K1, K2, K3)
- 4.6 Preventing employee crimes – Tips for defending hackers (K1, K2, K3)

## **Unit V: Tally Software**

**(12 hours)**

- 5.1 Tally Software – History – Features (K1, K2, K3)
- 5.2 General and Accounting – Group and Ledgers (K1, K2, K3)
- 5.3 Inventory in Tally – Stock Group and Items – Vouchers – Accounting and Inventory (K3, K4, K5)
- 5.4 Cost Centers and Categories – Budgets and Control (K3, K4, K5)
- 5.5 Bill wise details – Interest Calculation – Security control (K3, K4, K5)
- 5.6 GST in Tally – Additional Features in Tally 9 Release 13 (K3, K4, K5)

**Textbook:** Study Material will be provided

# **PG Department of Biochemistry**

## **M.Sc. Biochemistry**

### **SYLLABUS AND REGULATIONS**

Under

### **OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**M.Sc. Biochemistry - OUTCOME BASED EDUCATION**  
**(Effective for the batch of students admitted from the Academic Year 2020-2021)**  
**STRUCTURE OF THE COURSE AND SCHEME OF EXAMINATIONS:**

<i>I YEAR</i>		<i>I SEMESTER</i>		
Subject Code	Title of the Paper	Hrs/Week	Credit	Marks
PCBCA20	Biomolecules	6	5	40+60
PCBCB20	Human Physiology and Nutrition	6	5	40+60
PCBCC20	Cell Biology	5	4	40+60
PCBCG20	Practical I: Main Practical I	5	-	-
PCBCH20	Practical II: Main Practical II	5	-	-
PEBCA20	Elective I A: Biophysical Chemistry	3	3	40+60
PEBCB20	Elective I B: Pharmaceutical Biochemistry			
PIBCA20	Independent Elective IA: Organic Farming	-	2	100
PIBCB20	Independent Elective IB: Food Preservation	-	2	100
<b>TOTAL</b>		<b>30</b>	<b>17</b>	<b>400</b>

<i>I YEAR</i>		<i>II SEMESTER</i>		
Subject Code	Title of the Paper	Hrs/Week	Credit	Marks
PCBCD20	Analytical Biochemistry	5	5	40+60
PCBCE20	Enzymology	5	5	40+60
PCBCF20	Intermediary Metabolism	5	4	40+60
PCBCG20	Practical I: Main Practical I	5	4	40+60
PCBCH20	Practical II: Main Practical II	5	4	40+60
PEBCC20	Elective IIA: Ecology, Evolution and Developmental Biology	3	3	40+60
PEBCD20	Elective II B: Toxicology			
PNHRA20	Human Rights	2	2	40+60
PIBCC20	Independent Elective II A: Horticulture	-	2	100
PIBCD20	Independent Elective II B: Cancer Biology	-	2	100
<b>TOTAL</b>		<b>30</b>	<b>27</b>	<b>700</b>

<i>II Year III Semester</i>				
<b>Subject Code</b>	<b>Title of the Paper</b>	<b>Hrs/Week</b>	<b>Credit</b>	<b>Marks</b>
PCBCI20	Advanced Endocrinology	6	5	40+60
PCBCJ20	Advanced Immunology	6	5	40+60

## PROGRAMME OUTCOME (PO)

*On completion of the PG Programme, students will be able to:*

- PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.
- PO2:** Assimilate and apply principles and concepts towards skill development and employability.
- PO3:** Apply critical and scientific approaches to address problems and find solutions.
- PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.
- PO5:** Integrate issues of social relevance in the field of study.
- PO6:** Persist in life-long learning for personal and societal progress.

## PROGRAMME SPECIFIC OUTCOMES (PSO)

**On completion of the M. Sc Biochemistry Programme, the students will be able to:**

- PSO 1** Acquire in-depth knowledge in Biochemistry concepts and life science
- PSO 2** Develop techniques needed for the employability.
- PSO 3** Evaluate ideas and evidence rationally to produce and implement solution to the socially relevant problem
- PSO 4** Develop research skills and practice life science in an ethical and responsible manner
- PSO 5** Demonstrate understanding of the societal, health, safety, legal and cultural issues and consequent responsibilities
- PSO 6** Recognize the present need and have the ability to engage in independent and lifelong learning

	<b>PO 1</b>	<b>PO 2</b>	<b>PO 3</b>	<b>PO 4</b>	<b>PO 5</b>	<b>PO 6</b>

**SEMESTER – I**  
**PCBCA20 BIOMOLECULES**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks 100
I / I	PCBCA20	Biomolecules	Theory	Core	6	5	40+60=100

**Objective:**

To understand the salient features of biomolecules in the organization of life.

**Course Outcome (CO)**

On completion of the course, the students will be able to;

1. Outline the structural features, properties and biological importance of carbohydrates
2. Attain idea on the structural and biological aspects of proteins
3. Examine the structure of nucleic acids, its isolation and sequencing techniques
4. Gain knowledge on the structure, different forms and significance of lipids in the system
5. List out the significance of vitamins, its deficiency diseases and about the porphyrin ring containing molecules in living system

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	M	M	H	M

CO 5	H	H	L	L	H	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	M	M	M	H
CO 2	H	M	H	M	H	H
CO 3	H	H	H	H	M	H
CO 4	H	M	M	M	M	M
CO 5	H	H	M	M	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 Hours)**

- 1.1 Carbohydrates: Monosaccharides (Glucose, Fructose, Galactose, Mannose)- Structure, Functions. (K1, K2, K3)
- 1.2 Polysaccharides - Occurrence, structure, isolation, properties and functions of homoglycans - starch, glycogen, cellulose, dextrin, inulin, chitins, xylan, arabinans, galactans (K1, K2, K3, K4, K5)
- 1.3 Occurrence, structure, properties, and functions of heteroglycans - bacterial cell wall polysaccharides, glycosamino glycans (K1, K2, K3)

- 1.4 Occurrence, structure, properties, and functions of agar, alginic acid, pectin, amino sugars and deoxy sugars, blood group substances and sialic acids. (K1, K2, K3)
- 1.5 Glycoprotein and their biological applications. (K1, K2, K3)
- 1.6 Lectins structure and functions. (K1, K2, K3)

**Unit II: (18 Hours)**

- 2.1 Proteins: Classification of proteins on the basis of solubility and shape, structure, and biological functions. (K1, K2, K3)
- 2.2 Isolation, fractionation and purification of proteins. (K1, K2, K3)
- 2.3 Denaturation and renaturation of proteins. Primary structure - determination of amino acid sequence of proteins (K1, K2, K3)
- 2.4 Peptide bond: Ramachandran plot. (K1, K2, K3)
- 2.5 Secondary structure - weak interactions involved- alpha helix and beta sheet and beta turns structure. Pauling and Corey model for fibrous proteins. Collagen triple helix. Super secondary structures - helix-loop-helix. (K1, K2, K3)
- 2.6 Tertiary structure - alpha and beta domains. Quaternary structure - structure of hemoglobin. Solid state synthesis of peptides. (K1, K2, K3)

**Unit III: (18 Hours)**

- 3.1 Nucleic acids: Watson - Crick model of DNA structure. (K1, K2, K3)
- 3.2 A, B and Z - DNA Cruciform structure in DNA, formation and stability of cruciforms, miscellaneous alternative conformation of DNA, slipped mispaired DNA, parallel stranded, anisomorphic DNA (K1, K2, K3)
- 3.3 Palindrome, secondary and tertiary structure of DNA (K1, K2, K3)
- 3.4 Methods for nucleic acid sequence determination, denaturation, strand separation, fractionation, isolation and purification of DNA (K1, K2, K3, K4, K5, K6)
- 3.5 Cot curve, hypochromic effect, DNA-protein interactions. Molecular hybridization. (K1, K2, K3, K4)
- 3.6 Structure and functions of mRNA, rRNA and tRNA, Heterogenous nuclear RNA (HnRNA) (K1, K2, K3)

**Unit IV: (18 Hours)**

- 4.1 Lipids: Lipids – classification-simple, compound, derived. (K1, K2, K3)
- 4.2 Fatty acids: saturated and unsaturated fatty acids. (K1, K2, K3, K4)
- 4.3 Phospholipids - classification, structure and functions. (K1, K2, K3)
- 4.4 Amphipathic lipids -membranes, micelles, emulsions and liposomes. (K1, K2)
- 4.5 Steroids - structure and biological role of cholesterol, bile acids and bile salts. (K1, K2, K3)
- 4.6 Eicosanoids – Structure and Functions of Prostaglandins, thromboxanes, leukotriens. Types and functions of plasma lipoproteins. (K1, K2, K3)

**Unit V: (18 Hours)**

- 5.1 Vitamins - Sources, structure, daily requirements, biochemical functions and deficiency diseases of water-soluble vitamins (K1, K2, K3, K4)
- 5.2 Vitamins - Sources, structure, daily requirements, biochemical functions and deficiency diseases of fat -soluble vitamins. (K1, K2, K3)

- 5.3 Porphyrins – Biosynthesis (K1, K2, K3)
- 5.4 Porphyrins- the porphyrin ring system of chlorophyll (K1, K2, K3)
- 5.5 Porphyrins- the porphyrin ring system of hemoglobin and myoglobin (K1, K2, K3)
- 5.6 Porphyrin ring system of Cytochrome (K1, K2, K3)

**SEMESTER – I**  
**PCBCB20 - HUMAN PHYSIOLOGY AND NUTRITION**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PCBCB20	Human Physiology and Nutrition	Theory	Core	6	5	40+60= 100

**Objective:**

To study about the Physiological system of human body and Nutrients with their deficiencies.

**Course Outcomes (CO)**

On completion of the course, the students will be able to:

1. Outline the physiological system of the human body
2. Describe the general function of each organ system
3. Assess the activities of organs for maximum efficiency
4. Explain the physiology of muscle and neurotransmitters
5. Utilize knowledge on nutrients with their deficiencies

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 5	H	H	L	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 Hours)**

- 1.1 Composition and functions of blood and plasma. Blood groups (K1, K2, K3, K4)
- 1.2 Blood coagulation - mechanism, fibrinolysis, anticoagulants (K2, K3, K4)
- 1.3 Hemoglobin - structure, abnormal types of Hemoglobin (K2, K3, K4)
- 1.4 Structure of heart, cardiac cycle, heart sounds, E.C.G (elementary knowledge) (K2, K3)
- 1.5 Vasomotor circulation, coronary circulation, blood pressure (K2, K3)
- 1.6 Spleen, Lymph-composition and function of lymph -lymph Organs. (K2, K3)

**Unit II:** (18 Hours)

- 2.1 Composition, functions and regulation of saliva, gastric, pancreatic, intestinal and bile secretions (K1, K2, K3, K4)
- 2.2 Digestion and absorption of carbohydrates and lipids (K2, K3, K4)
- 2.3 Digestion and absorption of proteins (K2, K3, K4)
- 2.4 Excretory system - structure of Kidney and nephron (K2, K3)
- 2.5 Formation of urine - glomerular filtration (K2, K3, K4)
- 2.6 Tubular reabsorption of glucose, water and electrolytes, tubular secretion. (K2, K3, K4)

**Unit III:** (18 Hours)

- 3.1 Structure and functions of organs of respiration. (K2, K3, K4)
- 3.2 Mechanism and regulation of respiration Transport of gases - O<sub>2</sub> and CO<sub>2</sub>. (K2, K3)
- 3.3 Acid-base balance: Acidosis and alkalosis - Fluid electrolyte balance - regulation of water balance and sodium balance, Role of renin-angiotensin and ADH. (K2, K3, K4)
- 3.4 Structure and Function of Male and Female reproductive organs (K2, K3, K4)
- 3.5 Menstruation (K3, K4)
- 3.6 Physiology of pregnancy, parturition and lactation (K2, K3, K4)

**Unit IV:** (18 Hours)

- 4.1 Chemical composition and metabolic adaptation, neurotransmitters and cAMP, biochemical aspects of learning and memory, enkephalins and endorphins. (K2, K3)
- 4.2 Structure and function of nerves, neurons, resting and action potential. (K2, K3, K4)
- 4.3 Transmission of nerve impulses, synaptic transmission, compounds affecting synaptic transmission and neuromuscular junction. (K2, K3)
- 4.4 Composition and functions of cerebrospinal fluid. (K2, K3, K4)
- 4.5 Structure of muscle cells, muscle contraction and molecular organization of muscle (K2, K3, K4)
- 4.6 Proteins of contractile element - their organization and role in contraction (K2, K3)

**Unit V:** (18 Hours)

- 5.1 Basal metabolism- basal metabolic rate, factors affecting BMR, determination of BMR - direct and indirect method. (K1, K2, K3, K4)
- 5.2 Respiratory quotient - biological oxygen demand, their importance in nutrition (K2, K3)
- 5.3 Nutrition at different stages of life - during infancy, adolescence, pregnancy and Geriatrics. (K2, K3)

5.4 Role of fiber in diet and role of essential amino acids (K2, K3, K4)

5.5 Protein Malnutrition: Marasmus and Kwashiorkor. (K2, K3)

5.6 Minerals- macro and micro elements, [Fe, Cu, Zn, I, Ca, Na, Cl, K, P, Mg] daily requirements, functions and deficiency manifestations. (K2, K3)

**SEMESTER – I**  
**PCBCC20 - CELL BIOLOGY**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks 100
I / I	PCBCC20	Cell Biology	Theory	Core	5	4	40+60=100

**Objectives:**

To understand the Cell, Cell organelles structure, function and metabolism.

**Course Outcome (CO):**

On completion of the course, the students will be able to:

1. Relate cell as basic unit of life, its structure, organization and importance of molecular motors
2. Discuss about the various sub-cellular components of cells and its functions in the biological system
3. Assess the knowledge on techniques adopted for the identification of cellular components and cancerous cell
4. Identify the different types of cell-cell communication and its significance
5. Describe clearly about the mechanism of cell signalling and cell death

CO 5	H	H	H	M	H	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(15 Hours)**

- 1.1 Scope of cell Biology- History of cell Biology - Cell Theory – Cell Diversity: Size, Shape, Internal organization - Cell types: Prokaryotic and Eukaryotic (K1, K2, K3)
- 1.2 Functions of Cell – Prokaryotic cell: Structural Organization with the examples: Mycoplasma, *E. Coli*, Cyanobacteria (K1, K2, K3)
- 1.3 Eukaryotic cell: Structural Organization - Plant cell and Animal Cell (K1, K2, K3)
- 1.4 Plasma membrane – Structure – Molecular Model of Plasma membrane – Functions (K1, K2, K3)

- 1.5 Specializations of cell membrane – microvilli, Desmosomes, Gap junction, Tight junctions, Plasmodesmata - Cell wall – Structure – pits – functions (K1, K2, K3)
- 1.6 Structure, Composition and function of Cilia – Flagella – Filaments - Microtubules – Centrioles - Basal bodies (K1, K2, K3)

**Unit II: (15 Hours)**

- 2.1 Cellular organelles: Morphology and functions of Cytoplasm, Nucleus and nucleolus (K1, K2, K3)
- 2.2 Morphology and functions of Endoplasmic reticulum (K1, K2, K3)
- 2.3 Morphology and functions of Golgi apparatus (K1, K2, K3)
- 2.4 Morphology and functions of Mitochondria (K1, K2, K3)
- 2.5 Morphology and functions of Plastids (K1, K2, K3)
- 2.6 Morphology and functions of Lysosomes and Microbodies (K1, K2, K3)

**Unit III: (15 Hours)**

- 3.1 Cell-cell interaction - Cell adhesion proteins - Cell surface of plant, animal and cancer cells (K1, K2, K3)
- 3.2 Overview of membrane protein - peripheral and integral, molecular model of cell membrane: fluid mosaic model and membrane fluidity (K1, K2, K3)
- 3.3 Transport systems: passive and active transport by ATP powered pumps. (K1, K2, K3)
- 3.4 Chromosome – Structure and Functions (K1, K2, K3)
- 3.5 Cell cycle - phases of cell cycle - Cell division - Mitosis, (K1, K2, K3)
- 3.6 Cell division: Meiosis - Regulation of cell growth (K1, K2, K3)

**Unit IV: (15 Hours)**

- 4.1 Cell aging and death - necrosis and apoptosis (K1, K2, K3)
- 4.2 Mitochondrial and death receptor pathway (K1, K2, K3)
- 4.3 Cell signaling –Types of cell signaling-Ion channel linked; G-protein coupled receptors (K1-K5)
- 4.4 Receptor tyrosine kinases and Ras, MAP kinase pathways (K1, K2, K3)
- 4.5 Insulin receptor pathway (K1, K2, K3)
- 4.6 Functions of cell surface receptors, pathways of intracellular signal transduction (K1, K2, K3)

**Unit V: (15 Hours)**

- 5.1 Methods in cell biology: Microscopy – fluorescence, electron microscopy and phase contrast microscope. (K1, K2, K3)
- 5.2 Methods for disrupting tissues and cells, organ and tissue slice techniques
- 5.3 Isolation of clones, tissue culture techniques (Animal and Plant) (K1, K2, K3)
- 5.4 Cell fixation -fluid fixatives, freezing and section drying, fixation for electron

microscopy - buffered osmium solutions, fixation of organic and inorganic substances (K1, K2, K3)

5.5 Staining techniques acid and basic, fluorescent and radioactive dyes, staining of lipids, steroids, nucleic acids, proteins and enzymatic reaction products. (K1, K2, K3)

5.6 Histopathological studies - organ specific morpho histological examination, identification of morphological changes related to pathology. (K1, K2, K3)

**PEBCA20 ELECTIVE I A: BIOPHYSICAL CHEMISTRY**

Year/ Sem I / I	Course Code PEBCA20	Title of the Course Biophysical Chemistry	Course Type  Theory	Course Category Elective I A	H/W  3	Credits  3	Marks  40+60=100
-----------------------	---------------------------	--	---------------------------	---------------------------------------	--------------	------------------	------------------------

**Objective:**

To make the students to understand the concepts of bioenergetics and techniques.

**Course Outcome (CO):**

On completion of the course, the students will be able to,

1. Demonstrate the concept of bioenergetics and its importance
2. Describe the spectroscopic techniques – NMR, UV and MS
3. Define and recognize covalent bonding between atoms in molecules.
4. Classify organic molecules by their functional groups
5. Compare the isomeric relationship

CO 3	H	H	H	H	M	M
CO 4	H	H	H	H	M	M
CO 5	H	H	L	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(9 hours)**

- 1.1 Bioenergetics: Thermodynamics - basic concepts (K1, K2)
- 1.2 First, second and third laws of thermodynamics (K2, K3)
- 1.3 Enthalpy and entropy, exothermic and endothermic reactions - Free energy (K1, K3)
- 1.4 Measurement of free energy in chemical reactions (K1, K2, K3)
- 1.5 Equilibrium for biochemical reactions (K1, K2)
- 1.6 High energy phosphates, Redox reactions and free energy changes in biological reactions (K2, K3)

**Unit II:** (9 hours)

- 2.1 Spectroscopy and structural elucidation (K1, K2)
- 2.2 Regions of the spectrum (K2, K3)
- 2.3 Basic principles of UV, NMR and mass spectrometry and their biological applications (K3, K4)
- 2.4 FT-NMR Nuclear overhauser effect (K3)
- 2.5 Use of X-ray crystallography in the study of proteins and nucleic acids (K1, K3)
- 2.6 Use of CD in the study of proteins and nucleic acids (K1, K2)

**Unit III:** (9 hours)

- 3.1 Atomic structure and chemical bonds (K1, K2)
- 3.2 Atomic orbitals, quantum numbers. Shapes of s, p and d orbitals (K3)
- 3.3 Aufbau principle, Pauli exclusion principle and Hund's rule (K2, K3)
- 3.4 Electronic configuration of atoms (K2)
- 3.5 Formation of chemical bonds, octet rule (K1, K3)
- 3.6 Ionic bond, covalent bond and co-ordinate bonds with examples (K1, K2)

**Unit IV:** (9 hours)

- 4.1 Functional groups and reactions - Classification of organic compounds based on functional groups and their nomenclature (K1, K2, K3)
- 4.2 Biologically important organic compounds (names and structures) (K3)
- 4.3 Homolytic and heterolytic cleavage of covalent bonds (K1, K3)
- 4.4 Reactive species: electrophiles, nucleophiles and radicals (K1, K2)
- 4.5 Types of organic reactions with examples (K2, K3)
- 4.6 Inductive effect and resonance (K3)

**Unit V:** (9 hours)

- 5.1 Isomerism - Isomerism in organic compounds. Types of isomerism (K2, K3)
- 5.2 Tautomerism with special reference to lactic acid (K1, K2)
- 5.3 Stereoisomerism-Geometric isomerism with special reference to maleic acid and unsaturated fatty acids (K2, K3)
- 5.4 Partial double bond character of C-N bonds in amides. Geometrical isomerism in such compounds (K2, K3)
- 5.5 Optical isomerism, optical activity, enantiomers, diastereomers. Meso and dl forms. R-S and D-L notations in amino acids and sugars (K2, K4)
- 5.6 Conformational analysis, conformations of ethane and cyclohexane (K3)

**SEMESTER – I**  
**PEBCB20 - ELECTIVE I B : PHARMACEUTICAL BIOCHEMISTRY**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PEBCB20	Pharmaceutical Biochemistry	Theory	Elective I B	3	3	40+60=100

**Objective:**

To make the students aware of uses and abuse of drugs.

**Course Outcome (CO)**

On completion of the course, the students will be able to,

1. Outline the basic scientific concepts related to mechanism of drug action
2. Assess the drug tolerance and the factors that modify the effect of drugs
3. Explain the use of genetically engineered methods on novel drug delivery systems
4. Discuss the mechanism of action of drugs in the therapy of specific diseases
5. Use the medicinal plants in drugs as a curative

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 5	H	H	L	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit-I:**

**(9 hours)**

- 1.1 Drug - Structural feature and pharmacology activity (K1, K2, K4)
- 1.2 Prodrug concept (K1, K3)
- 1.3 Absorption -first –pass effect & distribution (K2, K4)
- 1.4 Metabolism- Phase I, II reactions, action of cytochrome p450 (K1, K2, K4)
- 1.5 Drug receptor- localization, type and subtypes, models and their drug (K2, K3)
- 1.6 Receptor interaction, agonist & antagonist (K2, K3)

**Unit-II:** (9 hours)

- 2.1 Adverse response to drugs and drug tolerance (K1, K3)
- 2.2 Idiosyncrasy (pharmacogenesis) and drug allergy - Tachyphylaxis (K2, K3, K4)
- 2.3 Drug abuse and vaccination against infection (K1, K3, K4)
- 2.4 Factor that modifies the effect of drug (K2, K3)
- 2.5 Assay of drug potency- Bioassay and immunoassay (K3, K4)
- 2.6 Plasma therapy (K1, K2, K3)

**Unit-III:** (9 hours)

- 3.1 Biotechnology and pharmacy: Genetically engineered protein and peptide agents (K2, K4)
- 3.2 Novel drug delivery systems (K1, K2, K4)
- 3.3 Non conventional routes of administration (K3, K4)
- 3.4 Anti-AIDS drug development (K1, K2, K4)
- 3.5 Oncogenes ras target for drugs (K1, K2)
- 3.6 Multi-drug resistance (K2, K3)

**Unit-IV:** (9 hours)

- 4.1 Mechanism of action of drugs used in therapy of: Respiratory system – cough, bronchial – asthma, pulmonary tuberculosis (K1, K2, K3)
- 4.2 GIT – Digestants, appetite suppressants, Hypolipidemic agents, vomiting, constipation and peptic ulcer (K2, K3)
- 4.3 Cardiovascular drugs - Structure and action of cardiac glycosides- Digoxin and Digitoxin (K2, K3)
- 4.4 Antimicrobial drugs – sulfonamides, trimethoprim, cotrimoxazole, penicillin, Aminoglycosides, Cephalosporin and bacterial resistance and macrolides (K1, K2, K3, K4)
- 4.5 Insulin and oral diabetic drugs (K2, K3, K4)
- 4.6 Antifertility and ovulation inducing drugs (K1, K2, K3)

**Unit-V:** (9 hours)

- 5.1 Drugs of plant origin: Drug dependence and abuse (K1, K3)
- 5.2 Management of self poisoning cancer (K2, K4)
- 5.3 Chemotherapy - Cytotoxic drug (K1, K2)
- 5.4 Immuno suppressive drug therapy (K3, K4)
- 5.5 New Biological Targets for Drug Development (K1, K3, K4)
- 5.6 Novel Drug Screening Strategies (K2, K3)

**SEMESTER II**  
**PCBCD20 - ANALYTICAL BIOCHEMISTRY**

Year/ Sem I / II	Course Code PCBCD20	Title of the Course Analytical Biochemistry	Course Type Theory	Course Category Core	H/W 5	Credits 5	Marks 40 + 60 =100
------------------------	---------------------------	--	--------------------------	----------------------------	----------	--------------	--------------------------

**Objectives:**

To understand the principles and applications of analytical techniques. .

**Course Outcome (CO)**

On completion of the course, the students will be able to;

1. Identify the behavior of molecules and prioritize related analytical tools
2. Interpret and use the results from a given chromatographic technique
3. Apply the electrophoretic techniques for the separation of proteins and nucleic acids
4. Pursue knowledge about centrifugation and radioactivity and critically assess advances with in the field
5. Categorize, evaluate and implement a suitable technique for a given analytical problem

**Unit-I:**

**(15 Hours)**

- 1.1 Principle - electrochemical cells (K1, K2, K3)
- 1.2 Henderson - Hasselbalch equation - Buffer capacity (K1, K2, K3)
- 1.3 pH measurement- Glass electrode: Principle and application (K1, K2, K3, K4)
- 1.4 Ion-selective electrodes: Principle and application (K1, K2, K3, K4)

1.5 Gas sensing electrodes - Oxygen electrode: Principle and application (K1, K2, K3, K4)

1.6 Biosensors. (K1, K2, K3)

**Unit-II: (15 Hours)**

2.1 Planar and Column chromatography: Principle and application (K1, K2, K3, K4)

2.2 Ion – exchange chromatography: Principle and application (K1, K2, K3, K4)

2.3 Molecular exclusion chromatography: Principle and application (K1, K2, K3, K4)

2.4 Gas – liquid chromatography: Principle and application (K1, K2, K3, K4)

2.5 HPLC (Normal phase & Reverse phase): Principle and application (K1, K2, K3, K4)

2.6 Chromatofocusing - Immunoaffinity and Capillary electrochromatography. (K1, K2, K3, K4)

**Unit-III: (15 Hours)**

3.1 General principles - Support media for Electrophoresis (K1, K2, K3)

3.2 Electrophoresis of proteins: SDS – PAGE, 2D – PAGE (Native gels & Gradient gels) (K1, K2, K3, K4, K5)

3.3 Isoelectric focusing: Principle and application (K1, K2, K3, K4)

3.4 Cellulose acetate electrophoresis: Principle and application (K1, K2, K3, K4)

3.5 Detection, estimation and recovery of proteins in gels - Protein blotting (K1, K2, K3, K4)

3.6 Electrophoresis of nucleic acids: Agarose gel electrophoresis - DNA sequencing gels - pulsed field gel electrophoresis. (K1, K2, K3, K4)

**Unit-IV: (15 Hours)**

4.1 Centrifugation - Basic principles (K1, K2, K3)

4.2 Preparative ultracentrifugation: Differential and Density gradient centrifugation. (K1, K2, K3, K4)

4.3 Analytical centrifugation: Applications - Determination of molecular mass and purity of macromolecules. (K1, K2, K3, K4)

4.4 Radioactivity, Nature of radioactivity: Stable and Radioactive isotopes - Units and interaction of radioactivity with matter. (K1, K2, K3)

4.5 Detection and measurement of radioactivity - GM counter - Solid and Liquid scintillation counter - Autoradiography and Cerenkov counting. (K1, K2, K3, K4, K5)

4.6 Applications of radioisotopes in the Biological sciences. (K1, K2, K3)

**Unit-V:****(15 Hours)**

- 5.1 Laws of Absorption and Absorption spectrum - UV-VIS -IR spectrophotometer: Principle, instrumentation and Applications (K1, K2, K3, K4)
- 5.2 Luminometry: Principle and applications (K1, K2, K3, K4)
- 5.3 Flame Emission Spectrophotometer: Principle, instrumentation, operation and applications. (K1, K2, K3, K4)
- 5.4 Atomic flame and flameless spectrophotometer: Principle and applications (K1, K2, K3, K4)
- 5.5 NMR, MS, MALDI: Principle, and applications. (K1, K2, K3)
- 5.6 Use of lasers for spectroscopy. (K1, K2, K3, K4)

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	PCBCE20	Enzymology	Theory	Core	5	5	40 + 60=100

**Objectives:**

To learn the methodology involved in assessing the enzyme activity and mechanism of enzyme action.

**Course Outcomes (CO)**

On completion of the course, the students will be able to,

1. List the enzyme properties, nomenclature and purification of enzymes
2. Apply the biochemical calculation for enzyme kinetics
3. Compare methods for enzyme catalysis and various methods of inhibition
4. Outline the effect of coenzymes and isoenzymes in enzyme catalysis
5. Explain various industrial and clinical applications of enzymes as a catalyst in industries and also as a therapeutic aid

CO 4	H	H	H	M	M	M
CO 5	H	H	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit-I:**

**(15 hours)**

- 1.1 Nomenclature, classification, isolation and purification of enzymes (K1, K2)
- 1.2 Determination of enzymes by different methods, criteria of purity – specific activity (K2, K3)
- 1.3 Enzyme units - Katal, IU and turnover number (K1, K2)
- 1.4 Measurement of enzyme activity – Coupled kinetic assay, kinetic assay using radio labelled substrates (K1, K2, K4)

- 1.5 Active site - determination of active site amino acids- chemical probe, affinity label, and site-directed mutagenesis, intrinsic and extrinsic regulations (K1, K3)
- 1.6 Investigation of 3-D structure of active site and a brief account of nonprotein enzymes - ribozymes and DNA enzymes (K3, K4)

**Unit-II: (15 hours)**

- 2.1 Kinetics of single substrate enzyme - catalyzed reactions - Michaelis - Menten equation, importance of  $V_{max}$ ,  $K_m$  (K2, K4)
- 2.2 MM equation; Lineweaver - Burk plot, Eadie - Hofstee plot (K1, K2, K4)
- 2.3 Hanes - Woolf plot and Eisenthal and Cornish - Bowden plot (K2, K3)
- 2.4 Pre steady - state kinetics and relaxation kinetics (K1, K2, K4)
- 2.5 Kinetics of Allosteric enzymes - MWC and KNF models Hill equation coefficient (K2, K3)
- 2.6 Kinetics of multi - substrate enzyme - catalyzed reactions - Ping-pong bi-bi, random order and compulsory order mechanism (K1, K2, K3, K4)

**Unit-III: (15 hours)**

- 3.1 Mechanism of enzymic action - general acid-base catalysis, covalent catalysis (K2, K3)
- 3.2 Role of metal ion in enzyme catalysis (K1, K3)
- 3.3 Mechanism of serine proteases - Chymotrypsin, Lysozyme, Carboxy peptidase A and Ribonuclease (K1, K2, K3)
- 3.4 Reversible inhibition - competitive, uncompetitive, noncompetitive, mixed, (K1, K3)
- 3.5 Allosteric inhibition (K1, K2)
- 3.6 Irreversible inhibition – suicide inhibition (K1, K2)

**Unit-IV: (15 hours)**

- 4.1 Coenzymes - prosthetic group, classification - vitamin and nonvitamin coenzymes, thiamine pyrophosphate (K1, K2)
- 4.2 Mechanism of oxidative and nonoxidative decarboxylation, transketolase reaction (K2, K3)
- 4.3 FMN and FAD - flavoprotein enzymes -mechanism of oxidation and reduction of flavin enzymes, NAD and NADP role in enzyme catalysis (K1, K2, K3)
- 4.4 PALP and PAMP - role of PALP in transamination and decarboxylation reaction, Coenzyme A involved reactions (K2, K3)
- 4.5 Biotin - carboxylation reaction, folate coenzymes, coenzyme role of vitamin B<sub>12</sub> and vitamin C, metabolite and non-vitamin coenzymes, lipoic acid, coenzyme Q, nucleoside triphosphate and S-adenosyl methionine (K1, K2, K4)
- 4.6 Isoenzymes -Abzymes (K1, K2, K3)

**Unit-V: (15 hours)**

- 5.1 Industrial uses of enzymes - sources of industrial enzymes, thermophilic enzymes, amylases, glucose isomerases, cellulose degrading enzymes, lipases, proteolytic enzymes in meat and leather industry, detergents and cheesed production (K2, K3, K4)

- 5.2 Clinical enzymology – Enzymes as thrombolytic agents, anti-inflammatory agents, digestive aids (K2, K3)
- 5.3 Therapeutic use of Asparaginases (K1, K2)
- 5.4 Therapeutic use of Streptokinase (K1, K2)
- 5.5 Enzymes and isoenzymes in diagnosis - LD, CK, Transaminases, Phosphatases, Amylase and Cholinesterase (K2, K3)
- 5.6 Immobilization of enzymes and their applications (K1, K2, K4)

**Text Books:**

## SEMESTER II

### PCBCF20 - INTERMEDIARY METABOLISM

Year/ Sem I / II	Course Code PCBCF20	Title of the Course Intermediary Metabolism	Course Type Theory	Course Category Core	H/W 5	Credits 4	Marks 40 + 60=100
------------------------	---------------------------	--	--------------------------	----------------------------	----------	--------------	----------------------

#### Objective:

To make the students to understand the reactions catalyzed by different enzymes and their metabolic pathways.

#### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Restate in own words how reduced electron carriers are used to generate ATP via Electron Transport System in Mitochondria
2. Translate the reactions catalyzed by different Enzymes in metabolic pathway
3. Compare the important characteristics of metabolic pathways and assess their regulation
4. Analyze complex chemical reactions and draw logical conclusion by interrelating metabolism
5. Interpret how plants convert energy to nourish themselves

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	H	M	M

CO 4	H	H	H	H	M	M
CO 5	H	M	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	M	M	M
CO 3	H	H	H	H	L	M
CO 4	H	H	H	H	M	M
CO 5	H	H	L	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit-I:

(15 Hours)

- 1.1 Free energy and entropy - Enzymes involved in redox reactions (K1, K2, K3)
- 1.2 Electron Transport Chain (K1, K2, K3)
- 1.3 Oxidative Phosphorylation ATPase: Structure and mechanism of action (K1, K2)

- 1.4 Chemiosmotic theory – mechanism (K1, K2)
- 1.5 Inhibitors of respiratory chain and oxidative phosphorylation – Uncouplers (K1, K2, K3, K4)
- 1.6 Mitochondrial transport systems - ATP/ADP exchange - Malate and Glycerophosphate shuttle. (K1, K2)

**Unit-II: (15 Hours)**

- 2.1 Glycolysis - Citric acid cycle: Pathway, Key enzymes and regulations. (K1, K2, K3)
- 2.2 Metabolism of Glycogen: Pathway, Key enzymes and regulations. (K1, K2, K3)
- 2.3 Gluconeogenesis (Cori cycle): Pathway, Key enzymes and regulations. (K1, K2, K3)
- 2.4 Pentose phosphate pathway: Pathway, Key enzymes and regulations. (K1, K2, K3)
- 2.5 Uronic acid pathway: Pathway, Key enzymes and regulations. (K1, K2, K3)
- 2.6 Metabolism of galactose and fructose - Glyoxylate cycle: Pathway, Key enzymes and Regulations. (K1, K2, K3)

**Unit-III: (15 Hours)**

- 3.1 Oxidation of fatty acids - Alpha, Beta and Omega oxidation (K1, K2, K3)
- 3.2 Biosynthesis of fatty acids (K1, K2, K3)
- 3.3 Metabolism of ketone bodies - Biosynthesis of triglycerides (K1, K2, K3)
- 3.4 Metabolism of phospholipids and sphingolipids (K1, K2, K3)
- 3.5 Cholesterol – Biosynthesis and regulation (K1, K2, K3)
- 3.6 Cholesterol – Transport and excretion (K1, K2, K3)

**Unit-IV: (15 Hours)**

- 4.1 Overview of biosynthesis of nonessential amino acids (K1, K2, K3)
- 4.2 Catabolism of amino acid - Transamination, Deamination and ammonia formation (K1, K2, K3)
- 4.3 Urea cycle - Disorders of the urea cycle – Decarboxylation (K1, K2, K3)
- 4.4 Catabolism of carbon skeletons of amino acids: Phenyl alanine, Tyrosine and Histidine (K1, K2, K3)
- 4.5 Catabolism of carbon skeletons of amino acids: Methionine and Cysteine (K1, K2, K3)
- 4.6 Detoxification: Oxidation, Reduction, Hydrolysis and Conjugation (K1, K2, K3)

**Unit-V:****(15 Hours)**

- 5.1 Interrelationship of carbohydrates, proteins and fat metabolism. (K1, K2, K3, K5)
- 5.2 Purine anabolism: De novo and salvage pathways for biosynthesis - Purine catabolism (K1, K2, K3)
- 5.3 Biosynthesis and catabolism of pyrimidines (K1, K2, K3)
- 5.4 Photosynthesis - Photosynthetic apparatus - light reaction - cyclic and noncyclic photophosphorylation (K1, K2, K3)
- 5.5 Dark reaction - Calvin cycle - Hatch-Slack pathway (K1, K2, K3)
- 5.6 Photorespiration - Starch biosynthesis and degradation -Bioluminescence (K1, K2, K3)

**Text Books:**

## SEMESTER - II

### PEBCC20 – ELECTIVE II A: ECOLOGY, EVOLUTION AND DEVELOPMENTAL BIOLOGY

<b>Year/ Sem</b>	<b>Course Code</b>	<b>Title of the Course</b> Ecology, Evolution and Developmental Biology	<b>Course Type</b> Theory	<b>Course Category</b> Elective II A	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 40+60=100
I /II	PEBCC20						

#### Objective:

The course enables the students to understand and analyze the role of ecological and evolutionary modifications in the development of organisms and their survival.

#### Course Outcome (CO)

On completion of the course, the students will be able to,

1. Outline the concept of ecosystem and its interaction
2. Apply the concept of evolution in population genetics
3. Describe the structures and the development of the embryo at different stages
4. Explain the insight on morphogenesis and organogenesis in plants
5. Schematize pedigree analysis and genetic mapping

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	M	M	H	H
CO 2	L	H	H	H	M	M
CO 3	M	H	L	M	H	H
CO 4	L	M	M	L	M	L
CO 5	H	H	L	M	H	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	H	M	H	H
CO 2	L	H	M	H	M	M

CO 4	M	L	M	M	M	H
CO 5	M	H	L	H	L	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(9 hours)

- 1.1 Physical environment, biotic environment, biotic and abiotic interaction (K1, K2, K3, K4)
- 1.2 Concept of habitat and niche, niche width and overlap, fundamental and realized niche (K1, K2, K3, K4, K5, K6)

1.3 Characteristic of a population, population growth curves, population regulation (K1, K2, K3, K4, K5, K6)

1.4 Nature of communities, community structure and attributes, level of species diversity and its measurement. (K1, K2, K3, K4, K5, K6)

1.5 Types and mechanism of succession, concept of climax. (K1, K2, K3, K4)

1.6 Types of interaction, interspecific competition, herbivory, carnivory, pollination, symbiosis. (K1, K2, K3, K4)

**Unit II: (9 hours)**

2.1 Lamarck; Darwin concept of variation, adaptation, natural selection. (K1, K2, K3)

2.2 Origin of basic biomolecule; Abiotic synthesis of organic monomers and polymers (K1, K2, K3)

2.3 Concept of neutral evolution, molecular divergence and molecular clock (K1, K2, K3, K4)

2.4 Population genetics -Populations, gene pool, gene frequency, Hardy-Weinberg Law (K1, K2, K3, K4, K5, K6)

2.5 Adaptive radiation, Isolating mechanisms, Speciation, Allopatricity and Sympatricity (K1, K2, K3, K4, K5, K6)

2.6 Convergent evolution, Sexual selection, Co-evolution (K1, K2, K3, K4)

**Unit III: (9 hours)**

3.1 Production of gametes (K1, K2, K3)

3.2 Cell surface molecules in sperm-egg recognition in animals (K1, K2, K3, K4, K5, K6)

3.3 Embryo sac development (K1, K2, K3, K4)

3.4 Double fertilization in plants (K1, K2, K3, K4)

3.5 Mammalian cleavage, gastrulation (K1, K2, K3, K4)

3.6 Programmed cell death (K1, K2, K3, K4, K5, K6)

**Unit IV: (9 hours)**

4.1 Organization of shoot and root apical meristem (K1, K2, K3, K4)

4.2 Shoot and root development (K1, K2, K3, K4, K5, K6)

4.3 Leaf development and phyllotaxy (K1, K2, K3, K4, K5, K6)

4.4 Transition to flowering, floral meristems (K2, K3)

4.5 Floral development in Arabidopsis (K3, K4)

4.6 Antirrhinum (K1, K2, K3, K4)

**Unit V: (9 hours)**

5.1 Linkage maps, mapping with molecular markers (K1, K2, K3, K4, K5, K6)

5.2 Mapping by using somatic cell hybrids, development of mapping population in plants. (K1, K2, K3, K4, K5, K6)

5.3 Pedigree analysis (K1, K2, K3)

5.4 LOD score for linkage testing (K1, K2, K3)

5.5 Karyotypes. Polygenic inheritance, heritability and its measurements (K1, K2, K3, K4)

5.6 QTL mapping (K1, K2, K3)

**SEMESTER II**  
**PEBCD20 - ELECTIVE II B: TOXICOLOGY**

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	PEBCD20	Toxicology	Theory	Elective II B	3	3	40+60=100

**Objective:**

The course gives a detailed understanding and identification of toxic substances, dose-response, tests conducted and its impact on cellular activities.

**Course Outcomes (CO)**

On completion of the course, the students will be able to,

1. Outline the scope and factors influencing toxicology
2. Explain the clinical and laboratory findings in the treatment of acute toxic exposures
3. Assess various methods of toxicity testing
4. Discuss the effects of toxic substances on molecular and cellular levels
5. Use the knowledge of air pollutants in the assessment of occupational hazards

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	M	M	H	H
CO 2	L	H	H	H	M	M
CO 3	M	H	L	M	H	H
CO 4	L	M	M	L	M	L
CO 5	H	H	L	M	H	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	H	M	H	H
CO 2	L	H	M	H	M	M
CO 3	H	M	H	L	H	M
CO 4	M	L	M	M	M	H
CO 5	M	H	L	H	L	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit-I:**

**(9 hours)**

- 1.1 Eco-toxicology and its environment significance toxic effects (K1, K2, K3, K4)
- 1.2 Basis for general classification & nature, dose - response relationship (K1, K2, K3)
- 1.3 Synergism and Antagonism (K1, K2)
- 1.4 Determination of ED<sub>50</sub> & LD<sub>50</sub> (K1, K2, K3, K4, K5 K6)

- 1.5 Acute and chronic exposures (K1, K2, K3, K4, K5 K6)
- 1.6 Factors influencing toxicity. Pharmacodynamics & Chemo dynamics (K1, K2, K3, K4)

**Unit-II: (9 hours)**

- 2.1Regulators guidelines, mammalian systems affected & the clinical signs of systemic toxicity (K1, K2, K3, K4)
- 2.2 Factors affecting acute toxicity studies (K1, K2, K3, K4)
- 2.3 Biochemical basis of toxicity, Mechanism of toxicity: disturbance of excitable membrane function altered calcium homeostasis. (K1, K2, K3, K4, K5, K6)
- 2.4 Covalent binding to cellular macromolecules (K1, K2, K3)
- 2.5 Genotoxicity (K1, K2)
- 2.6 Tissue specific toxicity (K2, K3)

**Unit-III: (9 hours)**

- 3.1 Test Protocol, Genetic Toxicity Testing & Mutagenesis Assays: Invivo test systems (K1, K2, K3)
- 3.2 Bacterial Mutation Tests: Reversion Tests, Ames test, Fluctuation Tests & Eukaryote Mutation Tests (K1, K2, K4)
- 3.3 In Vivo Mammalian Mutation Tests – host mediated assay & dominant lethal test (K2, K3, K4, K5, K6)
- 3.4 Use of drosophila in toxicity testing (K3, K4, K5, K6)
- 3.5 DNA repair assays. Chromosome damage test (K3, K4, K5, K6)
- 3.6 Toxicological Evaluation of Recombinant DNA –Derived Proteins (K2, K3, K4)

**Unit-IV: (9 hours)**

- 4.1 Toxicology of food additives (K1, K2, K3)
- 4.2 Metal toxicity: Toxicology of Arsenic, Mercury, Lead and Cadmium (K2, K3)
- 4.3 Environmental Factors Affecting Metal Toxicity- Effect of Light, Temperature & P<sup>H</sup> (K1, K2)
- 4.4 Diagnosis of toxic changes in liver and kidneys (K3, K4, K5, K6)
- 4.5 Metabolism of Haloalkanes (K2, K3)
- 4.6 Haloalkenes & Paracetamol with their toxic effects on tissues (K2, K3, K4, K5, K6)

**Unit-V:****(9 hours)**

- 5.1 Air pollution & ozone (K2, K3, K4)
- 5.2 Air pollution due to chlorofluorocarbons (CFCS) and asbestos (K1, K2, K3, K4)
- 5.3 Occupational toxicology and assessment of occupational hazards: industrial effluent toxicology & environmental health (K2, K3, K4, K5, K6)
- 5.4 An overview of regulatory agencies: responsibilities of regulatory agencies (K3, K4, K5)
- 5.5 Management of toxicological risks (K3, K4, K5, K6)
- 5.6 Regulatory approaches. Regulatory systems and organizations (K3, K4, K5, K6)

**SEMESTER-I & II**  
**PCBCG20 – MAIN PRACTICAL - I**  
 [Biomolecules, Cell Dynamics, Human Physiology and Nutrition]

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I/ I & II	PCBCG20	Main Practical I	Practical	Core	5	4	40+60 = 100

**Objective:**

To help students to expertise in the Biomolecules, Cell Dynamics and biochemical techniques.

**Course Outcome (CO):**

On completion of the course, the students will be able to,

1. Discuss qualitative and quantitative analysis of various biomolecules
2. Explain the isolation of biomolecules from biological samples
3. Apply the practical knowledge to determine hemoglobin, clotting time and prothrombin time

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	M	M	H	M	M	H
CO 2	H	L	M	H	L	L
CO 3	H	M	M	M	H	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	M	M	H	M	M	H
CO 2	L	H	H	M	H	L
CO 3	M	M	L	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Biomolecules**

1. Qualitative Analysis of Carbohydrates, Amino acids (Confirmation by paper chromatography) and Fats.
2. Extraction and Quantitative Analysis by UV spectrophotometer
  - a) Protein from egg
  - b) Casein from Milk
  - c) Vitamin C from Lemon

### **Cell dynamics**

1. Fractionation of cell organelles from liver and plant tissues.
  - a) Isolation and estimation of RNA.
  - b) Isolation and estimation of DNA.
2. Preparation of Cytological slides for Mitosis using Root tips.
3. Preparation of Cytological slides for Meiosis-I using Flower buds.
4. Identification of different stages of Mitosis and Meiosis.
5. Isolation of cell organelles.
6. Isolation of Chloroplast.

### **Human Physiology and Nutrition**

1. Analysis of Human Blood pressure.
2. Collection and Preservation of Blood.
3. Enumeration of RBC and WBC and platelet.
4. Blood group typing.
5. Differential WBC count.
6. Determination of hemoglobin content.
7. Determination of clotting time and prothrombin time.
8. Determination of ESR.

### **Reference Books:**

## SEMESTER-I & II

### PCBCH20 – MAIN PRACTICAL – II

[Analytical Biochemistry, Enzymology, Intermediary Metabolism]

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I/ I & II	PCBCH20	Main Practical - II	Practical	Core	5	4	40+60 =100

#### Objective:

To learn about the analytical techniques and enzymology experiments.

#### Course Outcomes (CO)

On completion of the course, the students will be able to,

1. Identify and purify biomolecules in a mixture by chromatographic technique
2. Asses the optimum pH and optimum temperature of enzymes
3. Explain the basic principle involved in intermediary metabolism

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	H	M	M
CO 3	H	H	L	H	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	M	M	M
CO 3	H	H	H	H	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Analytical biochemistry:

1. Determination of pKa value using Titration curve.
2. Titration of a weak acid.
3. Preparation of buffers.
4. Verification of Beer-Lambert's law and determination of absorption coefficients.
5. Paper chromatography – Separation of amino acids and carbohydrates in a mixture.
6. Thin layer chromatography – Lipids.
7. Column chromatography -Pigments.
8. Electrophoresis.

## **Enzymology**

1. Subcellular fractionation of organelles from liver cells and identification by marker enzyme – LDH.
2. Isolation of acid phosphatase from potato.
  - a. Determination of optimum pH.
  - b. Determination of optimum temperature.
  - c. Effect of substrate concentration on acid phosphatase activity.
  - d. Inhibition of acid phosphatase activity.
3. Assay of clinically important enzymes.
  - a. Assay of serum/tissue alkaline phosphatase activity.
  - b. Assay of serum acid phosphatase activity.
  - c. Assay of serum creatinine phosphokinase activity.
  - d. Assay serum alanine aminotransferase activity / SGPT.
  - e. Assay of serum aspartate aminotransferase activity / SGOT.
4. Immobilization studies:  
Preparation of urease entrapped in alginate beads and determination of percent entrapment.

## **Intermediary metabolism**

1. Measurement of Oxygen from mitochondria.
2. Quantification of NAD<sup>+</sup>/NADP<sup>+</sup> using UV visible method.

## **Reference Books:**

1. Jayaraman J - Manuals in Biochemistry - 4th Ed - New Age International Publishers,2011
2. Varley and Alan H Gowen lock - Practical Biochemistry -6th Ed - CBS Publishers,2002
3. David T Plummer - Practical Biochemistry - 3rd Ed - McGraw Hill Publishers, 2005
4. Sawhney SK and Randhir Singh - Introductory Practical Biochemistry - 2nd Ed- Narosa Publishers,2001
5. Praful B Godkar - Text book of Medical Laboratory Technology- 3rd Ed- Volume I &II,Bhalani Publishing House,2014

***\*ONE WEEK HANDS ON TRAINING IN ANY DEPARTMENT IN CMC, VELLORE***

## SEMESTER – III

### PCBCI20 - ADVANCED ENDOCRINOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	PCBCI20	Advanced Endocrinology	Theory	Core	6	5	40+60=100

#### Objective:

The course describes in detail about the role of endocrine glands, their secretion, its metabolic effect on target cells involving various signaling pathways and signal chain proteins.

#### Course Outcome (CO)

On completion of the course, the students will be able to

1. Identify the structure and functions of endocrine glands and hormones
2. Demonstrate the mechanisms of hormonal action and the clinical disorders of hormones
3. Examine the symptoms of the patients and relate it to hormones
4. Identify the difference in the mechanism of cell to cell communication
5. Explain the differences between male and female gonads

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	H
CO 2	M	H	M	M	H	L
CO 3	M	L	M	L	M	M
CO 4	H	M	H	M	H	L
CO 5	M	L	M	H	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	M	H	H	M	M
CO 2	L	L	H	M	H	L
CO 3	M	H	M	L	H	M
CO 4	H	M	H	M	L	H
CO 5	M	H	L	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(18 Hours)

- 1.1 Glands - Types of glands- Hormones, Effector cell, target cell - Definition, Hormone target relationship - General features and functions of Endocrine system (K2, K3, K4)
- 1.2 Classification - based on Solubility, types of receptors, mechanism of action (K1, K2, K3, K4)

- 1.3 Steroid hormones - Salient features, Biosynthesis, Secretion, Storage, Transport, Mechanism of action (K3, K4, K5, K6)
- 1.4 Protein hormones - Salient features, Biosynthesis, Secretion, Storage, Transport, Mechanism of action – Amino acid derived hormones (K3, K4, K5, K6)
- 1.5 Receptors – Structure: Extracellular and Intracellular, Types: Intrinsic and Extrinsic, Domains: Extracellular domains, Transmembrane domains and Intracellular domains - Regulation of receptor number (K2, K3, K4, K5, K6)
- 1.6 Feedback mechanisms (K1, K2, K3, K4)

**Unit II: (18 Hours)**

- 2.1 Signal transduction - Definitions of signals, ligands and receptors, endocrine, paracrine and autocrine signaling (K1, K2, K3)
- 2.2 Receptors and signaling pathways – cell surface receptors, ion channels (K2, K3, K4)
- 2.3 G-protein coupled receptors, receptor kinases (tyr, ser/thr) (K1, K2, K3, K4)
- 2.4 Signal transduction through cytoplasmic and nuclear receptors (K3, K4, K5, K6)
- 2.5 The Ras-raf MAP kinase cascade, second messengers – cyclic nucleotides, lipids and calcium ions (K2, K3, K4, K5, K6)
- 2.6 Crosstalk in signaling pathways (K2, K3, K4, K5, K6)

**Unit-III: (18 Hours)**

- 3.1 Hypothalamus -Structure (K1, K2, K3)
- 3.2 Hypothalamic releasing factors (K1, K2, K3, K4)
- 3.3 Anterior pituitary gland: Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Biological functions (K3, K4, K5, K6)
- 3.4 Posterior pituitary gland: Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Biological functions - Hypothalamus and Pituitary Gland disorders -Etiology and Clinical features (K3, K4, K5, K6)
- 3.5 T<sub>3</sub> and T<sub>4</sub> - Biosynthesis, Secretion, Storage, Transport, Mechanism of action, Biological functions and disorders (K1, K2, K3, K4, K5, K6)
- 3.6 Calcitonin - Biosynthesis, Secretion, Storage, Transport, Mechanism of action, Biological functions and disorders (K3, K4, K5, K6)

**Unit-IV: (18 Hours)**

- 4.1 Parathyroid hormones - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Biological functions and disorders (K3, K4, K5, K6)
- 4.2 Pancreas: Structure - Hormone secreted by Pancreas (K1, K2, K3, K4)
- 4.3 Pancreatic Hormones Biosynthesis, Secretion, Storage, Transport, Mechanism of action (K2, K3, K5, K6)
- 4.4 Pancreatic Hormones - Biological functions (K1, K2, K3, K4)
- 4.5 Pancreatic Hormones Disorder – Etiology and Clinical features (K1, K2, K3, K4)
- 4.6 Gastro Intestinal hormones (K1, K2, K3, K4)

**Unit-V:****(18 Hours)**

- 5.1 Adrenal Glands: Anatomy (K2, K3, K4)
- 5.2 Adrenal hormones - Biosynthesis, Secretion, Storage, Transport, Mechanism of action and Biological actions of Adrenal Hormones (K3, K4, K5, K6)
- 5.3 Adrenal disorder – Etiology and Clinical features (K1, K2, K3, K4)
- 5.4 Male Gonadal Hormones: Biosynthesis, Secretion, Storage, Transport, Mechanism of action - Biological actions (K3, K4, K5, K6)
- 5.5 Female Gonadal Hormones: Biosynthesis, Secretion, Storage, Transport, Mechanism of action - Biological actions (K3, K4, K5, K6)
- 5.6 Neurohormones (K1, K2, K3, K4)

**SEMESTER – III**  
**PCBCJ20 - ADVANCED IMMUNOLOGY**

Year/Sem	Course Code	Title Of The Course	Course Type	Course Category	H/W	Credits	Marks
II / III	PCBCJ20	Advanced Immunology	Theory	Core	6	5	40+60=100

**Objectives:**

To help the students to understand the components of immune system and it's functioning.

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Identify various mechanisms that regulate immune response
2. Compare and contrast innate and adaptive immunity
3. Outline the cell types and organ present in the immune response
4. Discuss the reason for different vaccination
5. Communicate the adverse effect of immunodeficiency disorder

<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(18 Hours)**

- 1.1 Lymphoid system-Definition, Central lymphoid organs-Thymus, Bone marrow (K1, K2, K3, K4, K5, K6)
- 1.2 Peripheral lymphoid organs-Lymph node, Spleen & MALT ( K1, K2, K3, K4, K5, K6)
- 1.3 Cells involved in immune system-Lymphocytes, Mononuclear phagocytes, Granulocytes, Mast cells, NK cells (K1, K2, K3, K4, K5, K6)

- 1.4 Antigen, Haptens, adjuvants, antigenicity, Epitopes (K1, K2, K3, K4, K5, K6)
- 1.5 Immunoglobulins - basic structure, classification & functions, allotypes and idiotypes.  
Theories of antibody formation- side chain (K1, K2, K3, K4, K5, K6)
- 1.6 Clonal selection theory (K1, K2, K3, K4, K5, K6)

**Unit II: (18 Hours)**

- 2.1 Immunity: Types of immunity - innate and acquired immunity (K1, K2, K3, K4, K5, K6)
- 2.2 Antitoxic, antibacterial and antiviral immunity (K1, K2, K3, K4, K5, K6)
- 2.3 Humoral and cell mediated immunity (K1, K2, K3, K4, K5, K6)
- 2.4 Antigen recognition - T cell and B cell receptor complexes, antigen processing and presentation (K1, K2, K3, K4, K5, K6)
- 2.5 Interaction of T and B cells, cytokines. Immunological memory (K1, K2, K3, K4, K5, K6)
- 2.6 Cytotoxicity - immunotolerance, immunosuppression (K1, K2, K3, K4, K5, K6)

**Unit III: (18 Hours)**

- 3.1 Complement system -Nomenclature, activation of complement –classical & alternative pathway (K1, K2, K3, K4, K5, K6)
- 3.2 Complement fixation test (K1, K2, K3, K4, K5, K6)
- 3.3 Immunological techniques- Immunoprecipitation, RIA, ELISA (K1, K2, K3, K4, K5, K6)
- 3.4 Avidin-biotin mediated assay (K1, K2, K3, K4, K5, K6)
- 3.5 Immunohistochemistry and immuno electrophoresis (K1, K2, K3, K4, K5, K6)
- 3.6 Immunoblotting (K1, K2, K3, K4, K5, K6)

**Unit IV: (18 Hours)**

- 4.1 Vaccines - killed, attenuated organisms, toxoids, recombinant vector vaccines (K1, K2, K3, K4, K5, K6)
- 4.2 Subunit vaccines, anti-idiotypic vaccines (K1, K2, K3, K4, K5, K6)
- 4.3 MHC complex – MHC genes - HLA genes, class I and II antigens-Structure and function (K1, K2, K3, K4, K5, K6)
- 4.4 Histocompatibility testing -cross matching (K1, K2, K3, K4, K5, K6)
- 4.5 Transplantation – types (K1, K2, K3, K4, K5, K6)
- 4.6 Genetics of transplantation - graft versus host reactions (K1, K2, K3, K4, K5, K6)

**Unit V: (18 Hours)**

- 5.1 Hypersensitivity - Definition, classification and factors influencing hypersensitivity (K1, K2, K3, K4, K5, K6)
- 5.2 Type I-hypersensitivity-mechanism (K1, K2, K3, K4, K5, K6)
- 5.3 Type II, III, IV and V hypersensitivity-mechanism, diagnosis and treatment (K1, K2, K3, K4, K5, K6)
- 5.4 Immunodeficiency disorders - B cell deficiencies (K1, K2, K3, K4, K5, K6)
- 5.5 Immunodeficiency disorders - T cell deficiencies (K1, K2, K3, K4, K5, K6)
- 5.6 AIDS, COVID -pathogenesis, diagnosis & Treatment (K1, K2, K3, K4, K5, K6)

## SEMESTER – III

### PCBCK20 - ADVANCED BIOTECHNOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	PCBCK20	Advanced Biotechnology	Theory	Core	5	4	40+60=100

#### Objective:

To learn how to apply the knowledge of genetic engineering in problem solving and in practice.

#### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Illustrate the tools and strategies used in genetic engineering
2. Apply the knowledge of genetic engineering in problem solving and in practice
3. Categorize how plant and animal cells are cultured and genetically manipulated in laboratory
4. Make use of the various steps in the development of a biotechnology derived products
5. Report the applications of genetic engineering technique in basic and applied experimental biology

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	H	M	M
CO 3	H	H	M	L	M	L
CO 4	H	H	H	H	M	M
CO 5	H	M	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	H	H	M
CO 2	H	H	H	H	M	M
CO 3	H	H	H	H	M	M
CO 4	H	H	H	L	M	L
CO 5	H	H	M	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

**(15 Hours)**

- 1.1 Basic principles – Steps involved - Enzymes used in genetic engineering (K1, K2, K3)
- 1.2 Restriction enzymes: Types and target sites (K1, K2, K3)
- 1.3 Cutting and joining of DNA molecules - linkers and adaptors - Homopolymers (K1, K2, K3)

- 1.4 Cloning vehicles and their properties: Natural and Based plasmids (pBR322)  
(K1, K2, K3)
- 1.5 Cosmid vectors (K1, K2, K3, K5)
- 1.6 Shuttle vectors. (K1, K2, K3, K5)

**Unit II: (15 Hours)**

- 2.1 DNA library: cDNA and Genomic libraries (K1, K2, K3, K5)
- 2.2 Recombinant selection and screening methods - Expression of cloned genes - Problems and solutions (K1, K2, K3)
- 2.3 DNA sequencing strategies - Sanger's and Maxam - Gilbert's methods (K1, K2, K3, K4)
- 2.4 Applications of PCR and DNA hybridization (K1, K2, K3, K5)
- 2.5 Southern and Northern blotting (K1, K2, K3, K4, K5)
- 2.6 Western blotting. (K1, K2, K3, K4, K5)

**Unit III: (15 Hours)**

- 3.1 Culturing explants and haploids - Protoplasts fusion and Embryoids (K1, K2, K3, K4, K5, K6)
- 3.2 Methods of gene transfer to plants, animals and bacteria- Transfection, Electroporation, shotgun and others (K1, K2, K3, K4)
- 3.3 Transgenic plants, GM foods and biopesticides, gene knockouts (K1, K2, K3, K4)
- 3.4 Transgenic animals, animal pharming and xenografting (K1, K2, K3, K4, K5)
- 3.5 Biodegradation, stimulation and its applications (K1, K2, K3, K4, K5)
- 3.6 Bioleaching. (K1, K2, K3)

**Unit IV: (15 Hours)**

- 4.1 Industrial biotechnology – fermentors (K1, K2, K3)
- 4.2 Ethanol and Citric acid production: Principle, types, product recovery and purification (K1, K2, K3, K4)
- 4.3 Vitamin B<sub>12</sub> and Streptomycin production: Principle, types, product recovery and purification (K1, K2, K3, K4)
- 4.4 Enzyme biotechnology-production and uses of industrially important enzymes such as protease (K1, K2, K3, K4)
- 4.5 Immobilization of enzymes and their applications (K1, K2, K3, K4)
- 4.6 Waste treatment, bioenergy and biogas production. (K1, K2, K3, K4)

**Unit V: (15 Hours)**

- 5.1 Gene therapy (somatic): Principle and approaches. (K1, K2, K3, K4)
- 5.2 Potential hazards - Biological weapons - Biosafety of GM foods and GMOs - substantial equivalence and safety testing - Gene drain - Tangled genes (K1, K2, K3)
- 5.3 Human genome research – the objectives and approaches, genomics and genome prospecting - the controversies (K1, K2, K3, K4)

- 5.4 Issues of biotechnology-social and scientific – technology protecting systems and the terminator (K1, K2, K3, K4)
- 5.5 IPR: concepts and conditions (K1, K2, K3)
- 5.6 Patenting of genes, cells and life forms - evaluation of life patenting. (K1, K2, K3, K5, K6)

**PEBCE20 - ELECTIVE III A: MICROBIOLOGY**

<b>Year/ Sem</b> II / III	<b>Course Code</b> PEBCE20	<b>Title of the Course</b> Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Elective III A	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> <b>100</b> 40+60=100
----------------------------------	-----------------------------------	--	----------------------------------	---	-----------------	---------------------	---

**Objective:**

To understand the importance of applications of microorganisms.

**Course Outcome (CO)**

On completion of the course, the students will be able to;

1. Recall the taxonomy, morphological features and division process of microbes
2. Outline the microbial growth and its metabolism
3. Apply the microbial culture technique
4. Gain knowledge on the replication processes in microbes
5. Identify the various infectious diseases, its causative agents and antimicrobial drugs

<b>CO 5</b>	H	H	H	H	H	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:**

**(9 Hours)**

- 1.1 Morphology and Ultrastructure of bacteria, fungi, algae and protozoa. (K1, K2)
- 1.2 Classification of microbes, molecular taxonomy, cell walls of eubacteria – peptidoglycan and related molecules (K1, K2)
- 1.3 Structure and synthesis of cell wall and cell membrane of gram – positive and negative bacteria (K1, K3)
- 1.4 Flagella and motility. Cell inclusion bodies. (K1, K2)

- 1.5 Blue and green bacteria. Budding and appendaged bacteria, spirilla, spirochaetes, gliding and sheathed bacteria, pseudomonas, lactic and propionic acid bacteria. (K1, K2, K3)
- 1.6 Endospore forming rods and cocci, myobacteria, rickettsia and mycoplasma. Archaeobacteria (K1, K2, K3)

**Unit II: (9 Hours)**

- 2.1 Microbial growth – Definition. Mathematical expression of growth, growth curve, measurement of growth and factors affecting growth. (K1, K2, K3)
- 2.2 Microbial metabolism – Overview, photosynthesis in microbes. Role of chlorophylls, carotenoids and phycobilins, Calvin cycle. (K1, K2, K3, K4)
- 2.3 Chemolithotrophy: hydrogen ion – nitrite oxidizing bacteria: nitrate and sulfate reduction: methanogenesis and acetogenesis (K1, K2, K3)
- 2.4 Fermentations – diversity, syntrophy – role of anoxic decompositions (K1, K2, K3)
- 2.5 Nitrogen metabolism, nitrogen fixation (K1, K2)
- 2.6 Hydrocarbon transformation (K1, K2, K4)

**Unit III: (9 Hours)**

- 3.1 Methods in microbial identification. Pure culture techniques (K1, K2, K3, K4)
- 3.2 Theory and practice of sterilization (K2, K2, K3, K4)
- 3.3 Principles of microbial nutrition (K1, K2)
- 3.4 Construction of culture media (K1, K2, K3, K4)
- 3.5 Enrichment culture techniques for isolation of hemoautotrophs (K1, K2, K3, K4)
- 3.6 Chemoheterotrophs and photosynthetic microbes. (K1, K2, K3, K4)

**Unit IV: (9 Hours)**

- 4.1 Bacteria, plant, animal and tumour viruses (K1, K2)
- 4.2 Classification and structure of viruses. Lytic cycle and lysogeny (K1, K2)
- 4.3 DNA viruses: positive and negative strand (K1, K2)
- 4.4 Double stranded RNA viruses (K1, K2, K3)
- 4.5 Replication: example of Herpes, Adenoviruses (K1, K2)
- 4.6 Replication: example Retrovirus, Viroids and Prions (K1, K2)

**Unit V: (9 Hours)**

- 5.1 Disease reservoirs; Epidemiological terminologies. Infectious disease transmissions. Respiratory infections caused by bacteria and viruses (K1, K2, K3)
- 5.2 Tuberculosis, sexually transmitted diseases including AIDS; Vector borne diseases (K1, K2, K3, K4)
- 5.3 Water borne diseases, Public health and water quality. (K1, K2, K5)
- 5.4 Pathogenic fungi (K1, K2, K3, K4)
- 5.5 Antimicrobial agents, Antibiotics. Penicillin and Cephalosporins, Broad spectrum antibiotics. Antibiotics from Prokaryotes (K1, K2, K3, K4)
- 5.6 Antifungal antibiotics – mode of action, Resistance to antibiotics. (K1, K2, K3, K4)

### SEMESTER III

#### PEBCF20 - ELECTIVE III B: RESEARCH METHODOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II/ III	PEBCF20	Research Methodology	Theory	Elective III B	3	3	40+60=100

#### Objective:

To address the issues inherent in selecting a research problem and discuss the techniques and tools to be employed in completing a research project.

#### Course Outcome (CO):

On completion of the course, the students will be able to;

1. Design the research work
2. Gain an idea on the role of biostatistics in research
3. Understand the significance of internet in research
4. Develop the understanding on database management system
5. Practice the concepts of animal studies and CPCSEA guidelines in research

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	M	L
CO 2	H	H	H	M	M	M
CO 3	H	H	M	H	H	M
CO 4	H	H	H	M	M	L
CO 5	H	H	M	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	H	H	M	H
CO 2	H	H	H	M	M	M
CO 3	H	H	M	M	M	M
CO 4	H	H	M	M	M	L
CO 5	H	H	M	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(9 Hours)

- 1.1 Scientific research & writing - Importance and need for research. (K1, K2, K3, K4)
- 1.2 Ethics and scientific research. Formulation of hypothesis. (K1, K2, K3, K4)
- 1.3 Types and characteristic designing a research work. (K1, K2, K3, K4, K6)

- 1.4 Scientific writing - Characteristics - Logical format for writing thesis and papers. (K1, K2, K3, K4, K6)
- 1.5 Essential features of abstract, introduction, review of literature, materials and methods, and discussion. (K1, K2, K3, K4, K6)
- 1.6 Effective illustration - tables and figures. Reference styles - Harvard and Vancouver systems. (K1, K2, K3)

**Unit II: (9 Hours)**

- 2.1 Biostatistics - Collection and classification of data (K1, K2, K3, K4, K6)
- 2.2 Diagrammatic and graphic representation of data measurement of central tendency (K1, K2, K3, K4, K5, K6)
- 2.3 Standard deviation - normal distribution (K1, K2, K3)
- 2.4 Test of significance based on large samples - small samples - Student t test (K1, K2)
- 2.5 Correlation and regression (K1, K2)
- 2.6 Chi square test for independence of attributes - ANOVA. (K1, K2, K3)

**Unit III: (9 Hours)**

- 3.1 Bioinformatics - Introduction to bioinformatics (K1, K2, K3)
- 3.2 Scope of bioinformatics (K1, K2, K3, K4)
- 3.3 Role of computers in biology (K1, K2)
- 3.4 Internet - The World Wide Web. (K1, K2, K3)
- 3.5 Useful search engines - Boolean searching, search engine algorithms. (K1, K2, K3)
- 3.6 Finding scientific articles – PubMed, Science direct. (K1, K2, K3)

**Unit IV: (9 Hours)**

- 4.1 Databases - Data base concepts - database, database system, database management systems - hierarchical, relational and network, database security. (K1, K2, K3, K4)
- 4.2 Biological databases - types, sequence and structure. (K1, K2)
- 4.3 Data submission (K1, K2)
- 4.4 Data retrieval. (K1, K2)
- 4.5 Searching sequence databases - sequence similarity searches, amino acid substitution matrices. (K1, K2, K3, K4, K6)
- 4.6 Database search - FASTA and BLAST, CLUSTAL. (K1, K2, K3, K6)

**Unit V: (9 Hours)**

- 5.1 Bioethics. (K1, K2)
- 5.2 Ethics in animal experimentation. CPCSEA guidelines - Animal care and technical personnel environment, animal husbandry, feed, bedding, water, sanitation and cleanliness, waste disposal, anesthesia and euthanasia. (K1, K2, K3, K6)
- 5.3 Composition of (Human) institutional Ethical Committee (IEC) - General ethical issues. (K1, K2, K3)
- 5.4 Specific principles for chemical evaluation of drugs, herbal remedies and human genetics research (K1, K2, K3)
- 5.5 Ethics in food and drug safety. (K1, K2, K3)

5.6 Environmental release of microorganisms and genetically engineered organisms. Ethical issues in human gene therapy and human cloning. (K1, K2)

## SEMESTER IV

### PCBCL20 MOLECULAR BIOLOGY

<b>Year/ Sem</b> II / IV	<b>Course Code</b> PCBCL20	<b>Title of the Course</b> Molecular Biology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 40+60=100
---------------------------------	-----------------------------------	--	----------------------------------	------------------------------------	-----------------	---------------------	---------------------------

#### Objective:

The course will enable the student to learn the molecular events occurring in gene and its application in field of biomedical and genetic research.

#### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Demonstrate the nature and role of Gene in life activity
2. Describe the blueprint of life and its functions
3. Outline the mechanism of Replication
4. Outline the role of Transcription
5. Demonstrate the features of Genetic code and mechanism of Translation

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	M	H	H	M	M	M
CO 2	H	L	M	H	H	H
CO 3	L	M	M	L	H	M
CO 4	M	M	H	H	M	L

CO 1	M	H	H	L	M	M
CO 2	H	L	M	H	H	H
CO 3	M	H	H	M	H	M
CO 4	L	M	H	M	L	H
CO 5	H	H	L	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(18 Hours)

- 1.1 Gene arrangements in prokaryotes and eukaryotes (K2, K3, K4, K5)
- 1.2 Gene structure in eukaryotic organisms, introns, exons, pseudogenes, and gene clusters, spacers, repetitive sequences (K1, K2, K3, K4)
- 1.3 Single and multiple copy genes in eukaryotes, eg – Histones, Alu, copia, satellite.  
Mapping of human genes – techniques used, assignment of important genes (K2, K3, K4, K5)

- 1.4 Gene regulatory mechanisms and cell memory- structure of chromatin - nucleosomes and higher orders of organization (K2, K3, K4, K5, K6)
- 1.5 Chromosome and genes, chromosomal replication, genetic mapping of chromosomes, chromosome banding (K2, K3, K4, K5, K6)
- 1.6 Transposition in human chromosome and chromosomal abnormalities (K1, K2, K3, K4)

**Unit II:** **(18 Hours)**

- 2.1 DNA replication in prokaryotes (K3, K4, K5, K6)
- 2.2 DNA replication in Eukaryotes (K3, K4, K5, K6)
- 2.3 Inhibitors of prokaryotic replication (K1, K2, K3, K4)
- 2.4 Inhibitors of Eukaryotic replication (K2, K3, K4)
- 2.5 Replication in RNA virus (K2, K3, K4)
- 2.6 Plasmid replication (x174, nl3 A. DNA) (K1, K2, K3)

**Unit III:** **(18 Hours)**

- 3.1 Prokaryotic Transcription- Promoters, foot-printing experiment, DNA - dependent RNA polymerase -Role of Pribnowbox (K2, K3, K4)
- 3.2 Prokaryotic transcription – mechanism in prokaryotes (K3, K4, K5, K6)
- 3.3 Eukaryotic transcription (K3, K4, K5, K6)
- 3.4 Post-transcriptional modifications of eukaryotic RNAs, RNA splicing, introns and splicing reactions (K1, K2, K3, K4)
- 3.5 Self-splicing introns - group I and group II, exons, spacer sequences, enhancers (K1, K2, K3, K4)
- 3.6 Reverse transcriptase, retroviruses (K1, K2, K3, K4)

**Unit IV:** **(18 Hours)**

- 4.1 Genetic code: Salient features (K1, K2, K3, K4)
- 4.2 Wobble mechanism and its significance (K1, K2, K3, K4)
- 4.3 Prokaryotic protein biosynthesis (K3, K4, K5, K6)
- 4.4 Eukaryotic protein biosynthesis (K3, K4, K5, K6)
- 4.5 Inhibitors of protein synthesis (K1, K2, K3, K4)
- 4.6 Post-translational modifications in prokaryotes and eukaryotes (K1, K2, K3, K4)

**Unit V:** **(18 Hours)**

- 5.1 DNA repair – types (K1, K2, K3, K4)
- 5.2 Regulation of gene expression in prokaryotes: Operon concept- lac operon (K3, K4, K5, K6)
- 5.3 An overview of Genomics - Structural genomics (K1, K2, K3, K4)
- 5.4 Functional genomics (K3, K4, K5, K6)
- 5.5 An overview of Proteomics (K1, K2, K3, K4)
- 5.6 Human Genome Project, chromosome maps – DNA micro arrays (K1, K2, K3, K4)

## SEMESTER IV

### PCBCM20 - ADVANCED CLINICAL BIOCHEMISTRY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PCBCM20	Advanced Clinical Biochemistry	Theory	Core	6	5	40+60=100

#### Objectives:

To gain concepts of assessing the human physiology using biological fluid.

#### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Apply the process of collection, preservation and storage of blood
2. Communicate the disorders of carbohydrate metabolism
3. Outline the significance of proteins and nucleic acid
4. Compare the liver and renal disorders
5. Discuss the role of diagnostic enzymes

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	M	H	H	H	M	H
CO 2	H	H	H	M	H	H
CO 3	H	M	H	M	H	M
CO 4	M	M	H	M	H	H
CO 5	H	H	M	H	M	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	H	M	M
CO 2	H	M	H	M	M	H
CO 3	H	M	H	M	M	H
CO 4	H	M	H	M	M	H
CO 5	H	H	M	H	H	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(18 Hours)

- 1.1 Specimen collection and analysis: Concepts of accuracy, precision, reproducibility, reliability in quality control (K2, K3, K4)
- 1.2 Collection of blood – vein puncture, skin puncture, arterial puncture and anticoagulants (K3, K4, K5)
- 1.3 Collection of urine, preservatives (K1, K2, K4).

- 1.4 CSF & Amniotic fluid – composition & collection (K2, K3, K4)
- 1.5 Sickle cell anemia (K2, K3, K4)
- 1.6 Hemoglobinopathies & Thalassemia (K2, K3, K4)

**Unit II: (18 Hours)**

- 2.1 Disorders of carbohydrate metabolism – Diabetes mellitus-classification, Metabolic complications (K2, K3, K4)
- 2.2 Glucose tolerance test and hypoglycemic agents (K2, K3)
- 2.3 Glycogen storage diseases (K2, K3, K4)
- 2.4 Galactosemia (K2, K3)
- 2.5 Atherosclerosis and Hypercholesterolemic agents (K2, K3, K4)
- 2.6 TaySach's disease, Niemann Pick disease, and Gangliosidosis (K1, K2, K3, K4)

**Unit III: (18 Hours)**

- 3.1 Disorders of protein metabolism- Clinical significance of non-protein nitrogenous substances in blood-urea, uric acid & creatinine (K2, K3, K4)
- 3.2 Plasma protein abnormalities- agammaglobulinemia, proteinuria (K2, K3, K4)
- 3.3 Multiple myeloma, Phenylketonuria, tyrosinosis (K2, K3, K4)
- 3.4 Plasma protein abnormalities- alkaptonuria, maple syrup urine disease (K1, K2, K3, K4)
- 3.5 Hartnup disease, albinism and homocystinuria (K2, K3, K4)
- 3.6 Disorders of nucleic acid metabolism-Gout, xanthinuria (K2, K3, K4)

**Unit IV: (18 Hours)**

- 4.1 Liver function test based on abnormalities of bile pigment metabolism, CHO, detoxification & excretory function of liver (K1, K2, K3, K4)
- 4.2 Liver Diseases-Hepatitis, Cirrhosis, Jaundice (K1, K2, K3, K4)
- 4.3 Gastric function test – Tube analysis and Tubeless analysis (K2, K3, K4)
- 4.4 Renal function tests-Urea, creatinine, inulin clearance (K1, K2, K3, K4)
- 4.5 Renal Diseases-Renal failure, Renal calculi - Glomerulonephritis - Nephrotic syndrome (K2, K3, K4)
- 4.6 Diagnosis of Hormone disorder: Thyroid test, Insulin stimulation test, C- peptide assay (K1, K2, K3, K4)

**Unit V: (18 Hours)**

- 5.1 Diagnostic enzymes-clinical significance of Aspartate transaminase, Alanine transaminase (K2, K3, K4)
- 5.2 Diagnostic enzymes-clinical significance of Creatine kinase, Lactate dehydrogenase (K2, K3, K4)
- 5.3 Diagnostic enzymes-clinical significance of Alkaline phosphatase, gamma glutamyl transpeptidase (K2, K3, K4)
- 5.4 Cancer-Etiology, morphological changes in tumor cells (K2, K3, K4)
- 5.5 Tumour markers-AFP, CEA & HCG and Carcinogenic agents (K1, K2, K3, K4)
- 5.6 Role of free radicals in health & diseases (K2, K3, K4)

**Text Book:**

## SEMESTER - IV

### PEBCG20 ELECTIVE – IV A: PLANT BIOCHEMISTRY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PEBCG20	Plant Biochemistry	Theory	Elective – IV A	3	3	40+60=100

#### Objective:

To help the students to understand the plant metabolites and their application in the field of medicine.

#### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Identify various natural and artificial ways to propagate plants
2. Discuss the function and composition of different plant structures
3. Describe the processes of germination and plant growth
4. Explain the role of plant growth regulators and plant tissue culture
5. Perform the calculations to predict expected plants by experiments

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	H	H	H	M	H	M
CO 3	M	H	M	H	H	M
CO 4	H	M	H	M	H	M
CO 5	H	H	H	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

#### Unit I:

(9 Hours)

- 1.1 Photosynthetic Pigment, Light reaction (K2, K3, K4)
- 1.2 Dark reactions of photosynthesis (K2, K3, K4)
- 1.3 Proton gradient and ATP synthesis of chloroplast (K2, K3, K4)
- 1.4 Regulation of photosynthesis - Mode of action of DCMU (K1, K2, K3, K4)
- 1.5 Bacterio rhodopsin, CAM metabolism, RUBISCO (K2, K3, K4)
- 1.6 Regulation of photorespiration and crop productivity (K2, K3, K4)

**Unit II: (9 Hours)**

- 2.1 Nitrogen cycle Disotropes biochemistry of Symbiotic and Nonsymbiotic nitrogen fixation (K2, K3, K4)
- 2.2 Assimilation of ammonium, carbon- nitrogen ratio (K1, K2, K3, K4)
- 2.3 Uride metabolism, Nitrate metabolism, Genetics of nitrogen fixation, Genetic manipulation of Nif genes (K2, K3, K4)
- 2.4 Biosynthesis, Mode of action, transport, distribution and physiological effect of Auxin, Gibberellin, Cytokinin (K2, K3, K4)
- 2.5 Biosynthesis, Mode of action, transport, distribution and physiological effect of Abscisic acid (ABA) (K2, K3, K4)
- 2.6 Biosynthesis, Mode of action, transport, distribution and physiological effect of Ethylene (K2, K3, K4)

**Unit III: (9 Hours)**

- 3.1 Biochemistry of plant disease, defense mechanism of plants (K3, K4)
- 3.2 Biosynthesis, distribution and biological functions of industrially important secondary metabolite (K2, K3, K4)
- 3.3 Principles of plant diseases control (K2, K3)
- 3.4 Methods in phytochemicals: Extraction, fractionation and characterization (K2, K3, K4)
- 3.5 General properties of plant proteinase inhibitor (K3, K4)
- 3.6 Proteinase inhibitors-serine proteinase, acid proteinase and metalloproteinase (K2, K3, K4)

**Unit IV: (9 Hours)**

- 4.1 Water relations of plant, Mechanism of water absorption (K2, K3)
- 4.2 Aquaporin Symplast - Apoplast concept (K2, K3)
- 4.3 Ascent of sap (K2, K3)
- 4.4 Source and sink relationship, Translocation of Inorganic and Organic substances, Bud and Seed dormancy (K2, K3)
- 4.5 Senescence and Stress response in plant (K2, K3, K4)
- 4.6 Phytochromes- Properties, Photochemical, Transformation, Mode of action and physiological effect (K2, K3, K4)

**Unit V: (9 Hours)**

- 5.1 DNA polymorphism – Importance of RFLP and RAPD in plant breeding management (K2, K3, K4)
- 5.2 Aspects of plant genetic engineering. Tacking, Mapping and Cloning of plant genes, Selectable markers (K2, K3)
- 5.3 Reporter genes and promoters used in plant vectors. Ti plasmids and Crown gall tumor (K2, K3, K4)
- 5.4 Genetic engineering of plant for disease resistance, Cytoplasmic Male Sterility, Edible oil, Biodegradable plastics (K2, K3)
- 5.5 Delay of fruits ripening -Methods (K2, K3)
- 5.6 Application of plant tissue culture (K2, K3, K4)

**Text Books:**

## SEMESTER IV

### PEBCH20 ELECTIVE IV- B: HERBAL THERAPY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PEBCH20	Herbal Therapy	Theory	Elective IV B	3	3	40+60=100

#### Objective:

To help students to understand the concepts in pharmacognosy and the role of medicinal plants.

#### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Describe the concepts of Pharmacognosy
2. Explain the classification of medicinal plants
3. Outline the different parts of plant
4. Predict the Herbal medicines for Human ailments
5. Apply the knowledge on the important metabolic pathways in plants

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	H	H	H	M	H	M
CO 3	M	H	M	H	H	M
CO 4	H	M	H	M	H	M
CO 5	H	H	H	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Unit I:** (9 Hours)

- 1.1 Pharmacognosy - Definition and history (K1, K2, K3)
- 1.2 Indian systems of medicine - Siddha, Ayurveda, and Unani systems (K2, K3, K4)
- 1.3 Taxonomy of locally available medicinal plants (Tulsi, Aloe vera, Neem), their chemical constituents and medicinal uses (K2, K3, K4)
- 1.4 Classification of Crude drugs (K2, K3)
- 1.5 Chemistry of Drugs - Future of pharmacognosy (K2, K3)
- 1.6 Quality control of drugs of natural origin (K2, K3, K4)

**Unit II:** (9 Hours)

- 2.1 Classification of medicinal plants - Vernacular name and family (K2, K3)
- 2.2 Geographical source, cultivation, collection, and processing of crude drugs (K1, K2, K3, K4)
- 2.3 Morphological, histological studies and chemical constituents of crude drugs (K2, K3, K4)
- 2.4 Therapeutic and other pharmaceutical uses of underground stem – ginger and Alpinia (K2, K3, K4)
- 2.5 Therapeutic and other pharmaceutical uses of Roots - Rauwolfia – Belladonna (K2, K3, K4)
- 2.6 Therapeutic and other pharmaceutical uses of Aerial parts - Bark – Cinchona (K2, K3, K4)

**Unit III:** (9 Hours)

- 3.1 Leaves - Adathoda, Eucalyptus - Flower - Clove fruits seeds (K1, K2, K3, K4)
- 3.2 Nux vomica, Nutmegs and Gooseberry (K2, K3)
- 3.3 Unorganized drugs - Gum, Acacia and Resin (K2, K3, K4)
- 3.4 Turpentine, fixed oil and castor oil. (K2, K3)
- 3.5 Propagation of medicinal plants – Micropropagation (K2, K3, K4)
- 3.6 Macro propagation conservation of rare medicinal plants (K2, K3)

**Unit IV:** (9 Hours)

- 4.1 Herbal medicines for Human ailments (K2, K3, K4)
- 4.2 Drugs Acting on Cardiac Diseases, Cerebral Diseases, Nasal disease (K2, K3, K4)
- 4.3 Depressants. - Stimulants - Respiration and Drugs (K2, K3)
- 4.4 Urogenital system and drugs - Psychoactive plants (K2, K3)
- 4.5 Preparation of herbal infusion (K2, K3)
- 4.6 Toxicity in herbal drugs and their interactions (K2, K3)

**Unit V:** (9 Hours)

- 5.1 Role of biotechnology in medicinal plants banks (K2, K3)
- 5.2 Cultivation of medicinal and aromatic plants (K2, K3, K4)
- 5.3 Drug adulteration - methods of Drug evaluation (K2, K3).
- 5.4 Herbal food - Food processing - packaging (K2, K3)
- 5.5 Herbal sale and Export of medicinal plants (K2, K3, K4)
- 5.6 Marketing, Intellectual property rights and Export laws (K2, K3, K4)

**Text Books:**

**SEMESTER-III & IV**  
**PCBCN20 – MAIN PRACTICAL – III**  
 [Endocrinology, Immunotechniques, Biotechnology]

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II/ III & IV	PCBCN20	Main Practical - III	Practical	Core	5	4	40+60 =100

**Objective:**

The course is aimed to enable the student interpret hormonal imbalance and clinical conditions and also to provide in-depth practical knowledge and skill in performing immune-techniques and cell culture techniques.

**Course Outcome (CO)**

On completion of the course, the students will be able to,

1. Analyse the prevalence and impact of endocrine hormone in regulating health
2. Use the practical skill for diagnosing immunological reaction in relation to disease condition
3. Apply tissue culture technique and fermentation process for various applications

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	L	M	H
CO 2	L	H	H	H	H	L
CO 3	H	H	L	H	M	L
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6

CO 2	H	H	M	H	M	M
CO 3	H	L	H	L	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Endocrinology**

Case Studies (Identification of diseases based on patient history)

**Immunotechniques:**

1. Blood film preparation and identification of cells.
2. Demonstration of immuno reaction
  - Blood group

- Widal test
  - Pregnancy test
  - Coombs test
  - ELISA
  - Antigen antibody reaction
  - Ouchterlony double diffusion, Immunoelectrophoretic, Immunoblotting, Immunostaining, Immunofluorescent
3. Antibody sensitivity test
  4. Measurement of antibodies - Serial dilution
  5. Determination MIC

### **Biotechnology**

1. Preparation of Culture media & Reagents - Media composition, Nutrition, Hormones. Tissue Culture – Callus culture, Cell suspension.
2. Organ Micro-culture - Shoot tip, excised root, Leaf culture Plant micro-propagation – micro-culture of plants.
3. Basic sterilization techniques required for Media preparation & Cytological techniques Preparation of Slides.
4. Staining of Slides.
5. Image analysis & Karyotyping.
6. Preparation of alcohol using fermentation process.

***\*ONE WEEK HANDS ON TRAINING IN ANY INDUSTRY***

**SEMESTER-III & IV**  
**PCBCO20 - MAIN PRACTICAL IV**

[Molecular Biology, Clinical Biochemistry]

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credit	Marks 100
II/ III & IV	PCBCO20	Main Practical - IV	Practical	Core	5	4	40+60 = 100

**Objective:**

To help students to expertise in the molecular biology and clinical biochemistry techniques.

**Course Outcome (CO):**

1. Apply the molecular tools and techniques for extracting and separating DNA
2. Utilize practical knowledge and skill for diagnosing various diseases using biochemical analysis in blood specimen
3. Demonstrate various pathological conditions related to abnormal constituents in urine

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	H	H	H	H
CO 2	H	H	H	H	M	H
CO 3	H	H	H	H	H	H
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6

CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

**Molecular Biology**

1. Southern and Western blotting.
2. Restriction digestion of DNA.
3. Separation of RE –digested fragments by Gel Electrophoresis.
4. Isolation of plasmid.
5. Restriction Mapping of a Plasmid.
6. Polymerase Chain Reaction.
7. Extraction of genomic DNA and electrophoresis in agarose gel.
8. Determination of molecular size of DNA.

## **Clinical Biochemistry**

### **A. Biochemical Analysis Of Blood**

1. Estimation of blood Glucose by O-toluidine method.
2. Estimation of serum Proteins by Bradford's Method.
3. Estimation of A.G. ratio in serum.
4. Estimation of blood Urea by DAM method.
5. Estimation of serum Uric acid by Phosphotungstate method.
6. Estimation of serum Creatinine by alkaline picrate method.
7. Estimation of serum Creatine.
8. Estimation of serum Triglycerides.
9. Estimation of serum Cholesterol by Zak and Boyle method.
10. Estimation of serum Phospholipids.
11. Estimation of serum Bilirubin by Jendrassik and Crof method.
12. Estimation of LDL and HDL.

### **B. Urine Analysis**

1. Qualitative analysis of normal and pathological constituents in urine.

***INDUSTRIAL STUDY TOUR (HOSPITAL / RESEARCH INSTITUTE / INDUSTRY  
ONE VISIT PER YEAR)***

### INDEPENDENT ELECTIVE I A: ORGANIC FARMING

Year/ Sem I / I	Course Code PIBCA20	Title of the Course Organic Farming	Course Type Theory	Course Category Independent elective	H/W	Credits	Marks
					-	2	40+60=100

**Objective:**

To help students to understand the concepts and importance of organic farming and use it as a source of income generation.

**Course Outcomes (CO)**

On completion of the course, the students will be able to;

1. Analyze the importance of organic farming
2. Apply the concept of organic farming
3. Relate the importance of plant protection
4. Use the organic methods for plant cultivation
5. Plan the concept of income generation through organic farming and terrace gardening

**Unit-I**

- 1.1 Introduction: Farming, basic concepts, principles and development of organic farming. (K1, K2)
- 1.2 Scope of organic farming Sustainable agriculture (K1, K2)
- 1.3 Needs for organic farming, types of organic farming (K1, K2)
- 1.4 Requirement of organic farming (K1, K2)
- 1.5 Conventional and organic farming (K1, K2, K3)
- 1.6 Components of organic farming (K1, K2)

## **Unit -II**

- 2.1 Organic farming system (K1, K2, K3)
- 2.2 Green manuring (K1, K2)
- 2.3 Types and stages of composting- vermicomposting, composite quality and marketing (K1, K2, K3, K4, K5)
- 2.4 Preparation of organic manure- Bulky organic manure and concentrated organic manure (K1, K2, K3)
- 2.5 Biofertilizers: Preparation, applications, advantages and disadvantages (K1, K2)
- 2.6 Soil tillage, land preparation and mulching (K1, K2, K3)

## **Unit -III**

- 3.1 Plant protection methods- Biopesticides- Formulation- granules, fumigants spray (K1, K2, K3, K6)
- 3.2 Preparation of pesticides from Chrysanthemum, Neem, Tobacco (K1, K2, K3, K4)
- 3.3 Advantages of biopesticides (K1, K2)
- 3.4 Weed management (K1, K2, K3)
- 3.5 Biocontrol agents (K1, K2, K3)
- 3.6 Plant natural predators (K1, K2)

## **Unit-IV**

- 4.1 Organic crop production methods- Rice, Coconut (K1, K2, K4, K5)
- 4.2 Organic crop production methods- Mango, Banana (K1, K2, K4, K5)
- 4.3 Organic crop production methods - Ginger (K1, K2, K4, K5)
- 4.4 Organic crop production methods -Pepper, Cardamom (K1, K2, K4, K5)
- 4.5 Organic crop production methods Medicinal plants- Tulsi (K1, K2, K4)
- 4.6 Livestock components in organic farming (K1, K2)

## **Unit-V**

- 5.1 Quality analysis of organic food (K1, K2)
- 5.2 Organic food and health benefits. (K1, K2)
- 5.3 Farm economy-cost of production system marketing. (K1, K2, K3, K4)
- 5.4 Income generation farming: Terrace farming. (K1, K2, K3, K4)
- 5.5 Income generation farming: Mushroom cultivation. (K1, K2, K3, K4)
- 5.6 Organic standard, organic certification process (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate; K6 – Create]**

## INDEPENDENT ELECTIVE I B: FOOD PRESERVATION

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PIBCB20	Food Preservation	Theory	Independent elective	-	2	40+60=100

### Objective:

To enable students to understand the concepts of food preservation and methods involved

### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Outline the role of microbes in food spoilage and methods adopted to overcome microbial food spoilage
2. Apply the general methods for preserving fruits and vegetables
3. Find the methods of food preservation
4. Explain the methods for identifying food spoilage
5. Use the methods for preserving non-vegetarian foods/ meat products

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

CO / PSO	PSO 1	PSO 2	PSO 3	PSO 4	PSO 5	PSO 6
CO 1	H	H	M	M	L	H
CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit-I

1.1 Types of spoilage in perishables and Nonperishable - Food classification based on spoilage and shelf life (K1, K2, K3)

1.2 Spoilage of by products and factors affecting quality - Storage changes that take place in the food spoiled (K1, K2, K3, K4)

1.3 Preservation of spoilage, storage conditions (K1, K2, K3, K4)

1.4 Types of spoilage in canned food-Definition of canning, steps in the process of canning from Field (K1, K2, K3, K4)

1.5 Types of spoilage in canned food and prevention (K1, K2, K3)

1.6 Causes of spoilage, remedial measures to be taken General spoilage of foods (K1, K2, K3)

## **Unit-II**

2.1 Fruits and vegetable drying/dehydration- General methods of fruits & vegetable drying/dehydration, sun drying, mechanical drying (K1, K2, K3, K4, K5)

2.2 Types of dryers (K1, K2)

2.3 Characteristics of dried fruits and vegetables (K1, K2)

2.4 General process of fruit and vegetable drying (K1, K2)

2.5 Specialized drying operations in fruits and vegetables (K1, K2)

2.6 Pickles: Principle of pickle production-different types of pickles from fruits and vegetables. (K1, K2)

## **Unit-III**

3.1 Method of techniques of proper packaging of finished products &proper storing in cold storages &refrigerator-selection of suitable packaging material (K1, K2, K3, K4, K5)

3.2 Packaging and storage for bakery items- Transportation & marketing (K1, K2, K3)

3.3 Method of techniques of proper packaging of finished products &proper storing in cold storages &refrigerator-selection of suitable packaging material (K1, K2, K3, K4)

3.4 Packaging and storage for company items (K1, K2)

3.5 Transportation & marketing - Food safety like HACCP, ISO 22000, FSSAI (K1, K2)

3.6 Importance of Personal hygiene (K1, K2)

## **Unit-IV**

4.1 Identification of spoilage in fresh fruits and vegetables, application of remedial measures to prevent them (K1, K2, K4, K6)

4.2 Identification of spoilage in preserved fruit and Vegetables and remedial measures (K1, K2, K3, K4)

4.3 Identification of spoilage in food – bacteria, Yeast and Mold – remedial measures. (K1, K2, K3, K4)

4.4 Identification of spoilage in milk and Milk products. (K1, K2, K3, K4)

4.5 Identification of spoilage in food by insects – Identification of insects. (K1, K2, K3, K4)

4.6 Identification of food adulteration and Adulterated food. (K1, K2, K3, K4)

## **Unit-V**

- 5.1 Fleshy and sea food processing- Meat, Fish (K1, K2, K3, K4)
- 5.2 Fleshy and sea food processing- Poultry (K1, K2, K3, K4)
- 5.3 Fleshy and sea food processing-Egg (K1, K2, K3, K4)
- 5.4 Pre-Processing, processing and preservation- Smoking, Canning, drying (K1, K2, K3, K4)
- 5.5 Cooling, Dielectric Ohmic and infra-red heating (K1, K2)
- 5.6 Nutritional losses during processing and storage (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate; K6 – Create]**

## INDEPENDENT ELECTIVE II A: HORTICULTURE

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	PIBCC20	Horticulture	Theory	Independent elective - III	-	2	40+60=100

### Objective:

To emphasis on the significance and concepts of horticulture and the techniques involved.

### Course Outcomes (CO)

On completion of the course, the students will be able to;

1. Recall the significance of horticulture
2. Outline the impact of soil nature on horticulture
3. Apply the concept of hybrid to enhance yield
4. Gain knowledge on cropping techniques and harvesting methods
5. Identify the role of gardening in common places

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	H	M	M	L	H

CO 2	H	M	H	H	H	M
CO 3	H	H	M	M	L	M
CO 4	H	M	M	M	L	M
CO 5	H	H	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit-I

- 1.1 Horticulture – Definition, scope and importance, Division and classification of horticultural crops (K1, K2, K3, K4)
- 1.2 Propagation – definition, methods, seed propagation, vegetative propagation, micro propagation (K1, K2, K3, K5)
- 1.3 Planting systems – Protected cultivation (K1, K2)
- 1.4 Irrigation systems - Weed management – nutrient application methods in horticultural crops – crop regulation (K1, K2, K3, K5)
- 1.5 Maturity indices – harvesting methods, pre cooling – packaging (K1, K2, K3)
- 1.6 Storage of horticultural crops. (K1, K2, K3)

## **Unit-II**

- 2.1 Soil – definition – components – pedology –Edaphology. (K1, K2, K3)
- 2.2 Physical properties of soil – Color, Texture, structure, Bulk density, Particle density, Pore space; soil water, soil air, soil temperature and their significance in crop production. (K1, K2, K3, K4)
- 2.3 Soil chemical properties – Soil reaction, EC and CEC. Soil Organic Matter and its importance on soil properties – Essential nutrients for crop plants - Major, secondary and micro nutrients -Soils of Tamil Nadu. (K1, K2, K3, K4, K5)
- 2.4 Types – Straight, Complex, Compound, Mixed, Fortified and chelated fertilizers and their reactions in soil. (K1, K2, K3, K4, K5)
- 2.5 Techniques to enhance fertilizer use efficiently. (K1, K2, K3, K4, K5)
- 2.6 Soil fertility – INM and IPNS – Problem soils – acid, saline and alkaline soils- their formation, reclamation and management. (K1, K2, K3)

## **Unit-III**

- 3.1 Morphology and general anatomy of medicinally important plant parts: Roots, Stem and its modifications, Barks, Leaves, Flowers, Fruits, Seeds. (K1, K2)
- 3.2 Study of some medicinally important families (diagnostic features with examples of species of medicinal use): Paparveraceae, Rutaceae (K1, K2)
- 3.3 Study of some medicinally important families (diagnostic features with examples of species of medicinal use): Rubiaceae, Asteraceae, Solanaceae, Scrophulariaceae (K1, K2)
- 3.4 Study of some medicinally important families (diagnostic features with examples of species of medicinal use): Lamiaceae, Liliaceae, Fabaceae, Apiaceae (K1, K2)
- 3.5 Cultivation methods, Herbal pesticides, Harvesting and Storage. (K1, K2)
- 3.6 Marketing and general aspects of export of medicinally important plants (K1, K2)

## **Unit-IV**

- 4.1 Dry land horticulture – Importance, scope and distribution- Crops suitable for dry land systems – Important varieties, climate and soil requirements, commercial propagation methods (K1, K2)
- 4.2 Spacing and planting patterns - Cropping systems and intercropping – mulching - Soil and moisture conservation methods (K1, K2)
- 4.3 Anti transparent – Management of nutrients, water, weeds and problem soils (K1, K2)
- 4.4 Regulation of cropping – training and pruning methods - top working and rejuvenation (K1, K2)
- 4.5 Use of plant growth regulators (K1, K2)
- 4.6 Post harvest handling – Economics of production. (K1, K2)

## **Unit-V**

- 5.1 Scope and importance of ornamental gardening and landscaping –principles – formal and informal garden (K1, K2, K3)
- 5.2 Styles of garden - Features of garden - Garden components and adornments – plant Components - non plant components - garden walls, fencing, steps, garden drives and paths– sunken garden, roof garden, rockeries. (K1, K2, K3)
- 5.3 Operations in planting and maintenance of public garden, institutional garden, Industrial

garden, residential complex garden (K1, K2, K3)

5.4 Operations in landscape maintenance for high ways, bus terminus, airports, city roads and IT parks. (K1, K2)

5.5 Lawn – types of lawn grasses – criteria for selection- methods of lawn establishment – operation and maintenance – problems and remedial management (K1, K2, K3)

5.6 Flower arrangements and dry flowers – suitable plant (K1, K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate; K6 – Create]**

## INDEPENDENT ELECTIVE II B: CANCER BIOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / II	PIBCD20	Cancer Biology	Theory	Independent elective - IV	-	2	40+60=100

### Objectives:

To help students to understand the biology, diagnosis and treatment involved in cancer.

### Course Outcomes (CO):

On completion of the course, the students will be able to,

1. Describe the latest techniques in the diagnosis and treatment of cancer
2. Asses the contribution of environmental and genetic factors to cancer causation
3. Use inductive and deductive reasoning to evaluate the biological mechanisms that lead to the induction of cancer
4. Discuss the principle, clinical significance and cascade of metastasis
5. Examine the basic concepts of clinical research in oncology

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	H	M	H	H	M	M
CO 2	M	L	H	M	H	M

CO 2	M	M	H	L	H	M
CO 3	H	L	M	H	L	M
CO 4	H	M	M	M	L	M
CO 5	L	M	M	M	L	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit I:

- 1.1 Introduction to Cancer Biology (K1, K2)
- 1.2 Different forms of cancers (K2, K3)
- 1.3 Cancer screening and early detection (K1, K2, K3)
- 1.4 Detection using biochemical assays (K2, K3)
- 1.5 Tumor markers (K1, K3)
- 1.6 Molecular tools for early diagnosis of cancer (K2, K3)

### Unit II:

- 2.1 Theory of Carcinogenesis (K1, K2)
- 2.2 Chemical carcinogenesis (K3)
- 2.3 Principles of physical carcinogenesis (K2, K3)
- 2.4 X-ray radiation (K3)

- 2.5 Mechanisms of radiation carcinogenesis (K1, K2, K3)
- 2.6 Diet and cancer (K2, K3)

**Unit III:**

- 3.1 Signal targets and cancer (K1, K2)
- 3.2 Activation of kinases; Oncogenes, identification of oncogenes, retroviruses and oncogenes (K2, K3)
- 3.3 Detection of oncogenes, Oncogenes/proto oncogene activity (K1, K2)
- 3.4 Growth factors related to transformation, Telomerases (K1, K2, K3)
- 3.5 Tumor suppressor genes (K1, K2)
- 3.6 Modulation of cell cycle in cancer (K2, K3)

**Unit IV:**

- 4.1 Principles of cancer metastasis (K1, K2)
- 4.2 Clinical significances of invasion (K2, K3)
- 4.3 Metastatic cascade (K1, K2)
- 4.4 Basement membrane disruption (K1, K2, K3)
- 4.5 Proteinases (K1)
- 4.6 Tumor cell invasion (K1, K2)

**Unit V:**

- 5.1 Different forms of therapy, chemotherapy, radiation therapy (K1, K2)
- 5.2 Detection of cancers (K1, K2)
- 5.3 Prediction of aggressiveness of cancer (K2, K3)
- 5.4 Advances in cancer detection (K3)
- 5.5 Use of signal targets towards therapy of cancer (K1, K2, K3)
- 5.6 Gene therapy (K1, K3)

**Recommended Reading:**

## INDEPENDENT ELECTIVE III A: NANOBIO TECHNOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	PIBCE20	Nanobiotechnology	Theory	Independent elective - V	-	2	40+60=100

### Objective:

The course aims to provide an interdisciplinary knowledge on Nano materials and their applications in biosciences.

### Course Outcome (CO)

On completion of the course, the students will be able to;

1. Apply the essential role of Nanoscience
2. Outline the prospective of Nano biology and Nano sensors
3. Discuss the Nanoparticle drug base delivery systems
4. Create knowledge to develop Nanomaterials
5. Identify the role of plants in Nanoparticle synthesis

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 5	H	L	H	H	M	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit I:

- 1.1 Introduction to Biocompatibility (K2, K3, K4)
- 1.2 Antibacterial Activity-Principles and Applications (K2, K3, K4)
- 1.3 Biomaterial Nano Circuitry-Protein based Nano circuitry (K3, K4)
- 1.4 Neurons for network formation of DNA (K2, K4)
- 1.5 Nanostructures for mechanics and DNA based computation (K3, K4)
- 1.6 DNA based Nano mechanical devices- Applications (K2, K3)

**Unit II:**

- 2.1 Interaction between Biomolecules and Nanoparticle surface (K3, K4)
- 2.2 Different types of inorganic material used for the synthesis of Hybrid Nano-bio assemblies (K2, K3, K4)
- 2.3 Analytical applications of Nano in Biology and Nano probes (K3, K4)
- 2.4 A new methodology in medical diagnostics and biotechnology (K4)
- 2.5 Current status of Nano biotechnology (K3, K4)
- 2.6 Future prospective of Nano biology and Nano sensors (K2, K3, K4)

**Unit III:**

- 3.1 Development of Nano medicines and Nano systems (K3, K4)
- 3.2 Protocols for Nano drug administration (K3, K5)
- 3.3 Materials used in diagnostics and therapeutic applications of nanotechnology (K3, K4)
- 3.4 Molecular Nano mechanics (K3, K4)
- 3.5 Molecular devices in Nanotribology (K2, K3, K4)
- 3.6 Applications of Nanotribology (K3, K4)

**Unit IV:**

- 4.1 Molecular and cellular biology applications (K2, K3, K4)
- 4.2 2-D electrophoresis (K2, K3)
- 4.3 Mass spectrophotometer of proteins (K3, K4)
- 4.4 Protein Microarrays -Fabrication-Fluorescence detection (K2, K3)
- 4.5 Binding assays and Immunosensors (K3, K4)
- 4.6 Integrated Nano biotechnology systems (K2, K3, K4)

**Unit V:**

- 5.1 Use of Bacteria, Fungi in Nanoparticle synthesis (K3, K4)
- 5.2 Actinomycetes for Nanoparticle synthesis (K3, K4)
- 5.3 Magneto tactic Bacteria for Natural synthesis of Magnetic Nanoparticles (K2, K3, K4)
- 5.4 Viruses as components for the formation of Nanostructured Materials (K4)
- 5.5 Process and applications of Nanostructured materials (K3, K4)
- 5.6 Role of plants in Nanoparticle synthesis (K2, K3, K4)

### INDEPENDENT ELECTIVE III B: STEM CELL TECHNOLOGY

Year/ Sem II/III	Course Code	Title of the Course Stem Cell Technology	Course Type Theory	Course Category Independent elective	H/W	Credits	Marks 100 40+60=100
	PIBCF20				-	2	

#### Objectives:

The course gives in depth knowledge on stem cell biology, regulation of stem cell differentiation, tools to study and its utilization in treating various disorders

#### Course Outcomes (CO):

On completion of the course, the students will be able to;

1. Relate the importance of stem cell therapy
2. Apply the concept of stem cell development
3. Analyze the importance of ethics in stem cell and gene therapy
4. Use hematopoietic stem cells in treating blood related disorders and diseases
5. Identify the importance of various stem cells in therapeutic applications

#### Unit I:

- 1.1 Stem cell- Introduction, definition, properties of stem cell -self renewal, clonality and plasticity (K1, K2)
- 1.2 Proliferation, culture of stem cells (K1, K2)
- 1.3 Classification of stem cell (K1, K2)
- 1.4 Sources of stem cell-Fetus and various adult tissues (K1, K2)
- 1.5 Advantages of stem cell, medical applications of stem cells (K1, K2)
- 1.6 Cryopreservation of stem cells – Conventional slow- freezing method and Vitrification method. (K1, K2, K3)

## **Unit II:**

- 2.1 Stem cell and their development potentials. (K1, K2)
- 2.2 Xenofree derivation of stem cells- Alternative feeder cells and feeder free culture. (K1, K2)
- 2.3. Blastocyst culture- Various stages of embryonic development. In vitro fertilization. (K1, K2, K3)
- 2.4 In vivo and invitro differentiation of stem cells. (K1, K2, K3)
- 2.5 Pluripotent nature of stem cell- Extrinsic and intrinsic factors, Karyotyping. (K1, K2, k3, K4)
- 2.6 Expression of cell surface markers. (K1, K2, K3, K4)

## **Unit III:**

- 3.1 Gene Therapy: Introduction, History and evolution of Gene therapy, optimal disease targets. (K1, K2)
- 3.2 Failures and successes with gene therapy and future prospects. (K1, K2)
- 3.3 Genetic Perspectives for Gene Therapy, Gene Delivery methods: Viral vectors and Non-viral Vectors (K1, K2)
- 3.4 Therapeutic cloning strategies, derivation and propagation of human embryonic stem cells. (K1, K2, K3)
- 3.5 Reproductive cloning by SCNT. Use of SCNT. Limitations of cloning – Hurdles to improve the efficiency of therapeutic cloning. (K1, K2, K5)
- 3.6 Stem cell research and ethics – translational medicine ethics. (K1, K2, K3)

## **Unit IV:**

- 4.1 Hematopoietic stem cells (HSC) - Basics, Development and Regulation of HSC. (K1, K2)
- 4.2 Clinical Application of HSC – Gene Therapy – using haematopoietic stem cells HSC for Leukemia. (K1, K2)
- 4.3 Mesenchymal stem cells (MSC) - Differentiation and Identification. (K1, K2, K3)
- 4.4 Characteristics of mesenchymal stem cells. (K1, K2)
- 4.5 Clinical applications of stem cells. Stem cells and regenerative medicine. (K1, K2)
- 4.6 Ips –induced pluripotent stem cells. (K1, K2)

## **Unit V:**

- 5.1 Skeletal Muscle Stem Cells – Development and functions. (K1, K2)
- 5.2 Liver stem cells – Organization and functions. Tumor stem cells – Basics differences and Similarities of cancer stem cells and stem cells. (K1, K2)
- 5.3 Cancer stem cell signaling – NOTCH pathway. (K1, K2)
- 5.4 Canonical Wnt signaling pathways in hematopoietic stem cells. (K1, K2, K5)
- 5.5 Stem cell therapies in animal models. (K1, K2)
- 5.6 Mammary stem cells – intestinal stem cells -keratinocyte stem cells of cornea (K1, K2)

## INDEPENDENT ELECTIVE IV A: PSYCHOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PIBCG20	Psychology	Theory	Independent elective	-	2	40+60=100

### Objectives:

The course is aimed to enhance the psychological skills for the students to acquire factual knowledge and ability to conceptualize and apply in their life.

### Course Outcome (CO)

1. Apply the principles of psychology in day-to-day life for a better understanding of oneself and others.
2. Compare and Contrast the biological basis of memory and forgetting.
3. Describe Language acquisition and the role Language plays in Communication and Thought.
4. Recognize the importance of Learning and Motivation.
5. Critically evaluate the fundamental processes underlying human behavior.

CO / PO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

CO 4	H	H	M	H	H	H
CO 5	H	H	L	H	H	M
<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit I:

- 1.1 Psychology - Definition and Origin (K2)
- 1.2 Nature and Scope of Psychology (K2)
- 1.3 Psychology as a Science (K2)
- 1.4 Specialties in Psychology (K2)
- 1.5 Perspectives in Psychology (K2)
- 1.6 Goals of Psychology (K2)

### Unit II:

- 2.1 Methods of assessment in Psychology – Questionnaire (K2, K3, K4, K6)
- 2.2 Memory – Stages in memory (K2, K3)
- 2.3 The modal model of memory (K2, K3)

- 2.4 Forgetting – Types (K2)
- 2.5 Common causes of forgetfulness (K2)
- 2.6 Memory disorder (K2)

### **Unit III:**

- 3.1 Basic elements of thought (K2, K3)
- 3.2 Types of Concept and Concept formation (K2)
- 3.3 Reasoning – Types, Decision making and problem solving (K2, K3)
- 3.4 Creative thinking – Nature and Characteristics (K2, K3)
- 3.5 Artificial Intelligence (K2, K3)
- 3.6 Language – Nature and Development of Language (K2, K3, K4, K5)

### **Unit IV:**

- 4.1 Learning – Nature (K2, K3)
- 4.2 Classical Conditioning – Principle and Applications (K2, K3, K4, K5)
- 4.3 Operant Conditioning – Principle and Applications (K2, K3, K4, K5)
- 4.4 Biological factors in Learning (K2, K3)
- 4.5 Basic Concepts of Motivation (K2, K3)
- 4.6 Indicators of Motivation (K2, K3)

### **Unit V:**

- 5.1 Emotion – Components of Emotion. (K2, K3)
- 5.2 Characteristics and Functions of Emotion (K2, K3, K5)
- 5.3 Physiology of Emotion – Expression and Control (K2, K3, K5)
- 5.4 Personality – Definition – Types (K1, K2, K3)
- 5.5 Assessment of Personality (K2, K3, K4)
- 5.6 States of Consciousness (K2)

**[Knowledge Level: K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate; K6 – Create]**

## INDEPENDENT ELECTIVE IV B: ENTREPRENEURIAL BIOCHEMISTRY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PIBCH20	Entrepreneurial Biochemistry	Theory	Independent elective	-	2	40+60=100

### Objectives:

The course provides detailed knowledge on ideas, opportunities and components necessary for bio-entrepreneurship.

### Course Outcome (CO):

On completion of the course, the students will be able to;

1. Describe the dynamic role of entrepreneurship and small business.
2. Identify and implement the role of entrepreneur towards society.
3. Create and explain innovative business ideas and market opportunities.
4. Generate bio-entrepreneurship and describe its components and forms.
5. Develop and validate skills needed to run a business successfully.

<b>H- High (3), M-Medium (2), L-Low (1)</b>						

### Unit I:

- 1.1 Entrepreneurship - concept - Need and importance (K1, K2, K3)
- 1.2 Entrepreneurship in economic growth (K1, K2, K3)
- 1.3 Factors affecting Entrepreneurship (K1, K2, K4)
- 1.4 Entrepreneurship journey: Self assessment of Qualities, Skills, Resources and Dreams (K1, K2, K3, K4, K5)
- 1.5 Entrepreneurial values- attitudes and motivation (K1, K2, K3, K4)
- 1.6 Challenges faced by women in entrepreneurship. (K2, K4)

**Unit II:**

- 2.1 Difference between Entrepreneur and Intrapreneur. (K1, K2)
- 2.2 Social Entrepreneurship – Concept and Importance (K2, K3, K4, K6)
- 2.3 Role of society and family in the growth of an entrepreneur (K2, K3, K4)
- 2.4 Role of technology / social media in creating new support structure for promoting entrepreneurship (K1, K2, K3, K4)
- 2.5 Feasibility study and Opportunity assessment - Managerial and Locational feasibility (K2, K3, K4, K5)
- 2.6 Market: Traditional and E-commerce concept. (K1, K2, K3, K4, K5, K6)

**Unit III:**

- 3.1 Business plan preparation and Execution (K1, K2, K3, K4, K6)
- 3.2 Content of a Business plan – Project Report (K1, K2, K3, K4)
- 3.3 Role of the medical laboratory technician (K1, K2, K3)
- 3.4 Introduction to Hematology (K1, K2, K3)
- 3.5 Introduction to Clinical Pathology (K1, K2, K3)
- 3.6 Introduction to Histopathology (K1, K2, K3)

**Unit IV:**

- 4.1 Agri-clinic – Hybrid seeds: overview (K1, K2, K3)
- 4.2 Vermi compost -Biopesticide manufacturing: overview (K1, K2, K3)
- 4.3 Horticulture Crops: overview (K1, K2, K3)
- 4.4 Food processing: overview (K1, K2, K3)
- 4.5 Value addition of food products (K1, K2, K3)
- 4.6 Livestock production–Sericulture: overview (K1, K2, K3)

**Unit V:**

- 5.1 Risk factor - Types of Business risk (K1, K2, K3)
- 5.2 Financial planning (K1, K2, K3, K4)
- 5.3 Developing Marketing Strategies – Franchising, Trade mark registration – Patent registration (K1, K2, K3, K6)
- 5.4 Entrepreneurship support Institution and Schemes – MSME – NABARD – KVIC – DIC, NSIC, Support to Training and Employment Programme for Women (STEP) (K1, K2, K3)
- 5.5 Biotechnology Industry Research Assistance Council (BIARC) Start up India - Make in India. (K1, K2, K3)
- 5.6 Success stories of Entrepreneurs. (K1, K2)

### **PROGRAMME OUTCOMES (PO)**

On completion of the PG Programme, students will be able to:

- PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.
- PO2:** Assimilate and apply principles and concepts towards skill development and employability.
- PO3:** Apply critical and scientific approaches to address problems and find solutions.
- PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.
- PO5:** Integrate issues of social relevance in the field of study.
- PO6:** Persist in life-long learning for personal and societal progress.

### **PROGRAMME SPECIFIC OUTCOMES (PSO):**

On completion of the PG Programme in Microbiology, students will be able to;

- PSO1:** Attain an in-depth knowledge in the anatomy and physiology of a repertoire of microorganisms with its beneficial and harmful associations.
- PSO2:** Demonstrate practical skills in the use of tools, technologies and methods common to microbiology, and apply the scientific method and hypothesis testing in the design and execution of experiments.
- PSO3:** Develop ability to independently carry out a complete scientific work process with research ethics, including the understanding of theoretical background, hypothesis generation, collection and analysis of data, and interpretation and presentation of results.
- PSO4:** Acquaint a broader knowledge in the concepts of Taxonomy, molecular biology, immunology, food, environment and agricultural microbiology, nanotechnology, forensic science and genetic engineering.
- PSO5:** Incorporate effective career with marketing, project management, business development or venture capital within the biotech, pharmaceutical, medical technology or related fields.
- PSO6:** Compete in state/national level competitive exams to pursue higher study with an understanding that education is life-long process for personal and societal progress.

## SEMESTER – I

### PCMBA20 - GENERAL MICROBIOLOGY

<b>Year I SEM: I</b>	<b>Course Code</b> PCMBA20	<b>Title Of The Course</b> General Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
--------------------------	-----------------------------------	---	----------------------------------	------------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To provide an in depth knowledge on the fundamentals of Microbiology, microscopy and anatomy cum physiology of bacteria, fungi, algae, protozoa, virus

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline history and recent developments in the field of Microbiology.

**CO2:** Demonstrate and utilize working of different laboratory instruments.

**CO3:** Acquire knowledge on the sample preparation and perform various staining techniques.

**CO4:** Discuss important taxonomical aspects of bacteria, fungi, algae and virus.

**CO5:** Compile bacterial anatomy and physiology and structural properties of algae and fungi.

#### COURSE SYLLABUS

##### UNIT-I: History and Recent Developments.

(10 hours)

- 1.1 Discovery of Microbial world. (K1,K2)
- 1.2 Controversy over spontaneous generation.(K1,K2)
- 1.3 Evolutions of Microbiology with its recent developments in Medicine.(K1,K2,K3)
- 1.4 Role of Microbes in transformation of organic matter. (K1,K2,K3,K4)
- 1.5 Role of microbes in causing diseases. (K1,K2)
- 1.6 Modern trends in microbial taxonomy. (K2,K3,K4,K5)

**UNIT-II: Instrumentation and Staining Methods.****(20 hours)**

- 2.1 Microscopy - Its principles and applications. Simple - Compound, Dark field, phase contrast, Fluorescent and confocal. (K1,K2,K3)
- 2.2 Electron Microscopes - SEM, TEM. (K1,K2,K3)
- 2.3 Principles, Operation and maintenance of autoclaves, Ovens, Centrifuges - refrigerated & ultra-speed. (K1,K2,K3)
- 2.4 Calorimeters, spectrophotometers, lyophilizers, deep freezer. . (K1,K2,K3)
- 2.5 Staining methods - Gram, Acid Fast, spore, metachromatic granules, capsule and flagella.(K1,K2,K3)
- 2.6 Sterilization and disinfection methods and their quality control. . (K1,K2,K3)

**UNIT-III: Classification of Bacteria and Virus.****(15 hours)**

- 3.1 Classification of bacteria and salient features according to Bergey's manual of determinative Bacteriology. (K1,K2,K3,K4)
- 3.2 Microbial diversity in different ecosystems. (K1,K2)
- 3.3 Halophiles, mesophiles, thermophiles.(K1,K2)
- 3.4 Acidophiles Alkalophiles, barophiles and other extremophiles. .(K1,K2)
- 3.5 Structure and function of viruses. .(K1,K2)
- 3.6 Classification of viruses - replication of viruses – bacteriophages. (K1,K2)

**UNIT-IV: Bacterial Anatomy and Physiology.****(15 hours)**

- 4.1 Bacterial morphology, structure and characterization - cellular components of bacteria. (K1,K2)
- 4.2 Sporulation and its mechanics. (K1,K2)
- 4.3 Growth and nutrition - Nutritional requirements - Autotrophs, heterotrophs - enrichment culture. (K1,K2, K3,K4)
- 4.4 Growth curve - Kinetics of Growth - Mathematical expression of exponential growth phase. (K1,K2, K3,K4)
- 4.5 Measurement of growth and growth yields - Batch Culture - Synchronous growth. (K1,K2, K3,K4)
- 4.6 Techniques of pure culture. (K2, K3,K4)

**UNIT-V: Structure and Reproduction of Algae and Fungi.****(15)**

- 5.1 Classification of fungi according to Alexopoulos and Mims. (K1,K2)
- 5.2 Cell structure, specialized somatic structure. (K1,K2)
- 5.3 Life cycles and reproduction of fungi - Asexual, sexual and parasexual cycle. (K1,K2)
- 5.4 Mechanisms of growth in Fungi, Measurement and kinetics of growth, nutritional and environmental requirements; Prevention of fungal growth. (K1, K2, K3)
- 5.5 Structure and reproduction of *Spirogyra*, *Euglena*, *Exuviaella*, (K1,K2)
- 5.6 Structure and reproduction of *Diatoms*, *Sargassam* and *Porphyra*. (K1,K2)

## **TEXT BOOKS:**

**PCMBB20: FOOD, AGRICULTURE AND ENVIRONMENTAL  
MICROBIOLOGY**

<b>Year: I SEM: I</b>	<b>Course Code</b> PCMBB20	<b>Title of The Course</b> Food, Agriculture and Environmental Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
-----------------------------------	-----------------------------------	--	----------------------------------	------------------------------------	-----------------	---------------------	---------------------

**Course Objective:**

To make the students familiarize on Food, Agriculture and Environmental aspects of Microbiology.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Analyse the principles in food preservation.

**CO2:** Communicate diseases associated with food.

**CO3:** Discuss the role of microorganisms in soil and microbial interaction.

**CO4:** Utilize the knowledge on biogeochemical cycles to produce biofertilizers.

**CO5:** Assess information about microbiological quality of air and water.

**H – High (3), M – Moderate (2), L – Low (1)**

**COURSE SYLLABUS**

**UNIT-I: Food Microbiology.**

**(15 hours)**

1.1 Importance of studying Food microbiology- Primary sources of microorganisms in foods. (K1,K2)

1.2 Factors influencing microbial growth in foods - extrinsic and intrinsic.(K1,K2)

1.3 Principles of food preservation - preservation methods - irradiation - drying, heat processing, chilling and freezing, high pressure, modification of atmosphere and chemical preservatives. (K1,K2,K3,K4)

- 1.4 Nutritional value of fermented foods. (K2,K3,K4,K5,K6)
- 1.5 SCP and their uses. (K1,K2,K3)
- 1.6 Contamination, preservation and spoilage of fruits, vegetables, meat and poultry products. (K1,K2,K3)

**UNIT-II: Dairy Microbiology. (15 hours)**

- 2.1 Microbiology of fermented milk - Starter lactic cultures (K1,K2)
- 2.2 Fermented milk products (cheese, yoghurt, acidophilus milk, kefir, kumis). (K1,K2,K3)
- 2.3 Food sanitation in food manufacture and in the retail trade. (K1,K2,K3)
- 2.4 (HACCP) - Food control agencies and its regulations. (K1,K2,K3)
- 2.5 Food borne disease.(K1,K2)
- 2.6 Milk borne diseases. (K1,K2)

**UNIT-III: Soil Microbiology. (15 hours)**

- 3.1 Distribution of soil microorganisms in soil. (K1,K2)
- 3.2 Factors influencing the soil microflora. (K1,K2)
- 3.3 Role of microorganisms in soil fertility. (K1,K2)
- 3.4 Interactions among microorganisms, mutualisms, commensalism, competition, amensalism, parasitism, predation. (K1,K2)
- 3.5 Interactions between microbes and plants - rhizosphere, phyllosphere. (K1,K2)
- 3.6 Mycorrhizae, root nodule bacteria. (K1,K2,K3,K4)

**UNIT-IV: Biogeochemical cycle and Biofertilizers. (15 hours)**

- 4.1 Biogeochemical - carbon cycle - role of microbes in carbon cycle.(K1,K2)
- 4.2 Nitrogen cycle - mechanism of biological nitrogen fixation - ammonification - nitrification - denitrification and microorganisms involved in such processes. (K1,K2)
- 4.3 Phosphorous cycle. (K1,K2)
- 4.4 Sulphur cycle. (K1,K2)
- 4.5 Biofertilizer for sustainable agriculture *Rhizobium, Azospirillum, Azotobacter*.(K1,K2,K3,K4)
- 4.6 *Azolla*, BGA -mass production methods - applications methods and crop response of biofertilizers.( K1,K2,K3,K4)

**UNIT-V: Aero Microbiology and Aquatic Microbiology. (15 hours)**

- 5.1 Droplet, Droplet nuclei and Aerosol. (K1,K2)
- 5.2 Assessment of air quality. (K2,K3,K4)
- 5.3 Airborne diseases, their symptoms and preventive measures, water borne disease.(K1,K2)
- 5.4 Types of water – Assessment of microbiological quality of water.(K2,K3,K4)
- 5.5 Treatment of municipal water (K4,K5)

5.6 Types of wastes, characterization of solid and liquid waste. Sewage treatment-composting. (K3,K4,K5)

## PCMBC20: IMMUNOLOGY AND IMMUNOTECHNOLOGY

<b>Year:</b> <b>I</b>	<b>Course Code</b> PCMBC20	<b>Title Of The Course</b> Immunology and Immunotechnology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
--------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide in depth knowledge on immune cells, immune system- its function and hybridoma technology

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the types of immune response and discuss the role of lymphoid organs in immunity.

**CO2:** Compile immunoglobulins and antigens.

**CO3:** Communicate the importance of MHC in organ transplantation.

**CO4:** Analyse the allergic responses by the immune system leading to hypersensitive conditions and auto immune disorders.

**CO5:** Plan immunization schedule.

CO5	H	M	H	L	M	H

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT-I: Immunity and Lymphoid Organs.

**(15 hours)**

- 1.1 Introduction: Infection, immunity, types of immunity - innate and adaptive. (K1,K2)
- 1.2 Phagocytosis and extracellular killing, immunity to specific infection. (K1,K2)
- 1.3 Milestones in immunology - evolution of immunology. (K1,K2)
- 1.4 Immune Systems: Anatomy of the lympho - reticular system, primary lymphoid organs - bone marrow & thymus. (K1,K2)

- 1.5 Secondary lymphoid tissues - spleen, lymph nodes & gut associated lymphoid tissue. (K1,K2)
- 1.6 Immuno reactive cells - T and B lymphocytes, macrophages, granulocyte and NK cells. (K1,K2)

**UNIT-II: Antigens and Major Histocompatibility Complex. (15 hours)**

- 2.1 Antigens and Immunogenicity: Terminologies and definitions - antigen, immunogen, haptens, superantigens, tolerogen, epitope, paratope and antigenic determinants. (K1,K2)
- 2.2 Features associated with antigenicity and immunogenicity. (K1,K2)
- 2.3 Basis of antigen specificity. (K1,K2)
- 2.4 Antigen receptors: Cell surface proteins of Major Histocompatibility Complex (MHC): types, - class I, II and III distribution and function. (K1,K2)
- 2.5 MHC in relation to transplantation and HLA typing. (K1,K2)
- 2.6 T cell receptor complex (TCR). (K1,K2)

**UNIT-III: Immunoglobulin and Complement System. (15 hours)**

- 3.1 Antibodies - B cell receptors. Three dimensional structure of immunoglobulin molecule. (K1,K2)
- 3.2 Types of immunoglobulins. Biological and chemical properties of immunoglobulin. (K1,K2)
- 3.3 Antigen, antibody attraction - forces, affinity, avidity and specificity. (K1,K2,K3,K4,K5,K6)
- 3.4 Antibody synthesis and diversity - genetic basis. (K1,K2,K3)
- 3.5 Monoclonal and polyclonal antibody production - Hybridoma technology. (K1,K2,K3,K4)
- 3.6 Complement system: Basics of complement protein - different pathways of complement activation - the pathway of membrane attack (common pathway), classical and alternate. (K1,K2)

**UNIT-IV: Hypersensitivity. (15 hours)**

- 4.1 Acquired immune response. (K1,K2)
- 4.2 Humoral immune response - various phases of humoral immune response. (K1,K2)
- 4.3 Cell mediated immune response. (K1,K2)
- 4.4 Immune regulation - various events in induction of immune response. (K1,K2)
- 4.5 Hypersensitivity- Type I to IV (K1,K2)
- 4.6 Means of immunosuppression - physical, chemical and biological. (K1,K2,K3)

**UNIT-V: Vaccines and Autoimmune Diseases. (15 hours)**

- 5.1 Vaccines – Live attenuated and killed inactivated vaccine. (K1,K2)
- 5.2 rDNA vaccine, synthetic peptide vaccine, Plasma derived vaccine, anti - idiotypic vaccine and DNA vaccine. (K1,K2,K3,K4,K5,K6)
- 5.3 Active immunization - vaccines & toxoids – bacterial and viral. (K1,K2,K3,K4)
- 5.4 Immunization Schedule.(K1,K2,K3)
- 5.5 Passive immunization - antitoxins, immunoglobulin, specific immunoglobulin, hyper immune gamma globulin. (K1,K2,K3,K4)

## 5.6 Autoimmune diseases. (K1,K2)

## PEMBA20 - ELECTIVE I A: PETROLEUM MICROBIOLOGY

<b>Year: I</b>	<b>Course Code</b> PEMBA20	<b>Title Of The Course</b> Petroleum Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--------------------	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

### Course Objective:

To provide in depth knowledge about the microbial communities residing in the oil reservoirs and other hydrocarbon resource environments.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the importance of petroleum Microbiology and predict the impact of the microbial communities in various petroleum fields.

**CO2:** Design the microbial solutions to the microbiology related problems in the petroleum industry.

**CO3:** Discuss solutions to enhance production of oil/energy by applying concepts of production related petroleum microbiology.

**CO4:** Utilize biotechnological aspects in remediation of oil spills.

**CO5:** Use apparatus for the detection of living microbial contaminants in petroleum products.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS:

#### Unit-I: Microbiology of Oil Fields.

(10 hours)

1.1 Introduction to oil fields, formation of oil reservoirs, oil production. (K1,K2)

1.2 Indigenous microbial communities in oil fields. (K1,K2)

- 1.3 Microbiology and molecular biology of sulfate-reducing bacteria. (K1,K2)
- 1.4 Hyperthermophilic archae in oil fields.(K1,K2)
- 1.5 Methanogenic archaea in oil fields. (K1,K2)
- 1.6 Fermentative, iron-reducing and nitrate-reducing microorganisms. (K1,K2)

**UNIT–II: Detrimental Effects of Bacterial Activity. (8 hours)**

- 2.1 Biodegradation of petroleum in subsurface geological reservoirs. (K1,K2)
- 2.2 Introduction to oil Reservoir souring. (K1,K2)
- 2.3 Mechanism and prevention of reservoir souring. (K1,K2,K3)
- 2.4 Microbial control of hydrogen sulfide production in oil reservoirs. (K1,K2,K3)
- 2.5 Microbial corrosion in the oil industry. (K1,K2)
- 2.6 Biofouling in the oil industry. (K1,K2)

**UNIT–III: Application of Biotechnology in Oil Production. (9 hours)**

- 3.1 Intoduction to application of Biotechnology in oil production. (K1,K2)
- 3.2 Microbially enhanced oil recovery. (K1,K2,K3)
- 3.3 Past present and future biotechnological upgrading of petroleum. (K1,K2)
- 3.4 Diversity in oil production. (K1,K2,K3)
- 3.5 Function of alkane oxygenases (K1,K2)
- 3.6 Biocatalytic applications of alkane oxygenases, (K1,K2,K3)

**UNIT–IV: Microremediation of Oil Spills and Oil Resources. (9 hours)**

- 4.1 Introduction to Microremediation. (K1,K2)
- 4.2 Marine oil spill bioremediation. (K1,K2,K3)
- 4.3 Metabolic indicators of anaerobic hydrocarbon biodegradation in petroleum-laden environments. (K1,K2,K3,K4)
- 4.4 Unconventional gas and oil resources- shale gas. (K1,K2,K3)
- 4.5 Unconventional oil resources- oil sands. (K1,K2,K3)
- 4.6 Coal bed methane (CBM). (K1,K2,K3)

**UNIT–V: Geo Microbiological Exploration of Petroleum Products. (9 hours)**

- 5.1 Introduction to GeoMicrobial Exploration of Petroleum products. (K1,K2)
- 5.2 Impact and Significance of GeoMicrobial Exploration of Petroleum products. (K1,K2)
- 5.3 Apparatus for the detection of living microbial contaminants in petroleum products. (K1,K2)
- 5.4 Microbiological Exploration for Petroleum Deposits. (K1,K2,K3,K4)
- 5.5 Geomicrobiological methods of ore exploration. (K1,K2,K3,K4)

## 5.6 Geomicrobiological methods Petroleum exploration. (K1,K2,K3,K4)

### **REFERENCE BOOKS:**

1. Bernard Ollivier, Mitchel Magot (2005). Petroleum Microbiology, ASM Press.
2. Corinne Whitby, Torban Lund Skovhus (2011). Applied Microbiology and molecular biology in oil field systems, Springer.

## PEMBB20 - ELECTIVE I B: ECONOMIC MICROBIOLOGY

<b>Year:</b> <b>I</b>	<b>Course Code</b> PEMBB20	<b>Title Of The Course</b> Economic Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--------------------------	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

### Course Objective:

To introduce entrepreneurial skills among students to become entrepreneurs and can decide to make the idea reality.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Utilize microorganisms as biofertilizers and for vermicomposting.

**CO2:** Analyse microbial cells as fermented products.

**CO3:** Use yeast in and as food and feed.

**CO4:** Demonstrate mushroom cultivation and its storage.

**CO5:** Discuss biotechnological applications of microalgae.

CO4	H	M	H	H	L	H
CO5	H	L	M	L	H	H

H – High (3), M – Moderate (2), L – Low (1)

### COURSE SYLLABUS

#### UNIT-I: Microbes in Agriculture.

(8 hours)

- 1.1 Production and application of biofertilizers - *Rhizobium*, *Azospirillum*, *Azotobacter*. (K1,K2,K3,K4)
- 1.2 *Azolla* - *Anabaena*, BGA. (K1,K2,K3,K4)
- 1.3 Phosphate solubilizing – phosphobacterium and Mycorrhiza. (K1,K2,K3,K4)
- 1.4 Bacterial Biopesticides. (K1,K2,K3,K4)
- 1.5 Fungal Biopesticides. (K1,K2,K3,K4)
- 1.6 Role of microorganisms in vermicomposting. (K1,K2,K3,K4)

**UNIT–II: Microbes in Industries.****(10 hours)**

- 2.1 Fermented beverages: wine, beer, whisky, brandy – health benefits and disadvantages. (K1,K2,K3,K4)
- 2.2 Organic acids- Citric acid, acetic acid. (K1,K2,K3,K4)
- 2.3 Organic solvents- Acetone, butanol, ethanol. (K1,K2,K3,K4)
- 2.4 Fermented foods- cheese, yoghurt, sauerkraut, bread, sweeteners, flavor enhancers. (K1,K2,K3,K4)
- 2.5 Traditional fermented foods- Dhokla, Appam, Churpa/Churpi, fermented bamboo shoot. (K1,K2,K3,K4,K5,K6)
- 2.6 Oriental fermented foods- soya sauce, koji & miso(K1,K2,K3,K4).

**UNIT–III: Yeast Production.****(9 hours)**

- 3.1 Bottom and Top yeast- Baker's yeast. (K1,K2)
- 3.2 Food and feed yeasts. (K1,K2)
- 3.3 Alcohol yeasts. (K1,K2)
- 3.4 SCP: *Saccharomyces cerevisiae*, *Pichia pastoris*. (K1,K2)
- 3.5 *Candida utilis* and *Geotrichum candidum*. (K1,K2)
- 3.6 Other yeast products. (K1,K2)

**UNIT–IV: Mushroom Cultivation.****(9 hours)**

- 4.1 Button mushroom (*Agaricus bisporus*) – composting, spawning (K1,K2,K3,K4,K6)
- 4.2 Button mushroom (*Agaricus bisporus*) – cropping, harvesting and marketing. (K1,K2,K3,K4,K6)
- 4.3 Oyster mushroom (*Pleurotus* sps.), - composting, spawning (K1,K2,K3,K4,K6)
- 4.4 Oyster mushroom (*Pleurotus* sps.), - cropping, harvesting and marketing (K1,K2,K3,K4,K6)
- 4.5 Paddy straw mushroom (*Volvariella volvacea*) – composting, spawning. (K1,K2,K3,K4,K6)
- 4.6 Paddy straw mushroom (*Volvariella volvacea*). cropping, harvesting and marketing. (K1,K2,K3,K4,K6)

**UNIT–V: Microalgal Technology.****(9 hours)**

- 5.1 Cultivation methods of Spirulina (K1,K2,K3,K4,K6)
- 5.2 Biotechnological potentials of microalgae- food and feed. (K1,K2)
- 5.3 Fuel production from microalgae- Methane and Hydrocarbon. (K1,K2,K3,K4)
- 5.4 Pharmaceutically valuable compounds from microalgae (K1,K2,K3,K4)
- 5.5 Food and nutraceuticals of Algae: Cyanophyta, Rhodophyta, Heterokontophyta, Chlorophyta. (K1,K2,K3,K4)
- 5.6 Polysaccharides (Agar Agar, Carageenan and Alginic acid). (K1,K2,K3)

## SEMESTER II

### PCMBD20: MEDICAL MICROBIOLOGY

<b>Year:</b> <b>I</b>	<b>Course Code</b> PCMBD20	<b>Title Of The Course</b> Medical Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
<b>SEM:</b> <b>II</b>							

#### Course Objective:

To provide an in depth understanding of the pathogenic mechanism of microorganisms, the diseases caused, its laboratory diagnosis and control measures.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the basics of Medical Microbiology and describe the mode of transmission of various pathogens.

**CO2:** Select methods to identify the causative agents for clinical diagnosis.

**CO3:** Analyse pathogenic microorganism of bacteria and its mechanism of pathogenesis.

**CO4:** Discuss on pathogenic fungi and parasites.

**CO5:** Compile virus structure, multiplication, classification and medical importance.

**H – High (3), M – Moderate (2), L – Low (1)**

#### COURSE SYLLABUS

##### UNIT-I: Introduction to Medical Microbiology. (10 hours)

1.1 Basics in Medical microbiology - Infectious diseases overview. (K1,K2)

1.2 Medically important microbes. (K1,K2)

1.3 Microbial diseases - sources, route of transmission. (K1,K2)

1.4 Pathogenesis - adhesion, invasion, host cell damage, release of pathogens. (K1,K2)

1.5 Microbial virulence and virulence factors - Signs and symptoms of microbial diseases. (K1,K2)

1.6 Treatment, Prevention and control of microbial infections. (K1,K2,K3)

**UNIT-II: Diagnostic Microbiology. (10 hours)**

2.1 Diagnosis of microbial diseases – Collection and transport of clinical specimens. (K2,K3,K4,K5)

2.2 Preliminary processing of clinical samples- identification and cultural characteristics. (K2,K3,K4,K5)

2.3 Detection of Biochemical properties of pathogens. (K2,K3,K4,K5)

2.4 Immunodiagnosis. (K2,K3,K4,K5)

2.5 Molecular diagnosis of microbial diseases. (K2,K3,K4,K5)

2.6 Modern methods of microbial diagnosis. (K2,K3,K4,K5)

**UNIT-III: Medical Bacteriology. (20 hours)**

3.1 Bacteriology - Characteristics, classification, pathogenesis, pathology, diagnosis, treatment, prevention and control of diseases caused by *Staphylococci*, *Streptococci*. (K1,K2,K3,K4)

3.2 *Neisseria*, *Bacillus*, *Clostridium*. (K1,K2,K3,K4)

3.3 *Corynebacterium* and *Mycobacteria*. (K1,K2,K3,K4)

3.4 Members of Family Enterobacteriaceae., (K1,K2,K3,K4)

3.5 *Vibrio*, *Pseudomonas*. (K1,K2,K3,K4)

3.6 Spirochaetes, Rickettsiae and Chlamydiae. (K1,K2,K3,K4)

**UNIT-IV: Medical Mycology and Parasitology. (20 hours)**

4.1 Mycology - Human mycotic infections caused by Dermatophytes (K1,K2)

4.2 *Histoplasma*, *Cryptococcus*, *Candida*, (K1,K2)

4.3 Mycotic Mycetoma - Mycotoxins. (K1,K2)

4.4 Parasitology - Medical importance of *Entamoeba*, *Giardia*, *Lieshmania*, (K1,K2)

4.5 *Plasmodium*, *Taenia*, *Ascaris*, *Wucherhiria*. (K1,K2)

4.6 Laboratory techniques used in the diagnosis of fungal and parasitic diseases. (K1,K2,K3,K4)

**UNIT-V: Virology. (15 hours)**

5.1 Viruses – Structure, multiplication, classification and medical importance of DNA viruses – Adeno, Pox. (K1,K2)

5.2 Herpes, Hepatitis Virus. (K1,K2)

5.3 RNA viruses - Picorna, Orthomyxo, Paramyxo. (K1,K2)

5.4 Virus causing SARS, MERS and SARS-CoV2 (K1,K2)

5.5 Oncogenic Viruses (Papilloma and Polyoma), (K1,K2)

5.6 Rhabdo and HIV virus(K1,K2)

## PCMBE20 - MICROBIAL PHYSIOLOGY AND BIOMOLECULES

<b>Year:</b> <b>I</b> <b>SEM:</b> <b>II</b>	<b>Course Code</b> PCMBE20	<b>Title Of The Course</b> Microbial physiology and Biomolecules	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide an in depth understanding on the concepts of microbial metabolism, growth and energy generation and the role of biomolecules in biological system.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Explain microbial metabolism, growth and energy generation.

**CO2:** Analyse microbial physiology, different classes of antimicrobial agents and their mode of action.

**CO3:** Evaluate the properties of carbohydrates in metabolism.

**CO4:** Compile the process involved in synthesis of nucleic acid.

**CO5:** Outline the steps involved in post transcriptional and translational modification

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	L	L	L	H	L	H
CO2	L	M	M	H	L	H
CO3	L	M	M	H	L	H
CO4	L	M	M	H	L	H
CO5	L	M	M	H	L	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	L	M	M	L	H
CO2	H	L	M	M	L	H
CO3	H	L	M	M	L	H
CO4	H	L	M	M	L	H
CO5	H	L	M	M	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

#### UNIT-I: Basic Concepts of Metabolism.

**(15 hours)**

1.1 Carbohydrate metabolism - Glycolysis – HMD. (K1,K2)

1.2 TCA & ED and other pathways. (K1,K2)

1.3 Aerobic and anaerobic respirations - Generation of energy - substrate level and oxidation phosphorylation - Electron transport chain.

- 1.4 Proteins - primary, secondary, tertiary and quaternary structures. (K1,K2)
- 1.5 Enzymes nomenclatures, classification and general properties - factors affecting enzyme synthesis and activities - Allosteric enzymes. (K1,K2)
- 1.6 Photosynthesis - cyclic and non -cyclic photophosphorylation. (K1,K2)

**UNIT-II: Microbial Pathogenicity and Antimicrobial Resistance. (15 hours)**

- 2.1 Microbial pathogenicity - Toxins - Characterization - Mechanisms of action. (K1,K2)
- 2.2 Antimicrobial chemotherapy, antibiotics and its classification. (K1,K2)
- 2.3 Mode of action of antibiotics. (K1,K2)
- 2.4 Antimicrobial resistance. (K1,K2)
- 2.5 Tests for sensitivity to antimicrobial agents – Kirby Bauer and MIC (K1,K2,K3,K4,K5)
- 2.6 Metabolic pathways and metabolic control mechanisms. (K1, K2)

**UNIT-III: Carbohydrates and Nucleic Acids. (15 hours)**

- 3.1 Brief idea about classification, structure and properties of carbohydrates. (K1,K2)
- 3.2 Nucleic acids - DNA and RNA - their topology and functions. (K1,K2)
- 3.3 Brief idea about artificial Nucleic acid - PNA. (K1,K2)
- 3.4 DNA Replication mechanisms and types. (K1,K2)
- 3.5 Chromosome organization in microbes. (K1,K2)
- 3.6 DNA repair - mechanism of excision repair, SOS repair and mismatch repair. (K1,K2)

**UNIT-IV: RNA Synthesis. (15 hours)**

- 4.1 Process of transcription - initiation, elongation and termination. (K1,K2)
- 4.2 Synthesis of mRNA in prokaryotes. (K1,K2)
- 4.3 Synthesis of mRNA in eukaryotes. (K1,K2)
- 4.4 Synthesis of rRNA. (K1,K2)
- 4.5 Synthesis of tRNA. (K1,K2)
- 4.6 RNA processing - capping and polyadenylation. (K1,K2)

**UNIT-V: Synthesis of Proteins. (15 hours)**

- 5.1 Post transcriptional modification. (K1,K2)
- 5.2 Post translational modification. (K1,K2)
- 5.3 Protein Synthesis. (K1,K2)
- 5.4 Genetic code. (K1,K2)
- 5.5 Process of translation - initiation, elongation and termination. (K1,K2)
- 5.6 Signal sequences and protein transport. (K1,K2)

## PCMBF20: INDUSTRIAL AND PHARMACEUTICAL MICROBIOLOGY

<b>Year:</b> <b>I</b> <b>SEM:</b> <b>II</b>	<b>Course Code</b> PCMBF20	<b>Title Of The Course</b> Industrial and pharmaceutical Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide an in depth understanding about industrially important organisms, strain improvement and production of major products.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the importance of production strain in industries.

**CO2:** Discuss on fermentors and fermentation process.

**CO3:** Describe the upstream and downstream processing.

**CO4:** Analyse the steps involved in vaccine, toxoid and antisera production and evaluate the standardization of antiseptics and disinfectants..

**CO5:** Assess good practice and regulation involved in utilizing microbial product for pharmaceutical applications.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	H
CO2	H	M	M	L	H	H

CO1	H	H	H	H	M	H
CO2	H	M	M	H	H	H
CO3	H	M	M	H	H	H
CO4	H	M	M	H	H	H
CO5	H	H	H	H	H	H

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT- I: Introduction to Fermentation.

**(9 hours)**

- 1.1 Introduction to fermentation – the range of fermentation process. (K1,K2)
- 1.2 The chronological development of the fermentation industry. (K1,K2)
- 1.3 The component parts of a fermentation process. (K1,K2)
- 1.4 Isolation of Industrially important organisms. (K1,K2,K3,K4)
- 1.5 Preservation of industrially important organisms. (K1,K2,K3,K4)
- 1.6 Strain improvement of industrially important microorganisms. (K1,K2,K3,K4, K5)

**UNIT-II: Fermentors and Development of Inoculum.****(9 hours)**

- 2.1 Development of inoculum - Scale up (Pilot study). (K1,K2)
- 2.2 Upstream processing – media for industrial fermentation – formulation – sterilization – Microbial growth kinetics. (K1,K2,K3,K4)
- 2.3 Fermentation – types. (K1,K2)
- 2.4 Downstream processing. (K1,K2)
- 2.5 Fermentor/ Bioreactors – Parts and Design. (K1,K2)
- 2.6 Types of Bioreactors – Instrumentation and control.(K1,K2,K3)

**UNIT- III: Microbial Productions.****(12 hours)**

- 3.1 Production of Organic acids (Citric acid, Acetic acid). (K1,K2,K3)
- 3.2 Production of Amino acids (L - Glutamic acid , L - Lysine). (K1,K2,K3)
- 3.3 Production of Antibiotics (Penicillin, Streptomycin, Tetracyclines). (K1,K2,K3)
- 3.4 Production of Enzymes (Amylases, Proteases and Pectinases). (K1,K2,K3)
- 3.5 Production of vitamins (B12, B2 and C). (K1,K2,K3)
- 3.6 Production of alcoholic beverages (wine and beer). (K1,K2,K3)

**UNIT- IV: Vaccine Production and Pharmaceutical Standardisation. (8 hours)**

- 4.1 Production of different types of vaccines. (K1,K2,K3)
- 4.2 Toxoid, antisera production and their standardization. (K1,K2,K3)
- 4.3 Preparation of Antiseptics and their uses. (K1,K2,K3)
- 4.4 Preparation of disinfectants and their standardization. (K1,K2,K3)
- 4.5 Types of water used in pharmaceutical industries (DM/Purified water). (K1,K2,K3)
- 4.6 Water for injection used in pharmaceutical industry and pyrogen testing. (K1,K2,K3,K5)

**UNIT –V: Microbial Assay of Antibiotics.****(7 hours)**

- 5.1 Sub culturing and culture suspension preparation. (K2,K3,K4,K5)
- 5.2 Microbial assay of antibiotics and vitamins. (K2,K3,K4,K5)
- 5.3 Sterility testing. (K2,K3,K4,K5)
- 5.4 Bacterial Endotoxin Test (BET). (K2,K3,K4,K5)
- 5.5 Good Documentation Practice (GDP) – SOP – GLP. (K2,K3,K4,K5)
- 5.6 Failure investigation. (K1,K2,K3)

**TEXT BOOKS:**

## PEMBC20 - ELECTIVE II A: BIOLOGICAL TECHNIQUES

<b>Year:</b> <b>I</b>	<b>Course Code</b> PEMBC20	<b>Title Of The Course</b> Biological Techniques	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
<b>SEM:</b> <b>II</b>							

### Course Objective:

To demonstrate proper and safe laboratory practices, use of various laboratory equipment, and to enhance the use of advanced techniques.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Discuss about various microscopes, its parts and their working mechanism.

**CO2:** Apply the principle and usage of spectroscopic, centrifugation, biosensors and radioactive analysis.

**CO3:** Analyse principles and applications of chromatographic techniques.

**CO4:** Demonstrate principles and applications of electrophoresis.

**CO5:** Compile the techniques involved in molecular biology.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

### COURSE SYLLABUS

#### UNIT-I: Microscopy.

**(15 hours)**

1.1 Applications of various types of microscopy such as bright field, dark field, phase contrast. (K2,K3,K4,K5)

1.2 Immunofluorescence - In situ hybridization confocal Microscope, Atomic Force Microscope (AFM). (K2,K3,K4,K5)

1.3 Electron Microscopy - Principle, specimen preparation and applications. (K2,K3,K4,K5)

- 1.4 Transmission Electron microscope (TEM) and Scanning Electron Microscope (SEM) (K2,K3,K4,K5)
- 1.5 Brief account on Photomicrography and Video micrography. (K2,K3,K4,K5)
- 1.6 Developing and Printing of microphotographs. (K2,K3,K4,K5)

**UNIT-II: Analytical Techniques. (15 hours)**

- 2.1 Spectroscopic methods - UV-Visible (K2,K3,K4,K5)
- 2.2 Atomic Absorption Spectrophotometer, Atomic Emission Spectroscopy. (K2,K3,K4,K5)
- 2.3 Centrifugation - Principles, various types including centrifugation. (K2,K3,K4,K5)
- 2.4 Electroanalytical methods - electrolytic all 4 galvanic cell - Potentiometric, conductimetric, coulometric & voltametric analysis. (K2,K3,K4,K5)
- 2.5 Biosensors. (K2,K3,K4,K5)
- 2.6 Radioactive Analysis: Principles of radioactivity, GM counter & LS counter. (K2,K3,K4,K5)

**UNIT-III: Chromatography. (15 hours)**

- 3.1 Account on Principles & Applications of Chromatographic Techniques. (K1,K2)
- 3.2 Adsorption and gel permeation in chromatography. (K2,K3,K4,K5)
- 3.3 Ion exchange chromatography. (K2,K3,K4,K5)
- 3.4 Affinity Chromatography. (K2,K3,K4,K5)
- 3.5 Gas Chromatography. (K2,K3,K4,K5)
- 3.6 HPLC. (K2,K3,K4,K5)

**UNIT-IV: Electrophoresis. (15 hours)**

- 4.1 Principle and types of Electrophoretic techniques. (K1,K2)
- 4.2 Significance and Application of Electrophoresis. (K1,K2)
- 4.3 Factors affecting electrophoretic mobility. (K1,K2)
- 4.4 Support medium-Agarose and Polyacrylamide gels. (K1,K2)
- 4.5 Electrophoresis of proteins. (K2,K3,K4,K5)
- 4.6 Electrophoresis of nucleic acids. (K2,K3,K4,K5)

**UNIT-V: Molecular Biological Techniques. (15 hours)**

- 5.1 Isolation of nucleic acid - Plasmid isolation, chromosomal DNA isolation. (K2,K3,K4,K5)
- 5.2 Gene cloning techniques - Restriction digestion and ligation of vector and foreign gene. (K2,K3,K4,K5,K6)
- 5.3 Separation and staining of DNA, quantification of DNA. (K2,K3,K4,K5)
- 5.4 Gene transfer mechanisms – Transformation, transfection and electroporation. (K2,K3,K4,K5)
- 5.5 Methods of detection of clones - Nucleic acid transfer by blotting, Hybridization- plaque & colony hybridization. (K2,K3,K4,K5)
- 5.6 Amplification of nucleic acid- Polymerase chain reaction. (K2,K3,K4,K5)

## PEMBD20 - ELECTIVE II B: HUMAN ANATOMY AND PHYSIOLOGY

<b>Year: I SEM: II</b>	<b>Course Code</b> PEMBD20	<b>Title Of The Course</b> Human Anatomy and Physiology	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
----------------------------	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

**Course Objective:** To provide an in depth understanding about anatomy and physiology of the human body.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Discuss protective mechanism of respiratory system and sensory organs.

**CO2:** Explain the role of gastrointestinal system and lympho - reticular system.

**CO3:** Identify the major components of musculoskeletal and nervous system.

**CO4:** Analyse the production of RBC, compare the role and function of endocrine system.

**CO5:** Revise the anatomical differences between male and female reproductive and urinary system.

CO5	H	L	M	M	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

#### UNIT-I: Respiratory System and Special Sensory Organs.

**(9 hours)**

- 1.1 Introduction to applied human anatomy and physiology. (K1,K2)
- 1.2 Respiratory System: Different organs of the Respiratory System. (K1,K2)
- 1.3 Functions of the different organs of the Respiratory System. (K1,K2)
- 1.4 Special Sensory Organs: Introduction to special sensory organs. (K1,K2)
- 1.5 Function and functions of, ear, nose, tongue. (K1,K2)
- 1.6 Functions of eye and skin. (K1,K2)

**UNIT-II: Gastro Intestinal System and Lympho-Reticular System. (9 hours)**

- 2.1 Gastro Intestinal System: Introduction and different organs associated with the Gastro Intestinal system. (K1,K2)
- 2.2 Salivary glands and its functions. (K1,K2)
- 2.3 Liver and its function. (K1,K2)
- 2.4 Pancreas and Gall bladder- its functions. (K1,K2)
- 2.5 Lympho-reticular System- Introduction to different organs of LRS. (K1,K2)
- 2.6 Lymph, Lymphatic vessels and Lymph nodes - functions of the different organs of Lympho-reticular system. (K1,K2)

**UNIT-III: Musculoskeletal System, Skin and Nervous System. (9 hours)**

- 3.1 Musculoskeletal System- Introduction of musculo-skeleton system. (K1,K2)
- 3.2 Different parts of involved in skeleton system. (K1,K2)
- 3.3 Function of muscular system. (K1,K2)
- 3.4 Skin – Parts and function of skin. (K1,K2)
- 3.5 Nervous System: Introduction to nervous system and its functions. (K1,K2)
- 3.6 Central nervous system and peripheral nervous system. (K1,K2)

**UNIT-IV: Circulatory System and Endocrine System. (9 hours)**

- 4.1 Circulatory System: Blood: Site of formation. (K1,K2)
- 4.2 Composition, functions of blood cells. (K1,K2)
- 4.3 Different parts of the circulatory system and its function. (K1,K2)
- 4.4 Endocrine System: Introduction to endocrine system. (K1,K2)
- 4.5 Different organs of endocrine system. (K1,K2)
- 4.6 Functions of endocrine system. (K1,K2)

**UNIT-V: Reproductive System and Urinary System. (9 hours)**

- 5.1 Reproductive System: Introduction Male reproductive system – physiological anatomy, spermatogenesis and its regulation. (K1,K2)
- 5.2 Testicular hormones, composition of semen. (K1,K2)
- 5.3 Female reproductive system – menstrual cycle, pregnancy and parturition. (K1,K2)
- 5.4 Lactation and family planning. (K1,K2)
- 5.5 Urinary System: Different organs and Functions of Urinary System. (K1,K2)
- 5.6 Mechanism of urine formation and composition of urine. (K1,K2)

**PCMBG20 - MAIN PRACTICAL –I: APPLIED MICROBIOLOGY AND  
IMMUNOLOGY**

<b>Year: I SEM: II</b>	<b>Course Code</b> PCMBG20	<b>Title Of The Course</b> Main Practical I: Applied Microbiology and Immunology	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------------	-----------------------------------	--	-------------------------------------	------------------------------------	-----------------	---------------------	---------------------

**Course Objective:**

To enable the students to get hands-on training on various aspects of general, food, agricultural, environmental microbiology and immunotechnology.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Identify morphology of bacteria using different staining procedure and isolating them by pure culture techniques.

**CO2:** Assess the quality of air, water, food and soil samples.

**CO3:** Examine the activity of extracellular enzymes.

**CO4:** Apply agglutination and precipitation methods to detect antigen and antibody.

**CO5:** Select appropriate chromatographic methods to separate aminoacids, pigments and from crude extracts.

CO5	H	M	M	L	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

**COURSE SYLLABUS**

1. Cleaning of glassware and sterilization.
2. Preparation and use of glassware cleaning solutions, sterilization.
3. Micrometry - counting and measurements.
4. Pure and axenic culture techniques - serial dilution - pour plate, spread plate, streak plate methods and stab culture techniques.

5. Bacterial Staining methods - simple, Gram's, acid fast, flagella, capsule and spore.
6. Fungal staining method – Lacto phenol cotton blue.
7. Motility of bacteria – Hanging drop technique.
8. Determination of growth - growth curve - generation time and a synchronous growth.
9. Microbial analysis of food products - bacterial and fungal.
10. Extracellular enzyme activities - cellulase, protease, lipase and phosphatase.
11. Dairy microbiology - Direct microscopic count - Standard plate count - reductase test (resazurin/methylene blue) - isolation of microbes from yoghurt, curd.
12. Quantification of microorganisms in air - solid and liquid impingement techniques.
13. Analysis of water – Most probable number test and membrane filter technique.
14. Microbial flora from different soil types and habitats - isolation of nitrogen fixing bacteria, phosphate solubilizing organisms- development of Winogradsky Column
15. Precipitation techniques: Agar gel diffusion - Ouchterlony's method, Single radial immunodiffusion, Counter immuno electrophoresis & Rocket Immuno Electrophoresis.
16. Agglutination techniques: Blood grouping and Rh factor - Latex agglutination - RF & ASO. Haemagglutination RPHA / IHA.
17. Labelled Assays: Demo: Enzyme Linked Immunosorbent Assay (ELISA).
18. Separation of pigments using paper chromatography.
19. Separation of compounds from crude extracts using TLC.

## PCMBH20: MAIN PRACTICAL – II: MEDICAL MICROBIOLOGY

<b>Year: I SEM: II</b>	<b>Course Code</b> PCMBH20	<b>Title Of The Course</b> Main Practical II: Medical Microbiology	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------	-----------------------------------	---	-------------------------------------	------------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To enable the students to get hands-on training on various aspects of Clinical Microbiology, Microbial physiology and Biomolecules.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Demonstrate collection, transport and processing of clinical specimens.

**CO2:** Identify the bacterial pathogens from various clinical samples and detect their antimicrobial activity.

**CO3:** Analyse the clinical specimens for the examination and cultivation of pathogenic fungi.

**CO4:** Estimate worm burden stool for the identification of parasite.

**CO5:** Enumerate blood cells.

CO5	H	H	L	M	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

1. Collection and transport of pathological specimens for microbiological examinations.
2. Bacteriological methods: Microscopic examination - blood - faeces - pus - sputum - throat swab and nose swab - urine - body fluids
3. Isolation and identification of the pathogen – Pure and mixed culture and biochemical tests.
4. Antimicrobial assay - sensitivity test - Stokes and Kirby Bauer methods - Disc diffusion - agar dilution - broth dilution - MBC/MIC. Quality control for antibiotics.

5. Mycological methods: Macroscopic observation - microscopic observation - culture. Identification of *Mucor*, *Rhizopus*, *Aspergillus*, *Penicillium*, *Candida*, *Trichophyton*, *Microsporum*, *Epidermophyton* - SDA/Corn Meal Agar - Slide culture method - Germ tube method - Sugar assimilation/fermentation tests.
6. Examination of parasites in clinical specimens - ova/cyst in faeces.
7. Haematology: Total count (TC): RBC and WBC, - Differential count (DC) - Haemoglobin level, - Bleeding time - Clotting time – ESR.

## INDEPENDENT ELECTIVE COURSES

### PIMBA20 - IEC- I: PUBLIC HEALTH MICROBIOLOGY

<b>Year: I SEM: I</b>	<b>Course Code</b> PIMBA20	<b>Title Of The Course</b> Public Health Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Independent elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	-----------------------------------	---	----------------------------------	---	-----------------	---------------------	---------------------

#### Course Objective:

To provide in depth knowledge about significance of public health at theoretical and practical levels.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Explain the significance of public health.

**CO2:** Communicate the mode of transmission of human diseases.

**CO3:** Discuss the role of medically important pathogens and the diseases caused.

**CO4:** Outline the vector complex interactions between the pathogens and host.

**CO5:** Create awareness on hospital-acquired infections, prevention and its control measures.

#### COURSE SYLLABUS

##### UNIT–I: Water Borne Diseases.

1.1 Overview on common water borne diseases. (K1,K2)

1.2 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of hepatitis. (K1,K2,K3,K4)

1.3 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of cholera, typhoid. (K1,K2,K3,K4)

1.4 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of amoebiasis, giardiasis. (K1,K2,K3,K4)

1.5 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of poliomyelitis. (K1,K2,K3,K4)

1.6 Non Diarrhoeal diseases (bacterial and viral). (K1,K2,K3,K4)

## **UNIT–II: Air Borne Diseases.**

2.1 Overview on common air-borne diseases. (K1,K2)

2.2 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis of pneumonia. (K1,K2,K3,K4)

2.3 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis of diphtheria. (K1,K2,K3,K4)

2.4 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis of tuberculosis. (K1,K2,K3,K4)

2.5 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis of anthrax. (K1,K2,K3,K4)

2.6 Microbiology of causative agents, epidemiology, pathogenesis, laboratory diagnosis of influenza and measles. (K1,K2,K3,K4)

## **UNIT–III: Food Borne Diseases.**

3.1 Concept on food borne infections and food intoxication. (K1,K2)

3.2 Microbiology of causative microorganisms, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of Staphylococcal food intoxication. (K1,K2,K3,K4)

3.3 Microbiology of causative microorganisms, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of Clostridial food poisoning. (K1,K2,K3,K4)

3.4 Microbiology of causative microorganisms, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of Salmonellosis. (K1,K2,K3,K4)

3.5 Microbiology of causative microorganisms, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of Shigellosis. (K1,K2,K3,K4)

3.6 Microbiology of causative microorganisms, epidemiology, pathogenesis, laboratory diagnosis, prevention and control of travelers' diarrhea. (K1,K2,K3,K4)

## **UNIT–IV: Vector Borne Diseases.**

4.1 Overview on common vector-borne diseases and their vectors (K1,K2)

4.2 Microbiology of causative organisms, epidemiology, pathogenesis, laboratory diagnosis and prevention and control of visceral leishmaniasis. (K1,K2,K3,K4)

4.3 Microbiology of causative organisms, epidemiology, pathogenesis, laboratory diagnosis and prevention and control of malaria. (K1,K2,K3,K4)

4.4 Microbiology of causative organisms, epidemiology, pathogenesis, laboratory diagnosis and prevention and control of filariasis. (K1,K2,K3,K4)

4.5 Microbiology of causative organisms, epidemiology, pathogenesis, laboratory diagnosis and prevention and control of Japanese encephalitis and dengue. (K1,K2,K3,K4)

4.6 Microbiology of causative organisms, epidemiology, pathogenesis, laboratory diagnosis and prevention and control of West Nile fever and plague. (K1,K2,K3,K4)

## **UNIT–V: Hospital Acquired Infection**

5.1 Concept on common nosocomial infections (K1,K2)

- 5.2 Disinfection procedures of hospital environment. (K1,K2,K3)
- 5.3 Equipments and materials used in hospitals. (K1,K2,K3)
- 5.4 Methods of disposal of infective hospital waste. (K1,K2,K3,K4)
- 5.5 Methods of disposal of laboratory materials. (K1,K2,K3,K4)
- 5.6 Monitoring of sanitation in hospital environment. (K1,K2,K3,K4)

## PIMBB20: IEC-II: ANIMAL TISSUE CULTURE

<b>Year:</b> <b>I</b> <b>SEM:</b> <b>I</b>	<b>Course Code</b> PIMBB20	<b>Title Of The Course</b> Animal Tissue Culture	<b>Course Type</b> Theory	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To acquaint students with a clear background on processing, culturing animal cells and cell lines in laboratory.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Introduce the importance of cell culture.

**CO2:** Demonstrate knowledge of cell lines used in tissue culture, their origins and applications and explain major components of cell and tissue culture media.

**CO3:** Identify methods to maintain cultures of animal cells and established cell lines with good viability and minimal contamination.

**CO4:** Utilize hybridoma technology for monoclonal and polyclonal antibodies production.

**CO5:** Outline the applications of animal cell culture.

CO4	H	H	M	M	M	H
CO5	H	M	L	H	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT–I: Cell Culture and Types.

- 1.1 Introduction and Importance of cell culture. (K1,K2)
- 1.2 Historical background of cell culture technology. (K1,K2)
- 1.3 Tissue culture techniques – primary culture. (K1,K2,K3)
- 1.4 Tissue culture Techniques - secondary culture. (K1,K2,K3)
- 1.5 Continuous cell lines, suspension cultures. (K1,K2,K3)

1.6 Organ cultures. (K1,K2,K3)

## **UNIT–II: Culture Media and Behaviour of Cells.**

2.1 Different types of media for culturing cells and tissues. (K1,K2,K3)

2.2 Natural and defined media and growth supplements. (K1,K2,K3)

2.3 Culture of different tissues and its application. (K1,K2,K3)

2.4 Behaviour of cells in terms of growth differentiation and metabolism. (K1,K2,K3)

2.5 Cell division, growth patterns of cells. (K1,K2,K3)

2.6 Estimation of cell number. (K1,K2,K3)

## **UNIT–III: Characterization and Maintenance of Cell.**

3.1 Development of cell lines. (K1,K2,K3)

3.2 Characterization of cell lines (K1,K2,K3)

3.3 Maintenance of cell lines (K1,K2, K3).

3.4 Stem cells and their applications. (K1,K2)

3.5 Cryopreservation. (K1,K2,K3)

3.6 Common cell culture contaminants. (K1,K2)

## **UNIT–IV: Hybridoma Technology.**

4.1 Hybridoma technology: Production of monoclonal and polyclonal antibodies with different types of antigens. (K1,K2,K3)

4.2 Antigen preparation and modification. (K1,K2,K3)

4.3 Adjuvants dose. (K1,K2,K3)

4.4 Routes of antigen administration. (K1,K2,K3)

4.5 Collection of sera and purification of antibodies. (K1,K2,K3)

4.6 Production and applications of monoclonal antibodies for diagnosis and therapy. (K1,K2,K3)

## **UNIT–V: Applications of Animal Cell Culture.**

5.1 Applications of Animal Cell Culture: Use in gene therapy. (K1,K2,K3)

5.2 Cloning from short-term and long term cultured cells. (K1,K2,K3,K4,K5)

5.3 Cloning for production of transgenic animals. (K1,K2,K3,K4,K5,K6)

5.4 Cloning for conservation. (K1,K2,K3)

5.5 Application of animal cell culture for in vitro testing of drugs. (K1,K2,K3)

5.6 Testing of toxicity of environmental pollutants in cell culture. (K1,K2,K3,K4,K5)

**TEXTBOOKS:**

## PIMBC20 - IEC III: HAEMATOLOGY AND BLOOD BANKING

<b>Year:</b> <b>I</b> <b>SEM:</b> <b>II</b>	<b>Course Code</b> PIMBC20	<b>Title Of The Course</b> Haematology and blood banking	<b>Course Type</b> Theory	<b>Course Category</b> Independent elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--	-----------------	---------------------	---------------------

### Course Objective:

To acquaint students with a clear background on haematology and blood banking procedures

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the ABO blood grouping and Rh typing.

**CO2:** Apply techniques to collect and store blood samples.

**CO3:** Describe the composition of blood and discuss on various blood disorders.

**CO4:** Perform routine haematological tests.

**CO5:** Elaborate the clinical significance of blood transfusion.

<b>CO5</b>	H	H	H	H	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT- I: ABO blood grouping and collection of blood samples

- 1.1 ABO blood grouping and Rh typing. (K1,K2)
- 1.2 Blood - Specimen collection. (K1,K2,K3)
- 1.3 Laboratory preparation in Haematology – Veinpuncture method (K1,K2,K3)
- 1.4 capillary method and finger prick method of blood sample collection (K1,K2,K3)
- 1.5 Anticoagulants. (K1,K2,K3)
- 1.6 Storage of blood specimen. (K1,K2,K3)

## **UNIT -II: Composition of blood**

- 2.1 Composition of blood- cellular fraction. (K1,K2)
- 2.2 Composition of blood- plasma fraction. (K1,K2)
- 2.3 Morphological study of RBC. (K1,K2,K3)
- 2.4 WBC- Granulocytes -Neutrophils, Eosinophils, Basophils (K1,K2,K3)
- 2.5 Non granulocytes- lymphocytes, monocytes. (K1,K2,K3)
- 2.6 Platelet and its significance. (K1,K2,K3)

## **UNIT- III: Blood disorders**

- 3.1 Blood Disorder- Leukemia. (K1,K2,K3,K4)
- 3.2 Anaemia- its causes. (K1,K2,K3,K4)
- 3.3 Leucopaenia- its causes. (K1,K2,K3,K4)
- 3.4 Eosinophilia- its causes. (K1,K2,K3,K4)
- 3.5 Thrombocytopaenia - its causes (K1,K2,K3,K4)
- 3.6 Haematology - Normal values. (K1,K2,K3,K4)

## **UNIT- IV: Routine Haematological test**

- 4.1 Introduction to Routine Haematological tests. (K2,K3,K4,K5)
- 4.2 Haemocytometer -WBC counting. (K2,K3,K4,K5)
- 4.3 Haemocytometer- RBC counting. (K2,K3,K4,K5)
- 4.4 Buffy coat (determination of Haematocrit). (K2,K3,K4,K5)
- 4.5 Determination of erythrocyte sedimentation rate. (K2,K3,K4,K5)
- 4.6 Differential count of leucocytes. (K2,K3,K4,K5)

## **UNIT- V: clinical significance of blood transfusion.**

- 5.1 Clinical significance of blood transfusion. (K1,K2)
- 5.2 Collection of blood for transfusion. (K1,K2,K3)
- 5.3 Processing of blood for transfusion. (K1,K2,K3)
- 5.4 Routine laboratory procedure in Blood bank. (K1,K2)
- 5.5 Transfusion reaction. (K1,K2)
- 5.6 Haemolytic disease of new born. (K1,K2)

## PIMBD20: IEC -IV: FORENSIC SCIENCE

<b>Year:</b> <b>I</b>	<b>Course Code</b> PIMBD20	<b>Title Of The Course</b> Forensic science	<b>Course Type</b> Theory	<b>Course Category</b> Independent elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
<b>SEM:</b> <b>II</b>							

### Course Objective:

To provide students psychological understanding of the scientific principles of crime scene investigation and reconstruction, including evidence collection and preservation.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the history, scope and development of forensic science.

**CO2:** Evaluate the methods underpinning forensic science, from crime scene investigation to report evidential value within a case.

**CO3:** Reflect on the use of various divisions of forensic science in the crime investigation.

**CO4:** Explain the theory of DNA fingerprints, blood pattern analysis, footwear and tool mark impression evidence, and drugs of abuse in the context of Forensic Science.

**CO5:** Utilize psychological principles in crime investigation.

<b>CO3</b>	H	L	M	M	L	H
<b>CO4</b>	H	H	H	H	L	H
<b>CO5</b>	H	H	H	H	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

#### UNIT-I: History, Scope and Development of Forensic Science.

- 1.1 Definition of Forensic science (K1)
- 1.2 Development of Forensic science. (K1,K2)
- 1.3 Scope of Forensic Science.( K1,K2)
- 1.4 History of Forensic Science in India. (K1,K2)

1.5 Development and scope of Forensic Science in India. (K1,K2)

1.6 Growth of Core laboratories, set up in country. (K1,K2)

### **UNIT–II: Sociological and Scientific Aspects of Crime.**

2.1 Introduction to crime, Sociological aspect in society. (K1,K2)

2.2 Types of crimes. (K1,K2)

2.3 Crimes in India. (K1,K2)

2.4 Crime Scene Management, Crime Scene procedures. (K1,K2,K3)

2.5 Protection of crime scene physical evidence - Scientific collection of physical evidence.  
(K1,K2,K3)

2.6 Crime scene management in manmade and natural disaster. (K1,K2,K3)

### **UNIT–III: Divisions of Crime Investigation.**

3.1 Duties of forensic scientist. (K1,K2)

3.2 Introduction to various divisions of crime investigation. (K1,K2)

3.3 Crime investigation- Biology, Serology. (K1,K2,K3)

3.4 Crime investigation -Chemistry, Physics. (K1,K2,K3)

3.5 Crime investigation -Toxicology, Ballistics. (K1,K2,K3)

3.6 Crime investigation -Prohibition Document and other divisions. (K1,K2)

### **UNIT–IV: Forensic Science Laboratory Techniques.**

4.1 Specialised facilities offered by forensic science laboratory – DNA fingerprinting.  
(K1,K2,K3)

4.2 Polygraph Narco analysis. (K1,K2,K3)

4.3 Brain electrical oscillation. (K1,K2,K3)

4.4 Signature proficiency (BEOSP) Cyber forensic. (K1,K2,K3)

4.5 Tape and video authentication. (K1,K2,K3)

4.6 Speaker identification. (K1,K2,K3)

### **UNIT–V: Investigative Psychology.**

5.1 Concepts of psychology. (K1,K2)

5.2 History of psychology. (K1,K2)

5.3 Modern perspectives of Psychology. (K1,K2)

5.4 Types of psychology. (K1,K2)

5.5 Professionals psychology - The science and research methods. (K1,K2,K3)

5.6 Professional and ethical issues in psychology. (K1,K2)

## SEMESTER III

### PCMBI20: MOLECULAR BIOLOGY AND MICROBIAL GENETICS

<b>Year:</b> <b>II</b> <b>SEM:</b> <b>III</b>	<b>Course Code</b> PCMBI20	<b>Title Of The Course</b> Molecular Biology and Microbial Genetics	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To provide an insight into the various aspects of microbial genetics and be proficient on cloning vectors used in rDNA technology.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

CO1: Discuss molecular mechanisms underlying mutations.

CO2: Explain the concepts of gene transfer mechanism in prokaryotes and eukaryotes.

CO3: Identify the role of plasmids as cloning vectors.

CO4: Evaluate on the role of transposable elements with gene mapping.

CO5: Analyse the control methods for gene expression.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	L	M	M	H	H
CO2	H	L	H	L	M	H
CO3	H	L	H	L	M	H
CO4	H	L	M	M	H	H
CO5	H	M	M	L	M	H

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	L	H	M	H	H
CO2	H	L	H	M	M	H
CO3	H	L	H	L	M	H
CO4	H	L	H	M	H	H
CO5	H	M	H	L	M	H

**H – High (3), M – Moderate (2), L – Low (1)**

#### COURSE SYLLABUS

##### UNIT-I: Genetic Material and Mutations.

**(15 hours)**

1.1 Identification of Genetic Material (Griffith, Avery and Hershey and Chase Experiments).

(K1,K2)

1.2 Gene as a unit of mutation and Recombination. (K1,K2)

1.3 Mutagenesis, Mutations and Auxotrophic mutants. (K1,K2)

1.4 Spontaneous and induced mutations. (K1,K2)

1.5 Isolation of mutants, mutagenesis, reversion, suppression. (K1,K2, K3)

1.6 Genetic analysis of mutants. (K1,K2, K3, K4)

**UNIT-II: Gene Transfer Mechanisms.****(15 hours)**

- 2.1 Transformation - competence cells. (K1,K2)
- 2.2 Regulation and importance of natural transformation. (K1,K2)
- 2.3 Transduction - general transduction. (K1,K2)
- 2.4 Transduction- specialized transduction. (K1,K2)
- 2.5 Conjugation - Hfr, Triparental mating. (K1,K2)
- 2.6 Self-transmissible and mobilizable plasmids – functions of pili. (K1,K2)

**UNIT-III: Natural and Artificial Plasmids.****(15 hours)**

- 3.1 Biology of Plasmids – Extra chromosomal heredity - biology of bacterial plasmids. (K1,K2)
- 3.2 General Structure of the plasmids - F1 & ColE1 plasmids. (K1,K2)
- 3.3 Natural resistant plasmid - pSC101. (K1,K2)
- 3.4 Artificial cloning vector- pBR322. (K1,K2, K3,K4)
- 3.5 Ti plasmids. (K1,K2, K3,K4)
- 3.6 Replication of plasmid , control, partitioning, incompatibility and gene transfer methods. (K1,K2, K3, K4)

**UNIT-IV: Transposable Elements and Gene Mapping.****(15 hours)**

- 4.1 Transposable genetic elements and Gene Mapping - Introduction - Discovery, insertion sequences. (K1,K2)
- 4.2 Complex and Compound transposons - T10, T5, and retroposon. (K1,K2)
- 4.3 Genetic mapping – *E. coli*. (K1,K2)
- 4.4 Virus T4 phage – using r II system. (K1,K2)
- 4.5 Bacteriophage vectors -  $\lambda$  phage. (K1,K2, K3,K4)
- 4.6 Bacteriophage vector- M13 phage. (K1,K2, K3,K4)

**UNIT-V: Gene Regulation and Expression****(15 hours)**

- 5.1 Concept of gene and Gene regulation. (K1,K2)
- 5.2 Organization of gene in prokaryotes and eukaryotes. (K1,K2)
- 5.3 Introduction to Operon concept, lac and Trp operons, promoters and repressors. (K1,K2)
- 5.4 Regulation of gene expression. (K1,K2)
- 5.5 Transcriptional control – functions of promoters, terminators, attenuators. (K1,K2)
- 5.6 Induction and repression control mechanism. (K1,K2, K3, K4)

## PCMBJ20: ADVANCED MICROBIOLOGY

<b>Year:</b> <b>II</b> <b>SEM:</b> <b>III</b>	<b>Course Code</b> PCMBJ20	<b>Title Of The Course</b> Advanced Microbiology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide the learners an overview on the advanced aspects of Microbiology.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Utilize microorganisms in the preparation of cosmetics.

**CO2:** Evaluate the biological potential in samples return from satellites and solar system.

**CO3:** Discuss the role of antimicrobial fabrics, carpets, tiles and colorants.

**CO4:** Produce bacteriostatic sanitary napkins and towels.

**CO5:** Comprehend on paper, rubber and plastic Microbiology

CO5	H	H	M	H	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT-I: Cosmetic Microbiology.

**(15 hours)**

1.1 Definition; Preparations of Skin whitening compositions from microbes like Ascomycetes and Black yeast. (K1,K2, K3)

1.2 Preparations of Skin whitening compositions- enzymes. (K1,K2, K3)

1.3 Preparations of Skin whitening compositions- Mineral yeast ferments. (K1,K2,K3)

1.4 Microbial Production of Alpha Arbutin. (K1,K2,K3)

1.5 Microbial production of Hyaluronic acid. (K1,K2,K3)

1.6 Kojic acid and their use in Cosmetics preparations. (K1,K2)

**UNIT–II: Space Microbiology. (15 hours)**

- 2.1 Introduction to Space Microbiology. (K1,K2)
- 2.2 Monitoring of astronauts microbial flora. (K1,K2,K3)
- 2.3 Alterations in the load of medically important microorganisms. (K1,K2)
- 2.4 ESA STONE experiment. (K1,K2,K3,K4)
- 2.5 Evaluating the Biological Potential in Samples Returned from Planetary Satellites. (K1,K2, K3,K4)
- 2.6 Evaluating the Biological Potential of Small Solar System Bodies. (K1,K2,K3,K4)

**UNIT–III: Textile Microbiology. (15 hours)**

- 3.1 Introduction to Textile Microbiology. (K1,K2)
- 3.2 Antimicrobial fabrics. (K1,K2)
- 3.3 Antimicrobial garments. (K1,K2)
- 3.4 Antimicrobial carpets. (K1,K2)
- 3.5 Antimicrobial colorants. (K1,K2)
- 3.6 Bacteriostatic sanitary napkins and towels. (K1,K2,K3)

**UNIT–IV: Paper and Rubber Microbiology. (15 hours)**

- 4.1 Paper Microbiology- Introduction & Definition. (K1,K2)
- 4.2 Antimicrobial papers and its production. (K1,K2)
- 4.3 Antimicrobial currency. (K1,K2)
- 4.4 Rubber Microbiology – Introduction & Definition. (K1,K2)
- 4.5 Note on Antimicrobial rubbers. (K1,K2)
- 4.6 Antimicrobial rubber compositions. (K1,K2)

**UNIT–V: Plastic Microbiology. (15 hours)**

- 5.1 Definition- Bacteriostatic plastics. (K1,K2)
- 5.2 Antimicrobial plastic composition and production. (K1,K2)
- 5.3 Antiseptic plastics. Fungistatic plastics: Definition and production. (K1,K2)
- 5.4 Production of plastics materials from microorganisms. (K1,K2,K3)
- 5.5 Methods for producing anti-microbial plastic product. (K1,K2,K3,K4)
- 5.6 Plastic article containing a metallic bactericidal agent. Casein plastic. (K1,K2,K3)

## PCMBK20: RESEARCH METHODOLOGY

<b>Year :</b> II <b>SEM:</b> III	<b>Course Code</b> PCMBK20	<b>Title Of The Course</b> Research Methodology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide the learners knowledge about the concept of research, its importance and learn the art of thesis, paper writing and publication.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Explain basic concepts of research and its methodologies.

**CO2:** Identify the relationship between methodology, framework and data collection.

**CO3:** Analyze the diverse cases using statistical methods.

**CO4:** Use of digital library as a resource of microbiological research.

**CO5:** Discuss the principles and algorithms of pairwise and multiple alignments, and sequence database searching.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO5	H	H	H	H	L	H

H – High (3), M – Moderate (2), L – Low (1)

### COURSE SYLLABUS:

#### UNIT-I: Methodologies in Research.

(15 hours)

- 1.1 Research Methodology - Meaning and importance. Statement, Constraints. (K1,K2)
- 1.2 Review of literature - Review and synopsis presentation. (K1,K2,K3,K4,K5,K6)
- 1.3 Types of research, Research tools, Qualities of a good researcher. (K1,K2,K3,K4,K5,K6)
- 1.4 Research process, Research designs – Experimental and non-experimental. (K1,K2,K3,K4,K5,K6)
- 1.5 Preparation of research report. Guidelines for preparing an article. (K1,K2,K3,K4,K5,K6)

1.6 Computers in biological research- Plagiarism checking softwares. (K1,K2,K3,K4,K5)

**UNIT-II: Data Collection and Analysis. (15 hours)**

2.1 Introduction to Data collection. (K1,K2)

2.2 Source of data- Primary and Secondary. (K1,K2,K3,K4,K5)

2.3 Types of classification of data. (K1,K2,K3,K4,K5)

2.4 Tabulation of data. (K1,K2,K3,K4,K5,K6)

2.5 Diagrammatic representation of data (line, bar diagram, pie diagram, pictogram and cartogram). (K1,K2,K3,K4,K5,K6)

2.6 Graphical representation of data. (K1,K2,K3,K4,K5,K6)

**UNIT-III: Statistical Methodology-I. (15 hours)**

3.1 Introduction to statistical methodology in research. (K1,K2)

3.2 Measures of central tendency – mean, median, mode. (K1,K2,K3,K4,K5)

3.3 Standard deviation. (K1,K2,K3,K4,K5)

3.4 Correlation – coefficient of correlation (Karl Pearson method, group bi –variable data). (K1,K2,K3,K4,K5)

3.5 Coefficient of variation. (K1,K2,K3,K4,K5)

3.6 Probability. (K1,K2,K3,K4)

**UNIT-IV: Statistical Methodology-II. (15 hours)**

4.1 ANOVA (one way and two ways). (K1,K2,K3,K4,K5)

4.2 Chi square test. (K1,K2,K3,K4,K5)

4.3 Student's T test. (K1,K2,K3,K4,K5)

4.4 Testing of hypothesis-null hypothesis- level of significance-standard error. (K1,K2,K3,K4,K5)

4.5 F Test Web. (K1,K2,K3,K4,K5)

4.6 Resources for Microbiology – Use of Digital Library. (K1,K2,K3,K4)

**UNIT-V: Bioinformatics. (15 hours)**

5.1 Bioinformatics - Introduction and skills for a bioinformatician. (K1,K2)

5.2 Biological databases- An introduction. (K1,K2,K3)

5.3 Database searching, Sequence analysis, Pair alignment. (K1,K2,K3,K4)

5.4 Visualizing protein structures. (K1,K2,K3,K4)

5.5 Predicting structure and function of protein using sequences. (K1,K2,K3,K4)

5.6 Tools for genomics and proteomics. (K1,K2,K3,K4)

**PEMBE20 – ELECTIVE III A: BIOINOCULANTS TECHNOLOGY**

<b>Year:</b> <b>II</b>	<b>Course Code</b> PEMBE20	<b>Title Of The Course</b> Bioinoculants Technology	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
---------------------------	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

**Course Objective:**

To provide the learners an overview on the potentials of microbes as fertilizers and their beneficial impacts in soil and agriculture.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Outline the importance of bioinoculant technology and discuss on the significance of biofertilizers.

**CO2:** Demonstrate the mass production and applications of bio fertilizer and their impact on plant growth.

**CO3:** Identify in-depth information on the mycorrhizal taxonomy, occurrence and distribution.

**CO4:** Explain the types of mycorrhizal associations and quantification.

**CO5:** Formulate the growth of phosphate solubilizing microbes.

**H – High (3), M – Moderate (2), L – Low (1)**

**COURSE SYLLABUS:**

**UNIT– I: Symbiotic Bacterial N<sub>2</sub> fixers.**

**(9 hours)**

1.1 General account of the microbes used as biofertilizers for crop plants. (K1,K2)

1.2 Advantages of Biofertilizers over chemical fertilizers. (K1,K2)

1.3 Symbiotic N<sub>2</sub> fixers: Rhizobium - Isolation, characterization, identification, classification. (K1,K2, K3,K4)

1.4 Inoculum production and field application. (K1,K2,K3,K4,K6)

- 1.5 Frankia - Isolation, characterization. (K1,K2,K3,K4)  
1.6 Actinorrhizal nodules – non-leguminous crop symbiosis. (K1,K2)

**UNIT – II: Non Symbiotic N<sub>2</sub> fixers. (9 hours)**

- 2.1 Introduction to non-symbiotic N<sub>2</sub> fixation. (K1,K2)  
2.2 Non - Symbiotic N<sub>2</sub> fixers – Azospirillum. (K1,K2)  
2.3 Free living - Azotobacter . (K1,K2)  
2.4 Isolation of free living nitrogen fixers from soil. (K1,K2,K3)  
2.5 Characterization of non-symbiotic N<sub>2</sub> fixers. (K1,K2,K3)  
2.6 Mass inoculum production and field application. (K1,K2, K3, K4,K6)

**UNIT – III: Algal Biofertilizers. (9 hours)**

- 3.1 Symbiotic N<sub>2</sub> fixers – Cyanobacteria. (K1,K2)  
3.2 Azolla – Isolation and characterization. (K1,K2,K3)  
3.3 Mass multiplication- production. (K1,K2,K3,K4)  
3.4 Role of Azolla in rice cultivation .(K1,K2)  
3.5 Crop response to algal biofertilizers. (K1,K2)  
3.6 Field application - immobilization. (K1,K2,K3)

**UNIT – IV: Phosphate Solubilizers. (9 hours)**

- 4.1 Phosphate solubilizers - Phosphate solubilizing microbes. (K1,K2)  
4.2 Isolation of phosphate solubilizers from soil. (K1,K2,K3,K4)  
4.3 Characterization of phosphate solubilizers, (K1,K2, K3,K4)  
4.4 Mass inoculum production. (K1,K2, K3,K4)  
4.5 Field application and crop response. (K1,K2,K3)  
4.6 Mechanism of Phosphate solubilization. (K1,K2)

**UNIT – V: Mycorrhizal Biofertilizers. (9 hours)**

- 5.1 Mycorrhizal bioinoculants – classification. (K1,K2)  
5.2 Importance of mycorrhizal Ectomycorrhizae - Endomycorrhizae - Ectendo mycorrhizae - Taxonomy of mycorrhizae. (K1,K2)  
5.3 Isolation of VA mycorrhizae. (K1,K2, K3,K4)  
5.4 Quantification and assessment of VAM in roots . (K1,K2,K3,K4)  
5.5 Mass inoculum production of VAM . (K1,K2,K3,K4,K6)  
5.6 Field applications and advantages of Ectomycorrhizae and VAM. (K1,K2,K3)

**PEMBF20 - ELECTIVE III B: FUNGAL BIOTECHNOLOGY AND  
BIOPROSPECTING**

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PEMBF20	<b>Title Of The Course</b> Fungal biotechnology and bioprospecting	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

**Course Objective:**

This paper is designed to provide an exposure to the students about the potential of fungi as food and in field of biotechnology as source of different enzymes, secondary metabolites, vitamins, polysaccharides, polyhydric alcohols, pigments, lipids, glycolipids, biofertilizers and biopesticides.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Perform screening and strain development for production of different bio-molecules.

**CO2:** Design a bioreactor with special emphasis on fungal systems.

**CO3:** Comprehend about different secondary metabolites of fungal origin.

**CO4:** Demonstrate methods of recombinant technology with special emphasis on fungal system.

**CO5:** Explain the role of fungi in food and feed industries.

CO5	H	H	H	H	H	H

**H – High (3), M – Moderate (2), L – Low (1)**

**COURSE SYLLABUS**

**UNIT- I: Fungal diversity and industrial important fungal strains. (9 hours)**

1.1 Fungal diversity; habitat relationship. (K1,K2)

1.2 Different ecological groups of fungi Ecotaxonomic approach in chemical screening. (K1,K2)

1.3 Primary and secondary products of metabolism; Screening of industrially useful fungal metabolites. (K1,K2)

1.4 Classification of secondary metabolites in fungi. (K1,K2)

1.5 Primary and secondary screening of antibiotic producers; auxanography; enrichment culture. (K1,K2, K3,K4)

1.6 Industrial important fungal strains. (K1,K2)

**UNIT- II: Fungal Biotechnology.**

**(9 hours)**

1.1 Fungal Biotechnology: Fungal biotechnological processes, Principles of fermenter design and operation with respect to Fungal process. (K1,K2)

1.2 Types of fermenters used in Fungal Biotechnology, formulation of fermentation medium. (K1,K2,K3,K4,K6)

1.3 Analysis of fermentation products especially for fungal biotechnology. (K1,K2K3,K4)

1.4 Techniques for strain improvement and strain development. (K1,K2,K3,K4)

1.5 Recombinant technology in fungi: composition of the different types of fungal vectors, selection markers, transformation strategies. (K1,K2,K3,K4,K5,K6)

1.6 Gene replacement or inactivation, applications and future perspectives. (K1,K2,K3,K4)

**UNIT- III: Edible fungi.**

**(9 hours)**

3.1 Introduction to Edible fungi; Mycoproteins. (K1,K2)

3.2 Advancement in mushroom cultivation technology. (K1,K2,K3)

3.3 Commercial mushroom species. (K1,K2)

3.4 Strain improvement and cultivation. (K1,K2, K3)

3.5 Tropical mushrooms and their cultivation; mushroom spawns. (K1,K2, K3, K4)

3.6 Nutritional and medicinal values of mushrooms. (K1,K2)

**UNIT- IV: Fungi in food processing and agriculture application.**

**(9 hours)**

4.1 Introduction to food processing technology. (K1,K2)

4.2 Fungi in food processing, (K1,K2)

4.3 Fungus for Biomass pretreatment for ethanol production. (K1,K2)

4.4 Fungi in agriculture application. (K1,K2)

4.5 Fungal biofertilizers and Biopesticides. (K1,K2, K3)

4.6 Myconematicides . (K1,K2)

**UNIT-V: Biotechnological application of fungi.**

**(9 hours)**

5.1 Biotechnological applications of fungi and their derivatives. (K1,K2,K3)

5.2 Production of Industrially important products from fungi-organic acids (citric acid). (K1,K2,K3)

5.3 Production of enzymes from fungi (cellulase xylanase, amylase, protease). (K1,K2, K3)

5.4 Applications of Fungi in medical and pharmaceutical products. (K1,K2,K3)

5.5 Production of antibiotic (Penicillin). (K1,K2,K3)

5.6 Vitamins and therapeutic peptides from fungi. (K1,K2)

## SEMESTER IV

### PCMBL20 - MICROBIAL GENE TECHNOLOGY

<b>Year:</b> <b>II</b> <b>SEM:</b> <b>IV</b>	<b>Course Code</b> PCMBL20	<b>Title Of The Course</b> Microbial Gene Technology	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To provide the learners an insight on the concepts of genetic engineering and techniques employed in recombinant DNA technology.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Analyze the various techniques involved in identification and quantification of nucleic acids.

**CO2:** Utilize the tools and techniques of genetic engineering and the role of DNA manipulative enzymes.

**CO3:** Compile DNA sequencing methods.

**CO4:** Explain about genomic libraries and artificial chromosomes.

**CO5:** Discuss the modern tools and techniques of genomics and application of antisense technologies.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	M	L	M
CO2	H	H	H	L	L	M
CO3	H	H	H	M	M	L
CO4	H	H	H	H	M	M
CO5	H	H	H	L	L	M

CO2	H	H	H	L	M	H
CO3	H	H	H	L	M	M
CO4	H	H	H	M	L	H
CO5	H	H	H	L	M	M

**H – High (3), M – Moderate (2), L – Low (1)**

#### COURSE SYLLABUS

##### UNIT-I: Gene Analysis and Techniques.

**(15 hours)**

1.1 Isolation of DNA and RNA from microbes. (K1,K2, K3, K4)

1.2 Handling & Quantification of Nucleic acids.. (K1,K2,K3,K4)

1.3 Radiolabelling of Nucleic acids - End labeling - Nick translation - Labelling by primer extension. (K1,K2, K3,K4)

1.4 PAGE and its applications. (K1,K2)

1.5 Nucleic acid hybridization- colony and plaque hybridization. (K1,K2, K3)

1.6 Blotting techniques – Southern, northern and western blots. (K1,K2, K3)

**UNIT-II: DNA manipulative enzymes (15 hours)**

2.1 DNA manipulative enzymes - Restriction enzymes : Nomenclature - Classification - restriction and DNA Methylation . (K1,K2)

2.2 Type II restriction endonuclease - use of type II restriction endonucleases in gene cloning. (K1,K2)

2.3 Restriction mapping and its applications. (K1,K2)

2.4 DNA modifying enzymes, helicase, gyrase & topoisomerases. (K1,K2)

2.5 Polymerases – DNA polymerases, Klenow polymerase and Reverse Transcriptase. (K1,K2)

2.6 DNA ligases and its function. (K1,K2)

**UNIT-III: DNA sequence analysis (15 hours)**

3.1 DNA sequence analysis: Maxam - Gilbert (Chemical) sequencing - Sangar - Coulson (DiDeoxy/enzymatic) sequencing . (K1,K2, K3,K4)

3.2 Automated DNA sequencing. (K1,K2,K3)

3.3 Genome sequencing by Physical Mapping of genomes. (K1,K2)

3.4 PCR - methods and its application. (K1,K2, K3)

3.5 DNA fingerprinting in forensic application. (K1,K2)

3.6 RFLP - Microarray and its applications. (K1,K2)

**UNIT-IV: Vectors and gene libraries (15 hours)**

4.1 Vectors - nature - uses of vectors- types of vectors . (K1,K2)

4.2 Plasmids, Bacteriophages , Cosmid and Shuttle vectors - An introduction. (K1,K2)

4.3 Cloning strategies – Screening, selection and isolation of recombinants clones. (K1,K2,K3,K4)

4.4 Gene libraries - Genomic and cDNA. (K1,K2)

4.5 Artificial chromosomes – BAC. (K1,K2)

4.6 Artificial chromosomes - YAC. (K1,K2)

**UNIT-V: Gene Annotations and Nanobiologics (15 hours)**

5.1 Gene Annotations. (K1,K2)

5.2 Gene silencing. (K1,K2)

5.3 Human Genome Project. (K1,K2)

5.4 Legal aspects of rDNA technology and cloning. (K1,K2, K3)

5.5 Recombinant DNA products and applications – Humulin, Hepatitis B antigen vaccine, TPA. (K1,K2, K3, K4)

5.6 Nanobiologics - Bioactive peptides as hormones, antimicrobials, vaccines, drug carriers and therapeutics. (K1,K2, K3)

## PCMBM20 - BIOETHICS AND BIOSAFETY

<b>Year:</b> <b>II</b>	<b>Course Code</b> PCMBM20	<b>Title Of The Course</b> Bioethics and Biosafety	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
<b>SEM:</b> <b>IV</b>							

### Course Objective:

To provide the learners knowledge about biosafety concerns at the level of individuals, institution, society, region, country and the world.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the principles of bioethics and explain the biosafety concerns with safeguard measures.

**CO2:** Compile the BSA statement for the industrial production of pharmaceuticals.

**CO3:** Adapt the WHO quality standards in food process technology.

**CO4:** Discuss on the global scenario of patenting.

**CO5:** Comprehend the forms of patents, patentability and process of patenting.

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

#### UNIT-I: Principles of Bioethics.

**(15 hours)**

- 1.1 Definition- Bioethics. (K1,K2)
- 1.2 Legality, morality and ethics- An introduction (K1,K2)
- 1.3 Introduction to the principles of Bioethics. . (K1,K2)
- 1.4 Principles of autonomy. . (K1,K2)
- 1.5 Human rights. . (K1,K2)
- 1.6 Beneficence and privacy justice equality. . (K1,K2)

**UNIT-II: Biosafety concerns.****(15 hours)**

- 1.1 Introduction to Biosafety. . (K1,K2)
- 1.2 Concept and issues of Biosafety. . (K1,K2)
- 1.3 Rational Vs subjective perceptions of risks and benefits. . (K1,K2)
- 1.4 Relationship between risk hazard, exposure, and safe guard. . (K1,K2)
- 1.5 Biosafety concerns at the level of individuals, institutions, society, region, country and the world. . (K1,K2,K3)
- 1.6 Lab associated infections. . (K1,K2,K4)

**UNIT-III: Statement of Ethical practice****(15 hours)**

- 3.1 Introduction to BSA. . (K1,K2)
- 3.2 History of BSA. (K1,K2)
- 3.3 British Sociological Association (BSA) statement of ethical practices of biotechnology in the production of pharmaceutical products. . (K1,K2)
- 3.4 BSA statement ethical practices of biotechnology in the production of drugs. . (K1,K2,K3)
- 3.5 BSA statement ethical practices of biotechnology in the production vaccines . (K1,K2,K3)
- 3.6 BSA statement ethical practices of biotechnology in the production biomolecules. (K1,K2,K3)

**UNIT-IV: WHO quality standards.****(15 hours)**

- 4.1 Introduction to WHO and its functions. (K1,K2)
- 4.2 WHO standards – Quality control. (K1,K2,K3)
- 4.3 Quality control in food process technology. (K1,K2,K3,K4,K5)
- 4.4 Quality control in dairy product technology. (K1,K2,K3,K4,K5)
- 4.5 Quality control for potable water. (K1,K2,K3,K4,K5)
- 4.6 Quality control measures in pharmaceutical industries. (K1,K2,K3,K4,K5)

**UNIT-V: IPR and Patenting.****(15 hours)**

- 5.1 Introduction to IPR and Patenting. (K1,K2)
- 5.2 GATT and IPR, forms of IPR, IPR in India, WTO Act. (K1,K2,K3,K4,K5)
- 5.3 Convention on Biodiversity (CBD), Patent Co-operation Treaty (PCT). (K1,K2,K3,K4,K5)
- 5.4 Forms of patents and patentability, process of Patenting. (K1,K2,K3,K4,K5)
- 5.5 Indian and international agencies involved in IPR & patenting. (K1,K2,K3,K4,K5)
- 5.6 Global scenario of patents and India's position, patenting of biological material, GLP, GMP. (K1,K2,K3,K4,K5)

## PEMBG20: ELECTIVE IV-A: TAXONOMY AND MICROBIAL BIODIVERSITY

<b>Year:</b> <b>II</b>	<b>Course Code</b> PCMBG20	<b>Title Of The Course</b> Taxonomy and Microbial Biodiversity	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
<b>SEM:</b> IV							

### Course Objective:

The aim of the course is to impart knowledge on Microbial diversity, principles of classification, rules and its applications.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Introduce Microbial classification and Taxonomy.

**CO2:** Describe the classification system in prokaryotes.

**CO3:** Comprehend the classification of virus.

**CO4:** Discuss on the eukaryotic diversity and endosymbiotic theories.

**CO5:** Compile cytology of algae and protozoa.

### COURSE SYLLABUS

#### UNIT- I: Introduction to microbial Classification.

(9 hours)

- 1.1 An Introduction to Microbial Classification. (K1,K2)
- 1.2 Taxonomy and Taxonomic Ranks. (K1,K2)
- 1.3 Techniques used for determination of Microbial Taxonomy. (K1,K2)
- 1.4 Phylogenetic analysis method. (K1,K2, K3,K4)
- 1.5 Systems of Prokaryotic phylogeny. (K1,K2,K3,K4)
- 1.6 Systems of Eukaryotic Phylogeny. (K1,K2,K3,K4)

**UNIT- II: Classification system in prokaryotes. (9 hours)**

- 2.1 Classification systems in Prokaryotes, Bergey's Manual of Systematic Bacteriology. (K1,K2)
- 2.2 Prokaryotic groups with unusual characteristics: Cyanobacteria. (K1,K2)
- 2.3 Green and Purple sulphur bacteria, Gliding bacteria. (K1,K2)
- 2.4 Rickettsia and Chlamydia. (K1,K2)
- 2.5 Actinomycetes. (K1,K2)
- 2.6 Archaea- Classification, Significance. (K1,K2)

**UNIT-III: Viruses. (9 hours)**

- 3.1 Viruses - Definition, Viroids and Prions. (K1,K2)
- 3.2 Classification systems of Viruses-LHT, Baltimore. (K1,K2)
- 3.3 General Structure and properties of viruses. (K1,K2)
- 3.4 Concepts of Lytic and Lysogenic life cycles. (K1,K2)
- 3.5 Basic Concepts of Virus cultivation- An introduction. (K1,K2)
- 3.6 Egg inoculation, cell culture and Tissue culture techniques. (K1,K2)

**UNIT- IV: Eukaryotic diversity. (9 hours)**

- 4.1 Eukaryotic Diversity- Three Domains of Life. (K1,K2)
- 4.2 Endosymbiotic theories, Eukaryotic cell cycle and Cell division – Mitosis and Meiosis. (K1,K2)
- 4.3 Fungi: Distribution and importance. (K1,K2)
- 4.4 Morphology of fungi –cell wall structure, fungal thallus and filamentous. (K1,K2)
- 4.5 Cytology of fungi- Mitochondria, Golgi bodies- Endoplasmic reticulum. (K1,K2)
- 4.6 Recent classification of fungi. Study of yeasts and molds. (K1,K2)

**UNIT-V: Algae and protozoa. (9 hours)**

- 5.1 Algae: photosynthetic protists. (K1,K2)
- 5.2 Algal classification with their characteristics features. (K1,K2)
- 5.3 Type of vegetative forms- heterocyst and non-heterocyst forms. (K1,K2)
- 5.4 Cytology of algae- pigment and cell inclusions. Distribution and importance. (K1,K2)
- 5.5 Classification of protozoa. Morphology of protozoa – shapes and size. (K1,K2)
- 5.6 Cytology of protozoa- Body covering and skeletons, locomotory and internal organelles. (K1,K2)

**TEXT BOOKS:**

1. Willey, Joanne M. (2014). Prescott's Microbiology. 9th Edition: McGraw-Hill Education – Europe.
2. Kathleen Park Talaro (2011) , Foundations in Microbiology . 8th International edition, McGraw Hill.

## PEMBH20 - ELECTIVE IV-B: MICROBIAL NANOTECHNOLOGY

<b>Year:</b> <b>II</b>	<b>Course Code</b> PCMBH20	<b>Title Of The Course</b> Microbial Nanotechnology	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
<b>SEM:</b> <b>IV</b>							

### Course Objective:

To provide in depth knowledge on microbial bionanotechnology.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the history of bionanotechnology.

**CO2:** Describe about molecular nanotechnology and microbial synthesis of nanoparticles.

**CO3:** Discuss on types, function and characterization of nanoparticles.

**CO4:** Comprehend the use of nanoparticles in cancer therapy and in biology.

**CO5:** Elaborate the advantages and disadvantages of nanoparticles.

**H – High (3), M – Moderate (2), L – Low (1)**

## COURSE SYLLABUS

### UNIT-I: History of Bionanotechnology.

**(9 hours)**

- 1.1 Introduction and History of bionanotechnology. (K1,K2)
- 1.2 Concept and future prospects of bionanotechnology. (K1,K2)
- 1.3 Application of nanotechnology in Life Sciences. (K1,K2)
- 1.4 Terminologies – nanotechnology Vs bionanotechnology, (K1,K2)
- 1.5 Nanomedicine and Nanowires. (K1,K2,K3,K4)
- 1.6 Quantum Dots, nanocomposite, nanoparticles. (K1,K2,K3,K4)

**UNIT- II: Molecular nanotechnology. (9 hours)**

- 2.1 Molecular nanotechnology - nanomachines - collagen. (K1,K2)
- 2.2 Uses of nanoparticles - cancer therapy. (K1,K2)
- 2.3 Manipulation of cell and biomolecules. (K1,K2)
- 2.4 Cytoskeleton and cell organelles. (K1,K2)
- 2.5 Types of nanoparticles production - physical, chemical and biological. (K1,K2)
- 2.6 Microbial synthesis of nanoparticles. (K1,K2, K3,K4)

**UNIT-III: Types and characterization of nanoparticles. (9 hours)**

- 3.1 Nanoparticles - types, functions - Silver, Gold and Titanium. (K1,K2)
- 3.2 Physical and chemical properties of nanoparticles. (K1,K2)
- 3.3 Characterization of nanoparticles - UV-Vis spectroscopy. (K1,K2, K3,K4)
- 3.4 Characterization of nanoparticles Electron Microscopy - HRTEM, SEM. (K1,K2, K3,K4)
- 3.5 Characterization of nanoparticles AFM. (K1,K2, K3,K4)
- 3.6 Characterization of nanoparticles EDS and XRD. (K1,K2, K3,K4)

**UNIT-IV: Uses of nanoparticles in biology. (9 hours)**

- 4.1 Uses of nanoparticles in biology. (K1,K2)
- 4.2 Drug delivery - protein mediated and nanoparticle mediated. (K1,K2, K3)
- 4.3 Uses of nanoparticles in MRI, DNA and Protein Microarrays. (K1,K2, K3)
- 4.4 Nanotechnology in health sectors. (K1,K2, K3)
- 4.5 Toxicology in nanoparticles. (K1,K2)
- 4.6 Dosimetry. (K1,K2, K3)

**UNIT-V: Advantaged and disadvantages of nanoparticles. (9 hours)**

- 5.1 Advantages of nanoparticles. (K1,K2)
- 5.2 Drug targeting, protein detection and MRI. (K1,K2, K3,K4)
- 5.3 Development of green chemistry. (K1,K2)
- 5.4 Commercial viability of nanoparticles. (K1,K2)
- 5.5 Disadvantages - health risk associated with nanoparticles. (K1,K2)
- 5.6 Adequate and inadequate knowledge on nanoparticles research. (K1,K2)

## PCMBN20 - MAIN PRACTICAL – III: GENETIC ENGINEERING

<b>Year:</b> <b>II</b>	<b>Course Code</b> PCMBN20	<b>Title Of The Course</b> Main Practical III: Genetic Engineering	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

### Course Objective:

To provide hands-on training and acquire adequate skill required to isolate, demonstrate and quantitate nucleic acids, transfer DNA to bacteria and separate biomolecules by electrophoresis.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

CO1: Utilize technical skills in isolation of DNA, their quantification and plasmid.

CO2: Analyse gene transfer mechanism and protein.

CO3: Use the basic skill on blotting techniques & PCR.

CO4: Select methods for the immobilization of enzymes.

CO5: Demonstrate the process of induction of mutation.

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	L	H
CO2	H	H	H	L	M	H
CO3	H	H	M	M	L	H
CO4	L	H	H	H	L	H
CO5	L	H	M	L	M	H

CO1	H	M	M	H	L	H
CO2	H	H	H	L	L	H
CO3	H	M	M	M	L	H
CO4	H	M	H	H	L	H
CO5	H	M	M	L	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

1. Isolation of DNA and RNA from microbial system - quantification - chemical methods dinitrophenol, orcinol - physical methods - UV absorption.
2. Isolation of plasmid DNA from bacteria.
3. Size characterization of DNA by agarose gel electrophoresis.
4. Enzyme immobilization technique.
5. Induction of mutation by ultra-violet radiation and chemical mutagens.

6. Preparation of competent *E. coli* cells.
7. Transformation of Plasmid DNA to the *E. coli* cells.
8. Southern blotting
9. Western blotting.
10. Separation of proteins by SDS - PAGE
11. PCR amplification – Demonstration.

## PCMBO20 - MAIN PRACTICAL – IV: TEXTILE AND COSMETIC

### MICROBIOLOGY

<b>Year:</b> <b>II</b> <b>SEM:</b> <b>IV</b>	<b>Course Code</b> PCMBO20	<b>Title Of The Course</b> Main Practical IV: Textile and cosmetic Microbiology	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To provide hands-on training and acquire adequate skill required for testing the quality of cosmetics and textile materials.

#### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Utilize the techniques for decolourization of textile industrial waste.

**CO2:** Estimate of BOD, COD and total solids in effluent sample.

**CO3:** Demonstrate the antimicrobial activity of textile materials.

**CO4:** Evaluate the antifungal property of treated textile materials.

**CO5:** Enumerate microorganisms in cosmetics, perfumes and essential oils.

CO5	H	M	M	L	L	H

**H – High (3), M – Moderate (2), L – Low (1)**

#### COURSE SYLLABUS

1. Determination of biological oxygen demand (BOD) of water.
2. Determination of chemical oxygen demand (COD) of water.
3. Estimation of total solids in effluent sample.
4. Analysis of TDS of effluent content.
5. Estimation of total suspended solids of effluent.
6. Decolorization of distillery or textile industrial waste.
7. Antibacterial activity assessment of textile materials.
8. Evaluation of antifungal property of treated textile materials.

9. Testing for antibacterial activity and efficacy on textile products, Qualitative and quantitative.
10. Determination of antibacterial activity of Textile fabrics by Agar diffusion plate test.
11. Microbiological Enumeration Tests of Cosmetics, Perfumes and Essential Oils.

**Course Objective:**

To provide an understanding on the concepts of entrepreneurship such as Planning, decision making, leadership, organizations and authority and to provide idea on the basic requirements for establishing a bio-based start-up programme.

**Course Outcomes (CO):**

At the end of the course, the learners will be able to;

**CO1:** Acquaint basic concepts of management such as planning, decision making, leadership, organization and authority.

**CO2:** Compile the motivational theories.

**CO3:** Explain the concepts of centralization and decentralization.

**CO4:** Discuss on IPR and Bioethics with an understanding of government policies.

**CO5:** Attain skill to manage start up and run an organization.

**H – High (3), M – Moderate (2), L – Low (1)**

**COURSE SYLLABUS**

**UNIT -I: Understanding management and administration.**

1.1 Understanding management and administration. (K1,K2)

1.2 Management: Nature and scope. (K1,K2)

1.3 Management: functional aspects/areas. (K1,K2)

1.4 Evolution of management thought: early, contemporary and modern. (K1,K2)

- 1.5 Roles of Management. (K1,K2)
- 1.6 Levels of managements. (K1,K2)

### **UNIT-II: Major components of management skills.**

- 2.1 Major component of management skills. (K1,K2,K3)
- 2.2 Planning: nature, purpose and importance. (K1,K2,K3)
- 2.3 Types of plans. (K1,K2,K3,K4,K5,K6)
- 2.4 Steps in planning & planning premises. (K1,K2,K3,K4,K5,K6)
- 2.5 Hierarchy of plans. (K1,K2,K3,K4,K5,K6)
- 2.6 Components of planning, Decision making. (K1,K2,K3,K4,K5,K6)

### **UNIT- III: Motivational theories**

- 3.1 Leadership Meaning and nature of directing. (K1,K2,K3)
- 3.2 Understanding, Supervision, motivation . (K1,K2,K3)
- 3.3 Leadership styles, Motivation Theories (Abraham Maslo, Herzberg and Victor Hvrom's). (K1,K2)
- 3.4 Communication – Meaning and importance. (K1,K2,K3)
- 3.5 Meaning and steps in controlling – Essentials of a control system. (K1,K2,K3)
- 3.6 Methods of establishing control (in brief). (K1, K2,K3)

### **UNIT-IV: Centralization Vs Decentralization**

- 4.1 Centralization Vs Decentralization of authority and responsibility. (K1,K2)
- 4.2 Nature and importance of staffing–Process of Recruitment and Selection. (K1,K2,K3)
- 4.3 Organisation: nature and purpose. (K1,K2,K3)
- 4.4 Principles of organization. (K1,K2,K3)
- 4.5 Types of organization. (K1,K2,K3)
- 4.6 Departmental Committees. (K1,K2,K3,K4,K5,K6)

### **UNIT-V: Structure of biobased technology company.**

- 5.1 Structure of a Bio based technology Company. (K1,K2,K3)
- 5.2 Start-up of Bio based technology Company. (K1,K2,K3,K4,K5,K6)
- 5.3 New Product Development. (K1,K2,K3,K4,K5,K6)
- 5.4 Market Research. (K1,K2,K3,K4,K5,K6)
- 5.5 Capital and source investors. (K1,K2,K3,K4,K5, K6)
- 5.6 Sales & Marketing Principles. (K1,K2,K3, K4, K5)

### **TEXT BOOKS:**

## PIMBF20: IEC-VI: CYANOBACTERIOLOGY

<b>Year:</b> <b>II</b>	<b>Course Code</b> PIMBF20	<b>Title Of The Course</b> Cyanobacteriology	<b>Course Type</b> Theory	<b>Course Category</b> Independent elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
<b>SEM:</b> <b>III</b>							

### Course Objective:

To provide an understanding on the structure, genomics, molecular regulation and applications of Cyanobacteria.

### Course Outcomes (CO):

At the end of the course, the learners will be able to;

**CO1:** Outline the diversity of cyanobacteria.

**CO2:** Discuss on the genomics of Cyanobacteria.

**CO3:** Explain the molecular biology of Cyanobacteria.

**CO4:** Demonstrate molecular regulation of Cyanobacteria.

**CO5:** Comprehend the mass cultivation and applications of Cyanobacteria.

CO4	H	M	H	M	L	H
CO5	H	H	H	H	H	H

**H – High (3), M – Moderate (2), L – Low (1)**

### COURSE SYLLABUS

#### UNIT-I: Introduction to cyanobacteria

- 1.1 Overview on cyanobacteriology. (K1,K2)
- 1.2 Introduction: Origins of life. (K1,K2)
- 1.3 Photosynthesis in cyanobacteria. (K1,K2)
- 1.4 Diversity of cyanobacteria. (K1,K2)
- 1.5 Fossil history of cyanobacteria. (K1,K2)
- 1.6 The Oceanic Cyanobacterial Picoplankton. (K1,K2)

#### UNIT-II: Genomics of Cyanobacteria

- 2.1 Gene transfer in cyanobacteria in nature. (K1,K2)
- 2.2 Gene transfer to cyanobacteria in lab. (K1,K2,K3)

- 2.3 Molecular ecology of Cyanobacteria. (K1,K2)
- 2.4 Environmental genomics of cyanobacteria. (K1,K2)
- 2.5 Comparative genomics of marine cyanobacteria. (K1,K2)
- 2.6 Stress response-regulatory system and regulated genes. (K1,K2)

### **UNIT-III: Molecular Biology of Cyanobacteria**

- 3.1 Molecular Biology of Cyanelles and Chloroplast Origins and Evolution. (K1,K2)
- 3.2 Supramolecular Membrane Organization. (K1,K2)
- 3.3 Phycobilisome and Phycobiliprotein Structures. (K1,K2)
- 3.4 The Use of Cyanobacteria in the Study of the Structure and Function of Photosystem II. (K1,K2)
- 3.5 The Cytochrome Complex. (K1,K2)
- 3.6 Photosystem I in Cyanobacteria. (K1,K2)

### **UNIT-IV: Biochemistry and molecular regulation in cyanobacteria**

- 4.1 The Biochemistry of cyanobacteria. (K1,K2)
- 4.2 Molecular Regulation of Carbon Dioxide Metabolism in Cyanobacteria. (K1,K2)
- 4.3 Genetic Analysis of Cyanobacteria. (K1,K2)
- 4.4 Heterocyst development. (K1,K2)
- 4.5 Heterocyst Metabolism. (K1,K2)
- 4.6 Differentiation of Hormogonia. (K1,K2)

### **UNIT-V: Applications of Cyanobacteria**

- 5.1 Mass cultivation of cyanobacteria under outdoor and indoor conditions. (K1,K2)
- 5.2 Cyanobacteria as a source of fine chemicals: polysaccharides and bioactive molecules. (K1,K2,K3)
- 5.3 Cyanobacteria as a source of pigments and antioxidants. (K1,K2,K3)
- 5.4 Cyanobacteria as a source of lipids and polyunsaturated fatty acids. (K1,K2,K3)
- 5.5 Cyanobacteria as biofertilizer for paddy cultivation. (K1,K2,K3)
- 5.6 Hydrogen production by cyanobacteria: Mechanism, progress and prospects. (K1,K2)

# Department of Chemistry (PG)

## SYLLABUS AND REGULATIONS

Under

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)*

**Gandhi Nagar, Vellore-632 006.**

## M.Sc. CHEMISTRY

(Effective for those admitted from the Academic Year 2020 - 2021)

### Eligibility for Admission to M.Sc. Chemistry

- A pass in undergraduate course in Chemistry with a minimum of 55%

### The Course of Study and Scheme of Examination:

### PROGRAMME OUTCOMES (PO)

On completion of the PG Programme, students will be able to:

- PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.
- PO2:** Assimilate and apply principles and concepts towards skill development and employability.
- PO3:** Apply critical and scientific approaches to address problems and find solutions.
- PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.
- PO5:** Integrate issues of social relevance in the field of study.
- PO6:** Persist in life-long learning for personal and societal progress.

### PROGRAMME SPECIFIC OUTCOMES (PSO)

**PSO1:** Attain an in-depth knowledge on advanced concepts in various branches of chemistry augmented through self-learning, persist in life-long learning for personal and societal progress.

**PSO2:** Demonstrate an ability to conduct experiments and perform accurate quantitative measurements with an understanding of the theory and develop practical skills in handling analytical instruments.

**PSO3:** Interpret experimental results, perform calculations on these results and draw reasonable, accurate conclusions.

**PSO4:** Assimilate and apply principles and concepts towards skill development, employability, critical and scientific approaches to address the problems and find solutions.

**PSO5:** Develop research skills through multi/inter/trans-disciplinary perspectives and to qualify CSIR-NET and other competitive examinations.

**PSO6:** Communicate effectively through report writing, documentation and effective presentations and integrate the knowledge in chemistry for sustainable environment.

## SEMESTER I

### PCCHA20 - STEREOCHEMISTRY AND CONFORMATIONAL ANALYSIS

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code</b> PCCHA20	<b>Title of the Course</b> Stereochemistry and Conformational Analysis	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To learn the concepts of stereochemistry, conformational analysis and their application in the determination of reaction mechanism.
- To understand the mechanism and stereo chemistry of substitution and elimination reactions.
- To gain knowledge about the optical rotatory dispersion and circular dichroism.

#### Course Outcomes:

The Learners will be able to

1. Assign the configuration of stereoisomers including those with no stereogenic carbon centre and classify the stereospecific and stereoselective reactions.
2. Compare the relative stability and reactivity of conformational isomers of cyclohexane and related compounds.
3. Ascertain the knowledge on the mechanism and stereo chemical outcome of aliphatic nucleophilic substitution reactions.
4. Compare the mechanistic spectra of elimination reactions.
5. Employ the principles of Optical Rotatory Dispersion and Circular Dichroism for various applications.

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Chirality and optical activity - symmetry elements, classification of chiral molecules as asymmetric and dissymmetric. (K1, K2, K3, K4, K5 & K6)
- 1.2 Projection formulae - Sawhorse, Newmann and Fischer projections and their inter conversions. (K1, K2, K3, K4, K5 & K6)
- 1.3 Nomenclature - absolute configuration - R/S and D/L, relative configurations - threo/erythro and syn/anti. (K1, K2, K3, K4, K5 & K6)
- 1.4 A brief study of dissymmetry of allenes, biphenyls - atropisomerism, spiro compounds, transcyclooctene, cyclononene and molecules with helical structures. (K1, K2, K3, K4, K5 & K6)
- 1.5 Stereo specific and stereo selective reactions - definition and examples. Asymmetric synthesis - Cram's rule. (K1, K2, K3, K4, K5 & K6)
- 1.6 Geometrical isomerism - E/Z nomenclature of olefins, geometrical and optical isomerism of disubstituted cyclopropane, cyclobutane and cyclopentanes. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Conformational analysis of di-substituted cyclohexanes and their stereo chemical features - geometric and optical isomerism of these derivatives. (K1, K2, K3, K4 & K5)
- 2.2 Conformation and reactivity of cyclohexene - allylic 1, 2 and 1, 3 strains and related compound alkyldiene cyclohexane. (K1, K2, K3, K4 & K5)
- 2.3 Conformation of cyclohexanone - 2-alkyl and 3-alkyl ketone effect and reactivity of cyclohexanone in comparison with cyclopentanones. (K1, K2, K3, K4 & K5)
- 2.4 Conformations of six membered rings containing hetero atoms. (K1, K2, K3, K4 & K5)
- 2.5 Conformation and stereochemistry of cis and trans decalin and 9-methyl decalin. (K1, K2, K3, K4 & K5)
- 2.6 Quantitative correlation between conformation and reactivity - Curtin-Hammett principle. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1  $S_N2$  reaction - kinetics, mechanism and factors influencing the reaction. (K1, K2, K3, K4, K5 & K6)
- 3.2  $S_N1$  reaction - kinetics, mechanism, factors influencing the reactions, rearrangement reaction. (K1, K2, K3, K4, K5 & K6)
- 3.3 Mixed  $S_N1$  and  $S_N2$  reactions - competition between  $S_N1$  and  $S_N2$  mechanism. (K1, K2, K3, K4, K5 & K6)
- 3.4 Substitution by ambident nucleophiles, substitution at allylic, vinylic, benzylic and aryl halides. (K1, K2, K3, K4, K5 & K6)
- 3.5 SET (single electron transfer) - types of electron transfer reactions - photo induced and chemically induced electron transfer. (K1, K2, K3, K4, K5 & K6)
- 3.6 Neighbouring group participation - introduction of an acyclic open chain system,  $\Pi$  systems of aromatic rings, cyclic system, double bond and  $\sigma$  bond. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 E<sub>1</sub>, E<sub>2</sub>, E<sub>1</sub>CB reaction - kinetics, mechanism and evidences. (K1, K2, K3, K4 & K5)
- 4.2 E<sub>1</sub>, E<sub>2</sub> and E<sub>1</sub>CB variables - mechanistic spectrum, competition between elimination and substitution. (K1, K2, K3, K4 & K5)
- 4.3 Stereochemistry of E<sub>2</sub> - syn and anti-elimination reactions, orientation of the double bond. (K1, K2, K3, K4 & K5)
- 4.4 Regiochemistry of E<sub>1</sub>, E<sub>2</sub> and E<sub>1</sub>CB reactions with examples. (K1, K2, K3, K4 & K5)
- 4.5 Pyrolytic eliminations - acyclic and alicyclic systems, molecular rearrangements during elimination. (K1, K2, K3, K4 & K5)
- 4.6 Grob's fragmentations - incorporation of fragmentation - mechanism of fragmentation - mechanism allied to E<sub>1</sub> and E<sub>2</sub> eliminations. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Optical Rotatory Dispersion and Circular Dichroism - terminology - optical rotation, circular birefringence, circular dichroism and Cotton effect. (K1, K2, K3, K4, K5 & K6)
- 5.2 Plain curves - application of plain curves - determination of structure, configuration, conformation and optical activity. (K1, K2, K3, K4, K5 & K6)
- 5.3 Rotatory dispersion of ketones - structure, configuration, conformation of unsaturated ketones. (K1, K2, K3, K4, K5 & K6)
- 5.4 Empirical and semi empirical rules - the axial halo ketone rule, the octant rule (configuration and conformation) (K1, K2, K3, K4, K5 & K6)
- 5.5 Absolute configuration and ketal formation. (K1, K2, K3, K4, K5 & K6)
- 5.6 Stereochemical analysis - polarimetry, chiral GC & HPLC and NMR techniques. (K1, K2, K3, K4, K5 & K6)

## SEMESTER I

### PCCHB20 - STRUCTURAL INORGANIC CHEMISTRY

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code</b> PCCHB20	<b>Title of the Course</b> Structural Inorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To learn the concepts of Lewis acids and bases.
- To learn the structures of complex solids, metals, and alloys.
- To gain knowledge about the structure and bonding in poly acids, boron hydrides and metal clusters.

#### Course Outcomes:

The Learners will be able to

1. Summarize the theories of acids and bases.
2. Discuss conductors, semiconductors and insulators based on band theory.
3. Assess the structure and bonding in different types of ionic solids, metals and alloys.
4. Discuss the structure and bonding in polyacids, silicates and inorganic polymers.
5. Distinguish the structure and bonding in boranes, carboranes, metallo carboranes, boron nitrides and metal clusters.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	M	H	H	H
CO2	H	M	M	H	H	H
CO3	H	M	M	H	H	H
CO4	H	M	M	H	H	H
CO5	H	M	M	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Acids and bases, proton transfer equilibria in water - solvent leveling effects. (K1, K2, K3, K4, K5 & K6)
- 1.2 Aqua acids - periodic trends in aqua acids - simple oxo acids - anhydrous oxides - polyoxo compound formation. (K1, K2, K3, K4, K5 & K6)
- 1.3 Lewis acid - base concepts, hard and soft acids and bases, group characteristics of Lewis acids. (K1, K2, K3, K4, K5 & K6)
- 1.4 Lux - Flood theory of acids and bases, Usanovich acids and bases, super acids and super bases. (K1, K2, K3, K4, K5 & K6)
- 1.5 Non aqueous solvents, classification, protic and aprotic solvents, molten salts as solvents and ionic liquids. (K1, K2, K3, K4, K5 & K6)
- 1.6 Heterogeneous acids and bases - symbiosis and proton sponges. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Structure of complex solids - layered structures - conducting ionic solids – graphite - solids held together by covalent bonding - diamond - Madelung constants. (K1, K2, K3, K4 & K5)
- 2.2 Imperfections in crystals - stoichiometric defects - Schottky, controlled valency, F-center and Frenkel defect - non-stoichiometric defects - metal excess defect, metal deficient defect - impurity defect. (K1, K2, K3, K4 & K5)
- 2.3 Band theory of solids, intrinsic and extrinsic semiconductors, piezoelectric and pyroelectric crystals. (K1, K2, K3, K4 & K5)
- 2.4 Superconductivity – Meissner effect, critical temperature and critical magnetic field - BCS theory. (K1, K2, K3, K4 & K5)
- 2.5 Type I and Type II superconductors. (K1, K2, K3, K4 & K5)
- 2.6 Ternary oxides - structures of 123 oxides (YBa-Cu- O) - applications of high temperature superconducting materials. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Structures of simple solids - unit cell and crystal structures. (K1, K2, K3, K4, K5 & K6)
- 3.2 Close packing of spheres - holes in closed packed structures. (K1, K2, K3, K4, K5 & K6)
- 3.3 Structure of metals and alloys - non-closed packed structures. (K1, K2, K3, K4, K5 & K6)
- 3.4 Atomic radii of metals - polytypism - polymorphism of metals. (K1, K2, K3, K4, K5 & K6)
- 3.5 Alloys - substitutional solid solutions, interstitial solid solutions of non-metals - intermetallic compounds. (K1, K2, K3, K4, K5 & K6)
- 3.6 Characteristic structures of ionic solids - binary phases (AX and AX<sub>2</sub>) - ternary phases (ABO<sub>3</sub> and AB<sub>2</sub>O<sub>4</sub>). (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Structure and bonding - polyacids - isopolyacids and heteropolyacids of molybdenum and tungsten. (K1, K2, K3, K4 & K5)
- 4.2 Dawson and Keggin structure of poly acids, heteropolyanions and heteropoly blues. (K1, K2, K3, K4 & K5)
- 4.3 Inorganic polymers - silicates, structures, properties, correlation and applications. (K1, K2, K3, K4 & K5)
- 4.4 Molecular sieves, feldspar, zeolites and ultramarines and their applications. (K1, K2, K3, K4 & K5)
- 4.5 Polysulphur-nitrogen compounds - structure and bonding in tetrasulphur tetranitride, polythiazyl and  $S_xS_y$  compounds. (K1, K2, K3, K4 & K5)
- 4.6 Poly organo phosphazenes. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Structure and bonding - boron hydrides - introduction, classification of boranes - diborane, tetra borane, pentaborane, hexaborane and decaborane. (K1, K2, K3, K4, K5 & K6)
- 5.2 Polyhedral boranes - Wade's rule - closo, nido and arachno structures, hydroboration. (K1, K2, K3, K4, K5 & K6)
- 5.3 Carboranes - closo, nido and arachno structures of carboranes. (K1, K2, K3, K4, K5 & K6)
- 5.4 Metallocarboranes - closo, nido and arachno structures of carboranes. (K1, K2, K3, K4, K5 & K6)
- 5.5 Structure and bonding of boronitrides. (K1, K2, K3, K4, K5 & K6)
- 5.6 Metal clusters - chemistry of low molecularity metal clusters (up to trinuclear metal clusters). (K1, K2, K3, K4, K5 & K6)

## SEMESTER I

### PCCHC20 - KINETICS AND PHOTOCHEMISTRY

<b>Year:</b> I <b>SEM:</b> I	<b>Course Code</b> PCCHC20	<b>Title of the Course</b> Kinetics and Photochemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------------	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To get exposed to the kinetics of reactions in solutions, acid- base catalysis and surface reactions.
- To gain knowledge on photochemical and photo physical processes.
- To have an in-depth knowledge on the kinetics of complex and fast reactions.

#### Course Outcomes:

The Learners will be able to

1. Describe Activated Complex Theory in terms of translational and vibrational partition functions and apply it to derive the kinetics of reactions in solutions, Hammett and Taft equations and kinetic isotope effects in studying the mechanism of chemical reactions.
2. Discuss the concepts and kinetics of homogeneous and heterogeneous catalysis and explain adsorption isotherms of Langmuir and BET.
3. Derive the kinetics of complex reactions and apply the techniques of fast reactions.
4. Analyse the principles involved in photo excitation of molecules.
5. Derive the kinetics of photochemical reactions, and explain the applications of radiation chemistry, kinetics of photochemical reactions, solar energy conversion and radiolysis of water.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	M	H	H	H
CO2	H	H	M	H	H	H
CO3	H	H	M	H	H	H
CO4	H	H	M	H	H	H
CO5	H	H	M	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Activated complex theory - derivation - partition functions and activated complex - Eyring equation in terms of translational and vibrational partition functions. (KI, K2, K3, K4, K5 & K6)
- 1.2 Determination of free energy, enthalpy and entropy of activation and their significance. (KI, K2, K3, K4, K5 & K6)
- 1.3 Potential energy surfaces. (KI, K2, K3, K4, K5 & K6)
- 1.4 Applications of activated complex theory to reactions in solution - effect of pressure, and dielectric constant. (KI, K2, K3, K4, K5 & K6)
- 1.5 Effect of ionic strength on reactions in solutions, cage effect. (KI, K2, K3, K4, K5 & K6)
- 1.6 Kinetic isotope effect, linear free energy relationships - Hammett and Taft equations. (KI, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Catalysis - homogeneous catalysis - acid-base catalysis - types of acid-base catalysis - specific and general acid-base catalysis. Mechanisms and kinetics of acid-base catalyzed reactions (protolytic and prototropic mechanism) – Bronsted catalysis law. ((KI, K2, K3, K4 & K5)
- 2.2 Heterogeneous catalysis - surface reactions, types - physisorption and chemisorption, difference between physisorption and chemisorption, Lennard-Jones plots. (KI, K2, K3, K4 & K5)
- 2.3 Adsorption isotherms - Langmuir and BET isotherms - postulates and derivations. (KI, K2, K3, K4 & K5)
- 2.4 Kinetics of surface reactions - unimolecular and bimolecular reactions, catalysis by semiconductor oxides (n-type and p-type). (KI, K2, K3, K4 & K5)
- 2.5 Mechanism of heterogeneous catalytic reactions, Langmuir and Rideal-Eley mechanism - adsorption co-efficient and its significance. (KI, K2, K3, K4 & K5)
- 2.6 Enzyme catalysis - types of enzyme catalysis, rate of enzyme catalyzed reactions by Michaelis-Menton mechanism - study of effect of substrate concentration, pH and temperature on enzyme catalyzed reactions - inhibition in enzyme catalyzed reactions. (KI, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Complex reactions - definition with examples, kinetics of reversible, consecutive and parallel reactions. (KI, K2, K3, K4, K5 & K6)
- 3.2 Chain reactions - types of chain reactions (stationary and non-stationary). (KI, K2, K3, K4, K5 & K6)
- 3.3 General treatment of chain reactions - chain length - explosion limits. (KI, K2, K3, K4, K5 & K6)
- 3.4 Rice Herzfeld mechanism - order of reactions of unity, one-half and three-halves for photolysis of acetaldehyde. (KI, K2, K3, K4, K5 & K6)
- 3.5 Fast reactions - relaxation methods - pressure and temperature jump methods (KI, K2, K3, K4, K5 & K6)
- 3.6 Stopped flow and flash photolysis methods. (KI, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Photochemistry - introduction, absorption and emission of radiation - intensity distribution in the electronic, vibrational species - Franck Condon Principle. (K1, K2, K3, K4 & K5)
- 4.2 Jablonski diagram - radiative and non-radiative processes - fluorescence and phosphorescence - E-type and P-type delayed fluorescence - spin forbidden radiative transition - internal conversion and intersystem crossing. (K1, K2, K3, K4 & K5)
- 4.3 Electronically excited states - excited state dipole moment and acidity constant. (K1, K2, K3, K4 & K5)
- 4.4 Decay of electronically excited states, dissociation and predissociation of diatomic molecules - energy transfer process. (K1, K2, K3, K4 & K5)
- 4.5 Photophysical processes - kinetics of unimolecular and bimolecular photophysical processes - kinetic treatment of excimer and exciplex formation. (K1, K2, K3, K4 & K5)
- 4.6 Quenching - static and dynamic quenching - Stern-Volmer equation. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Photochemical reactions - photo assisted mechanism, hydrogen and halogen reactions. (K1, K2, K3, K4, K5 & K6)
- 5.2 Kinetics of photochemical reaction, photoredox, photosubstitution, photoisomerization and photosensitized reactions. (K1, K2, K3, K4, K5 & K6)
- 5.3 Photovoltaic and photogalvanic cells, photo assisted electrolysis of water, application of solar energy conversion. (K1, K2, K3, K4, K5 & K6)
- 5.4 Radiation chemistry - interaction of high-energy radiation with matter - primary and secondary processes. (K1, K2, K3, K4, K5 & K6)
- 5.5 G value - radiolysis of water - hydrated electron, ion pair yield. (K1, K2, K3, K4, K5 & K6)
- 5.6 Photocatalysis - applications of TiO<sub>2</sub> photocatalyst for oxidation of organic pollutants - photochemical reaction of vision. (K1, K2, K3, K4, K5 & K6)

## SEMESTER I

### PECHA20 - ELECTIVE I A: POLYMER CHEMISTRY

<b>Year: I</b> SEM: I	<b>Course Code</b> PECHA20	<b>Title of the Course</b> Polymer Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--------------------------	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To gain knowledge on polymerization techniques and characterization of polymers.
- To get acquainted with the recent applications of polymers.

#### Course Outcomes:

The Learners will be able to

1. Classify polymers and illustrate the types of polymerization techniques.
2. Illustrate the characterization techniques such as XRD, TGA, DSC, SEM and TEM.
3. Discuss the polymer reactions and degradation.
4. Evaluate polymer processing techniques in industries, determine molecular weight of polymers by selected methods such as GPC, osmometry, viscometry, ultracentrifugation and MALDI methods.
5. Compile the synthesis, properties and applications of polymers and biopolymers.

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	L	H	H	H
CO2	H	H	H	H	H	H
CO3	H	M	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	L	M	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Introduction - basic concepts of polymer science - definitions, degree of polymerization, molecular forces, and chemical bonding in polymers. (K1, K2, K3, K4, K5 & K6)
- 1.2 Classification of polymers - natural and synthetic - organic and inorganic - thermoplastic and thermosetting polymers - plastics, elastomers, fibres and liquid resins. Linear, branched, and cross-linked polymers, addition polymers and condensation polymers. (K1, K2, K3, K4, K5 & K6)
- 1.1 Polymerization techniques - bulk, suspension, solution, and emulsion techniques. (K1, K2, K3, K4, K5 & K6)
- 1.2 Mechanism and kinetics of addition polymerization - cationic and anionic polymerization. (K1, K2, K3, K4, K5 & K6)
- 1.3 Mechanism and kinetics of free radical and condensation polymerization. (K1, K2, K3, K4, K5 & K6)
- 1.4 Co-ordination polymerization - mechanism using Ziegler Natta catalyst. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Characterization methods - crystalline nature - degree of crystallinity, degree of crystallisability and X-ray diffraction studies. (K1, K2, K3, K4 & K5)
- 2.2 Glass transition temperature (T<sub>g</sub>) - definition, factors affecting glass transition temperature. (K1, K2, K3, K4 & K5)
- 2.3 Importance of glass transition temperature - relationship between glass transition temperature and melting point. (K1, K2, K3, K4 & K5)
- 2.4 Study of polymers - Differential Scanning Calorimetric (DSC) and Thermo Gravimetric Analysis of polymers (TGA). (K1, K2, K3, K4 & K5)
- 2.5 Relation to structure - surface morphology - Scanning Electron Microscopy (SEM). (K1, K2, K3, K4 & K5)
- 2.6 Size of the particle determination - Transmission Electron Microscopy (TEM). (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Polymer reactions - hydrolysis, acidolysis, hydrogenation, addition and substitution reactions. (K1, K2, K3, K4, K5 & K6)
- 3.2 Cyclisation, cross-linking and vulcanization. (K1, K2, K3, K4, K5 & K6)
- 3.3 Graft and block copolymers - definition and reactions leading to the formation of graft and block copolymers. (K1, K2, K3, K4, K5 & K6)
- 3.4 Types of degradation - chemical degradation, physical degradation, biodegradable polymers, and mechanism of degradation. (K1, K2, K3, K4, K5 & K6)
- 3.5 Thermal oxidation, photooxidation, mechanical degradation, degradation by ionizing radiation, ozone attack. (K1, K2, K3, K4, K5 & K6)
- 3.6 Degradation of special polymers: polyolefins, polyvinyl chloride (PVC) and polymethylmethacrylate (PMMA). (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Physical properties, stress-strain behaviour, mechanical properties (tensile, flexural, impact, fatigue, hardness, creep, abrasion). (K1, K2, K3, K4 & K5)
- 4.2 Electrical properties (dielectric strength, surface resistivity, volume resistivity, power factor, arc resistance). (K1, K2, K3, K4 & K5)

- 4.3 Polymer processing - films sheets: moulding - compression, blow moulding, injection moulding and extrusion moulding, casting of films and calendaring, recycling of plastics. (K1, K2, K3, K4 & K5)
- 4.4 Elastomers - introduction, processing, rubber types, vulcanization, properties, reclaiming. (K1, K2, K3, K4 & K5)
- 4.5 Fibers - introduction, production, fiber spinning, textile fibers, industrial fibers, recycling. (K1, K2, K3, K4 & K5)
- 4.6 Molecular weights of polymers - number average and weight average molecular weights, determination of molecular weight of polymers by viscometry, Gel Permeation Chromatography (GPC), membrane osmometry, vapour phase osmometry, ultracentrifugation, light scattering, and Matrix-Assisted Laser Desorption Ionization (MALDI) methods. (K1, K2, K3, K4 & K5)

## Unit V

(15 Hours)

- 5.1 Applications of polymers - industrially important polymers - synthesis, properties and uses of natural and synthetic polymers. (K1, K2, K3, K4, K5 & K6)
- 5.2 Synthesis, properties and uses of polytetrafluoroethylene (Teflon), polystyrene, rayon, nylon, polyacrylates, polyvinyl chloride (PVC), polyacrylonitrile (PAN) and polystyrene-divinylbenzene. (K1, K2, K3, K4, K5 & K6)
- 5.3 Electrically conducting polymers - poly acetylene - poly aniline. (K1, K2, K3, K4, K5 & K6)
- 5.4 Biopolymers - natural - starch, cellulose, chitosan and silk and synthetic - polyvinyl alcohol (PVA), polyvinylpyrrolidone (PVP) and polylactic acid. (K1, K2, K3, K4, K5 & K6)
- 5.5 Biomedical application of biopolymers - dental materials, ophthalmology, orthopaedic implants, tissue engineering and drug delivery. (K1, K2, K3, K4, K5 & K6)
- 5.6 Industrial applications of biopolymers - packaging, automotive and electronics (K1, K2, K3, K4, K5 & K6)

## SEMESTER I

### PECHB20 - ELECTIVE I B: NANO CHEMISTRY

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code</b> PECHB20	<b>Title of the Course</b> Nano Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To study the concepts in nano chemistry.
- To gain knowledge about characterization of nanoparticles by different techniques.
- To get exposed to the applications of nano chemistry.

#### Course Outcomes:

The Learners will be able to

1. Discuss the basic concepts of nano chemistry including theories of nano chemistry, and to classify the various types of nano systems.
2. Explain the different methods and techniques of synthesizing nanoparticles.
3. Discuss the characterization of the nanomaterials.
4. Explain the applications of nano chemistry in optics, electronics, and sensors.
5. Outline the biomedical application of nanoparticles.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

H-High (3), M-Moderate (2), L-Low (1)

#### Unit I

(15 Hours)

- 1.1 Fundamental science behind nano chemistry - scientific revolutions - nanosized effects - surface to volume ratio. (K1, K2, K3, K4, K5 & K6)
- 1.2 Atomic structure - molecules & phases - energy at the nanoscale, molecular and atomic size; quantum effects. (K1, K2, K3, K4, K5 & K6)

- 1.3 Classification based on the dimensionality - nanoparticles, nanoclusters, nanotubes, nanowires and nanodots. (K1, K2, K3, K4, K5 & K6)
- 1.4 Influence of nano structuring on mechanical, optical, electronic, magnetic and chemical properties. (K1, K2, K3, K4, K5 & K6)
- 1.5 Intermolecular forces, van der Waals' forces, dynamic properties of interfaces, contact angle, Brownian motion, and surface free energy. (K1, K2, K3, K4, K5 & K6)
- 1.6 Classical colloid theory - nucleation and growth, adsorption, and desorption kinetics - Ostwald ripening - homogeneous and heterogeneous nucleation. (K1, K2, K3, K4, K5 & K6)

## **Unit II**

**(15 Hours)**

- 2.1 Methods of synthesizing nanoparticles - top-down and bottom-up approach - grain growth - grain boundary - segregation, pinning and aggregation. (K1, K2, K3, K4 & K5)
- 2.2 Top-down methods - inert gas condensation, arc discharge, ion sputtering, laser pyrolysis, ball milling and Molecular Beam Epitaxy (MBE). (K1, K2, K3, K4 & K5)
- 2.3 Soft chemical methods - chemical precipitation and coprecipitation - metal nanocrystals - synthesis by polyol and borohydride reduction methods. (K1, K2, K3, K4 & K5)
- 2.4 Chemical vapour deposition (CVD) method, sol-gel synthesis, microemulsion synthesis, normal and reverse micelles formation, hydrothermal and solvothermal methods. (K1, K2, K3, K4 & K5)
- 2.5 Chemical processes - thermolysis routes, microwave assisted synthesis and Sono chemical assisted synthesis. (K1, K2, K3, K4 & K5)
- 2.6 Microbial routes - biosynthesis - template route, DC and pulsed electrodeposition and electroless deposition - combustion route. (K1, K2, K3, K4 & K5)

## **Unit III**

**(15 Hours)**

- 3.1 X-ray powder diffraction - quantitative determination of phases - structure analysis, particle size analysis using Scherer formula. (K1, K2, K3, K4, K5 & K6)
- 3.2 Thermal analysis methods - Thermo Gravimetric Analysis (TGA), Differential Thermal Analysis (DTA) and Differential Scanning Calorimetry (DSC). (K1, K2, K3, K4, K5 & K6)
- 3.3 Spectroscopy studies - Ultra Violet-Visible (UV), Fourier Transform Infrared spectroscopy (FTIR), Raman Spectroscopy and Photoluminescence Spectroscopy. (K1, K2, K3, K4, K5 & K6)
- 3.4 Microscopic techniques - optical microscope, Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM) and Atomic Force Microscopy (AFM). (K1, K2, K3, K4, K5 & K6)
- 3.5 Surface analysis and particle size - X-ray photoelectron spectroscopy, auger electron spectroscopy, zeta potential measurement and Dynamic Light Scattering (DLS) and ellipsometry. (K1, K2, K3, K4, K5 & K6)
- 3.6 Lithography - X-ray lithography, wet etching, dry etching, etch resists - dip pen lithography. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Zero-dimensional nanoparticles - quantum dots for solar cells, quantum dots for light emitting diode, molecular electronics, and nanoparticles as catalysts. (K1, K2, K3, K4 & K5)
- 4.2 Nanotube/nanowire-based field effect transistors for biosensing, gas sensing, piezoelectric nanowires as nanogenerator - carbon nanostructures - C60, C80, SWNT and MWNT. (K1, K2, K3, K4 & K5)
- 4.3 Nano porous anodized aluminum oxide, nano porous metal-organic framework for adsorption, separation and catalytic conversion of CO<sub>2</sub>, nano porous materials for Li/Cd-ion battery applications. (K1, K2, K3, K4 & K5)
- 4.4 Nano sensors - optical, chemical, and physical sensors. (K1, K2, K3, K4 & K5)
- 4.5 Nano bioelectronics - DNA based biosensors, glucose sensors, protein-based biosensors and quantum dot based bioimaging. (K1, K2, K3, K4 & K5)
- 4.6 Nanoscale electronic devices - Complementary Metal Oxide Semiconductor (CMOS) and Magneto Resistive Random Access Memory (MRAM) devices. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Bio-medical applications - drug delivery - targeted drug delivery systems - various forms - liposomes, micelles, and dendrimers. (K1, K2, K3, K4, K5 & K6)
- 5.2 Photoablation therapy - photodynamic therapy and photo thermal therapy. (K1, K2, K3, K4, K5 & K6)
- 5.3 Cancer therapy - destruction of cancer cells with nanoparticles - magnetic hyperthermia. (K1, K2, K3, K4, K5 & K6)
- 5.4 Neuro electronic interface and nano luminescent tag. (K1, K2, K3, K4, K5 & K6)
- 5.5 Bioimaging, biosensors and biomass energy. (K1, K2, K3, K4, K5 & K6)
- 5.6 Genetic and tissue engineering. (K1, K2, K3, K4, K5 & K6)

## SEMESTER I

### PICHA20 - IEP - DAIRY CHEMISTRY

<b>Year:</b> I <b>SEM:</b> I	<b>Course Code</b> PICHA20	<b>Title of the Course</b> Dairy Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------------	-------------------------------	---	------------------------------	--	---------------------	---------------------	---------------------

#### Learning Objectives:

- To impart knowledge on the principles and practical applications of various dairy products.
- To help the students to understand the analysis of dairy products by using physical, biochemical, and instrumental methods of analysis.

#### Course Outcomes:

The Learners will be able to

1. Summarize the knowledge on dairy products, processing, and their applications.
2. Discuss the physical and chemical properties of milk.
3. Explain the different processing techniques of milk.
4. Explain marketing of milk and apply skills in detecting adulterants in milk products.
5. Describe the nutritive value of milk and chemistry of dairy products in bone and muscle formation.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	H	M

H-High (3), M-Moderate (2), L-Low (1)

## **Unit I**

- 1.1 Milk - constituents of milk - water, lipids, carbohydrates, proteins, salts and miscellaneous constituents. (K1 & K2)
- 1.2 Milk products and their composition - fluid milks and creams, plain milk, skim milk, low fat milk, ultra-high temperature (UHT) sterile milk. (K1 & K2)
- 1.3 Flavoured fluid milk products, fermented and acidified milks, butter milk, yogurt, and kumis. (K1 & K2)
- 1.4 Concentrated fermented milks - fluid cream, table cream, whipping cream. (K1 & K2)
- 1.5 Concentrated milk products - evaporated milk, plain condensed milk, and sweetened condensed milk. (K1 & K2)
- 1.6 Concentrated milk products - condensed skim milk, butter, ghee, cheese and its classification. (K1 & K2)

## **Unit II**

- 2.1 Sampling of milk. (K1 & K2)
- 2.2 Physical test - cream line - freezing point. (K1 & K2)
- 2.3 Physical test - refractive index - temperature. (K1 & K2)
- 2.4 Chemical test - albumin, casein, lactic acid, lactose. (K1 & K2)
- 2.5 Total solids - lactometer - gravimetric analysis. (K1 & K2)
- 2.6 Bacteriological test. (K1 & K2)

## **Unit III**

- 3.1 Introduction - fluid milk products - cooling and agitation. (K1 & K2)
- 3.2 Clarification - separation and standardization. (K1 & K2)
- 3.3 Pasteurization - vacuum removal of off-flavours. (K1 & K2)
- 3.4 Homogenization - packaging and distribution. (K1 & K2)
- 3.5 Ice cream - ingredients and their functionality - butter - processing the cream. (K1 & K2)
- 3.6 Evaporated milk - standardization - cheese and curd processing. (K1 & K2)

## **Unit IV**

- 4.1 Market milk - introduction and definition - market milk industry in India and abroad. (K1 & K2)
- 4.2 Indian standards - food chemical codex. (K1 & K2)
- 4.3 Milk and public health - milk adulteration - lactometer. (K1 & K2)
- 4.4 Safeguarding milk supply - clean milk production. (K1 & K2)
- 4.5 Buying and collection of milk - cooling and transportation of milk. (K1 & K2)
- 4.6 Cleaning and sanitation of equipment - judging and grading of milk. (K1 & K2)

## **Unit V**

- 5.1 Nutrition and muscles - effect of various nutritional factors on muscle of agricultural animals. (K1 & K2)
- 5.2 Effects of under nutrition on human muscle. (K1 & K2)
- 5.3 Nutrition and bone formation - bone formation and remodeling. (K1 & K2)
- 5.4 Calcification - effects of nutrients on bone formation. (K1 & K2)
- 5.5 Nutrition, regeneration and repair - regeneration in lower animals. (K1 & K2)
- 5.6 Regeneration in man and other animals. (K1 & K2)

## SEMESTER I

### PICHB20 - IEP - QUALITY CONTROL AND CHEMICAL ANALYSIS

<b>Year:</b> I	<b>Course Code</b> PICHB20	<b>Title of the Course</b> Quality Control and Chemical Analysis	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
-------------------	-------------------------------	---	------------------------------	--	---------------------	---------------------	---------------------

#### Learning Objectives:

- To provide information on fundamental concepts of quality control, quality analysis and good laboratory practices and their applications in chemical industries.
- To understand the various methods of testing of food, textile, water, soil and air.
- To familiarize the standards and specifications involved in quality control.

#### Course Outcomes:

The Learners will be able to

1. Define quality control, quality assurance and describe the necessity of TQM.
2. Apply standards and specifications in quality control.
3. Discuss the testing methods involved in quality control of food and textile industries.
4. Evaluate quality analysis of water, soil, and air.
5. Demonstrate the basics of good laboratory practices and describe the importance of sampling, documenting and usage of computer aids in QC labs.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	M	M	M	M
CO2	H	M	H	M	M	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

## **Unit I**

- 1.1 Definition and dimension of quality - need for quality. (K1 & K2)
- 1.2 Quality control - objects of quality control - advantages of quality control - relation to quality assurance. (K1, K2 & K3)
- 1.3 Statistical quality control - merit, difference between quality control and statistical quality control. (K1, K2 & K3)
- 1.4 Quality assessment - internal and external methods. (K1, K2, K3 & K4)
- 1.5 Total quality management - Six Sigma, 5S- KAIZEN TQM approach. (K1, K2, K3 & K4)
- 1.6 Barrier to total quality management implementation - a case study of TQM. (K1, K2, K3 & K4)

## **Unit II**

- 2.1 Specifications - role of specifications and its benefits. (K1 & K2)
- 2.2 Standards - reasons for developing standards. Difference between standards and specifications. (K1, K2 & K3)
- 2.3 Data Sheets - MSDS, typical specification of industrial chemicals. (K1, K2 & K3)
- 2.4 Specific specifications - colour, flash and fire points, density of liquids and solids, particle size, viscosity, thixotropy, loss on drying and residue on ignition. (K1, K2 & K3)
- 2.5 International standards: ISO 9001 series, ISO 14001, ASTM, FAO, FDA and their functions. (K1, K2, K3 & K4)
- 2.6 National standard developing organizations: ISI, BIS, APEDA, BEE, FSSAI, AGMARK, CDSCO, CPCB and their functions. (K1, K2, K3 & K4)

## **Unit III**

- 3.1 Quality control and testing of food additives in industries - food preservatives - Class I and Class II preservatives - qualitative analysis of Class II preservatives (sodium benzoate and benzoic acid). (K1, K2, K3 & K4)
- 3.2 Food colours - natural and artificial food colours - identification of colours by chromatographic techniques. (K1, K2, K3 & K4)
- 3.3 HACCP - definition, principles, plan, implementing and managing HACCP system. (K1, K2 & K3)
- 3.4 Quality control and testing in textile industries - importance of quality control. (K1, K2 & K3)
- 3.5 Textile testing methods - physical methods - dimension stability test, fabric shrinkage test, tensile strength, bursting strength. (K1, K2 & K3)
- 3.6 Chemical Methods - solubility test, colour fastness properties. Quality standards in textile - handloom mark, wool mark and silk mark. (K1, K2, K3 & K4)

## **Unit IV**

- 4.1 Physico-chemical analysis of water - sampling procedure - analysis of physical parameter - colour, temperature, turbidity. (K1, K2, K3 & K4)
- 4.2 Chemical parameter - pH, conductivity, total hardness, DO, BOD, COD and their measurements. (K1, K2, K3 & K4)
- 4.3 Physico-chemical analysis of soil - sampling procedure - analysis of physical parameter - bulk density, moisture content. (K1, K2, K3 & K4)
- 4.4 Chemical parameter - pH, total nitrogen, available phosphorous, estimation of available S and common metals like Ca, Mg, Na, K and Fe. (K1, K2, K3 & K4)

- 4.5 National ambient air quality standards and permissible limits. (K1, K2 & K3)
- 4.6 Air quality monitoring of particulate matter (PM 10, PM 2.5), SO<sub>2</sub>, NO<sub>x</sub>, CO and CO<sub>2</sub>. (K1, K2, K3 & K4)

#### **Unit V**

- 5.1 Good Laboratory Practices (GLP) - definition - 10 GLP principles and their functions. (K1, K2 & K3)
- 5.2 Quality control laboratory - responsibilities, routine control, sampling plans, data generation and storage. (K1, K2 & K3)
- 5.3 Sampling techniques - terms involved - developing the sample plan depending on sample size, location and collection. (K1, K2, K3 & K4)
- 5.4 Preparation of laboratory samples - making homogeneous samples, reducing size, prevention of changes in sample. (K1, K2, K3 & K4)
- 5.5 Protocols for handling chemicals and their disposal. (K1, K2, K3 & K4)
- 5.6 Use of computers and sensors in quality control. (K1, K2 & K3)

## SEMESTER II

### PCCHD20 - ORGANIC REACTIONS AND MECHANISMS

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHD20	<b>Title of the Course</b> Organic Reactions and Mechanisms	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To discuss the various oxidation and reduction reactions.
- To understand the mechanisms of rearrangements.
- To learn about photochemical and pericyclic reactions.

#### Course Outcomes:

The Learners will be able to

1. Discuss the oxidation of organic compounds using selected oxidizing reagents.
2. Discuss the reduction of organic compounds using selected reducing reagents.
3. Describe the mechanisms of various rearrangement reactions and their applications.
4. Explain the reaction mechanisms and applications of selected named reactions.
5. Illustrate the types of photo chemical reactions, classify pericyclic reactions, and examine the correlation diagram for butadiene-cyclobutene system.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(12 Hours)**

- 1.1 Oxidation by quinones and selenium dioxide. (K1, K2, K3, K4, K5 & K6)
- 1.2 Oxidation by osmium tetroxide and lead tetraacetate. (K1, K2, K3, K4, K5 & K6)
- 1.3 Formation of C-C bond in phenol coupling and acetylenic coupling. (K1, K2, K3, K4, K5 & K6)
- 1.4 Oxidation by chromic acid (Jones reagent) and chromium trioxide - pyridine (Sarett's reagent), ozone, hydrogen peroxide and potassium permanganate. (K1, K2, K3, K4, K5 & K6)
- 1.5 DMSO-DCC (Pfitzer-Moffatt reagent) and Oppenauer oxidation. (K1, K2, K3, K4, K5 & K6)
- 1.6 Dakin reaction and Swern oxidation. (K1, K2, K3, K4, K5 & K6)

**Unit II****(12 Hours)**

- 2.1 Catalytic reduction - hydrogenation, hydrogenolysis - reduction by metals (Cu, Pd, Ni). (K1, K2, K3, K4 & K5)
- 2.2 Wolf- Kishner reduction and its modification and Clemmensen reduction. (K1, K2, K3, K4 & K5)
- 2.3 Birch and MPV reduction reactions. (K1, K2, K3, K4 & K5)
- 2.4 Reduction of carbonyl compounds (aldehydes and ketones) with  $\text{LiAlH}_4$  and  $\text{NaBH}_4$ . (K1, K2, K3, K4 & K5)
- 2.5 Reduction of carbonyl compounds (aldehydes and ketones) with tritertiary butoxyaluminium hydride and sodium cyanoborohydride. (K1, K2, K3, K4 & K5)
- 2.6 Selectivity in reduction of 4-t-butylcyclohexanone using selected hydrides. ( $\text{LiAlH}_4$  and  $\text{NaBH}_4$ ) (K1, K2, K3, K4 & K5)

**Unit III****(12 Hours)**

- 3.1 A detailed study with suitable examples of the mechanism of the following rearrangements - Wagner-Meerwein and Demjanov rearrangements. (K1, K2, K3, K4, K5 & K6)
- 3.2 Dienone - Phenol and Favorski rearrangements. (K1, K2, K3, K4, K5 & K6)
- 3.3 Baeyer-Villiger and Wolf rearrangements. (K1, K2, K3, K4, K5 & K6)
- 3.4 Von-Richter and Curtius rearrangements. (K1, K2, K3, K4, K5 & K6)
- 3.5 Lossen and Schmidt rearrangements. (K1, K2, K3, K4, K5 & K6)
- 3.6 Nitrenes - singlet and triplet nitrenes. Methods of generating nitrenes and their reactions. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(12 Hours)**

- 4.1 Reaction mechanism and applications of Barton and Simmons-Smith reactions. (K1, K2, K3, K4 & K5)
- 4.2 Reaction mechanisms and applications of Stobbe condensation and Mannich. (K1, K2, K3, K4 & K5)
- 4.3 Darzen condensation and Chichibabin reactions. (K1, K2, K3, K4 & K5)
- 4.4 Reaction mechanisms and applications of Michael addition and Skraup synthesis. (K1, K2, K3, K4 & K5)
- 4.5 Reaction mechanisms and applications of Hunsdiecker and Ullmann reactions. (K1, K2, K3, K4 & K5)

4.6 Reaction mechanisms and applications of Nef and HVZ. (K1, K2, K3, K4 & K5)

**Unit V** (12 Hours)

5.1 Photochemical excitation - fate of the excited molecules - Jablonski diagram - study of photo chemical reaction of ketone. (K1, K2, K3, K4, K5 & K6)

5.2 Norrish type I and Norrish type II reactions. (K1, K2, K3, K4, K5 & K6)

5.3 Photocycloaddition - Paterno-Buchi reduction - photo cycloaddition of  $\alpha$ - $\beta$  unsaturated ketones- di-pi methane rearrangement. (K1, K2, K3, K4, K5 & K6)

5.4 Pericyclic reactions - classification, orbital symmetry - Woodward Hoffmann rules. (K1, K2, K3, K4, K5 & K6)

5.5 Analysis of electrocyclic reactions - types -  $4n$  and  $4n + 2$  systems - cyclo addition – types – [2+2] and [4+2] cycloaddition reactions. Sigmatropic reactions - 1, n hydrogen shift, Cope rearrangement and Claisen rearrangement. (K1, K2, K3, K4, K5 & K6)

5.6 Correlation diagrams for butadiene - cyclobutene system. (K1, K2, K3, K4, K5 & K6)

## SEMESTER II

### PCCHE20 - ADVANCED COORDINATION CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHE20	<b>Title of the Course</b> Advanced Coordination Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To have an in-depth knowledge on coordination chemistry, stability of the complexes and stereochemistry of complexes.
- To study about the crystal field theory and applications of inorganic complexes.
- To gain knowledge about the concepts of electron transfer and substitution reactions.

#### Course Outcomes:

The Learners will be able to

1. Interpret the stability of complexes and explain the applications of various macrocyclic ligands.
2. Explain and analyse the concepts of CFT, MOT and Jahn Teller distortion.
3. Analyse the absorption spectra and determine magnetic susceptibility of metal complexes by different methods.
4. Discuss the electron transfer reaction mechanisms and their importance in biological systems.
5. Explain the reactivity and mechanisms of square planar and octahedral complexes and appraise the applications of complexes in various fields.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	H
CO2	H	M	H	M	M	H
CO3	H	H	H	H	M	H
CO4	H	M	L	M	H	H
CO5	H	M	M	M	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	L	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	M	H	H

H-High (3), M-Moderate (2), L-Low (1)

**Unit I****(15 Hours)**

- 1.1 Thermodynamic and kinetic stability - stepwise and overall stability constants - relationship between both the constants. (K1, K2, K3, K4, K5 & K6)
- 1.2 Trend in K-value - Irving-Williams series - classification of metals. (K1, K2, K3, K4, K5 & K6)
- 1.3 Factors affecting the stability of complexes. (K1, K2, K3, K4, K5 & K6)
- 1.4 Determination of stability constants by spectrophotometric, polarographic and potentiometric methods - detection of complex formation. (K1, K2, K3, K4, K5 & K6)
- 1.5 Optical rotatory dispersion and circular dichroism - application to complexes. (K1, K2, K3, K4, K5 & K6)
- 1.6 Macrocyclic ligands: thermodynamic and kinetic template effect - structure, stability and applications of porphyrins, corrins, Schiff bases, crown ethers and crypts. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 CFT - salient features of CFT, crystal field splitting of d-orbitals in octahedral complexes - factors affecting the magnitude of  $\Delta_o$ , crystal field splitting of d-orbitals in tetrahedral, tetragonal, and square planar complexes. (K1, K2, K3, K4 & K5)
- 2.2 Consequences of CF splitting - formation of high-spin and low-spin complexes, distribution of d-electrons. (K1, K2, K3, K4 & K5)
- 2.3 CFSE - calculation of CFSE for various d systems in  $O_h$  and  $T_d$  fields - uses of CFSE values, applications of CFT, limitations. (K1, K2, K3, K4 & K5)
- 2.4 Jahn-Teller distortion - theorem, z-in and z-out cases, causes and consequences. (K1, K2, K3, K4 & K5)
- 2.5 MOT - experimental evidences for metal-ligand covalent bonding in complexes,  $\sigma$ -bonding in  $O_h$  complexes - construction of MO diagrams. (K1, K2, K3, K4 & K5)
- 2.6  $\pi$ -bonding in  $O_h$  complexes, effect of  $\pi$ -bonding on the value of  $\Delta_o$ , relation between  $\pi$  bonding ability of ligands and spectrochemical series, comparison of CFT with MOT. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Types of absorption spectra - ligand spectra, counter - ion spectra, CT spectra, ligand field spectra - R-S coupling. (K1, K2, K3, K4, K5 & K6)
- 3.2 Microstates - spectroscopic terms - ground state term: Hund's rule - term states for 'd' - ions. (K1, K2, K3, K4, K5 & K6)
- 3.3 Selection rules - Laporte's and spin selection rules, splitting of terms in octahedral and tetrahedral complexes. (K1, K2, K3, K4, K5 & K6)
- 3.4 Correlation diagrams - Orgel diagrams and Tanabe-Sugano diagrams - important features - spectra of different d systems - Racah parameters - nephelauxetic effect. (K1, K2, K3, K4, K5 & K6)
- 3.5 Charge transfer spectra - classification - ligand to metal, metal to ligand, inter valence and intra ligand charge transfer. (K1, K2, K3, K4, K5 & K6)
- 3.6 Magnetic characteristics of transition metal complexes - types of magnetic character - determination of magnetic susceptibility - Gouy and Faraday's method -magnetic properties of complex ions - magnetic criterion of bond type in complex and orbital contribution to magnetic moment. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Electron transfer reactions (redox reactions): Outer Sphere Mechanism - characteristics, factors influencing OSM. (K1, K2, K3, K4 & K5)
- 4.2 Cross reactions - Marcus-Hush principle. Inner Sphere Mechanism - characteristics. (K1, K2, K3, K4 & K5)
- 4.3 Inner Sphere Mechanism - factors influencing ISM, OSM versus ISM. (K1, K2, K3, K4 & K5)
- 4.4 Two electron transfers, non-complementary electron transfer reactions, reactions of the coordinated ligands, geometrical and optical isomerization reactions. (K1, K2, K3, K4 & K5)
- 4.5 Electron transfer reactions in biological systems - cytochromes, rubredoxins and ferredoxins. (K1, K2, K3, K4 & K5)
- 4.6 Ligand substitution reactions in square-planar complexes - mechanism - influences of entering, leaving and central metal ion on the reactivity of square planar complexes of Pt (II). (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Trans effect - trans effect series - theories and applications, cis effect. (K1, K2, K3, K4, K5 & K6)
- 5.2 Mechanisms of substitutions in octahedral complexes - dissociative, associative and interchange ( $I_a$  and  $I_d$ ) mechanisms. (K1, K2, K3, K4, K5 & K6)
- 5.3 Hydrolysis reactions - acid hydrolysis and base hydrolysis reactions of six-coordinated Co(III) ammine complexes - mechanisms - evidences. (K1, K2, K3, K4, K5 & K6)
- 5.4 Replacement of coordinated water - mechanisms - evidences - rates of water replacement - orbital occupation effects. (K1, K2, K3, K4, K5 & K6)
- 5.5 Synthesis of coordination compounds by substitution reactions - chemistry of Pt and Co compounds. (K1, K2, K3, K4, K5 & K6)
- 5.6 Metal complexes in medicinal chemistry, industrial processes, and agriculture. (K1, K2, K3, K4, K5 & K6)

## SEMESTER II

### PCCHF20 - GROUP THEORY AND QUANTUM CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHF20	<b>Title of the Course</b> Group Theory and Quantum Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To learn the concepts of Group theory and its applications.
- To study the fundamental principles of Quantum Chemistry, Schrodinger wave equation and its applications.
- To understand the application of Quantum Chemistry to chemical bonding.

#### Course Outcomes:

The Learners will be able to

1. Identify symmetry operations and assign point groups of molecules.
2. Construct the character tables for  $C_{2v}$  and  $C_{3v}$  point groups, apply the concepts of symmetry in molecular vibrations, chemical bonding, and electronic transitions.
3. Identify the limitations of classical mechanics, apply quantum chemistry to solve Schrödinger wave equation for one, two- and three-dimensional boxes and for hydrogen atom and helium ion.
4. Discuss classical and quantum mechanical treatments of one-dimensional harmonic oscillator, calculate the rotational constant and bond length of diatomic molecules.
5. Discuss and apply the approximation methods to single and multi-electron systems, apply the MO theory to di and polyatomic molecules, explain the application of HMO theory to ethylene, butadiene, and benzene.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	M	H	M
CO2	H	M	M	M	H	L
CO3	H	M	M	M	H	L
CO4	H	M	M	M	H	L
CO5	H	M	M	M	H	L

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	L	H
CO3	H	H	H	H	L	H
CO4	H	H	H	H	L	H
CO5	H	H	H	H	L	H

H-High (3), M-Moderate (2), L-Low (1)

- Unit I** (15 Hours)
- 1.1 Introduction - symmetry elements and symmetry operations, group postulates and types of groups, sub groups, abelian and non-abelian groups. (K1, K2, K3, K4, K5 & K6)
  - 1.2 Group multiplication table, similarity transformations and classes of symmetry operations. (K1, K2, K3, K4, K5 & K6)
  - 1.3 Molecular point groups - point groups of molecules, point groups of tetrahedral and octahedral molecules. Identification of symmetry operations and determination of point groups. (K1, K2, K3, K4, K5 & K6)
  - 1.4 Matrices - matrix representations of symmetry operations, reducible and irreducible representations. (K1, K2, K3, K4, K5 & K6)
  - 1.5 Orthogonality theorem and its consequences, properties of irreducible representations, labeling of irreducible representations. (K1, K2, K3, K4, K5 & K6)
  - 1.6 Crystallographic symmetry - the 32 crystallographic point groups - space groups - screw axis - glide planes - comparison of crystallographic symmetry with molecular symmetry. (K1, K2, K3, K4, K5 & K6)
- Unit II** (15 Hours)
- 2.1 Construction of character table for  $C_{2V}$  and  $C_{3V}$  point groups - explanation for the complete character table for  $C_{2V}$  and  $C_{3V}$  point groups. (K1, K2, K3, K4 & K5)
  - 2.2 Selection rules for vibrational IR and Raman spectra. (K1, K2, K3, K4 & K5)
  - 2.3 Mutual exclusion rule for molecules with centre of symmetry. (K1, K2, K3, K4 & K5)
  - 2.4 Applications to molecular vibrations (IR and Raman) for determining symmetry of normal modes of vibration in nonlinear molecules  $H_2O$ ,  $CH_4$ ,  $BF_3$  and  $NH_3$  using group theory. (K1, K2, K3, K4 & K5)
  - 2.5 Hybrid orbitals in nonlinear molecules  $CH_4$ ,  $XeF_4$ ,  $BF_3$ ,  $SF_6$ ,  $NH_3$ . (K1, K2, K3, K4 & K5)
  - 2.6 Application of group theory to electronic spectra of ethylene and formaldehyde. (K1, K2, K3, K4 & K5)
- Unit III** (15 Hours)
- 3.1 Introduction to quantum mechanics - black body radiation - distribution of energy in the black body radiation - Rayleigh Jeans' and Planck's law of radiation. (K1, K2, K3, K4, K5 & K6)
  - 3.2 Photoelectric effect, Bohr's quantum theory and subsequent developments - duality of electron and Compton Effect. (K1, K2, K3, K4, K5 & K6)
  - 3.3 Quantum theory - quantum mechanical postulates – operators - definition, types of operators and Hermitian property. (K1, K2, K3, K4, K5 & K6)
  - 3.4 Particle in a box model (one-, two- and three-dimensional cases). (K1, K2, K3, K4, K5 & K6)
  - 3.5 Schrodinger equation for hydrogen atom and  $He^+$  ion. (K1, K2, K3, K4, K5 & K6)
  - 3.6 Origin of quantum numbers and their significance. (K1, K2, K3, K4, K5 & K6)
- Unit IV** (15 Hours)
- 4.1 One dimensional harmonic oscillator - classical treatment and quantum mechanical treatment. (K1, K2, K3, K4 & K5)
  - 4.2 Normalization and the characteristics of the Eigen functions of a harmonic oscillator. (K1, K2, K3, K4 & K5)
  - 4.3 The recursion formula for the Hermite polynomials, selection rules of the harmonic oscillator and space quantization of electronic orbitals. (K1, K2, K3, K4 & K5)

4.4 Rotation of diatomic molecules - wave equation and solution of the rigid rotor. (K1, K2, K3, K4 & K5)

4.5 Schrodinger wave equation and solution of particle in a ring. (K1, K2, K3, K4 & K5)

4.6 Calculation of rotational constants and bond lengths of diatomic molecules. (K1, K2, K3, K4 & K5)

#### Unit V

(15 Hours)

5.1 Approximation methods - variation methods - trial wave function - application of variation method to hydrogen and helium atoms. (K1, K2, K3, K4, K5 & K6)

5.2 Perturbation method and its application to particle in one dimensional box. (K1, K2, K3, K4, K5 & K6)

5.3 Born Oppenheimer approximation - treatment of molecules - application to helium atom. (K1, K2, K3, K4, K5 & K6)

5.4 Hydrogen molecule - Heiter-London theory or valence bond treatment - energy level diagram. (K1, K2, K3, K4, K5 & K6)

5.5 Linear Combination of Atomic Orbitals (LCAO) - molecular orbital theory for hydrogen molecule ion and hydrogen molecule. (K1, K2, K3, K4, K5 & K6)

5.6 Huckel's theory for conjugated molecules - ethylene, butadiene and benzene - semi empirical methods - Slater orbital and Hartree Fock–Self Consistent Field (HFSCF) methods. (K1, K2, K3, K4, K5 & K6)

## SEMESTER II

### PECHC20 - ELECTIVE II A: PHARMACEUTICAL CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PECHC20	<b>Title of the Course</b> Pharmaceutical Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To learn about the drugs, metabolism and the side effects.
- To understand the importance of drug design and development of drugs.
- To know the cancer and the drugs used.
- To learn about the various nutraceuticals and anticoagulants.

#### Course Outcomes:

The Learners will be able to

1. Classify the pharmaceutical drugs and explain the mechanism of drug action and absorption of drugs.
2. Elaborate the biological role of important inorganic compounds and the drugs used in the treatment of mental disorders.
3. Summarize the methods of drug design and development.
4. Review the causes of cancer and its treatment, and to assess the mechanism and the mode of action of anticancer drugs.
5. Formulate the different types of Nutraceuticals and their applications, and to justify the role of anticoagulants in the treatment of blood disorder.

CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I** (15 Hours)

- 1.1 Classification of drugs: biological, chemical, commercial consideration and lay public. (K1, K2, K3, K4, K5 & K6)
- 1.2 Mechanism of drug action and metabolism of drugs - mechanism of action, drug receptors binding, biological responses - covalent bond, hydrogen bond, van der Waal's forces. (K1, K2, K3, K4, K5 & K6)
- 1.3 Metabolism of drugs - chemical pathways - phase I and phase II reactions, biotransformation. (K1, K2, K3, K4, K5 & K6)
- 1.4 Routes of administration of drugs. (K1, K2, K3, K4, K5 & K6)
- 1.5 Absorption of drugs - factors affecting absorption. (K1, K2, K3, K4, K5 & K6)
- 1.6 Digestion and absorption of proteins and fats. (K1, K2, K3, K4, K5 & K6)

**Unit II** (15 Hours)

- 2.1 Assay of drugs - chemical, biological, and immunological assay. (K1, K2, K3, K4 & K5)
- 2.2 Psychopharmacology - antipsychotic drugs, phenothiazines, LSD, marijuana. (K1, K2, K3, K4 & K5)
- 2.3 Barbiturates - mechanism of action. (K1, K2, K3, K4 & K5)
- 2.4 Biological role of some inorganic compounds - sodium and potassium and their compounds. (K1, K2, K3, K4 & K5)
- 2.5 Calcium and iodine and their compounds. (K1, K2, K3, K4 & K5)
- 2.6 Copper and zinc and their compounds. (K1, K2, K3, K4 & K5)

**Unit III** (15 Hours)

- 3.1 Drug design and development - introduction, discovery of drugs and lead compounds, different approaches to find lead compounds. (K1, K2, K3, K4, K5 & K6)
- 3.2 Development of drugs: Lead modification - pharmacophore modification, modification of structure or functional group, Structure Activity Relationship (SAR) - Prontosil, Streptomycin. (K1, K2, K3, K4, K5 & K6)
- 3.3 Structure modification methodologies to increase potency - homologation, chain branching, ring-chain transformation, extension of structure, isosteres and bioisosteres. (K1, K2, K3, K4, K5 & K6)
- 3.4 Quantitative Structure Activity Relationship (QSAR) - Hammett equation (electronic effects), Taft Equation (steric effects), Hansch equation (lipophilicity effect), Hansch analysis. (K1, K2, K3, K4, K5 & K6)
- 3.5 Craig plot, drug design using QSAR. (K1, K2, K3, K4, K5 & K6)
- 3.6 Computer assisted drug design (CADD). (K1, K2, K3, K4, K5 & K6)

**Unit IV** (15 Hours)

- 4.1 Cancer chemotherapy - terms used - types of neoplasms, stages of cancer, metastasis, and difference between cancer and normal cells. (K1, K2, K3, K4 & K5)
- 4.2 Tumor formation mechanism, causes of cancer, ways of reducing the risks. (K1, K2, K3, K4 & K5)
- 4.3 Treatment of cancer - radiation, surgery, chemotherapy, photodynamic therapy (PDT), immunotherapy, combined therapy, actions of antitumor agents. (K1, K2, K3, K4 & K5)
- 4.4 Determination of drug response - growth fraction, the mass doubling time, total tumor burden, tumor heterogeneity, cell cycle phase, drug resistance, host factors. (K1, K2, K3, K4 & K5)

4.5 Cytotoxic anticancer drugs - alkylating agents (Mustards) and their modes of action, antimetabolites - folic acid antagonist, purine antagonist and their modes of action. (K1, K2, K3, K4 & K5)

4.6 Pyrimidine agents and their modes of action, antitumor antibiotics and their modes of action, plant products, podophyllotoxins and their modes of action, endocrine agents and their modes of action, miscellaneous anticancer agents. (K1, K2, K3, K4 & K5)

#### **Unit V**

**(15 Hours)**

5.1 Nutraceuticals - introduction, types - plant sources. (K1, K2, K3, K4, K5 & K6)

5.2 Animal sources, microbial sources, nutraceuticals derived from all sources. (K1, K2, K3, K4, K5 & K6)

5.3 Antioxidants - definition, examples, role of antioxidants. (K1, K2, K3, K4, K5 & K6)

5.4 Toxins and their medicinal values - introduction, classification of toxins, toxins from reptiles and animals. (K1, K2, K3, K4, K5 & K6)

5.5 Toxins from insects, plants, marine origin, and microorganisms. (K1, K2, K3, K4, K5 & K6)

5.6 Anticoagulants - blood coagulation pathway, prevention of coagulation, direct and indirect acting anticoagulants, and anticoagulation therapy. (K1, K2, K3, K4, K5 & K6)

## SEMESTER II

### PECHD20 - ELECTIVE II B: MEDICINAL CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PECHD20	<b>Title of the Course</b> Medicinal Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To have a clear understanding about drug designing and the principles involved in it.
- To deepen the knowledge on biochemical considerations of drug designing.

#### Course Outcomes:

The Learners will be able to

1. Explain the designing of drugs by different approaches.
2. Define the physiochemical properties of drug molecules, and illustrate pharmacophore, toxicophore, metabophore and interchangeable bioisosteres.
3. Describe the nature of drug receptors and their binding interactions.
4. Explain the stereochemical properties and biological activity of drug molecules, and to identify the properties of drug molecules by quantum mechanics and molecular mechanics.
5. Describe the physiological and pathological approaches while designing newer drugs for newer diseases, and to Discuss the biological activity of steroids and radioisotopes.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I** (15 Hours)

- 1.1 Drug design - rational approach and conceptual approach. (K1, K2, K3, K4, K5 & K6)
- 1.2 Practical approach and humanitarian approach. (K1, K2, K3, K4, K5 & K6)
- 1.3 The method of variation. (K1, K2, K3, K4, K5 & K6)
- 1.4 Drug design through disjunction and conjunction. (K1, K2, K3, K4, K5 & K6)
- 1.5 Research and development strategies. (K1, K2, K3, K4, K5 & K6)
- 1.6 Molecular hybridization, rigidity, and flexibility versus drug design, tailoring of drugs. (K1, K2, K3, K4, K5 & K6)

**Unit II** (15 Hours)

- 2.1 Definition and properties of drug molecules. (K1, K2, K3, K4 & K5)
- 2.2 Physiochemical properties of drug design. (K1, K2, K3, K4 & K5)
- 2.3 Structural integrity of drug molecules. (K1, K2, K3, K4 & K5)
- 2.4 Pharmaceutical, pharmacokinetics and pharmacodynamic phases. (K1, K2, K3, K4 & K5)
- 2.5 Structural fragments of drug molecules - pharmacophore and toxicophore. (K1, K2, K3, K4 & K5)
- 2.6 Metabophores and interchangeable bioisosteres. (K1, K2, K3, K4 & K5)

**Unit III** (15 Hours)

- 3.1 The receptor concept - the nature of receptors and criteria for receptor identity. (K1, K2, K3, K4, K5 & K6)
- 3.2 Definitions of drug - receptor binding interactions. (K1, K2, K3, K4, K5 & K6)
- 3.3 Selection of drug - receptor binding forces in drug design. (K1, K2, K3, K4, K5 & K6)
- 3.4 General molecular concepts of drug receptor action, functional molecular properties of drug receptors. (K1, K2, K3, K4, K5 & K6)
- 3.5 Definition of classical binding terms for drug - receptor interactions. (K1, K2, K3, K4, K5 & K6)
- 3.6 The clinical-molecular interface: The concept of rational poly pharmacy - drug-drug interactions in drug design. (K1, K2, K3, K4, K5 & K6)

**Unit IV** (15 Hours)

- 4.1 Structure and properties of drug molecules. (K1, K2, K3, K4 & K5)
- 4.2 Conformational, topological, and steric properties of drug molecules. (K1, K2, K3, K4 & K5)
- 4.3 Enantiomers and diastereomers of drug molecules. (K1, K2, K3, K4 & K5)
- 4.4 Stereochemistry and biological activity of drug molecules. (K1, K2, K3, K4 & K5)
- 4.5 Electronic properties of drug molecules. (K1, K2, K3, K4 & K5)
- 4.6 Predicting the properties of drug molecules - quantum mechanics and molecular mechanics. (K1, K2, K3, K4 & K5)

**Unit V** (15 Hours)

- 5.1 Biochemical considerations in drug design - the physiological and pathological approaches. (K1, K2, K3, K4, K5 & K6)

- 5.2 Newer drugs for newer diseases - introduction, newer drugs. (K1, K2, K3, K4, K5 & K6)
- 5.3 Hormone antagonists - anti estrogen - aldosterone antagonists. (K1, K2, K3, K4, K5 & K6)
- 5.4 Anti progestational steroids - cardiac steroids and related inotropic drugs. (K1, K2, K3, K4, K5 & K6)
- 5.5 Cardiac steroids, phosphodiesterase inhibitors, adenylate cyclase stimulants, drugs that enhance the  $\text{Ca}^{2+}$  sensitivity of myocardial contractile proteins. (K1, K2, K3, K4, K5 & K6)
- 5.6 Radio sensitizer - therapeutic radioisotopes, imaging radioisotopes - drugs to combat AIDS. (K1, K2, K3, K4, K5 & K6)

## SEMESTER II

### PCCHG20 - PRACTICAL I: ORGANIC CHEMISTRY - I

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHG20	<b>Title of the Course</b> Practical I: Organic Chemistry – I	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Identify the components in two component mixture and detect the functional groups.
2. Prepare the organic compounds and purify them.
3. Perform common laboratory techniques like separation, refluxing, recrystallization, vacuum filtration, and sublimation.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	L	H	H	H
CO2	H	H	M	H	H	H
CO3	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

1. Identification of components in a two-component mixture and preparation of their derivatives.
2. Preparations:
  - (i) p-nitrobenzoic acid from p-nitrotoluene (Oxidation)
  - (ii) Anthroquinone from Anthracene (Oxidation)
  - (iii) 1,2,3,4 - tetrahydrocarbazole from Cyclohexanone (Reduction)
  - (iv) Methyl orange from Sulphanilic acid
  - (v) Acetyl Salicylic acid (Aspirin) from Salicylic acid (Acetylation)
  - (vi) m-nitro aniline from m-dinitrobenzene (Reduction)

## Continuous Assessment - 40 Marks

I C.A. - 50 Marks

II C.A. - 50 Marks

Average - 25 Marks

Performance during regular practicals - 10 Marks

Regularity in submission of observation notebook and Record - 5 Marks

## CA Practical Examination - 50 Marks

Record - 5 Marks

Viva - 5 Marks

Experiment - 30 Marks

Preparation - 10 Marks

(Quality - 4 Marks, Quantity - 4 Marks, Recrystallization - 2 Marks)

## Semester Practical Examination - 60 marks

Record - 10 Marks

Viva - 5 Marks

Qualitative Organic Analysis - 35 Marks

Preparation - 10 Marks

(Quality - 4 Marks, Quantity - 4 Marks, Recrystallization - 2 Marks)

## SEMESTER II

### PCCHH20 - PRACTICAL II: INORGANIC CHEMISTRY - I

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHH20	<b>Title of the Course</b> Practical II: Inorganic Chemistry – I	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--	-------------------------------	---	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Demonstrate group separation and analysis of inorganic mixtures.
2. Identify rare and common ions present in the inorganic mixtures.
3. Prepare selected inorganic complexes.
4. Estimate the metal ions present in the sample by colorimetric method.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	H	H
CO2	H	M	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

1. Semi micro qualitative analysis of mixture containing two common and two rare cations. (The following are the rare cations to be included - W, Te, Se, Ce, Zr, Be, V, Mo, Li)
2. Colorimetric Analysis using photoelectric method: Estimation of Iron, Nickel, Copper and Manganese.
3. Preparations:
  - i. Potassium tris(oxalato)aluminate(III) trihydrate
  - ii. Tris(thiourea)copper(I) chloride
  - iii. Sodium hexanitrocobaltate(III)
  - iv. Tetramminecopper(II) sulphate
  - v. Sodium cuprousthiosulphate

## Continuous Assessment - 40 Marks

I C.A.	- 50 Marks
II C.A.	- 50 Marks
Average	- 25 Marks

Performance during regular practicals - 10 Marks

Regularity in submission of observation note-book and Record - 5 Marks

## CA Practical Examination - 50 Marks

Record	- 5 Marks
Viva	- 5 Marks
Short Procedure	- 5 Marks
Semi micro qualitative analysis (2 rare + 2 common cations)	- 15 Marks
Preparation	- 10 Marks
Colorimetric analysis	- 10 Marks

## Error Percentage for Colorimetric Estimation:

Upto 5%	- 10 Marks
5 – 7%	- 9 Marks
7 – 9%	- 8 Marks
9 – 12%	- 7 Marks
Above 12%	- 5 Marks

## Semester Practical Examination - 60 marks

Record	- 10 Marks
Viva – Voce	- 5 Marks
Short Procedure	- 5 Marks
Semi micro qualitative analysis (2 rare + 2 common cations)	- 20 Marks
Preparation	- 10 Marks
Colorimetric analysis	- 10 Marks

## Error Percentage for Colorimetric Estimation:

Upto 5%	- 10 Marks
5 – 7%	- 9 Marks
7 – 9%	- 8 Marks
9 – 12%	- 7 Marks
Above 12%	- 5 Marks

## SEMESTER - II

### PCCHI20 - PRACTICAL III: PHYSICAL CHEMISTRY - I

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PCCHI20	<b>Title of the Course</b> Practical III: Physical Chemistry - I	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
--	-------------------------------	---	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Prepare the solutions of different concentrations.
2. Experiment and calculate the rate constant of ester hydrolysis and primary salt effect.
3. Determine the order and energy of activation using kinetics.
4. Construct and analyze phase diagrams, and examine the validity of Freundlich and Langmuir adsorption isotherms.
5. Determine the rate constant using polarimeter and stability constant using photo colorimeter, and develop skills in handling colorimeter and polarimeter.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

1. Determination of rate constant and order of the reaction of iodination of acetone in the presence of acid catalyst.
2. Determination of order of the reaction of potassium iodide and potassium persulphate.
3. Determination of the strengths of the given unknown acids and their relative strength.
4. Determination of activation energy and Arrhenius parameter for the acid catalyzed hydrolysis of methyl acetate at two different temperatures.

5. Determination of rate constant of the reaction between potassium iodide and potassium persulphate and study the effect of added neutral salt on the rate constant of the reaction.
6. Determination of adsorption of oxalic acid from aqueous solutions by activated charcoal and examines the validity of Freundlich adsorption isotherm.
7. Verification of the Freundlich and Langmuir isotherms for adsorption of acetic acid on activated charcoal.
8. Construction of the phase diagram for a binary mixture to determine the eutectic temperature and composition and determination of the composition of the given mixture A and B by making use of the phase diagram - simple eutectic system.
9. \*Determination of the saponification of ethyl acetate with sodium hydroxide at equal concentrations of ester and alkali.
10. Kinetics of inversion of sucrose - polarimetry.
11. \*Determination of composition of ferric ions-salicylic acid by Job's method.
12. \*Determination of partial molar volume of acetic acid in aqueous solution by apparent molar volume method.

\*Not to be given for examination

## SEMESTER II

### PICHC20 - IEP - CSIR-NET PREPARATORY COURSE IN INORGANIC CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PICHC20	<b>Title of the Course</b> CSIR-NET Preparatory Course in Inorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W</b> Own Pace	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	---	---------------------------	---------------------	---------------------

#### Learning Objective:

- Upon studying this paper, the students will be able to answer CSIR-NET questions in Inorganic Chemistry.

#### Course Outcomes:

The Learner will be able to

1. Apply and analyze the periodicity of properties of elements, MOT, VSEPR theory, concepts of acids and bases, and the basic aspects of solid-state chemistry.
2. Apply and analyze the properties of main group elements and their compounds.
3. Apply VB, CF and MO theories, and analyze the reactions and properties of complexes.
4. Apply and analyze the chemistry of organometallic and bioinorganic compounds.
5. Apply and analyze the various techniques involved in the characterization of inorganic compounds.

CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

H-High (3), M-Moderate (2), L-Low (1)

## Unit I

- 1.1 Chemical periodicity: Periodic table, grouping of elements, classification of elements - s, p, d and f block elements, periodic trends - atomic size, ionic size, ionization potential, electronegativity. (K1, K2 & K3)
- 1.2 Structure and bonding: Molecular Orbital Theory - bonding and anti-bonding molecular orbitals, bond order, bonding in homo and hetero nuclear molecules. (K1, K2 & K3)
- 1.3 VSEPR theory: Geometries of molecules. (K1, K2, K3 & K4)
- 1.4 Acids and bases: Concepts of acids and bases - Arrhenius, Bronsted-Lowry and Lewis concepts, Hard-Soft Acid Base concept - Pearson theory, non-aqueous solvents. (K1, K2, K3 & K4)
- 1.5 Solids: Crystal systems and lattices, Miller planes, crystal packing, crystal defects, Bragg's law, ionic crystals, structures of AX, AX<sub>2</sub>, ABX<sub>3</sub> type compounds. (K1, K2 & K3)
- 1.6 Spinels, band theory, metals, and semiconductors. (K1, K2, K3 & K4)

## Unit II

- 2.1 Main group elements: General characteristics of alkali metals, alkaline earth metals, boron family, carbon family, nitrogen family, chalcogens. (K1, K2 & K3)
- 2.2 Compounds of main group elements - hydrides, halides, oxides, oxoacids, nitrides, sulphides - shapes and reactivity. (K1, K2 & K3)
- 2.3 Structure and bonding of boranes, carboranes, silicones, silicates, boron nitride, borazine and phosphazenes, industrial importance of these compounds. (K1, K2, K3 & K4)
- 2.4 Allotropy, chemistry of noble gases, pseudo halogens and inter halogen compounds. (K1, K2 & K3)
- 2.5 Transition elements: General characteristics, Ti, V, Cr, Mn and Fe group elements. (K1, K2 & K3)
- 2.6 Inner transition elements: Spectral and magnetic properties, redox chemistry, analytical applications. (K1, K2, K3 & K4)

## Unit III

- 3.1 Coordination chemistry - isomerism, Valence Bond Theory (VBT). (K1 & K2)
- 3.2 Crystal Field Theory - energy level diagrams in various crystal fields, CFSE, applications of CFT, Jahn-Teller distortion. (K1, K2 & K3)
- 3.3 MOT - evidences,  $\sigma$  &  $\pi$  - bonding in complexes - construction of molecular orbital diagrams. (K1, K2 & K3)
- 3.4 Electronic spectra of transition metal complexes: spectroscopic term symbols, selection rules, Orgel diagrams, charge-transfer spectra. (K1, K2 & K3)
- 3.5 Spectral and magnetic properties of transition metal complexes. (K1, K2 & K3)
- 3.6 Reaction mechanisms: kinetic and thermodynamic stability, substitution reactions. (K1, K2 & K3)

## Unit IV

- 4.1 Organometallic compounds: Synthesis, bonding and structure, and reactivity. Cages and metal clusters. (K1, K2 & K3)
- 4.2 18-Electron rule: Metal-alkyl, metal-carbonyl, metal-olefin and metal-carbene complexes and metallocenes. Fluxionality in organometallic complexes. (K1, K2, K3 & K4)

- 4.3 Types of organometallic reactions: Homogeneous catalysis - hydrogenation, hydroformylation, acetic acid synthesis, metathesis and olefin oxidation. (K1, K2 & K3)
- 4.4 Heterogeneous catalysis - Fischer-Tropsch reaction, Ziegler-Natta polymerization. (K1, K2 & K3)
- 4.5 Bioinorganic chemistry: Photosystems, porphyrins, metallo enzymes, oxygen transport, nitrogen fixation, metal complexes in medicine. (K1, K2 & K3)
- 4.6 Electron-transfer reactions - ISM and OSM, electron transfer in biological systems. (K1, K2, K3 & K4)

#### Unit V

- 5.1 Characterization of inorganic compounds: By IR, Raman, UV-Vis and MS. (K1, K2, K3 & K4)
- 5.2 Characterization of inorganic compounds: By NMR, EPR, Mössbauer and NQR. (K1, K2, K3 & K4)
- 5.3 Microscopic techniques - optical, electron and scanning probe techniques. (K1, K2 & K3)
- 5.4 Electro analytical methods - polarography, cyclic voltammetry, ion-selective electrodes. Thermo analytical methods. (K1, K2, K3 & K4)
- 5.5 Nuclear chemistry: Radioactivity - decay processes, half-life of radioactive elements, nuclear reactions, fission and fusion. (K1, K2 & K3)
- 5.6 Radio-analytical techniques and activation analysis. (K1, K2 & K3)

## SEMESTER II

### PICHD20 - IEP - WATER CHEMISTRY

<b>Year:</b> I <b>SEM:</b> II	<b>Course Code</b> PICHD20	<b>Title of the Course</b> Water Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W</b> Own Pace	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--	------------------------	---------------------	---------------------

#### Learning Objectives:

- To gain a thorough knowledge on the properties of water, water quality monitoring methods and water pollutants.
- To understand the various waste water treatment methods.

#### Course Outcomes:

The Learners will be able to

1. Explain the physical and chemical properties of water.
2. Describe the instruments used for water quality monitoring.
3. Examine the physical, chemical and biological pollutants in water.
4. Demonstrate the treatment methods used for recycling of waste water.
5. Explain the policies and laws related to water in Indian constitution.

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

H-High (3), M-Moderate (2), L-Low (1)

#### Unit I

- 1.1 Elements, radicals, and compounds. (K1 & K2)
- 1.2 Potable drinking water. (K1 & K2)
- 1.3 Sources of water - hardness, definition, types of hardness - temporary & permanent. (K1 & K2)

- 1.4 Chemical water analysis - hydrogen ion concentration and pH, gas solubility. (K1, K2, K3 & K4)
- 1.5 Alkalinity - colloids & coagulation. (K1, K2, K3 & K4)
- 1.6 Organic compounds - organic matter in waste water. (K1 & K2)

## **Unit II**

- 2.1 Boiler feed water - requirements - formation of deposits in steam boilers and heat exchangers. (K1, K2 & K3)
- 2.2 Disadvantages - wastage of fuels, decrease in efficiency and boiler explosion. (K1, K2 & K3)
- 2.3 Water softening methods - external treatment - ion-exchange method, activated charcoal method & zeolite method. (K1, K2 & K3)
- 2.4 Internal treatment - boiler compounds (phosphate, calgon, carbonate, colloidal methods) - caustic embrittlement. (K1, K2 & K3)
- 2.5 Water quality monitoring instruments - types of water quality instruments - pH meter, conductivity meter, DO meter, turbidity meter, BOD incubator, COD meter. (K1, K2 & K3)
- 2.6 Nephelometer - turbidity, GC - volatile organics, AAS - metal pollutants. (K1, K2 & K3)

## **Unit III**

- 3.1 Water pollution: Physical examination of water - colour, conductivity, temperature, odour, taste, turbidity & hardness. (K1, K2 & K3)
- 3.2 Chemical characterization of water - calcium, magnesium, sodium, potassium, chlorine, sulphate, carbonates, bicarbonates, and solids. (K1, K2 & K3)
- 3.3 Minor elements of water - fluorine, iron, manganese, silica, and nitrogen elements. (K1, K2 & K3)
- 3.4 Biological investigation of water - deoxygenation - dissolved oxygen in water, biological oxygen demand and chemical oxygen demand - algal toxins. (K1, K2, K3 & K4)
- 3.5 Water pollution. (K1 & K2)
- 3.6 Water borne diseases. (K1 & K2)

## **Unit IV**

- 4.1 Introduction - characteristics of waste water - nutrient content and controls - toxicity evaluation. (K1, K2 & K3)
- 4.2 Recovery of aluminium by liquid ion exchangers - removal of iron as its chelated complex with plants. (K1, K2 & K3)
- 4.3 Treatment of waste water for reuse - membrane based filtration - microfiltration, ultra filtration, desalinization of brackish water - reverse osmosis, nanofiltration, electrolysis, electro dialysis and electro oxidation - method, diagram and advantages. Biosensors in water monitoring. (K1, K2, K3 & K4)
- 4.4 Recycle and reuse of treated waste water - recycling and reuse of distillery waste water. (K1, K2 & K3)
- 4.5 Recycling of waste water - status in India - reuse of water. (K1, K2, K3, K4 & K5)
- 4.6 Health guidelines before reuse of waste water - health protection - recycled water - use in metropolitan cities. (K1, K2, K3, K4 & K5)

## Unit V

- 5.1 Water and the Constitution of India. (K1, K2 & K3)
- 5.2 Inter-state Water Disputes Act-1956 - difficulties and solution. The Cauvery Water Dispute. . (K1, K2 & K3)
- 5.3 The story of the National Water Policy-1987. (K1, K2, K3 & K4)
- 5.4 The Water Prevention and Control of Pollution Act-2003 and the National Water Policy-2012. (K1, K2, K3 & K4)
- 5.5 National Rain-fed Authority, Inland Waterways Authority of India, Central Ground Water Authority, Central Pollution Control Board. (K1, K2, K3, K4 & K5)
- 5.6 National Water Resources Council, Integrated Watershed Management Programme, National Rural Drinking Water Programme. (K1, K2, K3, K4, K5 & K6)

**SEMESTER III**  
**PCCHJ20 - SYNTHETIC ORGANIC CHEMISTRY**

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PCCHJ20	<b>Title of the Course</b> Synthetic Organic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

**Learning Objectives:**

- To understand the importance of different organic reagents in organic synthesis.
- To get exposed to the mechanisms of retro synthesis and their applications.
- To learn methods of asymmetric synthesis and resolution, transition metal catalyzed reactions, chemoselectivity, regioselectivity, stereoselectivity and diastereoselectivity.

**Course Outcomes:**

The Learners will be able to

1. Analyze and evaluate the concepts of retrosynthesis, disconnection approach and protection of common functional groups and apply them in synthesizing target molecules.
2. Evaluate the methods of asymmetric synthesis and resolution.
3. Analyze the preparation and uses of selected organic reagents.
4. Evaluate the role of PTC in organic synthesis.
5. Appraise the role of transition metals in selected named reactions and plan chemo selective, regioselective and stereoselective named reactions.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	L	H	H	H
CO2	H	M	L	H	H	H
CO3	H	M	L	H	H	H
CO4	H	M	L	H	H	H
CO5	H	M	L	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L- Low (1)**

**Unit I****(12 Hours)**

- 1.1 Retrosynthesis, disconnection approach, synthons, linear and convergent synthesis. (K1, K2, K3, K4, K5 & K6)
- 1.2 One group C-X disconnection and two group C-X disconnection. (K1, K2, K3, K4, K5 & K6)
- 1.3 Umpolung of reactivity, protection of functional groups (hydroxyl, amino, carbonyl and carboxyl groups). (K1, K2, K3, K4, K5 & K6)
- 1.4 Synthesis of target molecules based on disconnection and synthon approach - aspirin, 3-methyl-1-pentene, methyl-3-phenyl butanoate. (K1, K2, K3, K4, K5 & K6)
- 1.5 Synthesis of target molecules based on disconnection and synthon approach - cis-1-isopropyl-2-benzyl ethylene and 2,6-dibromoaniline. (K1, K2, K3, K4, K5 & K6)
- 1.6 Synthesis of target molecules based on disconnection and synthon approach - reserpine, saccharine, paracetamol, morpholine. (K1, K2, K3, K4, K5 & K6)

**Unit II****(12 Hours)**

- 2.1 Prostereoisomerism - prochirality, topicity of ligands and faces - homotopic. (K1, K2, K3, K4 & K5)
- 2.2 Heterotopic and enantiotopic ligands. (K1, K2, K3, K4 & K5)
- 2.3 Asymmetric synthesis, chiral auxiliaries, methods of asymmetric induction, substrate, reagent, and catalyst-controlled reactions - examples. (K1, K2, K3, K4 & K5)
- 2.4 Determination of enantiomeric and diastereomeric excess. (K1, K2, K3, K4 & K5)
- 2.5 Methods of resolution - mechanical separation, formation of diastereomers. (K1, K2, K3, K4 & K5)
- 2.6 Methods of resolution - chromatography and biochemical transformation. (K1, K2, K3, K4 & K5)

**Unit III****(12 Hours)**

- 3.1 Organolithium compounds - preparation, reactions and uses (resemblance with Grignard reagent, difference from Grignard reagent). (K1, K2, K3, K4, K5 & K6)
- 3.2 Organosilanes - synthetic applications of trimethyl silyl iodide, trimethyl silyl chloride, trimethyl silyl cyanide and trimethyl silyl triflate. (K1, K2, K3, K4, K5 & K6)
- 3.3 Uses of the following reagents - DCC, 1,3-dithiane (Umpolung), Lithium diisopropylamide (LDA). (K1, K2, K3, K4, K5 & K6)
- 3.4 Uses of the following reagents - Diisobutylaluminium hydride (DIBAL), 9-borabicyclo[3.3.1]nonane (9BBN), Gilman's reagent. (K1, K2, K3, K4, K5 & K6)
- 3.5 Preparation and uses of phosphorous ylides. (K1, K2, K3, K4, K5 & K6)
- 3.6 Preparation and uses of nitrogen and sulphur ylides. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(12 Hours)**

- 4.1 Principles and synthetic process involving phase transfer catalysis - nitriles from alkyl halides, benzoyl cyanides from benzoyl chlorides. (K1, K2, K3, K4 & K5)
- 4.2 Preparation of alkyl fluorides from alkyl halides, alcohols from alkyl halides using PTC. (K1, K2, K3, K4 & K5)
- 4.3 Preparation of azides from alkyl halides, sodium alkyl sulphonates from alkyl halides using PTC. (K1, K2, K3, K4 & K5)
- 4.4 Preparation of alkyl nitrates, thiocyanates, cyanates and p-toluenesulphonates from alkyl halides using PTC. (K1, K2, K3, K4 & K5)

4.5 Preparation of aryl ethers and thioethers, esterification using PTC. (K1, K2, K3, K4 & K5)

4.6 Diazotransfer by phase transfer catalyst, dihalocarbenes. (K1, K2, K3, K4 & K5)

#### **Unit V**

**(12 Hours)**

5.1 Transition metal catalyzed reactions - reaction and mechanism of Heck reaction and Suzuki cross coupling reaction. (K1, K2, K3, K4, K5 & K6)

5.2 Reaction and mechanism of carboxymethylation, hydro formylation and epoxide-allylic alcohol rearrangement. (K1, K2, K3, K4, K5 & K6)

5.3 Chemoselectivity - reduction and oxidation - examples, calculation. (K1, K2, K3, K4, K5 & K6)

5.4 Regioselectivity - Birch reduction. (K1, K2, K3, K4, K5 & K6)

5.5 Stereoselectivity - stereoselective Claisen reaction. (K1, K2, K3, K4, K5 & K6)

5.6 Diastereoselective reaction - hydroboration (formation of an alcohol). (K1, K2, K3, K4, K5 & K6)

## SEMESTER III

### PCCHK20 - MOLECULAR SPECTROSCOPY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PCCHK20	<b>Title of the Course</b> Molecular Spectroscopy	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To understand the concepts of spectral techniques and to apply these techniques for the quantitative and structural analysis of organic and inorganic compounds.
- To work out combined spectroscopic problems.

#### Course Outcomes:

The Learners will be able to

- Apply Ultraviolet spectroscopy for the identification of organic compounds and inorganic complexes, and to interpret the IR spectra of organic compounds and inorganic complexes.
- Discuss the different ionization techniques involved in Mass spectroscopy, principle of GC-MS and its advantages over MS, and to elucidate the molecular formulae and structures of unknown compounds using Mass spectroscopy.
- Analyze the splitting pattern in the  $^1\text{H}$ ,  $^{13}\text{C}$ ,  $^{19}\text{F}$  and  $^{31}\text{P}$  NMR spectra for structural determination. Discuss the principle, instrumentation and applications of Mossbauer spectroscopy and analyze the Mossbauer spectra of iron and tin compounds.
- Explain hyper fine splitting in EPR and interpret EPR spectra of simple radicals and complexes, and to explain the electronic spectra for chemical analysis.
- Elaborate on the concepts and theories of microwave, IR, rotational and vibrational Raman, and electronic spectroscopy.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Ultra violet spectroscopy - Woodward-Fieser rules for conjugated dienes, polyenes and alpha, beta unsaturated carbonyl compounds. The effect of steric hindrance to coplanarity - charge transfer spectral absorption. (K1, K2, K3, K4, K5 & K6)
- 1.2 Transitions in transition metal complexes - selection rules for electronic transitions - band widths - nature of electronic transitions in complexes. Auxochrome - types - chromophore concept - types. (K1, K2, K3, K4, K5 & K6)
- 1.3 Applications of UV Spectroscopy. (K1, K2, K3, K4, K5 & K6)
- 1.4 Applications of IR spectroscopy to identify alkane, alkene, alkyne, aromatic compounds, nitrile and aromatic residues. Identification of alcohols, ethers, phenols, amines and carbonyl compounds such as ketones, aldehydes, esters, amides, acids, hetero aromatic compounds, halogen compounds, sulphur compounds, thiocyanates and isothiocyanates, amino acids and amines. (K1, K2, K3, K4, K5 & K6)
- 1.5 Metal-ligand stretching vibrations for metal carbonyls, sulphates, thiocyanides, nitro and nitrito complexes. (K1, K2, K3, K4, K5 & K6)
- 1.6 Applications of IR Spectroscopy - quantitative analysis, qualitative analysis, coordination compounds, hydrogen bonding studies, calculation of force constants and determination of aromaticity. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Mass spectroscopy - ionization techniques such as chemical ionization, electron ionization - ESI, FD, FAB, SIMS and MALDI. (K1, K2, K3, K4 & K5)
- 2.2 Molecular ions, isotope ions, meta-stable peak, secondary ion mass spectroscopy. nitrogen rule and ring rule, fragment ions of odd and even electron types. (K1, K2, K3, K4 & K5)
- 2.3 Rearrangement ions - cleavage patterns - simple and multi center fragmentation. (K1, K2, K3, K4 & K5)
- 2.4 Applications of mass spectra to elucidate molecular formula and structure. (K1, K2, K3, K4 & K5)
- 2.5 McLafferty rearrangement - interpretation of fragmentation pattern of phenols, aldehydes, lactones, nitro compounds, esters, acetals and ketals, hetero aromatic compounds, and sulphides. (K1, K2, K3, K4 & K5)
- 2.6 Introduction to GC-MS and its advantages over MS. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 NMR spectroscopy - introduction - nuclear spin - Larmor frequency, precessional frequency - relaxation process - chemical shift - shielding constants - ring current and aromaticity - shifts for  $^1\text{H}$  and  $^{13}\text{C}$ . (K1, K2, K3, K4, K5 & K6)
- 3.2 Spin-spin interaction - nuclear magnetic double resonance - Nuclear Overhauser Effect (NOE). (K1, K2, K3, K4, K5 & K6)
- 3.3 Applications of  $^1\text{H}$ NMR,  $^{13}\text{C}$ NMR,  $^{31}\text{P}$ NMR ( $\text{HPF}_2$ ,  $\text{H}_3\text{PO}_2$ ,  $\text{H}_3\text{PO}_3$ ,  $\text{H}_3\text{PO}_4$  and  $\text{P}_4\text{S}_3$ ),  $^{19}\text{F}$ NMR ( $\text{ClF}_3$ ,  $\text{ClF}_5$ ,  $\text{SF}_4$  and  $\text{BrF}_5$ ) and their applications to inorganic systems. (K1, K2, K3, K4, K5 & K6)
- 3.4 Mossbauer spectroscopy - Mossbauer effect - recoilless emission and absorption, Doppler effect, hyperfine interaction - chemical isomer shift, quadrupole interaction, and magnetic splitting. (K1, K2, K3, K4, K5 & K6)
- 3.5 Instrumentation - selection of suitable source, limitations. (K1, K2, K3, K4, K5 & K6)

3.6 Interpretation of spectra - bonding and structures of  $\text{Fe}^{2+}$  and  $\text{Fe}^{3+}$  compounds,  $\text{Sn}^{2+}$  and  $\text{Sn}^{4+}$  compounds and detection of oxidation states and in-equivalent MB atoms, applications of Mossbauer spectroscopy. (K1, K2, K3, K4, K5 & K6)

**Unit IV** **(15 Hours)**

4.1 ESR - principle, origin of an EPR signal, derivative spectra, g value - factors affecting the magnitude of g values, anisotropy, hyperfine splitting - hyperfine coupling constant, relative intensities of EPR signals. (K1, K2, K3, K4 & K5)

4.2 Interpretation of the spectra of simple carbon centered free radicals, hyperfine splitting in Cu and Mn compounds, zero field splitting and Kramer's degeneracy. (K1, K2, K3, K4 & K5)

4.3 Electron delocalization - Mc Connell's equation, line width in solid state EPR, applications of ESR. (K1, K2, K3, K4 & K5)

4.4 Photoelectron spectroscopy - photo electric effect, UV and X-ray PES, Koopmans' theorem, fine structure in PES. (K1, K2, K3, K4 & K5)

4.5 Interpretation of photo electron spectra of  $\text{H}_2$ ,  $\text{N}_2$ ,  $\text{O}_2$ , CO, NO,  $\text{N}_2\text{O}$ ,  $\text{H}_2\text{O}$ , azide, HCl and  $\text{NH}_3$ . (K1, K2, K3, K4 & K5)

4.6 Electron Spectroscopy for Chemical Analysis - applications of ESCA. (K1, K2, K3, K4 & K5)

**Unit V** **(15 Hours)**

5.1 Rotational spectroscopy: Classification of molecules, molecular energy levels, the rigid rotator, selection rules, intensity of spectral lines, effect of isotopic substitution. (K1, K2, K3, K4, K5 & K6)

5.2 Non rigid rotator, microwave spectra of polyatomic molecules. (K1, K2, K3, K4, K5 & K6)

5.3 Vibrational spectroscopy: Vibrational energy of diatomic molecules, simple harmonic oscillator, selection rules, zero-point energy, force constant and bond strength. (K1, K2, K3, K4, K5 & K6)

5.4 Anharmonicity, Morse potential energy diagram, Franck Condon principle, the diatomic vibrating rotator, P, Q, R, branches, the vibration-rotation spectrum of CO. (K1, K2, K3, K4, K5 & K6)

5.5 Breakdown of Born-Oppenheimer approximation, vibrations of polyatomic molecules, normal modes of vibration, overtones, hot bands, Fermi resonance. (K1, K2, K3, K4, K5 & K6)

5.6 Raman: Classical and quantum theories of Raman effect, pure rotational, vibrational and vibrational-rotational Raman spectra, selection rules, stokes and anti-stokes lines, mutual exclusion principle. (K1, K2, K3, K4, K5 & K6)

Combined spectroscopic problems (organic and inorganic compounds)

## SEMESTER III

### PCCHL20 - ELECTRO CHEMISTRY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PCCHL20	<b>Title of the Course</b> Electro Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To have an in-depth knowledge on the theory of strong electrolytes.
- To learn the principles and techniques involved in polarography, cyclic voltammetry, amperometric and potentiometric titrations.
- To gain knowledge regarding electrode-electrolytic interface.
- To study the principle and functioning of fuel cells and electrochemical sensors.

#### Course Outcomes:

The Learners will be able to

1. Examine the concepts and theories of strong electrolytes and verify the Debye Huckle Onsager equation.
2. Explain the principle and application of various analytical techniques.
3. Compare the structure of double layers.
4. Examine and predict the kinetics of electrode reaction of single step and multistep and discuss the theories and mechanism of corrosion and passivation.
5. Classify the types of fuel cells and ion selective electrodes.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(12 Hours)**

- 1.1 Activity and activity coefficients, mean ionic activity and mean ionic activity coefficient, concept of ionic strength, related problems. (K1, K2, K3, K4, K5 & K6)
- 1.2 Debye Huckel theory of strong electrolytes - electrolytic conductance - interionic attraction - ionic atmosphere. (K1, K2, K3, K4, K5 & K6)
- 1.3 Determination of activity coefficient by electro chemical method. (K1, K2, K3, K4, K5 & K6)
- 1.4 Derivation of Debye Huckel limiting law, qualitative and quantitative verification. (K1, K2, K3, K4, K5 & K6)
- 1.5 Debye Huckel limiting law at appreciable concentrations of electrolytes. (K1, K2, K3, K4, K5 & K6)
- 1.6 Derivation of Debye Huckel Onsager equation - experimental verification and limitations. (K1, K2, K3, K4, K5 & K6)

**Unit II****(12 Hours)**

- 2.1 Polarography - theory, apparatus, DME, diffusion, kinetic and catalytic currents, current for reversible and irreversible systems, qualitative and quantitative application to inorganic systems. (K1, K2, K3, K4 & K5)
- 2.2 Amperometric titrations - theory, apparatus, types of titration curves, applications. (K1, K2, K3, K4 & K5)
- 2.3 Biamperometric titrations - successive titrations, indicator electrodes, applications. (K1, K2, K3, K4 & K5)
- 2.4 Cyclic Voltammetry - theory, instrumentation, application to inorganic systems. (K1, K2, K3, K4 & K5)
- 2.5 Potentiometry - potentiometric titrations, equivalence point potential for  $\text{Fe}^{2+}/\text{Fe}^{3+}$ - $\text{MnO}_4^-$ ,  $\text{H}^+/\text{Mn}^{2+}$  systems. (K1, K2, K3, K4 & K5)
- 2.6 Potentiometric titrations - determination of concentration of the species at the equivalence point. (K1, K2, K3, K4 & K5)

**Unit III****(12 Hours)**

- 3.1 Electrode-electrolyte interface, adsorption at electrified interface, electrical double layer. (K1, K2, K3, K4, K5 & K6)
- 3.2 Electro capillary phenomenon - Lippmann equation. (K1, K2, K3, K4, K5 & K6)
- 3.3 Structure of double layers - Helmholtz Perrin, Gouy-Chapman, and Stern model of electrical double layers. (K1, K2, K3, K4, K5 & K6)
- 3.4 Diffusion - Fick's law of diffusion - factors affecting Fick's law of diffusion - significance. (K1, K2, K3, K4, K5 & K6)
- 3.5 Membrane potential - current across the biological membrane - axon membrane. (K1, K2, K3, K4, K5 & K6)
- 3.6 Electrokinetic phenomena - electroosmosis, electrophoresis, sedimentation potential and streaming potential. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(12 Hours)**

- 4.1 Over potential - mechanism of the hydrogen and oxygen evolution reaction. Rates of simple electrode reactions - elementary electron - electrode process. (K1, K2, K3, K4 & K5)

- 4.2 Butler-Volmer equation for single step electron transfer reaction, significance of electron exchange current density and symmetry factor. (K1, K2, K3, K4 & K5)
- 4.3 Rates of multistep electrode reactions, Butler-Volmer equation for a multistep reaction, transfer coefficient and its significance. (K1, K2, K3, K4 & K5)
- 4.4 Corrosion of metals - theories of corrosion - types of corrosion - Pourbaix diagram (K1, K2, K3, K4 & K5)
- 4.5 Passivation of metals - Flade Potential - Evan's diagram (K1, K2, K3, K4 & K5)
- 4.6 Electro deposition - principle and applications, electrochemical reactions of technological interest. (K1, K2, K3, K4 & K5)

## Unit V

(12 Hours)

- 5.1 Fuel cells - efficiency, types of fuel cells - alkaline fuel cell, phosphoric acid, high temperature and solid polymer electrolyte. (K1, K2, K3, K4, K5 & K6)
- 5.2 Kinetics of fuel cell, general development of fuel cell technology. (K1, K2, K3, K4, K5 & K6)
- 5.3 Electrochemical sensors - ion selective electrodes - problems with ion selective electrodes. (K1, K2, K3, K4, K5 & K6)
- 5.4 Chemically modified electrodes - gas sensing electrodes. (K1, K2, K3, K4, K5 & K6)
- 5.5 Principle and working of enzyme electrodes. (K1, K2, K3, K4, K5 & K6)
- 5.6 Sensors based on modified metal-oxide-semiconductor field-effect transistors (MOSFET) - wall jet ring disc electrodes (WJRDE). (K1, K2, K3, K4, K5 & K6)

## SEMESTER III

### PECHE20 - ELECTIVE III A: ANALYTICAL CHEMISTRY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PECHE20	<b>Title of the Course</b> Analytical Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To study in detail the different types of chromatographic techniques and their applications.
- To give an in-depth knowledge on environmental chemistry and its impacts.
- To understand the applications of computers in chemistry.

#### Course Outcomes:

The Learners will be able to

1. Compare different thermal methods of analysis and explain their applications in material science.
2. Elaborate the principle, instrumentations of the Gas, HPLC and SCF chromatographic techniques and their applications.
3. Examine the identification of metal ions using AAS and photo acoustic spectroscopy.
4. Solve simple problems in chemistry using 'C' program.
5. Analyze the importance of Green Chemistry and its impact on the sustainable environment and the quality of water.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	L	H	H	H
CO2	H	M	L	H	H	H
CO3	H	M	L	H	H	H
CO4	H	M	L	H	H	H
CO5	H	M	L	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Thermal Analysis - Thermo Gravimetric Analysis (TGA) - principle, instrumentation, thermogravimetric curves of  $\text{CaC}_2\text{O}_4 \cdot \text{H}_2\text{O}$ ,  $\text{MgCr}_2\text{O}_4$ ,  $\text{Hg}_2\text{CrO}_4$ ,  $\text{Ag}_2\text{CrO}_4$ ,  $\text{AgNO}_3$  and  $\text{Cu}(\text{NO}_3)_2$ . (K1, K2, K3, K4, K5 & K6)
- 1.2 Factors affecting TGA, applications of TGA. (K1, K2, K3, K4, K5 & K6)
- 1.3 DTG - principles, comparison of DTG & TGA. (K1, K2, K3, K4, K5 & K6)
- 1.4 Differential Thermal Analysis (DTA) - principle, instrumentation, simultaneous TGA and DTA curves and applications. (K1, K2, K3, K4, K5 & K6)
- 1.5 Differential Scanning Calorimetry (DSC) - principle, instrumentation and applications. (K1, K2, K3, K4, K5 & K6)
- 1.6 Thermometric titrations - principle, instrumentation and applications. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Chromatographic techniques: Gas Chromatography, principle, types, instrumentation with block diagram - carrier gas, sample injection system, column, thermal compartment, detectors, recorder. (K1, K2, K3, K4 & K5)
- 2.2 Applications of GC. ((K1, K2, K3, K4 & K5)
- 2.3 High Pressure Liquid Chromatography (HPLC) - principle, characteristics of HPLC. (K1, K2, K3, K4 & K5)
- 2.4 Instrumentation, applications, comparison of HPLC with GLC. (K1, K2, K3, K4 & K5)
- 2.5 Super Critical Fluid Chromatography (SCFC) - principle, properties, instrumentation. (K1, K2, K3, K4 & K5)
- 2.6 Comparison with other types of chromatography, super critical fluid extraction and applications. (K1, K2, K3, K4 & K5)\

**Unit III****(15 Hours)**

- 3.1 Atomic absorption spectrometry - principle, difference between AAS and AES, measurement of absorption. (K1, K2, K3, K4, K5 & K6)
- 3.2 Instrumentation with block diagram - radiation source, atomization unit, oxidizing agents, flame and non-flame atomizer, burners, monochromators, detectors, and amplifier and readout devices. (K1, K2, K3, K4, K5 & K6)
- 3.3 Interferences in AAS - spectral, chemical, ionization, dissociation of metal compounds, effect of solvent. (K1, K2, K3, K4, K5 & K6)
- 3.4 Differences between atomic absorption and emission methods, advantages and disadvantages of atomic emission spectroscopy, advantages of AAS over flame emission spectroscopy, disadvantages of AAS. (K1, K2, K3, K4, K5 & K6)
- 3.5 Applications of AAS, some typical analysis like determination of metals like Na, K, Ca and Mg in blood serum, lead in petrol, metals in food stuff. (K1, K2, K3, K4, K5 & K6)
- 3.6 Photo acoustic spectroscopy: Principle, instrumentation with block diagram and applications. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Computers in Chemistry - introduction to computers - types of computers, hardware, software, types of software and programming languages - implementation and uses. (K1, K2, K3, K4 & K5)
- 4.2 C-Programming - definition, types of variables with examples, constant - definition, types with examples, C-operators - classification with examples. (K1, K2, K3, K4 & K5)
- 4.3 Input and output functions, control statement, loop, go to statement - functions, arrays and pointers. (K1, K2, K3, K4 & K5)
- 4.4 Calculation of pH, solubility product, calculation of bond energy using Born-Landé equation. (K1, K2, K3, K4 & K5)
- 4.5 Internet: Introduction to internet service providers in India, terms used in internet, www, http, html, TCP/IP band width, dialup service. (K1, K2, K3, K4 & K5)
- 4.6 ISDN and search engines. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Environmental chemistry: Water quality standards - BOD, COD, TDS, TSS & TS. (K1, K2, K3, K4, K5 & K6)
- 5.2 Analysis of waste water and its treatment. (K1, K2, K3, K4, K5 & K6)
- 5.3 Salinity of water and its treatment - Reverse Osmosis. (K1, K2, K3, K4, K5 & K6)
- 5.4 Toxic chemicals in environment - toxicity of mercury, lead, chromium, arsenic. (K1, K2, K3, K4, K5 & K6)
- 5.5 Green chemistry - principle, conditions followed in green synthesis. (K1, K2, K3, K4, K5 & K6)
- 5.6 Carbon-carbon bond formation in aldol condensations like silyl enol ethers in aqueous media, solid phase, supercritical water and asymmetric aldol condensation. (K1, K2, K3, K4, K5 & K6)

**SEMESTER III**  
**PECHF20 - ELECTIVE III B: GREEN CHEMISTRY**

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PECHF20	<b>Title of the Course</b> Green Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

**Learning Objectives:**

- To understand the goals and principles of green chemistry.
- To explain the green reactions.
- To understand the good laboratory practices and designing of green synthesis.
- To learn selected green preparations.
- To analyze the future trends in green chemistry.

**Course Outcomes:**

The Learners will be able to

1. Explain the goals and progress of green chemistry.
2. Summarize the principle of green chemistry and green reactions.
3. Discuss the good laboratory practices and designing of green synthesis, and to explain the mechanism and applications of certain named reactions and rearrangements.
4. Explain selected green preparations.
5. Analyze the future trends in green chemistry.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	M	H	H	H
CO2	H	M	M	H	H	H
CO3	H	M	M	H	H	H
CO4	H	M	M	H	H	H
CO5	H	M	M	H	H	H

CO	PO					
	1	2	3	4	5	6

CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Green chemistry - definition, need for green chemistry. (K1, K2, K3, K4, K5 & K6)
- 1.2 Goals of green chemistry, the roots of innovation and its limitations. (K1, K2, K3, K4, K5 & K6)
- 1.3 Progress of green chemistry and planning a green synthesis in a chemical laboratory. (K1, K2, K3, K4, K5 & K6)
- 1.4 Percentage atom utilization, atom economy. (K1, K2, K3, K4, K5 & K6)
- 1.5 Evaluating the type and selection of starting materials. (K1, K2, K3, K4, K5 & K6)
- 1.6 Biocatalysts - production of bulk and fine chemicals by microbial fermentation. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Principles of green chemistry - twelve principles of green chemistry. (K1, K2, K3, K4 & K5)
- 2.2 Green reactions – addition and elimination reactions. (K1, K2, K3, K4 & K5)
- 2.3 Green reactions - substitution reactions. (K1, K2, K3, K4 & K5)
- 2.4 Concept of selectivity - chemoselectivity and regioselectivity. (K1, K2, K3, K4 & K5)
- 2.5 Enantioselectivity and diastereoselectivity. (K1, K2, K3, K4 & K5)
- 2.6 Green solvents - definition and uses. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Good laboratory practices - sampling preparation for analysis. (K1, K2, K3, K4, K5 & K6)
- 3.2 Equipment & glass wares - selection, suitability, cleaning and drying. (K1, K2, K3, K4, K5 & K6)
- 3.3 Designing a green synthesis - choice of starting materials (reagents, catalysts, solvents) (K1, K2, K3, K4, K5 & K6)
- 3.4 Mechanism and applications of Barbier and Barton reactions. (K1, K2, K3, K4, K5 & K6)
- 3.5 Mechanism and applications of Cannizzaro reaction. (K1, K2, K3, K4, K5 & K6)
- 3.6 Mechanism and applications of Claisen rearrangement and Baker-Venkataraman rearrangements. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Green preparations - aqueous phase reactions (hydrolysis, iodoform). (K1, K2, K3, K4 & K5)
- 4.2 Solid state reactions (phenyl benzoate). (K1, K2, K3, K4 & K5)
- 4.3 Photochemical reactions (benzopinacol, conversion of trans-stilbene into cis-stilbene). (K1, K2, K3, K4 & K5)
- 4.4 PTC catalyzed reactions (phenyl isocyanide, flavone). (K1, K2, K3, K4 & K5)
- 4.5 Microwave assisted reactions - Hofmann elimination and esterification. (K1, K2, K3, K4 & K5)
- 4.6 Microwave assisted reactions – saponification, preparation of Schiff's bases. (K1, K2, K3, K4 & K5)

## Unit V

(15 Hours)

- 5.1 Future trends in green chemistry - green nanosynthesis (biosynthesis of nanoparticles using plant extracts). (K1, K2, K3, K4, K5 & K6)
- 5.2 Green analytical methods - enzymatic transformation (ethanol, benzoin). (K1, K2, K3, K4, K5 & K6)
- 5.3 Green polymer chemistry - polymer from renewable resources. (K1, K2, K3, K4, K5 & K6)
- 5.4 Redox reagents and green catalysts. (K1, K2, K3, K4, K5 & K6)
- 5.5 Proliferation of solvent-less reactions and biomimetic. (K1, K2, K3, K4, K5 & K6)
- 5.6 Combinational green chemistry, green chemistry in sustainable developments. (K1, K2, K3, K4, K5 & K6)

## SEMESTER III

### PICHE20 - IEP - CSIR-NET PREPARATORY COURSE IN ORGANIC CHEMISTRY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PICHE20	<b>Title of the Course</b> CSIR-NET Preparatory Course in Organic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W</b> Own Pace	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	---	------------------------------	---	---------------------------	---------------------	---------------------

#### Learning Objective:

- To apply the theories, concepts, processes and principles of organic chemistry to qualify UGC-CSIR and other competitive examinations.

#### Course Outcomes:

The Learner will be able to

- Evaluate and apply the theories, concepts, processes, and principles of stereochemistry to qualify UGC-CSIR and other competitive examinations.
- Appraise the reaction intermediates and named reactions in organic chemistry to qualify UGC-CSIR and other competitive examinations.
- Examine the organic transformations and asymmetric synthesis to qualify UGC-CSIR and other competitive examinations.
- Evaluate the pericyclic reactions and applications of heterocyclic compounds to qualify UGC-CSIR and other competitive examinations.
- Examine the natural product chemistry to qualify UGC-CSIR and other competitive examinations.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

H-High (3), M-Moderate (2), L-Low (1)

## Unit I

- 1.1 IUPAC nomenclature of organic molecules including regio and stereo isomers. (K1, K2, K3, K4, K5 & K6)
- 1.2 Principles of stereochemistry: Configurational and conformational isomerism in acyclic and cyclic compounds. (K1, K2, K3, K4, K5 & K6)
- 1.3 Stereogenicity, stereoselectivity. (K1, K2, K3, K4, K5 & K6)
- 1.4 Enantioselectivity, diastereoselectivity. (K1, K2, K3, K4, K5 & K6)
- 1.5 Asymmetric induction. (K1, K2, K3, K4, K5 & K6)
- 1.6 Aromaticity: benzenoid and non-benzenoid compounds - generation and reactions. (K1, K2, K3, K4, K5 & K6)

## Unit II

- 2.1 Organic reactive intermediates: Generation, stability and reactivity of carbocations, carbanions, free radicals. (K1, K2, K3, K4, K5 & K6)
- 2.2 Radical anions, radical cations, carbenes, benzyne and nitrenes - generation, stability and reactivity. (K1, K2, K3, K4, K5 & K6)
- 2.3 Organic reaction mechanisms involving addition, elimination and substitution reactions with electrophilic, nucleophilic and radical species. (K1, K2, K3, K4, K5 & K6)
- 2.4 Determination of reaction pathways. (K1, K2, K3, K4, K5 & K6)
- 2.5 Common named reactions (C-C and C=C formation). (K1, K2, K3, K4, K5 & K6)
- 2.6 Rearrangements (anionotropic, cationotropic, intermolecular and intramolecular) - applications in organic synthesis. (K1, K2, K3, K4, K5 & K6)

## Unit III

- 3.1 Organic transformations and reagents: Functional group interconversion including oxidations and reductions. (K1, K2, K3, K4, K5 & K6)
- 3.2 Common catalysts and reagents (organic, inorganic, organometallic and enzymatic). (K1, K2, K3, K4, K5 & K6)
- 3.3 Chemo, regio and stereoselective transformations. (CAN, Grignard reagent, Gilman reagent, PCC, DCC, 9BBN, BBQ and other reagents) (K1, K2, K3, K4, K5 & K6)
- 3.4 Concepts in organic synthesis: Retrosynthesis, disconnection, synthons, linear and convergent synthesis, umpolung of reactivity and protecting groups. (K1, K2, K3, K4, K5 & K6)
- 3.5 Asymmetric synthesis: Chiral auxiliaries, methods of asymmetric induction - substrate, reagent and catalyst-controlled reactions. (K1, K2, K3, K4, K5 & K6)
- 3.6 Determination of enantiomeric and diastereomeric excess, enantio-discrimination. Resolution - optical and kinetic. (K1, K2, K3, K4, K5 & K6)

## Unit IV

- 4.1 Pericyclic reactions - electrocycloaddition, cycloaddition, sigmatropic rearrangements and other related concerted reactions. (K1, K2, K3, K4, K5 & K6)
- 4.2 Principles and applications of photochemical reactions in organic chemistry. (K1, K2, K3, K4, K5 & K6)
- 4.3 Synthesis and reactivity of common heterocyclic compounds containing one or two heteroatoms (O, N, S) - oxirane, azirane. (K1, K2, K3, K4, K5 & K6)
- 4.4 Aziridine, thioepoxides. (K1, K2, K3, K4, K5 & K6)
- 4.5 Pyrrole, furan, thiophene. (K1, K2, K3, K4, K5 & K6)
- 4.6 Pyridine, pyran. (K1, K2, K3, K4, K5 & K6)

## Unit V

- 5.1 Chemistry of natural products - carbohydrates. (K1, K2, K3, K4, K5 & K6)
- 5.2 Proteins and peptides, fatty acids. (K1, K2, K3, K4, K5 & K6)
- 5.3 Nucleic acids, terpenes. (K1, K2, K3, K4, K5 & K6)
- 5.4 Steroids and alkaloids. (K1, K2, K3, K4, K5 & K6)
- 5.5 Biogenesis of terpenoids and alkaloids. (K1, K2, K3, K4, K5 & K6)
- 5.6 Structure determination of organic compounds by IR, UV-Vis,  $^1\text{H}$  and  $^{13}\text{C}$  NMR and Mass spectroscopic techniques. (K1, K2, K3, K4, K5 & K6)

## SEMESTER III

### PICHF20 - IEP - FORENSIC CHEMISTRY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PICHF20	<b>Title of the Course</b> Forensic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--	---------------------	---------------------	---------------------

#### Learning Objectives:

- To impart knowledge on the principles and practical applications of various immunochemical and forensic analysis.
- To understand and perform forensic analysis using physical, biochemical and instrumental methods of analysis.

#### Course Outcomes:

The Learners will be able to

1. Explain the need, scope, and functions of forensic science.
2. Discuss the mode of action and chemical properties of poisons.
3. Explain the isolation, sample preparation and identification of forensic samples.
4. Outline the qualitative and quantitative determination of forensic samples by analytical methods.
5. Demonstrate the process of lie detection and fingerprint detection.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

#### Unit I

- 1.1 History of development of forensic science in India. (K1, K2 & K3)
- 1.2 Historical aspects of forensic science. (K1, K2 & K3)
- 1.3 Definitions and concepts of forensic science. (K1, K2, K3 & K4)
- 1.4 Functions of forensic science. (K1, K2 & K3)
- 1.5 Scope of forensic science. (K1, K2 & K3)

1.6 Need of Forensic Frye Case and Daubert Standard. (K1 & K2)

## **Unit II**

2.1 Forensic toxicology - classification of poisons on the basis of physical states. (K1, K2 & K3)

2.2 Corrosive, analgesic, irritant, hypnotic, tranquilizer - mode of action and chemical properties with examples for each type. (K1 & K2)

2.3 Narcotic, stimulants, paralytic, antihistamine - mode of action and chemical properties with examples for each type. (K1 & K2)

2.4 Domestic food poisoning - mode of action and chemical properties with examples for each type. (K1, K2 & K3)

2.5 Industrial food poisoning - mode of action and chemical properties with examples for each type. (K1, K2 & K3)

2.6 Study of common poisons - signs and symptoms of As, Pb, Hg, and cyanide poisoning. (K1, K2 & K3)

## **Unit III**

3.1 Analytical chemistry in forensic science. (K1, K2 & K3)

3.2 Analysis of biological stains and materials including blood, semen and saliva (qualitative and quantitative). (K1 & K2)

3.3 Isolation, sample preparation, identification and determination of narcotics - heroin, morphine and cocaine. (K1, K2 & K3)

3.4 Isolation, sample preparation, identification and determination of stimulants - amphetamines and caffeine. (K1 & K2)

3.5 Isolation, sample preparation, identification and determination of depressants - benzodiazepines, barbiturates and mandrax. (K1 & K2)

3.6 Isolation, sample preparation, identification, and determination of hallucinogens - LSD and cannabis. (K1 & K2)

## **Unit IV**

4.1 Physical and chemical methods of analysis in forensic science. (K1, K2 & K3)

4.2 Basic principles of non-destructive testing probes including radiography, Xeroradiography. (K1, K2 & K3)

4.3 Basic principles of surface penetration methods (SEM and Laser probes). (K1, K2 & K3)

4.4 Lie detection - introduction, process, merits and demerits. (K1, K2 & K3)

4.5 Chemical analysis of forensic samples - atomic absorption spectroscopy, GC-MS. (K1, K2 & K3)

4.6 Chemical analysis of forensic samples - FT-IR, UV-Visible spectroscopy. (K1, K2 & K3)

## **Unit V**

5.1 Fingerprints - definition, characteristics of fingerprints. (K1 & K2)

5.2 Classification of fingerprints - plain and rolled. (K1, K2 & K3)

5.3 Chemical methods of developing fingerprints, biological basis of fingerprints, formation of ridges. (K1, K2 & K3)

5.4 Application of light source in fingerprint detection. (K1 & K2)

5.5 Latent fingerprints detection by physical methods. (K1 & K2)

5.6 Latent fingerprints detection by chemical methods. (K1 & K2)

## SEMESTER III

### PICHG20 - IEP - RESEARCH METHODOLOGY

<b>Year:</b> II <b>SEM:</b> III	<b>Course Code</b> PICHG20	<b>Title of the Course</b> Research Methodology	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
--	-------------------------------	--	------------------------------	--	---------------------	---------------------	---------------------

#### Learning Objectives:

- To introduce the purpose and importance of research.
- To gain information about the various sources of literature.
- To learn the scientific method of collecting data and to compute statistical parameters to arrive at meaningful conclusions.
- To emphasize the importance of ethics in research and chemical safety.

#### Course Outcomes:

The Learners will be able to

1. Define research and its objectives, illustrate hypothesis testing, and draw the research plan.
2. Carry out literature search offline and online to fix the research problem and illustrate the importance of IF, SCI, h index and i-index.
3. Apply statistical analysis in research methodology.
4. Describe the general format of thesis writing and the research ethics to be followed.
5. Illustrate the safety measures to be taken in handling toxic, inflammable and explosive chemicals.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

## **Unit I**

- 1.1 Scope of research - research methodology - definition of research, purpose of research. (K1, K2 & K3)
- 1.2 Types of research - descriptive vs analytical, applied vs fundamental, quantitative vs qualitative, conceptual vs empirical and other types of research. (K1, K2 & K3)
- 1.3 Research design - planning of research, selection of a problem for research. (K1, K2, K3 & K4)
- 1.4 Research process - steps involved. (K1, K2 & K3)
- 1.5 Problems and hypothesis in research - identification of problems, sources, factors influencing selection of problems. (K1, K2, K3 & K4)
- 1.6 Development and testing of hypothesis. (K1, K2, K3 & K4)

## **Unit II**

- 2.1 Literature search techniques - sources of information, need for reviewing literature. (K1, K2 & K3)
- 2.2 Primary, secondary and tertiary sources - journals, E-journals, journal access, journal abbreviations, chemical abstracts, Beilstein, reviews, monographs, dictionaries, text books. (K1, K2 & K3)
- 2.3 UGC infonet, E-resources. (K1, K2, K3 & K4)
- 2.4 Search engines - Google scholar, chemical industry, Wiki-databases, chemSpider, Science Direct, SciFinder, Scopus, SPN, Reaxys, orbit.com, Thompson innovations. (K1, K2, K3 & K4)
- 2.5 Indices - subject index, substance index, author index, formula index and other indices with examples, searches through structure, knowledge of national and international journals. (K1, K2, K3 & K4)
- 2.6 Impact Factor, Citation-Index, h Index, I-index, SCI Journals. (K1, K2, K3 & K4)

## **Unit III**

- 3.1 Data Analysis - errors in chemical analysis, types of errors, precision and accuracy. (K1, K2, K3 & K4)
- 3.2 Significant figures, measures of central tendency - arithmetic mean, median, mode. (K1, K2, K3 & K4)
- 3.3 Methods of dispersion - standard deviation, co-efficient of variation (discrete series and continuous series). (K1, K2, K3 & K4)
- 3.4 Comparison of results - t- test, F- test and chi square test. (K1, K2, K3 & K4)
- 3.5 Correlation - coefficient of correlation, linear regression - coefficient of regression. (K1, K2, K3 & K4)
- 3.6 Multiple linear regression. (K1, K2, K3 & K4)

## **Unit IV**

- 4.1 Writing a thesis: The general format - page and chapter format - the use of quotations - footnotes and figures - referencing - appendices - references. (K1, K2 & K3)
- 4.2 Research Ethics - academic honesty, intellectual ownership - copy right, royalty. (K1, K2 & K3)
- 4.3 Intellectual property rights and patent law. (K1, K2 & K3)
- 4.4 Plagiarism - responsibility, reproduction of published material and accountability of the researcher, situation that raises ethical issues, freedom and privacy from coercion. (K1, K2 & K3)
- 4.5 Ethics in relation to other people, role of research participant. (K1, K2 & K3)

4.6 Software for detecting plagiarism. (K1, K2 & K3)

## Unit V

5.1 Concepts of chemical safety: Chemical safety and ethical handling of chemicals. (K1, K2, K3 & K4)

5.2 Safe working procedure and protective environment. (K1, K2, K3 & K4)

5.3 Emergency procedure and first aid, laboratory ventilation, safe storage and handling of hazardous chemical. (K1, K2, K3 & K4)

5.4 Procedure for working with substances that pose hazards, flammable or explosive hazards. (K1, K2, K3 & K4)

5.5 Procedures for working with gases at pressures above or below atmosphere. (K1, K2, K3 & K4)

5.6 Safe storage and disposal of waste chemicals, recovery, recycling and reuse of laboratory chemicals. (K1, K2, K3 & K4)

## SEMESTER IV

### PCCHM20 - NATURAL PRODUCTS AND BIOORGANIC CHEMISTRY

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHM20	<b>Title of the Course</b> Natural Products and Bioorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Objectives:

- To impart knowledge on amino acids, peptides and proteins.
- To study in detail the chemistry of nucleic acids and enzymes.

#### Course Outcomes:

The Learners will be able to

1. Examine the synthesis and reactions of selected heterocyclic pigments, nucleic acids, vitamins and alkaloids.
2. Evaluate the biosynthesis and metabolism of lipids, cholesterol and hormones.
3. Explain the metabolic pathway of amino acids and proteins and to analyze the structural aspects of proteins.
4. Elaborate the role and metabolism of nucleic acids, genetic code, transcription and translation.
5. Describe the structure and biological role of enzymes ( $\alpha$ -chymotrypsin) and cofactors.

CO	PSO					
	1	2	3	4	5	6

CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

H-High (3), M-Moderate (2), L-Low (1)

**Unit I****(15 Hours)**

- 1.1 Synthesis and reactions of imidazole, oxazole, thiazole. (K1, K2, K3, K4, K5 & K6)
- 1.2 Pigments - synthesis and reactions of flavones, isoflavones, anthocyanins. (K1, K2, K3, K4, K5 & K6)
- 1.3 Nucleic acids - synthesis and reactions of pyrimidines (cytosine and uracil only) (K1, K2, K3, K4, K5 & K6)
- 1.4 Purines (adenine and guanine only). (K1, K2, K3, K4, K5 & K6)
- 1.5 Vitamins - synthesis of Vitamin A (Reformatsky and Wittig reaction methods only), synthesis of Vitamin B<sub>1</sub> - thiamine. (K1, K2, K3, K4, K5 & K6)
- 1.6 Alkaloids - total synthesis of morphine, quinine and papaverine. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Lipids - classification (K1, K2, K3, K4. & K5)
- 2.2 Chemical properties - saponification, rancidity, oxidation, hydrogenation, dehydration and halogenations reactions - iodine number, saponification number, acetyl number. (K1, K2, K3, K4 & K5)
- 2.3 Synthesis and degradation of neutral lipids - metabolism of lipids - beta oxidation of fatty acids. (K1, K2, K3, K4 & K5)
- 2.4 Biosynthesis of fatty acids. (K1, K2, K3, K4 & K5)
- 2.5 Metabolism of cholesterol, biosynthesis of cholesterol. (K1, K2, K3, K4 & K5)
- 2.6 Biosynthesis of steroid hormones - conversion of cholesterol to progesterone, oestrone and testosterone. (K1, K2, K3, K4, & K5)

**Unit III****(15 Hours)**

- 3.1 Amino acids - metabolism of amino acids - oxidative deamination, transamination reactions and urea cycle. (K1, K2, K3, K4, K5 & K6)
- 3.2 Peptides - synthesis of tripeptide - solid phase peptide synthesis - Merrifield synthesis. (K1, K2, K3, K4, K5 & K6)
- 3.3 Separation and purification of proteins - dialysis, gel filtration and electrophoresis. (K1, K2, K3, K4, K5 & K6)
- 3.4 Structural aspects of proteins - determination of primary structure by end group analysis. (K1, K2, K3, K4, K5 & K6)
- 3.5 Determination of secondary and tertiary structure of proteins by XRD, cryoscopy method and NMR. (K1, K2, K3, K4, K5 & K6)
- 3.6 Biosynthesis of amino acids - phenylalanine, tyrosine and proline only. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Nucleic acids - introduction - types of nucleic acids - structure of nucleosides and nucleotides - DNA and RNA-polynucleotide chain - structural features of DNA and RNA - Watson-Crick Model. (K1, K2, K3, K4 & K5)
- 4.2 Chemical and enzymatic hydrolysis of nucleic acids - DNA sequence determination by chemical and enzymatic methods. (K1, K2, K3, K4 & K5)
- 4.3 DNA metabolism - replication - mechanism - mutation. (K1, K2, K3, K4 & K5)
- 4.4 Transcription - synthesis of RNA and its mechanism. (K1, K2, K3, K4 & K5)
- 4.5 Genetic code - origin and evolution, salient features - Wobble hypothesis. (K1, K2, K3, K4 & K5)
- 4.6 Biosynthesis of proteins (translation). (K1, K2, K3, K4 & K5)

## Unit V

(15 Hours)

- 5.1 Enzyme chemistry - enzyme mechanism of alpha chymotrypsin. (K1, K2, K3, K4, K5 & K6)
- 5.2 Immobilized enzyme technology - enzymes in synthetic organic chemistry. (K1, K2, K3, K4, K5 & K6)
- 5.3 Coenzyme chemistry - prosthetic groups, apo enzymes - structure, biological function and mechanism of reactions catalyzed by coenzyme A and thiamine pyrophosphate. (K1, K2, K3, K4, K5 & K6)
- 5.4 Structure, biological function and mechanism of reactions catalyzed by pyridoxal phosphate and NAD<sup>+</sup>. (K1, K2, K3, K4, K5 & K6)
- 5.5 Structure, biological function and mechanism of reactions catalyzed by NADP and FAD. (K1, K2, K3, K4, K5 & K6)
- 5.6 Structure, biological function and mechanism of reactions catalyzed by lipoic acid and Vitamin B<sub>12</sub> (K1, K2, K3, K4, K5 & K6)

## SEMESTER IV

### PCCHN20 - SOLID STATE CHEMISTRY AND NUCLEAR CHEMISTRY

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHN20	<b>Title of the Course</b> Solid State Chemistry and Nuclear Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Learning Outcomes:

- To know about the structure and properties of solids.
- To gain knowledge on nuclear chemistry and nuclear reactors.

#### Course Outcomes:

The Learners will be able to

1. Sketch the structures of perovskite, CdI, NiAs, spinels, explain electrical, magnetic and optical properties of solids, compare different methods of solid-state reactions and demonstrate selected single crystal growth techniques.
2. Discuss the magnetic properties of nuclides.
3. Describe quark theory and salient features of nuclear models.
4. Illustrate the types of nuclear reactions, explain the applications of radioisotopes in neutron activation analysis, isotope dilution analysis and age determination.
5. Compare the different types of particle detectors, accelerators and explain the knowledge on Nuclear Waste Management.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	M	M	H	H
CO2	H	M	M	M	H	M
CO3	H	L	M	M	H	M
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	M	H	M
CO2	H	H	H	L	M	M
CO3	H	H	H	M	M	H
CO4	H	H	H	M	H	M
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Structure of solids - Miller planes, Miller indices for hexagonal systems, distance between planes. (K1, K2, K3, K4, K5 & K6)
- 1.2 Reciprocal lattice, XRD instrumentation, XRD - analysis of pattern. (K1, K2, K3, K4, K5 & K6)
- 1.3 Structure of perovskite, cadmium iodide, nickel arsenide, spinels and inverse spinels. (K1, K2, K3, K4, K5 & K6)
- 1.4 Diffusion, diffusion co-efficient, diffusion mechanisms - vacancy and interstitial diffusion. (K1, K2, K3, K4, K5 & K6)
- 1.5 Growing single crystals - crystal growth from solution, growth from melt and chemical vapour deposition technique. (K1, K2, K3, K4, K5 & K6)
- 1.6 Electronic properties of solids - Hall Effect and its applications, pyroelectricity, piezo electricity and ferro electricity. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Magnetic properties of solids - hysteresis loss and loops. (K1, K2, K3, K4 & K5)
- 2.2 Types of magnetic behavior - dia, para, ferro, anti-ferro, ferri magnetism - ferrites, garnets. (K1, K2, K3, K4 & K5)
- 2.3 Optical properties of solids - luminescence and phosphors. (K1, K2, K3, K4 & K5)
- 2.4 Lasers - ruby laser, neodymium laser. (K1, K2, K3, K4 & K5)
- 2.5 Solid state electrolyte -  $\beta$ -alumina - application of solid state electrolytes. (K1, K2, K3, K4 & K5)
- 2.6 Solid-state reactions - formation of spinel ( $\text{MgAl}_2\text{O}_4$ ), co-precipitation and sol-gel method ( $\text{LiNbO}_3$ , silica). (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 The quark theory - quarks - classification, mass and charge, quark-quark gluon interaction. (K1, K2, K3, K4, K5 & K6)
- 3.2 The magnetic properties of the nucleus - Bohr magneton, nuclear magneton, the neutron magnetic moment and the structure of the nucleon. (K1, K2, K3, K4, K5 & K6)
- 3.3 The net magnetic moments of the nuclei - the spin I, the magnetic moment  $\mu_I$  and Nordheim rules. (K1, K2, K3, K4, K5 & K6)
- 3.4 Salient feature of the liquid drop model with derivations. (K1, K2, K3, K4, K5 & K6)
- 3.5 Fermi - gas model, collective model. (K1, K2, K3, K4, K5 & K6)
- 3.6 Nuclear reaction - cross-section, Q value, threshold energy and compound nucleus theory. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Bethe's notation, types of nuclear reactions - direct reactions, photonuclear and thermo nuclear reactions. (K1, K2, K3, K4 & K5)
- 4.2 Modes of radioactive decay, nuclear isomerism and isomeric transition, internal conversion. (K1, K2, K3, K4 & K5)
- 4.3 Stellar energy, the nucleosynthesis of light and heavy elements, hydrogen burning, carbon burning, the e, s, r, p and x processes. (K1, K2, K3, K4 & K5)
- 4.4 Separation of isotopes - boron isotope - isotope exchange and laser irradiation. (K1, K2, K3, K4 & K5)

- 4.5 Separation of uranium isotopes - ultracentrifugation and laser irradiation. (K1, K2, K3, K4 & K5)
- 4.6 Analytical applications of radioisotopes as traces - isotope dilution analysis and neutron activation analysis, age determination by tritium and carbon-14 content. (K1, K2, K3, K4 & K5)

#### **Unit V**

**(15 Hours)**

- 5.1 Hot atom chemistry and chemical effect of radioactive decay. (K1, K2, K3, K4, K5 & K6)
- 5.2 Detectors: Cloud chamber, bubble chamber, Geiger-Muller counter, scintillation and Cherenkov counters. (K1, K2, K3, K4, K5 & K6)
- 5.3 Particle accelerators - linear accelerators, cyclotron and synchrotron. (K1, K2, K3, K4, K5 & K6)
- 5.4 India's three stage nuclear power programme - pressurized heavy water reactor, fast breeder reactor, and thorium-based reactor. (K1, K2, K3, K4, K5 & K6)
- 5.5 Reprocessing of spent fuels: Recovery of uranium and plutonium. (K1, K2, K3, K4, K5 & K6)
- 5.6 Nuclear waste management - low level, intermediate level, high level wastes and ultimate disposal. (K1, K2, K3, K4, K5 & K6)

**SEMESTER IV****PCCHO20 - THERMODYNAMICS**

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHO20	<b>Title of the Course</b> Thermodynamics	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---	-------------------------------	--	------------------------------	--------------------------------	-----------------	---------------------	---------------------

**Learning Objectives:**

- To give an in-depth knowledge on thermodynamics.
- To understand the concepts of statistical thermodynamics.
- To give insight into the applications of the M-B, B-E and F-D statistics.

**Course Outcomes:**

The Learners will be able to

1. Determine the partial molar properties, activity and activity coefficient of non-electrolytes, and standard free energies.
2. Illustrate the relationship between microscopic properties of individual atoms and molecules with macroscopic thermodynamic observables and derive the different types of distribution laws.
3. Derive different forms of molecular partition function, heat capacity of solids and explain law of equipartition of energy.
4. Distinguish the nuclear spin states of hydrogen and deuterium, explain electron gas in metals and blackbody radiation, and apply spectroscopic data for statistical thermodynamics.
5. Explain the concept of non-equilibrium thermodynamics, and derive entropy production in chemical reactions and open systems.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Partial molar properties - partial molar free energy - partial molar volume and partial molar heat content - their significance and determination of these quantities - determination of partial molar properties. (K1, K2, K3, K4, K5 & K6)
- 1.2 Chemical potential - variation of chemical potential with temperature and pressure, Duhem Margules equation. (K1, K2, K3, K4, K5 & K6)
- 1.3 Free energy - standard free energy - determination of standard free energies from entropy values, equilibrium constant and ionization method. (K1, K2, K3, K4, K5 & K6)
- 1.4 Fugacity and activity - definition of fugacity, variation of fugacity with temperature and pressure. (K1, K2, K3, K4, K5 & K6)
- 1.5 Concept of activity and activity co-efficient - choice of standard states. (K1, K2, K3, K4, K5 & K6)
- 1.6 Determination of activity and activity co-efficient of non-electrolytes by Henry's distribution law and vapor pressure measurements. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Thermodynamic and mathematical probability - Sterling approximation -Lagrange's method of indeterminate multipliers. (K1, K2, K3, K4 & K5)
- 2.2 Distribution and most probable distributions - distinguishable and indistinguishable particles. (K1, K2, K3, K4 & K5)
- 2.3 Statistical mechanics - Maxwell-Boltzmann Distribution - derivation and applications (K1, K2, K3, K4 & K5)
- 2.4 Bose-Einstein and Fermi Dirac distribution laws - derivations and applications - comparison of the distribution laws. (K1, K2, K3, K4 & K5)
- 2.5 Relation between partition and thermodynamic functions. (K1, K2, K3, K4 & K5)
- 2.6 Different types of ensembles and ensemble averaging. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Partition function - factorization of molecular partition function, partition functions for mixture of gases. (K1, K2, K3, K4, K5 & K6)
- 3.2 Evaluation of the independent molecular partition function - translational, rotational, vibrational partition function. (K1, K2, K3, K4, K5 & K6)
- 3.3 Evaluation of electronic and nuclear partition function. (K1, K2, K3, K4, K5 & K6)
- 3.4 Law of equipartition of energies. (K1, K2, K3, K4, K5 & K6)
- 3.5 Heat capacity of solids - specific heat capacity of solids. (K1, K2, K3, K4, K5 & K6)
- 3.6 Determination of heat capacity of solids at low temperature - Einstein model and Debye model. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Nuclear spin statistics - ortho-para nuclear states. (K1, K2, K3, K4 & K5)
- 4.2 Ortho-para hydrogen, nuclear spin statistics of deuterium. (K1, K2, K3, K4 & K5)
- 4.3 Investigation on system containing indistinguishable particles - electron in metals. (K1, K2, K3, K4 & K5)
- 4.4 Black body radiation - Planck's distribution law, Stefan-Boltzmann law, Wein's law. (K1, K2, K3, K4 & K5)
- 4.5 Application of statistical thermodynamics. (K1, K2, K3, K4 & K5)
- 4.6 Uses of spectroscopic and structural data to calculate thermodynamic functions. (K1, K2, K3, K4 & K5)

## Unit V

(15 Hours)

- 5.1 Non equilibrium thermodynamics: Irreversible thermodynamics - postulates of non-equilibrium thermodynamics. (K1, K2, K3, K4, K5 & K6)
- 5.2 Conservation of mass and energy. (K1, K2, K3, K4, K5 & K6)
- 5.3 Entropy production - entropy production in chemical reactions - entropy flow in open systems. (K1, K2, K3, K4, K5 & K6)
- 5.4 Flux and Force - transformation properties of rates and affinities. (K1, K2, K3, K4, K5 & K6)
- 5.5 Linear laws relative to fluxes and forces - Onsager's reciprocity relation (K1, K2, K3, K4, K5 & K6)
- 5.6 Curie's theorem, relaxation phenomenon. (K1, K2, K3, K4, K5 & K6)

## SEMESTER IV

### PECHG20 - ELECTIVE IV A: ORGANOMETALLIC AND BIOINORGANIC CHEMISTRY

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PECHG20	<b>Title of the Course</b> Organometallic and Bioinorganic Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To expose the students to the principles and reactions involved in Organometallic chemistry.
- To understand the role of catalysts in different types of reactions.
- To have a clear understanding on bioinorganic compounds.

#### Course Outcomes:

The Learners will be able to

1. Explain the preparation, properties, structure and bonding of organometallic complexes and appraise 18 electron rule and EAN rule for metal carbonyls.
2. Explain the mechanism of organometallic reactions, rearrangement reactions of aluminium and tin compounds.
3. Appraise the role of transition metal catalysts in industrial processes.
4. Evaluate the role of oxygen transport, ion transport and electrolytic balance in organisms, and review nitrogen fixation.
5. Elaborate on the biological role of metalloenzymes, and the importance of metals used for diagnosis and treatment of cancer.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	L	H	H	H
CO2	H	M	L	H	H	H
CO3	H	M	L	H	H	H
CO4	H	M	L	H	H	H
CO5	H	M	L	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I****(15 Hours)**

- 1.1 Introduction - 18 electron rule and EAN rule - calculation, capacity - definition. (K1, K2, K3, K4, K5 & K6)
- 1.2 Metal carbonyl complexes and poly nuclear carbonyl complexes - preparation, properties, structure and bonding. (K1, K2, K3, K4, K5 & K6)
- 1.3 Carbonylate ion, carbonyl hydride complex – preparation, properties, structure and bonding. (K1, K2, K3, K4, K5 & K6)
- 1.4 Nitrosyl complex, metal alkyls - preparation and properties, structure and bonding. (K1, K2, K3, K4, K5 & K6)
- 1.5 Carbenes, carbynes and carbides, non-aromatic alkenes and alkyne complexes - preparation and properties. (K1, K2, K3, K4, K5 & K6)
- 1.6 Metallocenes - preparation and properties, structure and bonding. (K1, K2, K3, K4, K5 & K6)

**Unit II****(15 Hours)**

- 2.1 Addition reactions - 1,2 addition to double bonds. (K1, K2, K3, K4 & K5)
- 2.2 Carbonylation and decarbonylation. (K1, K2, K3, K4 & K5)
- 2.3 Oxidative addition reactions, reductive elimination reactions. (K1, K2, K3, K4 & K5)
- 2.4 Substitution reactions of octahedral complexes and their mechanisms. (K1, K2, K3, K4 & K5)
- 2.5 Insertion reaction, rearrangement reactions of aluminium and tin compounds and their mechanisms. (K1, K2, K3, K4 & K5)
- 2.6 Fluxional isomerism - definition, examples and mechanism. (K1, K2, K3, K4 & K5)

**Unit III****(15 Hours)**

- 3.1 Hydrogenation of olefins (Wilkinson's catalyst), modification of the original catalyst. (K1, K2, K3, K4, K5 & K6)
- 3.2 Hydroformylation of olefins using cobalt and rhodium catalyst (oxo process). (K1, K2, K3, K4, K5 & K6)
- 3.3 Oxidation of olefins to aldehydes and ketones (Wacker process). (K1, K2, K3, K4, K5 & K6)
- 3.4 Cyclo oligomerisation of acetylene using Nickel catalyst (Reppé's catalyst) (K1, K2, K3, K4, K5 & K6)
- 3.5 Olefin isomerization and its mechanism. (K1, K2, K3, K4, K5 & K6)
- 3.6 Olefin metathesis and polymer bound catalyst. (K1, K2, K3, K4, K5 & K6)

**Unit IV****(15 Hours)**

- 4.1 Metallo porphyrin and respiration (cytochromes). (K1, K2, K3, K4 & K5)
- 4.2 Interaction between heme and dioxygen, structure and function of haemoglobin. (K1, K2, K3, K4 & K5)
- 4.3 Ferredoxin and rubredoxin, blue copper proteins - structure and function. (K1, K2, K3, K4 & K5)
- 4.4 Ion transport in membranes, Na-K balance. (K1, K2, K3, K4 & K5)
- 4.5 Calcium in living cells (transport and regulation), selectivity of  $\text{Ca}^{2+}$  over  $\text{Mg}^{2+}$ . (K1, K2, K3, K4 & K5)
- 4.6 Nitrogen fixation - atmospheric, industrial and biological. (K1, K2, K3, K4 & K5)

**Unit V****(15 Hours)**

- 5.1 Biological role of metalloenzymes - carboxy peptidases. (K1, K2, K3, K4, K5 & K6)

- 5.2 Biological role of carbonic anhydrase. (K1, K2, K3, K4, K5 & K6)
- 5.3 Biological importance of catalase. (K1, K2, K3, K4, K5 & K6)
- 5.4 Biological role of peroxidase. (K1, K2, K3, K4, K5 & K6)
- 5.5 Oxotransferase enzymes - xanthine oxidase - biological role. (K1, K2, K3, K4, K5 & K6)
- 5.6 Metals used for diagnosis and chemotherapy with particular reference to anticancer drugs (platinum ammine halides, metallocenes and their halides). (K1, K2, K3, K4, K5 & K6)

## SEMESTER IV

### PECHH20 - ELECTIVE IVB: ORGANIC FARMING AND SOLID WASTE MANAGEMENT

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PECHH20	<b>Title of the Course</b> Organic Farming and Solid Waste Management	<b>Course Type</b> Theory	<b>Course Category</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---	-------------------------------	--	------------------------------	---	-----------------	---------------------	---------------------

#### Learning Objectives:

- To understand the importance of solid waste management.
- To learn about hazardous waste management.
- To get a thorough knowledge on the concept of organic farming, components and practices.

#### Course Outcomes:

The Learners will be able to

1. Elaborate the concept of organic farming.
2. Explain the vision and importance of organic farming movements, apply vermicomposting process and prepare bio-fertilizers.
3. Evaluate the technology to approach the benefits of organic farming.
4. Explain the various aspects of solid waste management.
5. Demonstrate the methods to reduce hazards.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

**Unit I** (15 Hours)

- 1.1 Organic farming - concepts, relevance of organic farming to Indian agriculture. (K1, K2, K3, K4, K5 & K6)
- 1.2 Effects of green revolution, adverse effects of continuous use of chemicals. (K1, K2, K3, K4, K5 & K6)
- 1.3 Categories of organic farming, organic vs natural farming. (K1, K2, K3, K4, K5 & K6)
- 1.4 Essential characteristics of organic farming. (K1, K2, K3, K4, K5 & K6)
- 1.5 Key principles in organic farming system - components of organic farming systems. (K1, K2, K3, K4, K5 & K6)
- 1.6 Management of organic farming - research needs. (K1, K2, K3, K4, K5 & K6)

**Unit II** (15 Hours)

- 2.1 Principles and practices of organic farming. (K1, K2, K3, K4 & K5)
- 2.2 The vision and importance of organic farming movements. (K1, K2, K3, K4 & K5)
- 2.3 Guidelines for organic production system - organic farming practices - bulky organic manures. (K1, K2, K3, K4 & K5)
- 2.4 Role of micro-organisms (bio-fertilizers) in organic farming. (K1, K2, K3, K4 & K5)
- 2.5 Vermitechnology. (K1, K2, K3, K4 & K5)
- 2.6 Research advances in organic farming. (K1, K2, K3, K4 & K5)

**Unit III** (15 Hours)

- 3.1 Benefits of organic farming. (K1, K2, K3, K4, K5 & K6)
- 3.2 Nutritional values of organic foods. (K1, K2, K3, K4, K5 & K6)
- 3.3 Health benefits of organic foods. (K1, K2, K3, K4, K5 & K6)
- 3.4 SREP approach for promoting organic farming. (K1, K2, K3, K4, K5 & K6)
- 3.5 Use of organic practices in enhancing crop productivity. (K1, K2, K3, K4, K5 & K6)
- 3.6 Participatory technology development in organic farming. (K1, K2, K3, K4, K5 & K6)

**Unit IV** (15 Hours)

- 4.1 Solid Waste Management - introduction. (K1, K2, K3, K4 & K5)
- 4.2 Classification of solid wastes. (K1, K2, K3, K4 & K5)
- 4.3 Mismanagement and side effects. (K1, K2, K3, K4 & K5)
- 4.4 Physical and chemical characteristics. (K1, K2, K3, K4 & K5)
- 4.5 Waste collection, storage and transport. (K1, K2, K3, K4 & K5)
- 4.6 Waste disposal - types - composting, incineration, bio gasification. (K1, K2, K3, K4 & K5)

**Unit V** (15 Hours)

- 5.1 Plastics, bio medical and hazardous waste management. (K1, K2, K3, K4, K5 & K6)
- 5.2 Various types of plastics - plastic recycling and the environment. (K1, K2, K3, K4, K5 & K6)
- 5.3 Guidelines for the plastic waste hazards control. (K1, K2, K3, K4, K5 & K6)
- 5.4 Sources of biomedical waste - pathological waste, pharmaceutical wastes, genotoxic wastes, chemical wastes, radioactive wastes. (K1, K2, K3, K4, K5 & K6)
- 5.5 Measures to reduce hazards. (K1, K2, K3, K4, K5 & K6)
- 5.6 Household hazardous waste management - precautions, disposal, waste minimization. (K1, K2, K3, K4, K5 & K6)

## SEMESTER IV

### PCCHP20 - PRACTICAL IV: ORGANIC CHEMISTRY - II

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHP20	<b>Title of the Course</b> Practical IV: Organic Chemistry – II	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
---	-------------------------------	--	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Develop skills to perform two stage preparations of organic compounds and crystallize them.
2. Calculate the saponification value of oil.
3. Estimate the amount of the given organic compound.
4. Demonstrate simple chromatographic techniques.
5. Interpret the structure of organic compounds by analyzing spectral data.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

#### Estimations:

1. Estimation of aniline
2. Estimation of phenol
3. Estimation of ethyl methyl ketone
4. Estimation of glucose (Bertrand's method)

5. \*Estimation of amide
6. Estimation of glycine
7. Saponification value of an oil

**Preparations:**

1. Benzanilide from benzophenone
2. m-nitrobenzoic acid from methyl benzoate
3. m-nitrobenzoic acid from benzaldehyde
4. 2,4-dinitrophenylhydrazine from chlorobenzene
5. Acetyl salicylic acid from methyl salicylate
6. Benzilic acid from benzoin

**\* Chromatographic Separations:**

1. Column chromatography- separation of dyes
2. Paper chromatography - separation of mixture of amino acids
3. Thin layer chromatography - separation of mixture of amino acids

**Interpretation of spectra of 10 organic compounds****\* Not to be given for examination****Reference Books:**

1. Mann and Saunders, Laboratory Manual of Organic Chemistry, Pearson Education, 4<sup>th</sup> Edition, 2009.
2. Vogel's Textbook of Practical Organic Chemistry, Pearson Education, 5<sup>th</sup> Edition, 2003.

**Continuous Assessment - 40 marks**

I C.A. - 50 Marks

II C.A. - 50 Marks

Average - 25 Marks

Performance during regular practicals - 10 Marks

Regularity in submission of observation note-book and Record - 5 Marks

**CA Practical Examination - 50 Marks**

Spectra - 5 Marks

Record - 5 Marks

Viva - 5 Marks

Estimation - 15 Mark

Preparation - 20 Marks

(Stage1 - Quantity (5 Marks), Quality (5 Marks), Stage2 - Quantity (4 Marks), Quality (4 Marks), Recrystallization - 2Marks)

**Semester Practical Examination - 60 Marks**

Spectra - 5 Marks

Record - 5 Marks

Viva - 5 Marks

Preparation - 20 Marks

Estimation - 25 Marks

**Quantitative Estimation**

Upto 2% - 25 Marks

2 - 3% - 20 Marks

3- 4% - 15 Marks

&gt; 4% - 10 Marks

## SEMESTER IV

### PCCHQ20 - PRACTICAL V: INORGANIC CHEMISTRY - II

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHQ20	<b>Title of the Course</b> Practical V: Inorganic Chemistry - II	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 4	<b>Credits</b> 3	<b>Marks</b> 100
---	-------------------------------	---	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes

The Learners will be able to

1. Estimate the amount of metal ions in inorganic mixtures by volumetric and gravimetric methods.
2. Estimate the percentage of metals in ores and alloys by volumetric and gravimetric methods.
3. Prepare selected inorganic complexes.
4. Interpret the spectra of selected inorganic compounds.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

#### Estimations:

1. Estimation of copper and nickel
2. Estimation of copper and zinc
3. Estimation of iron and nickel
4. Estimation of iron and magnesium
5. Estimation of iron and zinc

#### Preparations:

1. Hexaamminenickel(II) chloride

2. Bis(acetylacetonato)copper(II)
3. Hexaamminecobalt(III) chloride
4. Pentamminechlorocobalt(III) chloride
5. Tris(thiourea)copper(I) sulphate
6. Potassium tetrachlorocuprate(II)
7. \*Potassium tris(oxalato)aluminate(III) trihydrate

**\*Analysis of alloys:**

1. Determination of percentage of copper and zinc in brass
2. Determination of percentage of chromium and nickel in stainless steel

**\*Analysis of ores:**

1. Determination of percentage of calcium and magnesium in dolomite
2. Determination of percentage of MnO<sub>2</sub> in pyrolusite

**Interpretation of spectra of 10 inorganic compounds**

**\* Not to be given for examination**

**Reference Books:**

## SEMESTER IV

### PCCHR20 - PRACTICAL VI: PHYSICAL CHEMISTRY - II

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PCCHR20	<b>Title of the Course</b> Practical VI: Physical Chemistry - II	<b>Course Type</b> Practical	<b>Course Category</b> Core	<b>H/W</b> 3	<b>Credits</b> 3	<b>Marks</b> 100
---	-------------------------------	---	---------------------------------	--------------------------------	-----------------	---------------------	---------------------

#### Course Outcomes:

The Learners will be able to

1. Apply laboratory skills to perform physico-chemical experiments.
2. Demonstrate acid-base, redox and precipitation titrations using conductometry and potentiometry.
3. Determine the pH of buffer solution potentiometrically and verify Ostwald dilution law and Onsager's equation.
4. Interpret the experimental results obtained by conductometric and potentiometric titrations.
5. Describe spectral methods to calculate force constant and interpret UV, IR and NMR spectra.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

#### Experiments:

1. Determination of the strength of given weak acid by titrating potentiometrically with a strong base and determine dissociation constant of the weak acid to 1/4, 1/2 and 3/4 neutralization.

2. Determination of the strength of weak acid by titrating conductometrically against a standard sodium hydroxide solution.
3. Determination of pH values of the given buffer solutions by potentiometric method. You are provided with a buffer of known pH.
4. Determination of the strength of potassium iodide by titrating against standard potassium permanganate potentiometrically.
5. Verify the Onsager equation using the given solution and determine the equivalent conductance at infinite dilution.
6. Determination of the strength of ferrous ammonium sulphate solution by titrating against standard potassium permanganate potentiometrically.
7. Verify the Ostwald's dilution law and determine the dissociation constant of given acid.
8. Determination of the strength of potassium chloride by precipitation titration potentiometrically.
9. Titrate conductometrically the given mixture of strong and weak acids against a standard sodium hydroxide solution and determine the individual strength of the two acids in the mixture.
10. Determination of the strength of given strong acid by titrating potentiometrically with a strong base.
11. Determination of the strength of mixture of halides (KCl & KI) by precipitation titration potentiometrically.
12. Determination of the strength of given strong acid by titrating conductometrically with a strong base.
13. \*Titrate conductometrically the given mixture of HCl, CH<sub>3</sub>COOH and CuSO<sub>4</sub> · 5H<sub>2</sub>O against NaOH and determine the individual strengths of the mixture.

\* Not to be given for examination.

#### **Interpretation of spectra:**

- Interpretation of UV-Visible spectra of simple molecules for the calculation of molecular data and identification of functional groups (5 typical spectra will be provided).
- IR and NMR spectral calculations of force constant - identification and interpretation of spectra (5 each in IR and NMR will be provided).

## SEMESTER IV

### PICHH20 - IEP - CSIR-NET PREPARATORY COURSE IN PHYSICAL CHEMISTRY

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PICHH20	<b>Title of the Course</b> CSIR-NET Preparatory Course in Physical Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W</b> Own Pace	<b>Credits</b> 2	<b>Marks</b> 100
---	-------------------------------	--	------------------------------	---	---------------------------	---------------------	---------------------

#### Learning Objective:

- Upon studying this paper, the students will be able to answer CSIR-NET questions in Physical Chemistry.

#### Course Outcomes:

The Learners will be able to

1. Apply quantum chemistry to solve Schrödinger wave equation for one, two- and three-dimensional boxes and for hydrogen and helium atoms, apply the approximation methods to single and multi-electron systems, and discuss the concepts of atomic structure, spectroscopy and apply term symbols to many electron systems.
2. Elaborate Huckel theory to conjugated systems, concepts of symmetry in molecular vibrations, chemical bonding and electronic transitions.
3. Compile the concepts of chemical kinetics and enzyme kinetics, describe the concepts of statistical thermodynamics and apply the partition function to model systems.
4. Relate the concepts of electrochemistry, explain the kinetics of reactions in solutions, acid-base catalysis and surface reactions.
5. Illustrate the theory and properties of colloids, mechanism of heterogeneous catalysis and structure of solids, discuss the kinetics of polymerization, and data analysis.

H-High (3), M-Moderate (2), L-Low (1)

## Unit I

- 1.1. Basic principles of quantum mechanics, postulates, operator algebra, exactly-solvable systems. (K1, K2, K3 & K4)
- 1.2. Particle-in-a-box, harmonic oscillator and the hydrogen atom, including shapes of atomic orbitals, orbital and spin angular momenta, tunneling. (K1, K2, K3 & K4)
- 1.3. Approximation methods of quantum mechanics: Variational principle for multi electron systems. (K1, K2, K3, K4 & K5)
- 1.4. Perturbation method and its application to multielectron systems. (K1, K2, K3 & K4)
- 1.5. Atomic structure and spectroscopy. (K1, K2, K3 & K4)
- 1.6. Term symbols - many-electron systems and antisymmetry principle. (K1, K2, K3, K4 & K5)

## Unit II

- 2.1 Chemical bonding in diatomics, elementary concepts of MO and VB theories. (K1, K2, K3 & K4)
- 2.2 Huckel theory for conjugated  $\pi$ -electron systems. (K1, K2, K3, K4 & K5)
- 2.3 Chemical applications of group theory, symmetry elements, point groups, character tables, selection rules. (K1, K2, K3 & K4)
- 2.4 Molecular spectroscopy: Rotational and vibrational spectra of diatomic molecules. (K1, K2, K3 & K4)
- 2.5 Electronic spectra - principle and application. (K1, K2, K3, K4 & K5)
- 2.6 IR and Raman spectra - selection rules, basic principles of magnetic resonance. (K1, K2, K3 & K4)

## Unit III

- 3.1 Chemical thermodynamics: Laws, state and path functions and their applications, thermodynamic description of various types of processes. (K1, K2, K3 & K4)
- 3.2 Maxwell's relations, spontaneity and equilibria, temperature and pressure dependence of thermodynamic quantities. (K1, K2, K3, K4 & K5)
- 3.3 Le Chatelier's principle, elementary description of phase transitions, phase equilibria and phase rule. (K1, K2, K3 & K4)
- 3.4 Thermodynamics of ideal and non-ideal gases, and solutions. (K1, K2, K3 & K4)
- 3.5 Statistical thermodynamics: Boltzmann distribution and kinetic theory of gases. (K1, K2, K3 & K4)
- 3.6 Partition functions and their relation to thermodynamic quantities - calculations for model systems. (K1, K2, K3 & K4)

## Unit IV

- 4.1 Electrochemistry: Nernst equation, redox systems, electrochemical cells, Debye-Huckel theory (K1, K2, K3 & K4)
- 4.2 Electrolytic conductance - Kohlrausch's law and its applications, ionic equilibria, conductometric and potentiometric titrations. (K1, K2, K3 & K4)
- 4.3 Chemical kinetics: Empirical rate laws and temperature dependence, complex reactions, steady state approximation, determination of reaction mechanisms. (K1, K2, K3 & K4)
- 4.4 Collision and transition state theories of rate constants, unimolecular reactions. (K1, K2, K3, K4 & K5)

4.5 Enzyme kinetics and salt effects. (K1, K2, K3 & K4)

4.6 Homogeneous catalysis and photochemical reactions. (K1, K2, K3 & K4)

## Unit V

5.1 Colloids and surfaces: Stability and properties of colloids, isotherms and surface area. (K1, K2, K3 & K4)

5.2 Heterogeneous catalysis. (K1, K2, K3 & K4)

5.3 Solid state: Crystal structures, Bragg's law and applications, band structure of solids. (K1, K2, K3 & K4)

5.4 Polymer chemistry: Molar masses, kinetics of polymerization. (K1, K2, K3 & K4)

5.5 Data analysis: Mean and standard deviation, absolute and relative errors. (K1, K2 & K3)

5.6 Linear regression, covariance and correlation coefficient. (K1, K2, K3 & K4)

## SEMESTER IV

### PICH120 - IEP - ADVANCED INSTRUMENTATION TECHNIQUES

<b>Year:</b> II	<b>Course Code</b> PICH120	<b>Title of the Course</b> Advanced Instrumentation Techniques	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
<b>SEM:</b> IV							

#### Learning Objectives:

- To study in detail the advanced instrumentation methods including spectroscopic, separation and voltammetric techniques.
- To give an in-depth knowledge about the techniques used in monitoring environmental pollution.

#### Course Outcomes:

The Learners will be able to

1. Outline the working principle of NMR, ESR and Mossbauer spectroscopy with selected applications.
2. Summarize the operating principle, sample preparation and imaging modes of XPS, AES, SEM, TEM, etc.
3. Outline the working principle of separation techniques such as HPLC, NP-HPLC, RP-HPLC, CZE, ICP and hyphenated techniques.
4. Define the principle of voltammetry such as LSV, AWV, DPV and theory and applications of Cyclic Voltammetry.
5. Outline the methods of monitoring air and water pollution.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

## **Unit I**

- 1.1 One Dimensional NMR: Principle. (K1, K2, K3, K4, K5 & K6)
- 1.2 Two-Dimensional NMR: Principle. (K1, K2, K3, K4, K5 & K6)
- 1.3 Solid state NMR with examples. (K1, K2, K3, K4, K5 & K6)
- 1.4 ESR: Basic principles, experimental conditions. (K1, K2, K3, K4, K5 & K6)
- 1.5 Mossbauer Spectroscopy: Principle, preparation of Mossbauer source. (K1, K2, K3, K4, K5 & K6)
- 1.6 Hyperfine interactions, evaluation of Mossbauer spectra, selected applications. (K1, K2, K3, K4, K5 & K6)

## **Unit II**

- 2.1 X-ray photoelectron spectroscopy (XPS). (K1, K2, K3, K4 & K5)
- 2.2 Auger electron spectroscopy (AES). K1, K2, K3, K4 & K5)
- 2.3 Scanning tunneling methods: AFM, STM, STS. K1, K2, K3, K4 & K5)
- 2.4 SEM: Operating principle, sample preparation and imaging modes. K1, K2, K3, K4 & K5)
- 2.5 TEM: Operating principle, sample preparation and imaging modes. K1, K2, K3, K4 & K5)
- 2.6 STEM: Operating principle, sample preparation and imaging modes. K1, K2, K3, K4 & K5)

## **Unit III**

- 3.1 Separation methods: HPLC, NP-HPLC, RP-HPLC - basic principles. (K1, K2, K3, K4, K5 & K6)
- 3.2 HPTLC - basic principles. (K1, K2, K3, K4, K5 & K6)
- 3.3 Capillary zone electrophoresis (CZE) - basic principles. (K1, K2, K3, K4, K5 & K6)
- 3.4 ICP - basic principles. (K1, K2, K3, K4, K5 & K6)
- 3.5 Hyphenated techniques: LC-MS, GC-MS, SFC-MS (Supercritical Fluid Chromatography-MS) and MALDI - principle, instrumentation and applications. (K1, K2, K3, K4, K5 & K6)
- 3.6 ICP-MS, CZE-MS (Capillary Zone Electrophoresis-MS) and LASER-MS - principle, instrumentation and applications. (K1, K2, K3, K4, K5 & K6)

## **Unit IV**

- 4.1 Voltammetric techniques: Linear Sweep Voltammetry (LSV) - basic principle. K1, K2, K3, K4 & K5)
- 4.2 Square Wave Voltammetry (SWV): Basic principle. K1, K2, K3, K4 & K5)
- 4.3 Anodic Stripping Voltammetry (ASV): Basic principle. K1, K2, K3, K4 & K5)
- 4.4 Differential Pulse Voltammetry (DPV): Basic principle. K1, K2, K3, K4 & K5)
- 4.5 Cyclic Voltammetry (CV): Basic principle and theory of CV - important parameters in a cyclic voltammogram - applications of CV. K1, K2, K3, K4 & K5)
- 4.6 Fast Scan Cyclic Voltammetry (FSCV). K1, K2, K3, K4 & K5)

## **Unit V**

- 5.1 Air pollution monitoring techniques for carbon monoxide. (K1, K2, K3, K4, K5 & K6)
- 5.2 Air pollution monitoring techniques for sulphur dioxide, nitrogen dioxide. (K1, K2, K3, K4, K5 & K6)
- 5.3 Air pollution monitoring techniques for hydrocarbons and ozone. (K1, K2, K3, K4, K5 & K6)
- 5.4 Automated wet-chemical air analysis. (K1, K2, K3, K4, K5 & K6)

5.5 Water pollution monitoring techniques - flame photometry and AAS. (K1, K2, K3, K4, K5 & K6)

5.6 Water pollution monitoring techniques - TDS. (K1, K2, K3, K4, K5 & K6)

## SEMESTER IV

### PICHJ20 - IEP - LEATHER CHEMISTRY

<b>Year:</b> II <b>SEM:</b> IV	<b>Course Code</b> PICHJ20	<b>Title of the Course</b> Leather Chemistry	<b>Course Type</b> Theory	<b>Course Category</b> Independent Elective	<b>H/W Own Pace</b>	<b>Credits</b> 2	<b>Marks</b> 100
---	-------------------------------	---	------------------------------	--	---------------------	---------------------	---------------------

#### Learning Objectives:

The Learners will be able

- To acquire technical competence on leather manufacturing with eco -friendly and sustainable approach.
- To develop indigenous and adaptable technologies related to leather for small scale production and to develop entrepreneurial skills, towards betterment of society.
- To develop state-of-art facilities for testing and consultancy for leather industries.

#### Course Outcomes:

The Learners will be able to

1. Outline the tanning processes in leather industry.
2. Discuss the cleaner technology in leather industry.
3. Illustrate the chrome tanning process.
4. Outline the mechanism of tanning and role of surface charge and importance of electrostatic, H-bond, dipole-dipole and hydrophobic interactions.
5. Apply waste water management and zero discharge approaches in leather industry.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	H	H	L	M
CO2	H	H	M	H	L	M
CO3	H	M	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

**H-High (3), M-Moderate (2), L-Low (1)**

## **Unit I**

- 1.1 Raw materials, stages in the leather processing. (K1 & K2)
- 1.2 Pre-tanning operations - soaking, liming, deliming, bating, pickling, degreasing. (K1 & K2)
- 1.3 Tanning process - chrome tanning, vegetable tanning. (K1 & K2)
- 1.4 Post-tanning operations - rechroming of wet blue leathers, neutralization. (K1 & K2)
- 1.5 Retanning, dyeing and fatliquoring. (K1 & K2)
- 1.6 Drying and finishing. (K1 & K2)

## **Unit II**

- 2.1 Environmental challenges in leather industries. (K1 & K2)
- 2.2 Cleaner technology options - curing, air drying, frame drying, freezing, chemical methods, biocides for curing and control drying. (K1 & K2)
- 2.3 Desalting, soaking after desalting. (K1 & K2)
- 2.4 Liming and unhairing. (K1 & K2)
- 2.5 Advantages of sulphide free unhairing system by using dehairing process, advantages of less sulphide unhairing system, and advantages of sulphide lime unhairing system. (K1 & K2)
- 2.6 Delimiting and bating. (K1 & K2)

## **Unit III**

- 3.1 Chrome tanning - method of chrome tannage, masking principle of masking, effect of masking on chrome tannage. (K1 & K2)
- 3.2 Influence of reducing agent on nature of chrome complexes. (K1 & K2)
- 3.3 Mechanism of chrome tanning, variable parameters of chrome tanning. (K1 & K2)
- 3.4 Wet finishing operations - rechroming, neutralization, retanning, dyeing, fatliquoring and finishing. (K1 & K2)
- 3.5 Chrome management options - chrome recovery and reuse - partial replacement of chrome tanning agent by other tanning agents. (K1 & K2)
- 3.6 High exhaust tanning systems - closed loop tanning systems. (K1 & K2)

## **Unit IV**

- 4.1 Mechanism of tanning - transport of tanning materials into pelt. (K1 & K2)
- 4.2 Role of surface charge and importance of electrostatic, H-bond, dipole-dipole and hydrophobic interactions. (K1 & K2)
- 4.3 Theory of finishing with special emphasis to optical properties of pigments and binders. (K1 & K2)
- 4.4 Diffusion equilibria and mechanism of vegetable, mineral and combination tannages. (K1 & K2)
- 4.5 Role of crosslinking in leather finishing. (K1 & K2)
- 4.6 Fibre coating in matrix stability. (K1 & K2)

## **Unit V**

- 5.1 Quality control in leather processing. (K1 & K2)
- 5.2 Tannery effluents, effluent disposal, types of effluent disposal. (K1 & K2)
- 5.3 Recovery and reuse of water in tanning industry, utilization of treated effluents. (K1 & K2)
- 5.4 Productivity and quality consistency. (K1 & K2)
- 5.5 Waste water management and zero discharge approaches. (K1 & K2)

## 5.6 Energy audit and environmental footprints. (K1 & K2)

# **Department of Computer Science (PG)**

## **SYLLABUS AND REGULATIONS**

Under

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

Department of **Computer Science** (PG)

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighboring districts.

**Framework of Curriculum**

**Number of Credits:** 90 Credits

**Credit Distribution:** 15 Weeks/Semester

**Assessment and Evaluation Methods:**

There are two components in the Assessment and Evaluation of a student – Internal and External. These are implemented through

1. Continuous Assessment (CA) during the Semester for 40 marks. It consists of two written tests and an innovative component.
2. Semester Examination (SE) at the end of the Semester for 100 marks which will be converted to 60 marks.

The maximum marks for each paper shall be 100.

Each Postgraduate Programme consists of Four Semester.

**Continuous Assessment (CA)**

1. The Continuous Assessment of each student will be done by the respective Department.

2. Each written test is of two hours duration for 50 marks. The tests will be conducted centrally. The average of two such CA is calculated for 35 marks/
3. The innovative component is for 5 marks, conducted during the class hours by the staff member in charge of the course, in the form of assignments/ quiz/ seminars/ presentations/ online/ open book/ viva-voce/ group work/ mini project/ exhibition, etc. The topic and time for submission/ presentation will be announced by the staff member in charge of the course in advance. Each student should explain and defend her presentation.
4. Syllabus of not less than two units shall be included for each CA.
5. A retest for CA will be conducted for a student only if a student is absent due to NSS/NCC/Sports campus on prior written permission obtained through the concerned staff members.
6. There is no passing minimum for CA.
7. There is no provision for improvement in CA.

### **Semester Examination (SE)**

1. A student should register herself to appear for the Semester Examinations by payment of the prescribed fee.
2. The Semester Examination will be in the form of a comprehensive examination covering the entire syllabus in each course. It will be of 3 hours duration, irrespective of the number of credits allotted to it.

### **Valuation of Answer Scripts**

1. There shall be a single valuation for Postgraduate Courses. The panel of Examiners will consist of internal and external examiners.
2. The valuation will be centralized.
3. A student has a minimum period of five years from the date of Admission to clear all the courses prescribed for the Programme at the time of her admission. After the fifth year, to complete the Programme, the student has to appear for an examination in the same/equivalent paper offered under the revised syllabus structure.
4. The fraction of final marks in CA and SE shall be rounded off to the nearest integer.

### **Revaluation**

1. A student can apply for the photocopy of answer scripts, if needed, on payment of the prescribed fee.
2. A student can apply for revaluation of any paper, on payment of the prescribed fee within the specified date. Receipt of the photocopy of the answer script is a pre-requisite for revaluation.

## CA and SE for Laboratory and Practical Work

CA		SE	
Components	Marks	Components	Marks
Performance during regular Practical's	10	Record	10
Regularity and submission of observation Notebook and Record	5	Practical Examination	45
Practical Examination	25	Viva Voce	5
<b>Total</b>	<b>40</b>	<b>Total</b>	<b>60</b>

### B) NAME OF THE PROGRAMME: M.Sc. Computer Science

#### Vision of the Programme

- Build a strong research and teaching environment aimed towards the betterment of society and industrial needs.
- To be a leading, contemporary, innovative Computer Science department in inculcating professional competencies in the field of Computing and related interdisciplinary technologies to achieve academic excellence and to facilitate research activities as a timely response to dynamic needs and challenges of industry and society.

### D) List of courses

Sem	Part	Code	Title	Hours/ Week	Exam Hours		Credits	Marks
					Th	Pr		
I		PCCSA20	Java Programming	5	3	-	5	40+60

III	PICSI20	Embedded System

### **E) Program Objectives (POs)**

**PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.

**PO2:** Assimilate and apply principles and concepts towards skill development & employability.

**PO3:** Apply critical and scientific approaches to address problems and find solutions.

**PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:** Integrate issues of social relevance in the field of study.

**PO6:** Persist in life-long learning for personal and societal progress.

### **F) Programme Specific Outcomes (PSOs)**

**PSO1:** To apply fundamental knowledge of computing and science relevant to the discipline.

**PSO2:** Ability to learn & apply advance concepts to generate novel solutions for solving complex computational problems.

**PSO3:** To design, implement, and evaluate a computer-based system, process, component, or program for various applications.

**PSO4:** Contribute significantly to the research and the discovery of new knowledge and methods in the field of computer science.

**PSO5:** To use current techniques, skills, and modern tools necessary for research-based knowledge and research methods for the cultural, societal, environmental considerations and demonstrate the knowledge of and need for sustainable development.

**PSO6:** To Formulate models, design and conduct experiments for interpreting data and critical thinking.

## SEMESTER I

### PCCSA20 – JAVA PROGRAMMING

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: I</b>	PCCSA20	Java Programming	Theory	Core	5	5	100

#### Course Objectives

1. This paper helps to enhance the knowledge in advanced features of Java and programming skill as per the industry need.
2. Using Graphics, Animations and Multithreading for designing applet based applications.
3. Design and develop GUI applications using Abstract Windowing Toolkit (AWT), Swing and event handling.
4. Designing GUI based applications using swing.
5. Design and develop Web applications using Java Server Pages.

#### Course Outcomes (COs)

1. Understand the basics of Java and AWT
2. Develop Swing-based GUI
3. Update and retrieve the data from the databases using JDBC
4. Develop client/server applications and distributed applications using RMI
5. Develop server-side programs in the form of Servlets

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (18 Hours)

- 1.1 Introduction to Java – Features of Java– Constructors (K1, K2)
- 1.2 Exception handling: try, catch - Throw and throws – Multithreading (K1, K2)
- 1.3 Java AWT – working with Graphics – Font – Color (K1, K3)
- 1.4 Networking – Networking Basics – Networking Classes and Interface – InetAddress – Factory Methods – Instance Methods (K2, K3)
- 1.5 InetAddress and Inet5Address – TCP/IP Client Sockets – Cookies. (K3, K4)
- 1.6 URL – URL Connection – HTTP URL Connection – URI Class (K4, K5)

### Unit II (16 Hours)

- 2.1 Swing: JFC – Features of Swing – Swing Components (K1, K3)
- 2.2 Working with Swing – Event Handling Using Swing(K2, K3)
- 2.3 Exploring Swing: JLabel and JTextField - The Swing Buttons - JComboBox - JTable (K2, K3)
- 2.4 JDBC: Introduction- Architecture-- JDBC Environment – JDBC Driver Types (K4, K5)
- 2.5 Java, Sql Package – Data Manipulation – Data Navigation – JDBC Classes and Interfaces (K2, K3)
- 2.6 JDBC Statement Interface – Connection Interface – Statement Interface –ResultSet Interface (K3, K5)

### Unit III (14 Hours)

- 3.1 RMI – Introduction - RMI Architecture – RMI for Distributed Computing(K2, K3)
- 3.2 Working of an RMI application - Marshalling and Unmarshalling - RMI Registry - Goals of RMI(K1, K2, K3)
- 3.3 Working RMI Application – Defining Remote Interface – Simple Programs(K3, K4)
- 3.4 Working Servlets: Background – Life Cycle of Servlets – Servlet Architecture Cognitive (K2, K3)
- 3.5 Servlet API – Javax Servlet Packages – Creating Servlets – Reading Servlet Parameters, The javax.servlet.http Package(K4, K6)
- 3.6 Handling HTTP Request and Responses – Using Cookies - Simple Programs(K5, K6)

### Unit IV (15 Hours)

- 4.1 JSP: Introduction and Marketplace – JSP and HTTP – JSP Engines – JSP Works(K1, K2)
- 4.2 Anatomy of JSP page – Life Cycle of JSP – JSP API – JSP in IDE(K2, K3)
- 4.3 JSP Expressions – Declarations – - Scripting elements – Scriplet – Expression(K1, K4)
- 4.4 Directive Elements – Page – Include – Taglib Directive – Action Element(K4, K5)
- 4.5 Inserting Applet into JSP (K5, K6)
- 4.6 Accessing a Database from JSP (K5, K6)

### Unit V (12 Hours)

- 5.1 EJB: Introduction to EJB – EJB fundamentals - EJB Architecture - EJB Roles (K1, K5)
- 5.2 J2EE architecture, Enterprise application concepts(K1, K2)
- 5.3 J2EE platform, HTTP protocol, web application (K3, K5)
- 5.4 Web containers and Application servers (K2, K3, K4)
- 5.5 Java Web Frameworks: Spring MVC Overview of Spring, Spring Architecture(K3, K4, K5)
- 5.6 Hibernate 4.0 Overview of Hibernate, Hibernate Architecture(K5, K6)

**Text Books:**

1. Herbert Schildt (2017). The Complete Reference: Java. Tata McGraw Hill Publishing, Eighth Edition.

## SEMESTER I

### PCCSB20 - .NET FRAMEWORK

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCCSB20	<b>Title of the Course:</b> .Net Framework	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. This course presents the practical aspects of application development using .Net framework.
2. It also covers the Common Language Runtime (CLR), .Net framework classes, C#, and ADO.NET
3. To update and enhance skills in writing Windows applications, ADO.NET and ASP.NET.
4. The student will gain programming skills in C# both in basic and advanced levels.
5. By building sample applications, the student will get experience and be ready for large - scale projects.

#### Course Outcomes (COs)

1. Understand code solutions and compile C# projects within the .NET Framework.
2. Develop C# console applications using Classes and Objects and Interfaces.
3. Design and Implement database connectivity using ADO.NET in Windows Based Applications.
4. To understand and be able to using XML in C#.NET specifically ADO.NET and SQL server.
5. Develop the Web Applications using C#.

CO5	H	L	H	M	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (18 Hours)

- 1.1 Introducing C# - .NET Framework - The C# Language (K1)
- 1.2 Variables and Data - Operators (K1, K2)
- 1.3 Control Structures (K3)
- 1.4 C# Array - ArrayList Class (K5)
- 1.5 String - StringBuilder Class (K3, K4)
- 1.6 Functions and Methods – Structures (K3, K6)

### Unit II (16 Hours)

- 2.1 Classes and Objects - Constructor and Destructors (K1, K2)
- 2.2 Types of Classes - Various Class Members (K2)
- 2.3 Interfaces - Delegates - Events (K4, K6)
- 2.4 Inheritance - Access Modifiers - Class Modifiers (K3, K4)
- 2.5 Polymorphism - Operator Overloading - Errors and Exceptions (K5)
- 2.6 C# Files and IO - C# Collections. (K5, K6)

### Unit III (14 Hours)

- 3.1 ADO.NET: C# Graphical User Interface and Application Development (K2, K3)
- 3.2 .Net Environment - User Interface Elements and Hierarchy in C# (K4)
- 3.3 Programming with the Windows Controls (K5)
- 3.4 C# MDI Form - Dialog Box (K4, K5)
- 3.5 C# ADO.Net: Data Providers - ADO.NET Objects (K3)
- 3.6 Data Set - Working with Data. (K6)

### Unit IV (15 Hours)

- 4.1 XML.Net: XML- A Brief Introduction - XML Syntax (K1)
- 4.2 Reading and Writing XML Files - Searching XML File using XPATH (K1, K2)
- 4.3 XML and ADO.NET for Handling Data (K6)
- 4.4 Fundamentals of Web Programming - ASP.NET Life Cycle (K2, K5)
- 4.5 ASP.NET Applications and Configuration - Web Forms (K4)
- 4.6 SOAP and Web Services - Creating and Consuming Web Service. (K5, K6)

### Unit V (12 Hours)

- 5.1 .Net Assemblies: Integrating Application Files (K2)
- 5.2 Security in .NET - Attributes (K2, K4)
- 5.3 Reflections - Type Discovery (K3)
- 5.4 Remote Programming: C# Remoting Architecture (K2, K6)
- 5.5 Domains - Contexts - Proxies (K2, K5)
- 5.6 Marshalling and Unmarshalling (K3)

**Text Books:**

1. Anamitra Deshmukh–Nimbalkar (2018). C# and .Net Programming. Technical Publications. First Edition.

## SEMESTER I

### PCCSC20 – RESEARCH METHODOLOGY

<b>Year: I</b>	<b>Course Code:</b> PCCSC20	<b>Title of the Course:</b> Research Methodology	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To gain familiarity with a phenomenon or to achieve new insights into it.
2. To portray accurately the characteristics of a particular individual situation or a group.
3. To determine the frequency with which something occurs or with which it is associated with something else.
4. To test a hypothesis of a causal relationship between variables.
5. To find solutions for scientific, non-scientific and social problems.

#### Course Outcomes (COs)

1. Understand the concepts of research design, research process and various types of research.
2. Understand the different steps in writing report.
3. Implement the methods and techniques for experimental study.
4. Analyze the ethical issues in research.
5. Assess the Various research areas in Computer science.

CO3	L	H	L	H	L	H
CO4	M	M	M	M	M	M
CO5	H	M	M	L	L	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I

(18 Hours)

- 1.1 Research - Definition- importance and meaning of research-characteristics of research (K2)
- 1.2 Type of research - steps in research (K2).
- 1.3 Research process – an overview (K2)
- 1.4 Identification of research area (K2)
- 1.5 Selection and formulation of research problem (K2).
- 1.6 Formulation of objectives (K6)

### Unit II

(16 Hours)

- 2.1 Review of Literature – Course work - Literature Survey (K2)
- 2.2 Collecting research papers from journals (K2)
- 2.3 Web Browsing - Efficient Searching (K2)
- 2.4 Online Resources - Reading a research paper - Scopus tool (K2)
- 2.5 Develop a theoretical framework (K6)
- 2.6 Improve your methodology (K5, K6)

### Unit III

(14 Hours)

- 3.1 Preparing the research design (K2)
- 3.2 Data collection and preparation (K2)
- 3.3 Experimental study – Result analysis and Discussions (K3)
- 3.4 Writing a research paper (K4)
- 3.5 Publishing the results (K6)
- 3.6 IEEE format – Latex tool (K1)

### Unit IV

(15 Hours)

- 4.1 Significance of Report writing – Different steps in writing report (K2, K4)
- 4.2 Layout of the research report - Types of Reports – Oral Presentation (K2)
- 4.3 Mechanics of writing a research report – Precautions for writing Research Reports (K5)
- 4.4 Ethical issues in research (K4)
- 4.5 Patent registration procedure – Funding agencies (K6)
- 4.6 Writing research proposals – Effective presenting methods (K6)

### Unit V

(12 Hours)

- 5.1 Various research areas in Computer science (K2)
- 5.2 Image processing (K4)
- 5.3 Networks and security (K4)
- 5.4 Data mining and machine learning (K4)
- 5.5 wireless and sensor systems (K4)
- 5.6 Audio, speech, language and signal processing (K2)

### Text Books:

1. Kothari, C.R (2013), Research Methodology – Methods and Techniques, Second Edition. Wiley Eastern Limited.
2. 1. R. Panneerselvam (2014). Research Methodology, Fourth Edition, Prentice Hall India Learning Private Limited.

## SEMESTER I

### PECSA20 – ELECTIVE I A: DESIGN AND ANALYSIS OF ALGORITHM

<b>Year:</b> I	<b>Course Code:</b> PECSA20	<b>Title of the Course:</b> Elective I A: Design and Analysis of Algorithm	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To develop skills in design and implementation of data structures and their applications.
2. To understand the usage of graph structures and spanning trees.
3. To acquire the knowledge of using advanced tree structures.
4. To learn the usage of heap structures.
5. To explain classification of problems based on the computational complexity

#### Course Outcomes (COs)

1. Understand data structures and the concepts of algorithm for Merge Sort, Quick Sort and Binary Search.
2. Understand the fundamental graph algorithms in solving optimization problems.
3. Update knowledge to learn advanced tree concepts in data structure and algorithm.
4. Able to perform all the operations on Hashing and Heaps.
5. Analyze the computational complexity of various algorithms.

CO3	H	M	L	M	L	M
CO4	M	H	M	L	M	L
CO5	L	M	M	L	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I

(15 Hours)

- 1.1 Introduction: Fundamentals of algorithmic problem solving (K1)
- 1.2 Asymptotic notations (K2)
- 1.3 Mathematical Analysis for Recursive and Non-Recursive Algorithms (K1, K3)
- 1.4 External Sorting: k-way Merge Sort (K5, K6)
- 1.5 Quick Sort – Binary Search (K4, K5)
- 1.6 Strassen's Matrix Multiplication (K3, K6)

### Unit II

(15 Hours)

- 2.1 Graphs: Graph Terminology – Directed Graphs – Representation of Graphs (K1)
- 2.2 Graph Traversal Algorithms – Topological Sorting (K1, K2, K6)
- 2.3 Minimum Spanning Trees: Kruskal's Algorithm (K4, K5, K6)
- 2.4 Prim's Algorithm (K4, K5)
- 2.5 Shortest Path Algorithms: Dijkstra's Algorithm (K3, K4, K6)
- 2.6 Warshall's Algorithm – Floyd's Algorithm (K4, K5, K6)

### Unit III

(15 Hours)

- 3.1 Trees: Basic Terminology – Types of Trees (K1, K2)
- 3.2 Creating a Binary Tree from a General Tree – Traversing a Binary Tree (K2, K3)
- 3.3 Efficient Binary Search Trees: Binary Search Trees (K3, K6)
- 3.4 Optimal Binary Search Tree (OBST) – AVL Trees (K1, K5)
- 3.5 Multi-way Search Trees: M-way Search Trees (K1, K4)
- 3.6 B-Trees - B+ Trees (K3, K6)

### Unit IV

(15 Hours)

- 4.1 Hashing: Introduction to Static Hashing – Hash Tables (K1, K2)
- 4.2 Different Hash Functions – Secure Hash Functions Dynamic Hashing (K2)
- 4.3 Priority Queues (Heaps): Binary Heaps – Basic Heap Operations (K2, K6)
- 4.4 Applications of Priority Queues (K2, K4)
- 4.5 Binomial Heaps Structure and Implementation – Binomial Queue Operations (K5)
- 4.6 Comparison between Binary and Binary Heaps (K1, K3)

### Unit V

(15 Hours)

- 5.1 Backtracking: N- Queens problem – Hamiltonian Circuit Problem (K2)
- 5.2 Subset- Sum Problem – Branch and Bound (K3, K4)
- 5.3 Assignment Problem (K4, K6)
- 5.4 Knapsack Problem (K4, K5, K6)
- 5.5 Travelling Salesman Problem (K2, K5)
- 5.6 P & NP Problems – NP- Complete Problems (K3, K4)

### Text Books:

1. Reema Thareja, S. Rama Sree (2018), "Advanced Data Structure", Oxford University Press.

## SEMESTER I

### PECSB20 - ELECTIVE I B: CYBER SECURITY

<b>Year:</b> I	<b>Course Code:</b> PECSB20	<b>Title of the Course:</b> Elective I B: Cyber Security	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
-------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Gain knowledge about securing both clean and corrupted systems, protect personal data, and secure computer networks.
2. Understand key terms and concepts in cyber law, intellectual property and cyber crimes, trademarks and domain theft.
3. Examine secure software development practices.
4. Understand principles of web security.
5. Gain familiarity with prevalent network and distributed system attacks, defenses against them, and forensics to investigate the aftermath.

#### Course Outcomes (COs)

1. Evaluate the computer network and information security needs of an organization.
2. Assess cyber security risk management policies in order to adequately protect an organization's critical information and assets.
3. Analyze the performance of applications in a variety of system contexts.
4. Implement continuous network monitoring and provide real-time security solutions.
5. Identify physical points of vulnerability in simple networks.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I

(16 Hours)

- 1.1 Digital securities introduction, types of attacks, digital privacy, online tracking, privacy laws (K1, K2)
- 1.2 Types of computer security risks - malware, hacking, pharming, phishing, ransomware, adware and spyware, trojan, virus, worms, wifi eavesdropping(K1, K2)
- 1.3 Scareware, distributed denial-of-service attack, rootkits, juice jacking (K1, K2)
- 1.4 Antivirus and other security solution – password (K1, K2)
- 1.5 Secure online browsing email security - iot security (K1, K2)
- 1.6 Physical security threads (K1, K2)

### Unit II

(16 Hours)

- 2.1 Online anonymity anonymous networks - tor network (K1, K4)
- 2.2 I2P network – freenet - darknet, anonymous os (K1, K4)
- 2.3 Tails – secure file sharing – vpn – proxy server (K1, K4)
- 2.4 Connection leak testing – secure search engine (K1, K4)
- 2.5 Web browser privacy configuration (K1, K4)
- 2.6 Anonymous payment (K1, K4)

### Unit III

(15 Hours)

- 3.1 Disk Encryption using windows BitLocker (K4)
- 3.2 Disk Encryption Using open source tools – multitask encryption tools(K4)
- 3.3 Attacking cryptographic systems – countermeasures against cryptography attacks (K4)
- 3.4 Securing data in transit – cloud storage encryption (K4)
- 3.5 Encrypt DNS Traffic and Email communication (K4)
- 3.6 Secure IM and video calls (K4)

### Unit IV

(14 Hours)

- 4.1 Cyber Crime issues and investigation unauthorized access, computer intrusions (K4, K5)
- 4.2 White collar crimes – viruses and malicious code – internet hacking and cracking(K4, K5)
- 4.3 Virus attacks – pornography – software piracy –intellectual property –mail bombs (K4, K5)
- 4.4 Digital evidence collection – evidence preservation – e-mail investigation (K4, K5)
- 4.5 E-mail tracking – IP tracking – e-mail recovery (K4, K5)
- 4.6 Recovering deleted evidences – password cracking (K4, K5)

### Unit V

(14 Hours)

- 5.1 Digital Forensics introduction to digital forensics – forensic software and hardware (K1, K3)
- 5.2 Analysis and advanced tools – forensic technology and practices, forensic ballistics and photography (K1, K3)
- 5.3 Face, iris and fingerprint recognition – audio video analysis (K1, K3)
- 5.4 Windows system forensics – linux system forensics (K1, K3)
- 5.5 WIFI Security (War-driving) – Network Forensics (K1, K3)
- 5.6 Mobile Forensics – Cloud Forensics (K1, K3)

## SEMESTER I

### PCCSD20 - PRACTICAL I: JAVA PROGRAMMING LAB

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCCSD20	<b>Title of the Course:</b> Practical I: Java Programming Lab	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 3	<b>Marks</b> 100
---------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Create a full set of UI widgets and other components, including windows, menus, buttons, Checkboxes, text fields, scrollbars and scrolling lists, using Abstract Windowing Toolkit (AWT) & Swings.
2. Apply event handling on AWT and Swing components.
3. Learn to access database through Java programs, using Java Data Base Connectivity (JDBC).
4. Learn to develop server side programming using servlets.
5. Create dynamic web pages, using JSP.

#### Course Outcomes (COs)

1. Design and develop GUI applications using Abstract Windowing Toolkit (AWT), Swing and Event Handling.
2. Update and retrieve the data from the databases using SQL.
3. Develop Applet based programming using IDE.
4. Develop server-side programs in the form of servlets.
5. Design and develop JSP based Web applications.

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Exercises**

1. Program using Basic User Interface Components and Layouts (K1, K2)
2. Create Payroll Processing form using swing (K1, K3)
3. Student Mark Sheet Processing using JDBC (K2, K4)
4. Bank Account Processing using JDBC (K4, K5)
5. Survey form using applets and JDBC (K2, K5)
6. Creating authentication form using servlets (K1, K3)
7. Creating survey form using servlets (K6)
8. Programs using JSP
  - JSP program that creates a table of power of 2 (K1, K3)
  - Factorial of a number (K1, K2)
9. Registration and Login form using JSP (K1, K3)
10. JSP program to process credit card information. (K5)

## SEMESTER I

### PCCSE20 - PRACTICAL II: .NET PROGRAMMING LAB

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCCSE20	<b>Title of the Course:</b> Practical II: .Net Programming Lab	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 3	<b>Marks</b> 100
---------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. This course presents the practical aspects of application development using .Net framework.
2. To learn the technologies of the .NET framework.
3. To cover all segments of programming in C# starting from the language basis, followed by the object oriented programming concepts.
4. To update and enhance skills in writing Windows applications, ADO.NET and ASP.NET.
5. Using XML in C#.NET specifically ADO.NET and SQL server.

#### Course Outcomes (COs)

1. Create user interactive web pages using ASP.NET.
2. Create simple data binding applications using ADO.NET connectivity.
3. Performing Database operations for Windows Form and Web Applications.
4. Create Mobile Application using .NET compact Framework
5. Work with the basic and advanced features of C# language.

CO2	H	L	H	M	L	L
CO3	H	L	L	L	M	M
CO4	M	M	L	H	M	L
CO5	L	L	M	L	M	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Exercises

1. Write a Program to accept a String and Convert the Case of the Characters. (K1, K5)
2. Write a Program to implement a Calculator with Memory and Recall operations. (K1, K4)
3. Develop a menu based .Net application to implement a text editor with Cut- Copy- Paste- Save and Close operations using Master pages. (K2, K6)
4. “How is the book ASP.NET with C# by DreamTech?” Give the user three choices: i) Good ii) Satisfactory iii) Bad. Provide a VOTE button. After user votes- present the result in percentage using labels next to the choices. (K3, K6)
5. Develop an application to perform timer based quiz of 10 questions. (K1, K6)
6. Develop a database application to store the details of students using ADO.NET (K1, K6)
  - a. Develop a database application using ADO.NET to insert- modify- update and delete operations.
  - b. Develop a .Net application using Datagrid to display records.
  - c. Develop a .Net application using Datagrid to add- edit and modify records. (K1, K4)
7. Develop Windows form to
  - a. Display Product details (Product Id, Name, Category and other details) in DataGridView using Dataset and Data Adapter.
  - b. Fill Combobox for listing all the categories from the database using SqlDataReader and DataTable.
  - c. When user select particular category only that category’s products must be displayed in the Grid.
  - d. Generate xml file from above generated dataset.(K4, K6)
8. Create an application for Accessing a SQL Database by Using ADO.NET by connecting to the SQL Server database and call a stored procedure. You then display the data in a Repeater control. (K2, K5)
9. Develop a web application to read the details of a selected country stored in XML database and display back to the user using Web controls. (K1, K4)
10. Write a Program to implement View State and Session State. (K4, K5)

## SEMESTER II

### PCCSF20 – MACHINE LEARNING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSF20	<b>Title of the Course:</b> Machine Learning	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To introduce basic concepts and techniques of Machine Learning.
2. To understand complexity of Machine Learning algorithms and their limitations.
3. To understand modern notions in data analysis oriented computing.
4. To discover patterns in user's data.
5. To make predictions based on user data.

#### Course Outcomes (COs)

1. Understand the basics of Machine Learning.
2. Explore knowledge about concept learning hypothesis.
3. Illustrate the working of basic classifier models.
4. Develop client/server applications and distributed applications using RMI.
5. Know about parametric methods bias and variance.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (18 Hours)

- 1.1 Introduction to Machine Learning – Well Posed Learning Problems – Designing a Learning system (K1, K2)
- 1.2 Perspectives and Issues in Machine Learning (K1, K2)
- 1.3 choosing training experience – target function (K1, K3)
- 1.4 Essential Libraries and Tools – Jupyter Notebook – Numpy – Scipy – Matplotlib – Pandas (K2, K3)
- 1.5 Limitations of inference machines, Approximation and estimation errors (K3, K4)
- 1.6 Simple Application.(K4, K5)

### Unit II (16 Hours)

- 2.1 Inductive bias and bias-variance tradeoff (K1,K3)
- 2.2 Concept Learning and General to Specific Ordering – Introduction – Concept Learning Task (K2, K3)
- 2.3 Inductive Learning Hypothesis – Concept Learning as Search. (K2, K3)
- 2.4 FIND –S: Finding a Maximally Specific Hypothesis (K4, K5)
- 2.5 Representation – Inductive Bias. (K2, K3)
- 2.6 Learning theory, Hypothesis and target class. (K3, K5)

### Unit III (14 Hours)

- 3.1 Supervised Learning – Learning a Class from Examples (K2, K3)
- 3.2 Chervonenkis Dimension – Probably Approximately Correct Learning(K1, K2, K3)
- 3.3 Noise – Learning Multiple Classes (K3, K4)
- 3.4 Linear separability and decision regions, Linear discriminants (K2, K3)
- 3.5 Linear regression, Standard and stochastic gradient descent(K4, K6)
- 3.6 Regression – Model Selection and Generalization. (K5, K6)

### Unit IV (15 Hours)

- 4.1 Decision Tree Learning – Introduction – Decision Tree Representation (K1, K2)
- 4.2 Appropriate Problems for Decision Tree Learning (K2, K3)
- 4.3 Basic Decision Tree Learning Algorithm – Hypothesis Space Search in Decision Tree Learning (K1, K4)
- 4.4 Restriction Biases and Preferences – Issues in Decision Tree Learning. (K4, K5)
- 4.5 Overfitting, pruning of decision trees, Bagging and Boosting (K5.K6)
- 4.6 Dimensionality reduction and Feature selection (K5, K6)

### Unit V (12 Hours)

- 5.1 Parametric Methods – Introduction – Evaluating and Estimator (K1, K5)
- 5.2 Bias and Variance – Baye’s Estimator (K1, K2)
- 5.3 Parametric Classification (K3, K5)
- 5.4 Regression – Model Selection Procedure. (K2, K3, K4)
- 5.5 Evaluation: Performance evaluation metrics (K3, K4.K5)
- 5.6 ROC Curves, Validation methods. (K5.K6)

### Text Books:

1. Andreas C. Muller and Sarah Guide (2019). Introduction to Machine Learning with Python. FifthEdition. Shroff Publishers.
2. E. Alpaydin, Introduction to Machine Learning, 3rd Edition, Prentice Hall of India, 2014.

**Reference Books:**

1. Tom M. Mitchell (2019). Machine Learning. Third Edition Mc Graw Hill
2. Ethem Alpaydin (2016). Introduction to Machine Learning Third Edition PHI Learning.

## SEMESTER II

### PCCSG20 - OPEN SOURCE PROGRAMMING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSG20	<b>Title of the Course:</b> Open Source Programming	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand how server-side programming works on the web.
2. PHP Basic syntax for variable types and calculations.
3. Using PHP built-in functions and creating custom functions.
4. Use PHP to access a MySQL database.
5. To gain knowledge in Linux administration- features and multimedia using Red Hat Linux

#### Course Outcomes (COs)

1. Learned the need of open source technology, open source development model, application of open sources, aspects of open source movement
2. Knowledge about the problems with traditional commercial software.
3. Work with regular expressions, handle exceptions, and validate data.
4. Familiar with basis syntax of PHP, common PHP scripts elements and creating of the server-side scripting using PHP, implement PHP database connectivity, perform operation on database and open source database management system.
5. Familiar with basics of LINUX & SHELL Scripting

CO	PSO

CO4	M	M	M	L	H	M
CO5	L	M	L	M	M	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

**(13 Hours)**

- 1.1 Installing and Configuring PHP: The Basics of PHP Scripts (K1)
- 1.2 The Building Blocks of PHP: Variables – Data Types – Operators and Expression – Constants (K1, K2)
- 1.3 Flow Control Functions in PHP: Switching Flow – Loops – Code Blocks and Browser Output (K1, K3)
- 1.4 Working with Functions: Variable Scope – Saving State between Function Calls with the Static Statement (K1, K4)
- 1.5 More About Arguments – Testing for the Existence of a Function (K1, K5)
- 1.6 Working with Arrays: Array – Creating Arrays – Some Array-Related Constructs and Functions (K1, K3)

### **Unit II**

**(14 Hours)**

- 2.1 Working with objects: creating an object – object inheritance (K1, K3)
- 2.2 Working with strings- dates and time – formatting strings with PHP – investigating strings with PHP – manipulating strings with PHP (K2, K3)
- 2.3 Using date and time functions in PHP – other strings- date and Time functions (K2, K3)
- 2.4 Working with Forms: creating a sample input form – accessing form input with User-defines arrays – combing HTML and PHP code on a single page – working with file uploads (K4, K5, K6)
- 2.5 Working with Cookies and user sessions – introducing cookies – setting and deleting a cookie with PHP (K2, K3)
- 2.6 Session function overview – starting a session – working with session variables – destroying sessions and unsetting variables – using sessions in an Environment with registered users (K3, K6)

### **Unit III**

**(11 Hours)**

- 3.1 Working with files and Directories: including files – using include once – validating files (K2, K3)
- 3.2 Creating and deleting files – opening a file for writing- reading or appending – reading from files – writing or appending to a file (K1, K2, K3)
- 3.3 Working with directories (K3, K4)
- 3.4 Working with images – understanding the image-creation process – necessary modification to PHP (K2, K5)
- 3.5 Drawing a new image – modifying existing images (K4, K5, K6)
- 3.6 Image creation from user input – using images created by scripts (K6)

### **Unit IV**

**(12 Hours)**

- 4.1 Learning Basics SQL commands: Learning the MySQL data Types (K1, K2)
- 4.2 Learning the Table-creation syntax – using DDL and DML (K2, K3)
- 4.3 Frequently used string function in MySQL (K1, K4)
- 4.4 Using Date and Time Function in MySQL (K1, K2)
- 4.5 Interacting with MySQL using PHP: MySQL or MySQL functions (K5)
- 4.6 Connecting to MySQL with PHP – Working with MySQL data (K2, K5, K6)

### **Unit V**

**(10 Hours)**

- 5.1 Case Study: creating a shopping cart mechanism (K5, K6)
- 5.2 An overview of Red Hat Linux – What is Linux? – Common Linux features – Primary advantages of Linux (K1, K2)
- 5.3 Using Linux commands: The shell Interface (K3, K6)
- 5.4 Understanding the Red Hat Linux shell (K2, K3)
- 5.5 Working with the Red Hat Linux file system (K3, K4)
- 5.6 Using the vi text Editor (K5, K6)

## SEMESTER II

### PCCSH20 – WIRELESS COMMUNICATION AND NETWORKS

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSH20	<b>Title of the Course:</b> Wireless Communication and Networks	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide an overview of Wireless Communication Networks area and its applications
2. To enable students to compare and contrast multiple division techniques, mobile communication systems, and existing wireless networks.
3. To explain the various terminology, principles, devices, schemes, concepts, algorithms and different methodologies used in Wireless Communication Networks.
4. List and describe different network standards and protocols.
5. This course introduces the fundamentals of networking and principles of network operations. It also provides knowledge on various generations of cellular systems.

#### Course Outcomes (COs)

1. To design the various wireless networks.
2. Understand the principles behind the networking operation.
3. Examine the services provided in various layers of networks.
4. Classify different technologies followed in various generation of cellular networks.
5. Analyze different types of networks in wireless technology.

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I (18 Hours)**

- 1.1 Introduction to Wireless Communications and Networks – Cellular Mobile - Wireless Networks: Description of Cellular Systems (K1, K2)
- 1.2 Propagation Models for Wireless Networks – Mobile Communication Antennas (K3)
- 1.3 Evolution of Modern Mobile Wireless Communication Systems: Personal Area Networks (PAN) – Low-Tier Wireless System (K3, K4)
- 1.4 Public Wide-area Wireless Networks – Wireless Local Area Networks (WLANs) (K2, K5)
- 1.5 Wireless Technology Divisions – Cellular-WLAN Integration (K1, K2)
- 1.6 All-IP Networks: Vision for 4G(K1, K6)

### **Unit II (16 Hours)**

- 2.1 Multiple Access Techniques in Wireless Communications: FDMA (K1)
- 2.2 TDMA (K2, K3)
- 2.3 SDMA (K2)
- 2.4 CDMA (K2)
- 2.5 GSM: Architecture and Protocols: GSM Network Architecture(K1, K5)
- 2.6 GSM Authentication and Security (K4, K6)

### **Unit III (14 Hours)**

- 3.1 2.5G GPRS: Revisited– GPRS Networks Architecture (K1, K2)
- 3.2 Overview of CDMA - CDMA Evolution (K2)
- 3.3 CDMA IS-95 Systems – Handoff Process in a CDMA System (K3, K5)
- 3.4 3G- UMTS: UMTS Network Architecture – UMTS Interfaces (K4)
- 3.5 UMTS FDD and TDD – UMTS Channels (K5, K6)
- 3.6 UMTS Network Protocol (K4, K5)

### **Unit IV (15 Hours)**

- 4.1 Overview of Internet Protocol and Mobile Internet Protocol: – TCP – UDP – DNS(K2)
- 4.2 Network Address Resolution Protocol (K2, K3)
- 4.3 IP Routing Protocols – Basic Mobile IP (K4)
- 4.4 Problems and Limitations of MIP (K3, K6)
- 4.5 Cellular and WLAN integration (K4, K5)
- 4.6 Internetworking Network Integration(K6)

### **Unit V (12 Hours)**

- 5.1 Fundamentals of Wireless Local Area Networks: IEEE 802.11 – WLAN Transmission Technology – Spread Spectrum Technology (K1, K2)
- 5.2 WLAN System Architecture – IEEE 802.11 Logical Architecture (K3)
- 5.3 Collision Sense Multiple Access with Collision Detection: CSMA/CD (K4)
- 5.4 Collision Sense Multiple Access with Collision Avoidance: CSMA/CA – MAC Frame Format and Fragmentation (K4, K5)
- 5.5 IEEE 802.11 PCF – IEEE 802.11 PHY Layer – 802.11 Systems Performance – Security Issues: Some Basic 802.11 Services (K3, K6)
- 5.6 Roaming Handover and Mobility Management for WLAN – WLAN Applications – Overview of WiMAX Technologies: – IEEE 802.16 Standard Architecture(K2, K6)

**Text Books:**

## SEMESTER II

### PCCSI20 – THEORY OF COMPUTATION

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSI20	<b>Title of the Course:</b> Theory of Computation	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To understand the concepts and operations of matrix algebra needed for computing graphics modeling.
2. To understand and apply the class of functions which transform a finite set into another finite set which relates to input output functions in computer science.
3. To impart discrete knowledge in computer engineering through finite automata and Context free grammars.
4. To develop methods by which computer scientists can describe and analyze the dynamic behavior of discrete systems, in which signals are sampled periodically.
5. To enhance student's ability to understand and conduct mathematical proofs for computation and algorithms.

#### Course Outcomes (COs)

1. Understand and conduct mathematical proofs for computation and algorithms.
2. Show a competent understanding of the basic concepts of graph theory.
3. Explain the models of computation, including formal languages, grammars and automata.
4. Recognize and comprehend formal reasoning about languages.
5. Expand knowledge of pushdown automata and Turing machines.

CO5	L	M	L	H	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (13 Hours)

- 1.1 Logic and Propositional Calculus: Introduction- Propositions and Compound Propositions (K1)
- 1.2 Basic Logical Operations – Tautologies and Contradictions – Logical Equivalence (K1, K2)
- 1.3 Algebra of Propositions – Conditional and Bi conditional Statements (K2, K3)
- 1.4 Argument- Logical Implications- Propositional Functions (K3, K4)
- 1.5 Quantifiers- Negation of Quantified Statements (K4)
- 1.6 Normal Forms- Predicate Logic (K4)

### Unit II (14 Hours)

- 2.1 Graph Theory: Introduction, Data Structures (K1)
- 2.2 Graphs and Multi graphs- Sub graphs, Isomorphic and Homeomorphic Graphs- Paths, Connectivity (K2)
- 2.3 The Bridges of Konigsberg, Traversable Multigraphs (K3)
- 2.4 Labeled and Weighted Graphs (K4)
- 2.5 Complete, Regular and Bipartite Graphs (K4, K5)
- 2.6 Tree Graphs- Planar Graphs-Graph Coloring (K4, K5)

### Unit III (11 Hours)

- 3.1 Deterministic finite automata (DFA) (K3, K4)
- 3.2 Nondeterministic finite automata (NFA) (K3, K4)
- 3.3 Equivalence of DFA and NFA, and regular expressions (K3)
- 3.4 Regular expression and regular languages (K3, K4)
- 3.5 Non-regular languages and pumping Lemma (K4)
- 3.6 Closure properties (K4)

### Unit IV (12 Hours)

- 4.1 Grammar Introduction– Types of Grammar (K1)
- 4.2 Context Free Grammars and Languages– Derivations and Languages (K1, K2)
- 4.3 Ambiguity- Relationship between derivation and derivation trees (K1, K3)
- 4.4 Simplification of CFG (K2)
- 4.5 Elimination of Useless symbols (K5)
- 4.6 Unit productions – Null productions (K5)

### Unit V (10 Hours)

- 5.1 Pushdown automata and grammar simplification (K3)
- 5.2 Chomsky normal form (K4)
- 5.3 Pumping lemma for context-free languages (K4)
- 5.4 Turing Machines: Formal definition and behavior (K3)
- 5.5 Languages of a TM, TM as accepters (K4)
- 5.6 Types of TMs (K4)

### Text Books:

1. Seymour Lipschutz, Marc Las Lipson, Varsha H Patil (2010). Discrete Mathematics, Fourth Edition, Tata McGraw Hill.
2. Hopcroft and Ullman (2002). Introduction to Automata Theory, Languages and Computation, Narosa Publishing House, Delhi.

## SEMESTER II

### PECSC20 - ELECTIVE II A: CRYPTOGRAPHY AND NETWORK SECURITY

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PECSC20	<b>Title of the Course:</b> Elective II A: Cryptography and Network Security	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To know about various encryption techniques.
2. To understand the concept of Public key cryptography.
3. To explore the working principles and utilities of various cryptographic algorithms including secret key cryptography, hashes and message digests, and public key algorithms.
4. To understand various protocols for network security to protect against the threats in the networks.
5. To develop the ability to use existing cryptographic utilities to build programs for secure communication.

#### Course Outcomes (COs)

1. Apply the knowledge of cryptographic checksums and evaluate the performance of different message digest algorithms for verifying the integrity of varying message sizes.
2. Understand network security basics, analyze different attacks on networks and evaluate the performance of firewalls and security protocols like SSL, IPsec, and PGP.
3. Analyze and apply system security concept to recognize malicious code.
4. Able to do research in the emerging areas of cryptography and network security.
5. Protect any network from the threats in the world.

## Course Syllabus

### Unit I (16 Hours)

- 1.1 Introduction – Classical Encryption techniques: Symmetric Cipher Model (K2)
- 1.2 Substitution Techniques – Transposition Techniques – Steganography(K2)
- 1.3 Block Ciphers and the Data Encryption Standards: Principles(K2)
- 1.4 DES – Strength of DES(K2)
- 1.5 Differential and Linear Cryptanalysis(K2)
- 1.6 Block Cipher Design principles (K2)

### Unit II (16 Hours)

- 2.1 Advanced Encryption Standard: Evaluation Criteria for AES (K4)
- 2.2 AES cipher – Multiple Encryption and Triple DES (K4)
- 2.3 Block Cipher Modes of Operation. Confidentiality Using Symmetric Encryption.(K4)
- 2.4 Placement of Encryption Function – Traffic Confidentiality(K4)
- 2.5 Key Distribution(K4)
- 2.6 Random Number Generation(K4)

### Unit III (15 Hours)

- 3.1 Introduction to Number Theory – Prime numbers(K2)
- 3.2 Fermat's and Euler's Theorem – Testing for Primality (K2)
- 3.3 The Chinese Remainder Theorem Public Key Cryptography and RSA (K2)
- 3.4 Principles of Public Key Cryptosystems –RSA Algorithm(K2)
- 3.5 Elliptical Curve Algorithm - Key Management(K2)
- 3.6 Diffie -Hellman Key Exchange – Kerberos(K2)

### Unit IV (14 Hours)

- 4.1 Message Authentication and Hash functions(K2, K4)
- 4.2 Authentication Requirements – Authentication Functions(K2, K4)
- 4.3 MAC – Hash Functions(K2, K4)
- 4.4 Security of Hash functions and MACs (K2, K4)
- 4.5 Digital Signatures and Authentication Protocols: Digital Signatures (K2, K4)
- 4.6 Authentication Protocols – Digital Signature Standard (K2, K4)

### Unit V (14 Hours)

- 5.1 Intruders – Intrusion Detection (K2, K3)
- 5.2 Password Management- Malicious Software (K2, K3)
- 5.3 Viruses and Related Threats – Virus Countermeasure (K2, K3)
- 5.4 Distributed Denial Of Service Attacks (K2, K3)
- 5.5 Firewall – Design Principles (K2, K3)
- 5.6 Trusted System (K2, K3)

## SEMESTER II

### PECSD20 - ELECTIVE II B: SOFT COMPUTING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PECSD20	<b>Title of the Course:</b> Elective II B: Soft Computing	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To Learn and Understand basics of Neural Networks.
2. Introduce and use the idea of neural networks and fuzzy logic.
3. To Learn Basics of Classification and Regression Algorithms.
4. Introduce and use the concepts of Genetic algorithm and its applications to soft computing.
5. Familiarize with soft computing concepts.

#### Course Outcomes (COs)

1. Describe Soft Computing Techniques and their roles in building Intelligent Machines
2. Analyze various fuzzy models in developing fuzzy inference system to be appropriate with specific real time problems.
3. Apply Specific Unsupervised and Supervised Neural Network to find the approximate solutions to real world Problems.
4. Use genetic algorithm to combinatorial Optimization Problems.
5. Present the feasibility of applying a Soft Computing methodology for specific problem.

CO5	M	M	L	M	L	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (13 Hours)

- 1.1 Artificial Neural Networks: Introduction-History of Artificial Neural Network(K1)
- 1.2 Knowledge Based Information processing: Neural Information Processing-Hybrid Intelligence (K1)
- 1.3 Basic Neural Computational Model: Basic Concepts of Neural Networks – Network Properties - Node Properties System Dynamics (K1)
- 1.4 Single Layer Perceptron: Multilayer Perceptron - Adalines- Competitive Learning Hebbian learning (K1)
- 1.5 Supervised and Unsupervised: Explanation Based Learning- BACON learning -meta dendral (K1)
- 1.6 Neural Network Learning: Backpropagation- Applications (K2, K5)

### Unit II (14 Hours)

- 2.1 Fuzzy System: Set Theoretic Operations MF formulation and Parametrization Compositional Rule of Interface (K1)
- 2.2 Fuzzy sets and Fuzzy reasoning: Single rule with Single Antecedent – Single rule with Multiple Antecedent – Multiple rules with Multiple Antecedent(K1)
- 2.3 Decision making under Fuzzy States and FuzzyActions (K2, K3)
- 2.4 Fuzzy function – Fuzzy Decomposition(K2, K3)
- 2.5 Fuzzy control methods: Mamdani fuzzy models - Sugeno fuzzy models - Tsukamoto fuzzy model (K4)
- 2.6 Fuzzy decision making: Input space Partitioning - Grid Partitioning - Application (K4, K5)

### Unit III (11 Hours)

- 3.1 Neuro Fuzzy modeling:Adaptative Neuro fuzzy Inference systems - Introduction -ANFIS Architecture – Hybrid Learning Algorithm (K3)
- 3.2 ANIFS As a Universal Approximation: Classification and Regression trees - Introduction Decision trees (K3)
- 3.3 CART Algorithm for Tree Introduction: Tree Growing - Classification Trees(K3)
- 3.4 Regression Trees: Tree Growing - Tree Pruning (K3)
- 3.5 Rule Based Structure Identification: Introduction Input Selection (K3)
- 3.6 Rule Based Organization: Neuro fuzzy control I - Neuro fuzzy control I(K3)

### Unit IV (12 Hours)

- 4.1 Introduction: Genetic Algorithm - Encoding Binary Encoding - Real Number Bumbing - Integer or literal Permutation encoding (K3)
- 4.2 Crossover: Single point crossover - Multi point Crossover - Uniform Crossover(K2)
- 4.3 Mutation – Single point Mutation - Multipoint Mutation (K3)
- 4.4 Selection – Roulette Wheel Selection - Rank Selection - Tournament Selection - Steady State selection (K4)
- 4.5 Generic Algorithm Parameters - Population size - Crossover rate - Mutation rate (K5)
- 4.6 Applications of Generic Algorithm - Advantages and Disadvantages of Genetic Algorithm (K5)

### Unit V (10 Hours)

- 5.1 Introduction to Neuro fuzzy and Soft computing - Soft computing Constituents and conventional AI (K1, K3)
- 5.2 Conventional AI to computational Intelligence Neuro Fuzzy and Soft computing Characteristics (K2)
- 5.3 Search Strategies for AI Production systems Backtracking Strategies - Graph Search

Strategies (K2)

- 5.4 Heuristic Graph Search Procedures -Algorithm A - The Admissibility of A\* - Comparison of AR Algorithms (K3, K4)
- 5.5 Predicate calculator in AI - Frames - Frames as sets and Instances - Semantic Nets (K4, K5)
- 5.6 Hybrid Model Applications - Fuzzy implement using Matlab (K4, K5)

**Text Books:**

## SEMESTER II

### PCCSJ20 - PRACTICAL III: MACHINE LEARNING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSJ20	<b>Title of the Course:</b> Practical III: Machine Learning	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 3	<b>Marks</b> 100
----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To work on important concepts of Machine Learning.
2. Practical implementation of algorithms with sample data.
3. To develop skills of using machine learning algorithms for solving problems.
4. Developing skills in predictive analytics using ML algorithms.
5. To gain experience of doing independent research.

#### Course Outcomes (COs)

1. Be capable of confidently applying common Machine Learning algorithms in practice and Implementing their own.
2. Be capable of performing distributed computations.
3. To be capable of performing experiments in Machine Learning using sample data.
4. Understand a wide variety of learning algorithms.
5. Understand how to evaluate models generated from data

CO5	L	M	H	L	L	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Exercises**

1. Linear Regression (K1, K2)
2. Logistic Regression without CSV file (K1, K3)
3. Logistic Regression with CSV file (K2, K4)
4. Classification using SVM (K4, K5)
5. k-means algorithm (K2, K5)
6. Decision Tree Algorithm (K1, K3)
7. Random Forest Algorithm (K6)
8. Naive Bayes Algorithm to find Accuracy. (K1, K3)
9. JSP program to process credit card information(K5)

## SEMESTER II

### PCCSK20 - PRACTICAL IV- OPEN SOURCE PROGRAMMING LAB

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCCSK20	<b>Title of the Course:</b> Practical IV: Open Source Programming Lab	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Demonstrate different open source technology like Linux, PHP & MySQL with different packages.
2. To understand the importance of the web as an effective medium of communication
3. Explore programs of PHP with MySQL connection.
4. Use PHP to access a MySQL database.
5. Illustrate Linux commands for programming.

#### Course Outcomes (COs)

1. Explore different open source technology like Linux, PHP & MySQL with different packages.
2. Implement static, dynamic and interactive web pages and web applications.
3. Develop basic skills in analyzing the usability of a web site.
4. Execute programs of PHP with MySQL connection.
5. Execute Linux commands for programming.

CO5	L	M	H	M	L	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Exercises

1. Write a server side PHP program that displays marks- total- grade of a student in tabular format by accepting user inputs for name- number and marks from a HTML form. (K1, K6)
2. Write a PHP program implement Simple Calculator Operations. (K6)
3. Write a PHP program interface to create a database and to insert a table into it.
  - a. Use classes to create a table. (K2)
  - b. Create a directory - and to read contents from the directory. (K3)
4. a. Write a PHP program to display a digital clock which displays the current time of the server.(K6)  
b. Write a Program and check message passing mechanism between pages. (K2, K4)
5. Create a MYSQL table and execute queries to read – add - remove and modify a record from that table. (K6)
6. a. Write a shell script to stimulate the file commands. (K1, K2)  
b. Write a shell script program to find out the maximum and minimum number of the given series. (K6)
7. a. Write a shell script to show the system configuration. (K1, K2)  
b. Write a shell script program to check whether the given string is palindrome or not. (K6)
8. a. Write a shell script to implement the following: pipes-Redirection and tee commands.(K1,K2)  
b. Write a Shell Script program to develop a calculator application. (K6)
9. a. Write a shell script to implement the filter commands. (K1, K2)  
b. Write a shell script to print the multiplication table of the given argument using for loop. (K6)
10. a. Write a shell script to swap two numbers. (K6)  
b. Write a shell script to find greatest of given three numbers. (K6)

## SEMESTER III

### PCCSL20 - WEB SERVICES

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCCSL20	<b>Title of the Course:</b> Web Services	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To understand Web Services and its implementation model.
2. Understand the principles of SOA, its Principles and Benefits.
3. Understand XML concepts.
4. Understand paradigms needed for testing Web Services.
5. To learn how to implement and deploy Web Services.

#### Course Outcomes (COs)

1. Efficiently use market leading environment tools to create and consume web services.
2. Identify and select the appropriate framework components in creation of web service solution.
3. Able to apply SOAP, HTTP and UDDI services in the web applications.
4. Apply SOAP principles to creation of web service solutions.
5. Able to know the structure of XML and to design and store data in XML.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (18 Hours)

- 1.1 Evolution of Distributed Computing: Basics of Distributed Computing - Evolution of Middleware (K1, K2)
- 1.2 Importance of Distributed Computing (K1)
- 1.3 Web Service Architecture (K1, K3)
- 1.4 Client Server Applications – CORBA – Java RMI - Microsoft DCOM - Message Oriented Middleware (K1, K4)
- 1.5 Common Challenges in Distributed Computing - The Emergence of Web Services (K1)
- 1.6 SOA – Architecture (K1, K3)

### Unit II (16 Hours)

- 2.1 Introduction to Web Services: What are Web Services? Motivation and Characteristics – Use of Web Services (K1, K2)
- 2.2 Basic Operational Model of Web Services (K1)
- 2.3 Core Web Services Standards (K1, K2)
- 2.4 Other industry Standards Supporting Web Services (K3)
- 2.5 Challenges in Web Services (K3)
- 2.6 Web Services Software and Tools-Benefits of Web Services. (K1, K4)

### Unit III (14 Hours)

- 3.1 Web Services Architecture and Technologies: Building the Web Service Architecture – Web Service Architecture and its Core Building Blocks (K1, K2)
- 3.2 Tools of the Trade - SOAP-WSDL-UDDI (K2, K3)
- 3.3 Web Services Communication Models - RPC Based Communication Models - Messaging Based Communication Model (K3, K4)
- 3.4 Implementing Web Services (K4)
- 3.5 To develop java-based Web Services - Developing Web Services using J2EE (K4, K6)
- 3.6 Description and Discovery of Web Services: Web Services Description Language (WSDL)-Universal Description, Discovery, and Integration (UDDI)(K4)

### Unit IV (15 Hours)

- 4.1 Developing Web Services using SOAP: XML based Protocols and SOAP (K6)
- 4.2 Anatomy of a SOAP Message (K2)
- 4.3 SOAP Encoding (K1, K4)
- 4.4 SOAP Message Exchange Protocol (K4)
- 4.5 SOAP Communication - SOAP Messaging - SOAP Bindings for Transport Protocols (K4, K5)
- 4.6 SOAP Security - Building SOAP Web Services. (K3, K6)

### Unit V (12 Hours)

- 5.1 Creating .NET Interoperability: Means of Ensuring Interoperability (K6)
- 5.2 Microsoft .NET Framework: An Overview (K1, K2)
- 5.3 Challenges in Creating Web Services Interoperability. (K1, K6)
- 5.4 XML Processing and Data Binding with Java API's: XML Basics (K1, K2)
- 5.5 Java Architecture for XML Binding – Data Binding Generation - Marshalling XML - Unmarshalling Java (K1, K4)
- 5.6 Sample Code for XML Data Binding. (K6)

## SEMESTER III

### PCCSM20 – DISTRIBUTED AND CLOUD COMPUTING

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCCSM20	<b>Title of the Course:</b> Distributed and Cloud Computing	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To explain distributed system and cloud models.
2. To learn the cloud environment, building software systems and components that scale to millions of users in modern internet and cloud concepts .
3. To understand cloud service models including Iaas, Paas, Saas and developing cloud based software applications on top of cloud platform.
4. To distribute a single task among multiple computers and to solve it quickly by maintaining coordination between them.
5. To apply distribute computational model and understand the need for cloud computing.

#### Course Outcomes (COs)

1. Understand the concepts of cloud Architecture and its services.
2. Classify different services providers and its services, tools.
3. Demonstrate the paradigms and to map applications.
4. Analyze the best resource for cloud computing.
5. Assess virtualization in cloud.

CO5	L	H	M	H	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (16 Hours)

- 1.1 Cloud Computing Fundamentals: Motivation for Cloud Computing - Defining Cloud Computing (K1)
- 1.2 Principles of Cloud computing (K1)
- 1.3 Cloud Characteristics – Elasticity in Cloud – On-demand Provisioning (K2)
- 1.4 Cloud Computing Architecture and Management: Cloud Architecture (K2, K3)
- 1.5 Cloud Deployment Models: Private Cloud - Public Cloud - Hybrid Cloud (K2, K3)
- 1.6 NIST Applications on the Cloud (K2)

### Unit II (16 Hours)

- 2.1 Cloud Service Models: Infrastructure as a Service (K1, K3)
- 2.2 Platform as a Service (K1, K3)
- 2.3 Software as a Service (K1, K3)
- 2.4 Cloud Storage (K1, K5)
- 2.5 Advantages of Cloud Storage (K1, K2)
- 2.6 Cloud Service Providers: Google - Amazon Web Services – Microsoft – Manjrasoft – S3 (K5)

### Unit III (15 Hours)

- 3.1 Parallel and Distributed Programming Paradigms (K1, K3)
- 3.2 MapReduce, Twister and Iterative MapReduce (K1, K3)
- 3.3 Hadoop Library from Apache (K1, K3)
- 3.4 Mapping Applications (K1, K2)
- 3.5 Google App Engine, Amazon AWS (K1, K2)
- 3.6 Cloud Software Environments – CloudSim (K1, K2)

### Unit IV (14 Hours)

- 4.1 Clustering for Massive Parallelism (K1, K2)
- 4.2 Computer Clusters (K1, K3)
- 4.3 MPP Architectures (K1, K3)
- 4.4 Design Principles of Computer Clusters (K1, K4)
- 4.5 Cluster Job and Resource Management (K2)
- 4.6 Case Studies of Top Supercomputer Systems (K1)

### Unit V (14 Hours)

- 5.1 Implementation Levels of Virtualization (K4)
- 5.2 Virtualization Structures/Tools and Mechanisms (K4)
- 5.3 Virtualization of CPU, Memory, and I/O Devices (K4)
- 5.4 Virtual Clusters (K1)
- 5.5 Resource Management (K2)
- 5.6 Virtualization for Data-Center Automation (K3)

### Text Books:

1. Kai Hwang, Geoffrey C. Fox, Jack G. Dongarra (2012). Distributed and Cloud Computing, From Parallel Processing to the Internet of Things. Morgan Kaufmann Publishers.
2. K. Chandrasekaran (2015). Essentials of cloud computing, CRC Press.

**Reference Books:**

## SEMESTER III

### PCCSN20 – PRINCIPALS OF COMPILER DESIGN

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCCSN20	<b>Title of the Course:</b> Principals of Compiler Design	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand the basic concepts of compiler.
2. Discuss the functionality of Lexical analysis.
3. Illustrate the concepts of syntax analysis through parser and its types.
4. Define and List the intermediate codes.
5. Summarize the working features of Code Generation.

#### Course Outcomes (COs)

1. Explain the concepts of compiler and discuss the Code Generation
2. Describe the functionality of Lexical analysis.
3. Describe the functionality of Syntax analysis.
4. Define the storage organization and List the intermediate codes.
5. Summarize the working features of Code Generation.
6. Apply their basic knowledge of Data Structure to design Symbol Table, Lexical Analyzer, Intermediate Code Generation, and Parser.

CO4	H	L	M	M	L	H
CO5	L	M	M	L	H	M

(Low - L, Medium – M, High - H)

#### Course Syllabus

##### Unit I

(13 Hours)

- 1.1 Introduction: The Structure of a Compiler (K2, K4)
- 1.2 Lexical Analysis – BootStrap (K4)
- 1.3 Syntax Analysis- Semantic Analysis-Intermediate Code Generation (K4)
- 1.4 Code Optimization - Code Generation (K4, K5)
- 1.5 Symbol Table Management - The Grouping of Phases into Passes (K4, K5)
- 1.6 Compiler Construction Tools - The Evolution of Programming Languages (K3, K5)

**Unit II** (14 Hours)

- 2.1 Lexical Analysis: The Role of the Lexical Analyzer (K2, K4)
- 2.2 Input Buffering - Specification of Tokens (K4)
- 2.3 Recognition of Tokens (K2)
- 2.4 Finite Automata- Nondeterministic Finite Automata (K2)
- 2.5 Conversion of an NFA to a DFA (K5)

**Unit III** (11 Hours)

- 3.1 Construction of an NFA from a Regular Expression (K6)
- 3.2 Syntax Analysis: Introduction (K2)
- 3.3 Context-Free Grammars (K3)
- 3.4 Top-Down Parsing (K6)
- 3.5 Bottom-Up Parsing (K6)

**Unit IV** (12 Hours)

- 4.1 Introduction to LR Parsing (K2)
- 4.2 Intermediate Code Generation: Variants of Syntax Trees (K2, K4)
- 4.3 Three-Address Code (K2, K4)
- 4.4 Types and Declarations (K3)
- 4.5 Translation of Expressions. (K4, K5)

**Unit V** (10 Hours)

- 5.1 Code Generation: Design of a Code Generator (K2, K4)
- 5.2 Basic Blocks and Flow Graphs- Optimization of Basic Blocks (K2, K5)
- 5.3 Peephole Optimization- the Principal Sources of Optimization (K4, K2)
- 5.4 Introduction to data flow Analysis (K2)
- 5.5 Apply their basic knowledge of Data Structure to design Symbol Table, Lexical Analyzer, Intermediate Code Generation, Parser (Top Down and Bottom Up Design) (K3)

## SEMESTER III

### PECSE20 - ELECTIVE III A: INTERNET OF THINGS

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PECSE20	<b>Title of the Course:</b> Elective III A: Internet of Things	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To understand smart objects and IoT Architectures.
2. To learn various protocols at the different layers for IoT.
3. To develop prototype systems using Arduino.
4. To learn the design and development process involved in creating a cloud based application.
5. To apply the concept of Internet of Things in the real world scenario.

#### Course Outcomes (COs)

1. Understand the fundamentals of IoT.
2. Analyze different connectivity technologies for IoT.
3. Design a portable IoT using Arduino / equivalent boards and relevant protocols.
4. Deploy an IoT application and connect to the Fog.
5. Develop IoT applications with different platform and frameworks.

CO5	L	H	M	M	L	M

(Low - L, Medium – M, High – H)

## Course Syllabus

### Unit I (17 Hours)

- 1.1 Introduction to Internet of Things: Introduction - Characteristics of IoT (K1)
- 1.2 Applications of IoT - IoT Categories - Sensors (K1, K2)
- 1.3 Actuators - IoT Components and Implementation (K1, K3)
- 1.4 Challenges of IoT - IoT Networking: Connectivity Terminologies (K2)
- 1.5 Gateway Prefix Allotment (K3, K4)
- 1.6 IoT Identification and Data Protocols (K4, K6)

### Unit II (14 Hours)

- 2.1 Connectivity Technologies: IEEE802.15.4 - ZigBee (K2, K3)
- 2.2 RFID - HART and Wireless HART - NFC - Bluetooth (K4, K6)
- 2.3 Z-Wave - Wireless Sensor Networks: Components of Sensor Nodes (K3)
- 2.4 Challenges in WSN - Applications of WSN - Wireless Multimedia Sensor Network (K2)
- 2.5 Wireless Nano sensor Networks - Under Water Acoustic Sensor Networks (K2, K4)
- 2.6 UAV Networks and M2M Communication: UAV Components - UAV Networks - M2M Communication (K2, K6)

### Unit III (15 Hours)

- 3.1 Programming with Arduino: Features of Arduino - Program Elements (K2)
- 3.2 Cloud Computing: Characteristics - Deployment Models - Service Models (K1, K2)
- 3.3 Service Management - Cloud Security (K2, K3)
- 3.4 Sensor Cloud: Comparison with WSN - Sensor Cloud Architecture (K4, K6)
- 3.5 Advantages of Sensor Cloud - Sensor Cloud Services Life Cycle Model (K3)
- 3.6 Sensor Cloud Applications - Issues and Challenges in Sensor Cloud (K1, K3)

### Unit IV (16 Hours)

- 4.1 Fog Computing: Requirements of IoT - Architecture of Fog (K1, K2)
- 4.2 Working - Advantages - Applications - Challenges in Fog (K2, K3)
- 4.3 Smart Homes: Smart Home Implementations - House Area Networks (K3, K6)
- 4.4 Smart Home benefits and Issues (K4)
- 4.5 Smart Grids: Characteristics of Smart Grid (K2, K3)
- 4.6 Components of Smart Grid - Smart Grid and Cloud (K1, K5)

### Unit V (12 Hours)

- 5.1 Smart Cities: Characteristics of Smart Cities (K1, K2)
- 5.2 Smart City Framework (K2, K6)
- 5.3 Challenges in Smart City - Data Fusion - Smart Parking (K3, K6)
- 5.4 Industrial IoT: IIoT Requirements (K3, K4)
- 5.5 Applications of IIoT (K1, K4)
- 5.6 Benefits and Challenges of IIoT (K2, K3)

#### Text Books:

## SEMESTER III

### PECSF20 - ELECTIVE III B: MULTIMEDIA COMMUNICATION

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PECSF20	<b>Title of the Course:</b> Elective III B : Multimedia Communication	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Understanding the Multimedia Communications Systems, Application and Basic Principles.
2. To acquire the basic knowledge of multimedia communication technologies including audio, image, video, text compression techniques and distributed multimedia system.
3. Explanation about signal processing aspects involved in multimedia including signal properties.
4. Application of coding techniques in recent applications for data storage and communication of multimedia.
5. Analysis/comparison of various coding techniques, case study and problem solving as per given data.

#### Course Outcomes (COs)

1. Understand the current state-of-the-art developments in Internet technologies for multimedia communications
2. Understand and apply the principles used in designing multimedia protocols, and standard protocols that are designed the way that they are.
3. Understand the system design principles of multimedia communications systems.
4. Solve problems and design simple networked multimedia systems
5. Think critically and learn independently.

CO2	M	M	L	H	L	M
CO3	L	M	M	M	L	M
CO4	L	L	M	L	H	M
CO5	M	L	L	M	L	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I (13 Hours)**

- 1.1 Multimedia communication: Introduction Networks-Multimedia Applications(K2)
- 1.2 Multimedia Information representation: Introduction –Principles - text-Image - Audio - video (K2)
- 1.3 Broadcast Television – Digital video.Text and Image Compression: Compression principles(K2)
- 1.4 Text compression – Image compression (K2)
- 1.5 Audio and video compression: Audio compression (K2)
- 1.6 Video compression – Principles, H.261, H.263, MPEG, MPEG-1 (K2)

### **Unit II (14 Hours)**

- 2.1 Standards for Multimedia Communications: Reference Models (K1, K2)
- 2.2 Interpersonal Communications. Digital Communication Basis: Transmission Media (K1, K2)
- 2.3 Sources of Signal Impairment – Asynchronous Transmission – Synchronous Transmission (K1, K2)
- 2.4 Error Detection Methods. Circuit Switched Networks: Transmission Systems (K1, K2)
- 2.5 Analog, PSTN Modems, Digital (K1, K2)
- 2.6 Switching Systems –Signal Systems (K1, K2)

### **Unit III (11 Hours)**

- 3.1 Enterprise Networks: Introduction- Lans (K4, K6)
- 3.2 Ethernet – Token Ring – Bridges – FDDI (K4, K6)
- 3.3 High Speed Lans - LAN Protocols. The Internet: IP Datagram (K4, K6)
- 3.4 IP Address – ARP And RARP (K4, K6)
- 3.5 Routing Algorithms - Static Routing, Flooding, Vector Routing (K4, K6)
- 3.6 Shortest Path – ICMP - Ipv6 (K4, K6)

### **Unit IV (12 Hours)**

- 4.1 Transport Protocols: TCP/IP Protocol Suite - TCP (K1, K2)
- 4.2 User Service, Protocol Operations – UDP - User Service (K1, K2)
- 4.3 Protocol Operations. Application Support Functions: ASN.1-Security (K1, K2)
- 4.4 Data Encryption - Terminology (K1, K2)
- 4.5 Basics Techniques - Authentication (K1, K2)
- 4.6 Pubic Key Certification Authorities (K1, K2)

### **Unit V (10 Hours)**

- 5.1 Internet Applications: DNS - Email (K1)
- 5.2 FTP – TFTP - Internet Telephony – SNTP (K1)
- 5.3 World Wide Web: Urls And HTTP –HTML (K1)
- 5.4 Text, List, Color, Images, Tables, Forms (K1)
- 5.5 Java And Java Script- Security (K1)
- 5.6 Web Operations (K1)

### **Text Books:**

## SEMESTER III

### PECSG20 - ELECTIVE IV A: BIG DATA ANALYTICS

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PECSG20	<b>Title of the Course:</b> Elective IV A: Big Data Analytics	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To learn more about the trends in Big Data and how they impact the business world like Risk Marketing – Healthcare - Financial Services - etc.
2. To study the basic technologies that forms the foundations of Big data.
3. Explains this new technology and how companies can use them effectively to gather the data that they need and glean critical insights.
4. To understand the Big data platform and Usecases.
5. To study different types case studies on the current research and applications of the Hadoop and big data in industry.

#### Course Outcomes (COs)

1. Define the big data, types of data and understand the need of big data analytics.
2. Describe the Hadoop architecture and File system.
3. Apply the MapReduce Programming model for real-world problems.
4. Learn the concepts of Main data streams.
5. Demonstrate the working of clusters.

CO4	H	M	H	M	H	L
CO5	L	H	M	H	L	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I (13 Hours)

- 1.1 Understanding Big Data: Types of Digital Data - Classification of digital data (K2)
- 1.2 Introduction to Big data - Characteristics of data (K2)
- 1.3 Evolution of Big data - Definition of Big data (K2, K5)
- 1.4 Challenges with Big data - Sudden Hype around Big Data Analytics (K4)
- 1.5 Classification of Analytics - Data Science - Terminologies used in Big Data Environments - Few Top Analytics tools (K2, K4)
- 1.6 NoSQL - Types of NoSQL Databases - Advantages of NoSQL (K2)

### Unit II (14 Hours)

- 2.1 Basics of Hadoop: Introduction to Hadoop - Basics – RDBMS vs Hadoop (K2, K4)
- 2.2 Distributed computing challenges - History of Hadoop (K4)
- 2.3 Hadoop overview – use case of Hadoop – Hadoop distributors (K5)
- 2.4 Hadoop Distributed File system – Processing data with Hadoop (K3)
- 2.5 MongoDB: Introduction to MongoDB – Basics of MongoDB - Terms used in RDBMS and MongoDB (K2)
- 2.6 Data Types in MongoDB - MongoDB Query Language (K2, K3)

### Unit III (11 Hours)

- 3.1 Cassandra: Introduction to Cassandra - Apache Cassandra - An Introduction (K2)
- 3.2 Features of Cassandra (K2)
- 3.3 Introduction to MAPREDUCE Programming (K2)
- 3.4 Hive: Introduction to Hive - Hive Architecture (K2, K3)
- 3.5 Hive Data Types - Hive File Format - Hive Query Language (K4)
- 3.6 RCFile Implementation – User Defined Function (UDF) (K3)

### Unit IV (12 Hours)

- 4.1 Mining Data Streams: Data Model (K3)
- 4.2 Sampling Data in the Stream – Filtering Streams (K4, K5)
- 4.3 Counting Distance Elements in a Stream (K4, K5)
- 4.4 Estimating Moments (K4, K5)
- 4.5 Counting Ones in Window (K4)
- 4.6 Decaying Windows (K4)

### Unit V (10 Hours)

- 5.1 Clustering: Introduction to Clustering Techniques (K2, K5)
- 5.2 Hierarchical Clustering (K2 K5)
- 5.3 Algorithms – K - Means – CURE (K5)
- 5.4 Clustering in Non\_ Euclidean Spaces (K5)
- 5.5 Streams and Parallelism (K5)
- 5.6 Case Study: Advertising on the Web (K6)

### Text Books:

## SEMESTER III

### PECSH20 – ELECTIVE IV B: SOFTWARE PROJECT MANAGEMENT

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PECSH20	<b>Title of the Course:</b> Elective IV B : Software Project Management	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Define and highlight importance of software project management.
2. Describe the software project management activities.
3. To highlight different techniques for software cost estimation and activity planning.
4. To discuss the notion of risks and the risk management process.
5. Train software project manager and other individuals involved in software project planning.

#### Course Outcomes (COs)

1. Estimate project cost and perform cost - benefit evaluation.
2. Projects perform project scheduling, activity network analysis and risk management
3. Apply schedule and cost control techniques for project monitoring including contract management.
4. Apply quality models in software projects for maintaining software quality and reliability.
5. Use suitable project organization structure, leadership, decision and motivation styles, proper safety and ethical practices and be responsible to the society.

CO5	L	M	H	L	H	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

**(13 Hours)**

- 1.1 Project Definition - Software Project Basics (K1)
- 1.2 Introduction - Types of Software Project (K2, K4)
- 1.3 Classification of Software projects - Activities covered by software project management (K2, K3)
- 1.4 Methods and Methodologies (K4)
- 1.5 Stake holders - Business Case (K3, K5)
- 1.6 Management Control - Software process and process models (K2, K4)

### **Unit II**

**(14 Hours)**

- 2.1 Project Planning Infrastructure (K2, K4)
- 2.2 Process Database (K2)
- 2.3 Contents of PDB-A sample entry-the capability baseline- Process asserts and body of knowledge system (K4, K5)
- 2.4 process planning - Infosys development process (K2, K4)
- 2.5 Requirement change management (K4)
- 2.6 Process planning for the ACIC project (K3, K4)

### **Unit III**

**(11 Hours)**

- 3.1 Effort estimation and scheduling (K2, K3, K4)
- 3.2 Effort estimation models - Estimation schedule (K3, K5)
- 3.3 Effort Estimation - Scheduling (K3, K4)
- 3.4 Quality Planning - Quality Concepts-Quantitative quality management planning (K2, K4, K6)
- 3.5 Defect prevention planning (K2, K5)
- 3.6 The quality plan of the ACIC project (K2)

### **Unit IV**

**(12 Hours)**

- 4.1 Risk management - Concept of risk and risk management (K2, K4)
- 4.2 Risk assessment (K2, K3)
- 4.3 Risk Control – Examples - Measurement and Tracking planning (K3, K5)
- 4.4 Concepts in measurement - measurements (K2)
- 4.5 Project tracking (K4)
- 4.6 The ACIC measurement and tracking plan (K2, K4)

### **Unit V**

**(10 Hours)**

- 5.1 The project management plan (K2, K4)
- 5.2 Team management - customer communication and issue resolution (K5)
- 5.3 The structure of the project management plan (K2, K4)
- 5.4 The ACIC project plan (K2, K3)
- 5.5 Reviews - The Review process (K2, K3)
- 5.6 Data Collection - Monitoring and Control (K2)

### **Text Books:**

## SEMESTER III

### PCCSO20 – PRACTICAL V: WEB SERVICES LAB

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCCSO20	<b>Title of the Course:</b> Practical V: Web Services Lab	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 3	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand the basic concepts of web services.
2. Understand how the client-server model of programming works.
3. Develop interactive, client-side, executable web applications.
4. Use WSDL Service to implement a variety of presentation effects to the web application.
5. Migrate the web applications to the other platforms like .Net

#### Course Outcomes (COs)

1. Understand, analyze and evaluate a system using web services.
2. Identify and formulate and solve web related problems.
3. Use techniques and skills to design web based applications.
4. Understand and describe Java - enabled XML technology.
5. Be able to create, deploy, and call Web services using Java, .NET

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO4	H	M	M	L	M	L
CO5	L	M	L	M	L	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Exercises

1. Write a program to implement WSDL Service. (K2)
2. To create a simple Web application using Web services in Java.(K5)
3. To write a factorial application program using Web services in java. (K2)
4. To implement calculator (+ -\* /) web application. (K2)
5. Web Service creation using .NET. (K4)
6. Develop a J2EE client to access a .NET Web Service. (K5)
7. Write a program the service provider can be implement a single getprice(), staticbind() and getproduct() operation. (K2)
8. Write a program to implement the operation can receive request and will return a Response in two ways.
  - a) One-Way operation
  - b) Request – Response (K2, K3)

# INDEPENDENT ELECTIVES

## SEMESTER I

### PICSA20 – SOFTWARE QUALITY ASSURANCE

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PICSA20	<b>Title of the Course:</b> Software Quality Assurance	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To know the behavior of the testing techniques and to design test cases to detect the errors in the software.
2. To get insight into the levels of testing in the user environment.
3. To understand standard principles to check the occurrence of defects and its removal.
4. To learn the functionality of automated testing tools to apply in the specialized environment. To understand the models and metrics of software quality and reliability.
5. To generate and apply the test cases using the automated testing tool.

#### Course Outcomes (COs)

1. Test the software by applying various testing techniques.
2. Able to debug the project and to test the entire computer-based systems at all levels.
3. Test the applications in the specialized environment using various automation tools.
4. To evaluate the applications using software testing tools.
5. Apply quality and reliability metrics to ensure the performance of the software.

## **Course Syllabus**

### **Unit I**

- 1.1 Software quality Challenge(K1, K2)
- 1.2 Software quality (K3)
- 1.3 Software quality assurance (K2)
- 1.4 Software quality factors (K2, K4)
- 1.5 Components of SQA(K3)
- 1.6 Management SQA Components (K4)

### **Unit II**

- 2.1 Pre-Project Software Quality Assurance System (K1, K6)
- 2.2 Contract review (K1, K2)
- 2.3 Developing plan (K2)
- 2.4 Quality plan (K3, K4)
- 2.5 Integrating quality activities in the project life cycle(K1, K4)
- 2.6 Reviews(K2)

### **Unit III**

- 3.1 Software Testing Strategies (K1)
- 3.2 Software Testing Implementations (K2, K6)
- 3.3 Automated Testing
- 3.4 Assuring the Quality of Software Maintenance Components (K2, K3)
- 3.5 Maintenance software quality assurance tools (K3)
- 3.6 Case Tools (K4)

### **Unit IV**

- 4.1 Software Quality Infrastructure Components (K2)
- 4.2 Procedures and work instructions (K1, K2)
- 4.3 Supporting quality devices (K2, K3)
- 4.4 Staff training and certification (K4, K6)
- 4.5 Corrective action (K5)
- 4.6 Preventive action (K4)

### **Unit V**

- 5.1 Configuration Management (K1, K6)
- 5.2 Documentation control (K2, K3)
- 5.3 Project progress control (K2, K3)
- 5.4 Cost of software quality (K4, K5)
- 5.5 Auditing and Control (K3, K4)
- 5.6 Vendor control (K5)

## SEMESTER I

### PICSB20 – GREEN COMPUTING

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PICSB20	<b>Title of the Course:</b> Green Computing	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand the dimensions and goals of Green IT.
2. Discuss the green enterprise architecture with environmental intelligence.
3. Analyze the Grid framework with the collaboration of cloud computing.
4. Understand the concept of Green compliance.
5. Apply Green IT strategies and applications of home appliances.

#### Course Outcomes (COs)

1. Understand the Concept of Green IT.
2. Discuss Green IT in relation to technology.
3. Evaluate IT use in relation to environmental perspectives.
4. Discuss the methods and tools to measure energy consumption.
5. Conclude with a Green IT to sustainable development and develop energy saving.

CO4	M	M	L	H	M	L
CO5	M	H	M	L	M	L

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Green IT: An Overview: Introduction - Environmental Concerns and Sustainable Development - Environmental Impacts of IT (K1)
- 1.2 Green IT: OCED Green IT Framework – Green IT 1.0 and 2.(K1)
- 1.3 Holistic Approach to Greening IT: Greening Computer’s Entire life Cycle – The Three Rs of Green IT (K1)
- 1.4 Greening IT: Green PCs, Notebooks and Servers – Green Data Centres – Green Cloud Computing – Green Data Storage – Green Software – Green Networking and Communication (K1, K2)
- 1.5 Applying IT for Enhancing Environmental Sustainability-Green IT Standards and Eco Labelling of IT - Enterprise Green IT Strategy(K1, K2)
- 1.6 Green Devices and Hardware: Introduction-Life Cycle of a Device or Hardware- Reuse, Recycle and Dispose (K1)

### **Unit II**

- 2.1 Sustainable Software Development: Introduction - Current Practices - Sustainable Software- Software Sustainability Attributes (K1)
- 2.2 Software Sustainability Metrics: Modifiability and Reusability – Portability – Supportability – Performance – Dependability – Usability – Accessibility – Predictability – Efficiency – Project’s Carbon Footprint (K1, K2)
- 2.3 Sustainable Software Methodology: Collecting Metrics – Code metrics Tools – Simplified Usability Study – Platform Analysis – Existing Project Statistics - Defining Actions (K2, K3)
- 2.4 Green Data Centres: Data Centres and Associated Energy Challenges(K1)
- 2.5 Data Centre IT Infrastructure: Servers – Networking – Storage – IT Platform Innovation - Data Centre Facility Infrastructure-Implications for Energy Efficiency: Power System – Cooling – Facilities Infrastructure Management (K1, K3)
- 2.6 IT Infrastructure Management: Server Power – Consolidation – Virtualization (K2)

### **Unit III**

- 3.1 Green Cloud Computing and Environmental Sustainability: Introduction -What is Cloud Computing? - Cloud Computing and Energy Usage Model (K1)
- 3.2 Features of Clouds Enabling Green Computing (K2)
- 3.3 Towards Energy Efficiency of Cloud Computing (K3)
- 3.4 Green Cloud Architecture (K2, K3)
- 3.5 Enterprise Green IT Strategy: Introduction-Approaching Green IT Strategies- Business Drivers of Green IT Strategy (K1, K3)
- 3.6 Business Dimensions for Green IT Transformation - Organizational Considerations in a Green IT Strategy (K3, K4,K6)

### **Unit IV**

- 4.1 Sustainable Information Systems and Green Metrics: Introduction- Multilevel Sustainable Information (K2)
- 4.2 Sustainability Hierarchy Models: Sustainability Frameworks – Sustainability Principles – Tools for Sustainability (K4, K5, K6)
- 4.3 Product Level Information: Life-Cycle Assessment – The four stages of LCA – CRT Monitors versus LCD Monitors: Life Cycle Assessment (K3, K4)
- 4.4 Individual Level Information ( K3)
- 4.5 Functional Level Information: Data Centre Energy Efficiency – Data centre Power Metrics – Emerging Data Centre Metrics (K4, K6)
- 4.6 Organizational Level Information: Reporting Greenhouse Gas Emissions (K4, K5)

## Unit V

- 5.1 Green Enterprises and the Role of IT: Introduction-Organizational and Enterprise Greening: The Green Enterprise: A value chain Perspective(K2, K3)
- 5.2 Information Systems in Greening Enterprises: Environmental Management Information systems – Software and Databases – ERP EMISs – ERP Challenges and Deficiencies with Respect to EMIS – Integrating Environmental and LCA Information with ERP – Electronic Environmental and Sustainability Reporting (K3, K4, K5, K6)
- 5.3 Greening the Enterprise-IT Usage and Hardware: Environmental Information Technology Standards – Green Management of Data Centre (K2, K3)
- 5.4 Inter-organizational Enterprise Activities and Green Issues: Electronic Commerce and Greening the Extended Enterprise – Demanufacturing and Reverse Logistics- Eco-Industrial Parks and Information Systems - Enablers and Making the Case for IT and the Green Enterprise (K4, K5,K6)
- 5.5 Managing Green IT: Introduction-Strategizing Green Initiatives: Strategic Thinking – Strategic Planning – Strategic Implementation – Enterprise Architecture Planning(K2, K4)
- 5.6 Implementation of Green IT: Return on Investment – Metrics – The Goal-Question-Metric (GQM) - Information Assurance: Risk Management -Communication and Social Media(K5, K6)

## SEMESTER I

### PICSC20 – DISTRIBUTED OPERATING SYSTEM

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PICSC20	<b>Title of the Course:</b> Distributed Operating System	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To expose students to both the abstraction and details of file systems.
2. To introduce concepts related to distributed computing systems.
3. To focus on performance and flexibility issues related to systems design decision.
4. To expose students to current literature in distributed systems.
5. To prepare students for an industrial programming environment.

#### Course Outcomes (COs)

1. Understand the architecture of distributed operating system.
2. Differentiate between centralized and distributed system.
3. Determine the difficulties of distributed memory management.
4. Analyze effective synchronization techniques to be performed to run a task in a distributed system.
5. Evaluate the best methods to follow to execute a task in remote machines.

CO4	M	H	L	M	L	H
CO5	H	M	M	L	L	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Introduction to Distributed System (K1)
- 1.2 Communication in Distributed System: Remote Procedure Call(K2)
- 1.3 Synchronization in distributed system (K4)
- 1.4 Clock Synchronization (K2)
- 1.5 Mutual Exclusion (K2)
- 1.6 Deadlocks in Distributed System (K4)

### **Unit II**

- 2.1 Process and Processors in Distributed System: Threads (K3, K4)
- 2.2 System Models (K2)
- 2.3 Processor allocation (K2)
- 2.4 Scheduling in Distributed Systems (K4)
- 2.5 Fault Tolerance (K5)
- 2.6 Real Time Distributed System (K4)

### **Unit III**

- 3.1 Distributed Object Based Systems: Architecture (K2, K4)
- 3.2 Processes-Object Servers: Communication (K2, K4)
- 3.3 Distributed Objects: Binding a client to an object – Static Versus Dynamic – Remote Method Invocations (K2)
- 3.4 Parameter Passing – Naming: CORBA Object References – Globe Object Reference - Synchronization – Consistency and Replication (K2)
- 3.5 Distributed File Systems: Distributed File System Design – Distributed File System Implementation – File Usage (K2, K4)
- 3.6 System Structure – Caching – Replication –Trends in Distributed File System (K2, K4)

### **Unit IV**

- 4.1 Distributed Shared Memory: Introduction – Shared Memory (K1, K2)
- 4.2 Consistency Models – Page based (K2, K3)
- 4.3 Distributed Shared Memory (K1, K2)
- 4.4 Shared Memory (K2)
- 4.5 Shared Variable Distributed Shared Memory (K2)
- 4.6 Object Based Distributed Shared Memory (K2)

### **Unit V**

- 5.1 Distributed Web Based Systems: Architecture – Processes (K2)
- 5.2 Communication – Naming –Synchronization (K1, K2)
- 5.3 Consistency and Replication (K2)
- 5.4 54 Case Study: AMOEBA – Introduction –Objects and Capabilities ( K2)
- 5.5 Process Management (K1, K2)
- 5.6 Memory Management – Communication (K1, K2)

## SEMESTER II

### PICSD20 – WIRELESS SENSOR NETWORKS

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PICSD20	<b>Title of the Course:</b> Wireless Sensor Networks	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand the challenges and applications of WSN.
2. Analyze single node and network architecture of sensor networks.
3. Classify MAC and link layer protocols in wireless sensor networks.
4. Understand the concept of Topology control in WSN.
5. Explain routing protocols in WSN.

#### Course Outcomes (COs)

1. Understand the concepts of Wireless Technology and supporting Protocols.
2. Understand the Basic Sensor Systems and provide a survey of Sensor Technology.
3. Understand the Medium Access Control protocols and analyze various Routing Protocols at Network Layer.
4. Learn Transport Control Protocols for Sensor Networks Middleware and design requirements.
5. Understand the Sensor Management, Sensor Networks, and Operating System.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	L	M	M	L

CO3	M	H	L	M	H	H
CO4	H	L	M	L	L	M
CO5	L	H	M	L	M	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Introduction and Overview of Wireless Sensor Networks (K1)
- 1.2 Introduction (K1)
- 1.3 Basic Overview of the Technology (K2, K3)
- 1.4 Applications of Wireless Sensor Networks (K3)
- 1.5 Examples of Category 1 (K4, K5)
- 1.6 Category 2 WSN Applications (K4, K5)

### **Unit II**

- 2.1 Basic Wireless Sensor Technology: Sensor Node Technology (K1)
- 2.2 Sensor Taxonomy (K1, K2)
- 2.3 WN Operating Environment (K2, K3)
- 2.4 WN Trends (K2)
- 2.5 Wireless Transmission Technology and System: Radio Technology Primer (K3, K6)
- 2.6 Available Wireless Technologies(K3, K4)

### **Unit III**

- 3.1 MAC for Wireless Sensor Networks: Fundamentals of MAC Protocols(K1, K2)
- 3.2 MAC Protocols for WSNs - Sensor MAC. (K2)
- 3.3 IEEE 802.15.4 LR WPANs. (K2, K4)
- 3.4 Routing Protocols for Wireless Sensor Networks (K3, K6)
- 3.5 Routing Challenges and Design Issues in Wireless Sensor Networks (K3, K4)
- 3.6 Routing Strategies in Wireless Sensor Networks (K4)

### **Unit IV**

- 4.1 Transport Control Protocols for Wireless Sensor Networks: Traditional Transport Control Protocol (K1, K3)
- 4.2 Examples of Existing Transport Control Protocols (K2, K4)
- 4.3 Performance of Transport Control Protocols (K3, K6)
- 4.4 Middleware for Wireless Sensor Networks: Middleware Architecture (K2, K3)
- 4.5 MiLAN - IrisNet – AMF (K3)
- 4.6 DSWare – CLMF (K3, K6)

### **Unit V**

- 5.1 Networks Management for Wireless Sensor Networks: Traditional Network Management Models (K1)
- 5.2 Network Management Issues (K1, K2)
- 5.3 Other Issues Related to Network Management (K2)
- 5.4 Operating System for WSN: TinyOS – MagnetOS (K2, K3)
- 5.5 MANTIS – OSPM (K4, K6)
- 5.6 EMERALDS – PicOS (K4, K6)

### **Text Books:**

## SEMESTER II

### PICSE20 - DIGITAL IMAGE PROCESSING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PICSE20	<b>Title of the Course:</b> Digital Image Processing	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To study the image fundamentals and mathematical transforms necessary for image processing.
2. To study the image enhancement techniques.
3. To understand the fundamentals of Color Image Processing.
4. To study image restoration procedures.
5. To study Region based Segmentation procedures.

#### Course Outcomes (COs)

1. Understand the basics of Graphics
2. Understand the fundamentals and applications of digital image processing and be aware about intensity transformations.
3. Explore knowledge about image processing fundamentals.
4. Know about various noise models and transformation techniques.
5. Able to know the structure of XML and to design and store data in XML

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	L	M	M	L
CO2	M	L	M	H	M	M

CO3	H	M	L	M	H	M
CO4	M	H	L	M	L	M
CO5	L	L	M	M	L	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Introduction to Computer Graphics - Video Display Devices (K1, K2)
- 1.2 Raster Scan Systems -Random Scan Systems - Interactive Input Devices (K1)
- 1.3 Hard Copy Devices - Graphics Software - Output Primitives (K1, K3)
- 1.4 Line Drawing Algorithms: DDA Algorithm- Initializing Lines - Line Function.(K1, K4)
- 1.5 Two dimensional geometric transformations – Matrix representations and homogeneous coordinates (K1)
- 1.6 Three dimensional concepts; Three-dimensional object representations – Polygon surfaces (K1, K3)

### **Unit II**

- 2.1 Digital Image Processing – Introduction – The Origins of Digital Image Processing (K1, K2)
- 2.2 Classification of Digital Images – Image Types - Examples of Fields That Use Digital Image Processing (K1)
- 2.3 Fundamental Steps In Digital Image Processing – Components of An Image Processing System (K1, K2)
- 2.4 Intensity Transformation and Spatial Filtering (K3)
- 2.5 Background – Some Basic Intensity Transformation Functions (K3)
- 2.6 Different types of Transformation functions (K1, K4)

### **Unit III**

- 3.1 Histogram Processing – Fundamentals of Special Filtering (K1, K2)
- 3.2 Smoothing Spatial Filters – Sharpening Spatial Filters (K2, K3)
- 3.3 Color Image Processing – Color Fundamentals – Color Models (K3)
- 3.4 Implementing Web Services (K4)
- 3.5 To Pseudo color Image Processing – Basics of Full-Color Image Processing – Color Transformation. (K4, K5)
- 3.6 Smoothing and Sharpening (K4)

### **Unit IV**

- 4.1 Image Restoration and Reconstruction – A model of the Image Degradation/Restoration process (K5)
- 4.2 Noise Models – Spatial and Frequency properties of Noise – Some important Noise Probability Density Functions (K2)
- 4.3 Periodic Noise – Estimation of Noise Parameters – Restoration in the Presence of Noise only (K1, K3)
- 4.4 Spatial Filtering – Mean Filters – Order Statistic Filters (K3)
- 4.5 Adaptive Filters – Estimating the Degradation Function (K4)
- 4.6 Estimation by Image Observation – Estimation by Experimentation – Estimation by Modelling. (K3, K5)

### **Unit V**

- 5.1 Region Based Segmentation – Region Growing (K5)
- 5.2 Region Splitting and Merging (K1, K2)
- 5.3 Segmentation Using Morphological Watersheds. (K1)
- 5.4 Background – Dam Construction (K1, K2)
- 5.5 Watershed Segmentation Algorithm. (K1, K3)

## 5.6 The use of motion in segmentation (K5)

## SEMESTER II

### PICSF20 – STEGANOGRAPHY AND DIGITAL WATERMARKING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PICSF20	<b>Title of the Course:</b> Steganography and Digital Watermarking	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide the importance of digital watermarking and Steganography.
2. To discuss the properties of watermarking and Steganography systems.
3. To discuss the different models of watermarking and Steganography.
4. To understand the various evaluation metrics.
5. To examine various applications of watermarking and Steganography.

#### Course Outcomes (COs)

1. Discuss the need for watermarking and steganography
2. Distinguish between watermarking and steganography
3. Elaborate on the various models of watermarking and steganography.
4. Point out various steganalysis algorithms.
5. Show how watermarking and steganography can be applied to various applications and evaluate them.

CO4	H	M	M	M	M	L
CO5	L	M	M	H	M	L

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Information Hiding (K1)
- 1.2 Steganography and Watermarking (K1)
- 1.3 History of Watermarking (K1)
- 1.4 History of Steganography (K1)
- 1.5 Importance of Digital Watermarking (K1)
- 1.6 Importance of Steganography (K1)

### **Unit II**

- 2.1 Steganographic Communication: The Channel - The Building Blocks - Notation and Terminology, Information (K4)
- 2.2 Theoretic Foundations of Steganography (K4)
- 2.3 Cachin's Definition of Steganographic Security - Practical Steganographic Methods (K4)
- 2.4 Statistics Preserving Steganography - Model-Based Steganography - Steganalysis Scenarios(K4)
- 2.5 Detection, Forensic Steganalysis. The Influence of the Cover Work on Steganalysis (K4)
- 2.6 Some Significant Steganalysis Algorithms, LSB Embedding and the Histogram Attack (K4)

### **Unit III**

- 3.1 Properties – Evaluating watermarking systems(K5)
- 3.2 Notation – Communications (K5)
- 3.3 Communication based models – Geometric models (K5)
- 3.4 Mapping messages into message vectors (K5)
- 3.5 Error correction coding (K5)
- 3.6 Detecting multi-symbol watermarks – Attacks (K5)

### **Unit IV**

- 4.2 Communications: Components of Communications Systems (K4)
- 4.3 Classes of Transmission Channels - Secure Transmission (K4)
- 4.4 Communication-Based Models of Watermarking Basic Model, Watermarking as Communications with Side Information at the Transmitter (K4)
- 4.5 Watermarking as Multiplexed Communications - Geometric Models of Watermarking - Distributions and Regions in Media Space (K4)
- 4.6 Marking Spaces - Modeling Watermark Detection by Correlation, Linear Correlation, Normalized Correlation, Correlation Coefficient (K4)

### **Unit V**

- 5.1 Applications of Watermarking - Broadcast Monitoring (K6)
- 5.2 Copyrights, Proof of Ownership, Transaction Tracking (K6)
- 5.3 Content Authentication, Copy Control, Device Control, Legacy Enhancement(K6)
- 5.4 Applications of Steganography (K6)
- 5.5 Steganography for Dissidents (K6)
- 5.6 Steganography for Criminals (K6)

**Text Books:**

## SEMESTER III

### PICSG20 – CLOUD SOLUTION WITH AZURE

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PICSG20	<b>Title of the Course:</b> Cloud Solution with Azure	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To study the decision on adoption of cloud computing by a prospective cloud services consumer enterprise, including possible significant benefits of its adoption, in order to ensure informed and accountable information technology (IT) related decision-making.
2. To study the IT governance control framework was used to systematically identify and categories significant benefits of the adoption of cloud computing by an enterprise (including governmental organisations and business).
3. To apply cloud computing adoption that was discovered include scale benefits and the transformation of a capital expense to a scalable operational expense.
4. To study the benefits, framework of Azure
5. To understand the services of Azure.

#### Course Outcomes (COs)

1. Understand the basics of Cloud Computing with Azure and its services.
2. Implement the services of Azure.
3. Learn various solutions in Azure.
4. To develop application based Azure Solutions.
5. Develop and deploy applications in Azure.

CO5	L	M	M	L	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I

- 1.1 Getting started with Azure – Technical requirements (K1, K2)
- 1.2 What is Cloud Computing? (K1, K2)
- 1.3 What problems does it solve? – What is Azure? (K2)
- 1.4 How do I start using Azure? (K2, K3)
- 1.5 Extending Directory Services to Azure (K2, K6)
- 1.6 Terminology to remember with Azure (K3, K4)

### Unit II

- 2.1 Moving Existing Apps to Azure – Technical requirements (K1, K2)
- 2.2 How I approach the discussion: Rehost, Refactor, Re-architect, Rewrite(K3, K6)
- 2.3 Creating resources in the Azure Portal (K2, K6)
- 2.4 Migrating to Azure: SaaS Migrations, Office 365(K3)
- 2.5 IaaS: PowerShell and ARM Template: Deploy- AzureResourceGroup.ps1, azure deploy Parameters json, asuredploy. json (K3, K5)
- 2.6 PaaS: Deploy-Azure-Website and Database. parameters.json, Deploy-Azure-Website and Database. template. json(K4, K5)

### Unit III

- 3.1 Building Solutions in Azure –Technical Requirements – Azure blueprints (K2)
- 3.2 Key Vault : VNet,Mobile,IoT,AI and Machine Learning(K2, K3)
- 3.3 Understanding responsibility: Infrastructure as a Service, Platform as a Service, Software as a Service, Azure Active Directory- Plan for Success (K3, K6)
- 3.4 Architecture styles: Common application Patterns ,How to make technology choices(K4, K5)
- 3.5 Designing applications in Azure:App Services (K2, K3)
- 3.6 Database Services, Storage accounts, CosmosDB,Microservices / Containers , Real-world examples (K4, K6)

### Unit IV

- 4.1 Understanding the Infrastructure behind Solutions Built in Azure – Technical requirements (K1, K2)
- 4.2 Setting up your development environment – Managing cost (K3)
- 4.3 How I approach guidance- Understanding Infrastructure as Code – Developing locally (K2, K4)
- 4.4 How I develop locally – Security center – Application authentication (K4)
- 4.5 Dependency Injection – Logging – Data Storage- Understanding service lifetimes (K2, K3)
- 4.6 Adding Intelligence to your solutions- Using Application Insights –Leveraging on-premises resources (K1, K3, K6)

### Unit V

- 5.1 Deploying Solutions to Azure- Technical requirements –Deploying solutions in Azure (K1, K2)
- 5.2 What is devOps?: Azure Boards, Azure Artifacts, Azure Pipelines, Azure Test Plans (K2, K3)
- 5.3 How I use Azure DevOps- What are deployment slots? (K3)
- 5.4 How Azure helps with DevOps – Putting it all together Technical requirements- Dashboards (K1, K2, K6)
- 5.5 Azure Advisors: High Availability Advisor,Security Advisor / Security Center, Performance Advisor, Cost Advisor (K2, K3)
- 5.6 Monitoring: Core capabilities, Shared capabilities, Infrastructure capabilities, Application capabilities (K4, K6)

**Text Books:**

1. Greg Leonardo (2018) - Hands – On Cloud Solutions With AZURE – Packt Publication.

**Reference Books:**

## SEMESTER III

### PICSH20 – INTRODUCTION TO BLOCK CHAIN TECHNOLOGY

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PICSH20	<b>Title of the Course:</b> Introduction to Block Chain Technology	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. Understand how blockchain systems (mainly Bitcoin and Ethereum) work
2. To securely interact with them,
3. Design, build, and deploy smart contracts and distributed applications,
4. Integrate ideas from blockchain technology into their own projects.
5. To increase trust, security, transparency, and traceability of data.

#### Course Outcomes (COs)

1. Understand design principles of Bitcoin and Ethereum.
2. Learn the Simplified Payment Verification protocol.
3. Describe and understand the differences between the most prominent block chain structures and permissioned block chain service providers.
4. Understand the crypto currency mechanism by sending and reading transactions.
5. Evaluate security, privacy, and efficiency of a given block chain system in various applications

CO4	L	M	H	L	H	M
CO5	M	H	L	L	L	H

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I**

- 1.1 Basics: Distributed Database (K1)
- 1.2 Two General Problem, Byzantine General Problem and Fault Tolerance (K2)
- 1.3 Hadoop Distributed File System, Distributed Hash Table, ASIC resistance, Turing Complete (K1, K2)
- 1.4 Cryptography: Hash function (K1, K2)
- 1.5 Digital Signature – ECDSA (K1, K3)
- 1.6 Memory Hard Algorithm, Zero Knowledge Proof (K1, K2)

### **Unit II**

- 2.1 Blockchain: Introduction, Structure of a Block(K2)
- 2.2 Block Header (K2)
- 2.3 Block Identifiers-Block Header Hash and Block Height (K3, K4)
- 2.4 The Genesis block (K2)
- 2.5 Linking Blocks in the Blockchain (K3)
- 2.6 Merkle Trees- Simplified Payment Verification (SPV) (K3, K4)

### **Unit III**

- 3.1 Distributed Consensus: Nakamoto consensus (K2, K4)
- 3.2 Proof of Work, Proof of Stake (K2, K4)
- 3.3 Proof of Burn (K2, K4)
- 3.4 Difficulty Level (K4)
- 3.5 Sybil Attack (K2, K4)
- 3.6 Energy utilization – alternate(K5)

### **Unit IV**

- 4.1 Cryptocurrency: History (K1)
- 4.2 Distributed Ledger (K3)
- 4.3 Bitcoin protocols - Mining strategy and rewards (K1, K3)
- 4.4 Ethereum - Construction, DAO (K3)
- 4.5 Smart Contract –GHOST (K2, K3)
- 4.6 Vulnerability- attacks, Sidechain- Namecoin (K3)

### **Unit V**

- 5.1 Cryptocurrency Regulation: Stakeholders (K3, K4, K5)
- 5.2 Legal Aspects-Crypto currency Exchange (K3, K4, K5)
- 5.3 Black Market and Global Economy (K3, K4, K5)
- 5.4 Applications: Internet of Things (K3, K4, K6)
- 5.5 Medical Record Management System (K6)
- 5.6 Domain Name Service and future of Blockchain (K6)

### **Text Books:**

1. Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller and Steven Goldfeder, Bitcoin and Cryptocurrency Technologies: A Comprehensive Introduction, Princeton University Press (July 19, 2016).

## SEMESTER III

### PICSI20 – EMBEDDED SYSTEM

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PICSI20	<b>Title of the Course:</b> Embedded System	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Outcomes (COs)

1. Understand the Concepts of Embedded Systems.
2. Recognize the concepts of Network devices.
3. Gain the knowledge of Device Drivers and Interrupts Servicing Mechanism.
4. Acquire the knowledge of Real Time Operating Systems.
5. Understand Program Modeling Concepts.

CO	PSO

CO3	H	L	M	H	L	M
CO4	H	M	L	L	M	L
CO5	L	M	L	H	M	L

(Low - L, Medium – M, High - H)

#### Course Syllabus

##### Unit I

- 1.1 Introduction to Embedded Systems: Embedded Systems (K2, K4)
- 1.2 Processor Embedded into a System – Embedded Hardware and Software (K4)
- 1.3 SOC and use of VLSI Circuit design Technology (K3, K4)
- 1.4 Complex System Design and Processor (K4)
- 1.5 Design Process in Embedded System and Design Examples (K4, K5)
- 1.6 Classification of Embedded Systems (K4)

## **Unit II**

- 2.1 Devices and Communication Buses for Devices Networks: IO types ( K2)
- 2.2 Serial Communication Devices – Parallel Devices Port (K2, K4)
- 2.3 Interfacing Features in Device Ports – Wireless Devices (K2, K5)
- 2.4 Timer and Counting Devices – Watchdog Timer (K2, K4)
- 2.5 Real Time Clock - Networked Embedded Systems (K4, K6)
- 2.6 Serial Bus Communication Protocols (K2, K4)

## **Unit III**

- 3.1 Device Drivers and Interrupts Servicing Mechanism: Programmed - I/O (K2, K4)
- 3.2 Busy-wait Approach without Interrupt Service Mechanism – ISR (K2, K4)
- 3.3 Interrupt Sources - Interrupts Servicing Mechanism (K2, K5)
- 3.4 Multiple Interrupts (K4)
- 3.5 Context and the Periods for Context Switching, Interrupt Latency and Deadline (K2, K4)
- 3.6 Classification of Processors Interrupt Servicing Mechanism from Context Saving Angle (K4)

## **Unit IV**

- 4.1 Real Time Operating Systems: OS Services (K2)
- 4.2 Process Management – Timer and Event Functions (K2, K4)
- 4.3 Memory Management – Device, file and IO Subsystems Management (K2, K4)
- 4.4 Interrupt Routines in RTOS Environment and Handling of Interrupts Source Calls (K4, K5)
- 4.5 RTOS - Basic Design using RTOS (K2, K4)
- 4.6 RTOS Task Designing Models (K2, K4)

## **Unit V**

- 5.1 Program Modeling Concepts: Program and DFG Models (K2, K4)
- 5.2 Finite State Model (K2)
- 5.3 State Machine Programming Models (K2, K5)
- 5.4 Modeling of Multiprocessor Systems (K4)
- 5.5 ADL Modeling (K4)
- 5.6 Embedded Software Development Process and Tools: Introduction Embedded Software Development Process and Tools (K2, K4)

### **Text Books:**

# **Department of Electronic Media (PG)**

## **SYLLABUS AND REGULATIONS**

**Under**

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**Department of Communication Media**

**M.Sc. Electronic Media**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighboring districts.

**B) NAME OF THE PROGRAMME: M.Sc. Electronic Media**

**Vision:**

To prepare graduate for creative, challenging and productive careers in the media industry, making them committed media professionals who are socially responsible.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

A candidate who has qualified Bachelor's Degree in any branch of study is eligible for seeking admission to M.Sc. Degree in Electronic Media.

#### D) List of Courses:

The structure of M.Sc. Electronic Media Course and the Scheme of Examination is:

Sem	Subject Code	Title of Subject	Hours/ Week	Exam Hours		Credits	Marks
				Th	Pr		
I	PCEMA20	Mass Communication and Journalism	5	3	-	4	40+60

## **PROGRAMME SPECIFIC OUTCOME (PSO)**

On completion of the PG Programme, students will be able to;

1. To obtain wide Knowledge in the area of Electronic Media Production and demonstrate Clear and coherent communication skills.
2. To Assimilate and apply Video and Audio editing techniques, Multimedia, and Web Designing Projects towards skill development and employability.
3. To Assimilate the critical and scientific approaches to address the Research problems and Find solutions.
4. To Integrate the issues of social and Ethical relevance in the field of Documentary and Short film Production.
5. To become ethically committed media professionals and entrepreneurs by adhering to Human values, the Indian and the Global cultures.
6. To acquire primary Research skills, and understand the importance of innovations, Incubation and entrepreneurship.

## **PROGRAMME OUTCOMES (PO)**

On completion of the PG Programme, students will be able to:

**PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.

**PO2:** Assimilate and apply principles and concepts towards skill development And employability.

**PO3:** Apply critical and scientific approaches to address problems and find solutions.

**PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:** Integrate issues of social relevance in the field of study.

**PO6:** Persist in life-long learning for personal and societal progress.

## SEMESTER - I

### PCEMA20 - MASS COMMUNICATION AND JOURNALISM

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: I</b>	PCEMA20	Mass Communication And Journalism	Theory	Core	5	4	100

#### Course Objective

To introduce the broad field of mass communication and journalism to students including the models, theories and ethics in the field of media

#### Course Outcomes (CO)

The learners will be able to

CO1: Review the Basics of Communication and Mass Culture.

CO2: Analyze and Understand the Western Models and Theories of Communication.

CO3: Acquiring Knowledge about the inception of Journalism.

CO4: Analyse the Journalistic Values and Various News Paper Organizations.

CO5: Evaluate the Concept of Journalistic Writing and Editing.

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Communication Basics (15 Hours)**

- 1.1 Communication, Need of Communication (K1, K2)
- 1.2 Functions of Communication, Levels of Communication, Patterns of Communication (K1, K2, K3)
- 1.3 The Mass concept, Mass Communication process, the Mass Audience (K1, K2, K3, K4)
- 1.4 Mass Culture and popular culture (K3, K4)
- 1.5 Barriers of Communication (K3, K4, K5)
- 1.6 Media democracy (K5, K6)

### **Unit II: Models of Communication (15 Hours)**

- 2.1 Transmission model, Ritual or Expressive model (K1, K2)
- 2.2 Publicity model., Reception model, Lass well Model (K1, K2, K3)
- 2.3 Shannon & Weaver model, Osgood and Schramm Circular model. (K2, K3, K4)
- 2.4 Two Steps flow model, Westley and Maclean model (K3, K4, K5)
- 2.5 Agenda Setting model, Spiral of Silence model (K3, K4, K5, K6)
- 2.6 Indian theories of communication (K4, K5, K6)

### **Unit III: Basics of Journalism (15 Hours)**

- 3.1 Basics of writing and editing (K1, K2)
- 3.2 News values. (K1, K2, K3)
- 3.3 Sources of news and confidentiality (K2, K3, K4)
- 3.4 Makeup, Newspaper organisation (K2, K3, K4)
- 3.5 Press council (K3, K4, K5, K6)
- 3.6 Press commission (K4, K5, K6)

### **Unit IV: Journalistic Principles (15 Hours)**

- 4.1 Journalism and the concept of news (K1, K2)
- 4.2 Journalism principles(K1, K2, K3)
- 4.3 Brief history of press in the world, India and Tamilnadu (K2, K3, K4)
- 4.4 Online Journalism (K2, K4)
- 4.5 Tabloid Journalism (K2, K4, K5, K6)
- 4.6 Yellow Journalism (K3, K4, K5, K6)

### **Unit V:Journalistic Skills (15 Hours)**

- 5.1 Art of writing a new paper story (K1, K2, K3)
- 5.2 Inverted pyramid style(K2, K3, K4)
- 5.3 Feature writing (K1, K3, K4, K5)
- 5.4 Qualities of a Reporter, (K2, K3, K4)
- 5.5 Role of Editor (K2, K4, K5, K6)
- 5.6 Copy flow, Proof reading (K4, K5, K6)

## Course Syllabus

### **Unit I: Growth and development of radio** (15 Hours)

- 1.1 Early history of Radio - Invention of Radio(K1, K2)
- 1.2 Early growth of Radio and its Usage (K1, K2)
- 1.3 Indian Broadcasting - All India Radio (K1, K2, K3)
- 1.4 Underground Congress Radio –Radio Before and After Independence (K2, K3, K4)
- 1.5 FM and AM Broadcasting - AIR Services (K3, K4, K5)
- 1.6 School broadcasts – DAB (K5, K6)

### **Unit II: Growth and development of Television** (15 Hours)

- 2.1 Early years of Television (K1, K2)
- 2.2 Growth and Development of Television in India (K2, K3, K4)
- 2.3 The technology of Television (K3, K4, K5)
- 2.4 Types of transmission – cable, DTH, Satellite, terrestrial (K3, K4, K5)
- 2.5 Types of signals (K5, K6)
- 2.6 Professions in the industry (K5, K6)

### **Unit III: Formats and Genres of radio** (15 Hours)

- 3.1 Radio Formats and Genres (K1, K2)
- 3.2 News Bulletin, News reels (K1, K2, K3)
- 3.3 Documentaries, Movie trailers, Quizzers, jingles (K2, K3, K4)
- 3.4 Local radio, campus radio, Ham radio (K2, K3, K4, K5)
- 3.5 PAS, Satellite radio, Internet radio (K4, K5, K6)
- 3.6 Programme composition of AIR (K5, K6)

### **Unit IV: Formats and Genres of Television** (15 Hours)

- 4.1 TV programme composition (K1, K2, K3)
- 4.2 Formats and content: Action and adventure (K2, K3, K4)
- 4.3 Detective and mystery (K2, K3, K4, K5)
- 4.4 Documentary, fantasy (K3, K4, K5, K6)
- 4.5 Reality show, game show (K3, K4, K5, K6)
- 4.6 Talk show and science fiction(K4, K5, K6)

### **Unit V: Broadcast regulations** (15 Hours)

- 5.1 Broadcasting Ownership and Control (K1, K2, K3)
- 5.2 Broadcasting Policy - Broadcasting code (K1, K2, K3, K4)
- 5.3 Ethics of Broadcasting - Listenership survey (K2, K3, K4, K5)
- 5.4 Defining convergence (K3, K4, K5, K6)
- 5.5 Convergence of New Media and old Media (K4, K5, K6)
- 5.6 Convergence of Mass Media (K4, K5, K6)

## Course Syllabus

### Unit I: Introduction to Camera

(15 Hours)

- 1.1 Parts of the Camera Basic, Camera functions (K1, K2, K3)
- 1.2 Types of Cameras - Sony A7S III(K1, K2, K3, K4)
- 1.3 Black magic, Pocket Cinema Camera 4K (K3, K4, K5, K6)
- 1.4 Panasonic Lumix GH5S, Fujifilm X-T4(K3, K4, K5, K6)
- 1.5 Lens Characteristics(K4, K5, K6)
- 1.6 Exposure – Types of lens(K3, K4, K5, K6)

### Unit II: Introduction to Lighting

(15 Hours)

- 2.1 Nature of Light – Lighting purposes and functions (K1, K2)
- 2.2 Nature of shadows – Outer orientation functions (K1, K2, K3)
- 2.3 Inner orientation functions – Time Orientation (K1, K2, K3, K4)
- 2.4 Standard lighting techniques – Chiaroscuro, Rembrandt, cameo (K2, K3, K4)
- 2.5 Flat and silhouette lighting. Single and Multi-Camera Lighting- Aesthetics (K1, K2, K3, K4, K5, K6)
- 2.6 Lighting Instruments – Field and Studio, Lighting Control Instrument, – Types of Lamps (K2, K3, K4, K5, K6)

### Unit III: Visualization

(15 Hours)

- 3.1 Visualization – storyboard, - Camera Framing and Composition (K1, K2, K3)
- 3.2 Camera Manipulating picture depth- Two dimensional fields: Area, Field, Screen forces (K1, K2, K3)
- 3.3 Three Dimensional: Depth and volume, screen Volume (K2, K3, K4, K5)
- 3.4 Narrow angle distortion, Wide angle distortion, Spatial paradoxes (K2, K3, K4, K5)
- 3.5 The Nature of Colours – relativity of Colours (K3, K4, K5, K6)
- 3.6 Colour Function and Composition – Colour Temperature (K3, K4, K5, K6)

### Unit IV: The Camera operation

(15 Hours)

- 4.1 Camera Operation and Techniques (K1, K2, K3)
- 4.2 Camera shots, angles, movements and filters (K1, K2, K3, K4)
- 4.3 Camera support equipment: shoulder mount, monopod, tripods (K2, K3, K4)
- 4.4 Pedestals, cranes, dolly, trolley, jibs, etc (K3, K4, K5, K6)
- 4.5 Lighting for Indoor/Outdoor Shoots (K4, K5, K6)
- 4.6 Camera and Lighting for specific programmes: News, Interviews, Talk shows, Panel, etc.(K3, K4, K5, K6)

### Unit V: Retrieval and Post Production

(15 Hours)

- 5.1 Video Recording Formats (K2, K3, K4, K5)
- 5.2 Videotape Recording systems (K2, K3, K4)
- 5.3 Videotape Recording process (K1, K2, K3, K4)
- 5.4 Video Storage Systems: compact discs (K2, K3, K4)
- 5.5 DVD, Digital Memory Cards (K3, K4, K5, K6)
- 5.6 Video Streaming etc. (K4, K5, K6)

**Books for Study and Reference:**

- 5.1 Broadcasting – Business, Legal, Financial, Commercial. (K3, K4, K5)
- 5.2 Aspects, Public, Private & global radio systems and their working program costing. (K3, K4, K5)
- 5.3 Budget & marketing. (K4, K5, K6)
- 5.4 Audience research. (K4, K5, K6)
- 5.5 TRPs in radio & TV. (K4, K5, K6)
- 5.6 Online journalism. (K4, K5, K6)

## **Books for Study & Reference**

1. Hillard - Writing for Television, Radio & New media, Seventh Edition, 2011.
2. Tony Harcup - Journalism principles & practice, Second Edition, 2009
3. Awasthy, G.C. - Broadcasting in India, Allied Publishers, 2007

## SEMESTER II

### PCEMF20 - ADVANCED TELEVISION PRODUCTION

Year: I	Course Code:	Title of the Course:	Course Type:	Course Category:	H/W	Credits	Marks
Sem: II	PCEMF20	Advanced Television Production	Theory	Core	5	4	100

#### Course Objective

To prepare students for professional challenges of today and tomorrow and to expose them to real world production scenario.

#### Course Outcomes (CO)

The Learners will be able to

**CO1:** Describing the basics of Television production and its standard formats.

**CO2:** Acquiring the knowledge on Production management and production elements.

**CO3:** Examine the basic work process in the preproduction stage.

**CO4:** Analysing the production process and production techniques.

**CO5:** Adopting the post production process and its techniques

CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Understanding the Television Production (15 hours)**

- 1.1 Generating a television picture, picture scanning (K1, K2, K3)
- 1.2 Basic video signals, CMOS (K1, K2, K3)
- 1.3 CCD, Digital television (K2, K3, K4)
- 1.4 Types of Production - Production Team (K3, K4, K5)
- 1.5 Production Environment (K2, K3, K4, K5)
- 1.6 Television Standards and formats – PAL, NTSC, SECAM (K3, K4, K5, K6)

### **Unit II: Organization and Management (15 hours)**

- 2.1 Production Management: Organizing crew – Scheduling (K1, K2, K3)
- 2.2 Team work - shooting Spots (K3, K4, K5)
- 2.3 Final Package (show copy) (K3, K4, K5)
- 2.4 Audience Ratings and Feedback (K3, K4, K5)
- 2.5 Structure and working of a Television Production Centre (K2, K3, K4, K5, K6)
- 2.6 Production elements and equipment (K3, K4, K5, K6)

### **Unit III: Pre-Production Process (15 hours)**

- 3.1 Pre-Production - Planning of story (K1, K3, K4)
- 3.2 Discussion - Storyboard – Screenplay (K1, K2, K3)
- 3.3 Dialogue Writing - Selection of Characters, Costumes and Location (K2, K3, K4, K5)
- 3.4 Production planning and coordination - Background of Production (K2, K4, K5, K6)
- 3.5 Directors Role - Production practices: Single Camera (K2, K3, K4, K5, K6)
- 3.6 Multi Camera techniques (K3, K4, K5, K6)

### **Unit IV: Production Techniques (15 hours)**

- 4.1 Production Process - Planning and Management (K1, K2, K3)
- 4.2 Understanding different Production Environments (K1, K3, K4)
- 4.3 Floor Management and Studio Management (K2, K3, K4, K5)
- 4.4 Set Design background - Budgeting - Talent management (K3, K4, K5)
- 4.5 Auditions - Organizing the production Team - delivering the finished product (K2, K4, K5, K6)
- 4.6 Types of telecasting. Field Production and Big Remotes (K4, K5, K6)

### **Unit V: Post Production Techniques (15 hours)**

- 5.1 Switcher Function - Layout - Operations - Types and Functions (K3, K4, K5)
- 5.2 Video Editing - Editing modes (offline, online) - Editing systems (Linear, Non-Linear) (K2, K3, K4, K5)
- 5.3 Editing Principles - Computer Editing - Video Effects (K2, K4, K5, K6)
- 5.4 Analog, Digital, Optical, Mechanical, Graphics for Television - Graphic Equipment (K2, K3, K4, K5)
- 5.5 Titling - Special Effects - Audio Dubbing - Background Music (K2, K3, K4, K5)
- 5.6 Synchronizing Audio and Video - Voice Over - Compeering Skills - Anchoring Live Programs (K3, K4, K5, K6)

## **Note: Compulsory Media Exposure in Television Production**

### **Books for Study and Reference:**

1. Aleksandar Louis Todorovic – Television Technology Demystified – Focal Press, 2007.
2. Philippe, Brian, Lynne - Programming for TV, Radio and the Internet - Focal Press, 2005.
3. Mitch Mitchell - Visual Effects for Film and Television - Focal Press, 2004.
4. Paul Martin Lester - Visual Communication, 3<sup>rd</sup> Edition - Thomson Wadsworth, 2003.
5. Zettl Hebert - Video Basics 7 - Wadsworth, 2012.
6. Zettl Hebert - Television Production Handbook - Wadsworth Thompson Learning, 2000.
7. Gerald Millerson - Television Production, 13<sup>th</sup> Edition - Focal Press, 1999.

## SEMESTER II

### PCEMG20 - RADIO PRODUCTION

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCEMG20	<b>Title of the Course:</b> Radio Production	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective

To introduce students to the principles of sounds and the art of making audio programmes

#### Course Outcomes (CO)

The Learners will be able to

CO1: Review the basic sound principles and psychophysics of sound.

CO2: Evaluating the uses of sound equipment's and production of multichannel sounds.

CO3: Acquiring the knowledge on Acoustical requirement of ideal studio.

CO4: Analysing on the types of special audience programming on radio

CO5: Examine the innovative developments in radio communication.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	H
CO5	H	H	M	H	H	H

(Low- L, Medium - M, High - H)

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Principles of Sound**

**(15 hours)**

- 1.1 Basic sound Principles - Sound wave(K1, K2, K3)
- 1.2 Psychophysics of sound – Frequency (K1, K2, K3, K4)
- 1.3 Timbre - Loudness – amplitude– velocity (K1, K3, K5)
- 1.4 Recording studio - Control room (K2, K3, K5)
- 1.5 Project studio - Portable studio. (K1, K3, K5, K6)
- 1.6 Recording Process-Audio Formats (K3, K5, K6)

### **Unit II: Sound Equipments**

**(15 hours)**

- 2.1 Sound equipment – transducers (K1, K3, K5, K6)
- 2.2 Types of Mikes - Pickup Patterns (K1, K2, K3, K4)
- 2.3 Mixers – Console - Loud speakers (K2, K3, K4)
- 2.4 Monitors - Audio meters – Dubbing (K3, K4, K5, K6)
- 2.5 Voice over - Audio Editing Procedures - sound aesthetics (K2, K3, K4, K6)
- 2.6 Production of multi-channel sound: DTS, Dolby digital, mono, stereo (K3, K4, K5, K6)

### **Unit III: Studio Acoustics**

**(15 hours)**

- 3.1 Sound design elements – Acoustics –Psychoacoustics (K1, K2, K3, K4)
- 3.2 Spatial hearing - Acoustical requirement of an ideal studio (K2, K3, K4)
- 3.3 Types and application of sound proofing (K2, K3, K4)
- 3.4 Reflection-Sound isolation (K3, K4, K6)
- 3.5 Basic of psychoacoustics (K3, K4, K5, K6)
- 3.6 Sound transmission - Sound Absorption (K4, K5, K6)

### **Unit IV: Special Audience Programming**

**(15 hours)**

- 4.1 Types of Radio programming - Radio talks (K3, K4)
- 4.2 Features – discussion (K3, K4, K5)
- 4.3 Interviews - Radio play (K2, K3, K4)
- 4.4 Special Audience programme on Radio
- 4.5 Programme for Children (K3, K4, K5, K6)
- 4.6 Women and Youth etc (K4, K5, K6)

### **Unit V: Innovative Development in Radio Communication**

**(15 hours)**

- 5.1 Field Programme Production, Live Programme Production. (K2, K3, K4, K6)
- 5.2 Final editing and mastering (K3, K4, K5, K6)
- 5.3 Producing Edutainment and Infotainment Programmes for Radio (K2, K3, K4)
- 5.4 Disaster Coverage News Bulletins – Emergency Management (K3, K4, K5, K6)
- 5.5 Community Radio; satellite radio (K5, K6)
- 5.6 Private FM Radio stations-Digital Radio Podcast (K3, K4, K5, K6)

**Books for Study and Reference:**

1. Philippe, Brian, Lynn - Programming for TV, Radio and Internet - Focal Press, 2005.
2. David Miles, Robert Runstein - Modern Recording Techniques, 6<sup>th</sup> Edition - Focal Press, 2005.
3. Carl, Philip, Firitz, Louis - Modern Radio Production, 6<sup>th</sup> Edition - Thomson Wardsworth, 2004.
4. Zettl Herbert - Video Basics 3 – Wardsworth, 2001.
5. Zettl Herbert - Television Production Handbook - Wardsworth Thompson Learning, 2000.

## SEMESTER II

### PCEMH20 - MEDIA ANALYSIS AND TECHNIQUES

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCEMH20	<b>Title of the Course:</b> Media Analysis & Techniques	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective

To introduce the basic media analysis techniques with practice applications in order to develop a critical perspective of media texts.

#### Course Outcomes (CO)

The Learners will be able to

**CO1:** Explain the Semiotic Analysis of Media.

**CO2:** Acquiring Knowledge about Marxist Analysis

**CO3:** Analysing the Psychoanalytic Criticism

**CO4:** Evaluating the Feminist Analysis.

**CO5:** Examine the Concept of Media Ethics and Laws.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	M	H	H	H

(Low- L, Medium - M, High - H)

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Semiotic Analysis (15 hours)**

- 1.1 Problem of meaning, social aspects of semiotics (K1, K3)
- 1.2 Signs, Signifiers, Signified (K2, K4, K5)
- 1.3 Hyper reality, Connotation and Denotation (K3, K4, K5, K6)
- 1.4 Syntagmatic analysis, Paradigmatic analysis (K2, K4, K5)
- 1.5 Application: Murderers on the Orient Express, Football (K3, K4, K5)
- 1.6 Application: Murderers on the Orient Express, Football(cont.) (K2, K3, K4, K5, K6)

### **Unit II: Marxist Analysis (15 hours)**

- 2.1 Materialism, The base and the super structure (K2, K3, K4)
- 2.2 False consciousness and ideology (K2, K3, K4, K5)
- 2.3 The Frankfurt school, Class conflict, Hegemony (K2, K4, K5)
- 2.4 Marxist criticism in postmodern world, Critical Theory (K2, K3, K4, K5, K6)
- 2.5 Social learning theory, Social role theory, Cognitive dissonance theory (K2, K4, K5)
- 2.6 Application: Fiji Perfume “Snake” advertisement (K4, K5, K6)

### **Unit III: Psychoanalytic criticism (15 hours)**

- 3.1 The unconscious (K1, K2)
- 3.2 Sexuality (K2, K3)
- 3.3 Oedipus complex (K1, K2, K3, K4)
- 3.4 Id, ego, Super ego (K2, K3, K4)
- 3.5 Jungian Psychoanalytic theory (K2, K3, K4, K5, K6)
- 3.6 Application: Analyzing sexuality, violence and additive elements of video games (K3, K4, K5, K6)

### **Unit IV: Feminist Analysis (15 hours)**

- 4.1 Identity, position and authority (K1, K3, K4)
- 4.2 Social conception of knowledge, Phallogocentric theory (K2, K3, K4)
- 4.3 Liberal feminism, Social feminism, Radical feminism (K3, K4, K5)
- 4.4 Marxist feminism, Postmodern feminism (K2, K4, K5)
- 4.5 The male gaze and the female spectator (K3, K4, K5, K6)
- 4.6 Application: Analysing feminist perspectives including male gaze based on any movie (K4, K5, K6)

### **Unit V: Sociological and Discourse Analysis (15 hours)**

- 5.1 Sociological Analysis: Alienation, Anomie (K4, K5, K6)
- 5.2 Bureaucracy (K2, K3)
- 5.3 Discourse analysis: Spoken and Written discourse (K2, K4, K5)
- 5.4 Styles and written discourse, Pragma techniques (K3, K4, K5, K6)
- 5.5 meta-Analysis, Business Analysis (K3, K4, K5)
- 5.6 Critical Review (K5, K6)

**Books for Study and Reference:**

1. Arthur Asa Berger , Media Analysis Techniques 4th and 6<sup>th</sup> Edition, Sage publications, 2012
2. Meire Gillespie and Jason Tonnbee, Analysing Media Texts, Tata-McGraw Hill, 2010

## SEMESTER II

### PCEMI20 - PRACTICAL III: NON LINEAR EDITING

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCEMI20	<b>Title of the Course:</b> Non-Linear Editing	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective

To teach students the art of editing audio and video through Nuendo/ Adobe Audio Editing and Final Cut Pro software respectively and to complete basic exercises in editing.

#### Course Outcomes (CO)

The Learners will be able to

**CO1:** Identify the Final Cut Pro Tools and Techniques.

**CO2:** Acquiring Knowledge about the Radio Programming.

**CO3:** Elaborating the Key features of News Production.

**CO4:** Creating the titling and end credits and Dubbing for Video Production.

**CO5:** Develop the various formats of Programme Production.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	M	H	H	H

(Low- L, Medium - M, High - H)

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

The students should use all the techniques while doing the exercises:

- Introducing Keyboard
- Import the clip
- Timeline
- 3 point editing
- EDL
- Transitions (Cut, Wipe, Fade, Dissolve, Digital effect)
- Audio
- Lip Synchronization
- Titling
- Creating a master out

**Exercises: 1-3 (30 hours), 2-6 (30 hours), 7 & 8 (15 hours), 9 & 10 (15 hours)**

1. Creating sound effects creatively with suitable objects
2. Producing a Radio drama with suitable music and special effects
3. Create a signature tune or a Radio jingle
4. Compilation of a News production
5. Dubbing for a part of animation movie with appropriate music and special effects
6. Remix of a film song with visuals taken from multiple films
7. Dubbing in a different language for part of a feature film and adding subtitles
8. Compilation of a travel episode with suitable video transition and voice-over recording
9. Titling and end credits for a Video presentation
10. Produce programmes in different formats (Talk, comparing, announcement, anchoring, interviews using Chroma key technique).

**COGNITIVE LEVEL: (K1, K2, K3, K4, K5, K6)**

The Internal Evaluation for 40 marks is based on these 10 exercises.

The Semester Examination is based on the practical examination (45 marks), Viva (5 marks) and the Record (10 marks)

## SEMESTER II

### PCEMJ20 - PRACTICAL IV: PROJECT WORK

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: II</b>	PCEMJ20	Project	Practical	Core	1	2	100

#### Course Objective

To train students in shooting and directing a short-film or documentary, by putting into practice the various techniques learned in Video and Audio production and Script writing and Direction.

#### Course Outcomes (CO)

##### The Learners will be able to

CO1: Analysing the Concepts of Documentary/Short film production

CO2: Implementing the Pre-Production process of Documentary/short film

CO3: Executing the Production process of Documentary/short film

CO4: Compile the Post Production Activities according to the Script.

CO5: Creating the Documentation with Master Copy.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	H
CO5	H	H	M	H	H	H

(Low- L, Medium - M, High - H)

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	H	H
CO2	H	H	H	M	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

Students will specialize in Television / Radio Production and prepare an individual project on any chosen theme. The master copy of the production must be submitted along with the script.

- Proposal (10 minutes)
- Script Approval
- Story board
- Rehearsal
- Final out

COGNITIVE LEVEL: (K1, K2, K3, K4, K5, K6)

The Internal Evaluation for 40 marks is based on the production process and the model viva. The Semester Evaluation is based on the Viva-Voce (20 marks) and the quality of the production (40 marks).

## SEMESTER II

### PEEMC20 - ELECTIVE II A: INTER-CULTURAL COMMUNICATION

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PEEMC20	<b>Title of the Course:</b> Inter-Cultural Communication	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

- To initiate students to the challenges in global communication in the age of cross-culture communication

#### Course Outcomes (CO)

The Learners will be able to

**CO1:** Discuss the Concept of Inter Culture Communication.

**CO2:** Acquiring Knowledge in the aspects of inter cultural Business Communication.

**CO3:** Analysing the Concepts of Intra Cultural Communication.

**CO4:** Acquiring the Knowledge about Global Communication

**CO5:** Evaluating the Relationship Between Intercultural Communications in News Media Production.

CO	PSO

CO4	H	H	H	M	H	H
CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction to ICC (15 hours)**

- 1.1. Introduction to Communication.(K2, K3, K4)
- 1.2. Culture and Inter-cultural Communication.(K3, K4)
- 1.3. Dimensions of culture.(K2, K3, K4)
- 1.4. Enculturation.(K2, K3, K4)
- 1.5. Acculturation. (K2, K3, K4)
- 1.6. Cultural barriers, Relevance of Inter-cultural communication to Journalism and Mass communication. (K3, K4, K5, K6)

### **Unit II: Inter-cultural Business Communication (15 hours)**

- 2.1. Work attitudes.(K1,K2, K3)
- 2.2. Individualism vs Collectivism.(K2, K3, K4)
- 2.3. Global etiquette in business introductions. (K2, K4, K5)
- 2.4. Electronic communication, and travel and dining. (K3, K4)
- 2.5. Business and social customs. (K2, K3, K4)
- 2.6. Cultural difference in communication. (K2, K4, K5)

### **Unit III: Intra-cultural Communication (15 hours)**

- 3.1. Inter-cultural versus Intra-cultural communication.(K1,K2, K3,K5)
- 3.2. Nature and Characteristics. (K2, K3, K4)
- 3.3. Indian and South Indian contexts of Inter-cultural communication.(K2, K3, K4)
- 3.4. Role of mass media in bridging cultural divides.(K2, K4, K5)
- 3.5. Cultural Identities and loss of cultural identity. (K2, K3, K4)
- 3.6. Problem of ethnocentrism. (K2, K3, K4)

### **Unit IV: Global Communication (15 hours)**

- 4.1. Global communication. (K1,K2, K3)
- 4.2. Growth of International Communication.(K2, K3, K4)
- 4.3. Cultural shock, Language and Inter-cultural communication. (K2, K3, K4)
- 4.4. High and low context languages.(K2, K3, K4)
- 4.5. Subjective interpretation.(K1,K2, K3)
- 4.6. Language and cultural interaction, Cross Cultural Communication. (K2, K4, K5)

### **Unit V: ICC and News (15 hours)**

- 5.1. Implications of inter cultural barriers in News media production.(K1,K2, K3)
- 5.2. Public sphere, LPG.(K2, K3, K4)
- 5.3. Cultural hegemony. (K2, K3, K4)
- 5.4. Influence in media production.(K3, K4, K5, K6)
- 5.4. International news flow patterns.(K2, K4, K5)
- 5.6. Offline and online. (K1,K2, K3,K5)

**Books for Study and Reference:**

1. Stanley J .Baran – Introduction to Mass Communication – Media Literacy and Culture, Tata McGraw-Hill, 2010.
2. Yahya R. Kamalipour – Global Communication – Wadsworth Thomson Learning, 2007.
3. William B. Gudykunst – Theorizing about Intercultural Communication, Sage Publication, 2005.
4. Hamid Mowlana – Global Communication in Transition – Sage Publications, 1996.

**SEMESTER II**  
**PEEMD20 - ELECTIVE II B: MOBILE COMMUNICATION**

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PEEMD20	<b>Title of the Course:</b> <b>Mobile Communication</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

**Objective:**

It is particularly aimed at equipping with Wireless Communication students with advanced communication theory and technologies, vital for a successful career in digital economy.

**Course Outcomes (CO)**

**The Learners will be able to**

CO1: Explain the concepts of Wireless communication.

CO2: Analysing the work process of Analog and digital signal transmission.

CO3: Explain the components of radio system and radio frequency.

CO4: Evaluating the various kinds of wireless network and its uses.

CO5: Analysing the advantages and challenges of wireless communication.

CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction**

**(15 hours)**

- 1.1. Wireless technology. (K1,K2, K3)
- 1.2. Blue tooth. (K1,K2, K3)
- 1.3. Satellite network. (K2, K3, K4)
- 1.4.cellular network. (K3, K4)
- 1.5. Wireless Applications. (K2, K3, K4)
- 1.6. Wireless advantages and disadvantages. (K3, K4, K5, K6)

### **Unit II: Transmission**

**(15 hours)**

- 2.1. Data representation. (K2, K3, K4)
- 2.2. Binary numbers – wireless signals. (K3, K4)
- 2.3. Radio waves. (K1,K2, K3)
- 2.4. Analog and digital signal – frequency. (K2, K3, K4)
- 2.5. Analog Modulation – AM, FM, PM. (K2, K4, K5)
- 2.6. Digital Modulation. (K2, K4, K5)

### **Unit III: Radio Frequency**

**(15 hours)**

- 3.1. Components of a Radio system. (K1,K2, K3)
- 3.2. Filters, mixers. (K2, K4, K5)
- 3.3. Amplifiers, antennas. (K2, K3, K4)
- 3.4. Design of a radio system. (K3, K4, K5)
- 3.5. Transmission direction. (K2, K4, K5)
- 3.6. Radio frequency spectrum. (K3, K4, K5, K6)

### **Unit IV: Wireless Network**

**(15 hours)**

- 4.1. Metropolitan Area Network – Broadband. (K2, K3, K5)
- 4.2 Free Space Optics. (K2, K3, K4)
- 4.3 Local multipoint Distribution. (K2, K3, K4)
- 4.4 Multi channel multi point. (K3, K4, K5)
- 4.5 Wide Area Network – Cellular phone application. (K2, K3, K4)
- 4.6 Cellular challenges and outlook – Satellite broadband. ( K4, K5, K6)

### **Unit V: Wireless Communication**

**(15 hours)**

- 5.1. Advantages of wireless technology. (K2, K3, K5)
- 5.2. Challenges of using wireless technology. (K3, K4, K5)
- 5.3. Building a wireless infrastructure. (K2, K3, K4)
- 5.4.Overview of Wifi, Wimax and ff basic features and specifications. (K3, K4, K5, K6)
- 5.5. Ethical aspects of social media. (K2, K4, K5)
- 5.6. The Pros and Cons of Social media and its impact on the society. (K3, K4, K5, K6)

**Books for Study and Reference:**

1. Mark Ciampa& Jorge Olenewa – Wireless Communication – Cengage Learning, 2007
2. H.Labioud,H. Afifi,C.D. Santis- Wifi, Bluetooth, Zigbee and Wimax –Springer-2007
3. Raj Kamal – Mobile Computing – Oxford, 2007
4. Asoke & Roopa – Mobile Computing – Tata McGraw Hill, 2005
5. Theodore S.Rappaport – Wireless Communications: Principles and practice- PHI Publication, 1996.

## SEMESTER III

### PCEMK20 - FILM STUDIES

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: III</b>	PCEMK20	Film Studies	Theory	Core	5	4	100

#### Course Objective:

To provide in-depth knowledge on films, to develop a critically informed sense of the history and development of film conventions, both mainstream and alternative, and understand the language and use of films.

#### Course Outcomes (CO)

##### The Learners will be able to

CO1:Classify the inception of world cinema and history of Indian cinema.

CO2: Analysing the concept of film as an art and characteristics of films.

CO3:Acquiring the knowledge on various concepts of film theories.

CO4:Making an in-depth analysis on Genres of cinema.

CO5:Elaborate the recent trends in film industry.

CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## Course Syllabus

### **Unit I: History of Cinema** (15 hours)

- 1.1 History of Indian Cinema(K1, K2)
- 1.2 Early Silent era – talkies – Modern Cinema(K1, k2)
- 1.3 A brief account of World Cinema (K1, K2, K4)
- 1.4 Film makers: Indian, Hollywood, European, and South Asian(K1, K2, K3)
- 1.5 Study of some Indian classics (K1, K2, K3)
- 1.6 Main stream and Alternate cinema (K1, K2, K3)

### **Unit II: Characteristics of Films** (15 hours)

- 2.1 Film as an art - Film as a social document (K2, K3, K4)
- 2.2 Film as a medium of communication - conceptual issues (K2, K3, K4)
- 2.3 Film language, Macro and Micro structure (K3, K4, K5)
- 2.4 Process and aspects of film making - Film forms - content - narratives –narrative forms - styles - text and grammar (K2, K3, K4, K5)
- 2.5 Critical and technical terns used in film production (K4, K5, K6)
- 2.6 Types of Films – fiction and Non-fiction, Mis-en-scene (K2, K3, K4, K5)

### **Unit III: Film theories** (15 hours)

- 3.1 Soviet theories – European theories (K4, K5)
- 3.2 German Expressionism – Neo-realist, Classical (K3, K4, K5)
- 3.3 New Wave in cinema, Film Theories (K2, K3, K4, K5)
- 3.4 Post Modernism, Auteur, Apparatus, Feminist, Marxist (K4, K5, K6)
- 3.5 Recent approaches to – Cine structuralism, cine feminism, cine semiotics (K3, K4, K5)
- 3.6 Film analysis –technical, psychoanalytical, social analysis, techniques, reviews (K3,K4,K5)

### **Unit IV: Genres of Cinema** (15 hours)

- 4.1 Genres - Documentary Films – Films Division (K4, K5, K6)
- 4.2 Study of leading Documentary film maker in the world and India Western Genres (K4,K5,K6)
- 4.3 Indian film genres, South Indian film genres (K2, K3, K4)
- 4.4 Diaspora films (K4, K5)
- 4.5 Animation movies (K4, K5, K6)
- 4.6 Women and Children, Film and Politics in India (K5, K6)

### **Unit V: Trends in Film Industry** (15 hours)

- 5.1 Film Awards and festivals (K4, K5)
- 5.2 New developments in film industry (K3, K4, K5)
- 5.3 Computer Graphics –Digital film making (K2, K4, K5 K6)
- 5.4 Future of Cinema in India (K4, K5, K6)
- 5.5 Film Management (K4, K5, K6)
- 5.6 Multi languages release -Budgeting and schedules (K2, K4, K5)

**Exercise:** Watching award winning movies of particular directors

**Books for Study and Reference:**

1. Mary Celeste Kearney – The Gender and Media Reader, Routledge, New York, 2012.
2. Robert Edgar- Hunt, John Marland, Steven Rawle - The Language of Film, Ava Publication, 2010.
3. Susan Hayward - Key Concepts in Cinema Studies - Routledge, 2004.
4. Michael Rabiger - Directing Film Techniques and Aesthetics, 3<sup>rd</sup> Edition - Focal Press, 2003.
5. Thomas A.Ohanian, Michael E. Philips - Digital Film Making, 2<sup>nd</sup> Edition - Focal Press, 2000.
6. Yves Thorval - The Cinema of India (1896-2000) - Macmillan Press, 2000.

### SEMESTER III

#### PCEML20 - COMMUNICATION RESEARCH METHODS

<b>Year:</b> II	<b>Course Code:</b> PCEML20	<b>Title of the Course:</b> Communication Research Methods	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
--------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To teach in detail the need for communication research and the techniques and process of research studies in the field of Media

#### Course Outcomes (CO)

The Learners will be able to

CO1: Explain the basic concepts of research and research process.

CO2: Assessing the concepts of qualitative and quantitative research.

CO3: Making an in-depth analysis on sampling methods and sampling techniques.

CO4: Analysing the various statistics methods and Analysis.

CO5: Acquiring the knowledge on research report writing and presentation.

CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus**

### **Unit I: Basics of Research (15 hours)**

- 1.1 Nature and Scope of Communication Research(K2, K3)
- 1.2 Research: a way of thinking (K3, K4)
- 1.3 Applications of Research–Definition of Research – Characteristics of Research (K2, K3, K4)
- 1.4 Types of Research – Paradigms of Research (K2, K3, K4)
- 1.5 Research Proposal (K4, K5, K6)
- 1.6 Research Process (an eight step model) (K5, K6)

### **Unit II: Content Analysis (15 hours)**

- 2.1 Qualitative Research: Historical Analysis (K2, K3)
- 2.2 Ethno Methodological Research (K2, K3, K4)
- 2.3 Participant Observation – Interview and Depth interview – FGD (K2, K3, K4)
- 2.4 Content Analysis – Action Research – Case Study -Textual Analysis: Semiotic Analysis - Rhetorical Analysis – Ideological Criticism – Psycho Analytical Criticism, Online Research method (K3, K4, K5)
- 2.5 Issues in Audience Research (K2, K3, K4, K5)
- 2.6 SPSS Application-Social media as a Research Tool (K4, K5, K6)

### **Unit III: Sampling (15 hours)**

- 3.1 Sampling Methods (K2, K3, K4)
- 3.2 Sampling Techniques (K3, K4, K5)
- 3.3 Probability Sampling - Non Probability Sampling (K2, K3, K4, K5)
- 3.4 Sample Size – Sample Error (K4, K5, K6)
- 3.5 Sample Frame (K3, K4)
- 3.6 Testing Hypothesis (K4, K5, K6)

### **Unit IV: Statistics and reliability (15 hours)**

- 4.1 Primary Data – Secondary Data (K1, K2, K3)
- 4.2 Data Presentation (K2, K3, K4)
- 4.3 Levels of Measurement – Measurement Scales (K3, K4, K5)
- 4.4 Reliability and Validity Analysis – Measures of Central Tendency (K2, K3, K4, K5)
- 4.5 Dispersion, Measures of Variation – Measures of Skewness – Analysis of Variance – Chi Square Test (K4, K5, K6)
- 4.6 Data collection Software-Team Scope, Open data kid, Red cap (K5, K6)

### **Unit V: Thesis writing (15 hours)**

- 5.1 Report Writing and Presentation (K3, K4, K5)
- 5.2 Types of Report: Informational, Analytical, persuasive (K4, K5)
- 5.3 Components of research thesis- Decision Oriented report – Survey Based Report – Algorithmic Research Report (K4, K5, K6)
- 5.4 A Research Report Format – MLA format –APA Style format (K4, K5, K6)
- 5.5 Typing Instructions (K4, K5)
- 5.6 Oral Presentation (K5, K6)

## **Practical Exposure:**

Pilot Study Research (Should be done by the students on their desired topic) SPSS workshop.

## **Books for Study and Reference:**

CO5	H	H	H	M	H	H

(Low- L, Medium - M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction to Public Relations (15 hours)**

- 1.1 Brief History of Public Relations – Definition of PR (K2, K3)
- 1.2 Public relations and Communication (K2, K3, K4)
- 1.3 Functions of Public Relations (K4, K5)
- 1.4 Benefits of PR - Models of PR – PR and Politics (K3, K4, K5)
- 1.5 Government PR – The Lobby – Spin and Image Management (K4, K5, K6)
- 1.6 Political Communication and the Public Sphere – Triads of PR (K3, K4, K5)

### **Unit II: Functions of PR (15 hours)**

- 2.1 Publics – Internal and External(K3, K4)
- 2.2 Tools and activities for Internal PR(K4, K5)
- 2.3 Necessity and Goals of Employee Communication (K3, K4, K5)
- 2.4 Tools for External PR, (K2, K3, K4)
- 2.5 PR Writing, writing speeches, scripts, features, Newsletters, annual reports, direct mail, brochures, proposals (K3, K4, K5)
- 2.6 Writing for the web (K4, K5, K6)

### **Unit III: Press and PR (15 hours)**

- 3.1 Press Releases and its Types (K2, K3, K4)
- 3.2 Writing Tips and Distribution(K3, K4, K5)
- 3.3 Audio News Release, Video News Release, Press Conferences (K3, K4, K5)
- 3.4 Prime-time/ National, Photo-op and Joint PC (K2, K3, K4)
- 3.5 Press Briefing, Embargoes, Background Briefings (K3, K4, K5)
- 3.6 Media Relations (K3, K4, K5)

### **Unit IV: Corporate Communication (15 hours)**

- 4.1 Corporate Communication (K3, K4)
- 4.2 Corporate Image and Identity (K3, K4, K5)
- 4.3 House Magazines and Newsletters (K3, K4, K5)
- 4.4 Risk, Issues and Crisis Management (K3, K4, K5, K6)
- 4.5 Corporate Social Responsibility, Corporate Community Involvement and cause-related marketing (K2, K3, K4, K5)
- 4.6 Business to Business PR, Financial PR (K4, K5, K6)

### **Unit V: Digital PR and PR Profession (15 hours)**

- 5.1 PR in the Digital Era (K2, K3, K4)
- 5.2 Revolution or evolution (K2, K3, K4)
- 5.3 Social media influences, writing for websites (K4, K5, K6)
- 5.4 Futures challenges for PR and Corporate Communication (K4, K5, K6)
- 5.5 PR Agencies, Structure and Hierarchy, Professional Organisations (K5, K6)
- 5.6 Ethics in PR practice and writing, Codes of Practice (K4, K5, K6)

**Books for Study and Reference:**

1. Alison Theaker - The Public Relations Handbook - Routledge Publishers, 2012.
2. J. V. Vilanilam - Public Relations in India - Sage Publications, 2011.
3. K. M Shrivastava - Public Relations in the Digital Era - Pilgrims Publishing, 2007.

### SEMESTER III

#### PCEMN20 - PRACTICAL – V: INTERNSHIP

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>Credits</b>	<b>Marks</b>
<b>Sem: III</b>	PCEMN20	Internship	Practical	Core	3	3	100

#### Course Objective:

One-month training in media will expose the students to actual working conditions in any Reputed Production House. This internship is intended to enable students acquire field experience. Students will be required to maintain a journal recording their daily events in detail and submit a report on their activities at the end of the training.

#### Course Learning Outcomes (CO)

##### The Learners will be able to

- CO 1: Discuss the concepts of production house in Television Medium.
- CO 2: Acquiring an in-depth knowledge in the Respective Media Industry.
- CO 3: Compiling the Types of Work done in the Production house.
- CO 4: Evaluating the Experience gained in Production house.
- CO 5: Substantiate the Report with proper documents.

## **Order of details expected in the Internship Report**

College Certificate

Certificate from Media Industry

Acknowledgements

Table of Contents

List of Figures

Synopsis

### 1. Introduction

1.1 About the Media Industry

1.2 About the Team

1.3 Areas of Field Experience (asst. Director, Script writer, time keeper, helper etc..)

1.4 Outstanding Individual Works

2. (Divide the successive Chapters based on Issue/Type of Work/Chronological Events, giving a detailed account of the work done, substantiating it with scripts, photographs, clippings of the telecast, etc.)

3. (Second Last Chapter) About the experiences and lessons learnt from them, categorized according to content.

### 4. Conclusion

Appendix A (Photographs: Workplace, Team)

Appendix B (Notices, Ads, Script samples, etc)

Cognitive Level: K1,K2,K3,K4,K5,K6

The Internal Evaluation (40 Marks) is based on the preparation of the final report.

The Semester examination is based on the evaluation of the Internship Report (20 marks) and Viva-Voce (40 marks).

### SEMESTER III

#### PCEMO20 - PRACTICAL – VI: BASIC 3D GRAPHICS AND ANIMATION

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCEMO20	<b>Title of the Course:</b> Basic 3D Graphics and Animation	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 3	<b>Marks</b> 100
------------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

1. To enable students to learn the art of 3D animation and modelling using 3D graphics software.

#### Course Outcomes (CO)

##### The Learners will be able to

CO1: Locating the Various tools and workspace of 3D Studio Max.

CO2: Acquiring the knowledge in basic Animation Techniques.

CO3: Analyze and usage of Character Animation Techniques.

CO4: Creating a Product and Architecture Design.

CO5: Compile the Concept of Lighting and Camera effect in 3d Animation.

**Software: 3D Studio Max**

- ✓ Standard & Extended Primitives- Household Objects- Sofa, Clock & Dining Table
- ✓ Editable Poly- Creating an Object & Adjusting the Segment, Logo, Architecture & Titling
- ✓ Material Editor- Applying on Objects & Giving Effects
- ✓ Modifier- Bend, Smooth, Special Feature; UV Map & Effects
- ✓ Modeling- Logo, Architecture & Titling
- ✓ Special Effect- Bomb & Particles
- ✓ Video Posting- Special Effects in Video, Photo, Object; Comparing Video & Particles 8.  
Lighting- Photometric & Standard Lighting
- ✓ Camera- Target & Free
- ✓ Animation- Rendering in Photocopy & Rendering Setup

**Exercises: (Each exercise 15 hours)**

1. Animated 3D titling
3. Multiple objects with different lightings
4. Character Animation
6. Product Animation
7. Architecture (interior & exterior)
8. Walk through using camera

Cognitive level:K1,K2,K3,K4,K5,K6

**Books for Study and Reference:**

1. 3D Modeling and Animation: Synthesis and Analysis Techniques for the Human Body by Nikos Sarris and Michael G. Strintzis, 2005
2. Maya Character Animation, Jaejin Choi, Dec 16, 2002.
3. Peter Ratner - 3D Human Modeling and Animation, third Edition - 2009

The Internal Evaluation for 40 marks is based on the process of development of the project.

The Semester Evaluation is based on the practical Examination (50) marks, Viva (5) marks and the record (5 marks).

## SEMESTER III

### PEEME20 - ELECTIVE III A: TECHNICAL BUSINESS COMMUNICATION

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PEEME20	<b>Title of the Course:</b> <b>Business Communication</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To initiate students to the types and techniques of organisational communication

#### Course Outcomes (CO)

##### The Learners will be able to

CO1: Describe the concepts of Business communication.

CO2: Analysing the theories of organizational group communication.

CO3: Assessing the importance of business correspondence and the writing skills.

CO4: Applying and presenting the visual aids in oral presentation.

CO5: Evaluating the ethics and business communication in the global context.

## **Course Syllabus:**

### **Unit I: Introduction to Business Communication (15 hours)**

- 1.1. Business Communication – need and importance. (K1,K2, K3)
- 1.2. Patterns of business communication. (K1,K2, K3)
- 1.3. Main categories of business communication. (K3, K4, K5, K6)
- 1.4. Communication networks of an organisation. (K2, K3, K4)
- 1.5. Business communication process. (K2, K4, K5)
- 1.6. Marketing, sales and persuasive communication. (K3, K4, K5, K6)

### **Unit II: Organisational Group Communication (15 hours)**

- 2.1. Group communication. (K1,K2, K3)
- 2.2. Working and communication in teams, Teamwork theory. (K3, K4, K5, K6)
- 2.3. Theories of small group communication. (K2, K3, K4)
- 2.4. Functional theory – Symbolic convergence theory. (K2, K4, K5)
- 2.5. Structuration theory, Conflict management, Negotiation, Meetings. (K1,K2, K3)
- 2.6. Types of group decision making. (K3, K4, K5, K6)

### **Unit III: Business Correspondence and writing skills: (15 hours)**

- 3.1. Definition, meaning and importance of Business Correspondence. (K1,K2, K3)
- 3.2. Parts of a business letter and its layout. (K2, K3, K4)
- 3.3. Letters – Circular, Sales, Bank correspondence. (K1,K2, K3)
- 3.4. Memorandums, Email, Text Messaging. (K3, K4, K5, K6)
- 3.5. Instant Messaging, Reports – contents. (K2, K3, K4)
- 3.6. Types and format, Technical writing. (K3, K4, K5, K6)

### **Unit IV: Forms of Technical Communication: (15 hours)**

- 4.1. Technical Report: Definition & importance. (K1,K2, K3)
- 4.2. Thesis/Project writing: structure & importance. (K3, K4, K5)
- 4.3. Synopsis writing: Methods; Technical research Paper writing: Methods & style. (K2, K4, K5)
- 4.4. Seminar & Conference paper writing: Key-Note Speech: Introduction & Summarization. (K2, K3, K4)
- 4.5. Expert Technical Lecture: Theme clarity; Analysis & Findings. (K2, K3, K4)
- 4.6. 7 Cs of effective business writing: concreteness, completeness, clarity, conciseness, courtesy, correctness, consideration. (K3, K4, K5, K6)

### **Unit V: Technical Presentation: Strategies & Techniques (15 hours)**

- 5.1. Presentation: Forms; interpersonal Communication. (K1,K2, K3)
- 5.2. Class room presentation; style; method. (K2, K3, K4)
- 5.3. Individual conferencing: essentials: Public Speaking: method; Techniques. (K3, K4, K5)
- 5.4. Clarity of substance; emotion; Humour; Modes of Presentation. (K2, K3, K4)
- 5.5. Overcoming Stage Fear: Confident speaking; Audience Analysis & Retention of audience interest. (K3, K4, K5, K6)
- 5.6. Methods of Presentation: Interpersonal; Impersonal; Audience Participation: Quizzes & Interjections. (K3, K4, K5, K6)

## SEMESTER IV

### PCEMS20 - PRACTICAL – VII: RESEARCH PROJECT

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCEMS20	<b>Title of the Course:</b> <b>Research Project</b>	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 3	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To put to practice the methods of research by undertaking a study in a relevant field of media

#### Course Syllabus:

The students will independently work on a research project. It will emphasize on literature review, theory-building skills, matching theory to methods and developing appropriate instruments. It will provide an orientation to database search techniques and also using Internet effectively for research. Students will work on any area of their choice within the broad field of electronic media and communications subjected to approval of their guide. They are expected to undertake a thorough study/research of the chosen subject, systematically and rigorously. They are expected to read relevant journals (some available on-line and of line) and books. Students should consult the respective guide at every stage of the research work. At the end of summer holidays, students are expected to submit a research proposal containing the following: Topic, Complete Literature Review, Research Design-Hypothesis/Research Questions, unit of Analysis, Variables/Issues to be Studied, Methods, Sampling Design Data Analysis Techniques, Questionnaire/ instrument to be used for analysis. Students can also carry out the fieldwork. The project report will have to be submitted at the end of the semester.

#### Course Outcomes (CO)

The Learners will be able to

**CO1:** Describe the Basic concepts of Qualitative and Quantitative Research Methods.

**CO2:** Analysing the topic and choosing the topic related to their rate of interest.

**CO3:** Evaluating the Research and choosing the desired methodology for conducting research.

**CO4:** Compiling the data collected and pointing the Key findings.

**CO5:** Constructing the desired conclusion and writing the Research Report.

4. Raywest Tom Muck – Dreamweaver MX: The Complete Reference - Tata McGraw Hill, 2002.
5. Joel Sklar - Principles of web Design - Thomson Learning, 2000.

The Internal Evaluation for 40 marks is based on the process of development of the web.

The Semester Evaluation is based on the Practical examination on development of a small website with a minimum of 5 web pages (45 marks), Viva Voce (5 marks), Record (10 marks).

## SEMESTER IV

### PEEMG20 - ELECTIVE IV A: WEB DESIGNING

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PEEMG20	<b>Title of the Course:</b> <b>Web Designing</b>	<b>Course Type:</b> Theory	<b>Course Category:</b> Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	-------------------------------------	-----------------	---------------------	---------------------

#### Course Objective:

To enable students to learn the basic html coding and layout design skills required for creating websites

#### Course Outcomes (CO)

The Learners will be able to

CO1: Review the concepts of web Design and Web browsers.

CO2: Acquiring knowledge about Dreamweaver and making Hyperlinks.

CO3: Analysing the HTML Tags and its Attributes.

CO4: Evaluating the Concept for planning the Website.

CO5: Constructing the Webpages by using Cascading Style sheet and preview it in Browsers.

(Low- L, Medium - M, High - H)

## **Course Syllabus:**

### **Unit I: Introduction to Web Design (15 hours)**

- 1.1. Introduction: The Web and the Internet, Evolution of WWW.(K2,K3)
- 1.2. Features of WWW, WWW Servers and Browsers. (K2.K3, K4)
- 1.3. HTTP, URL WWW and Hypertext. (K3, K4, K5)
- 1.4. Web Workings, Search Engines (K3, K4)
- 1.5. Basic Features of Web Browser, Web page Design Consideration (K4, K5, K6)
- 1.6. Principles for Designing a Web site, Web site Hosting. (K3, K4, K5, K6)

### **Unit II: Dreamweaver (15 hours)**

- 2.1. Dreamweaver CC, New features in Dreamweaver.(K2, K3)
- 2.2. Basics Webpage Elements, Working with Dreamweaver (K3, K4)
- 2.3 Adding Text and Lists, Displaying Image.(K2,K3)
- 2.4. Adding Flash and other Multimedia (K3, K4)
- 2.5. Making Hyperlinks (K2, K3)
- 2.6. Anchors and Mailto links, Frames. (K4, K5, K6)

### **Unit III: HTML (15 hours)**

- 3.1. TML, HTML Documents (K2, K3)
- 3.2. Document Layout of an HTML page (K2, K3)
- 3.3. Creating and Saving HTML Document (K3, K4, K5.K6)
- 3.4. HTML Elements, Formatting Styles (K2, K3)
- 3.5. Hypertext links, Images (K2, K3, K4)
- 3.6. HTML Tables, Table properties. (K3, K4, K5, K6)

### **Unit IV: Planning the Site (15 hours)**

- 4.1. Create the site Specification (K4, K5)
- 4.2. Identify the Content Goal (K3, K4)
- 4.3. Analyze the Audience (K4, K5)
- 4.4. Build a Web site Development team, filenames and URLs, Directory Structure (K4, K5)
- 4.5. Diagram the site, managing site files (K4, K5,K6)
- 4.6. Creating page templates – Creating page from templates, user experience.( K3, K4, K5, K6)

### **Unit V: Cascading Style Sheet (15 hours)**

- 5.1. Cascading style sheet, styling texts with CSS (K3, K4)
- 5.2.Creating external style sheets (K4, K5, K6)
- 5.3. CSS page layout, Positioning DIV (K4, K5)
- 5.4. Floating page element (K3, K4)
- 5.5. Centering your design on the page (K3, K4, K5)
- 5.6. Previewing with browser lab. (K2, K3)

**Books for Study Reference:**

1. Raj Kumar Shrivastava – A Textbook of Internet and Web Design - Dominant Publishers and Distributors, 2014.
2. Betsy Bruce, John Ray, Robyn Ness – Adobe Dreamweaver CS5 - Dorling Kindersley, 2011.
3. Research and Development Wing – Internet and Web Design, Macmillan India, 2008.
4. Ramesh Bangia – Internet and Web Design, 2<sup>nd</sup> Edition - Firewall Media, 2008.

- 1.4. The New World Information and Communication Order (NWICO)-(K2, K3)
- 1.5. NWICO and its objective (K4, K5)
- 1.6. Towards an integrative view of balanced information flow. (K3, K4, K5, K6)

### **Unit 2: Approaches to theorizing international communication**

- 2.1. Free flow of Information (K2, K3)
- 2.2. World system theory, Electronic colonialism theory (K3, K4)
- 2.3. Modernization Theory-Dependency Theory, Social Learning Theory (K3, K4, K5)
- 2.4. World Systems-Structural Imperialism, Hegemony, Propaganda-(K3, K4, K5)
- 2.5. Global Village, Technological Determinism, Globalization (K3, K4, K5)
- 2.6. Cultural Imperialism-Theories of information society ( K3, K4, K5, K6)

### **Unit 3: International/transnational media organizations**

- 3.1. News Agencies (K2, K3)
- 3.2. Evolution-Functions (K2,K3)
- 3.3. Typology (K3, K4)
- 3.4. Broadcast Networks, Cable News Network's - (CNN)(K3,K4,K5,K6)
- 3.5. British Broadcasting Service (BBC) (K3, K4, K5, K6)
- 3.6. Al Jazeera Networks (K2, K3, K4, K5, K6)

### **Unit 4: Disappearing borders of empowerment**

- 4.1. Global Homogenization (K2, K3)
- 4.2. Cultural Hybridity (K3, K4, K5)
- 4.3. Cultural Imperialism (K2, K3)
- 4.4. Revised Cultural Imperialism (K3, K4, K5)
- 4.5. Spaces of Empowerment ((K3, K4, K5
- 4.6. Remote Working Culture. (K2, K3, K4, K5, K6)

### **Unit 5: Important Personalities in International Communication**

- 5.1. Ralph Akin feleye – (K2, K3)
- 5.2. Marshall McLuhan-Ted Warner- (K3, K4, K5)
- 5.3. Bill Gates-Noam Chomsky-Herbert Schiller (K3, K4, K5)
- 5.4. Walter Lippmann-Edward Herman-John Merrill (K3, K4, K5, K6)
- 5.5. Cees Hamelink-Annabelle Sreberny (K3, K4, K5)
- 5.6. Hamid Mowlana-Sean Mcbrid (K3, K4, K5, K6)

### **Books for study and Reference:**

1. Akinfeleye, R., Amobi, T. I., & Sunday, O. Unending imbalance in global news flow, direction and intensity: Comparing global media coverage of 2008 US and Ghana presidential elections. Saarbruken, Germany: LAP Lambert Academic Publishing, 2011.
2. Mojaye, E. M., Oyewo, O. O., M'Bayo, R. T. & Sobowale, I. A. Globalization and development communication in Africa, Ibadan: University Press, 2008.
3. Thusu, D. K. International Communication: Continuity and change, New York, New York; Oxford University Press, 2006.
4. Morley, M How to manage global reputation: A guide to the dynamics of international public relations, New York, NY New York: University Press, 2002.
5. Alleyne M. O News revolution: Political and economic decisions about global information. New York: St Martins Press. 1997.
6. Mowlana, H. Global information and world communication: New frontiers in international relations, New York: Longman, 1986.

**M.SC. ELECTRONIC MEDIA**  
**PATTERN OF THEORY QUESTION PAPER**  
(With effect from 2020– 2021)

**(i) Continuous Assessment (2 Hours, 50 Marks)**

**SECTION A - 7 x 2 = 14 Marks**

Answer **ALL** Questions

1. CLO3      K1
2. CLO3      K2
3. CLO3      K3
4. CLO3      K6
5. CLO4      K1
6. CLO4      K2
7. CLO4      K3

**SECTION B - 3 x 7 = 21 Marks**

Answer any **THREE** out of five Questions

8. CLO3      K3
9. CLO3      K4
10. CLO3     K5
11. CLO4     K4
12. CLO4     K5

**SECTION C - 1 x 15 = 15 Marks**

Answer any **ONE** out of two Questions

13. CLO3     K4
14. CLO4     K5

**(ii) Semester Examination (3 Hours, 100 Marks)**

**SECTION A - 10 x 2 = 20 Marks**

Answer **ALL** Questions

Two Questions from each unit

1. Unit I      CLO1 K3
2. Unit I      CLO1 K4
3. Unit II     CLO2 K1
4. Unit II     CLO2 K2
5. Unit III    CLO3 K3
6. Unit III    CLO3 K4
7. Unit IV    CLO4 K5
8. Unit IV    CLO4 K1
9. Unit V      CLO5 K6

10. Unit V CLO5 K1

**SECTION B** - 5 x 7 = 35 Marks

Answer **ALL** Questions (Either or type)

One Question from each unit

11. A) Unit I CLO1 K2

11. B) Unit I CLO1 K2

12. A) Unit II CLO2 K3

12. B) Unit II CLO2 K3

13. A) Unit III CLO3 K4

13. B) Unit III CLO3 K4

14. A) Unit IV CLO4 K5

14. B) Unit IV CLO4 K5

15. A) Unit V CLO5 K2

15. B) Unit V CLO5 K2

**SECTION C** - 3 x 15 = 45 Marks

Answer **THREE** out of Five Questions

At least one question from each unit.

16. Unit I CLO1 K2

17. Unit II CLO2 K3

18. Unit III CLO3 K4

19. Unit IV CLO4 K5

20. Unit V CLO5 K6

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> Cycle)*  
**Gandhi Nagar, Vellore - 632006**

**Department of Mathematics (PG)**

**OUTCOME BASED EDUCATION - 2020**

## **PROGRAMME OUTCOMES (PO)**

On completion of the PG Programme, students will be able to:

**PO1:** Attain an in-depth knowledge in the respective domains augmented through self learning.

**PO2:** Assimilate and apply principles and concepts towards skill development and employability.

**PO3:** Apply critical and scientific approaches to address problems and find solutions.

**PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:** Integrate issues of social relevance in the field of study.

**PO6:** Persist in life-long learning for personal and societal progress.

## **PROGRAMME SPECIFIC OUTCOMES (PSO)**

On completion of the PG Programme, students will be able to:

**PSO1:** Attain in-depth knowledge in Pure Mathematics through theorems and Applied Mathematics using real-life examples and simulation results.

**PSO2:** Develop a deep interest in Advanced Mathematics and have the capability to understand the outcomes in various branches of Mathematics.

**PSO3:** Have the capability to apply the programming concepts of JAVA, MATLAB, and R language to model, formulate and solve real-life problems.

**PSO4:** Acquire profound knowledge in Mathematics to develop a range of generic skills to qualify for the fellowship examinations approved by UGC like CSIR-NET, JRF, GATE, and SET.

**PSO5:** Inculcate research-level thinking in the field of pure and applied mathematics and apply theoretical knowledge to write the dissertation using the Mathematical software LaTeX.

**PSO6:** Develop teaching, research, and technical skills in Mathematics for employment in different sectors and enhance self-learning & life-long learning to compete at the global level and meet social needs.

**PCMAA20 - MODERN ALGEBRA**

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> PCMAA20	<b>Title of the Course:</b> Modern Algebra	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>MARKS</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To know about the concepts of extension field.
2. To learn the concepts of Galois Theory.

**Course Outcomes (CO)**

The Learners will be able to

1. Assess the properties of Groups and Sylow's theorem.
2. Apply field extension property in Algebraic extensions.
3. Get the knowledge of Transcendence e and roots of polynomial.
4. Know about the Galois Theory.
5. Have the knowledge on the concepts of solvability by radicals.

## Course Syllabus

### Unit I: Group Theory

(18 Hours)

- 1.1 Conjugacy (K1,K2,K3,K4,K5,K6)
- 1.2 Cauchy's theorem (K1,K2,K3,K4,K5,K6)
- 1.3 Partitions (K1,K2,K3,K4,K5,K6,)
- 1.4 First part of Sylow's Theorem (K1,K2,K3,K4,K5,K6)
- 1.5 Second part of Sylow's Theorem (K1,K2,K3,K4,K5,K6)
- 1.6 Third part of Sylow's Theorem (K1,K2,K3,K4,K5,K6)  
(Sylow's Theorem First part: first version of the proof)  
(Chapter 2: Sections 2.11, 2.12 Omit: Lemma 2.12.1, Lemma 2.12.2)

### Unit II: Group Theory and Fields

(18 Hours)

- 2.1 External direct product (K1,K2,K3,K4,K5,K6)
- 2.2 Internal direct product (K1,K2,K3,K4,K5,K6)
- 2.3 Finite Abelian group (K1,K2,K3,K4,K5,K6)
- 2.4 Invariants (K1,K2,K3,K4,K5,K6)
- 2.5 Finite extension, Algebraic over the field (K1,K2,K3,K4,K5,K6)
- 2.6 Algebraic extensions (K1,K2,K3,K4,K5,K6)  
(Chapter 2: Sections: 2.13, 2.14, Chapter 5:Section5.1)

### Unit III: Fields (Contd.)

(18 Hours)

- 3.1 Transcendence e (K1,K2,K3,K4,K5,K6)
- 3.2 Remainder theorem (K1,K2,K3,K4,K5,K6)
- 3.3 Factor theorem (K1,K2,K3,K4,K5,K6)
- 3.4 Splitting field (K1,K2,K3,K4,K5,K6)
- 3.5 Derivative of a polynomial (K1,K2,K3,K4,K5,K6)
- 3.6 Simple extension (K1,K2,K3,K4,K5,K6)  
(Chapter 5: Sections: 5.2, 5.3 and 5.5)

### Unit IV: Galois Theory

(18 Hours)

- 4.1 Galois group (K1,K2,K3,K4,K5,K6)
- 4.2 Subfield (K1,K2,K3,K4,K5,K6)
- 4.3 Group of Automorphism (K1,K2,K3,K4,K5,K6)
- 4.4 Elementary symmetric functions (K1,K2,K3,K4,K5,K6)
- 4.5 Normal Extensions (K1,K2,K3,K4,K5,K6)
- 4.6 Fundamental theorem on Galois theory (K1,K2,K3,K4,K5,K6)  
(Chapter 5: Section: 5.6)

### Unit V: Solvability by Radicals

(18 Hours)

- 5.1 Solvable (K1,K2,K3,K4,K5,K6)
- 5.2 Abel's theorem (K1,K2,K3,K4,K5,K6)
- 5.3 Introduction to Galois group over the rationals (K1,K2,K3,K4,K5,K6)
- 5.4 Galois group over the rationals (K1,K2,K3,K4,K5,K6)
- 5.5 Polynomial rings (K1,K2,K3,K4,K5,K6)

## 5.6 Polynomial rings continued (K1,K2,K3,K4,K5,K6)

(Chapter 5: Sections: 5.7 and 5.8. Chapter 3: Sections: 3.9)

**SEMESTER – I**  
**REAL ANALYSIS - I**

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> PCMAB20	<b>Title of the Course:</b> Real Analysis – I	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>MARKS</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce some of the Abstract thinking that pervades Modern Analysis.
2. To deepen the knowledge of certain topics in Real Analysis such as Functions of bounded variations, R-S integral and Lebesgue integral.

**Course Outcomes (CO)**

The learners will be able to

1. Understand n-dimensional space  $R^n$  and the metric space whose topology is uniquely determined by the algebraic structure.
2. Deal with the functions of bounded variations and some of their properties.
3. Know about the Riemann-Stieltjes integral and its properties which is a generalization of the Riemann integral.
4. Recognize the necessary and sufficient conditions for the existence of the R-S integral.
5. Grasp the class of Lebesgue integrable functions which is defined in terms of upper and lower bounds using the Lebesgue measure of a set.

## Course Syllabus

### Unit I: Euclidean Space $\mathbb{R}^n$

(18 Hours)

- 1.1 Euclidean space  $\mathbb{R}^n$ , Open balls and open sets in  $\mathbb{R}^n$ , The structure of open sets in  $\mathbb{R}^1$  (K1,K2,K3,K4,K5,K6)
  - 1.2 Closed sets, Adherent and Accumulation points, Closed sets and Adherent points (K1,K2,K3,K4,K5,K6)
  - 1.3 Bolzano – Weierstrass Theorem, Cantor Intersection theorem (K1,K2,K3,K4,K5,K6)
  - 1.4 Lindelof Covering theorem, Heine Borel Covering theorem (K1,K2,K3,K4,K5,K6)
  - 1.5 Compactness in  $\mathbb{R}^n$ , Metric spaces (K1,K2,K3,K4,K5,K6)
  - 1.6 Point set topology in metric spaces, Compact subsets of a metric space, Boundary of a set (K1,K2,K3,K4,K5,K6)
- (Chapter 3: Sections 3.2– 3.16)

### Unit II: Functions of bounded variation and Rectifiable Curves

(18 Hours)

- 2.1 Properties of Functions, Functions of bounded variation (K1,K2,K3,K4,K5,K6)
  - 2.2 Total variation, Additive property of total variation (K1,K2,K3,K4,K5,K6)
  - 2.3 Total variation on  $[a,x]$  as a function of  $x$ , Functions of bounded variation expressed as the difference of increasing functions (K1,K2,K3,K4,K5,K6)
  - 2.4 Continuous functions of bounded variation (K1,K2,K3,K4,K5,K6)
  - 2.5 Curves and paths, Rectifiable paths and arc length (K1,K2,K3,K4,K5,K6)
  - 2.6 Additive and continuity properties of arc length, Equivalence of paths, Change of Parameter (K1,K2,K3,K4,K5,K6)
- (Chapter 6: Sections 6.2– 6.12)

### Unit III: Riemann Stieltjes' Integral

(18 Hours)

- 3.1 Notation, Definition of the Riemann Stieltjes integral, Linear properties (K1,K2,K3,K4,K5,K6)
  - 3.2 Integration by parts, Change of variable in a Riemann Stieltjes integral (K1,K2,K3,K4,K5,K6)
  - 3.3 Reduction to a Riemann integral, Step functions as integrators (K1,K2,K3,K4,K5,K6)
  - 3.4 Reduction of a Riemann Stieltjes integral to a finite sum, Euler's summation formula (K1,K2,K3,K4,K5,K6)
  - 3.5 Monotonically increasing integrators, Additive and linearity properties of upper and lower Integrals (K1,K2,K3,K4,K5,K6)
  - 3.6 Riemann's condition, Comparison theorems (K1,K2,K3,K4,K5,K6)
- (Chapter 7: Sections 7.2 –7.14)

### Unit IV: Riemann Stieltjes' Integral (Contd...)

(18 Hours)

- 4.1 Integrators of bounded variation (K1,K2,K3,K4,K5,K6)
- 4.2 Sufficient conditions for Existence of Riemann Stieltjes integral, Necessary conditions for Existence of Riemann Stieltjes integral (K1,K2,K3,K4,K5,K6)

- 4.3 Mean Value Theorem for Riemann Stieltjes integrals, The Integrals as a function of the Interval (K1,K2,K3,K4,K5,K6)
- 4.4 Second fundamental Theorem of Integral Calculus, Change of variable in a Riemann Integral (K1,K2,K3,K4,K5,K6)
- 4.5 Second Mean Value Theorem for Riemann integral, Riemann Stieltjes integrals depending on a parameter (K1,K2,K3,K4,K5,K6)
- 4.6 Differentiation under the integral sign, Interchanging the order of integration (K1,K2,K3,K4,K5,K6)
- (Chapter 7: Sections 7.15 - 7.25)

### Unit V: Lebesgue Integral

(18 Hours)

- 5.1 The integral of a step function, Monotonic sequences of step functions (K1,K2,K3,K4,K5,K6)
- 5.2 Upper functions and their integrals (K1,K2,K3,K4,K5,K6)
- 5.3 Riemann integrable functions as examples of upper functions, The class of Lebesgue integrable functions on a general interval (K1,K2,K3,K4,K5,K6)
- 5.4 Basic properties of the Lebesgue integral (K1,K2,K3,K4,K5,K6)
- 5.5 Lebesgue integration and sets of measure zero (K1,K2,K3,K4,K5,K6)
- 5.6 The Levi monotone convergence theorems (K1,K2,K3,K4,K5,K6)
- (Chapter 10: Sections 10.2-10.9)

### Books for study and reference:

**SEMESTER – I**  
**PCMAC20 - COMPLEX ANALYSIS**

<b>Year : I</b>	<b>Course Code :</b>	<b>Title Of The Course :</b>	<b>Course Type :</b>	<b>Course Category :</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM : I</b>	PCMAC20	Complex Analysis	Theory	Core	6	4	100

**Course Objectives**

1. To introduce the fundamental ideas of the functions of complex variables.
2. To enable the use of concepts of analyticity, Cauchy-Riemann relations and harmonic functions.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the elementary theory of power series and conformality to perform the linear transformation.
2. Solve the integration in the complex plane by using the fundamental theorems.
3. Be familiar with Cauchy's Integral Formula and the properties of analytical functions.
4. Determine the local mapping and learn the general form of Cauchy's theorem.
5. Deal with the concept of Calculus of Residues and Harmonic Functions.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	L	H	M	M
CO2	H	M	L	H	H	M
CO3	H	M	L	H	M	M
CO4	H	M	L	H	M	L
CO5	H	M	L	H	H	L

(L-Low, M-Moderate, H-High)

CO	PO

CO1	H	H	H	M	L	M
CO2	H	H	H	M	L	M
CO3	H	H	H	M	L	M
CO4	H	H	H	M	L	M
CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Elementary Theory of Power Series, Conformality and Linear transformations (18 Hours)

- 1.1 Sequences, Series (K1,K2,K3,K4,K5,K6)
- 1.2 Uniform Convergence, Power Series (K1,K2,K3,K4,K5,K6)
- 1.3 Abel's Limit Theorem, Arcs and Closed Curves(K1,K2,K3,K4,K5,K6)
- 1.4 Analytic Functions in Regions(K1,K2,K3,K4,K5,K6)
- 1.5 Conformal Mapping, Length and Area(K1,K2,K3,K4,K5,K6)
- 1.6 The Linear Group, The Cross Ratio, Symmetry (K1,K2,K3,K4,K5,K6)  
(Chapter 2: Section 2.1 -2.5 and Chapter 3 : Section 2.1- 2.4, 3.1-3.3)

### Unit II: Complex Integration – Fundamental Theorems (18Hours)

- 2.1 Line Integrals (K1,K2,K3,K4,K5,K6)
- 2.2 Rectifiable arcs (K1,K2,K3,K4,K5,K6)
- 2.3 Line integrals as functions of arcs (Theorems)(K1,K2,K3,K4,K5,K6)
- 2.4 Line integrals as functions of arcs (Problems)(K1,K2,K3,K4,K5,K6)
- 2.5 Cauchy's Theorem for a Rectangle(K1,K2,K3,K4,K5,K6)
- 2.6 Cauchy's Theorem in a Disk (K1,K2,K3,K4,K5,K6).  
(Chapter 4: Sections 1.1-1.5)

### Unit III: Cauchy's Integral formula and Local Properties of Analytical functions (18 Hours)

- 3.1 Index of a point with respect to a closed curve (K1,K2,K3,K4,K5,K6)
- 3.2 Integral formula (K1,K2,K3,K4,K5,K6)
- 3.3 Higher Derivatives (K1,K2,K3,K4,K5,K6)
- 3.4 Removable Singularities(K1,K2,K3,K4,K5,K6)
- 3.5 Taylor's Theorem (K1,K2,K3,K4,K5,K6)
- 3.6 Zeroes and poles(K1,K2,K3,K4,K5,K6)  
(Chapter 4: Sections 2.1 - 2.3 and 3.1 - 3.2)

### Unit IV: Local Mapping and the General form of Cauchy's Theorem (18 Hours)

- 4.1 Local Mapping (K1,K2,K3,K4,K5,K6)
- 4.2 Maximum Principle(K1,K2,K3,K4,K5,K6)
- 4.3 Chains and Cycles (K1,K2,K3,K4,K5,K6)
- 4.4 Simple Connectivity(K1,K2,K3,K4,K5,K6)
- 4.5 Homology (K1,K2,K3,K4,K5,K6)
- 4.6 General statement of Cauchy's Theorem, Proof of Cauchy's Theorem (K1, K2, K3, K4, K5, K6)  
(Chapter 4: Sections 3.3, 3.4 and 4.1 - 4.5)

### Unit V: The Calculus of Residues and Harmonic functions (18 Hours)

- 5.1 The Residue Theorem, The Argument Principle (K1,K2,K3,K4,K5,K6)
- 5.2 Evaluation of Definite Integrals (K1,K2,K3,K4,K5,K6)
- 5.3 Definition and Basic properties, The Mean value property(K1,K2,K3,K4,K5,K6)

5.4 Poisson's Formula, Schwarz's Theorem (K1,K2,K3,K4,K5,K6)

5.5 Weierstrass's Theorem, The Taylor Series, The Laurent Series(K1,K2,K3,K4,K5,K6)

5.6 Partial Fractions , Infinite Products(K1,K2,K3,K4,K5,K6)

(Chapter 4: Sections 5.1 - 5.3 and 6.1 - 6.4, Chapter 5: Sections 1.1 -1.3)

**SEMESTER – I**  
**PCMAD20 - DIFFERENTIAL EQUATIONS**

<b>Year : I</b> <b>SEM : I</b>	<b>Course Code :</b> PCMAD20	<b>Title Of The Course :</b> Differential Equations	<b>Course Type :</b> Theory	<b>Course Category :</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
-----------------------------------	---------------------------------	--	--------------------------------	----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce mathematical techniques for analyzing and solving ordinary differential equations.
2. To apply ordinary differential equations to dynamical problems of practical interest.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand ordinary differential equations of various type, their solutions, and fundamental concepts about their existence.
2. Obtain solutions of the Homogeneous equation with constant coefficient and Homogeneous equation with analytic coefficient.
3. Comprehend the Bessel functions, Legendre equation, Legendre polynomials and Regular singular points.
4. Know Picard's method of obtaining successive approximations of solutions of first order differential equations.
5. Understand Eigen values and Eigen functions of Strum-Lioville systems, and obtain the solutions of initial and boundary value problems.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Linear Differential Equations of Higher Order

(18 Hours)

- 1.1 Introduction – Definition – Example – Higher order equations (K1,K2,K3,K4,K5,K6)
  - 1.2 A mathematical model (K1,K2,K3,K4,K5,K6)
  - 1.3 Linear Dependence- Wronskian (K1,K2,K3,K4,K5,K6)
  - 1.4 Basic Theory for Linear Equations (K1,K2,K3,K4,K5,K6)
  - 1.5 Two useful formulae (K1,K2,K3,K4,K5,K6)
  - 1.6 Homogeneous linear equations with constant co-efficient (K1,K2,K3,K4,K5,K6)
- (Chapter 4: Sections 4.1 – 4.6)

### Unit II: Solutions in Power Series

(18 Hours)

- 2.1 Introduction - Example (K1,K2,K3,K4,K5,K6)
  - 2.2 Second order linear equations with ordinary points (K1,K2,K3,K4,K5,K6)
  - 2.3 Legendre equation (K1,K2,K3,K4,K5,K6)
  - 2.4 Legendre polynomials (K1,K2,K3,K4,K5,K6)
  - 2.5 Second order equations with regular singular points (K1,K2,K3,K4,K5,K6)
  - 2.6 Bessel's functions (K1,K2,K3,K4,K5,K6)
- (Chapter 6: Sections 6.1 – 6.5)

### Unit III: Systems of Linear Differential Equations

(18 Hours)

- 3.1 Introduction - Systems of first order equations (K1,K2,K3,K4,K5,K6)
  - 3.2 Model for Arms Competition between two nations (K1,K2,K3,K4,K5, K6)
  - 3.3 Existence and uniqueness theorems (K1,K2,K3,K4,K5,K6)
  - 3.4 Fundamental matrix (K1,K2,K3,K4,K5,K6)
  - 3.5 Non-homogeneous linear systems (K1,K2,K3,K4,K5,K6)
  - 3.6 Linear systems with constant co-efficient (K1,K2,K3,K4,K5,K6)
- (Chapter 5: Sections 5.1 – 5.7)

### Unit IV: Existence and Uniqueness of Solutions

(18 Hours)

- 4.1 Introduction (K1,K2,K3,K4,K5,K6)
  - 4.2 Preliminaries (K1,K2,K3,K4,K5,K6)
  - 4.3 Picard's Successive approximations (K1,K2,K3,K4,K5,K6)
  - 4.4 Picard's Theorem (K1,K2,K3,K4,K5,K6)
  - 4.5 Some examples (K1,K2,K3,K4,K5,K6)
  - 4.6 Continuation and dependence on initial conditions (K1, K2, K3, K4, K5,K6)
- (Chapter 2: Sections 2.1 –2.6)

### Unit V: Boundary- value problems

(18 Hours)

- 5.1 Introduction- Definition- Example (K1, K2, K3, K4, K5,K6)
  - 5.2 Sturm Liouville problem (K1, K2, K3, K4, K5,K6)
  - 5.3 Green's functions (K1, K2, K3, K4, K5,K6)
  - 5.4 Application of BVP's (K1,K2,K3,K4,K5, K6)
  - 5.5 Picard's theorem (K1, K2, K3, K4, K5,K6)
  - 5.6 Problems based on BVP's (K1, K2, K3, K4, K5, K6)
- (Chapter 8: Sections 8.1 –8.5)

**PEMAA20 – ELECTIVE I A: DIFFERENTIAL GEOMETRY**

<b>Year: I</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: I</b>	PEMAA20	Elective I A: Differential Geometry	Theory	Elective	6	4	100

**Course Objectives**

1. To understand the concept of curvature of a space curve and signed curvature of a plane curve.
2. To compute the curvature and torsion of space curves.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the line integrals, deal with differential forms and calculate arc length, curvature of surfaces.
2. Analyze involutes, evolutes and fundamental existence theorem for space curves.
3. Apply problem solving with differential geometry to diverse situations in physics, engineering and in other mathematical contexts.
4. Evaluate the fundamental forms of a surface.
5. Compute the Gaussian curvature, the mean curvature, the curvature lines and the asymptotic lines.

## Course Syllabus

### Unit I: Theory of Space Curves

(18 Hours)

- 1.1 Introduction – Representation of space curves (K1, K2, K3, K4, K5, K6)
- 1.2 Unique parametric representation of a space curve – Arc length (K1, K2, K3, K4, K5, K6)
- 1.3 Tangent and osculating plane – Principal normal and binormal (K1, K2, K3, K4, K5, K6)
- 1.4 Curvature and torsion – Behaviour of a curve near one of its points (K1, K2, K3, K4, K5, K6)
- 1.5 The curvature and torsion of a curve as the intersection of two surfaces (K1, K2, K3, K4, K5, K6)
- 1.6 Contact between curves and surfaces. (K1, K2, K3, K4, K5, K6)  
(Chapter 1: Section 1.1 – 1.10)

### Unit II: Theory of Space Curves (Contd...)

(18 Hours)

- 2.1 Osculating circle and osculating sphere (K1, K2, K3, K4, K5, K6)
- 2.2 Locus of centres of spherical curvature (K1, K2, K3, K4, K5, K6)
- 2.3 Tangent surfaces, involutes and Evolutes – Bertrand curves (K1, K2, K3, K4, K5, K6)
- 2.4 Spherical indicatrix – Intrinsic equations of space curves (K1, K2, K3, K4, K5, K6)
- 2.5 Fundamentals existence theorem for space curves (K1, K2, K3, K4, K5, K6)
- 2.6 Helices. (K1, K2, K3, K4, K5, K6)  
(Chapter 1: Section 1.11- 1.18)

### Unit III: The 1<sup>st</sup> Fundamental Form and Local Intrinsic Properties of a Surface

(18 Hours)

- 3.1 Introduction – Definition of a surface (K1, K2, K3, K4, K5, K6)
- 3.2 Nature of points on a surface – Representation of a surface (K1, K2, K3, K4, K5, K6)
- 3.3 Curves on surfaces – Tangent plane and surface normal (K1, K2, K3, K4, K5, K6)
- 3.4 The general surfaces of revolution – Helicoids (K1, K2, K3, K4, K5, K6)
- 3.5 Metric on a surface – The 1<sup>st</sup> fundamental form (K1, K2, K3, K4, K5, K6)
- 3.6 Direction coefficients on a surface. (K1, K2, K3, K4, K5, K6)  
(Chapter 2: Section 2.1 - 2.10)

### Unit IV: The 1<sup>st</sup> Fundamental Form and Local Intrinsic Properties of a Surface (Contd...)

(18 Hours)

- 4.1 Families of curves – Orthogonal trajectories (K1, K2, K3, K4, K5, K6)
- 4.2 Double family of curves – Isometric correspondence (K1, K2, K3, K4, K5, K6)
- 4.3 Intrinsic properties – Geodesics and their differential equations (K1, K2, K3, K4, K5, K6)
- 4.4 Canonical geodesic equations – Geodesics on surfaces of revolution (K1, K2, K3, K4, K5, K6)
- 4.5 Normal property of geodesic (K1, K2, K3, K4, K5, K6)
- 4.6 Differential equations of geodesics using normal property. (K1, K2, K3, K4, K5, K6)  
(Chapter 2: Section 2.11 - 2.15 & Chapter 3: Section 3.1 – 3.6)

### Unit V: Geodesics on a Surface

(18 Hours)

- 5.1 Existence theorems – Geodesic parallels (K1, K2, K3, K4, K5, K6)
- 5.2 Geodesic polar coordinates – Geodesic curvature (K1, K2, K3, K4, K5, K6)

- 5.3 Gauss – Bonnet theorem (K1, K2, K3, K4, K5, K6)
- 5.4 Gaussain Curvature (K1, K2, K3, K4, K5, K6)
- 5.5 Surfaces of constant curvature – Conformal mapping (K1, K2, K3, K4, K5, K6)
- 5.6 Geodesic mapping(K1, K2, K3, K4, K5, K6)  
(Chapter 3: Section: 3.7 – 3.15)

<b>Year : I</b>	<b>Course Code :</b>	<b>Title Of The Course :</b>	<b>Course Type :</b>	<b>Course Category :</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM : I</b>	PEMAB20	Elective I B:Mathematical Modelling	Theory	Elective	6	4	100

**Course Objectives**

1. Demonstrate the ability to solve problems, including applications outside of mathematics, by means of intuition, creativity, guessing and the experience gained through the study of particular examples and mathematical models.
2. To determine the validity of a given case study and be able to construct mathematical models independently.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the mathematical basis of common algorithms, and the ability to calculate accurately and efficiently.
2. Demonstrate the use of mathematical reasoning by justifying and generalizing patterns and relationships between the variables in the mathematical models.
3. Formulate and qualitatively analyze mathematical models of a wide range of systems and processes.
4. Recognize the types of Mathematical models and the complexity in each system.
5. Recognize the power of mathematical modelling and analysis and be able to apply their understanding to their further studies.

## Course Syllabus

### Unit 1: What is Modelling?

(18 Hours)

- 1.1 Models and Reality, Properties of Models(K1,K2,K3,K4,K5,K6)
- 1.2 Building a Model, Examples(K1,K2,K3,K4,K5,K6)
- 1.3 Effects of size(K1,K2,K3,K4,K5,K6)
- 1.4 Dimensional Analysis(K1,K2,K3,K4,K5,K6)
- 1.5 Using graphs in Modeling(K1,K2,K3,K4,K5,K6)
- 1.6 Comparative statics(K1,K2,K3,K4,K5,K6)  
(Chapter 1: Section 1.1-1.6, Chapter 3: Section 3.1 – 3.2)

### Unit II: Systems Modelling

(18 Hours)

- 2.1 Modelling method for Complex systems(K1,K2,K3,K4,K5,K6)
- 2.2 Classification of Models(K1,K2,K3,K4,K5,K6)
- 2.3 Mathematical Modeling of Physical Systems(K1,K2,K3,K4,K5,K6)
- 2.4 Modeling of electrical systems(K1,K2,K3,K4,K5,K6)
- 2.5 Modeling of mechanical and electromechanical systems(K1,K2,K3,K4,K5,K6)
- 2.6 Modeling of fluid systems(K1,K2,K3,K4,K5,K6)  
(Chapter 2: Section 2.3,2.4,2.7.1-2.7.4)

### Unit III: Stability and Optimization of Mathematical Models

(18 Hours)

- 3.1 Cobweb models in economics(K1,K2,K3,K4,K5,K6)
- 3.2 Small group dynamics(K1,K2,K3,K4,K5,K6)
- 3.3 Optimization by differentiation: Maintaining Inventories(K1,K2,K3,K4,K5,K6)
- 3.4 Geometry of Blood Vessels(K1,K2,K3,K4,K5,K6)
- 3.5 Fighting forest fires(K1,K2,K3,K4,K5,K6)
- 3.6 Problems in Optimization(K1,K2,K3,K4,K5,K6)  
(Chapter 3: Section 3.3, Chapter 4: Section 4.1 – 4.2)

### Unit IV: Basic Probability

(18 Hours)

- 4.1 Sex preference and sex ratio(K1,K2,K3,K4,K5,K6)
- 4.2 Making simple choices(K1,K2,K3,K4,K5,K6)
- 4.3 Monte Carlo simulation(K1,K2,K3,K4,K5,K6)
- 4.4 Example: Doctor's waiting room(K1,K2,K3,K4,K5,K6)
- 4.5 Stream Network(K1,K2,K3,K4,K5,K6)
- 4.6 Problems in Probability(K1,K2,K3,K4,K5,K6)  
(Chapter 5: Section 5.1-5.2)

### Unit V: Approaches to Differential Equations and Quantitative Differential Equations (18 Hours)

- 5.1 Limitations of Analytical solutions(K1,K2,K3,K4,K5,K6)
- 5.2 Alternative approaches(K1,K2,K3,K4,K5,K6)
- 5.3 Analytical Methods and examples(K1,K2,K3,K4,K5,K6)
- 5.4 Problems in Analytical Methods(K1,K2,K3,K4,K5,K6)
- 5.5 Numerical Methods and examples(K1,K2,K3,K4,K5,K6)

5.6 Problems in Numerical Methods(K1,K2,K3,K4,K5,K6)  
(Chapter 7: Section 7.1 – 7.4, Chapter 8: Section 8.1 – 8.2)

**SEMESTER – I**  
**PIMAA20 – INDEPENDENT ELECTIVE 1 A: FUNDAMENTALS OF GROUP THEORY**

<b>Year: I</b> <b>SEM: I</b>	<b>Course Code:</b> PIMAA20	<b>Title of the Course:</b> Independent Elective 1 A: Fundamentals of Group Theory	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To get the basic knowledge about groups, subgroups, normalizer of subgroups.
2. To develop the ability to solve basic objective problems in group theory.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the importance of various types of Groups.
2. Extend the knowledge in some important groups (Homomorphism and Isomorphism)
3. Understand the concepts of fundamentals of finite abelian groups.
4. Acquire benefits of Sylow's theorem and classify the Class equations.
5. Solve various objective type problems using simple concepts.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	L	H	M	H
CO2	H	M	L	H	M	H
CO3	H	M	L	H	M	H
CO4	H	M	L	H	M	H
CO5	H	M	L	H	M	H

(L-Low, M-Moderate, H-High)

CO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	M	L	M
CO2	H	H	H	M	L	M
CO3	H	H	H	M	L	M
CO4	H	H	H	M	L	M
CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Groups

Introduction to Groups - Sub Groups – Coset – Abelian Group – Normal Sub Groups – Cyclic Groups. (K1, K2, K3, K4, K5, K6)  
(Chapter 15: 15.1-15.3, 15.6)

### Unit II: Groups (Continued)

Quotient Groups – Direct Products – Some important Groups – Homomorphism and isomorphism – centre of a Groups. (K1, K2, K3, K4, K5, K6)  
(Chapter 15: 15.4-15.5)

### Unit III: Groups (Continued)

Normalizer of Subgroups – Centralizer of an Element or Normalizer of an Element – Commutator Subgroups – Fundamental theorem of Finite Abelian groups – Number of Non isomorphic Abelian Groups. (K1, K2, K3, K4, K5, K6)  
(Chapter 15: 15.4-15.5)

### Unit IV: Permutations

Permutations – Symmetric Groups  $S_n$  – Alternating Groups  $A_n$  – Conjugacy Classes and Conjugacy Relations. (K1, K2, K3, K4, K5, K6)  
(Chapter 15: 15.7)

### Unit V: Sylows Theorem

Class Equation – Sylows theorem – Results on simple Group – Solvable Groups and Jordan - Holder theorem. (K1, K2, K3, K4, K5, K6)  
(Chapter 15: 15.8-15.10)

### Books for study and reference:

**SEMESTER – I**  
**PIMAB20 - INDEPENDENT ELECTIVE 1 B: QUANTITATIVE APTITUDE FOR**  
**COMPETITIVE EXAMINATIONS I**

<b>Year : I</b> <b>SEM : I</b>	<b>Course Code :</b> PIMAB20	<b>Title Of The Course :</b> Independent Elective 1 B: Quantitative Aptitude for Competitive Examinations I	<b>Course Type :</b> Theory	<b>Course Category :</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
-----------------------------------	---------------------------------	--	--------------------------------	--	-----------------	---------------------	---------------------

**Course Objectives**

1. To enhance the problem solving abilities and improve the basic mathematical skills
2. To help students who are preparing for any type of competitive examinations and acquire satisfactory competency in use of verbal reasoning

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the concepts of Number System and aptitude problems.
2. Recollect the formulae and solve problems on profit and loss, Interest and Time and Work.
3. Demonstrate basic understanding on data interpretation and exhibit eloquence in verbal reasoning.
4. Identify and respond effectively to questions on clerical ability.
5. Recognize the type of questions and answer them confidently with efficiency in grammar.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO4	H	H	H	M	L	M
CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: General Aptitude**

Number System- HCF and LCM- Simplification- Fractions and Decimals- Powers and roots- Average- Percentage- Ratio and Proportion.(K1,K2,K3,K4,K5,K6)  
(Section 2: 2.1-2.7)

### **Unit II: General Aptitude (Contd..)**

Profit and Loss- Simple Interest- Compound Interest- Time and Work- Time and Distance- Clocks- Calendar- Area and Volume.(K1,K2,K3,K4,K5,K6)  
(Section 2: 2.8-2.16)

### **Unit III: Data Interpretation and Verbal Ability Test**

Data Interpretation- Series Completion- Analogy Questions- Odd man out/ Classification- Coding/ Decoding- Blood and Family Relationships- Direction questions- Questions about age, time and Calendar.(K1,K2,K3,K4,K5,K6)  
(Section 2B, 3.1-3.7)

### **Unit IV: Test of Clerical Ability**

Address(Common and Uncommon)- Questions based on Tables- Word Arrangement- Category/Classification- Marketing – Psychometry – Computer- Descriptive English.(K1,K2,K3,K4,K5,K6)  
(Section 5: A-E)

### **Unit V: Test of English Language**

Test of spotting the errors- Test of Sentence Improvement- Test of Synonyms and Antonyms- Test of reading comprehension-Test of selecting words in a running paragraph- Fill in the blanks- Test of spelling- Jumbled Sentences.(K1,K2,K3,K4,K5,K6)  
(Section 4)

### **Books for study and reference:**

**SEMESTER – II**  
**PCMAE20 – LINEAR ALGEBRA**

<b>Year:I</b> <b>SEM:II</b>	<b>Course Code:</b> PCMAE20	<b>Title of the Course:</b> Linear Algebra	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
--------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the concepts of linear transformations.
2. To learn about finite fields.

**Course Outcomes (CO)**

The Learners will be able to

1. Have knowledge on Modules and Canonical form.
2. Analyze Jordan and Rational canonical form.
3. Understand the concepts of linear transformation and apply it on linear operators.
4. Understand the concepts of finite division ring.
5. Know about division rings having the field in their centers.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	L
CO2	H	H	H	H	L	M
CO3	H	H	H	H	M	M
CO4	H	H	H	H	L	M
CO5	H	H	H	H	L	M

(L-Low, M-Moderate, H-High)

CO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	M	L	M
CO2	H	H	H	M	L	M
CO3	H	H	H	M	L	M
CO4	H	H	H	M	L	M
CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**Unit I: Modules and Canonical form**

**(15 Hours)**

- 1.1 Module, Direct sum, Sub module, Cyclic (K1,K2,K3,K4,K5,K6)
- 1.2 Fundamental theorem on finitely generated R- modules (K1,K2,K3,K4,K5,K6)
- 1.3 Similar (K1,K2,K3,K4,K5,K6)
- 1.4 Triangular form (K1,K2,K3,K4, K5,K6)

- 1.5 Nilpotent transformation (K1,K2,K3,K4,K5,K6)  
1.6 Invariant and Cyclic (K1,K2,K3,K4,K5,K6)  
(Chapter 4: Sections 4.5; Chapter 6: Sections 6.4 and 6.5)

**Unit II: Canonical Forms (Contd...)**

**(15 Hours)**

- 2.1 Introduction (K1,K2,K3,K4,K5,K6)  
2.2 Jordan Canonical form (K1,K2,K3,K4,K5,K6)  
2.3 Jordan Block (K1,K2,K3,K4,K5,K6)  
2.4 Rational canonical form, Cyclic sub modules (K1,K2,K3,K4,K5,K6)  
2.5 Companion matrix(K1,K2,K3,K4,K5,K6)  
2.6 Elementary Divisors and Characteristic polynomial (K1,K2,K3,K4,K5,K6)  
(Chapter 6: Sections 6.6 and 6.7)

**Unit III: Linear transformations**

**(15 Hours)**

- 3.1 Unitary (K1,K2,K3,K4,K5,K6)  
3.2 Hermitian (K1,K2,K3,K4,K5,K6)  
3.3 Normal transformation (K1,K2,K3,K4,K5,K6)  
3.4 Quadratic form (K1,K2,K3,K4,K5,K6)  
3.5 Congruence (K1,K2,K3,K4,K5,K6)  
3.6 Sylvester's law (K1,K2,K3,K4,K5,K6)  
(Chapter 6: Sections 6.10 and 6.11)

**Unit IV: Finite fields**

**(15 Hours)**

- 4.1 Finite field (K1,K2,K3,K4,K5,K6)  
4.2 Properties of finite fields (K1,K2,K3,K4,K5,K6)  
4.3 The existence of solutions of certain equations in a finite field(K1,K2,K3,K4,K5,K6)  
4.4 Division ring (K1,K2,K3,K4,K5,K6)  
4.5 Wedderburn's theorem (First proof only ) (K1,K2,K3,K4,K5,K6)  
4.6 Jacobson theorem (K1,K2,K3,K4,K5,K6)  
(Chapter 7: Sections 7.1 and 7.2)

**Unit V: Finite fields (Contd.)**

**(15 Hours)**

- 5.1 Division Algebra, Algebraic over a field (K1,K2,K3,K4,K5,K6)  
5.2 Frobenius theorem (K1,K2,K3,K4,K5,K6)  
5.3 Adjoint, Norm (K1,K2,K3,K4,K5,K6)  
5.4 Lagrange's Identity (K1,K2,K3,K4,K5,K6)  
5.5 Left Division algorithm (K1,K2,K3,K4,K5,K6)  
5.6 Lagrange's theorem (K1,K2,K3,K4,K5,K6)  
(Chapter 7: Sections 7.3 and 7.4)

**SEMESTER – II**  
**PCMAF20 - REAL ANALYSIS- II**

<b>Year: I</b> <b>SEM: II</b>	<b>Course Code:</b> PCMAF20	<b>Title of the Course:</b> Real Analysis – II	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the concepts of double sequences, double series, and Fourier series.
2. To provide students with a strong foundation in sequence of functions, implicit functions, and multivariable differential calculus.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the theory of double sequences and double series which is an extension of the single or ordinary sequences and series and identify the convergence and divergence of infinite product.
2. Determine the properties of the Fourier coefficient and solve the problem for the orthonormal system of functions.
3. Identify the Convergence of a sequence and series of functions.
4. Link the multiplication of power series, reciprocal of power series, and real power series.
5. Deal with the concepts of Directional derivative, Total derivative, Chain rule, Inverse function, and Implicit function theorems.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Double Sequences and Infinite Products

(18 Hours)

- 1.1 Double sequences, Double Series (K1,K2,K3,K4,K5,K6)
  - 1.2 Rearrangement theorem for double series (K1,K2,K3,K4,K5,K6)
  - 1.3 A sufficient condition for equality of Iterated series (K1,K2,K3,K4,K5,K6)
  - 1.4 Multiplication of series (K1,K2,K3,K4,K5,K6)
  - 1.5 Cesaro summability (K1,K2,K3,K4,K5,K6)
  - 1.6 Infinite products (K1,K2,K3,K4,K5,K6)
- (Chapter 8: Sections 8.20 - 8.26)

### Unit II: Sequences of Functions

(18 Hours)

- 2.1 Pointwise convergence of sequences of functions, Examples of sequences of real valued functions (K1,K2,K3,K4,K5,K6)
  - 2.2 Definition of uniform convergence, Uniform convergence and Continuity(K1,K2,K3,K4,K5,K6)
  - 2.3 Cauchy condition for uniform convergence, Uniform convergence of infinite series of functions (K1,K2,K3,K4,K5,K6)
  - 2.4 Uniform convergence and Riemann Stieltjes Integration, Non uniformly convergent sequences that can be integrated term by term (K1,K2,K3,K4,K5,K6)
  - 2.5 Uniform convergence and differentiation, Sufficient condition for Uniform convergence of a series (K1,K2,K3,K4,K5,K6)
  - 2.6 Uniform convergence and double sequences, Mean convergence (K1,K2,K3,K4,K5,K6)
- (Chapter 9: Sections 9.1– 9.13, Omit 9.7 and theorem 9.12)

### Unit III: Sequences of Functions (Contd...)

(18 Hours)

- 3.1 Multiplication of power series (K1,K2,K3,K4,K5,K6)
  - 3.2 The Substitution Theorem (K1,K2,K3,K4,K5,K6)
  - 3.3 The Reciprocal of Power series, Real Power series, The Taylor's Series generated by a Function (K1,K2,K3,K4,K5,K6)
  - 3.4 Bernstein's Theorem(K1,K2,K3,K4,K5,K6)
  - 3.5 Abel's Limit Theorem (K1,K2,K3,K4,K5,K6)
  - 3.6 Tauber's Theorem (K1,K2,K3,K4,K5,K6)
- (Chapter 9: Sections 9.15– 9.23, Omit 9.21)

### Unit IV: Fourier series

(18 Hours)

- 4.1 Orthogonal systems of functions, The theorem on best approximation (K1,K2,K3,K4,K5,K6)
  - 4.2 The fourier series of a function relative to an ortho normal system, Properties of the Fourier Coefficients(K1,K2,K3,K4,K5,K6)
  - 4.3 The Riesz Fischer theorem, The convergence and representation problems for Trigonometric series(K1,K2,K3,K4,K5,K6)
  - 4.4 The Riemann Lebesgue lemma(K1,K2,K3,K4,K5,K6)
  - 4.5 The Dirichlet integrals (K1,K2,K3,K4,K5,K6)
  - 4.6 An integral representation for the partial sums of a Fourier series, Riemann's localization Theorem (K1,K2,K3,K4,K5,K6)
- (Chapter 11: Sections 11.2-11.11)

## Unit V: Multivariable Differential Calculus and Implicit Functions

(18 Hours)

- 5.1 Introduction, Directional derivative, Directional derivatives and continuity (K1,K2,K3,K4,K5,K6)
  - 5.2 Total derivative, Total derivative expressed in terms of partial derivatives (K1,K2,K3,K4,K5,K6)
  - 5.3 Matrix of a linear function, Jacobian Matrix, Chain rule (K1,K2,K3,K4,K5,K6)
  - 5.4 Matrix form of the chain rule, Mean value theorem for differentiable functions (K1,K2, K3,K4,K5,K6)
  - 5.5 Introduction, Functions with non-zero Jacobian determinant, Inverse function theorem (K1, K2,K3,K4,K5,K6)
  - 5.6 Implicit function theorem, Extrema of real valued functions of one variable (K1,K2,K3,K4,K5,K6)
- (Chapter 12: Sections 12.1 - 12.11, Omit 12.6 & Chapter 13: Sections 13.1 to 13.5)

**SEMESTER – II**  
**PCMAG20 - PARTIAL DIFFERENTIAL EQUATIONS AND INTEGRAL PARTIAL DIFFERENTIAL EQUATIONS**

<b>Year: I</b> <b>SEM: II</b>	<b>Course Code:</b> PCMAG20	<b>Title of the Course:</b> Partial Differential Equations and Integral Partial Differential Equations	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To derive heat and wave equations.
2. To apply partial derivative equation techniques to predict the behavior of certain phenomena.

**Course Outcomes (CO)**

The Learners will be able to

1. Apply specific methodologies, techniques and resources to conduct research and produce innovative results.
2. Solve problems of heat conduction equation by using initial and boundary conditions.
3. Use the knowledge of PDEs, to solve one dimensional wave equation by canonical equation.
4. Solve practical PDE and integral PDE problems with finite difference methods.
5. Develop mathematical skills to solve problems involving convolutions.

## Course Syllabus

### Unit I: Elliptic Differential Equations (18 Hours)

- 1.1 Occurrence of the Laplace and Poisson equations (K1, K2, K3, K4, K5, K6)
  - 1.2 Boundary value problems (K1, K2, K3, K4, K5, K6)
  - 1.3 Some important mathematical tools (K1, K2, K3, K4, K5, K6)
  - 1.4 Properties of harmonic functions (K1, K2, K3, K4, K5, K6)
  - 1.5 Separation of variables (K1, K2, K3, K4, K5, K6)
  - 1.6 Problems (K1, K2, K3, K4, K5, K6)
- (Chapter 2: Sections 2.1 – 2.5 and related examples in 2.13)

### Unit II: Parabolic Differential Equations (18 Hours)

- 2.1 Occurrence of the diffusion equation (K1, K2, K3, K4, K5, K6)
  - 2.2 Boundary conditions (K1, K2, K3, K4, K5, K6)
  - 2.3 Elementary solutions of the diffusion equations (K1, K2, K3, K4, K5, K6)
  - 2.4 Dirac delta function (K1, K2, K3, K4, K5, K6)
  - 2.5 Separation of variables method (K1, K2, K3, K4, K5, K6)
  - 2.6 Problems (K1, K2, K3, K4, K5, K6)
- (Chapter 3: Sections 3.1 – 3.5 and related examples in 3.9)

### Unit III: Hyperbolic Differential Equations (18 Hours)

- 3.1 Occurrence of the wave equation (K1, K2, K3, K4, K5, K6)
  - 3.2 Derivation of one dimensional wave equation (K1, K2, K3, K4, K5, K6)
  - 3.3 Solution of one dimensional wave equation by canonical equation (K1, K2, K3, K4, K5, K6)
  - 3.4 Initial value problem - D'Alembert's solution (K1, K2, K3, K4, K5, K6)
  - 3.5 Vibration string – Variable separable solution (K1, K2, K3, K4, K5, K6)
  - 3.6 Forced vibration – Solution of non-homogeneous equation (K1, K2, K3, K4, K5, K6)
- (Chapter 4: Sections 4.1–4.6 and related examples in 4.13)

### Unit IV: Classification of Integral Equations and Connection with DE. (18 Hours)

- 4.1 Historical Introduction - Linear Integral equations (K1, K2, K3, K4, K5, K6)
  - 4.2 Special type of kernel - Square integrable functions and kernels (K1, K2, K3, K4, K5, K6)
  - 4.3 Singular integral equations (K1, K2, K3, K4, K5, K6)
  - 4.4 Nonlinear equations (K1, K2, K3, K4, K5, K6)
  - 4.5 Linear differential equations (K1, K2, K3, K4, K5, K6)
  - 4.6 Green's function (K1, K2, K3, K4, K5, K6)
- (Chapter 1: Sections 1.1 – 1.6 and Chapter 2: Sections 2.1 - 2.2)

### Unit V: Integral equations of the convolution type and Integral equations with singular kernels (18 Hours)

- 5.1 Integral transforms - Fredholm equation of the first kind (K1, K2, K3, K4, K5, K6)
- 5.2 Volterra equation of the first kind - Fredholm equation of the second kind (K1, K2, K3, K4, K5, K6)
- 5.3 Stieltjes integral equation (K1, K2, K3, K4, K5, K6)

- 5.4 Volterra equation of the second kind - Abel's integral equation (K1, K2, K3, K4, K5, K6)  
5.5 Fox's integral equation – Generalization to higher dimensions (K1, K2, K3, K4, K5, K6)  
5.6 Green's functions in two and three dimensions (K1, K2, K3, K4, K5, K6)  
(Chapter 3: Sections 3.1-3.6 and Chapter 5: Sections 5.1 and 5.2)

**Books for study and reference:**

**SEMESTER – II**  
**PCMAH20 – MECHANICS**

<b>Year : I</b>	<b>Course Code:</b>	<b>Title Of The Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM : II</b>	PCMAH20	Mechanics	Theory	Core	6	4	100

**Course Objectives**

1. To know about the Physics concepts and its applications to Mathematics.
2. To enhance the basic concepts of mechanical system.

**Course Outcomes (CO)**

The Learners will be able to

1. Define and understand basic mechanical concepts related to discrete and continuous mechanical systems.
2. Describe and understand the motion of a mechanical system using Lagrange's equation.
3. Use Euler-Lagrange equation to find stationary paths and understanding the theory of variational principles.
4. Acquire knowledge on Hamilton's principle and Hamilton's equation.
5. Study the concepts of canonical transformations and solve the transformations by using Lagrange and Poisson brackets.

CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Introductory Concepts (18 Hours)**

- 1.1 Mechanical system (K1,K2,K3,K4,K5,K6)
  - 1.2 Generalized co-ordinates (K1,K2,K3,K4,K5,K6)
  - 1.3 Constraints (K1,K2,K3,K4,K5,K6)
  - 1.4 Virtual Work (K1,K2,K3,K4,K5,K6)
  - 1.5 Energy (K1,K2,K3,K4,K5,K6)
  - 1.6 Momentum. (K1,K2,K3,K4,K5,K6)
- (Chapter 1: Sections 1.1 – 1.5)

### **Unit II: Lagrange's Equations (18 Hours)**

- 2.1 Derivation of Lagrange's equations (K1,K2,K3,K4,K5,K6)
  - 2.2 Forms of the equations of motion (K1,K2,K3,K4,K5,K6)
  - 2.3 Examples based on forms of the equations of motion (K1,K2,K3,K4,K5,K6)
  - 2.4 Integrals of Motion (K1,K2,K3,K4,K5,K6)
  - 2.5 Liouville's system (K1,K2,K3,K4,K5,K6)
  - 2.6 Examples based on integrals of motion (K1,K2,K3,K4,K5,K6)
- (Chapter 2: Sections 2.1- 2.3)

### **Unit III: Hamilton's Equations (18 Hours)**

- 3.1 Hamilton's Principle (K1,K2,K3,K4,K5,K6)
  - 3.2 Brachistochrone problem – Geodesic problem (K1,K2,K3,K4,K5,K6)
  - 3.3 Hamilton's principle – Multiplier Rule (K1,K2,K3,K4,K5,K6)
  - 3.4 Hamilton's Equations (K1,K2,K3,K4,K5,K6)
  - 3.5 Other variational principles (K1,K2,K3,K4,K5,K6)
  - 3.6 Examples (K1,K2,K3,K4,K5,K6)
- (Chapter 4: Sections 4.1 – 4.3)

### **Unit IV: Hamilton - Jacobi Theory (18 Hours)**

- 4.1 Introduction (K1,K2,K3,K4,K5,K6)
  - 4.2 Hamilton's principal function (K1,K2,K3,K4,K5,K6)
  - 4.3 Hamilton – Jacobi Equation (K1,K2,K3,K4,K5,K6)
  - 4.4 Conservative systems and Ignorable coordinates (K1,K2,K3,K4,K5,K6)
  - 4.5 Separability (K1,K2,K3,K4,K5,K6)
  - 4.6 Kepler problem on separability (K1,K2,K3,K4,K5,K6)
- (Chapter 5: Sections 5.1-5.3)

### **Unit V: Canonical Transformations (18 Hours)**

- 5.1 Differential Forms and Generating Functions (K1,K2,K3,K4,K5,K6)
  - 5.2 Special Transformations (K1,K2,K3,K4,K5,K6)
  - 5.3 Problems based on canonical transformations (K1,K2,K3,K4,K5,K6)
  - 5.4 Lagrange Brackets (K1,K2,K3,K4,K5,K6)
  - 5.5 Poisson Brackets (K1,K2,K3,K4,K5,K6)
  - 5.6 Bilinear covariant (K1,K2,K3,K4,K5,K6)
- (Chapter 6: Sections 6.1 - 6.3)

## **Books for study and reference:**

### **Text Book:**

**SEMESTER – II**  
**PEMAC20 - Elective II A: LaTeX and MATLAB**

<b>Year : I</b> <b>SEM : II</b>	<b>Course Code :</b> PEMAC20	<b>Title Of The Course :</b> Elective II A : LaTeX and MATLAB	<b>Course Type :</b> Theory	<b>Course Category :</b> Elective	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
------------------------------------	---------------------------------	--	--------------------------------	--------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. Demonstrate the ability to type research papers in Latex software in a fluent manner.
2. To use and write script files (MATLAB programs) and enable the students to learn and use MATLAB software.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the mathematical basis of common algorithms in Latex.
2. Demonstrate the use of mathematical equations, tables and figures in Latex.
3. Demonstrate understanding and use of MATLAB software
4. Construct one dimensional array, two dimensional arrays and basic functions in MATLAB.
5. Recognize the power of mathematical modelling and analysis using MATLAB and be able to apply their understanding to their further studies.

## Course Syllabus

### Unit I: Creating text using LATEX (15 Hours)

- 1.1 Fonts and Paragraphs(K1,K2,K3,K4,K5,K6)
- 1.2 Lists(K1,K2,K3,K4,K5,K6)
- 1.3 Tables, Special Characters(K1,K2,K3,K4,K5,K6)
- 1.4 Line and page breaks, spacing(K1,K2,K3,K4,K5,K6)
- 1.5 Bibliography with Bibtex (K1,K2,K3,K4,K5,K6)
- 1.6 Create a document file to prepare a Chapter in a Book. (K1,K2,K3,K4,K5,K6)

### Unit II: Math Mode, Graphics and special parts (15 Hours)

- 2.1 Mathematical symbols, Fractions (K1,K2,K3,K4,K5,K6)
- 2.2 Equations and arrays, Derivatives and Integrals (K1,K2,K3,K4,K5,K6)
- 2.3 Theorems and definitions (K1,K2,K3,K4,K5,K6)
- 2.4 Graphics (K1,K2,K3,K4,K5,K6)
- 2.5 Making special parts, front matter and back matter(K1,K2,K3,K4,K5,K6)
- 2.6 Create a Document file to prepare a research article.(K1,K2,K3,K4,K5,K6)

### Unit III: Starting with MATLAB (15 Hours)

- 3.1 Starting MATLAB, MATLAB Windows (K1,K2,K3,K4,K5,K6)
- 3.2 Working in the command window (K1,K2,K3,K4,K5,K6)
- 3.3 Arithmetic operation with scalars, Using MATLAB as Calculator (K1,K2,K3,K4,K5,K6)
- 3.4 Display Formats, Elementary Math Built in Functions (K1,K2,K3,K4,K5,K6)
- 3.5 Defining Scalar Variables, Useful commands for managing variables (K1,K2,K3,K4,K5,K6)
- 3.6 Script Files (K1,K2,K3,K4,K5,K6)

### Unit IV: Creating Arrays and Mathematical operations with Arrays (15 Hours)

- 4.1 Creating one dimensional array (K1,K2,K3,K4,K5,K6)
- 4.2 Creating two dimensional array (K1,K2,K3,K4,K5,K6)
- 4.3 The transpose operator, Addressing array as vector and matrix (K1,K2,K3,K4,K5,K6)
- 4.4 Using a colon in addressing arrays, Addition and Subtraction(K1,K2,K3,K4,K5,K6)
- 4.5 Array Multiplication, Array Division (K1,K2,K3,K4,K5,K6)
- 4.6 Element by element operations, using arrays in MATLAB built in MATLAB functions (K1,K2,K3,K4,K5,K6)

### Unit V: Introduction to Systems (15 Hours)

- 5.1 System, System Boundary (K1,K2,K3,K4,K5,K6)
- 5.2 System components and their interactions, Environment (K1,K2,K3,K4,K5,K6)
- 5.3 Classification of systems (K1,K2,K3,K4,K5,K6)
- 5.4 According to complexity of system, nature and type of components (K1,K2,K3,K4,K5,K6)
- 5.5 Linear systems, Superposition theorem.(K1,K2,K3,K4,K5,K6)
- 5.6 Solution to linear non- homogeneous equations (4 unknowns). (K1,K2,K3,K4,K5,K6)

**SEMESTER – II**  
**PEMAD20 - Elective II B: FLUID DYNAMICS**

<b>Year : I</b> <b>SEM : II</b>	<b>Course Code:</b> PEMAD20	<b>Title Of The Course :</b> Elective II B : Fluid Dynamics	<b>Course Type :</b> Theory	<b>Course Category :</b> Elective	<b>H/W</b> 5	<b>CREDITS</b> 4	<b>MARKS</b> 100
------------------------------------	--------------------------------	--	--------------------------------	--------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the fundamental concepts of Fluid Dynamics
2. To understand the concepts of fluid motion, equations of motion of a fluid, three dimensional flows and viscous flows and apply it in practical situations.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the concepts of fluid flow
2. Identify pressure of fluid in different kind of Motion
3. Analyse the topics of Axi-Symmetric Flows, Stoke's Stream Function
4. Determine the Stream Function, the Complex Potential for Two-Dimensional, Irrotational, Incompressible Flow.
5. Explain the concepts the Rate of Strain Quadric and Principal Stresses, Stress Analysis in Fluid Motion, the Coefficient of Viscosity and Laminar Flow, the Navier-Stokes Equations of Motion of a Viscous Fluid.

## Course Syllabus

### Unit I: Kinematics of Fluids in Motion

(15 Hours)

- 1.1 Real fluids and Ideal fluids (K1, K2, K3, K4, K5, K6)
- 1.2 Velocity of a Fluid at a Point-Streamlines and Path lines (K1, K2, K3, K4, K5, K6)
- 1.3 Steady and Unsteady flows (K1, K2, K3, K4, K5, K6)
- 1.4 The Velocity Potential – The Vorticity Vector(K1, K2, K3, K4, K5, K6)
- 1.5 The Equation of Continuity – Worked Examples (K1, K2, K3, K4, K5, K6)
- 1.6 Acceleration of a Fluid.(K1, K2, K3, K4, K5, K6)  
(Chapter 2, Sections: 2.1 to 2.9)

### Unit II: Equations of Motion of a Fluid

(15 Hours)

- 2.1 Pressure at a Point in a Fluid at Rest (K1, K2, K3, K4, K5, K6)
- 2.2 Pressure at a Point in a Moving Fluid (K1, K2, K3, K4, K5, K6)
- 2.3 Conditions at a Boundary of Two Inviscid immiscible Fluids(K1, K2, K3, K4, K5, K6)
- 2.4 Euler's Equations of Motion (K1, K2, K3, K4, K5, K6)
- 2.5 Bernoulli's Equation(K1, K2, K3, K4, K5, K6)
- 2.6 Some Worked examples (K1, K2, K3, K4, K5, K6)  
(Chapter 3, Sections: 3.1 to 3.6)

### Unit III: Some Three Dimensional Flows

(15 Hours)

- 3.1 Introduction-Sources(K1, K2, K3, K4, K5, K6)
- 3.2 Sinks(K1, K2, K3, K4, K5, K6)
- 3.3 Doublets(K1, K2, K3, K4, K5, K6)
- 3.4 Images in a rigid infinite plane(K1, K2, K3, K4, K5, K6)
- 3.5 Axi-Symmetric Flows(K1, K2, K3, K4, K5, K6)
- 3.6 Stokes's Stream Function.(K1, K2, K3, K4, K5, K6)  
(Chapter 4, Sections: 4.1, 4.2, 4.5)

### Unit IV: Some Two Dimensional Flows

(15 Hours)

- 4.1 Meaning of Two-Dimensional Flow (K1, K2, K3, K4, K5, K6)
- 4.2 Use of Cylindrical Polar Coordinates (K1, K2, K3, K4, K5, K6)
- 4.3 The Stream Function(K1, K2, K3, K4, K5, K6)
- 4.4 The Complex Potential for Two-Dimensional, Irrotational, Incompressible Flow (K1, K2, K3, K4, K5, K6)
- 4.5 Complex Velocity Potentials for Standard Two-Dimensional Flows(K1, K2, K3, K4, K5, K6)
- 4.6 Some Worked Examples.(K1, K2, K3, K4, K5, K6)  
Chapter 5, Sections: 5.1 to 5.6)

## Unit V: Viscous Flows

(15 Hours)

- 5.1 Stress Components in Real Fluid (K1, K2, K3, K4, K5, K6)
- 5.2 Relations between Cartesian Components of Stress (K1, K2, K3, K4, K5, K6)
- 5.3 Translation Motion of Fluid Element (K1, K2, K3, K4, K5, K6)
- 5.4 The Rate of Strain Quadric and Principal Stresses (K1, K2, K3, K4, K5, K6)
- 5.5 Relation between Stress and Rate of Strain (K1, K2, K3, K4, K5, K6)
- 5.6 The Coefficient of Viscosity and Laminar Flow (K1, K2, K3, K4, K5, K6)  
(Chapter 8, Sections: 8.1 to 8.9)

**SEMESTER – II**  
**PIMAC20 -INDEPENDENT ELECTIVE 2 A: FUNDAMENTALS OF RING THEORY**

<b>Year:I</b> <b>SEM:II</b>	<b>Course Code:</b> PIMAC20	<b>Title of the Course:</b> Independent Elective 2 A: Fundamentals of Ring Theory	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
--------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To get the basic knowledge about Rings, Sub rings and Types of Rings.
2. To engage them in self independent study of the Lecture notes and enable the students to workout unsolved problems using various tricks.

**Course Outcomes (CO)**

The Learners will be able to

1. Demonstrate various characteristic of Rings.
2. Extend the knowledge in Ideals, Fields of Quotients and polynomial rings.
3. Validate primitive polynomials and Irreducible Polynomials.
4. Acquire the knowledge in Field theory.
5. Solve various types of problems in finite fields.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	L	H	M	H
CO2	H	M	L	H	M	H

CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Ring Theory**

Ring – Sub Ring – Types of Ring – Zero Divisors – Integral Domain – Unit of Ring – Boolean Ring – Characteristic of a Ring – Equivalence Relation on Ring. (K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.1)

### **Unit II: Ring Theory (Contd...)**

Ideals – Quotient Ring – Ring Homomorphism – Field of Quotients – Polynomial Rings – Some Definitions.(K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.2)

### **Unit III: Ring Theory (Contd...)**

Principle Ideal Domain (PID) – Euclidean Domain (ED) – Unique Factorization Domain (UFD) - Content of Polynomial – Primitive Polynomial – Irreducible Polynomial. (K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.3-16.7)

### **Unit IV: Field Theory**

Definition of Field – Some Definitions – Simple Extension – Algebraic Extension – Monic polynomial – minimal polynomial – Factor Theorem – Splitting Field. (K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.8)

### **Unit V: Field Theory (Contd...)**

Conjugate Elements – Separable Polynomial – Separable Element – Purely Inseparable Extension – Normal Extension – Galois Extension – Fundamental Theorem of Galois Theory. (K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.9-16.10)

**SEMESTER – II**  
**PIMAD20 -INDEPENDENT ELECTIVE 2 B: QUANTITATIVE APTITUDE FOR**  
**COMPETITIVE EXAMINATIONS II**

<b>Year :I</b> <b>SEM :II</b>	<b>Course Code :</b> PIMAD20	<b>Title Of The Course :</b> Independent Elective 2 B: Quantitative aptitude for competitive examinations II	<b>Course Type :</b> Theory	<b>Course Category :</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
----------------------------------	---------------------------------	---	--------------------------------	--	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce quantitative methods and techniques for effective decisions-making and provide a detailed knowledge about Mathematical, Transportation and Assignment models.
2. To analyze any real life system with limited constraints and depict it in a model form and examine the aspects of business and marketing with respect to operations research.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand and solve aptitude problems.
2. Identify and develop the techniques to solve the problems using different methods.
3. Demonstrate procedural fluency with real number arithmetic operations and use those operations to represent real-world scenarios and to solve stated problems.
4. Solve linear equations, graph and interpret linear models, and read and apply formulas.
5. Ability to face the competitive examinations with a clear approach.

CO	PSO

CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Reasoning Ability**

Series Completion- Arranging of figures in series- Classification- Pattern Comparison- Analogies- Analytical reasoning- Practical exercises- Critical Reasoning- Practical exercises.(K1,K2,K3,K4,K5,K6)  
(Section: 3 : Part B and C)

### **Unit II: Arithmetical Ability**

Surds and indices- Pipes and Cisterns- Problem on Trains- Boats and streams- Logarithms- Alligation or Mixture- Area- Volume and surfaces.(K1,K2,K3,K4,K5,K6)  
(Section 1:1.9, 1.16, 1.18-1.20, 1.23-1.25)

### **Unit III: Arithmetic Ability (Contd...)**

Partnership- Permutations and Combinations- Probability- True Discount- Banker's Discount- Heights and Discount- Odd man out and series.(K1,K2,K3,K4,K5,K6)  
(Section 1:1.30-1.35, 1.13)

### **Unit IV: General Awareness**

Banks Information- Socio economic status of India- Government schemes- Agriculture- National- Dateline-Art and Culture - News papers in India and Abroad- Awards- Space- International- Sports- Politics.(K1,K2,K3,K4,K5,K6)  
(Section: 5)

### **Unit V: Current Affairs and Computers**

International Affairs- Important days- Science and Medicine- Current Affairs- Social Banking- Real Banking- Glossary of Computer- Short Keys.(K1,K2,K3,K4,K5,K6)  
(Section: 5)

**SEMESTER – III**  
**PCMAI20 - TOPOLOGY**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> PCMAI20	<b>Title of the Course:</b> Topology	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To generalize the concepts that the students have learnt in Real analysis and to train the students to develop analytical thinking.
2. To introduce the topological spaces which provide a general framework for the study of convergence, continuity and compactness.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand basis as a collection of basic open sets and the concepts of continuous functions and their properties in topological spaces.
2. Determine the topology generated by the given basis, connectedness, path connectedness of the product of an arbitrary family of spaces.
3. Grasp the concept of compactness which is the generalization to topological spaces of the property of closed and bounded subsets of the real line.
4. Deal with the countability and separation axioms
5. Know the theorems with the conditions under which a topological space can be embedded in metric space.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Topological Spaces (18 Hours)

- 1.1 Topological spaces (K1,K2,K3,K4,K5,K6)
  - 1.2 Basis for a topology (K1,K2,K3,K4,K5,K6)
  - 1.3 Ordered topology, Product topology on  $X \times Y$  (K1,K2,K3,K4,K5,K6)
  - 1.4 Subspace topology (K1,K2,K3,K4,K5,K6)
  - 1.5 Closed sets (K1,K2,K3,K4,K5,K6)
  - 1.6 Limit points (K1,K2,K3,K4,K5,K6)
- (Chapter 2: Sections 12 – 17)

### Unit II: Metric space topology and Connectedness (18 Hours)

- 2.1 Continuous Functions (K1,K2,K3,K4,K5,K6)
  - 2.2 The product topology (K1,K2,K3,K4,K5,K6)
  - 2.3 The metric topology (K1,K2,K3,K4,K5,K6)
  - 2.4 The metric topology (continued) (K1,K2,K3,K4,K5,K6)
  - 2.5 Connected spaces (K1,K2,K3,K4,K5,K6)
  - 2.6 Connected subspaces of the Real line (K1,K2,K3,K4,K5,K6)
- (Chapter 2: Sections 18 - 21 and Chapter 3: Sections 23 - 24)

### Unit III: Connectedness and Compactness (18 Hours)

- 3.1 Components (K1,K2,K3,K4,K5,K6)
  - 3.2 Local connectedness (K1,K2,K3,K4,K5,K6)
  - 3.3 Compact spaces (K1,K2,K3,K4,K5,K6)
  - 3.4 Compact subspaces of the Real Line (K1,K2,K3,K4,K5,K6)
  - 3.5 Limit point compactness (K1,K2,K3,K4,K5,K6)
  - 3.6 Local compactness (K1,K2,K3,K4,K5,K6)
- (Chapter 3: Sections 25 - 29)

### Unit IV: Separation Axioms (18 Hours)

- 4.1 The Countability Axioms (K1,K2,K3,K4,K5,K6)
  - 4.2 The Countability Axioms (continued) (K1,K2,K3,K4,K5,K6)
  - 4.3 The Separation Axioms (K1,K2,K3,K4,K5,K6)
  - 4.4 The Separation Axioms (continued) (K1,K2,K3,K4,K5,K6)
  - 4.5 Normal spaces (K1,K2,K3,K4,K5,K6)
  - 4.6 Normal spaces (continued) (K1,K2,K3,K4,K5,K6)
- (Chapter 4: Sections 30 – 32)

### Unit V: Complete Metric Spaces (18 Hours)

- 5.1 The Urysohn Lemma (K1,K2,K3,K4,K5,K6)
- 5.2 Regular Space (K1,K2,K3,K4,K5,K6)

5.3 The Urysohn Metrization Theorem (K1,K2,K3,K4,K5,K6)

5.4 Imbedding Theorem (K1,K2,K3,K4,K5,K6)

5.5 The Tietze Extension Theorem (K1,K2,K3,K4,K5,K6)

5.6 The Tychonoff Theorem (K1,K2,K3,K4,K5,K6)

(Chapter 4: Sections 33 – 35, Chapter 5: Section 37)

**SEMESTER – III**  
**PCMAJ20 - NUMERICAL ANALYSIS**

<b>Year: II</b> <b>SEM: III</b>	<b>Course Code:</b> PCMAJ20	<b>Title of the Course:</b> Numerical Analysis	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To develop the skills in solving the Numerical problems and apply in other disciplines.
2. To implement various methods to apply in wider area of research.

**Course Outcomes (CO)**

The Learners will be able to

1. Find the solution in Numerical, Algebraic and transcendental equations.
2. Solve the set of algebraic equations by direct and iterative methods.
3. Analyze the values of a function for any intermediate value of the independent variable.
4. Compute the numerical solution of various types of ordinary differential equations.
5. Acquire the numerical solution of Partial Differential Equations.

CO	PSO

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**Unit I: Solution to Numerical, Algebraic and Transcendental Equations (18 Hours)**

- 1.1 Introduction - Definition (K1,K2, K3,K4,K5,K6)
- 1.2 Bisection Method (K1,K2,K3,K4,K5,K6)

- 1.3 Method of successive approximation, False position (K1,K2,K3,K4,K5,K6)
- 1.4 Newton's Iteration Method (K1,K2,K3,K4,K5,K6)
- 1.5 Convergence of Newton- Horner's Method (K1,K2,K3,K4,K5,K6)
- 1.6 Descartes Rule of Signs- Graeffes Root Squaring Method (K1,K2,K3,K4,K5,K6)  
(Chapter 3: Section 3.1 – 3.11)

**Unit II: Solving Sets of Equations (18 Hours)**

- 2.1 Introduction (K1,K2, K3,K4,K5,K6)
- 2.2 Types and algorithm for solving algebraic sets of equation (K1,K2, K3,K4,K5,K6)
- 2.3 The Gaussian Elimination (K1,K2,K3,K4,K5,K6)
- 2.4 Gauss Jordan Method (K1,K2,K3,K4,K5,K6)
- 2.5 Type I : Iterative Method (K1,K2,K3,K4,K5,K6)
- 2.6 Type II: Iterative Method (K1,K2,K3,K4,K5,K6)  
(Chapter 4: 4.2- 4.10)

**Unit III: Interpolation and Curve Fitting (18 Hours)**

- 3.1 Introduction (K1,K2, K3,K4,K5,K6)
- 3.2 Problems solving in Lagrangian Polynomials(K1,K2,K3,K4,K5,K6)
- 3.3 Analyze data in Divided Differences (K1,K2,K3,K4,K5,K6)
- 3.4 Problems solving in Evenly Spaced Data (K1,K2,K3,K4,K5,K6)
- 3.5 Problems solving in Polynomial Approximation of Surfaces(K1,K2,K3,K4,K5,K6)
- 3.6 Finding solution of Getting Derivatives and Integrals Numerically  
(K1,K2,K3,K4,K5,K6)  
(Chapter 5, Section 5.2 – 5.5)

**Unit IV: Numerical Solution of Ordinary Differential Equations (18 Hours)**

- 4.1 Introduction – Basic Definitions (K1,K2, K3,K4,K5,K6)
- 4.2 Basic steps and algorithm of Solving ordinary differential equations (K1,K2, K3,K4,K5,K6)
- 4.3 Solving ODE using Taylor's Series method (K1,K2,K3,K4,K5,K6)
- 4.4 Find solutions of ODE using Runge – Kutta Methods (K1,K2,K3,K4,K5,K6)
- 4.5 Milne's methods (K1,K2,K3,K4,K5,K6)
- 4.6 Compute ODE using Adam's Moulton Method (K1,K2,K3,K4,K5,K6)  
(Chapter 11: 11.4-11.6 and 11.13 to 11.20)

**Unit V: Numerical solution to Partial Differential Equations (18 Hours)**

- 5.1 Introduction – Difference Quotients(K1,K2, K3,K4,K5,K6)
- 5.2 Geometrical Representation of Partial Difference Quotients(K1,K2,K3,K4,K5,K6)
- 5.3 Classification of Partial Differential Equations – Elliptic Equations(K1,K2,K3,K4,K5,K6)
- 5.4 Solution to Laplace's Equation by Liebmann's iteration process(K1,K2,K3,K4,K5,K6)

5.5 Poisson's Equation and its solutions – Crank – Nicholson method  
(K1,K2,K3,K4,K5,K6)

5.6 Hyperbolic equations(K1,K2,K3,K4,K5,K6)  
(Chapter 12: 12.1-12.7, 12.8.2, 12.9)

<b>SEM :III</b>	PCMAK20	Probability Theory	Theory	Core	6	4	100

**Course Objectives**

1. Apply problem solving technique to solve real world event.
2. Understand the concept of random variables.

**Course Outcomes (CO)**

The Learners will be able to

1. Characterize probability models and function of random variables based on single and multiple random variables.
2. Evaluate and apply expected value, moments and understand the concept of Chebyshev inequality.
3. Analyze the concepts of characteristic functions and its properties.
4. Apply probability distribution to solve the real world problems.
5. Understand the concept of limit theorem and its applications.

## Course Syllabus

### Unit I: Random Variables

(18 Hours)

- 1.1 The concept of a random variable (K1,K2,K3,K4,K5,K6)
- 1.2 The distribution function-Random variables of the discrete type and the continuous type (K1,K2,K3,K4,K5,K6)
- 1.3 Function of random variables (K1,K2,K3,K4,K5,K6)
- 1.4 Multidimensional random variable (K1,K2,K3,K4,K5,K6)
- 1.5 Marginal and Conditional distributions (K1,K2,K3,K4,K5,K6)
  
- 1.6 Independent random variables - Functions of Multi dimensional random variables (K1,K2,K3,K4,K5,K6)  
(Chapter 2: Sections 2.1 to 2.9)

### Unit II: Parameters of the Distribution of a Random Variable

(18 Hours)

- 2.1 Expected values (K1,K2,K3,K4,K5,K6)
- 2.2 Moments (K1,K2,K3,K4,K5,K6)
- 2.3 The Chebyshev Inequality (K1,K2,K3,K4,K5,K6)
- 2.4 Absolute moments (K1,K2,K3,K4,K5,K6)
- 2.5 Order parameters (K1,K2,K3,K4,K5,K6)
- 2.6 Moments of random vectors (K1,K2,K3,K4,K5,K6)  
(Chapter 3: Sections 3.1 - 3.6)

### Unit III: Characteristic Functions

(18 Hours)

- 3.1 Properties of Characteristic function (K1,K2,K3,K4,K5,K6)
- 3.2 The characteristic function and moments (K1,K2,K3,K4,K5,K6)
- 3.3 Semi-invariants (K1,K2,K3,K4,K5,K6)
- 3.4 The characteristic function of the sum of independent random variables (K1,K2,K3,K4,K5,K6)
- 3.5 Determination of the distribution function by the characteristic function (K1,K2,K3,K4,K5,K6)
- 3.6 The characteristic function of multidimensional random vectors – Probability generating functions (K1,K2,K3,K4,K5,K6)  
(Chapter 4: Sections 4.1 - 4.7)

### Unit IV: Probability Distributions

(18 Hours)

- 4.1 One – point and two - point distributions (K1,K2,K3,K4,K5,K6)
- 4.2 The Bernoulli scheme : The binomial distribution (K1,K2,K3,K4,K5,K6)
- 4.3 The Poisson scheme :The Generalized binomial distribution (K1,K2,K3,K4,K5,K6)
- 4.4 The Polya and Hypergeometric distributions (K1,K2,K3,K4,K5,K6)
- 4.5 The Poisson distribution – The uniform distribution (K1,K2,K3,K4,K5,K6)
- 4.6 The normal distribution – The gamma distribution (K1,K2,K3,K4,K5,K6)  
(Chapter 5: Sections 5.1 - 5.8)

## Unit V: Limits Theorems

(18 Hours)

- 5.1 Preliminary remarks - Stochastic convergence (K1,K2,K3,K4,K5,K6)
- 5.2 Bernoulli's law of large numbers (K1,K2,K3,K4,K5,K6)
- 5.3 The convergence of a sequence of distribution functions (K1,K2,K3,K4,K5,K6)
- 5.4 The Riemann - Stieltjes integral (K1,K2,K3,K4,K5,K6)
- 5.5 The Levy - Cramer theorem (K1,K2,K3,K4,K5,K6)
- 5.6 The De Moivre - Laplace theorem - The Lindeberg - Levy theorem (K1,K2,K3,K4,K5,K6)  
(Chapter 6: Sections 6.1 - 6.8)

**SEMESTER – III**  
**PCMAL20 - OPERATIONS RESEARCH**

<b>Year : II</b> <b>SEM : III</b>	<b>Course Code :</b> PCMAL20	<b>Title Of The Course :</b> Operations Research	<b>Course Type :</b> Theory	<b>Course Category :</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
--------------------------------------	---------------------------------	---	--------------------------------	----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To develop the knowledge of the students in the field of Operations Research which plays an important role in the Business Management.
2. To understand the mathematical tools that is used to solve optimization problems and to learn the concepts of queuing system and non-linear programming.

**Course Outcomes (CO)**

The Learners will be able to

1. Determine the feasible solution using Revised simplex method, Duality and bounded variable algorithm.
2. Understand the theoretical background of queuing systems and solve the real world problems.
3. Analyze the Inventory models and solve EOQ models.
4. Apply dynamic programming to solve real world problems.
5. Solve constrained and unconstrained optimization problems using Hookes and Jeeves algorithm, Gradient projection, Lagrange multipliers, Kuhn-Tucker conditions etc.

CO5	H	H	H	M	M	H

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Advanced topics in Linear Programming

(18 Hours)

- 1.1 Simplex method fundamentals(K1,K2,K3,K4,K5,K6)
  - 1.2 From Extreme points to basic solutions – Examples – Generalized simplex tableau in matrix form (K1,K2,K3,K4,K5,K6)
  - 1.3 The Revised simplex method (K1,K2,K3,K4,K5,K6)
  - 1.4 Computational issues in the revised simplex method(K1,K2,K3,K4,K5,K6)
  - 1.5 Bounded –variable algorithm (K1,K2,K3,K4,K5,K6)
  - 1.6 Duality (K1,K2,K3,K4,K5,K6)
- (Chapter 7: Sections 7.1-7. 4)

### Unit II: Queuing System

(18 Hours)

- 2.1 Introduction(K1,K2,K3,K4,K5,K6)
  - 2.2 Elements of a Queuing model (K1,K2,K3,K4,K5,K6)
  - 2.3 Role of exponential distribution (K1,K2,K3,K4,K5,K6)
  - 2.4 Pure Birth and Death models (Relationship between the Exponential and Poisson distributions) (K1,K2,K3,K4,K5,K6)
  - 2.5 Generalized Poisson Queuing Model (K1,K2,K3,K4,K5,K6)
  - 2.6 Specialized Poisson Queues. (K1,K2,K3,K4,K5,K6)
- (Chapter 18: Sections 18.1 - 18.6)

### Unit III: Inventory Models

(18 Hours)

- 3.1 Inventory problem : A supply chain perspective(K1,K2,K3,K4,K5,K6)
  - 3.2 Role of demand in the development of Inventory models (K1,K2,K3,K4,K5,K6)
  - 3.3 Static Economic-Order-Quantity (EOQ) models (K1,K2,K3,K4,K5,K6)
  - 3.4 EOQ with price breaks (K1,K2,K3,K4,K5,K6)
  - 3.5 Multi – item EOQ with shortage limitation (K1,K2,K3,K4,K5,K6)
  - 3.6 Dynamic EOQ Models (K1,K2,K3,K4,K5,K6)
- (Chapter 13: Sections 13.1 - 13.4)

### Unit IV: Dynamic Programming

(18 Hours)

- 4.1 Recursive Nature of Dynamic Programming Computation (K1,K2,K3,K4,K5,K6)
  - 4.2 Forward and Backward Recursion (K1,K2,K3,K4,K5,K6)
  - 4.3 Selected Dynamic Programming Applications (K1,K2,K3,K4,K5,K6)
  - 4.4 Equipment Replacement model(K1,K2,K3,K4,K5,K6)
  - 4.5 Investment model(K1,K2,K3,K4,K5,K6)
  - 4.6 Problem of dimensionality(K1,K2,K3,K4,K5,K6)
- (Chapter 12: 12.1 – 12.4)

### Unit V: Non Linear Programming

(18 Hours)

- 5.1 Basic concepts (K1,K2,K3,K4,K5,K6)
- 5.2 constrained Optimization –Direct search method(K1,K2,K3,K4,K5,K6)
- 5.3 Gradient method(K1,K2,K3,K4,K5,K6)
- 5.4 Constrained Optimization Problems – Separable programming(K1,K2,K3,K4,K5,K6)

- 5.5 Quadratic programming(K1,K2,K3,K4,K5,K6)  
5.6 Chance constrained programming(K1,K2,K3,K4,K5,K6)  
(Chapter21:21.1- 21.2.3)

**SEMESTER – III**  
**PEMAE20 – ELECTIVE III A: PROGRAMMING WITH JAVA**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: III</b>	PEMAE20	Elective III A: Programming With Java	Theory	Elective	4	3	100

**Course Objectives**

1. To learn a new platform independent language
2. To utilize Java in a variety of technologies and on different platforms.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the benefits and applications of OOP and distinguish C++ and JAVA.
2. Gain knowledge about operators and its types.
3. Define decision making statements and solve problems based on it.
4. Develop the program by manipulating classes and methods in the Java programming language.
5. Explore the Java programming by using arrays.

CO	PSO

CO4	H	H	H	H	L	M
CO5	H	H	H	H	L	M

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**Unit I: Fundamentals of Object - Oriented Programming**

**(12 Hours)**

- 1.1 Basic Concepts of Object Oriented Programming – Benefits of OOP (K1, K2, K3, K4, K5, K6)
- 1.2 Applications of OOP - Features of Java (K1, K2, K3, K4, K5, K6)

- 1.3 Java Differs from C and C++ - Java environment (K1, K2, K3, K4, K5, K6)
  - 1.4 Java program structure (K1, K2, K3, K4, K5, K6)
  - 1.5 Tokens – Statements (K1, K2, K3, K4, K5, K6)
  - 1.6 Java programming style(K1, K2, K3, K4, K5, K6)
- (Chapter 1:1.3 – 1.5, Chapter 2: 2.2-2.3 and 2.9, Chapter 3:3.5 – 3.7 and 3.12)

**Unit II: Constants, Variables and Data Types, Operators and Expressions (12 Hours)**

- 2.1 Constants – Variables – Data types – Declaration of variables (K1, K2, K3, K4, K5, K6)
  - 2.2 Giving values to variables – Scope of variables – Symbolic constants (K1,K2,K3,K4,K5,K6)
  - 2.3 Type casting – Getting values of variables – Standard default values (K1,K2,K3,K4,K5,K6)
  - 2.4 Operators: Arithmetic, relational, logical, assignment, increment and decrement, conditional bitwise and special – Arithmetic expressions (K1, K2, K3, K4, K5, K6)
  - 2.5 Evaluation of expressions – Operator precedence and associativity (K1, K2, K3, K4,K5,K6)
  - 2.6 Mathematical functions (K1, K2, K3, K4, K5,K6)
- (Chapter 4: 4.2 – 4.11, Chapter 5: 5.2 – 5.11, 5.14 – 5.15)

**Unit III: Decision Making, Branching, Looping (12 Hours)**

- 3.1 Decision making statements: if, simple if, if ... else (K1, K2, K3, K4, K5,K6)
  - 3.2 Nesting of if ... else, else if ladder (K1, K2, K3, K4, K5,K6)
  - 3.3 Switch statements and conditional operator (K1, K2, K3, K4, K5,K6)
  - 3.4 Loop statements: while, do, for loops (K1, K2, K3, K4, K5,K6)
  - 3.5 Jumps in loops (K1, K2, K3, K4, K5,K6)
  - 3.6 Labeled loops.(K1, K2, K3, K4, K5,K6)
- (Chapter 6: 6.2 – 6.8, Chapter 7: 7.2 – 7.6)

**Unit IV: Classes, Objects and Methods (12 Hours)**

- 4.1 Defining a class – Fields declaration – Methods declaration (K1, K2, K3, K4, K5,K6)
  - 4.2 Creating objects – Accessing class members – Constructors (K1, K2, K3, K4, K5,K6)
  - 4.3 Methods overloading – Static members – Nesting of methods (K1, K2, K3, K4, K5,K6)
  - 4.4 Inheritance – overriding methods (K1, K2, K3, K4, K5,K6)
  - 4.5 Final variables, methods and classes, Finalizer methods (K1, K2, K3, K4, K5,K6)
  - 4.6 Abstract methods and classes - Methods with varargs – Visibility control.(K1, K2, K3, K4, K5,K6)
- (Chapter 8: 8.2 – 8.18)

**Unit V: Arrays, Strings and Vectors and Interfaces (12 Hours)**

- 5.1 One and two dimensional arrays (K1, K2, K3, K4, K5,K6)
  - 5.2 Strings – Vectors (K1, K2, K3, K4, K5,K6)
  - 5.3 Wrapper classes – Enumerated types (K1, K2, K3, K4, K5,K6)
  - 5.4 Annotations – Defining interfaces (K1, K2, K3, K4, K5,K6)
  - 5.5 Extending interfaces – Implementing interfaces (K1, K2, K3, K4, K5,K6)
  - 5.6 Accessing interface variables (K1, K2, K3, K4, K5,K6)
- (Chapter 9: 9.2 – 9.9, Chapter 10: 10.2 – 10.5)

## SEMESTER – III

### PEMAG20– ELECTIVE III B: PROGRAMMING WITH R

<b>Year : II</b> <b>SEM : III</b>	<b>Course Code :</b> PEMAG20	<b>Title Of The Course :</b> Elective III B:Programming with R	<b>Course Type :</b> Theory& Practical	<b>Course Category :</b> Elective	<b>H/W</b> 4	<b>CREDITS</b> 3	<b>MARKS</b> 100
--------------------------------------	---------------------------------	--	---	--------------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To master the use of R interactive environment with an understanding of the use of R documentation.
2. To use R for descriptive statistics and write multivariate models in R.

#### Course Outcomes (CO)

The Learners will be able to

1. Familiarize with basics of R software and built in function of R.
2. Identify the characteristics of datasets and plot the datasets in R using graphical methods.
3. Demonstrate understanding and use of for loop, if statement and break.
4. Implement the learning techniques and computing environment that are suitable for the applications under consideration.
5. Compute vectors and matrices, matrix inverse, eigen values and eigen vectors.

(L-Low, M-Moderate, H-High)

## Course Syllabus

### **Unit 1: Introduction to R language (12 Hours)**

- 1.1. Starting and quitting in R, Basic features in R(K1,K2,K3,K4,K5,K6)
- 1.2. Built in functions and online help(K1,K2,K3,K4,K5,K6)
- 1.3. Logical vectors (K1,K2,K3,K4,K5,K6)
- 1.4. Rational operators.(K1,K2,K3,K4,K5,K6)
- 1.5. Changing Directories, redirecting R output, Lists(K1,K2,K3,K4,K5,K6)
- 1.6. Data frames (K1,K2,K3,K4,K5,K6)

### **Unit II: Programming Statistical Graph (12 Hours)**

- 2.1 Plotting bar charts, dot charts(K1,K2,K3,K4,K5,K6)
- 2.2 Plotting Pie charts (K1,K2,K3,K4,K5,K6)
- 2.3 Plotting Histograms (K1,K2,K3,K4,K5,K6)
- 2.4 Plotting Box plot(K1,K2,K3,K4,K5,K6)
- 2.5 Plotting scatter plot (K1,K2,K3,K4,K5,K6)
- 2.6 Plotting QQ plots(K1,K2,K3,K4,K5,K6)

### **Unit III: Programming with R (12 Hours)**

- 3.1 For loop(K1,K2,K3,K4,K5,K6)
- 3.2 If statement(K1,K2,K3,K4,K5,K6)
- 3.3 while loop(K1,K2,K3,K4,K5,K6)
- 3.4 Newton's method for finding root(K1,K2,K3,K4,K5,K6)
- 3.5 Repeat loop, break and next statements(K1,K2,K3,K4,K5,K6)
- 3.6 Problems and Exercises(K1,K2,K3,K4,K5,K6)

### **Unit IV: Simulation in R (12 Hours)**

- 4.1 Monte Carlo simulation(K1,K2,K3,K4,K5,K6)
- 4.2 Generation of pseudo random numbers(K1,K2,K3,K4,K5,K6)
- 4.3 Bernoulli random variables(K1,K2,K3,K4,K5,K6)
- 4.4 Binomial random variables(K1,K2,K3,K4,K5,K6)
- 4.5 Poisson random variables(K1,K2,K3,K4,K5,K6)
- 4.6 Exponential random numbers(K1,K2,K3,K4,K5,K6)

### **Unit V: Computational Linear Algebra in R (12 Hours)**

- 5.1 Vectors and matrices in R(K1,K2,K3,K4,K5,K6)
- 5.2 Constructing matrix objects(K1,K2,K3,K4,K5,K6)
- 5.3 Accessing matrix elements(K1,K2,K3,K4,K5,K6)
- 5.4 Row and column names(K1,K2,K3,K4,K5,K6)
- 5.5 Matrix properties, Matrix multiplication and inversion(K1,K2,K3,K4,K5,K6)
- 5.6 Eigen values and Eigen vectors.(K1,K2,K3,K4,K5,K6)

**SEMESTER – III**  
**PEMAF20 – ELECTIVE PRACTICAL: JAVA**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: III</b>	PEMAF20	Elective Practical: Java	Practical	Elective	2	1	100

**Course Objectives**

1. To gain knowledge of object-oriented paradigm in the Java programming language.
2. To design & program stand-alone Java applications.

**Course Outcomes (CO)**

The Learners will be able to

1. Implement programs with classes.
2. Write programs that perform operations using arrays.
3. Develop the program by decision making statements and solve problems based on it.
4. Illustrate basic programming concepts such as program flow and syntax of a high-level general purpose language.
5. Take a problem, figure out the algorithm to solve it and write the code.

CO3	H	H	H	H	L	M
CO4	H	H	H	H	L	M
CO5	H	H	H	H	L	M

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**PROGRAMS:**

1. Solution of linear equations.(K1,K2,K3,K4,K5,K6)
2. Number and sum of integers between two given integers which are divisible by a

- number. (K1,K2,K3,K4,K5,K6)
3. Multiplication table. (K1,K2,K3,K4,K5,K6)
  4. Verifying whether a given number is a palindrome. (K1,K2,K3,K4,K5,K6)
  5. Generation of Fibonacci sequence. (K1,K2,K3,K4,K5,K6)
  6. Sorting an array. (K1,K2,K3,K4,K5,K6)
  7. Merging two sorted arrays. (K1,K2,K3,K4,K5,K6)
  8. Product of two matrices. (K1,K2,K3,K4,K5,K6)
  9. Transpose of a matrix. (K1,K2,K3,K4,K5,K6)
  10. Replacing a substring with another. (K1,K2,K3,K4,K5,K6)

**SEMESTER – III**  
**PEMAH20 - ELECTIVE PRACTICAL: R**

<b>Year : II</b> <b>SEM : III</b>	<b>Course Code:</b> PEMAH20	<b>Title Of The Course :</b> Elective Practical: R	<b>Course Type :</b> Theory & Practical	<b>Course Category :</b> Elective	<b>H/W</b> 2	<b>CREDITS</b> 1	<b>MARKS</b> 100
--------------------------------------	--------------------------------	--	---	--------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To master the use of R interactive environment with an understanding of the use of R documentation.
2. To use R for descriptive statistics and write simple programs in R.

**Course Outcomes (CO)**

The Learners will be able to

1. Familiarize with basics of R software and built in function of R.
2. Identify the characteristics of datasets and plot the datasets in R using graphical methods.
3. Demonstrate understanding and use data frames.
4. Implement the learning techniques and computing environment that are suitable for the applications under consideration.
5. Compute vectors and matrices, matrix inverse, eigen values and eigen vectors.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

CO5	H	H	H	H	L	M

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**PROGRAMS:**

1. Create a sequence and find the mean of numbers.(K1,K2,K3,K4,K5,K6)

2. Find the first 10 Fibonacci Numbers. (K1,K2,K3,K4,K5,K6)
3. Find the factors of a given number. (K1,K2,K3,K4,K5,K6)
4. Find the maximum and minimum of a given vector.(K1,K2,K3,K4,K5,K6)
5. Read the CSV file and display the content.(K1,K2,K3,K4,K5,K6)
6. Create m x n matrix and perform matrix operations.(K1,K2,K3,K4,K5,K6)
7. Create a bar plot of five subject marks.(K1,K2,K3,K4,K5,K6)
8. Create a data frame and display the details.(K1,K2,K3,K4,K5,K6)
9. Extract rows and columns from data frame(K1,K2,K3,K4,K5,K6)
10. Create a list containing strings, numbers and vectors(K1,K2,K3,K4,K5,K6)

## SEMESTER – III

### PIMAE20 - INDEPENDENT ELECTIVE 3 A: SKILL ENHANCEMENT IN REAL AND COMPLEX ANALYSIS -I

<b>Year: II</b> <b>SEM:III</b>	<b>Course Code:</b> PIMAE20	<b>Title of the Course:</b> Independent Elective 3 A: Skill Enhancement in Real and Complex Analysis -I	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To develop the in-depth knowledge in Analysis and problem solving skills.
2. To engage them in self independent study of the Lecture notes and to enable the students to workout unsolved problems using various tricks.

#### Course Outcomes (CO)

The Learners will be able to

1. Utilize the basics of set theory and number system.
2. Acquire the knowledge of Sequences and Series.
3. Compute the Limit, Continuity and Differentiation of functions.
4. Analyze the Transcendental functions such as Exponential, Trigonometric and Hyperbolic Functions.
5. Evaluate the integral by Cauchy's Integral formula.

<b>CO5</b>	H	H	H	M	H	H

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Set theory and Real Number System

Elementary Set Theory – Finite Countable and Uncountable Sets – Real Number System as a Complete Ordered Field – Archimedean Property – Supremum – Infimum.  
(K1,K2,K3,K4,K5,K6)  
(Chapter 1: 1.1- 1.6)

### Unit II: Sequences and Series

Sequences and Series – Convergence –  $\lim \sup$  –  $\lim \inf$  – Bolzano Weierstrass Theorem – Heine Boral Theorem.(K1,K2,K3,K4,K5,K6)  
(Chapter 2: 2.1-2.5)

### Unit III: Limit, Continuity and Differentiability and Mean Value Theorem

Continuity – Uniform Continuity – Discontinuity – Types of Discontinuity – Differentiability– Mean Value Theorem.(K1,K2,K3,K4,K5,K6)  
(Chapter 3: 3.1-3.4)

### Unit IV: Complex Numbers and Analytic Function

Algebra of Complex Number – The Complex Plane – Polynomials – Power Series – Transcendental Functions Such as Exponential, Trigonometric and Hyperbolic Functions– Analytic Function.(K1,K2,K3,K4,K5,K6)  
(Chapter 11: 11.1-11.5)

### Unit V: Complex Integration and Calculus of Residues

Contour integral – Cauchy's Theorem – Cauchy's Integral Formulae – Liouville's Theorem – Maximum Modulus Principle. (K1,K2,K3,K4,K5,K6)  
(Chapter 12: 12.1-12.4)

### Books for study and reference:

#### Text Book:

1. Pawan Sharma, Neha Sharma, Suraj Singh, Mathematical Sciences, UGC CSIR NET/SET (JRF & LS), Arihant Publications (India) Ltd, 2016.

#### Books for Reference:

1. Dr. A. P. Singh - Modern Algebra – Infostudy Publication, 2018.
2. R. Gupta's - Joint CSIR - UGC-NET Mathematical Sciences Previous Year's Solved Paper, 2014.
3. Dr. A . Kumar - CSIR-UGC NET/JRF/SLET Mathematical Sciences (Paper I & II) – UPKAR Prakashan Publications, 2010.

4. S.K. Shrivastava & M.K. Malik - CSIR-UGC NET/JRF MATHEMATICAL SCIENCES Previous Years Solved Papers Including Model Papers with Explanation – JBC Press, 20

**SEMESTER – III**  
**PIMAF20 - INDEPENDENT ELECTIVE 3 B: FUNDAMENTALS OF RESEARCH**  
**METHODOLOGY AND STATISTICS - I**

<b>Year:II</b> <b>SEM:III</b>	<b>Course Code:</b> PIMAF20	<b>Title of the Course:</b> Independent Elective 3 B: Fundamentals of Research Methodology and Statistics – I	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide a clear understanding of basic concepts of the research methodology.
2. To motivate them in self- independent study of the Lecture notes and online materials and to analyse the real life problems using Statistics concepts.

**Course Outcomes (CO)**

The Learners will be able to

1. Utilize the basic concepts of Research.
2. Prepare the review of literature.
3. Plan the various types of survey studies and sampling design.
4. Study the case of Historical methods and Philosophical methods.
5. Classify the experimental procedure and case study of various groups.

CO5	H	H	H	M	L	H

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Perception of Research and Assortment of Problem**

Meaning of Research – General Characteristics of Research – Specific Characteristics of Research – Objectives of Research – Classification of Research – Types of Research – Reflective Thinking – Scientific Thinking – Characteristic of a Good Researcher – Characteristic of a Problem. (K1, K2, K3, K4, K5, K6)  
(Chapter 1 and 2)

### **Unit II: Appraise of related literature and foundation of hypothesis**

Meaning of review of Literature – Objective of review of literature – Sources of review of Literature – How to conduct of the review of the literature – Meaning of hypothesis – Observation versus specific Land general hypothesis – Variables in a hypothesis – Formal conditions for testing hypothesis. (K1, K2, K3, K4, K5, K6)  
(Chapter 3 and 4)

### **Unit III: Research Planning and Sampling, Survey Method**

Meaning of Research plan/ Design – Meaning and definitions of Sampling – Functions of Population and sampling – Types of sampling design – Scientific Method – Types of Survey Studies. (K1, K2, K3, K4, K5, K6)  
(Chapter 5, 6 and 7)

### **Unit IV: Historical Method and Philosophical Method**

Approaches of Historical Research – Functional History of Education – Writing the Report – Meaning of Philosophy – Philosophy of education – Procedure of Philosophy research in social sciences. (K1, K2, K3, K4, K5, K6)  
(Chapter 8 and 9)

### **Unit V: Experimental method and Case study**

Meaning and definition of experiment – the basic assumptions behind the experiment – Types of variables – Classification of experiment or experimental procedures – definition of case study – Types of Case study – Case study of group. (K1, K2, K3, K4, K5, K6)  
(Chapter 9 and 10)

**SEMESTER – IV**  
**PCMAM20 -FUNCTIONAL ANALYSIS**

<b>Year:II</b> <b>SEM: IV</b>	<b>Course Code :</b> PCMAM20	<b>Title of the Course:</b> Functional Analysis	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>CREDITS</b> 5	<b>MARKS</b> 100
----------------------------------	---------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the main structure theorems of functional analysis and to study the concepts of Banach and Hilbert spaces.
2. To instigate the concept of Banach algebra and the structure of commutative Banach algebra.

**Course Outcomes (CO)**

The Learners will be able to

1. Gain the knowledge of complete normed linear space and the Hahn Banach theorem.
2. Understand the open mapping theorem, closed graph theorem, and uniform boundedness theorem and determine the concept of complete inner product space and its properties.
3. Classify the operators into adjoint, self-adjoint, unitary and normal.
4. Know the basic properties of Banach Algebra and the spectrum of an element in a Banach algebra.
5. Represent commutative Banach algebras as algebras of continuous functions.

## Course Syllabus

### Unit I: Banach Spaces

(18 Hours)

- 1.1 The Definition (K1,K2,K3,K4,K5,K6)
  - 1.2 Some examples (K1,K2,K3,K4,K5,K6)
  - 1.3 Continuous Linear Transformations (K1,K2,K3,K4,K5,K6)
  - 1.4 The Hahn Banach theorem (K1,K2,K3,K4,K5,K6)
  - 1.5 The Natural imbedding of  $N$  in  $N^{**}$  (K1,K2,K3,K4,K5,K6)
  - 1.6 The Natural imbedding of  $N$  in  $N^{**}$  (continued) (K1,K2,K3,K4,K5,K6)
- (Chapter 9: Sections 46 - 49)

### Unit II: Banach Spaces and Hilbert Spaces

(18 Hours)

- 2.1 The Open Mapping Theorem (K1,K2,K3,K4,K5,K6)
  - 2.2 The Conjugate of an Operator (K1,K2,K3,K4,K5,K6)
  - 2.3 Definition of Hilbert Space (K1,K2,K3,K4,K5,K6)
  - 2.4 Some simple properties (K1,K2,K3,K4,K5,K6)
  - 2.5 Orthogonal complements (K1,K2,K3,K4,K5,K6)
  - 2.6 Orthonormal Sets (K1,K2,K3,K4,K5,K6)
- (Chapter 9: Sections 50 and 51 and Chapter 10: Sections 52-54)

### Unit III: Hilbert Spaces

(18 Hours)

- 3.1 The Conjugate spaces  $H^*$  (K1,K2,K3,K4,K5,K6)
  - 3.2 The Adjoint of an operator (K1,K2,K3,K4,K5,K6)
  - 3.3 Self adjoint operators (K1,K2,K3,K4,K5,K6)
  - 3.4 Normal operator (K1,K2,K3,K4,K5,K6)
  - 3.5 Unitary operator (K1,K2,K3,K4,K5,K6)
  - 3.6 Projections (K1,K2,K3,K4,K5,K6)
- (Chapter 10: Sections 55-59)

### Unit IV: Banach Algebras

(18 Hours)

- 4.1 The definition and some examples (K1,K2,K3,K4,K5,K6)
  - 4.2 Regular and singular elements (K1,K2,K3,K4,K5,K6)
  - 4.3 Topological divisors of zero (K1,K2,K3,K4,K5,K6)
  - 4.4 The spectrum (K1,K2,K3,K4,K5,K6)
  - 4.5 The formula for the spectral radius (K1,K2,K3,K4,K5,K6)
  - 4.6 The radical and semi-simplicity (K1,K2,K3,K4,K5,K6)
- (Chapter 12: Sections 64-69)

### Unit V: The Structure of Commutative Banach Algebras

(18 Hours)

- 5.1 The Gelfand Mapping (K1,K2,K3,K4,K5,K6)
- 5.2 The Gelfand Mapping (continued) (K1,K2,K3,K4,K5,K6)
- 5.3 Applications of the formula  $r(x) = \lim_{n \rightarrow \infty} \|x^n\|^{\frac{1}{n}}$  (K1,K2,K3,K4,K5,K6)
- 5.4 Applications of the formula  $r(x) = \lim_{n \rightarrow \infty} \|x^n\|^{\frac{1}{n}}$  (continued) (K1,K2,K3,K4,K5,K6)

- 5.5 Involutions in Banach Algebras (K1,K2,K3,K4,K5,K6)  
5.6 The Gelfand Neumark theorem (K1,K2,K3,K4,K5,K6)  
(Chapter 13: Sections 70-73)

**SEMESTER – IV**  
**PCMAN20 – CALCULUS OF VARIATIONS**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: IV</b>	PCMAN20	Calculus of Variations	Theory	Core	6	5	100

**Course Objectives**

1. To find the maxima and minima of functions.
2. To develop an understanding of variational problems with fixed boundaries and moving boundaries.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the functional and its applications. Also use the Euler-Lagrange equation to find the differential equations for stationary paths.
2. Describe Du Bois-Reymond problem and solve it.
3. Solve differential equations for stationary paths subject to boundary conditions
4. Give an account of the foundations of calculus of variations and its applications in Mathematics and Physics.
5. Apply direct methods to solve variational problems.

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	H	H	M	L
CO2	H	M	H	H	M	L
CO3	H	M	H	H	M	L
CO4	H	M	H	H	M	L
CO5	H	M	H	H	M	L

(L-Low, M-Moderate, H-High)

CO4	H	H	H	M	L	M
CO5	H	H	H	M	L	M

(L-Low, M-Moderate, H-High)

**Course Syllabus**

**Unit I: Variational Problems with Fixed Boundaries**

**(18 Hours)**

- 1.1 The Concept of Variation and Its Properties.(K1,K2,K3,K4,K5,K6)
- 1.2 Euler's Equation.(K1,K2,,K3,K4,K5,K6)

- 1.3 Variational Problems for Functionals of the Form  $\int_a^b F(x, y_1(x), y_2(x), \dots, y_1'(x), y_1''(x), \dots, y_n'(x)) dx$  (K1,K2,K3,K4,K5,K6)
- 1.4 Functionals Dependent On Higher-Order Derivatives.(K1,K2,K3,K4,K5,K6)
- 1.5 Functionals Dependent on Functions of Several Independent Variables. (K1,K2,K3,K4,K5,K6)
- 1.6 Variational Problems in Parametric Form.(K1,K2,K3,K4,K5,K6)  
(Chapter 1: Sections 1.1-1.6)

**Unit II: Variational Problems with Fixed Boundaries (Continued) (18 Hours)**

- 2.1 Some Applications to Problems of Mechanics.(K1,K2,K3,K4,K5,K6)
- 2.2 Variational Problems Leading to an Integral Equation or a Differential-Difference Equation. (K1,K2,K3,K4,K5,K6)
- 2.3 Theorem of du Bois-Reymond. (K1,K2,K3,K4,K5,K6)
- 2.4 Stochastic Calculus of Variations. (K1,K2,K3,K4,K5,K6)
- 2.5 Supplementary Remarks. (K1,K2,K3,K4,K5,K6)
- 2.6 Problems. (K1,K2,K3,K4,K5,K5)  
(Chapter 1: Sections 1.7-1.11)

**Unit III: Variational Problems with Moving Boundaries (18 Hours)**

- 3.1 Functional of the form  $I [y(x)] = \int_{x_1}^{x_2} F(x, y, y') dx$ . (K1,K2,K3,K4,K5,K6)
- 3.2 Variational Problem with a Movable Boundary for a Functional Dependent on Two Functions. (K1,K2,K3,K4,K5,K6)
- 3.3 One-Sided Variations.(K1,K2,K3,K4,K5,K6)
- 3.4 Reflection and Refraction of Extremals. (K1,K2,K3,K4,K5,K6)
- 3.5 Diffraction of Light Rays.(K1,K2,,K3,K4,K5,K6)
- 3.6 Problems. (K1,K2,K3,K4,K5,K6)  
(Chapter 2: Sections 2.1-2.5)

**Unit IV: Sufficient Conditions for an Extremum (18 Hours)**

- 4.1 Field of Extremals. (K1,K2,K3,K4,K5,K6)
- 4.2 Jacobi Condition. (K1,K2,K3,K4,K5,K6)
- 4.3 Weirstrass Function. (K1,K2,K3,K4,K5,K6)
- 4.4 Legendre Condition. (K1,K2,K3,K4,K5,K6)
- 4.5 Second Variation. (K1,K2,K3,K4,K5,K6)
- 4.6 Canonical Equations and Variational Principles. (K1,K2,K3,K4,K5,K6)  
(Chapter 3: Sections 3.1-3.6)

**Unit V: Sufficient Conditions for an Extremum (Continued) (18 Hours)**

- 5.1 Complementary Variational Principles.(K1,K2,,K3,K4,K5,K6)
- 5.2 Poisson Bracket .(K1,K2,,K3,K4,K5,K6)
- 5.3 Contact Transformations.(K1,K2,,K3,K4,K5,K6)
- 5.4 The Hamilton-Jacobi Equation.(K1,K2,,K3,K4,K5,K6)
- 5.5 Clairaut's Theorem.(K1,K2,,K3,K4,K5,K6)
- 5.6 Noether's Theorem.(K1,K2,,K3,K4,K5,K6)  
(Chapter 3: Sections 3.7 – 3.12)

**SEMESTER – IV**  
**PCMAO20 - MATHEMATICAL STATISTICS**

<b>Year : II</b>	<b>Course Code :</b>	<b>Title Of The Course :</b>	<b>Course Type :</b>	<b>Course Category :</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM : IV</b>	PCMAO20	Mathematical Statistics	Theory	: Core	6	5	100

**Course Objectives**

1. To know about Statistics, its scope and importance in various areas such as Medical, Engineering, Agricultural etc.
2. To apply problem solving technique to solve real world event and acquire knowledge about hypothesis testing and the significance test.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the sample moments and their functions and analyze chi-square, Student-t, Fishers-Z distributions.
2. Demonstrate the knowledge of the properties of parametric testing procedures.
3. Construct tests and estimators, and derive their properties. Estimate population parameters from data sets and use the sampling distributions to compute confidence intervals for these population parameters.
4. Learn the basic components of hypothesis testing and perform hypothesis test on population means.
5. Understand the basic terms used in design of experiments and use appropriate experimental designs to analyze the experimental data.

CO	PSO

CO5	H	H	H	H	M	H

(L-Low, M-Moderate, H-High)

## Course Syllabus

### Unit I: Sample moments and their functions (18 Hours)

- 1.1 The notion of a sample (K1,K2,K3,K4,K5,K6)
- 1.2 The notion of a statistic (K1,K2,K3,K4,K5,K6)
- 1.3 The distribution of the arithmetic mean of independent normally distributed random variables(K1,K2,K3,K4,K5,K6)
- 1.4 The chi-square distribution (K1,K2,K3,K4,K5,K6)
- 1.5 The distribution of the statistic (K1,K2,K3,K4,K5,K6)
- 1.6 Student's t-distribution –Fisher's Z-distribution (K1,K2,K3,K4,K5,K6)  
(Chapter 9: Sections 9.1 to 9.7)

### Unit II: Significance Test (18 Hours)

- 2.1 The concept of a statistical test (K1,K2,K3,K4,K5,K6)
- 2.2 Parametric test for small samples (K1,K2,K3,K4,K5,K6)
- 2.3 Parametric tests for large samples (K1,K2,K3,K4,K5,K6)
- 2.3 Examples based on Small and large samples(K1,K2,K3,K4,K5,K6)
- 2.5 The chi – square test (K1,K2,K3,K4,K5,K6)
- 2.6 Independence tests by contingency tables. (K1,K2,K3,K4,K5,K6)  
(Chapter 12: Sections 12.1 to 12.4 and 12.7)

### Unit III: Theory of Estimation (18 Hours)

- 3.1 Preliminary notions (K1,K2,K3,K4,K5,K6)
- 3.2 Consistent estimate (K1,K2,K3,K4,K5,K6)
- 3.2 Unbiased estimate (K1,K2,K3,K4,K5,K6)
- 3.4 Sufficiency – efficiency (K1,K2,K3,K4,K5,K6)
- 3.5 Asymptotically most efficient estimate.(K1,K2,K3,K4,K5,K6)
- 3.6 Methods of finding estimates. (K1,K2,K3,K4,K5,K6)  
(Chapter 13: Sections 13.1 to 13.7)

### Unit IV: Theory of Hypotheses testing (18 Hours)

- 4.1 Preliminary remarks (K1,K2,K3,K4,K5,K6)
- 4.2 The Power function and the OC. (K1,K2,K3,K4,K5,K6)
- 4.3 Most Powerful tests (K1,K2,K3,K4,K5,K6)
- 4.4 Uniformly most powerful test (K1,K2,K3,K4,K5,K6)
- 4.5 Unbiased tests (K1,K2,K3,K4,K5,K6)
- 4.6 The power and consistency of nonparametric test. (K1,K2,K3,K4,K5,K6)  
(Chapter 16: 16.1 to 16.6)

### Unit V: Design of Experiments (18 Hours)

- 5.1 Aim of the Design of experiments. (K1,K2,K3,K4,K5,K6)
- 5.2 Basic Principles of Experimental Design.(K1,K2,K3,K4,K5,K6)
- 5.3 Some Basic Designs of Experiment. (K1,K2,K3,K4,K5,K6)
- 5.4 Analysis of variance (K1,K2,K3,K4,K5,K6)

- 5.5 Comparison of RBD and LSD. (K1,K2,K3,K4,K5,K6)  
5.6 Examples based on analysis of variance (K1,K2,K3,K4,K5,K6)  
(Chapter 10: 10.1 to 10.11)

**SEMESTER – IV**  
**PCMAP20 - PROJECT**

<b>Year: II</b>	<b>Course Code:</b>	<b>Title of the Course:</b>	<b>Course Type:</b>	<b>Course Category:</b>	<b>H/W</b>	<b>CREDITS</b>	<b>MARKS</b>
<b>SEM: IV</b>	PCMAP20	Project	-	-	6	4	100

It should be done individually under the guidance of one of the Faculty members. The Dissertation should be submitted before 31<sup>st</sup> March. The students should present their research work during the viva-voce.

**SEMESTER – IV**  
**PEMAI20 - ELECTIVE IV A: GRAPH THEORY**

<b>Year : II</b> <b>SEM : IV</b>	<b>Course Code :</b> PEMAI20	<b>Title Of The Course :</b> Elective IV A:Graph Theory	<b>Course Type :</b> Theory	<b>Course Category :</b> Elective	<b>H/W</b> 6	<b>CREDITS</b> 4	<b>MARKS</b> 100
-------------------------------------	---------------------------------	--	--------------------------------	--------------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the fundamental concepts of graph theory
2. To understand the concepts of graph theory and apply it in practical situations.

**Course Outcomes (CO)**

The Learners will be able to

1. Identify subgraphs, cycles, paths and connection in graphs.
2. Analyse the cut vertices, cut edges and bonds in trees.
3. Distinguish between the Hamiltonian and Eulerian graph.
4. Explain the concepts of matchings and coverings in bipartite graphs.
5. Understand the concepts of colouring and planar graphs.

## Course Syllabus

### **Unit I: Graphs and Subgraphs (18 Hours)**

- 1.1 Graphs and Simple Graphs (K1, K2, K3, K4, K5, K6)
  - 1.2 Graph Isomorphism (K1, K2, K3, K4, K5, K6)
  - 1.3 Incidence and adjacency Matrices (K1, K2, K3, K4, K5, K6)
  - 1.4 Subgraphs - Vertex degrees (K1, K2, K3, K4, K5, K6)
  - 1.5 Paths and connection - Cycles (K1, K2, K3, K4, K5, K6)
  - 1.6 The shortest path problem. (K1, K2, K3, K4, K5, K6)
- (Chapter1: Sections 1.1 – 1.8)

### **Unit II: Trees and Connectivity (18 Hours)**

- 2.1 Trees (K1, K2, K3, K4, K5, K6)
  - 2.2 Cut Edges and Bonds (K1, K2, K3, K4, K5, K6)
  - 2.3 Cut Vertices (K1, K2, K3, K4, K5, K6)
  - 2.4 Cayley's Formula (K1, K2, K3, K4, K5, K6)
  - 2.5 Connectivity (K1, K2, K3, K4, K5, K6)
  - 2.6 Blocks (K1, K2, K3, K4, K5, K6)
- (Chapter2: Sections 2.1 - 2.5 and Chapter3: Sections 3.1- 3.2)

### **Unit III: Euler Tours and Hamilton Cycles (18 Hours)**

- 3.1 Euler Tours (K1, K2, K3, K4, K5, K6)
  - 3.2 Theorems on Euler Tours (K1, K2, K3, K4, K5, K6)
  - 3.3 Hamilton Cycles (K1, K2, K3, K4, K5, K6)
  - 3.4 Theorems on Hamilton Cycles (K1, K2, K3, K4, K5, K6)
  - 3.5 The Chinese postman problem (K1, K2, K3, K4, K5, K6)
  - 3.6 The travelling salesman problem (K1, K2, K3, K4, K5, K6)
- (Chapter 4: Sections 4.1 - 4.4)

### **Unit IV: Matchings, Independent sets and Cliques (18 Hours)**

- 4.1 Matchings (K1, K2, K3, K4, K5, K6)
  - 4.2 Theorems on Matchings. (K1, K2, K3, K4, K5, K6)
  - 4.3 Coverings in bipartite graphs (K1, K2, K3, K4, K5, K6)
  - 4.4 Perfect matching (K1, K2, K3, K4, K5, K6)
  - 4.5 The personnel problem (K1, K2, K3, K4, K5, K6)
  - 4.6 Independent Sets (K1, K2, K3, K4, K5, K6)
- (Chapter5: Sections 5.1 - 5.4 and Chapter7: Section7.1)

### **Unit V: Vertex colouring and Planar graphs (18 Hours)**

- 5.1 Chromatic Number- Brook's theorem (K1, K2, K3, K4, K5, K6)
- 5.2 Chromatic Polynomials (K1, K2, K3, K4, K5, K6)
- 5.3 Plane and planar graphs (K1, K2, K3, K4, K5, K6)
- 5.4 Dual graphs (K1, K2, K3, K4, K5, K6)

5.5 Euler's formula (K1, K2, K3, K4, K5, K6)

5.6 The Five Colour theorem and the Four-Colour Conjecture (K1, K2, K3, K4, K5, K6)  
(Chapter 8: Section 8.1, 8.2 and 8.4, Chapter 9: Sections 9.1 - 9.3 and 9.6)

**Books for study and reference:**

**Text Book:**

**SEMESTER – IV**  
**PEMAJ20 –ELECTIVE IV B: FUZZY SET THEORY**

Year :II SEM : IV	Course Code : PEMAJ20	Title Of The Course : Elective IV B:Fuzzy Set Theory	Course Type : Theory	Course Category : Elective	H/W 6	CREDITS 4	MARKS 100
----------------------	--------------------------	--	-------------------------	-------------------------------	----------	--------------	--------------

**Course Objectives**

1. To develop a research approach that can deal with problems relating to ambiguous situations.
2. To make use of a special fuzzy set to model reality better than traditional theories.

**Course Outcomes (CO)**

The Learners will be able to

1. Distinguish between crisp set and fuzzy set through bi-valued logic and infinite-valued logic.
2. Know about the most widely used standard fuzzy set operations.
3. Formulate the fuzzy number which is a special case of a convex, normalized fuzzy set of the real line.
4. Explore the fuzzy relation and its operations which is the generalization of crisp relation.
5. Analyze the methods of decision making in fuzzy environment and their applications in LPP.

## Course Syllabus

### Unit I: Crisp Sets and Fuzzy Sets (18 Hours)

- 1.1 Crisp sets: An Overview (K1,K2,K3,K4,K5,K6)
  - 1.2 Fuzzy sets: Basic Types (K1,K2,K3,K4,K5,K6)
  - 1.3 Fuzzy sets: Basic Concepts (K1,K2,K3,K4,K5,K6)
  - 1.4 Additional properties of alpha cuts (K1,K2,K3,K4,K5,K6)
  - 1.5 Representations of fuzzy sets (K1,K2,K3,K4,K5,K6)
  - 1.6 Extension Principle for fuzzy sets (K1,K2,K3,K4,K5,K6)
- (Chapter 1: 1.2-1.4 and Chapter 2: 2.1-2.3)

### Unit II: Operations on Fuzzy Sets (18 Hours)

- 2.1 Types of operations (K1,K2,K3,K4,K5,K6)
  - 2.2 Fuzzy Complements (K1,K2,K3,K4,K5,K6)
  - 2.3 Fuzzy Intersection: t-Norms (K1,K2,K3,K4,K5,K6)
  - 2.4 Fuzzy Union: t-Conorms (K1,K2,K3,K4,K5,K6)
  - 2.5 Combinations of operations (K1,K2,K3,K4,K5,K6)
  - 2.6 Aggregation Operations (K1,K2,K3,K4,K5,K6)
- (Chapter 3: 3.1-3.6)

### Unit III: Fuzzy Arithmetic (18 Hours)

- 3.1 Fuzzy numbers(K1,K2,K3,K4,K5,K6)
  - 3.2 Linguistic variables (K1,K2,K3,K4,K5,K6)
  - 3.3 Arithmetic operations on intervals (K1,K2,K3,K4,K5,K6)
  - 3.4 Arithmetic operations on fuzzy numbers (K1,K2,K3,K4,K5,K6)
  - 3.5 Lattice of fuzzy numbers (K1,K2,K3,K4,K5,K6)
  - 3.6 Fuzzy equations (K1,K2,K3,K4,K5,K6)
- (Chapter 4: 4.1-4.6)

### Unit IV: Fuzzy Relations (18 Hours)

- 4.1 Crisp versus Fuzzy Relations (K1,K2,K3,K4,K5,K6)
  - 4.2 Projections and Cylindric extensions (K1,K2,K3,K4,K5,K6)
  - 4.3 Binary fuzzy relations. (K1,K2,K3,K4,K5,K6)
  - 4.4 Binary relations on a single set (K1,K2,K3,K4,K5,K6)
  - 4.5 Fuzzy equivalence relations (K1,K2,K3,K4,K5,K6)
  - 4.6 Fuzzy compatibility relations, Fuzzy ordering relations (K1,K2,K3,K4,K5,K6)
- (Chapter 5: 5.1 - 5.7)

### Unit V: Fuzzy Decision Making (18 Hours)

- 5.1 Individual Decision Making (K1,K2,K3,K4,K5,K6)
- 5.2 Multi-person Decision Making (K1,K2,K3,K4,K5,K6)
- 5.3 Multi criteria Decision Making (K1,K2,K3,K4,K5,K6)
- 5.4 Multi-stage Decision Making (K1,K2,K3,K4,K5,K6)

5.5 Fuzzy Ranking Methods (K1,K2,K3,K4,K5,K6)  
5.6 Fuzzy linear programming (K1,K2,K3,K4,K5,K6)  
(Chapter 15: 15.2-15.7)

**SEMESTER – IV**  
**PIMAG20 - INDEPENDENT ELECTIVE 4 A: SKILL ENHANCEMENT IN REAL**  
**AND COMPLEX ANALYSIS – II**

<b>Year: II</b> <b>SEM:IV</b>	<b>Course Code:</b> PIMAG20	<b>Title of the Course:</b> Independent Elective 4 A: Skill Enhancement in Real and Complex Analysis – II	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To develop the in-depth knowledge in real and complex analysis problem solving skills.
2. To enhance the knowledge of the students to workout unsolved problems using various tricks and to encourage them to clear CSIR NET, SET, JRF and GATE examinations.

**Course Outcomes (CO)**

The Learners will be able to

1. Analyze the theory of Partial derivatives.
2. Compute Riemann Sum and Riemann integral.
3. Evaluate the concepts of Lebesgue measure and Lebesgue integral.
4. Identify the Connectedness and Compactness.
5. Calculate the Residues of functions and improve the knowledge of conformal mappings

CO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	L	M
CO2	H	H	M	H	L	M
CO3	H	H	M	H	L	M
CO4	H	H	M	H	H	M
CO5	H	H	M	H	H	M

(L-Low, M-Moderate, H-High)

CO4	H	H	H	M	L	H
CO5	H	H	H	M	L	H

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Functions of Several Variables**

Functions of Several Variables – Directional Derivative – Partial Derivative – Derivative as a Linear Transformation. (K1,K2,K3,K4,K5,K6)  
(Chapter 4: 4.1- 4.4)

### **Unit II: The Riemann Integral and Improper Integral**

Riemann Sum and Riemann Integral - Improper Integral – Sequences and Series of Function-Uniform Convergence. (K1,K2,K3,K4,K5,K6)  
(Chapter 5: 5.1-5.2)

### **Unit III: Function of Bounded Variation, Lebesgue Measure and Metric Space**

Function of Bounded Variation – Lebesgue Measure – Lebesgue Integral – Metric Space – Connectedness – Compactness – Normal Linear Space.(K1,K2,K3,K4,K5,K6)  
(Chapter 7: 7.1-7.6)

### **Unit IV: Complex Integration and Calculus of Residues**

Schwartz Lemma – Open Mapping Theorem – Taylor Series – Laurents Theorem Calculus of Residues.(K1,K2,K3,K4,K5,K6)  
(Chapter 12: 12.5-12.7)

### **Unit V: Conformal Mapping**

Conformal Mapping – Mobious Transformation. (K1,K2,K3,K4,K5,K6)  
(Chapter 13: 13.1-13.2)

### **Books for study and reference:**

**SEMESTER – IV**  
**PIMAH20 - INDEPENDENT ELECTIVE 4 B: FUNDAMENTALS OF RESEARCH**  
**METHODOLOGY AND STATISTICS – I**

<b>Year: II</b> <b>SEM:IV</b>	<b>Course Code:</b> PIMAH20	<b>Title of the Course:</b> Independent Elective 4 B: Fundamentals of Research Methodology and Statistics - II	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>CREDITS</b> 2	<b>MARKS</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

**Course Objectives**

1. To provide a clear understanding of basic concepts of the research methodology.
2. To plan the Questionnaire in research and survive works.

**Course Outcomes (CO)**

The Learners will be able to

1. Analyze the needs and purpose of Experimental design.
2. Prepare and Analyze the Questionnaire and compute the Statistical analysis of data.
3. Analyze the statistical data and research report.
4. Acquire the knowledge of Action research and Educational research.
5. Understand the basic measures of variability, dispersion and correlation.

(L-Low, M-Moderate, H-High)

## **Course Syllabus**

### **Unit I: Genetic method and Design of Experiments**

Meaning of Genetic Research – Types of Genetic research – Problems of Genetic research– Diagnosis and Prognosis– Needs and Purpose of Experimental design– Types of basic experimental design. (K1,K2,K3,K4,K5,K6)  
(Chapter 11 and 12)

### **Unit II: Tools of Research and collection of Data**

Questionnaire – Preparing and administering the questionnaire – Characteristics of a Good questionnaire – Characteristic of a Good schedule – Need for data collection – Difference between facts and data – Characteristics of quantitative data.(K1,K2,K3,K4,K5,K6)  
(Chapter 13 and 14)

### **Unit III: Analysis of data and Research report**

Need for analysis of data or Treatment of data – Statistical analysis of data – Planning for data analysis – Level of significance – The research report – General format of research report.(K1,K2,K3,K4,K5,K6)  
(Chapter 15 and 16)

### **Unit IV: Action Research and Presentation of Statistical data**

Meaning of Action Research – Objective of educational research – Types of education research – Steps of research – Method of organizing and presenting data - The graphical presenting of ungrouped data. (K1,K2,K3,K4,K5,K6)  
(Chapter 17 and 18)

### **Unit V: Measurement of central Tendency and measures of variability**

Arithmetic Mean – Median – Mode – Different measures of variability of dispersion – Standard deviation – Correlation. (K1,K2,K3,K4,K5,K6)  
(Chapter 19 and 20)

### **Books for study and reference:**

**PCBAD20- STATISTICAL METHODS FOR RESEARCH**

<b>Year:</b> I <b>SEM:</b> I	<b>Course Code:</b>  PCBAD20	<b>Title Of The Course :</b> Statistical Methods for Research	<b>Course Type:</b> Theory	<b>Course Category:</b> Allied	<b>H/W</b> 6	<b>Credits</b> 3	<b>Marks</b> 100
---------------------------------------	------------------------------------	--	-------------------------------	-----------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To introduce the basic concepts of research in business.
2. To make decisions based on scientific methods.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the basic concepts in statistics.
2. Solve different statistical concepts related to management.
3. Acquire wide knowledge of different statistical analysis.
4. Understand and apply different ethics in business research.
5. Get a basic knowledge about data collection and report writing.

## Course Syllabus

### Unit I: Introduction and Ethics in Business Research

(18 Hours)

- 1.1 Business Research – Definition and Significance (K1, K2,K3, K4,K5,K6)
- 1.2 Ethics in Research- Ethical Behavior of Research- Subjectivity and Objectivity in Research (K1, K2,K3, K4,K5,K6)
- 1.3 Research Process- Types of Research (K1, K2,K3, K4,K5,K6)
- 1.4 Research Design- Definition – Types of Research Design(K1, K2,K3, K4,K5,K6)
- 1.5 Validity of Findings- Variables in Research- Measurement and Scaling (K1, K2,K3, K4,K5,K6)
- 1.6 Different Scales-Construction of Instruments- Validity and Reliability of Instruments(K1, K2,K3, K4,K5,K6)

### Unit II: Data Collection and Report Writing

(18 Hours)

- 2.1 Types of Data- Primary and Secondary Data- Methods of Data Collection (K1, K2,K3, K4,K5,K6)
- 2.2 Sampling Plan – Sampling Size – Sampling Techniques and Methods (K1, K2,K3, K4,K5,K6)
- 2.3 Data Preparation- Validity of Data –Qualitative Vs Quantitative Data Analysis (K1, K2,K3, K4,K5,K6)
- 2.4 Bivariate and Multivariate Statistical Techniques - Factor Analysis- Discriminant Analysis – Cluster Analysis (K1, K2,K3, K4,K5,K6)
- 2.5 Multidimensional Scaling- Application of Statistical Software for Data Analysis ( K1,K2, K3, K4,K5,K6)
- 2.6 Research report – Different types – Contents of reports – need of executive summary – Chapterization – contents of chapter – report writing(K1, K2,K3, K4,K5,K6)

### Unit III: Statistics- Sampling Distribution and Testing of Hypothesis

(18 Hours)

- 3.1 Statistics- Definition- Sampling Distributions, Mean, Median, Mode (K1, K2,K3, K4,K5,K6)
- 3.2 Standard Deviation and Proportion(K1, K2,K3, K4,K5,K6)
- 3.3 Sampling Techniques- Hypothesis Testing : Single Sample and Double Sample Test for Means and Proportions of Large Samples (Z- Test) ( K1,K2, K3, K4, K5, K6)
- 3.4 Single Sample and Double Sample Tests for Means of Small (T- Test) ( K1,K2, K3, K4, K5,K6)
- 3.5 F-Test for Two Sample Standard Deviation ( K1,K2, K3, K4, K5, K6)
- 3.6 ANOVA One and Two Way – Design of Experiments( K1,K2, K3, K4, K5, K6)

### Unit IV: Non Parametric Methods, Correlation and Regression Analysis

(18 Hours)

- 4.1 Chi- Square Tests – Sign Test for Paried Data ( K1,K2, K3, K4, K5, K6)
- 4.2 Rank Sum Test ( K1,K2, K3, K4, K5, K6)
- 4.3 Mann-Whitney U Test and Kruskal Wallis Test ( K1,K2, K3, K4, K5, K6)
- 4.4 One Sample Run Test ( K1,K2, K3, K4, K5, K6)
- 4.5 Rank Correlation- Correlation Analysis ( K1,K2, K3, K4, K5, K6)

4.6 Estimation of Regression Line. ( K1,K2, K3, K4, K5, K6)

### **Unit V: Time Series Analysis**

**(18 Hours)**

5.1 Time Series Analysis – Introduction (K1, K2,K3, K4,K5,K6)

5.2 Variation in Time Series( K1,K2, K3, K4, K5, K6)

5.3 Trend Analysis( K1,K2, K3, K4, K5, K6)

5.4 Cyclical Variations( K1,K2, K3, K4, K5, K6)

5.5 Seasonal Variations ( K1,K2, K3, K4, K5, K6)

5.6 Irregular Variations( K1,K2, K3, K4, K5, K6)

**Course Objectives**

1. To learn and understand the methodical approach of solving problem in the field of industries, marketing, finance and so on
2. To create awareness about optimization in utilization of resources.

**Course Outcomes (CO)**

The Learners will be able to

1. Understand the basic Operation Research concepts related to management.
2. Analyse the real life situation using Transportation and Assignment problems.
3. Acquire wide knowledge in Game Theory and replacement models that are used in management.
4. Solve any practical issues using Queuing Theory and decision making.
5. Impart the knowledge in Network Analysis that are used in Management.

## Course Syllabus

### **Unit I: Introduction to Linear Programming (18 Hours)**

- 1.1 Introduction to applications of OR in functional areas of management (K1,K2, K3, K4,K5,K6)
- 1.2 Linear Programming – formulation( K1,K2, K3, K4,K5,K6)
- 1.3 Solution by graphical Method ( K1,K2, K3, K4,K5,K6)
- 1.4 Solution by Simplex method ( K1,K2, K3, K4,K5,K6)
- 1.5 Artificial variable techniques (Big M method only) ( K1,K2, K3, K4,K5,K6)
- 1.6 Dual simplex method ( K1,K2, K3, K4,K5,K6)

### **Unit II: Linear Programming Extensions (18 Hours)**

- 2.1 Transportation Models (Minimizing and Maximizing cases) – Balanced and unbalanced cases( K1,K2, K3, K4,K5,K6)
- 2.2 Initial Basic feasible solution by N-W Corner Rule, Least cost Method ( K1,K2, K3, K4,K5,K6)
- 2.3 Vogel's approximation methods ( K1,K2, K3, K4,K5,K6)
- 2.4 Check for optimality, solution by MODI / stepping stone method( K1,K2, K3, K4,K5,K6)
- 2.5 Causes of degeneracy ( K1, K2, K3, K4, K5, K6)
- 2.6 Assignment Models (Minimizing and Maximizing Cases) – Balanced and Unbalanced cases, solution by Hungarian( K1,K2, K3, K4,K5,K6)

### **Unit III: Game Theory and Replacement Models (18 Hours)**

- 3.1 Game Theory – Two person Zero sum games – Saddle point ( K1,K2, K3, K4,K5,K6)
- 3.2 Dominance Properties ( K1,K2, K3, K4,K5,K6)
- 3.3 Matrix Methods ( K1,K2, K3, K4,K5,K6)
- 3.4 Graphical Method ( K1,K2, K3, K4,K5,K6)
- 3.5 LPP Solutions ( K1,K2, K3, K4,K5,K6)
- 3.6 Replacement models- Individuals replacement models (With and without time value of money) ( K1,K2, K3, K4,K5,K6)

### **Unit IV: Queuing Theory, Decision Theory and Decision Trees (18 Hours)**

- 4.1 Queuing Theory – introduction ( K1, K2, K3, K4, K5, K6)
- 4.2 Single and multi channel models I single server system( K1,K2, K3, K4,K5,K6)
- 4.3 Decision making under risk (Expected value criterion, Expected value combined with variance criterion) ( K1,K2, K3, K4,K5,K6)
- 4.4 Decision making under risk( EMV, EOL models) ( K1,K2, K3, K4,K5,K6)
- 4.5 Decision trees ( K1,K2, K3, K4,K5,K6)
- 4.6 Decision making under uncertainty( K1,K2, K3, K4,K5,K6)

### **Unit V: Network analysis: CPM and PERT Computations(18 Hours)**

- 5.1 CPM-construction( K1,K2, K3, K4,K5,K6)
- 5.2 Different time calculation ( K1,K2, K3, K4,K5,K6)
- 5.3 Calculation of critical path and project duration ( K1,K2, K3, K4,K5,K6)

5.4 PERT ( K1, K2, K3, K4, K5, K6)

5.5 Difference between CPM and PERT ( K1,K2, K3, K4,K5,K6)

5.6 Probability of meeting the scheduled dates( K1,K2, K3, K4,K5,K6)

Note: 80% problems and 20% Theory

## ASSESSMENT METHODS

### 1. For Core Papers /Elective Papers/ Independent Elective Papers 3 B and 4 B

#### Semester Examination

**Total: 100 Marks**

**Time: 3 Hours**

#### **Section A (10 x 2 Marks = 20 Marks)**

Answer **ALL** the following

10 Questions (2 Questions from each Unit)

#### **Section B (5 x 7 Marks = 35 Marks)**

Answer **ALL** the following

5 Questions with Internal Choice (1 Question from each Unit)

#### **Section C (3 x 15 Marks = 45 Marks)**

Answer any **THREE** of the following

3 Questions out of 5 Questions (1 Question from each Unit)

#### CA Examination

**Total: 50 Marks**

**Time: 1 Hour 30 Minutes**

#### **Section A (7 x 2 Marks = 14 Marks)**

Answer **ALL** the following

7 Questions

#### **Section B (3 x 7 Marks = 21 Marks)**

Answer any **THREE** of the following

3 Questions out of 5 Questions

#### **Section C (1 x 15 M = 15 marks)**

Answer any **ONE** of the following

1 Question out of 2 Questions (1 Question from each Unit)

## 2. For Elective Practical: JAVA and R

PEMAF20	Elective Practical : Java
PEMAH20	Elective Practical : R

### External Assessment

**Total: 60 Marks**

**Time: 3 Hours**

Record – 10Marks

Viva – 5 Marks

Semester Practical – 45Marks

### Internal Assessment

**Total: 40 Marks**

**Time: 1 Hour 30 Minutes**

Observation – 10 marks

Perfection – 5 marks

CA Practical – 25 marks

## 3. For Project: PCMAP20

### Assessment of Viva and Content

Content	Presentation	Answering Questions	Total Marks for Viva
10 Marks	5 Marks	5 Marks	<b>20 Marks</b>

External Examiner (for Project)	Internal Examiner (for Project)	Viva	Total
40 Marks	40 Marks	20 Marks	<b>100 Marks</b>

#### 4. For Independent Elective Papers

PIMAA20	Independent Elective 1 A : Fundamentals of Group Theory
PIMAB20	Independent Elective 1 B : Quantitative Aptitude for Competitive Examination- I
PIMAC20	Independent Elective 2 A: Fundamentals of Ring Theory
PIMAD20	Independent Elective 2 B: Quantitative Aptitude for Competitive Examination- II
PIMAE20	Independent Elective 3 A: Skill Enhancement in Real and Complex Analysis – I
PIMAG20	Independent Elective 4 A: Skill Enhancement in Real and Complex Analysis – II

**Semester Examination**  
**Total: 100 Marks**  
**Time: 3 Hours**

**Section A (50 x 2 Marks =100 Marks)**  
Answer **ALL** the following

50 Questions

**CA Examination**  
**Total: 50 Marks**  
**Time: 1 Hour 30 Minutes**

**Section A (25 x 2 Marks =50 Marks)**  
Answer **ALL** the following

25 Questions

---

## **PROGRAMME OUTCOMES (PO)**

**On completion of the M.Phil., Programme, scholars will be able to:**

**PO1:** Develop research aptitude in the respective discipline.

**PO2:** Master the framework of research process.

**PO3:** Acquire technical and writing skills to communicate research findings.

**PO4:** Engage in ethically oriented original research for the benefit of the society.

**PO5:** Design innovative research techniques and find probable solutions to socially relevant research problems.

**PO6:** Commit to life-long learning with the intellectual interest created.

## **PROGRAMME SPECIFIC OUTCOMES (PSO)**

**On completion of the M.Phil., Programme, scholars will be able to:**

**PSO1:** Have the ability to identify potential research areas in Mathematical Sciences.

**PSO2:** Identify, formulate, and review research literature to create new concepts in Mathematics.

**PSO3:** Have the ability to identify unethical behavior in research report writing and develop a skill to bring out plagiarism-free articles for a chosen area of research.

**PSO4:** Acquire presentation skills and effectively communicate research through conference presentations at the National and International level.

**PSO5:** Have the capability to write the research articles using the mathematical softwares and publish it in a reputed journal.

**PSO6:** Have the ability to build up precise skills helpful for employment in the Educational Sectors and engage in lifelong learning to facilitate a progressive career in research.

PSO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
PSO1	H	H	M	M	L	H
PSO2	H	H	M	M	M	H
PSO3	H	H	H	M	M	H
PSO4	H	H	H	M	M	H
PSO5	H	H	H	L	L	H
PSO6	H	H	H	M	L	H

(L-Low (1), M-Moderate (2), H-High (3))

### PROGRAMME OUTCOMES (PO)

**On completion of the Ph.D. Programme, scholars will be able to:**

**PO1:** Acquire expertise in specific areas of study.

**PO2:** Formulate, analyze and apply theories and design methodologies.

**PO3:** Focus on socially relevant research and follow research ethics.

**PO4:** Gain skills to write research and project proposals for grants.

**PO5:** Network and offer consultancy at national and international levels.

**PO6:** Strive to obtain Intellectual Property Rights for inventions and innovations.

### PROGRAMME SPECIFIC OUTCOMES (PSO)

**On completion of the Ph.D. Programme, scholars will be able to:**

**PSO1:** Have a strong knowledge of their specialization area.

**PSO 2:** Have the ability to communicate long-standing unsolved problems in their area of research and provide new solutions using the domain knowledge of Mathematics.

**PSO3:** Develop the skills to design a real life model using the theoretical and computational mathematics to solve social issues following research ethics.

**PSO4:** Have the capability to prepare socially relevant research project proposal in their chosen area of research.

**PSO5:** Effectively communicate research, through Journal publications to the mathematics community at the National and International level.

**PSO6:** Enrich with integrity and ethical values to be a responsible Academician and produce next-generation Researchers in Mathematics.

<b>PSO</b>	<b>PO</b>

# **Department of Physics (PG)**

## **SYLLABUS AND REGULATIONS**

**Under**

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**Department of Physics (PG)**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision**

The vision of the college is to educate young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighbouring districts.

**B) NAME OF THE PROGRAMME: PG PHYSICS**

**Vision**

To empower the young women by offering higher education which promotes interest and thirst for research in the field of Physical sciences.

**Mission**

- To provide quality education through well designed programs
- To impart knowledge in various areas of Physical sciences related to research.
- To undertake research oriented projects.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME:**

**Students who have completed B.Sc., Physics are eligible.**

D) LIST OF COURSES

Sem.	Part	Code	Title of the Paper	Hours/ Week	Exam		Credits	Marks
					Th	Pr		
I		PCPHA20	Mathematical Physics – I	6	3	-	5	40+60

		<b>Total</b>		<b>30</b>			<b>27</b>	<b>700</b>
		<b>Grand Total</b>					<b>101</b>	<b>2700</b>

**E) Program Objectives (POs) (After 3-5 years of graduation)**

**PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.

**PO2:** Assimilate and apply principles and concepts towards skill development and employability.

**PO3:** Apply critical and scientific approaches to address problems and find solutions.

**PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:** Integrate issues of social relevance in the field of study.

**PO6:** Persist in life-long learning for personal and societal progress.

**F) Program Specific Outcomes (PSOs):**

**PSO1:** Attain in depth knowledge on various areas of Physics.

**PSO2:** Understand the various methods in the respective field.

**PSO3:** Inculcate the mathematical concepts for solving problems.

**PSO4:** Gain knowledge about various applications.

**PSO5:** Become Skilled to face competitive examinations.

**PSO6:** Attain interest for higher education and research.

## SEMESTER I

### PCPHA20 – MATHEMATICAL PHYSICS – I

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCPHA20	<b>Title of the Course:</b> Mathematical Physics – I	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To inculcate to the students the mathematical concepts for solving physical problems which arise in many branches of Physics
2. To prepare the students for solving the problems of mathematical physics in competitive examinations

#### Course Outcomes (CO)

The learners will be able to

1. Understand and apply the basic concepts of vectors and vector space.
2. Perceive various types of matrices, solve Eigen value problems and carry out matrix operations.
3. Solve ordinary differential equations that are common in the physical-sciences.
4. Understand the characteristics of special functions to solve the physical problems.
5. Understand and use Dirac-delta function for describing physical systems and apply Green's function to solve partial differential equations.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Vector Analysis

(14 hours)

- 1.1 Vector Field - Orthogonal curvilinear co-ordinates - Expression for gradient, divergence, curl and Laplacian (K1,K2,K3)
- 1.2 Spherical and cylindrical coordinate systems - expression for gradient, divergence, curl and Laplacian(K2,K4, K5)
- 1.3 Stoke's theorem - Simple applications (K2,K3,K4,K5)
- 1.4 Gauss theorem - Simple applications (K2,K3,K4,K5)
- 1.5 Linear vector Space - Linear independence of vectors - Basis and Expansion theorem - Inner product and Unitary vector spaces (K2,K3,K4,K5)
- 1.6 Orthonormal sets - Schwarz inequality - Schmidt's orthogonalization method - Completeness (K2,K3, K4)

### Unit II: Matrix Theory

(14 hours)

- 2.1 Introduction - Matrices - Transpose of a matrix - Conjugate - Conjugate transpose - Symmetric and Skew-symmetric matrices -Hermitian and Skew-Hermitian matrices - Unitary matrices (K1,K2)
- 2.2 Determinant- Co-factors - Minors of a matrix - Singular and non-singular matrices - Adjoint of a matrix - Inverse of a matrix- Orthogonal matrices - Unitary matrices (K2,K3,K4)
- 2.3 Characteristic equation of a matrix - Evaluation of Eigen values and Eigen vectors (K4, K5)
- 2.4 Cayley-Hamilton's theorem - Inverse of a matrix using Cayley Hamilton theorem (K3, K4, K5)
- 2.5 Important theorems on Eigen values and Eigen vectors (K2, K3, K5)
- 2.6 Stochastic matrices - Theorem on Stochastic matrix -Diagonalization of matrices(K2, K3, K4)

### Unit III: Differential Equations

(16 hours)

- 3.1 Differential equations - Order and degree of a differential equation - Solution of first order differential equation by the method of separation of variables (K2, K3, K4, K5)
- 3.2 Solution of Linear differential equation of first order by the method of Integrating factor - Problems (K2, K3, K4, K5)
- 3.3 Solution of first order differential equation reducible to linear form (Bernoulli's equation) - Problems (K2, K3, K4, K5)
- 3.4 Solution of Second order differential equations with constant coefficients - Problems (K2, K3, K4, K5)
- 3.5 Power series solution: Frobenius' method
- 3.6 Linear independence of solutions: Wronskian method – Problems

### Unit IV: Special Functions

(16 hours)

- 4.1 Series solution and Generating function of Bessel function(K2, K3, K5)
- 4.2 Orthonormal properties of Bessel - Evaluation of recurrence relations(K2, K3, K4, K5)
- 4.3 Series solution and Generating function of Legendre polynomial(K2, K3, K5)
- 4.4 Rodrigues formula and Orthogonal properties of Legendre Polynomial - Evaluation of recurrence relations(K2, K3, K4, K5)
- 4.5 Series solution and Generating function of Hermite polynomial(K2, K3, K5)

4.6 Rodrigues formula and Orthogonal properties of Hermite Polynomial - Evaluation of recurrence relations(K2, K3, K4, K5)

### **Unit V: Green's Function**

**(12 hours)**

- 5.1 Dirac-delta function - Properties of Delta function - Problems - Fourier transform of Delta function - Laplace transform of Delta function(K1, K2, K4)
- 5.2 Green's function - Green's function for one-dimensional case (K1, K2, K4)
- 5.3 Evaluation of Green's function for boundary value problems (K1, K2, K4)
- 5.4 Eigen function Expansion of Green's function - Problem(K1, K2, K4)
- 5.5 Green's function for Poisson's equation and solution of Poisson's equation - Green's function for three dimensional Helmholtz equation(K1, K2, K4)
- 5.6 Green's function for Quantum mechanical scattering problem (K1, K2, K4)

### **Books for Study:**

1. Sathyaprakash - Mathematical Physics - S.Chand& Sons, Reprint 2006.
2. B.D.Gupta- Mathematical Physics, 3<sup>rd</sup> Edition - Vikas Publishing House Pvt. Ltd., 2004.
3. E. Kreyszig - Advanced Engineering Mathematics, 8<sup>th</sup> Edition - Wiley, New York, 1999.
4. H.K. Dass - Mathematical Physics - S.Chand, Reprint 2007.

### **Books for Reference:**

1. P.R. Halmos - Finite dimensional Vector Spaces, 2<sup>nd</sup> Edition - Affiliated East - West, New Delhi, 1965.
2. C.R. Wylie and LC. Barrett - Advanced Engineering Mathematics, 6<sup>th</sup> International Edition - McGraw Hill, New York, 1995.
3. P.K. Chakrabarti and S.N. Kundu - A Textbook of Mathematical Physics - New Central Book Agency, Kolkata, 1996.
4. A.K. Ghatak, I.C. Goyal and S.H. Chua - Mathematical Physics - Macmillan India, New Delhi, 2002.
5. M.D. Greenberg - Advanced Engineering Mathematics, 2<sup>nd</sup> Edition - International Ed., Prentice Hall International, New Jersey, 1998.
6. P.K. Chattopadhyay - Mathematical Physics - Wiley Esatern, Madras, 1990.
7. S. Lipschutz - Linear Algebra - Schaum's Series, McGraw Hill, New York, 1987.
8. G. Arfken and H.J. Weber - Mathematical Methods for Physics, 5<sup>th</sup> Edition - Harcourt (India), New Delhi, 2001.

**SEMESTER I**  
**PCPHB20 - CLASSICAL MECHANICS**

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCPHB20	<b>Title of the Course:</b> Classical Mechanics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To make the students understand the different transformations that governs the classical mechanics.

**Course Outcomes (CO)**

The learners will be able to

1. Acquire knowledge about the fundamental concepts of dynamics of system of particles
2. Use D'Alembert's principle and calculus of variations to derive the Lagrange - Hamilton formalism applicable to solve the equation of motion for any mechanical system
3. Understand the essential features of canonical transformations and their applications to various systems.
4. Describe the Hamilton-Jacobi equation and develop the skills to use them to set and solve the appropriate physical problems.
5. Gain knowledge about the fundamental principles of small theory of oscillations and its applications.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Rigid Body Dynamics

(16 Hours)

- 1.1 Introduction - Generalized coordinates of a rigid body - Body and space reference systems (K1, K2, K3)
- 1.2 Euler's angles - Infinitesimal rotations as vectors (K1, K2, K3)
- 1.3 Components of angular velocity - Angular momentum and Inertia tensor (K1, K2, K3)
- 1.4 Principle axes - Principle moments of inertia - Rotational Kinetic energy of a rigid body - Moment of inertia for different body systems (K1, K2)
- 1.5 Euler's equations of motion of rigid body - Torque free motion of a rigid body (K1, K2, K4)
- 1.6 Motion of a symmetrical top under the action of gravity (K4, K5, K6)

### Unit II: Lagrangian and Hamiltonian Formulations

(14 Hours)

- 2.1 Newton's equation and conservation laws for system of particles - Constraints (K1, K2)
- 2.2 Generalized co-ordinates - Principle of Virtual work (K1, K2)
- 2.3 D'Alembert's Principle - Lagrange's equation from D'Alembert's Principle - Procedure for formation of Lagrange's equation (K1, K2)
- 2.4 Kinetic energy in generalized coordinates - Lagrange's equation from Hamilton's Principle - Hamilton's equations (K1, K2, K3)
- 2.5  $\Delta$  variations - Principle of least action (K1, K2)
- 2.6 Applications (Atwood's Machine, Compound pendulum and LC circuit) (K3, K4, K5, K6)

### Unit III: Canonical Transformations

(13 Hours)

- 3.1 Introduction (K1, K2) - Canonical Transformations and their generators (K2)
- 3.2 Lagrange and Poisson Brackets notation (K2, K3)
- 3.3 Procedure for Applications of Canonical transformations - Condition for canonical transformations (K2, K3, K4)
- 3.4 Problems on canonical transformation (Simple Harmonic Oscillator) (K3, K4, K5, K6)
- 3.5 Proof of invariance of Poisson's Bracket under canonical transformations (K3, K4)
- 3.6 Infinitesimal contact transformation (K1, K3)

### Unit IV: Hamilton–Jacobi Theory

(14 Hours)

- 4.1 Hamilton–Jacobi equations (K1, K2)
- 4.2 Hamilton's Characteristic function - Physical Significance (K1, K2)
- 4.3 Linear Harmonic Oscillator problem by Hamilton Jacobi method (K3, K4, K5)
- 4.4 Action Angle variables - Problem of harmonic oscillator using action angle variables (deduction of frequency of motion) (K3, K4, K5)
- 4.5 Hamilton Jacobi method and Motion of a particle in a plane under a central force (K2, K3)
- 4.6 Application to Kepler's problem based on Hamilton Jacobi method (K3, K4, K5)

### Unit V: Small oscillations

(15 Hours)

- 5.1 Introduction - General theory of small oscillations (K1, K2)
- 5.2 Secular equations and Eigen value equations - solution to Eigen value equations (K1, K2)
- 5.3 one dimensional oscillator - The Lagrangian of one dimensional oscillator and its solution (K3, K4, K5)
- 5.4 Two coupled oscillators - Lagrangian equation of two coupled oscillators and its solution

(K3, K4, K5)

5.5 Example of two coupled oscillator: Two coupled pendulum (K3, K4, K5, K6)

5.6 Vibrations of linear triatomic molecule (K3, K4, K5)

**Books for Study:**

1. J.C. Upadhyaya - Classical Mechanics - Himalaya Publishing House, Reprint 2003.
2. Gupta Kumar and Sharma - Classical Mechanics, 2nd Edition - PragatiPrakasan, Meerut, 2006.
3. B.D. Gupta and Sathya Prakash - Classical Mechanics - Kedar Nath, Ram Nath, 2003.

**Books for Reference:**

1. H. Goldstein - Classical Mechanics, 3rd Edition - C. Poole and J. Safko, Pearson Education, Asia, New Delhi, 2002.
2. S.N. Biswas - Classical Mechanics - Books and Allied Ltd., Kolkata, 1998.
3. K. Huang - Statistical Mechanics - Wiley Eastern Ltd., New Delhi, 1975.
4. B.K. Agarwal and M. Eisner - Statistical Mechanics, 2nd Edition - New Age International, New Delhi, 1998.
5. J.K.Bhattacharjee - Statistical Mechanics: An Introductory Text - Allied Publication, New Delhi, 1996.
6. L.D. Landau and E.M. Lifshitz - Mechanics - Pergomon Press, Oxford, 1969.
7. C.R.Mondal - Classical Mechanics - Prentice Hall of India, New Delhi, 2009.
8. L.P. Kadanoff - Statistical Physics: Statics, Dynamics and Renormalization - World Scientific, Singapore, 2001.
9. M. Glazer and J. Wark - Statistical Mechanics - Oxford University Press, 2001.

**SEMESTER I**  
**PCPHC20- STATISTICAL MECHANICS**

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PCPHC20	<b>Title of the Course:</b> Statistical Mechanics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

**Course Objectives**

1. To understand the fundamental principles of thermodynamics and statistical mechanics to perform a quantitative calculations on ideal systems.

**Course Outcomes (CO)**

The learners will be able to

1. Define and discuss the concepts in thermodynamics and statistical mechanics.
2. Differentiate classical and quantum statistics, explain the statistical behaviour of ideal system (Maxwell, Bose & Fermi) and calculate the statistical quantities.
3. Apply the Bose-Einstein and Fermi-Dirac distributions appropriately to understand the macroscopic properties. (Black body radiation, electrons in metals, paramagnetism etc.)
4. Formulate theories and microscopic models to explain the properties of complex system. (Ising model, Bose-Einstein condensation, liquid helium II)
5. Describe the role of fluctuations and transport phenomena in a system.

## Course Syllabus

### Unit I: Thermodynamics (14 Hours)

- 1.1 Introduction - Thermodynamic potentials (K1, K2)
- 1.2 Phase equilibrium (K1, K2, K3)
- 1.3 Gibb's phase rule - Entropy of mixing and Gibb's paradox (K1, K2, K3)
- 1.4 Phase transition and Ehrenfest's Classification (K2)
- 1.5 Landau theory of Phase transition (K2, K3)
- 1.6 Critical indices- Scale transformation and dimensional analysis (K2, K3)

### Unit II: Ensembles (14 Hours)

- 2.1 Introduction - Phase space (K2)
- 2.2 Micro canonical, Canonical and grand canonical ensembles (K2, K3, K4)
- 2.3 Trajectories and density of states (K2, K3)
- 2.4 Liouville's theorem (K2, K3, K4)
- 2.5 Partition function - Calculation of statistical quantities (K3, K4, K5)
- 2.6 Energy and density fluctuations (K3, K4, K5)

### Unit III: Maxwell-Boltzmann statistics and Bose-Einstein statistics (15 Hours)

- 3.1 Postulates of classical and quantum statistics (K2, K3)
- 3.2 Density of matrix - Statistics of indistinguishable particles (K2, K3, K4)
- 3.3 Maxwell- Boltzmann distribution function - Broadening of spectral lines (K3, K4)
- 3.4 Bose-Einstein statistics - Bose-Einstein distribution of gas (K2, K3, K4)
- 3.5 Equation of states - black body radiation (K3, K4)
- 3.6 Bose - Einstein condensation - Landau's theory of Liquid Helium II (K3, K4)

### Unit IV: Fermi-Dirac statistics (14 Hours)

- 4.1 Fermi-Dirac distribution - Equation of states (K2, K3, K4)
- 4.2 Free electron gas in metals (K2, K3, K4)
- 4.3 Heat capacity (K2, K3, K4)
- 4.4 Pauli's paramagnetism (K2, K3, K4)
- 4.5 Thermionic emission (K2, K3, K4)
- 4.6 Superconductivity (K2, K3, K4)

### Unit V: Ising model and Fluctuations (15 Hours)

- 5.1 Ising model - Mean field theories of the Ising model in three, two and one dimension (K2, K3, K4)
- 5.2 Exact solutions in one dimension (K2, K3, K4, K5)
- 5.3 Correlation of space-time dependent fluctuations (K2, K4)
- 5.4 Fluctuations and transport phenomena (K2, K3)
- 5.5 Brownian motion - Langevin theory (K2, K3, K4)
- 5.6 Fluctuation-dissipation theorem - The Fokker- Planck equation (K3, K4)

**Books for study:**

1. Gupta, Kumar and Sharma - Statistical Mechanics - PragatiPrakasan, 21st Ed., 2006
2. SathyaPrakash and J.P Agarwal - Statistical mechanics - KedarNath Ram Nath, 2005.
3. SathyaPrakash and J.P. Agarwal - Thermodynamics, statistical physics and kinetics
4. B.B.Laud- Fundamentals of Statistical mechanics - New Age International Pvt Ltd., 2012.

**Books for reference:**

1. Statistical mechanics and properties of matter - E.S.R. Gopal
2. Statistical physics - L.D. Landau and E. M. Lifshitz
3. K. Srivastava and J. Ashok - Statistical mechanics - Prentice-Hall of India Pvt. Ltd., 2005.
4. Brijlal, Dr. N. Subrahmanyam, P.S. Hemne - Heat Thermodynamics and Statistical Physics - S.Chand.
5. Dr. D. Jayaraman, Dr. K. Ilangovan - Thermal Physics and Statistical Mechanics – Viswanathan(Publishers).

## SEMESTER I

### PEPHA20 - ELECTIVE IA: ELECTRONIC DEVICES AND APPLICATIONS

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PEPHA20	<b>Title of the Course:</b> Electronic Devices and applications	<b>Course Type:</b> Theory	<b>Course Category:</b> Major Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
---------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To teach the students the methods of the fabrication of digital circuits and the devices used in the design of digital systems.
2. To understand the principles of operational amplifier and its applications and digital communication.

#### Course Outcomes (CO)

##### The learners will be able to

1. Analyze about the fabrication of various Integrated circuits and semiconductor devices (construction, working, principles and V-I characteristics) and their applications.
2. Ability to understand about the basic principles and operations of opto electronic devices and their features and applications.
3. To study the Timer IC and its applications.
4. To know the principles, configuration, linear and non-linear applications of Op-amp used to design various digital circuits.
5. To understand the concepts of combinational circuits and sequential circuits and A/D –D/A converters used to design advanced digital system.

CO	PSO					
	1	2	3	4	5	6

CO5	M	M	M	M	M	H

(Low -L, Medium– M, High-H)

## Course Syllabus

### Unit I: FinFET and SET

(16 Hours)

- 1.1 Multi gate transistors - Need of FinFET- Structure of FinFET - Fabrication - Mechanism of FinFET Technology-Bulk FinFET- SOI FinFET(K1, K2, K3)
- 1.2 FinFET Classifications: Gate shorted (SG), Insulated Gate (IG) and Low Power (LP) - n-FinFET and p-FinFET - Working of FinFET- I-V characteristics of FinFET(K2, K3, K4)
- 1.3 Applications of FinFET - Design of Switches, logic gates, flip-flops and Schmidt trigger using FinFET(K3, K4, K5)
- 1.4 Single Electron Transistor: Principle - Quantum dots - Coulomb blockade and electron tunneling –Construction and operation of SET (K3, K4)
- 1.5 Single island RC equivalent circuit of SET- Operation Temperature - Different ways to increase Coulomb energy  $E_c$  - I-V characteristics of symmetric and asymmetric junction (Coulomb Stair-Case) SET (K3, K4, K5)
- 1.6 Design of logic gates using SET - Realization of AND, OR and NOT gates using SET - Advantages and disadvantages of SET- Difference between SET and FET - Applications of SET (K4, K5, K6)

### Unit II: Opto Electronic Devices

(12 Hours)

- 2.1 Light units - Light emitting diodes - Operation and construction - Characteristics and parameters (K1, K2)
- 2.2 Seven-segment displays - LED seven-segment display - liquid crystal cells - LCD seven-segment displays(K1, K2, K3)
- 2.3 Photoconductive cells - Construction - Characteristics and Parameters - Applications(K2, K3, K4)
- 2.4 Photodiodes and Solar cells - Photodiode operation - characteristics - specification - construction- Applications - Solar cells (K2, K4, K5, K6)
- 2.5 Phototransistors (BJT) - Characteristics and specifications - Applications - Photo-Darlington- Photo-FET-Optocouplers- Operation and constructions - specification - Applications (K2, K3, K4)
- 2.6 Laser diode - Operation - Characteristics and parameters- Drive circuits - Modulation (K3, K4, K5, K6)

### Unit III: 555 Timer and Applications

(13 Hours)

- 3.1 555 Timer - Description (K1, K2)
- 3.2 Monostable operation - Frequency divider(K1, K2, K3)
- 3.3 Astable operation - Schmitt trigger (K2, K3)
- 3.4 Phase Locked Loops - Basic principles (K2, K3, K4, K6)
- 3.5 Analog phase detector(K2, K3)
- 3.6 Voltage Controlled Oscillator - Voltage to Frequency conversion (K2, K3)

#### **Unit IV: Op-Amp Applications**

**(18 Hours)**

- 4.1 Instrumentation amplifier - V to I and I to V converter - Op-amp circuits using diodes - Sample and Hold circuits (K1, K2)
- 4.2 Log and Antilog amplifiers –Multiplier and Divider - Electronic analog Computation (K2, K3, K4)
- 4.3 Phase shift and Wein bridge sine wave oscillators (K1, K2, K3)
- 4.4 Solution to simultaneous equations and differential equations - Schmitt Trigger - Astable, Monostable Multivibrator (K2, K3, K4, K6)
- 4.5 Square, Triangular and Saw tooth wave generators (K2, K3, K4, K6)
- 4.6 RC Active filters - Low pass, High pass and Band pass filter (K2, K3, K4)

#### **Unit V: Digital Electronic Devices**

**(13 Hours)**

- 5.1 4bit Binary adder/subtractor IC 7483 (K1, K2, K3, K4)
- 5.2 Multiplexer IC 74150 and Demultiplexer IC 74154 (K1, K2)
- 5.3 Counters: Binary Counter - BCD Counter - Parallel Counters (K1, K2)
- 5.4 D/A Converters: Binary Weighted Resistor method - R-2R Ladder method (K1, K2, K3)
- 5.5 A/D Converters: Counter type, Successive Approximation (K2, K3, K4)
- 5.6 Dual Slope method - Parallel comparator A/D converter (K2, K3, K4)

#### **Books for Study:**

1. D. Roy Choudhury - Linear Integrated Circuits - Wiley Eastern, New Delhi, 1991.
2. V.Vijayendran - Introduction to Integrated Electronics, S.Viswanathan (Printers & Publishers), Pvt. Ltd., 2007.
4. Amar K.Ganguly - Optoelectronic Devices and Circuits - Narosa Publishing House, 2007.
5. R.A. Gaekwad - Op-Amps and Integrated Circuits EEE, 1994.
6. CMOS VLSI Design: A circuit and systems perspective, by Neil H.E. Weste, David Harris and Ayan Banerjee Third edition , Pearson
7. Physics of Semiconductor Devices by J.P. Colinge, C.A. Colinge
8. FinFETs and Other Multi-Gate Transistors by J.-P. Colinge
9. Hybrid CMOS Single-Electron-Transistor Device And Circuit Design by Santanu Mahapatra, Adrian Mihai Ionescu
10. Nanoscale Transistors: Device Physics, Modeling and Simulation Mark Lundstrom, Jing Guo

#### **Book for Reference:**

1. R.F. Coughlin and F.F, Driscoll - Op-Amp and Linear Integrated Circuits, Prentice Hall of India, New Delhi, 1996.
2. M.S.Tyagi - Introduction to Semiconductor Devices - Wiley, New York, 2014.
3. Deboo/ Burrous - Integrated circuits and Semiconductor Devices - Theory and Application, McGraw Hill, New Delhi, 1985.
4. Ramakant Gaekwad - Operational Amplifiers - Wiley Eastern, New Delhi, 1981.
5. S.M. Sze - Semiconductor Devices - Physics and Technology, Wiley, New York, 1985.
6. Millman and Halkias - Integrated Electronics - McGraw Hill, New Delhi.
7. Quantum Transport: Atom to Transistor by Supriyo Datta Organic field-effect transistors by Bao Z., Locklin J. (eds.)

## SEMESTER I

### PEPHB20 - ELECTIVE IB: ELECTRONIC COMMUNICATION SYSTEMS

<b>Year:</b> I	<b>Course Code:</b> PEPHB20	<b>Title of the Course:</b> Electronic Communication Systems	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
-------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students acquire knowledge about electronic communication systems.
2. To understand the error control coding for encoding and decoding digital data.
3. To access the analog and digital technologies used for satellite communication networks.
4. To impart to the students the basic understanding of wireless network system.

#### Course Outcomes (CO)

The learners will be able to

1. Compare the performance of AM, FM and PM schemes with reference to SNR.
2. Design encoder and decoder schemes for error control.
3. Understand the orbital and functional principles of satellite communication systems.
4. Understand the evolution of cellular communication systems up to and beyond 3G.
5. Understand fundamentals of wireless communications.

CO5	M	M	M	M	M	H

(Low -L, Medium– M, High-H)

## Course Syllabus

### **Unit I: Signal Encoding Techniques (14 Hours)**

- 1.1 Line of sight transmission - Fading in the mobile environment (K2, K3)
- 1.2 Antennas: types - Propagation modes (K1, K2)
- 1.3 Signal encoding techniques: criteria (K1, K2)
- 1.4 ASK - FSK - BFSK - MFSK - PSK - BPSK - QPSK (K1, K2)
- 1.5 Multilevel PSK - AM modulation - Angle modulation (K1, K2)
- 1.6 PCM - delta and adaptive delta modulation (K1, K2)

### **Unit II: Coding and Error Control (14 Hours)**

- 2.1 Error detection - Parity check - cycle redundancy check (K3, K4, K5)
- 2.2 Block error correction codes - hamming code (K1, K4, K5)
- 2.3 Cyclic codes - BCH code - reed - Solomon codes(K3, K4, K5)
- 2.4 Block interleaving –convolution codes - decoding (K4, K5)
- 2.5 Turbo coding - automatic repeat request (K4, K5)
- 2.6 Flow control - error control (K4, K5)

### **Unit III: Satellite Communication (15 Hours)**

- 3.1 Satellite parameters and configurations (K1, K2)
- 3.2 Satellite orbits - GEO - MEO - LEO (K1, K2)
- 3.3 Frequency bands - transmission impairments (K2, K3)
- 3.4 Satellite foot print - atmospheric attenuation (K2)
- 3.5 Satellite network - configuration - capacity allocation (K2, K3, K4)
- 3.6 Multiplexing: FDM and TDM (K1, K2)

### **Unit IV: Cellular Wireless Networks (16 Hours)**

- 4.1 Principles of cellular networks: Organization - frequency reuse (K1, K2)
- 4.2 Operation - mobile radio propagation effects - hand-off (K2, K3, K4)
- 4.3 Power control - traffic engineering - first generation analog(K3, K4, K5)
- 4.4 AMPS - second generation - TDMA - mobile wireless TDMA design consideration (K2, K3)
- 4.5 CDMA - mobile wireless CDMA design considerations (K3, K4, K5)
- 4.6 Soft handoff –IS 95 - Third generation systems - wireless local loop (K1, K2)

### **Unit V: Wireless LANS (13 Hours)**

- 5.1 Overview: Wireless LAN applications - wireless LAN requirements (K1, K2, K3)
- 5.2 Wireless LAN technology - Infrared LANS (K1, K2)
- 5.3 Spread spectrum LANS (K2, K3, K4)
- 5.4 Narrow band microwave LANS (K1, K2)
- 5.5 IEEE 802 architecture (K1, K2)
- 5.6 IEEE 802.11 architecture (K1, K2)

**Books for Study:**

1. George Kennedy, Brendan Davis, SRM Prasanna, Electronic Communication Systems, McGraw Hill (India) Pvt. Ltd., Fifth Edition, 2011.
2. Simon O. Haykin, Michael Moher, Modern Wireless Communications, Pearson Education, 2007.

**Books for Reference:**

1. Theodore S. Rappaport, Wireless Communications: Principles and Practice, Pearson Education India, 2009.
2. Gordon L. Stuber, Principles of Mobile Communications, Springer International Ltd., 2001.
3. William Stallings - Wireless Communications and Networks –Pearson Education, Asia, 2002.
4. Robert J. Schoenbeck - Electronic Communications, Modulation and Transmission - Prentice Hall of India, 1999.
5. P. Gnanasivam - Telecommunication Switching and Networks - Prentice Hall of India, 2004

## SEMESTER I

### PIPHA20 –IEP: PHYSICS FOR SET / NET - PAPER-I

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PIPHA20	<b>Title of the Course:</b> IEP:Physics for SET/NET- Paper-I	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To represent the equations of motion for complicated mechanical systems using the Lagrangian and Hamiltonian formulation of classical mechanics.
2. To analyze logic processes and implement logical operations using combinational and sequential logic circuits.
3. To understand the basic concepts of thermodynamic.
4. To impart knowledge about Classical Mechanics, Electronics and Statistical mechanics for competitive Examinations.

#### Course Outcomes (CO)

The learners will be able to

1. Describe and understand the motion of a mechanical system using Lagrange-Hamilton formalism.
2. Design and analyze of electronic circuits
3. Develop a digital logic and apply it to solve real life problems.
4. Ability to identify the properties of substances on property diagrams and obtain the data from property tables.
5. To acquire knowledge about classical and Quantum statistical mechanics.

CO	PSO

CO2	H	M	M	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	M	H	M
CO5	H	H	L	H	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Classical Mechanics

Dynamical systems - Phase space dynamics - Euler's angles and Euler's equation of motion - Lagrangian and Hamiltonian formalism and equations of motion - Conservation laws and cyclic coordinates - Principle of least action - Poisson's Bracket - Canonical transformations - Hamilton Jacobi theory - Linear harmonic oscillator problem - Action angle variables - Small oscillations - Normal modes - Linear triatomic molecule. Classical statistics - Ensembles, Liouville's theorem - Quantum statistics - Maxwell-Boltzmann - Bose-Einstein - Fermi-Dirac.

### Unit II: Electronics - I

Semiconductor devices - Diodes - Rectifiers - Filters - Transistors, FET, UJT - Optoelectronic devices - Solar cells, photo detectors - LEDs structure - Characteristics - Frequency dependence and applications. Op-Amp and their applications -

### Unit III: Electronics - II

Amplifiers - Oscillators - Logic circuits & logic families - Flip flops - Registers - Counters and Comparator circuits - A/D and D/A converters - Op-Amp based instrumentation amplifier - Feedback - Filtering and noise reduction - Shielding and grounding - 555 timer - IC 565-Lock-in detector - Modulation techniques. Elementary ideas of Microprocessor and Microcontroller - Transducers - Temperature/ Pressure/Vacuum magnetic fields - Vibration - Optical detectors - Solar cells - Photo detectors - LED's - Digital techniques and applications.

### Unit IV:

#### Thermodynamics:

Equation of state for various thermodynamics systems - laws of thermodynamics - thermodynamic potentials - phase equilibrium - Gibbs phase rule - phase transitions and Dia, para and ferromagnetism - Ehrenfest's classification.

#### Classical Statistical Mechanics:

Phase space, micro and macro states - Micro-canonical - Canonical and Grand canonical ensembles and partition function - Statistical ensemble - Statistical postulates - Probability calculations - Partition function and their properties - Calculation of statistical quantities - Langevin's theory of paramagnetism.

### Unit V: Quantum Statistical Mechanics:

Postulates of Quantum statistical mechanics - Density operator and matrix - Properties of ideal Bose & Fermi gases - Bose-Einstein condensation - Cluster expansion for a classical gas - Virial equation of state - Ising model - One dimensional Ising model - Correlation of space - Time dependent fluctuations - Brownian motion - Black body radiation and Plank's radiation law.

#### Books for study:

1. J.C. Upadhyaya - Classical Mechanics, Himalaya Publishing house, Reprint 2017.
2. J.D. Jackson - Classical Electrodynamics, Willey Eastern Ltd., New Delhi, 1975.
3. R.A. Gaekwad - Op-Amps and Integrated circuits - EEE, 2012.
4. D. Roy Choudary and Shail B. Jain - Integrated Circuits - New Age International Publishers 2011.
5. V. K. Mehta and Rohit Mehta- Principles of Electronics - S. Chand & Co., New Delhi, Reprint 2014.
6. SathyaPrakash - Statistical Mechanics (1994) - Kedar, Meerut, 1994.

7. F. Reif - Fundamentals of Statistical and Thermal Physics - McGraw Hill, Auckland 1965.
8. S.K. Sinha -Introduction to Statistical Mechanics - Alpha Science International,2005

**Books for reference:**

1. H. Goldstein - Classical mechanics, 3<sup>rd</sup> Ed., C. Poole and J. Safko, Pearson Education, Asia, New Delhi, 2015.
2. S.M. Sze - Semiconductor Devices: Physics and Technology - Wiley, New York, 1985.
3. Sathyaprakash - Statistical Mechanics, Kedar Publications, Meerut, 2017.
4. R.K. Pathria, Paul D.Beale,-Statistical Mechanics - Butterworth Heinemann, UK, 1996.

## SEMESTER I

### PIPHB20 – IEP: ASTRO PHYSICS

<b>Year: I</b> <b>Sem: I</b>	<b>Course Code:</b> PIPHB20	<b>Title of the Course:</b> IEP: Astro Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
---------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students acquire the knowledge about the universe
2. To provide a clear understanding of Astro Physics.
3. To explain the relationship between mass and gravity in solar system.
4. To formulate astrophysical problems in mathematical terms; solve with analytic and numerical methods
5. To propose, plan, and conduct astronomical observations with professional telescopes

#### Course Outcomes (CO)

The learners will be able to

1. In-depth knowledge within the defined area of astrophysics.
2. Explain stellar evolution, including supernovas, neutron stars, pulsars, white dwarfs and black holes, using evidence and presently accepted theories.
3. Detail the presently accepted formation theories of the solar system based upon observational and physical constraints.
4. Detail the main features and formation theories of the various types of observed galaxies, in particular the Milky Way.
5. Develop observation skills to be able to explain astronomical features and observations obtained via telescopic observations.

CO5	H	H	H	H	H	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I: Solar system (14 Hours)**

- 1.1 Basic ideas of the Solar system - Geo-centric theory - Helio-centric theory (K1, K2)
- 1.2 Kepler's laws of gravitation - Newton's law of gravitation (K1, K2, K3)
- 1.3 Physical processes in the solar system (K1, K2)
- 1.4 Dynamics of the solar system - physics of planetary atmospheres (K1, K2)
- 1.5 Individual planets; comets, asteroids, and other constituents of the solar system (K1, K2)
- 1.6 Extra-solar planets - formation of the solar system, stars, and planets (K1, K2)

### **Unit II: The Sun (13 Hours)**

- 2.1 The sun - A typical star - Helioseismology (K1, K2)
- 2.2 Temperature distribution near the photosphere - Limb darkening (K1, K2, K3)
- 2.3 Chromospheres - Spicules, plages and filaments - Solar granulation (K1, K2)
- 2.4 Solar corona - Prominences - Solar flares - Radio emission from the sun (K1, K2)
- 2.5 Solar wind - Pyrheliometer (K1, K2, K3)

### **Unit III: The Stars (16 Hours)**

- 3.1 Stars - General Distances to stars - Stellar masses and radii (K1, K2)
- 3.2 Measuring of masses and stellar radii - Colour index of stars (K1, K2)
- 3.3 Stellar Evolution - Birth of a star - Maturity - Ageing of stars (K1, K2)
- 3.4 Death of a star - Types of Stars - Binary, multiple, variable, erupting and exploding stars (K1, K2)
- 3.5 Interstellar medium: Nebulae - Novae - Super Novae - White Dwarfs (K1, K2)
- 3.6 Electrons in white Dwarfs - Neutron stars - Pulsars - Quasars - Black holes (K1, K2)

### **Unit IV: The Galaxy (15 Hours)**

- 4.1 The Galaxy - Hubble's law - Schematic representation of the general structure of galaxy (K1, K2)
- 4.2 The nucleus, the galactic disk and the galactic halo - Dark matter (K1, K2)
- 4.3 Milky way - Hubble classification of galaxies (K1, K2)
- 4.4 Spiral galaxies - Elliptical galaxies - Irregular galaxies (K1, K2)
- 4.5 Dwarf galaxies - Masses of galaxies (K1, K2)
- 4.6 Rotation curves of galaxy - the general rotation law (K1, K2)

### **Unit V: Cosmic Rays and Instrumentation (14 Hours)**

- 5.1 Cosmic rays - Discovery of Cosmic rays - Latitude effect (K1, K2, K4)
- 5.2 Azimuth effect - Altitude effect - longitude effect (K1, K2)
- 5.3 Primary cosmic rays - Secondary rays - Detection methods (K1, K2, K3, K4)
- 5.4 Cosmic ray showers - Vanallen Belts (K1, K2)
- 5.5 Astronomical Instruments: Reflecting and refracting telescopes (K2, K4)
- 5.6 Radio telescopes - Hubble space telescope (HST) (K2, K4)

**Books for study:**

1. BaidyananthBasu- An Introduction to Astro Physics - Prentice Hall of India, 2004.
2. K.S.Krishnaswamy- Astro Physics: A Modern Perspective - Reprint, New Age International Pvt.Ltd., New Delhi, 2002.
3. G.K.Sasidharan- The Great Universe - S.Chand& amp; Company Ltd., New Delhi - 2008.
4. R.Murugesan&KiruthigaSivaprasath - Modern Physics - S.Chand& amp; Co. Publication - 2007.

**Books for Reference:**

1. V.B.Bhatia- Textbook of Astronomy and Astro Physics with Elements of Cosmology - Narosa Publishing House, New Delhi, 1998.
2. R.R.Danial- Concepts of Space Science - University Press, Reprint 2002.
3. K.CosmicKapoor- Space Book - Lotus Press, 2005.

## SEMESTER II

### PCPHD20 - MATHEMATICAL PHYSICS – II

<b>Year:</b> I	<b>Course Code:</b> PCPHD20	<b>Title of the Course:</b> Mathematical Physics - II	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
<b>Sem:</b> II							

#### Course Objectives

1. To inculcate to the students the mathematical concepts for solving physical problems which arise in many branches of Physics.

#### Course Outcomes (CO)

The learners will be able to

1. Apply concepts of complex analysis to evaluate definite integrals.
2. Explain various operations of tensors and apply in many branches of science.
3. Apply Laplace/Fourier transforms to solve mathematical problems and use Fourier transforms as an aid for analysing experimental data.
4. Use various probability distribution methods to analysis any experimental event.
5. Apply the concept of group theory in the domain of physical sciences.

## Course Syllabus

### Unit I: Complex Variables

(15 Hours)

- 1.1 Analytic functions - Cauchy-Riemann conditions (K2, K3, K4)
- 1.2 Single and multi-valued functions (K2, K3, K4)
- 1.3 Cauchy's integral theorem and formula (K2, K3, K4, K5)
- 1.4 Taylor's theorem and Laurent's theorem (K2, K3, K4, K5)
- 1.5 Poles and Residues - Cauchy's residue theorem (K2, K3, K4, K5)
- 1.6 Application to evaluation of definite integrals of round unit circle and an infinite semi-circle (K2, K3, K4, K5)

### Unit II: Tensors

(13 Hours)

- 2.1 Introduction - Transition of coordinates - Einstein's summation convention (K2, K3, K4)
- 2.2 Contravariant, co-variant and mixed tensors - Rank of a tensor - Tensors of higher ranks (K2, K3, K4)
- 2.3 Kronecker delta symbol - Invariant tensors - Levi civita symbol- Reciprocal tensors - Relative and absolute tensors (K2, K3, K4)
- 2.4 Algebraic operations of tensors - Outer product, Contraction, Inner product and Quotient law (K2, K3, K4)
- 2.5 Symmetric and anti-symmetric tensors (K2, K3, K4)
- 2.6 Basic idea of Christoffel's 3-index symbols - Covariant derivative of a tensor (K2, K3, K4)

### Unit III: Integral Transforms

(15 Hours)

- 3.1 Laplace transforms and inverse Laplace transforms (K3, K4, K5)
- 3.2 Solution of linear differential equations with constant co-efficients- evaluation of integrals(K3, K5)
- 3.3 Fourier transforms - Fourier sine and cosine transforms (K3, K4, K5)
- 3.4 Convolution theorem (K4)
- 3.5 Simple applications(K3,K5)

### Unit IV: Probability Theory

(15 Hours)

- 4.1 Probability densities and probability distributions(K2, K3, K5)
- 4.2 Binomial, Poisson's and Normal distributions(K2, K3, K5)
- 4.3 Moments and generating functions (K2, K3, K5)
- 4.4 Discrete distributions (K2, K3, K5)
- 4.5 Casual and uniform distribution (K2, K3, K5)
- 4.6 Cauchy continuous distribution (K2, K3, K5)

### Unit V: Group Theory

(14 Hours)

- 5.1 Definition of groups, subgroups and conjugate classes - Invariant subgroup (K2, K4)
- 5.2 Homomorphism and isomorphism between groups (K2, K4)
- 5.3 Point groups - Representation of a group - Reducible and irreducible representations (K2, K4)

- 5.4 Schur's lemma - Great orthogonality theorem (K4)
- 5.5 Character table - Construction of character table for  $C_{3V}$  and  $C_{4V}$  group (K3, K6)
- 5.6 Continuous and Lie groups - Symmetry group of Schrodinger equation - Two dimensional Rotation group  $R+(2)$  - Three dimensional Rotation group  $R+(3)$  (K4)

**Books for Study:**

- 1. Sathyaprakash - Mathematical Physics - S.Chand & Sons, Reprint 2006.
- 2. B.D.Gupta- Mathematical Physics, 3rd Edition - Vikas Publishing House Pvt. Ltd., 2004.
- 3. E. Kreyszig - Advanced Engineering Mathematics, 8th Edition - Wiley, New York, 1999.
- 4. H.K. Dass - Mathematical Physics - S.Chand, Reprint 2007.

**Books for reference:**

- 1. M. Hamermesh - Group Theory and Its Application to Physics: Problems – Addison Wesley, London, 1962.
- 2. C.R. Wylie and LC. Barrett - Advanced Engineering Mathematics, 6th Edition, International Edition, McGraw Hill, New York, 1995.
- 3. P.K. Chakrabarti and S.N. Kundu - A Textbook of Mathematical Physics - New Central Book Agency, Kolkata, 1996.
- 4. A.K. Ghatak, I.C. Goyal and S.H. Chua - Mathematical Physics - Macmillan India, New Delhi, 2002.
- 5. M.D. Greenberg - Advanced Engineering Mathematics, 2nd International Edition - Prentice Hall International, New Jersey, 1998.
- 6. P.K. Chattopadhyay - Mathematical Physics - Wiley Eastern, Madras, 1990.
- 7. F.A. Cotton - Chemical Applications of Group Theory - Wiley Eastern, New Delhi, 1987.
- 8. A.W. Joshi - Elements of Group Theory for Physicists - (Wiley Eastern, New Delhi, 1971.
- 9. G. Arfken and H.J. Weber - Mathematical Methods for Physics, 5th Edition – Harcourt (India), New Delhi, 2001.

## SEMESTER II

### PCPHE20 - ELECTROMAGNETIC THEORY

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCPHE20	<b>Title of the Course:</b> Electromagnetic Theory	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 5	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students understand the principles and theory of electrostatics, magneto statics.
2. To familiarize the students with electromagnetic waves and its applications.

#### Course Outcomes (CO)

The learners will be able to

1. Able to understand and apply the basic principles of electrostatics
2. Analyses the properties of magnetostatic field through current distribution with the application of various laws and conditions.
3. Able to perceive the propagation and interaction of electric and magnetic fields through free space and matter
4. Imbibes the wide-spread knowledge about radio communication with its mathematical applications.
5. Acquires the comprehensive knowledge of the various applications of antennas

CO5	M	H	H	M	M	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Electrostatics

(14 hours)

- 1.1 Electrostatic potential - Poisson's equation and Laplace's equation from Gauss' law (K1, K2)
- 1.2 Solution of Laplace's equation in spherical co-ordinates - Solution to Laplace equation in cylindrical coordinates - solution to Laplace equations in Cartesian coordinates (K2, K3, K5)
- 1.3 Polar molecules - Langevin equation (K2, K3, K5)
- 1.4 Non-polar molecules - Clausius-Mossotti relation (K2, K3, K4)
- 1.5 Polarization vector - Electric field at external and internal points due to polarization - Displacement vector (K1, K2, K3)
- 1.6 Conducting sphere in a uniform field - Dielectric sphere in a uniform field (K3, K4, K5)

### Unit II: Magnetostatics

(15 hours)

- 2.1 Magnetic field of steady current - current density  $J$  (K1, K2)
- 2.2 Ampere's circuital law - Force on current carrying conductors and charges - Force between parallel wires & force on a point charge moving in a magnetic field (Lorentz force) (K2, K3)
- 2.3 Magnetic scalar potential - Application to a circular coil (K2, K3, K4)
- 2.4 Magnetic vector potential - Application to a long current carrying wire - Line integral of a vector potential over a closed curve (K2, K3, K4)
- 2.5 Lorentz condition - Magnetic shielding (K3, K5)
- 2.6 Energy in a magnetic field (K3, K4)

### Unit III: Maxwell's Equations

(15 hours)

- 3.1 Faraday's laws of electro-magnetic induction - Faraday's law in vector form (K1, K2, K4)
- 3.2 Maxwell's displacement current - Maxwell's equations - Derivation (K2, K3, K4)
- 3.3 Electromagnetic Potentials  $\mathbf{A}$  and  $\phi$  (Vector and Scalar potentials) - Maxwell's equations in terms of Electromagnetic Potentials (K2, K4)
- 3.4 Non-uniqueness of Electromagnetic Potentials - Gauge invariance - Lorentz gauge and Coulomb gauge (K3, K4, K5)
- 3.5 Conservation laws for a systems of charges and electromagnetic fields - Equation of Continuity (charge) - Momentum in EM Fields - Energy in EM fields (Poynting theorem) (K3, K4, K5)
- 3.6 Wave equation in general - Plane wave solution for free space (K2, K3)

### Unit IV: Application of Maxwell's Equations

(14 hours)

- 4.1 Fields and radiation of localized sources (K1, K2)
- 4.2 Oscillating electric dipole - Radiation from an oscillating electric dipole - Poynting vector and radiated power (K2, K3, K4)
- 4.3 Radiation from a small current element - Electric field and Radiation resistance (K3, K4)
- 4.4 Radiation from a linear antenna - Electric field intensity, Magnetic field intensity, radiated power (K4, K5)

4.5 Antenna arrays - Broad side array - end fire array (K4,K5)

4.6 Radiation pressure - Electromagnetic oscillators (K4,K5)

### **Unit V: Wave Propagation**

**(14 hours)**

5.1 Propagation of electromagnetic waves in isotropic and anisotropic dielectrics (K3, K4)

5.2 Propagation in conducting media - Calculation of Phase Velocity - Refractive Index - Skin depth ( K3,K4)

5.3 Linear and circular polarization - Reflection and refraction at a plane interface (K2,K3)

5.4 Propagation of waves in a rectangular wave guide - TE Waves - TM Waves (K4,K5)

5.5 Cavity resonator - TE Mode - TM Mode (K4,K5)

5.6 Faraday and Kerr effects (K4)

### **Books for Study:**

1. Chopra, Agarwal - Electromagnetic Theory, 5<sup>th</sup> Edition - K. Nath & Co, Meerut, 2014.
2. SathyaPraksah - Electromagnetic Theory and Electrodynamics - Kedarnath Ramnath &Co., 2006.
3. Gupta, Kumar, Singh - Electrodynamics - PragatiPrakashan, Meerut, 2003.

### **Books for Reference:**

1. J.D. Jackson - Classical Electrodynamics - Willey Eastern Ltd., New Delhi, 1975.
2. D.J.Griffiths - Introduction to Electrodynamics, 3<sup>rd</sup> Edition - Prentice Hall of India, New Delhi, 2002.
3. J.R.Rertz, F.J. Milford and R.W. Christy - Foundations of Electromagnetic Theory, 3<sup>rd</sup> Edition - Narosha Publication, New Delhi, 1986.
4. W. Panofsky and M. Phillips - Classical Electricity and Magnetism - Addison Wesley, London, 1962.
5. J.D. Kraus and D.A. Fleisch - Electromagnetic with Applications, 2<sup>nd</sup> Edition - WCB McGraw Hill, New York, 1999.
6. B. Chakraborty - Principles of Electrodynamics -Books and All Kolkata, 2002.

## SEMESTER II

### PCPHF20 - QUANTUM MECHANICS - I

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PCPHF20	<b>Title of the Course:</b> Quantum Mechanics – I	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students understand the inadequacy of Classical mechanics, the origin of Quantum mechanics and its operators.
2. To impart knowledge about the postulates of Quantum mechanics, its applications and various approximation methods.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the concepts of Quantum Mechanics.
2. Apply the concept of Quantum mechanics to various problems.
3. Understand various representations in Quantum Mechanics.
4. Attain knowledge about various approximation methods and their applications.
5. Acquire knowledge about Angular momentum and commutation rules.

CO5	M	M	M	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Basic Formalism

(14 Hours)

- 1.1 Limitations of Classical Physics - Wave function for a free particle - Physical significance of wave function - Linear operator – Defns. of Eigen functions and Eigen values (K1,K2)
- 1.2 Hermitian operator - Theorem on Hermitian operator - Derivation of operators for momentum and total energy - Postulates of Quantum mechanics (K2,K3)
- 1.3 Time dependent and time independent Schrodinger equations (K3, K4)
- 1.4 Derivation of Expectation Value of a normalized wave function - Ehrenfest's Theorem(K3, K4, K5)
- 1.5 Definition of orthonormality - Schrödinger equation in spherical polar coordinates(K3, K4, K5)
- 1.6 Operator and Eigen values of Orbital angular momentum (K4,K5)

### Unit II: Applications

(16 Hours)

- 2.1 Linear harmonic oscillator (Schrödinger method) - Zero point energy (K2, K3, K4, K5)
- 2.2 Ladder operator - Particle in a Spherically symmetric potential (K2, K3, K4, K5)
- 2.3 System of two interacting particles - Rigid rotator in three dimensions (K2, K3, K4, K5)
- 2.4 Problem of Hydrogen atom (K2, K3, K4, K5)
- 2.5 Particle in a Spherical well(K2, K3, K4, K5)
- 2.6 Three dimensional Square well potential - The Deuteron (K2, K3, K4, K5)

### Unit III: General Formalism

(14 Hours)

- 3.1 Dirac's notation and Hilbert space –Types of equations of motion - Schrödinger representation (K2, K3, K4)
- 3.2 Heisenberg representation - Interaction representation (K3, K4)
- 3.3 Definition of Momentum representation - Probability density in momentum representation Operator for position coordinate (K2, K3, K4)
- 3.4 Operator for momentum - Equation of motion in momentum representation (K3, K4, K5)
- 3.5 Definition of Unitary transformation - Symmetry transformation - Translation in Space - Conservation of linear momentum Translation in time: Conservation of energy (K2, K3, K4)
- 3.6 Rotation in space: Conservation of Angular momentum - Space inversion-:Parity conservation (K2, K3, K4)

### Unit IV: Angular Momentum

(14 Hours)

- 4.1 Orbital angular momentum operators - Derivation of Orbital angular momentum Commutation relations (K2, K5)
- 4.2 Total angular momentum  $J$  - Eigen values of  $J^2$  and  $J_z$  - Matrix representation of  $J^2$  and  $J_z$  (K2, K3, K4)
- 4.3 Matrices for  $J_+$ ,  $J_x$ ,  $J_y$  and  $J_-$  - Construction of total angular momentum matrices for different values of  $j$  (K4, K5)
- 4.4 Spin angular momentum - Pauli's spin matrices - Spin vectors for spin half systems Symmetric and anti-symmetric wave functions (K2, K4,)
- 4.5 Addition of two angular momenta –Clebsch–Gordan coefficients - Selection rules – Procedure for Computation of CG coefficients (K2, K4, K5)
- 4.6 Computation of CG Coefficients for different values of  $j_1$  and  $j_2$ (K6)

## Unit V: Approximation Methods

(14 Hours)

- 5.1 Time-independent perturbation theory - Derivation of first order, second order perturbation equations - Definition of degeneracy (K2, K4)
- 5.2 Non degenerate energy levels - First order correction to energy and wave function - Second order correction to energy and wave function (K3, K4)
- 5.3 Applications - Ground state of anharmonic oscillator - Effect of electric field on the ground state of Hydrogen: Stark effect (K3, K4, K5)
- 5.4 Degenerate energy levels - First order correction - Variational method principle - Application to ground state of Helium atom (K3, K4, K5)
- 5.5 WKB Approximation - General solution - Validity of WKB approximation - Classical turning point - Connection formula (K2, K4)
- 5.6 Bound states in a potential well (WKB quantization rule)- Application to Simple harmonic oscillator (K3, K4, K5)

### Books for Study:

1. G. Aruldas - Quantum Mechanics - Second edition - PHI Learning private Limited, Delhi, 2009.
2. Gupta & Kumar - Quantum Mechanics - 33<sup>rd</sup> edition -Jai Prakash Nath Publications, 2015.
3. Satyaprakash - Quantum Mechanics - Kedar Nath Ram Nath Publications , 2019
4. V. Devanathan - Quantum Mechanics - Narosa Publishing House, New Delhi, 2005.
5. V.Devanathan- Angular momentum techniques in Quantum Mechanics - Springer publications, 2010.
6. V.K. Thankappan - Quantum Mechanics, 2<sup>nd</sup> Edition - Wiley Eastern Ltd., New Delhi, 1985.
7. David Bohm - Quantum theory - Courier Corporation, 1989.

### Books for Reference:

1. P.M. Mathews and K. Venkatesan - A Textbook of Quantum Mechanics - Tata McGraw Hill, New Delhi, 1976.
2. L.I. Schiff - Quantum Mechanics, 3<sup>rd</sup> Edition - International Student Edition, McGraw Hill, Kogakusha, Tokyo, 1968.
3. E. Merzbacher - Quantum Mechanics, 2<sup>nd</sup> Edition - John Wiley and Sons, New York, 1970.
4. P.A.M. Dirac - The Principles of Quantum Mechanics - Oxford University Press, London, 1973.

## SEMESTER II

### PEPHC20 - ELECTIVE II A: CRYSTAL GROWTH, NANO SCIENCE AND RESEARCH METHODOLOGY

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PEPHC20	<b>Title of the Course:</b> Crystal Growth, Nano Science and Research Methodology	<b>Course Type:</b> Theory	<b>Course Category:</b> Major Elective	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide the students, knowledge on crystal growth techniques and nanoscience
2. To learn the basic concepts in research methodology for pursuing future research work.

#### Course Outcomes (CO)

The learners will be able to

1. Explain the fundamental concepts behind in the formation of crystal.
2. Demonstrate the various methods in crystal growth techniques and their advantages.
3. Understand the advanced methods of characterization instruments for crystal and nanomaterials.
4. To familiarize about the physical concepts and principles of nanoscience and nanotechnology.
5. Provide a broad view of various approaches for the synthesis and fabrication of nanostructures and their outstanding properties useful to carry out their project and research work.

CO5	M	M	M	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Nucleation and Growth

(10 Hours)

- 1.1 Nucleation - Different kinds of nucleation - Theories of nucleation (K1, K2)
- 1.2 Classical theory of nucleation - Gibbs Thomson equation for vapour (K1, K2)
- 1.3 Modified Thomson's equation for melt - Gibbs Thomson equation for solution (K1, K2)
- 1.4 Concept of formation of critical nucleus - Spherical and cylindrical nucleus (K1, K2, K3)
- 1.5 Crystal growth techniques - Solution Growth Technique: Low temperature solution growth: Solution - Solubility and super solubility - Expression of super saturation - Miers T-C diagram (K1, K2, K3)
- 1.6 Gel Growth Technique: Principle - Various types - Structure of gel - Importance of gel - Experimental procedure (K1, K2, K3)

### Unit II: Growth and Characterization Techniques

(10 Hours)

- 2.1 Melt technique: Bridgman technique - Basic process - Vertical Bridgman technique - Crystal Pulling technique (K1, K2, K3, K4)
- 2.2 Czochralski technique - Experimental arrangement - Growth process (K4, K5, K6)
- 2.3 X - Ray Diffraction (XRD) - Powder and single crystal (K1, K2)
- 2.4 Fourier transforms Infrared analysis (FT-IR) - FT - Raman Elemental analysis (K1, K2)
- 2.5 Elemental dispersive X-ray analysis (EDAX) - Scanning Electron Microscopy (SEM) - Transmission electron microscopy (TEM) (K2, K4, K5, K6)
- 2.6 UV-Vis-NIR Spectrometer - Etching (Chemical) - Vickers Micro hardness - TGA - DTA - PL studies (K4, K5, K6)

### Unit III: Basics of Nano Technology

(9 Hours)

- 3.1 History of Nano technology - concept of Nano technology and Nano machines (K1, K2)
- 3.2 Atomic structure molecules and phases - Molecular and atomic sizes - Surfaces and dimensional space (K1, K2, K3)
- 3.3 Top down and bottom up approach in synthesis - Nano scale formation (K3, K4, K5)
- 3.4 Strong intermolecular forces - Covalent and coulomb interactions (K2, K4)
- 3.5 Weak inter molecular forces - Vander Waal forces - Repulsive forces (K2, K4, K5)
- 3.6 Hydrogen bonding, Hydrophobic and hydrophilic interactions (K2, K5, K6)

### Unit IV: Fabrication Techniques and Properties of Nano-Structure

(9 Hours)

- 4.1 Vacuum Techniques: Thermal evaporation - Physical Vapour deposition - Ionized Cluster beam deposition - Laser vaporization (ablation) - laser pyrolysis (K1, K2, K3)
- 4.2 Sputter deposition - DC sputtering - RF sputtering - Magnetron sputtering - ECR plasma deposition (K1, K2)
- 4.3 Chemical vapour deposition - Electric arc deposition - Ion beam techniques - molecular beam epitaxy (K2, K3, K4)
- 4.4 Nanolithography techniques: Lithography using Photons (UV-VIS, Lasers and X-rays) (K2, K3, K5)
- 4.5 Lithography using particle beams - Electron and Ion beam Lithography (K1, K2, K3, K4)
- 4.6 Quantum dots and Quantum wires - Size dependent variation in magnetic properties - Thermal and electronic transport properties (K3, K4, K5, K6)

## **Unit V: Research Methodology**

**(10 Hours)**

- 5.1 Meaning of research - Objectives of research - Motivation of research - Types, approaches and significance - Methods versus methodology (K1, K2, K3)
- 5.2 Identification of the problem - Literature survey - Reference collection - Necessity and techniques involved in defining the problem (K2, K3, K4)
- 5.3 Research design - Needs and features of good design - Different research design - Basic principles of experimental designs - Meaning of research report (K2, K3, K4)
- 5.4 Logical format for writing thesis and paper - Essential of scientific report: abstract, introduction, review of literature, materials and methods and discussion (K3, K4, K5)
- 5.5 The use of quotation, footnotes, tables and figures - Referencing - Appendixes - Revising the paper or thesis (K4, K5, K6)
- 5.6 Oral power point presentation - Poster preparation - Editing and evaluating the final product - Proof reading - The final typescopy (K4, K5, K6)

### **Books for Study:**

1. Charles P. Poole, Frank J. Owens - Introduction to Nanotechnology - Wiley-Interscience, 2003.
2. P. Santhana Ragavan and P. Ramasamy - Crystal Growth Processes and Methods - KRU Publications, Kumbakonam, 2001.
3. C.R. Kothari and Gaurav Garg - Research Methodology, Methods and Techniques - New age International Publishers, III Edition, 2014
4. Santosh Gupta - Research Methodology Methods and Statistical Techniques
5. Rajammal et al., -A hand Book of Methodology of Research - Sri Ramakrishna Mission Vidyalaya Press, Coimbatore.

### **Books for Reference:**

1. J.C. Brice - Crystal Growth Processes - John Wiley and Sons, New York, 1986.
2. C. Hawkins & M. Sorigi - Research Ed Norosa Publishing House, New Delhi - 2000
3. Robert Ross - Research: An introduction - - Harper and Row Publications.
4. P. Saravanavel - Research methodology - - Kitlab Mahal, Sixth Edition.
5. R.A. Day - How to write and publish a scientific paper - Cambridge University press
6. Anderson - Thesis and Assignment writing - - Wiley Eastern Ltd.

## SEMESTER II

### PEPHD20 - ELECTIVE II B: ELECTRONIC INSTRUMENTATION

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PEPHD20	<b>Title of the Course:</b> Elective II B: Electronic Instrumentation	<b>Course Type:</b> Theory	<b>Course Category:</b> Major Elective	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	--	-----------------	---------------------	---------------------

#### Course Objectives

1. To gain knowledge about electronic equipments.
2. To give to the students an application oriented paper.

#### Course Outcomes (CO)

The learners will be able to

1. Describe the Principle and working of Transistor, Thyristor and other electronic equipments used to measure the physical parameters such as Temperature, pressure and force etc., ,
2. Attain the knowledge of working principle of digital instruments ( digital pH meter, digital storage oscilloscope, digital multimeter etc.,)
3. Demonstrate about the description of analytical Instruments (UV-VIS Spectrometer, IR Spectrometer, Flame Emission Spectrometer and ICP-AES Spectrometer) which was used to characterize the materials and analyze the results.
4. Impart the knowledge in working of Bio medical instruments and its applicable to find out any defects in our human body and to save our life.
5. Understand about the essential parts of the computer and their need and develop the skills to handle above all instruments useful for our carrier.

## Course Syllabus

### Unit I: Transducers

(10 Hours)

- 1.1 Classification of Transducers- Principle, Construction and working of Thermistor (K1, K2)
- 1.2 LVDT, Electrical strain gauges (K1, K2, K3)
- 1.3 and capacitive transducers (K1, K2, K3)
- 1.4 Measurement of non-electrical quantities ( K1, K2, K3, K4)
- 1.5 Strain, Displacement - Temperature (K1, K2, K3)
- 1.6 Pressure and Force (K2, K3, K4)

### Unit II: Digital Instrumentation

(8Hours)

- 2.1 Principle, block diagram and working of Digital frequency counter (K1, K2, K3)
- 2.2 Digital multimeter(K1, K2, K3)
- 2.3 Digital pH meter (K1, K2, K3)
- 2.4 Digital conductivity meter (K2, K3)
- 2.5 Digital storage oscilloscope (K1, K2, K3)
- 2.6 Digital voltmeter (K2, K3, K4)

### Unit III: Analytical Instrumentation

(10 Hours)

- 3.1 Principle, block diagram, description, working and applications of UV-VIS Spectrometer (K1, K2, K3)
- 3.2 IR Spectrometer (K2, K3)
- 3.3 Flame Emission Spectrometer (K2, K3, K4)
- 3.4 and ICP-AES Spectrometer (K2, K3, K4)
- 3.5 Basic concepts of Gas and Liquid Chromatography (K3, K4)
- 3.6 Elemental analyzers- salt analyzers- CHN analyzers- Thermal analyzers(K3, K4)

### Unit IV: Bio-Medical Instrumentation

(10 Hours)

- 4.1 Physiological transducers to measure blood pressure, body temperature (K1, K2)
- 4.2 Sources of Bio-electric potentials - resting potential (K1, K2, K3)
- 4.3 action potential, Bio-potential electrodes (K1, K2)
- 4.4 Principle, block diagram and operation of ECG and EEG - Recorders (K1, K2, K3)
- 4.5 EMG and - ERG recorders (K3, K4, K4)
- 4.6 Lead system and recording methods - Typical waveforms - Electrical safety in medical environment - Shock hazards (K1, K2, K3)

### Unit V: Computer Peripherals

(10 Hours)

- 5.1 Printers - Printer mechanism - Classification (K1, K2)
- 5.2 Dot matrix, Ink-Jet and Laser Printers (K1, K2)
- 5.3 Basic concepts of key board and mouse - Mass storage - floppy disk - Hard Disk - Optical disk (CD) (K1, K2, K3)
- 5.4 Digital camera - video camera - microphone (K2, K3, K4)
- 5.5 External hard drives - media card readers - digital camcorders (K1, K2, K3)
- 5.6 Monitor - projector - TV screen - plotter - speakers (K2, K3, K4)

**Books for Study:**

1. Dr. Rajendra Prasad - Electronic Measurements and Instrumentation - Khanna Publications,2012.
2. S. Ramambhadran- Elements of Electronic Measurements and Instruments - Khanna Publications,1999.

**Books for Reference:**

1. S.M. Dhir - Applied Electronics and Instrumentation - Khanna Publishers,1999.
2. Khandpur - Handbook of Biomedical Instrumentation - McGraw Hill Publications, 2014.
3. Theodre S. Rappaport, Wireless Communications: Principles and Practice, Pearson Education India, 2009.
4. William Stallings - Wireless Communications and Networks –Pearson Education, Asia, 2002.

## SEMESTER II

### PIPHC20 - IEP: PHYSICS FOR SET/NET - PAPER – II

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PIPHC20	<b>Title of the Course:</b> IEP: Physics for SET/NET - paper –II	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To recall and apply the knowledge about Mathematical Physics and Electromagnetic Theory for competitive Examinations.

#### Course Outcomes (CO)

The learners will be able to

1. Recall and apply the concepts and methods in mathematical physics and solve relevant problems in any competitive exams.
2. Understand the characteristics of special functions to solve the physical problems.
3. Apply concepts of complex analysis to evaluate definite integrals, tensors, probability distribution methods and group theory in the domain of physical sciences.
4. Recall and apply the concepts and methods in Electromagnetic theory and solve problems quantitatively in any competitive exams.
5. Acquires comprehensive knowledge of the various applications of wave guides, Maxwell's equations.

CO	PSO					
	1	2	3	4	5	6

CO5	H	H	H	H	H	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Mathematical Physics-I

- 1.1 Vector field- Gradient - Divergence - Curl and Laplacian in orthogonal curvilinear (K1, K2, K3, K5)
- 1.2 Spherical and cylindrical coordinate systems (K1, K2, K3)
- 1.3 Gauss-divergence and Stoke's theorem (K1, K2, K3, K5)
- 1.4 Matrices - Types of Matrices - Diagonal matrix (K1, K2)
- 1.5 Cayley-Hamilton theorem (K1, K2, K3)
- 1.6 Eigen values and Eigen vectors(K3, K5)

### Unit II: Mathematical Physics-II Special Functions

- 2.1 Bessel, Legendre, Laguerre and Hermite polynomials (K1,K2,K3,K5)
- 2.2 Recurrence relations (K1,K3,K5)
- 2.3 Orthogonality formulae - Rodrigue's formula (K3,K5)
- 2.4 Green's function (K1, K2,K5)
- 2.5 Partial differential equations (K1,K2)
- 2.6 Laplace, wave and heat equations in two and three dimensions (K3,K5)

### Unit III: Mathematical Physics-III

- 3.1 Elements of complex analysis - Analytic functions- Poles - Residues and evaluation of integrals (K3, K5)
- 3.2 Taylor and Laurent's series (K1, K3, K5)
- 3.3 Elementary ideas of Tensors (K1, K2)
- 3.4 Laplace and Fourier Transforms - Fourier series (K3, K5)
- 3.5 Elementary probability theory - Binomial - Poisson and Normal distributions (K3, K5)
- 3.6 Introductory group theory - groups and subgroups - Abelian and cyclic groups - Point groups ( $C_{2v}$  &  $C_{3v}$ ) - reducible and irreducible representations and its theorems (K1, K2)

### Unit IV: Electromagnetic Theory- I

- 4.1 Electro statics - Gauss law and its applications (K1, K3, K5)
- 4.2 Poisson's and Laplace equations - Boundary value problems (K1, K3, K5)
- 4.3 Magnetostatics- Biot-Savart law (K1, K3, K5)
- 4.4 Ampere's theorem - Lorentz force (K1, K3, K5)
- 4.5 Maxwell's equations in free space and linear isotropic media (K1, K3, K5)
- 4.6 Boundary conditions on the fields- Gauge invariance (K1, K3, K5)

### Unit V: Electromagnetic Theory – II

- 5.1 Wave Propagation - Electromagnetic waves in free space (K1, K3, K5)
- 5.2 Dielectrics and conductors - Rectangular wave guides - Cavity resonator (K1, K2)
- 5.3 Dispersion relations in plasma (K3, K5)
- 5.4 Lorentz invariance of Maxwell's equations - Transmission lines and waveguides (K3, K5)
- 5.5 Scalar and vector potentials - Oscillating electric dipole - Pointing vector and radiated power (K3, K5)
- 5.6 Radiation from moving charges and dipoles and retarded potentials (K3, K5)

**Books for study:**

1. Sathyaprakash - Mathematical Physics, S. Chand & Sons, Reprint 2018.
2. H.K. Dass - Mathematical Physics, S.Chand, Reprint 2017.
3. Chopra Agarwal - Electromagnetic theory - K. Nath& Co. 2008
4. Sathyaprakash-Electromagnetic theory and Electrodynamics, K. Nath& Co.2019.

**Books for reference:**

1. E. Kreyszig- Advanced Engineering Mathematics, 8th Ed., Wiley, New York, 1999.
2. D.J.Griffiths - Introduction to Electrodynamics, 3rdEd.Prentice Hall of India, New Delhi, 2012.

## SEMESTER II

### PIPHD20 - IEP: MEDICAL PHYSICS AND INSTRUMENTATION TECHNIQUES

<b>Year: I</b> <b>Sem: II</b>	<b>Course Code:</b> PIPHD20	<b>Title of the Course:</b> IEP: Medical Physics And Instrumentation Techniques	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To give a perspective about the concepts of physics involved in human body.

#### Course Outcomes (CO)

The learners will be able to

1. Explain the effect of pressure on human system.
2. Explain the physics of lungs and respiratory system.
3. Explain the physics of cardiovascular system.
4. Explain the application of electricity and magnetism in medicine.
5. Explain medical imaging techniques.

CO	PSO					
	1	2	3	4	5	6
CO1	M	H	L	H	M	H
CO2	M	H	L	H	M	M
CO3	M	H	L	H	M	H
CO4	H	H	L	H	H	H
CO5	M	H	L	H	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	M	H	H	H	H
CO5	M	M	M	M	M	H

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I: Effects of Pressure on Human System**

- 1.1 Measurement of pressure in the human body (K2, K3)
- 1.2 Pressure inside the skull (K2, K3)
- 1.3 Transillumination - eye pressure - tonometers- ophthalmoscopy (K2, K3)
- 1.4 Pressure in the digestive system - urinary bladder (K2, K3)
- 1.5 Pressure in the skeletal system - stress and strain - strain gage (K2, K3)
- 1.6 Transducers for biomedical applications (K2, K3)

### **Unit II: Physics of Lungs and Breathing**

- 2.1 The airways - interaction of the blood and the lungs (K2, K3)
- 2.2 Measurement of pulmonary volume - volume relationships of the lungs (K2, K3)
- 2.3 Physics of alveoli - breathing mechanism (K2, K3, K4)
- 2.4 Pulmonary flow - pulmonary diffusion - airway resistance - measurement of airway resistance (K2, K3)
- 2.5 Work done in breathing - measurement of gaseous exchange and diffusion (K2, K3, K4)
- 2.6 Respiratory therapy equipment - physics of some common lung disease (K2, K3)

### **Unit III: Physics of Cardiovascular Systems**

- 3.1 The heart and cardiovascular system (K2, K3)
- 3.2 Oxygen and CO<sub>2</sub> exchange - work done by heart (K2, K3)
- 3.3 Pressure across the blood vessel - characteristics of blood flow - heart sounds (K2, K3)
- 3.4 Blood pressure measurement - indirect measurements - direct measurements (K2, K3, K4)
- 3.5 Percutaneous insertion - catheterization implantation of transducer - measurement of blood flow and cardiac output (K2, K3, K4)
- 3.6 Elements of intensive care monitoring - pacemakers - defibrillators (K2, K3)

### **Unit IV: Application of Electricity and Magnetism in Medicine**

- 4.1 The nervous system and neurons (K2, K3)
- 4.2 Source of bioelectric potentials - testing and action potentials (K2, K3)
- 4.3 Propagation of action potentials - electrodes - theory (K2, K3)
- 4.4 Biopotential electrodes electromyogram-electrocardiogram -electroencephalogram (K2, K3)
- 4.5 Magneto cardiogram - thermography and skin temperature measurements (K2, K3, K4)
- 4.6 Applications of high and frequency electricity in medicine (K2, K3)

### **Unit V: Medical Imaging Techniques**

- 5.1 X-rays and radio isotopes - instrumentation - X-rays in diagnosis (K2, K3, K4)
- 5.2 Medical application of radioisotopes - radiation therapy (K2, K3)
- 5.3 Principles of ultrasonic measurement - ultrasonic diagnosis (K2, K3, K4)
- 5.4 Magnetic Resonance Imaging (MRI) - Computerized Axial Tomography scanner (CAT)(K2, K3, K4)
- 5.5 Positron Emission Tomography (PET) imaging (K2, K3, K4)
- 5.6 Physiological effects of electric current - shock hazards - methods of accident prevention(K2, K3, K4)

**Books for study:**

1. J.R. Cameron and James G. Skofronick - Medical Physics - John Wiley & Sons Inc. 1978.
2. A.C. Damask - Medical Physics Vol I & II - Academic press 1978, 1981.
3. John G. Webster - Bioinstrumentation - John Wiley & Sons, Inc. 2003.
4. M. Arumugam - Biomedical Instrumentation - Anuradha publications, 2007.

**Books for reference:**

1. W. Hoppe et al. - Biophysics - Springer - Verlag 1983.
2. A.J. Vander, J.H. Sherman and D.S. Lucian - Human Physiology, McGraw –Hill (International Ed.), 1986.
3. Leslie Cromwell, Fred. J. Weibell Erich A. Pfeiffer, Biomedical Instrumentation and Measurements, Prentice Hall of India Pvt., Ltd., 2007.

## SEMESTER I & II

### PCPHG20 - PRACTICAL - I: GENERAL EXPERIMENTS

Year: I Sem: I & II	Course Code: PCPHG20	Title of the Course: Practical I: General Experiments	Course Type: Practical	Course Category: Core	H/W 3	Credits 4	Marks 100
---------------------------	----------------------------	---	------------------------------	-----------------------------	----------	--------------	--------------

#### Course Objectives

1. To understand the concepts and principles behind in experimental physics.
2. To teach the students to measure the electrical, mechanical, thermal and magnetic properties of materials.
3. Students are trained to handle advanced sophisticated equipments and analyze the data.

#### Course Outcomes (CO)

The learners will be able to

1. Measure electrical, magnetic and thermo-dynamical properties of solids.
2. Measure the thickness of glass plate (mechanical property) by using cornu's method
3. To find the wavelength of different colors through solar, mercury and hydrogen spectrum.
4. Calculate the acceptance angle and light gathering capability and attenuation properties of optical fiber and find out the Viscosity, specific rotary power and polarizability of different liquids through various experiments.
5. Develop the skills to take an accurate reading and analyze the results of experiments and to solve problems while handling with analytical instruments.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	L	H	H	H
CO2	H	H	L	M	L	H
CO3	H	H	M	M	M	H
CO4	H	H	M	H	M	H
CO5	H	H	L	M	H	H

CO	PO					
	1	2	3	4	5	6
CO1	H	M	H	H	M	H
CO2	M	H	H	M	M	M
CO3	M	H	M	H	H	H
CO4	H	M	H	M	H	M
CO5	M	H	H	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### (Any 15 experiments)

1. Cornu's method - Determination of Young's modulus of the material beam by elliptical fringes.
2. Cornu's method - Determination of Young's modulus of the material beam by hyperbolic fringes.
3. Determination of Stefan's constant.
4. Band gap energy - using point contact diode (Ge and Si)
5. Hartmann's formula - Determination of wavelength of spectral lines in mercury spectrum.
6. Determination of Rydberg's constant - Hydrogen and Neon spectrum.
7. Solar spectrum - Hartmann's interpolation formula.
8. Co-efficient of linear expansion - Air wedge method.
9. Viscosity of liquid - Meyer's disc.
10. F.P.Etalon- using Spectrometer.
11. Specific charge of an electron –Magnetron method.
12. Energy bandgap of a Semiconductor - Four Probe method (as a function of temperature).
13. Edser and Butler fringes - Thickness of air film.
14. Spectrometer - Charge of an electron.
15. Spectrometer - Polarisability of liquids by finding the refractive indices at different wavelengths.
16. Permittivity of a liquid using RFO.
17. B-H loop using Anchor ring.
18. Determination of strain hardening co-efficient.
19. Determination of Audio frequencies - Bridge method.
20. Specific heat of a liquid - Ferguson's method.
21. Measurement of Numerical aperture (NA) of a telecommunication graded index optic fiber (for different length of fibers).
22. Fiber attenuation of the given optical fiber (between different lengths of fibers).
23. Biprism - Wavelength of monochromatic source - using Spectrometer.
24. Determination of specific rotatory power of a liquid using polarimeter.
25. Compressibility of a liquid using ultrasonic interferometer.
26. Lasers: study of laser beam parameters.

## SEMESTER I & II

### PCPHH20 - ELECTRONICS LAB

Year: I Sem: I & II	Course Code: PCPHH20	Title of the Course: Electronics Lab	Course Type: Lab	Course Category: Core	H/W 3	Credits 4	Marks 100
---------------------------	----------------------------	--	------------------------	-----------------------------	----------	--------------	--------------

#### Course Objectives

1. Students will learn and understand the Basics of digital electronics.
2. To analyze logic processes and implement logical operations using combinational logic circuits.
3. To understand concepts of sequential circuits and to analyze sequential systems.
4. To analyze the different RC and LC oscillator circuits to determine the frequency of oscillation

#### Course Outcomes (CO)

The learners will be able to

1. Identify the various digital ICs and understand their operation.
2. Develop a digital logic and apply it to solve real life problems.
3. Analyze, design and implement combinational logic circuits.
4. Analyze, design and implement sequential logic circuits.
5. Design the different oscillator circuits for various frequencies.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	M	H	M	M
CO2	H	M	M	H	H	H
CO3	H	L	H	M	L	M
CO4	H	L	H	M	M	H
CO5	H	L	H	M	L	M

CO	PO

CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	M	H	H	H	H
CO5	M	M	M	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

(Any 18 experiments)

### List of experiments (K1 - K6):

1. V-I Characteristics of SCR and TRIAC.
2. Study of Rectifiers using C, L-C and Pi filters.
3. Study of Voltage - Current characteristics of UJT & UJT as a Relaxation Oscillator.
4. FET as amplifier - frequency response, input impedance and output impedance.
5. Study of V-I Characteristics of J-FET as a VVR (Voltage Variable Resistor).
6. Study of V-I Characteristics of MOSFET.
7. Op-amp - Voltage follower (Inverting) summing, difference, average amplifier-differentiator and integrator.
8. Op-amp - Solving simultaneous equations.
9. Op-amp - Design of square wave generator, triangular wave generator and saw tooth wave generator.
10. Op-amp - 4 bit D/A converter - Binary Weighted Resistor method and R-2R ladder method
11. Op-amp - Design of active Low pass, High pass, Band Pass and band rejector filter.
12. Op-amp - Study of attenuation characteristics and design of Phase Shift Oscillator.
13. Op-amp - Study of attenuation characteristics and design of Wien Bridge Oscillator.
14. IC 555 - Construction of Monostable Multivibrator, Frequency Divider
15. IC 555 - Design of Schmitt Trigger and hysteresis.
16. IC 555 - Construction of Astablemultivibrator and Voltage controlled Oscillator
17. Design of Synchronous and Asynchronous Counters using IC-7476/ 7473.
18. Construction of 4 bit Shift Register - Ring Counter and Johnson Counter - IC7476
19. Study of
  - i) Multiplexer and using IC 74150
  - ii) De-Multiplexer using IC 74154
20. Arithmetic operations (Adder/Subtractor) Using IC 7483.
21. Modulus counter using IC7490 and display using IC7447.
22. Phase locked loops using IC 555.
23. Binary adder andSubtractor using EX-OR and NAND gates.

## SEMESTER III

### PCPHI20- SPECTROSCOPY

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCPHI20	<b>Title of the Course:</b> Spectroscopy	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart the knowledge about molecular spectroscopic techniques (rotational, vibrational and magnetic resonance spectroscopy).

#### Course Outcomes (CO)

The learners will be able to

1. Describe theoretical background (classic and quantum) of spectroscopic techniques such as microwave, IR and Raman, NMR, NQR, ESR and Mossbauer spectroscopy.
2. Apply solutions of the Schrodinger equations for simple systems (rigid rotor and harmonic oscillator) to real systems (rotational and vibrational) for use in determining the molecular energy levels.
3. Analyse rotational and vibrational (microwave, IR& Raman) spectra to determine the molecular structure and physical constants.
4. Interpret NMR, NQR, ESR and Mossbauer spectra to obtain the information about the chemical, structural and magnetic properties of the material.
5. Outline the methods, instrumentation and applications (any one application) for the following spectroscopic techniques: microwave, IR, Raman, NMR, NQR, ESR and Mossbauer spectroscopy.

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	H	L	M	H

CO2	H	H	H	M	M	L
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	M	L	M	M	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Microwave Spectroscopy (14 Hours)

- 1.1 Introduction - Pure rotational spectra of diatomic molecule (K2, K3, K5)
- 1.2 Study of linear molecules and symmetric top molecules(K2, K3)
- 1.3 Hyperfine structure and quadruple moment of linear molecules(K2, K4)
- 1.4 Polyatomic molecules(K2)
- 1.5 Experimental techniques(K2, K3, K4)
- 1.6 Molecular structure determination–Stark effect–Applications to chemical analysis(K4, K5)

### Unit II: Infrared Spectroscopy (15 Hours)

- 2.1 Vibrational spectroscopy of diatomic molecules - Harmonic Oscillator - Anharmonic Oscillator(K2, K3, K4, K5)
- 2.2 Rotational vibrators (K2, K3, K4)
- 2.3 Vibrational spectroscopy of simple polyatomic molecules -Normal modes of vibration of polyatomic molecules(K2, K3, K4)
- 2.4 Inversion spectrum of ammonia (K2, K4)
- 2.5 Experimental techniques - Infrared spectro- photometer - Reflectance spectroscopy (K2, K3, K4)
- 2.6 Applications of infrared spectroscopy (K3, K4)

### Unit III: Raman Spectroscopy (13 Hours)

- 3.1 Classical and quantum theory of Raman Scattering (K2, K3, K4)
- 3.2 Raman effect and molecular structure - Raman effect and crystal structure (K2, K3, K4)
- 3.3 Raman effect in relation to inorganic, organic and physical chemistry (K3, K4)
- 3.4 Experimental techniques (K2, K3)
- 3.5 Coherent Anti Stokes Raman Spectroscopy (K2, K3, K4)
- 3.6 Applications of infrared and Raman spectroscopy in molecular structural confirmation of water and CO<sub>2</sub> molecules (K3, K4)

### Unit IV: NMR and NQR Techniques (15 Hours)

- 3.1 Theory of NMR - Bloch equations - Steady state solution of Bloch equations (K3, K4, K5)
- 3.2 Theory of chemical shifts (K2, K3, K4)
- 3.3 Experimental methods - Single coil and double coil methods - Pulse Method - High resolution method(K2, K3)
- 3.4 Applications of NMR to quantitative measurements (K3, K4, K5)
- 3.5 Quadruple Hamiltonian of NQR - Nuclear quadruple energy levels for axial and non-axial symmetry (K2, K3)
- 3.6 Experimental techniques and applications(K3, K4)

### Unit V: ESR and Mossbauer Spectroscopy (15 Hours)

- 5.1 Quantum mechanical treatment of ESR - Nuclear interaction and hyperfine structure - Relaxation effects (K2, K3, K4)
- 5.2 Basic principles of spectrograph - Applications of ESR method (K2, K3)
- 5.3 Mossbauer Effect - Recoilless emission and absorption - Mossbauer spectrum (K2, K3, K4)

- 5.4 Experimental methods - Mossbauer spectrometer(K2, K3)
- 5.5 Hyperfine interactions - Chemical Isomer shift - Magnetic hyperfine interactions - Electric quadruple interactions (K2,K3, K4, K5)
- 5.6 Simple biological applications (K3, K4, K5)

**Books for Study:**

1. Gupta Kumar Sharma - Elements of Spectroscopy –PragatiPrakashan, Meerut 2006.
2. G. Aruldas - Molecular Structure and Spectroscopy - Prentice Hall of India Pvt. Ltd., New Delhi, 2001.
3. B.K. Sharma - Spectroscopy - GOEL Publishing House, Meerut, 2005.
4. C.N. Banwell and E.M. Mc Cash - Fundamentals of Molecular Spectroscopy, 4th Edition - Tata McGraw Hill Publications, New Delhi, 1994.

**Books for Reference:**

1. D.N. Satyanarayana - Vibrational Spectroscopy and Applications, New Age International Publications, New Delhi, 2004.
2. Atta Ur Rahman - Nuclear Magnetic Resonance –SpingerVerlag, New York, 1986.
3. Towne and Schawlow - Microwave Spectroscopy - McGraw-Hill, 1995.
4. Raymond Chang - Basic Principles of Spectroscopy -McGraw Hill, Kogakusha, Tokyo, 1980.
5. D.A. Lang - Raman Spectroscopy - McGraw Hill International, N.Y., 1977.
6. D.D. Jyaji and M.D. Yadav- Spectroscopy - Amol Publications, 1991.

## SEMESTER III

### PCPHJ20 - QUANTUM MECHANICS - II

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCPHJ20	<b>Title of the Course:</b> Quantum Mechanics - II	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about various theories related to Quantum Mechanics.
2. To understand the importance of relativistic equations.
3. To impart knowledge about Quantization of fields.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the concept of scattering theory.
2. Achieve knowledge about Perturbation theory.
3. Attain Knowledge about relativistic Quantum Mechanics.
4. Assimilate the concepts of Dirac equation and its applications.
5. Gain knowledge about Quantization of fields.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Time dependent Perturbation Theory

(14 Hours)

- 1.1 Time dependent perturbation theory - Constant perturbation (First order perturbation) (K2, K4)
- 1.2 Harmonic perturbation: Transition to a discrete state - Transition to a continuum states (Fermi's Golden rule) (K3, K4, K5)
- 1.3 Absorption and emission of radiation: The electromagnetic field - The Hamiltonian operator - Electric dipole approximation (K2, K3, K4)
- 1.4 Transition probability - Einstein's A and B coefficients (K4, K5)
- 1.5 Selection rules for dipole transition - Identification of allowed transitions (K2, K4)
- 1.6 Raman scattering - Rayleigh scattering (K2, K4, K5)

### Unit II: Scattering Theory

(16 Hours)

- 2.1 Introduction - Scattering cross section - Scattering amplitude - Relationship between scattering amplitude and differential scattering cross section (K1, K2, K3)
- 2.2 Partial waves - Partial wave analysis: Scattering by a Central potential - Ramsaur-Townsend effect (K2, K4)
- 2.3 Optical theorem - Scattering by an attractive square well potential (K2, K3, K4)
- 2.4 Low energy scattering by an attractive square well potential (Breit Wigner formula)- Scattering length (K2, K4, K5)
- 2.5 Expression for Phase shifts - Born approximation - validity of Born approximation (K3, K4, K5)
- 2.6 Scattering by Screened coulomb potential - Scattering in Laboratory and centre of mass co-ordinate systems - Relationship between the cross sections and kinetic energy in centre of mass and laboratory systems (K2, K4, K5)

### Unit III: Relativistic Quantum Mechanics (14 Hours)

- 3.1 Klein-Gordon equation - Interpretation of Klein-Gordon equation (K2, K3, K4)
- 3.2 Particle in a coulomb field (K3, K4)
- 3.3 Dirac's equation for a free particle - Dirac matrices - Traces (K2, K4)
- 3.4 Covariant form of Dirac equation - Probability density (K4, K5)
- 3.5 Spin of the Dirac particle (electron) (K3, K4, K5)
- 3.6 Magnetic moment of an electron due to spin (K3, K4, K5)

### Unit IV: Dirac Equation

(14 Hours)

- 4.1 Spin orbit interaction (K4, K5)
- 4.2 Radial equation for an electron in a central potential (K3, K4)
- 4.3 Hydrogen atom problem - Lamb shift (K2, K3, K4, K5)
- 4.4 Invariance of Dirac equation under Lorentz transformation - Density matrix - Spin density matrix (K2, K4)
- 4.5 T-Transformation for the Dirac equation in the presence of electromagnetic field (K3, K4)
- 4.6 Magnetic resonance - Projection operators for energy and spin (K2, K3, K4)

## Unit V: Quantization of Fields

(14 Hours)

- 5.1 Second quantization - Concepts of Classical mechanics - Coordinates of a field (K1, K2, K3)
- 5.2 Classical field equation in Lagrangian form - Classical field equation in Hamiltonian form (K2, K3)
- 5.3 Quantization of Schrödinger equation - Creation and annihilation operators (K2, K4, K5)
- 5.4 Relativistic fields - Natural units - Quantization of Klein-Gordon field (K2, K4, K5)
- 5.5 Quantization of Dirac field (K4, K5)
- 5.6 Quantization of electromagnetic field (K4, K5)

### Books for Study:

1. G. Aruldas - Quantum Mechanics - Second edition - PHI learning private Limited, Delhi, 2009.
2. Gupta & Kumar - Quantum Mechanics - 33<sup>rd</sup> edition -Jai Prakash Nath Publications-2015.
3. Satyaprakash - Quantum Mechanics - Kedar Nath Ram Nath Publications - 2019
4. V. Devanathan - Quantum Mechanics - Narosa Publishing House, New Delhi, 2005.
5. V.K. Thankappan - Quantum Mechanics, 2<sup>nd</sup> Edition - Wiley Eastern Ltd., New Delhi, 1985.
6. B.K.Agarwal- Quantum Mechanics and Field theory - LokbharatiPrakashan publications, 2003.

### Books for Reference:

1. P.M. Mathews and K. Venkatesan - A Textbook of Quantum Mechanics - Tata McGraw Hill, New Delhi, 1976.
2. L.I. Schiff - Quantum Mechanics, 3<sup>rd</sup> Edition - International Student Edition, McGraw Hill, Kogakusha, Tokyo, 1968.
3. E. Merzbacher - Quantum Mechanics, 2<sup>nd</sup> Edition - John Wiley and Sons, New York, 1970.
4. P.A.M. Dirac - The Principles of Quantum Mechanics - Oxford University Press, London, 1973.

### SEMESTER III

#### PCPHK20 – MICROPROCESSOR AND MICRO-CONTROLLER

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PCPHK20	<b>Title of the Course:</b> Microprocessor and Microcontroller	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students understand the concepts that are involved in the Microprocessor 8085 and Microcontroller 8051.
2. To make the students understand instruction sets, addressing modes, timings, memory and I/O interfaces.

#### Course Outcomes (CO)

The learners will be able to

1. Describe Hardware, different bus cycles and memory interface to 8085 Microprocessor.
2. Develop programs using 8085 Microprocessor Instruction set and addressing modes.
3. Describe and perform different types of peripheral interfaces to 8085 Microprocessor.
4. Explain hardware, instruction set and addressing modes of Microcontroller 8051 and develop programming for basic operations.
5. Describe and perform different types of external interfaces to 8051 Microcontroller.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: 8085 Microprocessor- Architecture, Instruction set and Programming (12 Hours)

- 1.1 Architecture- Functional pin diagram (K2)
- 1.2 Buses - Address bus, data bus, multiplexing address/data bus (K2)
- 1.3 Instruction format–instruction fetch and execution–Machine and instruction cycle- T state- (K2)
- 1.4 Addressing modes- Instruction set - data transfer group- arithmetic/logic group (K2)
- 1.5 Branch group - stack and I/O control instruction (K2)
- 1.6 Programming: Picking up Largest / smallest number - Arranging an array in ascending / descending order - Code conversion: Binary to BCD and BCD to Binary, Binary to ASCII, ASCII to Binary and ASCII to BCD and BCD to ASCII (K3, K6)

### Unit II: 8085 Microprocessor- Memory and I/O interfacing (12 Hours)

- 2.1 ROM and RAM memory - Memory interface: 2K X 8, 4K x 8 ROM and RAM interface(K2)
- 2.2 8255 Programmable interface I/O –functional Pin configuration- Internal Architecture (K2)
- 2.3 Interfacing of 8255 (K2)
- 2.4 ADC interface - DAC interface - wave form generator (K2, K3, K6)
- 2.5 Hex keyboard interface - 4 step Stepper motor interface (K2, K3, K6)
- 2.6 Traffic regulation interface (K2, K3, K6)

### Unit III: 8051 Microcontroller-Architecture, Instruction set and Programming (12 Hours)

- 3.1 Introduction to Microcontroller –8051 Functional pin diagram (K2)
- 3.2 Architecture - Internal registers (K2)
- 3.3 Special function registers -Memory organizations (K2)
- 3.4 Instruction set - Addressing modes (K2)
- 3.5 Programming - Addition and Subtraction -Multiplication and Division (K3, K6)
- 3.6 Arranging an array in ascending/ descending order -Sorting out the maxima and minima (K3, K6)

### Unit IV: 8051 Microcontroller - Memory and I/O interfacing (12 Hours)

- 4.1 8051 Input/output Ports (K2, K3)
- 4.2 8051 Interrupts (K2, K3)
- 4.3 Interface 8051 to external memory and I/O devices using its I/O ports (K2, K3)
- 4.4 Counters and Timers –Serial communication using MAX232 (K2, K3)
- 4.5 Interfacing 8051 with ADC –DAC (K2, K3, K6)
- 4.6 LED Display - Hex Keyboard (K2, K3, K6)

### Unit V: Sensor Based Embedded Controller &IoT Applications (12 Hours)

- 5.1 Working principle of Sensors/Transducers: Light sensor LDR, Heat sensor LM35, IR Transmitter/ Receiver module (K2)
- 5.2 Embedded system concept–Architecture & salient features of ATmega328 (K2)
- 5.3 Programming & compiling with IDE software - Motor driver IC LM339 (K2, K3)
- 5.4 Blue tooth controller HC05 for wireless communication (K2, K3)

- 5.5 IoT applications for automation : Light activated Morning alarm - Darkness activated Garden Lights - Heat activated Fire alarm (K3, K6)
- 5.6 Intruder alarm using IR - Android mobile touch key pad controlled Robot car (K3, K6)

**Books for Study:**

1. R.S. Gaonkar - Microprocessor Architecture, Programming and Application with the 8085, 3rd Edition - Penram International Publishing, Mumbai, 1997.
2. V.Vijayendran - Fundamentals of Microprocessor 8085 - Architecture, Programming and interfacing - Viswanathan Publication, Chennai, 2002.
3. N. NagoorKanni- Microprocessor and Microcontroller –2<sup>nd</sup> Edition - Tata McGraw Hill Education Pvt. Ltd., New Delhi, 2017.
4. Muhammed Ali Mazidi and Janice Gillespie Mazidi- The 8051 Microcontroller and Embedded Systems, Fourth Indian Reprint - Pearson Education, 2004.
5. Kenneth J. Ayala - The 8051 Micro Controller Architecture, Programming and Applications, 3rd Edition - West Publishing Company, 1991.

**Books for Reference:**

1. B. Ram - Fundamentals of Microprocessors and Microcomputers – Dhanpat Rai Publications, New Delhi, 2005.
2. R. Thiagarajan, S. Dhanasekaran and S.Dhanapal - Microprocessor and its Applications, New Age International, New Delhi, 2010.
3. John B. Peatman - Design with PIC Microcontrollers, 7th Indian Reprint – Pearson Education, 2004.
4. Raj Kamal - Introduction to Embedded Systems - TMS, 2002.

## SEMESTER III

### PEPHE20 - NUMERICAL METHODS AND C-PROGRAMMING

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PEPHE20	<b>Title of the Course:</b> Numerical Methods and C-Programming	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
------------------------------------	--------------------------------	--	-------------------------------	--	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart the knowledge of numerical methods for solving problems arise in physics
2. To equip the students with the skill of C language.

#### Course Outcomes (CO)

The learners will be able to

1. Understand and apply numerical concepts to solve equations and find missing values for any physical problems
2. Solve ordinary differential equations using numerical techniques
3. Understand the basic concepts of C Language
4. Understand and use various operators and arrays in C Language
5. Develop simple programs using C language along with computational tools

CO5	H	H	M	M	M	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Solution of Equations and Interpolation

(14 Hours)

- 1.1 Methods of false position (K2, K3, K4, K5)
- 1.2 Newton's method (K2, K3, K4, K5)
- 1.3 Fixed point - Iteration method (K2, K3, K4, K5)
- 1.4 Interpolation - Lagrangian polynomials (K2, K3, K4, K5)
- 1.5 divided differences (K2, K3, K4, K5)
- 1.6 Newton's forward and backward difference formulae (K2, K3, K4, K5)

### Unit II: Numerical Differentiation, Integration and Differentiation Equations(16 Hours)

- 2.1 Derivatives - Newton's forward / backward interpolation and Stirling formula (K2, K3, K4, K5)
- 2.2 Numerical integration by Trapezoidal Solutions of equations (K2, K3, K4, K5)
- 2.3 Simple iterative methods - Newton method (K2, K3, K4, K5)
- 2.4 Numerical Integration - Simpsons 1/3 and 3/8 rules (K2, K3, K4, K5)
- 2.5 Solution to first order differential equations: Taylor series method (K2, K3, K4, K5)
- 2.6 Euler and modified Euler methods - Runge-kutta method (K2, K3, K4, K5)

### Unit III: Programming in C

(13 Hours)

- 3.1 Introduction - Basic structure of C Programming (K1, K2)
- 3.2 Character set - Key words (K1, K2)
- 3.3 Identifiers (K1, K2)
- 3.4 Variables (K1, K2)
- 3.5 Assigning values to variables (K1, K2)
- 3.6 Symbolic constant (K1, K2)

### Unit IV: Operators, Arrays and Strings

(14 Hours)

- 4.1 Operators - Arithmetic, relational, logical, assignment, increment (K1, K2)
- 4.2 Decrement conditional and special type conversion in Expressions (K1, K2)
- 4.3 Arrays - Multi dimensional arrays(K1, K2)
- 4.4 Initializing two dimensional arrays (K1, K2)
- 4.5 Initializing string variables (K1, K2)
- 4.6 Reading and writing Strings on the Arithmetic operations on strings (K1, K2)

### Unit V: Simple Programmes

(15 Hours)

- 5.1 User defined functions - their needs - Multi function programme (K3, K6)
- 5.2 Return values and their types - Calling functions (K3, K5, K6)
- 5.3 Categories of functions - Multiplication (K3, K5, K6)
- 5.4 Diagonalization and inversion - Solution and C programming (K3, K5, K6)
- 5.5 Lagrangian interpolation - Simpson's rule (K3, K5, K6)
- 5.6 Euler method- Runge- Kutta method (K3, K5, K6)

**Books for Study:**

1. T. Veerarajan and T. Ramachandran, Numerical Methods with Programming in C, Second Edition, Tata McGraw Hill, 2007
2. E. Balagurusamy - Computing Fundamentals and Programming, ANSI C, 3<sup>rd</sup> Edition - Tata McGraw Hill Education, Ltd., 2014.
3. G. Balaji - Numerical Methods, 9<sup>th</sup> Edition - G. Balaji Publishers, Chennai, 2008.

**Books for Reference:**

1. S. Kalavathy, M. JoicePunitha - Numerical Methods, 2nd Edition - Vijay Nicole imprints Pvt. Ltd.,2010.
2. Kandasamy P., K. Thilagavathy and K. Gunavathy, Numerical Methods, S. Chand Co. Ltd., New Delhi, 2003.
3. A. Singaravelu, Numerical Methods, Meenakshi Agency, 2016.

### SEMESTER III

#### PEPHF20 - ELECTIVE - III B: ADVANCED OPTICS

<b>Year:</b> II <b>Sem:</b> III	<b>Course Code:</b> PEPHF20	<b>Title of the Course:</b> Advanced Optics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core Elective	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
--	--------------------------------	--	-------------------------------	--	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide the knowledge on optics for higher studies.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the basic concepts of Laser theory
2. Understand and describe the different types of Laser
3. Explain the propagation of Laser beam
4. Describe the principle, types and loss of optical fiber
5. Understand the importance of nonlinear optics and apply the concepts of NLO to optical materials.

CO4	H	M	L	M	M	M
CO5	H	H	M	H	M	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Basic Laser theory

(9 Hours)

- 1.1 Historical background of laser (K1, K2)
- 1.2 Einstein coefficients and (K1, K2, K3)
- 1.3 Stimulated light amplification (K1, K2)
- 1.4 Population inversion (K1, K2)
- 1.5 Creation of population inversion in three level and four level lasers (K3, K4)
- 1.6 Applications (K4, K5)

### Unit II: Basic laser systems

(10 Hours)

- 2.1 Gas Lasers - CO<sub>2</sub> laser - N<sub>2</sub> Laser (K1, K2, K3)
- 2.2 Helium Neon - Argon, Krypton, and Xenon ion lasers (K1, K2, K3)
- 2.3 Solid state laser - Nd:YAG Laser (K2, K3, K4)
- 2.4 Semiconductor laser - Ruby Laser (K2, K3, K4)
- 2.5 Liquid laser - Europium Chelate (K2, K3, K5)
- 2.6 Dye Laser - Coumarin dye laser (K2, K3, K4)

### Unit III: Laser Beam Propagation

(9 Hours)

- 3.1 Laser beam propagation - properties of Gaussian beam (K1, K2, K3)
- 3.2 Resonator - stability - various types of stability (K2, K3, K4)
- 3.3 Resonator for high gain and high energy lasers (K2, K3, K4)
- 3.4 Gaussian beam focusing - Properties of Laser Radiation (K1, K2, K3)
- 3.5 Mode Locking Lasers - Basic principle - Techniques (K1, K2, K3)
- 3.6 Q Switching - Pulse Shaping (K2, K3, K4)

### Unit IV: Fiber optics

(10 Hours)

- 4.1 Optical fiber waveguides principles - acceptance angle - Total internal Reflection - Numerical aperture (K1, K2, K3)
- 4.2 types of fibers- step index - graded index - single mode - multi mode - step index multi-mode fiber - graded index multi-mode fiber (K1, K2, K3)
- 4.3 attenuation in fiber- Losses in fiber- fiber bandwidth - Fiber alignment and joint loss (K2, K3, K4)
- 4.4 Fabrication of optical fiber- Liquid Phase- Vapour phase deposition - Chemical vapour deposition (K2, K3, K4)
- 4.5 Fiber splices - Mechanical splices - Fiber connectors: cylindrical ferrule expanded beam connectors (K3, K4, K5)
- 4.6 Fiber couplers: Three and four port couplers - star couplers (K3, K4, K5)

### Unit V: Non-linear optics

(10 Hours)

- 5.1 Introduction - origin of non-linearity (K1, K2, K3)
- 5.2 Susceptibility tensor - phase matching - second harmonic generation (K1, K2, K3)
- 5.3 Kurtz powder method of finding SHG - Z-scan technique (K1, K2, K3)
- 5.4 Intensity dependent refractive index - self-focusing - Phase matching - four wave mixing (K1, K3) - frequency mixing processes (K2, K3, K4)
- 5.5 Nonlinear Schrödinger equation for solitons - soliton switching - soliton laser- advantages of soliton based communication (K3, K4, K5)

## 5.6 Applications of Non-linear optical materials (K3, K4, K5)

### **Book for study:**

1. Murugesan and KiruthigaSivarprasath- Modern Physics , 17<sup>th</sup> Revised Edition- S.Chand&Co.Pvt Ltd., New Delhi,2017
2. K. Thyagarajan, and A.K. Ghatak - Laser Theory and Applications –MacmillanIndia Ltd,1997.
3. B.B. Laud - Lasers and Non Linear Optics - Wiley Eastern Ltd.,1991.
4. R.L. Sautherland- Handbook of Non LinearOptics

### **Books for Reference:**

1. AjoyGhatakandK.Thyagaran- IntroductiontoFiberOptics- CambridgeUniversity Press, 6<sup>th</sup>Ed.,2006.
2. K.R. Nambiar - Laser Principles, Types and Applications - New Age International, 2004.
- 3.Robert W Boyd - Non linearFiber Optics, 2<sup>nd</sup> Ed., Elsevier,2006.

### SEMESTER III

#### PIPHE20 - IEP: PHYSICS FOR SET/NET-PAPER III

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code:</b> PIPHE20	<b>Title of the Course:</b> IEP: Physics for SET/NET - Paper III	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
------------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about Quantum Mechanics, Atomic & Molecular Physics and Spectroscopy for competitive Examination.

#### Course Learning Outcomes (CO)

The learners will be able to

1. Understand about Schrödinger equation, ladder operators and the concepts of time independent theory to solve Eigen value problems
2. Describe the properties of relativistic quantum mechanics and solve the problems using Fermi's Gold rule.
3. Understand the energy levels and structure of hydrogen atom and to solve the problems using ESR, NMR and Frank-Condon Principle.
4. Attain the basic concepts and theories in basic elements of atomic and molecular spectroscopy, classical/Quantum description of electronic, vibrational and rotational spectra and solve the problem related to that.
5. Gain the knowledge to solve the problems by using the theory of Raman, NMR and Spin resonance spectroscopy in order to face competitive exams and for perusing higher research work.

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Quantum Mechanics I

- 1.1 Wave- particle duality - Schrodinger Equation - Time dependent and Time independent (K1, K2, K3)
- 1.2 Expectation value - Uncertainty principle - Ladder operators (K1, K2, K3)
- 1.3 Eigen value problems particle in a box - Harmonic oscillator (K2, K3, K4)
- 1.4 Spherical well - Tunneling through a barrier - Hydrogen atom, Coordinate and Momentum representations (K2, K3, K4)
- 1.5 1.5 Approximation methods - Time independent perturbation theory - Hydrogen variation method (K3, K4, K5, K6)
- 1.6 WKB method. Angular momentum operators - CG coefficients - Pauli's spin matrices (K3, K4, K5, K6)

### Unit II: Quantum Mechanics II

- 2.1 Scattering theory - Scattering amplitude - Cross sections (K1, K2)
- 2.2 Partial wave analysis - Effective range theory - Optical theorem (K1, K2, K3)
- 2.3 Time dependent perturbation theory - Transition probabilities - Fermi's Golden rule and selection rules for dipole radiations (K1, K2, K3, K4)
- 2.4 Klein-Gordan equation - Dirac equation ( K3, K4, K5)
- 2.5 Plane wave solution - Negative energy states - Antiparticles - Properties of Gamma matrices (K3, K4, K5, K6)
- 2.6 Quantization of fields - Semi classical theory of radiation - Creation - Destruction and Number operators (K3, K4, K5)

### Unit III: Atomic and Molecular Physics –I

- 3.1 Quantum states of an electron in an atom - Electron spin (K1, K2)
- 3.2 Spectrum of helium and alkali atom. –Relativistic corrections for energy levels of hydrogen atom (K1, K2, K3)
- 3.3 Hyperfine structure and isotopic shift - Width of spectrum lines - (K1, K2, K3, K4)
- 3.4 LS & JJ couplings - Zeeman, Paschen - Bach & Stark effects (K2, K3, K4)
- 3.5 Electron spin resonance - Nuclear magnetic resonance - (K3, K4, K5)
- 3.6 Chemical shift - Frank-Condon principle (K4, K5)

### Unit IV: Atomic and Molecular Physics –II

- 4.1 Born-Oppenheimer approximation (K1, K2)
- 4.2 Electronic, rotational, vibrational and Raman spectra of diatomic molecules, selection rules (K1, K2, K3)
- 4.3 Lasers: spontaneous and stimulated emission (K2, K3, K4)
- 4.4 Einstein A & B coefficients. Optical pumping (K3, K4)
- 4.5 Population Inversion - Rate equation (K2, K3, K4)
- 4.6 Modes of resonators and Coherence length (K2, K3, K4, K5)

### Unit V: Spectroscopy

- 5.1 Rotational spectra of diatomic - Polyatomic and symmetric top molecules (K1, K2, K3)
- 5.2 IR of diatomic and simple polyatomic molecules - Harmonic/anharmonic oscillator (K2, K3)

- 5.3 Normal modes of vibrations - Raman scattering - Raman Effect in inorganic - Organic and physical chemistry (K1, K2)
- 5.4 NMR - chemical shift - Single coil and double coil methods (K2, K3, K4)
- 5.5 NQR - Nuclear quadrupole energy levels for axial/non-axial symmetry (K2, K3, K4)
- 5.6 ESR - Nuclear interaction and hyperfine structure. Mossbauer Effect - Hyperfine/electric quadrupole interactions (K3, K4, K5)

**Book for study:**

1. G. Aruldas - Quantum mechanics, PHI Learning, 2008.
2. Gupta Kumar Sharma - Quantum Mechanics Jai Prakash Nath Publications, 2012.
3. Devanathan - Quantum Mechanics
4. B.K. Sharma - Spectroscopy - Goel publishing House Krishna Prakashan Media Pvt., Ltd., 2017.

**Book for Reference:**

## Course Syllabus

### **Unit I: Solution of Equations and Numerical Integrations (14 Hours)**

- 1.1 Fixed point iteration method (K2, K3, K4, K5)
- 1.2 Newton's Raphson method (K2, K3, K4, K5)
- 1.3 Solutions of simultaneous equation (K2, K3, K4, K5)
- 1.4 Numerical integration using Trapezoidal(K2, K3, K4, K5)
- 1.5 Simpson's 1/3 rule (K2, K3, K4, K5)
- 1.6 Simpson's 3/8 rule (K2, K3, K4, K5)

### **Unit II: Numerical Differentiations (14 Hours)**

- 2.1 Solutions of equations (K2, K3, K4, K5)
- 2.2 Numerical Differentiation (K2, K3, K4, K5)
- 2.3 Numerical solution of first order differential equations (K2, K3, K4, K5)
- 2.4 RungeKutta method (K2, K3, K4, K5)
- 2.5 Taylor series method (K2, K3, K4, K5)
- 2.6 Euler's and modified Euler's method (K2, K3, K4, K5)

### **Unit III: Research Methodology - An Introduction (13 Hours)**

- 3.1 Meaning of research - Objectives of research (K1, K2)
- 3.2 motivation of research (K1, K2)
- 3.3 Types, approaches and significance - Methods versus methodology (K1, K2)
- 3.4 Research in scientific methods - Research process (K1, K2, K3, K5)
- 3.5 Criteria for good research - Problem encountered by research in India-(K1, K2, K4)
- 3.6 Funding agencies (K1, K2)

### **Unit IV: Research Design (15 Hours)**

- 4.1 Identification of the problem - Literature Survey (K1, K2, K6)
- 4.2 Reference Collection (K1, K6)
- 4.3 Necessity and techniques involved in defining the problem (K1, K2, K4)
- 4.4 Research design - Needs and features of good design (K3, K4, K5)
- 4.5 Different research design (K3, K4, K5, K6)
- 4.6 Basic principles of experimental designs (K1, K2)

### **Unit V: Research Communication (16 Hours)**

- 5.1 Meaning of research report - Logical format for writing thesis and paper (K1, K2)
- 5.2 Essential of scientific report: abstract, introduction (K1, K2)
- 5.3 Review of literature, materials and methods and discussion - The use of quotation (K1, K2)
- 5.4 Footnotes - tables and figures - referencing - appendixes - revising the paper or thesis (K2, K6)
- 5.5 Oral power point presentation - Poster preparation (K1, K2, K6)
- 5.6 Editing and evaluating and the final product - proof reading - the final types copy (K1, K2, K6)

**Books for Study:**

1. Dr. G. Balaji - Numerical Methods 15<sup>th</sup> edition - G.Balaji Publishers-2017
2. E. Balagurusamy - Numeric Methods - Tata Mc Graw Hill.
3. C.R. Kothari and Gaurav Garg - Research Methodology, Methods and Techniques - New age International Publishers, III Edition. 2014
4. Santosh Gupta - Research Methodology Methods and Statistical Techniques
5. Rajammal et al., -A hand Book of Methodology of Research - Sri Ramakrishna Mission Vidyalaya Press, Coimbatore.

**Books for Reference:**

1. C.Hawkins& M Sorgi - Research Ed Norosa Publishing House, New Delhi - 2000
2. Robert Ross - Research: An introduction - - Harper and Row Publications.
3. P. Saravanel - Research methodology - - KitlabMahal, Sixth Edition.
4. R.A. Day - How to write and publish a scientific paper - Cambridge University Press.
5. Anderson - Thesis and Assignment writing - - Wiley Eastern Ltd.

## SEMESTER IV

### PCPHL20 - MATERIALS SCIENCE AND LASER PHYSICS

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCPHL20	<b>Title of the Course:</b> Materials Science and Laser Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 5	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about phase diagram and defects in crystals
2. To acquire knowledge about polymer and ceramics
3. To understand the principle and working of lasers

#### Course Outcomes (CO)

The learners will be able to

1. To acquire knowledge about phase diagrams
2. To Impart knowledge about defects in crystals
3. Learn the basic principles of optical, Dielectric and Ferro Electric properties of materials
4. To acquire knowledge about polymer and ceramics
5. To understand the principle and working of Lasers

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	L	M	L	L
CO2	H	M	M	H	H	M
CO3	M	L	M	M	H	M
CO4	H	L	M	M	M	M
CO5	H	M	L	H	M	H

CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	M	H	H	H	H
CO5	M	M	M	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Phase Diagram & Defects (15 Hours)

- 1.1 Phase diagram - Basic principles - Simple binary systems - Solid solutions (K1, K2, K3)
- 1.2 Eutectic systems- Application - Interstitial and substitution solid solutions (K1, K2)
- 1.3 Elementary Ideas of corrosion - Oxidation - Creep and fracture (K4, K5)
- 1.4 Dislocations- Edge and screw dislocations - Stress fields around dislocations - Density - Work hardening (K1, K2, K4)
- 1.5 Plastic deformation - Slip - Motion of dislocations under uniform Shear Stress (K3, K4, K5)
- 1.6 Effect of grain size on dislocation motion –Effect of solute atoms on dislocation motion (K3, K4)

### Unit II: Optical Properties (13 Hours)

- 2.1 Atomic and Electromagnetic Radiation - Light Interactions with Solids (K1, K2, K3)
- 2.2 Electronic Interactions (K1, K2)
- 2.3 Refraction - Reflection - Absorption - Transmission (K1, K2, K3)
- 2.4 Colourcenters- Photo conductivity - Electronic transitions in Photo conductors (K1, K2)
- 2.5 Trap, capture, recombination centers- Luminescence (K1, K2, K3)
- 2.6 Excitation and emission Decay mechanisms -(K1, K2, K4)

### Unit III: Magnetic Properties (14 Hours)

- 3.1 Diamagnetism and Paramagnetism(K1, K2)
- 3.2 Ferromagnetism - Antiferromagnetism and Ferrimagnetism (K1, K2)
- 3.3 Thallium activated alkali halides - Sulfide phosphorous - Ferroelectrics (K2, K3, K4)
- 3.4 Ferro electricity - General properties - Dipole theory (K1, K2)
- 3.5 Ionic displacements and the behaviour of BaTiO<sub>3</sub> - Spontaneous polarization of BaTiO<sub>3</sub>(K3, K4, K5)
- 3.6 Thermodynamics of Ferro electric transitions (K1, K2)

### Unit IV: Elastic Behaviour, Polymer and Ceramics (14 Hours)

- 4.1 An elastic and visco elastic behaviour - Atomic model of elastic behaviour (K1, K2)
- 4.2 Rubber like elasticity - An elastic deformation - Relaxation process (K2, K3, K4)
- 4.3 Model for visco elastic behaviour - Polymers - Polymerization mechanism (K1, K2)
- 4.4 Polymer structures - Deformation of polymers - Behaviour of polymers (K1, K2, K4)
- 4.5 Ceramics - Ceramic phases - Structure - classes (K1, K2)
- 4.6 Effect of structure on the behaviour of ceramic phases - composites and its basic properties (K3, K4, K5)

### Unit V: Laser Physics (16 Hours)

- 5.1 Introduction - Interaction of radiation with matter - Spontaneous and stimulated emission (K1, K2)
- 5.2 Conditions for oscillation to occur - Frequency of oscillation of the system (K1, K2, K4)
- 5.3 Einstein co-efficient - Population inversion - Laser pumping Rate equations (K1, K2)
- 5.4 Three level laser - Four level Laser - Nd:YAG Laser - He-Ne Laser - Optical resonator (K3, K4, K5)

- 5.5 Types and modes of resonator - Oscillation - Threshold condition - The confocal resonant cavity (K1, K2)
- 5.6 Theory - Spot size and beam divergence - quality factor (Q) of an optical cavity (K2, K3, K4)

**Books for Study:**

1. G.K. Narula, K.S. Narula and V.K. Gupta - Material Science, TMH, New Delhi, 1995.
2. A.J. Dekker - Solid State Physics - McMillan Co., 1981.
3. V.Ragavan - Material Science and Engineering, 4th Edition - Prentice Hall of India, New Delhi, 2003.
4. M. Arumugam - Materials Science, 3rd Edition - Anuradha Agencies, 2002.

**Books for Reference:**

1. Lawrence H. Vlack - Elements of Materials Science and Engineering, 6th Edition -Reprint, Addison-Wesley, 1998.
2. H. Iabch and H. Luth - Solid State Physics: An introduction to Principles of Material Science, 2nd Edition, Springer, 2001.
3. B.B. Laud - Lasers and Non linear optics, Wiley Eastern Ltd, 1991.
4. Verdayan J.J. - Laser Electronics - Prentice-Hall India, New Delhi, 1993.
5. Allen and Jones - Principles of Gas Lasers - Butterworths, London, 1967.
6. K.R. Nambiar - Laser Principles, Types and Application - New Age International, 2004.
7. K. Thyagarajan and A.K. Ghatak - Laser Theory and Applications - Macmillan India Ltd., 1997.

## SEMESTER IV

### PCPHM20- NUCLEAR AND PARTICLE PHYSICS

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCPHM20	<b>Title of the Course:</b> Nuclear And Particle Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about nuclear- interactions, reactions, models and basic concepts in elementary particles.

#### Course Outcomes (CO)

The learners will be able to

1. Apply core concepts in physics to understand nuclear interactions, features of nuclear reactions and characteristics of radioactive decays (beta & gamma).
2. Describe basic nuclear structure and nuclear properties by applying the mathematical theory and models (liquid drop model, Shell model, collective model, optical model etc.)
3. Evaluate some basic nuclear parameters such as radius, BE, Q-value, nuclear spin, parity etc.
4. Classify elementary particles (based on interactions and spin) and explain the fundamental concepts in particle physics (conservation laws, parity violation, interactions etc.)
5. Study the substructure and symmetries in elementary particles (SU (2) &SU (3)); apply Quark model to find the missing particle.

CO	PSO					
	1	2	3	4	5	6
CO1	H	L	H	L	M	M
CO2	H	L	H	H	M	M
CO3	H	L	H	M	M	M

CO2	H	M	H	H	M	M
CO3	H	M	H	M	M	M
CO4	H	M	L	L	M	L
CO5	H	L	H	M	M	L

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Nuclear Interactions

(14 Hours)

- 1.1 Introduction - Nuclear forces - Two body problem (K1, K2)
- 1.2 Ground state of deuteron - Magnetic moment - Quadrupole moment - Tensor forces (K2, K3, K4)
- 1.3 Meson theory of nuclear forces - Yukawa potential (K3, K4)
- 1.4 Nucleon - Nucleon scattering - Low energy n-p scattering (K2, K3, K4)
- 1.5 Effective range theory - Spin dependence (K3, K4)
- 1.6 Charge independence and charge symmetry of nuclear forces-Isospin formalism (K3, K4)

### Unit II: Nuclear Reactions

(15 Hours)

- 2.1 Types of reactions and conservation laws (K1, K2)
- 2.2 Energetic of nuclear reactions –Dynamics of nuclear reactions - Q-value equation (K2, K3, K4, K5)
- 2.3 Scattering and reaction cross sections (K3, K4, K5)
- 2.4 Compound nucleus reactions -Scattering matrix - Reciprocity theorem (K2, K3, K4)
- 2.5 Breit - Wigner one level formula - Resonance scattering (K2, K3, K4)
- 2.6 Continuum theory - Optical model (K3, K4)

### Unit III: Nuclear Models

(13 Hours)

- 3.1 Introduction - Liquid drop model (K2, K3, K4)
- 3.2 Semi empirical mass formula of Weizsacker- Nuclear stability- Mass parabolas (K3, K4, K5)
- 3.3 Bohr-Wheeler theory of fission (K3, K4, K5)
- 3.4 Shell model - Spin-orbit coupling - Magic numbers (K3, K4)
- 3.5 Angular momenta and parities of nuclear ground states (K4, K5)
- 3.6 Collective model of Bohr and Mottelson-Nilsson Model - Oblate and prolate deformations of Nucleus (K3, K4)

### Unit IV: Nuclear Decay

(15 Hours)

- 4.1 Beta decay - Fermi theory of beta decay - Fermi - Curie Plot (K3, K4, K5)
- 4.2 Fermi and Gamow- Tellar selection rules - Allowed and forbidden decays - Decay rates (K4, K5)
- 4.3 Theory of neutrino - Helicity of neutrino (K2, K4)
- 4.4 Theory of electron capture - Non conservation of parity (K3, K4)
- 4.5 Gamma decay - Multipole transitions in nuclei (K3, K4)
- 4.6 Internal conversion - Nuclear isomerism (K3, K4)

### Unit V: Elementary Particle Physics

(15 Hours)

- 5.1 Types of interaction between elementary particles - Hadrons and leptons (K2, K4)
- 5.2 Quantum numbers and conservation laws (K2)
- 5.3 Symmetries - Elementary ideas of CP and CPT invariance (K2, K4)
- 5.4 Classification of hadrons - SU(2) and SU(3) multiplets (K3, K4, K5)
- 5.5 Quark model - Gell-Mann-Okubo mass formula for octet and decupled hadrons (K3, K4, K5)
- 5.6 Charm, bottom and top quarks (K2)

**Books for Study:**

1. M.L. Pandya and R.P.S. Yadav - Elements of Nuclear Physics, 7th Edition, KedarNath Ram Nath, Delhi, 1995.
2. D.C.Tayal- Nuclear Physics - Himalaya Publishing House, 2006.
3. S.N. Ghoshal - Atomic and Nuclear Physics, Vol. 2 - S Chand & Co. Ltd., 2000.
4. V.Devanathan- Nuclear Physics, 2nd Edition - Narosa Publication, 2011.

**Books for Reference:**

1. K. S. Krane - Introductory Nuclear Physics - Wiley, New York, 1987.
2. D. Griffiths - Introduction to Elementary Particle Physics - Harper & Row, New York, 1987.
3. R. R. Roy and B.P. Nigam - Nuclear Physics - New age Intl. New Delhi, 1983.
4. H. A. Enge - Introduction to Nuclear Physics - Addison-Wesley, Tokyo, 1983.
5. Y. R. Waghmare - Introductory Nuclear Physics - Oxford-IBH, New Delhi, 1981.
6. J. M. Longo - Elementary particles, McGraw Hill, New York, 1971.
7. R. D. Evans - Atomic Nucleus - McGraw Hill, New York, 1955.
8. Kaplan - Nuclear Physics - Narosa, New Delhi, 1989.
9. B. L. Cohen - Concepts of Nuclear Physics - TMH, New Delhi, 1971.
10. M. K. Pal - Theory of Nuclear Structure - Affl. East-West, Chennai, 1982.
11. W. E. Burcham and M. Jobses - Nuclear and Particle Physics - Addison-Wesley, Tokyo, 1995.

## SEMESTER IV

### PCPHN20 - CONDENSED MATTER PHYSICS

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCPHN20	<b>Title of the Course:</b> Condensed Matter Physics	<b>Course Type:</b> Theory	<b>Course Category:</b> Core	<b>H/W</b> 6	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To relate crystal structure to symmetry, recognize the correspondence between real and reciprocal space.
2. To know about the theories of metals and semiconductors
3. To develop an understanding of the dielectric properties and ordering of dipoles in ferroelectrics.
4. To get familiarized with the different parameters associated with superconductivity and the theory of superconductivity.

#### Course Learning Outcomes (CO)

The learners will be able to

1. Able to correlate the X-ray diffraction pattern for a given crystal structure.
2. Formulate the theory of lattice vibrations and use that to determine thermal properties of solids.
3. Ability to understand theory of metals and semiconductors.
4. Able to differentiate between ferroelectric, anti-ferroelectric materials.
5. Able to differentiate between type-I and type-II superconductors and their theories.

CO	PSO					
	1	2	3	4	5	6
CO1	H	M	L	M	L	M
CO2	M	H	L	M	H	H
CO3	H	M	L	H	L	L
CO4	M	H	L	M	L	L
CO5	H	M	L	M	H	M

CO	PO

CO2	M	H	H	H	H	H
CO3	H	H	L	M	M	H
CO4	H	H	LH	M	M	M
CO5	H	L	M	M	H	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Crystal Physics

(13 Hours)

- 1.1 Types of lattices - Miller indices - Simple crystal structures (K1, K2)
- 1.2 Crystal diffraction - Bragg's law (K1, K2)
- 1.3 Reciprocal lattice [Sc, bcc, fcc] - Laue equation (K1, K2, K5)
- 1.4 Structural factor - Atomic form factor (K1, K2)
- 1.5 Types of crystal binding - Cohesive energy of ionic crystals (K1, K2)
- 1.6 Madelung constant - types of crystal bonding (general ideas) (K1, K2)

### Unit II: Lattice Dynamics

(14 Hours)

- 2.1 Monoatomic lattices - lattices with two atoms per primitive cell (K1, K2)
- 2.2 First Brillouin zone - group and phase velocities (K1, K2)
- 2.3 Quantization of lattice vibrations - Phonon momentum (K1, K2, K3)
- 2.4 Inelastic scattering by phonons - Debye's theory of lattice heat capacity (K1, K2)
- 2.5 Einstein's model and Debye's model of specific heat (K1, K2, K5)
- 2.6 Thermal expansion - Thermal conductivity - Umklapp processes (K1, K2)

### Unit III: Theory of Metals and Semiconductors

(15 Hours)

- 3.1 Free electrons gas in three dimensions - Electronics heat capacity - Wiedmann Franz law (K1, K2, K3)
- 3.2 Hall effect - Bloch theorem - Kronig-Penny model (K1, K2, K5)
- 3.3 Band theory of metals and semiconductors (K1, K2)
- 3.4 Semiconductors - Density of States - Intrinsic and Extrinsic carrier concentration (K1, K2, K3)
- 3.5 Mobility - Impurity conductivity (K1, K2)
- 3.6 Fermi surfaces and construction - De Haas Van Alphen effect (K2, K4, K5)

### Unit IV: Magnetism

(16 Hours)

- 4.1 Elementary ideas of dia, Para and Ferro magnetism - quantum theory of paramagnetism (K1, K2, K3)
- 4.2 Rare earth ion - Hund's rule - Quenching of orbital angular momentum - Adiabatic demagnetization Quantum theory of ferromagnetism (K1, K2)
- 4.3 Curie point Exchange integral - Heisenberg's interpretation of Weiss field (K1, K2, K3)
- 4.4 Ferromagnetism domains - Bloch Wall - Spin waves quantization - Magnons (K1, K2)
- 4.5 Thermal excitation of magnons - Curie temperature and susceptibility of ferrimagnetisms (K1, K2, K3)
- 4.6 Theory anti ferromagnetism - Neel temperature (K1, K2)

### Unit V: Super Conductivity

(14 Hours)

- 5.1 Experimental facts - occurrence - Effect of magnetic fields - Meissner effect (K1, K2)
- 5.2 Entropy and heat capacity - Energy gap - Microwave and infrared properties (K1, K2, K5)
- 5.3 Type I and type II Super conductors - Theoretical explanation (K1, K2, K3)
- 5.4 Thermodynamics of Super conducting transition - London equation - Coherence length (K1, K2)
- 5.5 Theory - Single particle tunneling - Josephson tunneling (K1, K2)

5.6 DC and AC Josephson's effect - High temperature super conductors - SQUIDS (K1, K2, K4)

**Books for Study:**

1. S.O Pillai - Solid State Physics, 7th Edition - New Age International, Delhi, 2015.
2. Guptha Kumar - Solid State Physics, 9th Edition - K.Nath& Co. Education, 2006.
3. K.Ilangovan - Solid State Physics - MJP Publications, Chennai, 2013.

**Books for Reference:**

1. A.J. Dekkar - Solid State Physics - Macmillan India, New Delhi, 2007.
2. H.M. Rosenberg - The Solid State Physics, 3rd Edition - Oxford University, Oxford. 1993.
3. S.L. Altman - Band Theory of Metals: The Elements - Pergamon Press Ltd., Oxford, 1970.
4. J.M. Ziman - Principles of the Theory of Solid - Cambridge University Press, London, 1971.
5. C. Kittel - Introduction to Solid State Physics, 7th Edition - New York, 1996.
6. M.Ali Omar - Elementary Solid State Physics: Principles, Applications - Addison- Wesley, London, 1974.
7. H.P. Myers - Introductory Solid State Physics, 2nd Edition - V K Taylor Francis Ltd., 1998.

## SEMESTER IV

### PEPHG20 - ELECTIVE IV A: FIBER OPTICS AND NON-LINEAR OPTICS

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PEPHG20	<b>Title of the Course:</b> Fibre Optics and Non-Linear Optics	<b>Course Type:</b> Theory	<b>Course Category:</b> Major Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To make the students understand the concepts of fiber optics, Non linear optics and their applications.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the basic principles and concepts in optical fiber and describe the properties of optical sources.
2. Distinguish between the various types and the characteristics of optical fiber.
3. Analyze and comparing the different fabrication process of fiber.
4. Describe various losses and connectors in optical fiber.
5. Understand non-linear effects in optical fiber and their applications.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	M	H	H	M
CO2	H	H	M	H	M	M
CO3	H	H	H	M	H	H

CO2	H	H	H	M	M	M
CO3	H	M	M	H	H	H
CO4	H	H	H	M	H	M
CO5	M	H	M	H	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Optical fiber waveguides and sources

(13 hours)

- 1.1 Ray theory transmission: Total internal reflection, acceptance angle, numerical aperture and skew rays (K1, K2, K3, K6)
- 1.2 Phase shift with total internal reflection and the evanescent field -Goos- Haechen shift (K1, K2, K3)
- 1.3 Sources: LED-structure - Light source materials - Quantum efficiency and LED power - Modulation of LED - Transient response (K1, K2, K5)
- 1.4 Laser diode modes and threshold conditions for laser oscillations (K1, K2, K3)
- 1.5 Laser diode structures and radiation patterns(K1, K2, K6)
- 1.6 Modulation of laser diode –Temperature effects - Mode locking laser - Light source linearity and reliability (K1, K2, K3)

### Unit II: Types of Optical Fibers

(11 Hours)

- 2.1 Glass and plastic fibers - Step index - single mode - Multimode - Graded index fibers-wave propagation (K1, K2)
- 2.2 Fiber modes - Step index single mode fiber- step index multimode fiber - Graded index multi-mode fiber (K1, K2, K3)
- 2.3 Single mode fibers- cutoff wavelength - mode field diameter and spot size - effective refractive index (K1, K2, K3)
- 2.4 Fiber loss - Attenuation coefficient - Material absorption losses in silica glass fibers- Intrinsic and extrinsic absorption (K1, K2, K4)
- 2.5 Linear Scattering losses - Rayleigh scattering - Mie scattering - Non linear Scattering losses - Stimulated Brillouin scattering - Stimulated Raman scattering (K1, K2, K3)
- 2.6 Fiber bend loss - Intermodal dispersion - Multimode step index - Multimode graded index - Modal noise - Overall fiber dispersion - Multimode - single mode fibers (K3, K4, K5)

### Unit III: Fabrication and Connection of Optical Fibers

(11 Hours)

- 3.1 Glass fibers - Preparation of optical fibers(K1, K2)
- 3.2 Liquid-phase (melting) technique - fiber drawing (K1, K2)
- 3.3 Vapour-phase deposition techniques - outside vapour phase deposition (K1, K2, K3)
- 3.4 Modified chemical vapour deposition (K1, K2, K3, K4)
- 3.5 Plasma activated chemical vapour deposition (K2, K3, K5)
- 3.6 characteristics of single-mode, multimode, plastic-clad and all-plastic fibers(K4, K5, K6)

### Unit IV:Transmission Characteristics

(12 Hours)

- 4.1 Stability of Fiber Transmission Characteristics: Micro bending and hydrogen absorption (K1, K2)
- 4.2 fiber alignment and joint loss - Single mode fiber- Multimode fiber(K1, K2, K3)
- 4.3 fiber splices - Tube splices, Fusion splices (K2, K3, K4)
- 4.4 Mechanical Splices (K4, K5, K6)
- 4.5 Fiber connectors: cylindrical ferrule expanded beam connectors - GRIN rod lenses ( K3, K5, K6)
- 4.6 Fiber couplers: Three and four port couplers - star couplers (K4, K5, K6)

## **Unit V: Nonlinear Optics and Solitons**

**(13 Hours)**

- 5.1 Wave propagation in an anisotropic crystal - Polarization response of materials to light (K1, K2)
- 5.2 Second order non-linear optical processes - Sum and difference frequency generation (K1, K2)
- 5.3 Third order nonlinear optical processes - third harmonic generation (K1, K2)
- 5.4 Intensity dependent refractive index - self-focusing - self defocusing - Phase matching – four wave mixing (K1, K3)
- 5.5 Concept of solitons - formation of solitons- kdV equation (K1, K2, K4, K5)
- 5.6 Nonlinear Schrödinger equation for solitons - soliton switching - soliton laser- advantages of soliton based communication (K1, K2, K5, K6)

### **Books for Study:**

1. John M. Senior - Optical Fiber Communications: Principles and Practice, 2nd Edition - PHI, 2011.
2. Ajoy Ghatak and K. Thyagarajan - Introduction to Fiber Optics, 6th Edition - Cambridge University Press, 2006.
3. Gerd Keiser - Optical Fiber Communications, 4th Edition - McGraw Hill, 2012.
4. B.B. Laud - Lasers and Non-Linear Optics - New Age International, New Delhi, 2011.
5. William T. Silfvast, Laser fundamentals, Cambridge university press, Cambridge 2003.

### **Books for Reference:**

1. Akira Hasegawa and Yuji Odama - Solitons in Optical Communications - Oxford Press, 1995.
2. Robert W Boyd - Nonlinear Fiber Optics, 2nd Edition - Elsevier, 2006.
3. Govind P. Agrawal - Fiber Optic Communication Systems - John Wiley, 2003.
4. M Remoissenet - Waves Called Solitons: Concepts and Experiments, Springer Verlag, 1992.
5. B.B. Laud - Lasers and Nonlinear Optics, 2nd Edition - New Age International (P) Ltd., New Delhi, 1991.

## SEMESTER IV

### PEPHH20 - ELECTIVE IV B: ADVANCED MATERIAL SCIENCE

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PEPHH20	<b>Title of the Course:</b> Advanced Material Science	<b>Course Type:</b> Theory	<b>Course Category:</b> Major Elective	<b>H/W</b> 5	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about crystallography and wide knowledge about properties of materials.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the building unit of structure of crystal and their symmetry.
2. Interpret about the magnetic properties and effects on materials
3. Attain the knowledge of superconducting materials and problem solving.
4. Pick up the ideas in lasing action, optical resonators and its applications.
5. Get introduced all about smart, nano and magnetic materials and its application useful to carry out the research work and fabricating the devices for public utility.

CO	PSO

CO5	M	H	H	M	M	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Applied Crystallography in Material Science (10 Hours)

- 1.1 Crystal systems, unit cells (K1, K2)
- 1.2 Indices of lattice directions and planes (K1, K2)
- 1.3 co-ordinates of position in the unit cell - Crystal geometry (K1, K2, K3)
- 1.4 Symmetry classes and point groups, space groups (K2, K3)
- 1.5 Glide planes and screw axes, space group notations, equivalent points (K2, K3, K4)
- 1.6 Systematic absences - Determination of crystal symmetry from systematic absences (K3, K4, K5)

### Unit II: Magnetism (9 Hours)

- 2.1 Principles of magnetic measurements (K1, K2, K3)
- 2.2 Basic ideas of measuring M,  $\chi$ , and  $T_c$  (K1, K2)
- 2.3 Magneto thermal effect - magneto resistance (K1, K2)
- 2.4 Magneto optical phenomena - magnetic acoustic effect (K2, K3, K4)
- 2.5 Magneto optic recording (K2, K3, K4)
- 2.6 Importance of magnetic anisotropy (K3, K4, K5, K6)

### Unit III: Superconductivity (10 Hours)

- 3.1 Introduction - critical parameters (K1, K2)
- 3.2 Anomalous characteristics - isotope effect, Meissner effect (K1, K2, K3)
- 3.3 Type I and II superconductors - BCS theory (K2, K3)
- 3.4 Josephson junctions and tunneling- SQUID (K3, K4, K5)
- 3.5 High temperature superconductors, crystallographic and structural properties of high temperature superconductors (K1, K2, K3)
- 3.6 Dependence of  $T_c$  on crystal structures - applications (K1, K2, K3, K4)

### Unit IV: Laser Theory and Applications (9 Hours)

- 4.1 Introduction - Einstein's coefficient (K1, K2)
- 4.2 Threshold condition for laser action - optical pumping (K1, K2, K3)
- 4.3 Resonant cavities, spot size - types of resonator, quality factor of an optical resonator (K1, K2, K3)
- 4.4 Welding, drilling and hardening (K3, K4)
- 4.5 Advantages and uses of laser in material processing (K1, K2, K3)
- 4.6 Applications (K1, K2)

### Unit V: Technological materials (10 Hours)

- 5.1 Metallic glasses - preparation properties and applications (K1, K2)
- 5.2 SMART materials - Piezoelectric, magnetostrictive, electrostrictive materials (K1, K2, K3)
- 5.3 CCD device materials - applications (K1, K2, K3)
- 5.4 Solar cell materials (single crystalline, amorphous and thin films) (K2, K3, K4)
- 5.5 Introduction to nanophase materials (K2, K3, K4)
- 5.6 Properties of nanophase materials (K1, K2, K3)

**Books for study:**

1. V. Raghavan - Material science and Engineering, Prentice Hall ,2003
2. C. Kittel - Introduction to Solid State Physics - Wiley and Sons Ltd., New York. 2015.
3. M.Tinkham- Introduction to superconductivity- Rhinehard and Winton New York, 1996
4. Charles P. Poole- Introduction to Nanotechnology - Wiley inter science, 2003
5. M.N. Avadhanulu- An introduction to lasers, theory & applications - S. Chand & Co. New Delhi. 2001.
6. B.D. Cullity - Introduction to magnetic materials - Addison - Wesley, 1972.

**Books for reference:**

1. M. Ali Omar- Elementary Solid State Physics- Revised Printing Pearson Edn., 2000.
2. J. Dekker - Solid state Physics - Prentice Hall, 1957.
3. Oshea and Co. - An Introduction to lasers and their applications - Addison Wesley, 1969.
4. C.N.R. Rao- Chemistry of High temperature superconductors - World Scientific, 1991.
5. C.R.M. Grovenor and Co. Microelectronic materials - Adam hilger, Philadelphia, 1989.

## SEMESTER IV

### PIPHG20 - IEP: PHYSICS FOR SET/NET - PAPER IV

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PIPHG20	<b>Title of the Course:</b> IEP: Physics for SET/NET – Paper IV	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	--	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about Nuclear & Particle Physics, Numerical Methods and Condensed matter Physics for competitive Examinations.

#### Course Outcomes (CO)

The learners will be able to

1. Understand the basic properties of nucleus and nuclear models.
2. Gain the knowledge about the elementary particles and quantum numbers.
3. Impart knowledge of finding solutions to any differential equations and Interpolation by using Newton's method, Simpson's and Trapezoidal rules.
4. Attain the basic concepts and theories in crystals and magnetism and develop the skills to solve the problems in the respective field for performing higher studies and research.
5. Understand the basic concepts in superconductors.

CO	PSO					
	1	2	3	4	5	6
CO1	H	H	H	M	M	L
CO2	H	H	H	M	M	M
CO3	H	H	H	H	L	L
CO4	H	H	M	M	M	H
CO5	H	H	M	H	L	H

CO	PO

CO3	H	H	H	H	L	L
CO4	H	H	H	H	M	M
CO5	H	M	M	H	L	M

(Low - L, Medium – M, High - H)

## Course Syllabus

### Unit I: Nuclear and Particle Physics – I

- 1.1 Basic nuclear properties - size, shape and charge distribution (K1, K2,)
- 1.2 Spin and parity - Binding energy - Ground state of deuteron (K1, K2, K3)
- 1.3 Nuclear reactions - Types of reactions - Conservation laws (K1, K2, K3, K4)
- 1.4 Q-value equation - Nuclear models - Liquid drop (K2, K3, K4)
- 1.5 Semi empirical mass formula - Shell model (K3, K4,)
- 1.6 Magic numbers - Angular momentum and parity - Collective model (K3, K4, K6)

### Unit II: Nuclear and Particle Physics –II

- 2.1 Nuclear decay - alpha - beta decays (K1, K2)
- 2.2 Gamma decays - Selection rules (K1, K2)
- 2.3 Elementary particles - Symmetries (K2, K3)
- 2.4 Conservation laws - CPT invariance - Quark model (K2, K3, K4)
- 2.5 Baryons and mesons - Fission and Fusion (K2, K3, K4)
- 2.6 Nuclear reactions - Elementary particles and their quantum numbers (K4, K5, K6)

### Unit III: Numerical Methods

- 3.1 Derivatives - Newton's forward / backward interpolation and (K1, K2, K3)
- 3.2 Stirling formula, Numerical integration by Trapezoidal Solutions of equations (K2, K3, K4)
- 3.3 Numerical methods - Regular falsi(K3, K4, K5)
- 3.4 Newton's method - Lagrangian Interpolation (K3, K4, K5)
- 3.5 Newton's divided difference method - Trapezoidal - Simpson's rule (K3, K4, K5)
- 3.6 Solution of differential equations by Runge-Kutta method (K4, K5, K6)

### Unit IV: Condensed Matter Physics

- 4.1 Bravais lattices - Reciprocal lattices and Brillouin zones ((K1, K3, K4, K5)
- 4.2 Crystal diffraction - Bragg's law - Crystal diffraction techniques (K3, K4, K5)
- 4.3 Bonding of solids - Lattice specific heat - Phonons (K4, K5)
- 4.4 Einstein's and Debye's theory of specific heat - Free electron gas - Hall effect (K1, K2, K3)
- 4.5 Bloch theorem - Kronig Penny Model - Semiconductors (K1, K2, K3)
- 4.6 Elementary ideas of dia, para and ferro magnetism (K1, K2, K3)

### Unit V: Superconductors

- 5.1 Superconductors - Properties of superconductor - Experimental facts - occurrence - Effect of magnetic fields - Meissner effect - Entropy and heat capacity (K1, K2)
- 5.2 Energy gap - Type I and II Superconductors - Josephson Effect (K1, K2, K3)
- 5.3 London equation - Theoretical explanation (K1, K2, K4)
- 5.4 Thermodynamics of Super conducting transition - London equation - BCS theory (K2, K3, K4)
- 5.5 Coherence length - Theory - Single particle tunneling(K3, K4, K5)
- 5.6 High temperature superconductors and applications (K4, K5)

**Books for Study:**

1. M.L. Pandya and R.P.S. Yadav - Elements of Nuclear Physics, KedarNathRamNath, Delhi,2005.
2. D. C. Dayal - Nuclear Physics University of Chicago Press Chicago.; Revised Edition, 6th Printing edition(1956)
3. D. Griffiths - Introduction to Elementary Particle Physics, Harper & Row, New York, 1987
4. S.O. Pillai - Solid State Physics, New Age International Publishers, New Delhi,2017.
5. Gupta Kumar Sharma - Solid statePhysics
6. C. Kittel - Introduction to Solid State Physics, Wiley & Sons Ltd., New York.2012.
7. Dr.SurekhaTomar - Competitive Exams for CSIR - UGC NET/JRF/SET - Upkar's publications.
8. M.K. Venkataraman. - Introduction to NumericalMethods

**Book for reference:**

1. K.S. Krane - Introductory Nuclear Physics , Wiley, New York,1987.
2. J.K. Bhattacharjee - Statistical Mechanics an Introductory text - AlliedPublishers Ltd., New Delhi, 1996.
3. Charles Kittel, Elementary Statistical Physics - Dover Publications, Inc, NewYork, 2004.
4. M. Glazer and J. Wark - Statistical Mechanics - Oxford UniversityPress.
5. C. Kalidas, M.V.Sangaranarayanan - Non - Equilibrium Thermodynamics - Macmillan India, New Delhi.

## SEMESTER IV

### PIPHH20- IEP: ADVANCED NUCLEAR PHYSICS AND SPECTROSCOPY

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PIPHH20	<b>Title of the Course:</b> IEP:Advanced Nuclear	<b>Course Type:</b> Theory	<b>Course Category:</b> Independent Elective	<b>H/W</b> -	<b>Credits</b> 2	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	-------------------------------	---	-----------------	---------------------	---------------------

#### Course Objectives

1. To impart knowledge about nuclear detectors and particle accelerators, basic aspects of astrophysics and applications of nuclear physics.
2. Beside this, students will be familiarized to UV spectroscopy, atomic absorption and emission spectroscopic techniques.

#### Course Outcomes (CO)

The learners will be able to

1. Explain the basic concepts of nuclear detectors and particle accelerators.
2. Explain the basic aspects of astrophysics.
3. Explain the principles, working and application of nuclear spectroscopic techniques (RBS, NAA, PIXE) and other applications of nuclear physics.
4. Explain the basic principles, instrumentation and applications of UV spectroscopy.
5. Explain the basic principles, instrumentation and applications of atomic absorption and emission spectroscopy.

CO	PSO

CO2	M	L	L	L	M	M
CO3	H	H	M	H	M	M
CO4	H	H	M	H	H	M
CO5	H	M	L	M	M	L

(Low - L, Medium – M, High - H)

## **Course Syllabus**

### **Unit I: Nuclear Detectors and Particle Accelerators**

- 1.1 Introduction - Interaction of radiation with matter (K1, K2)
- 1.2 Ge and Si solid state detectors - Calorimeters and their use for measuring jet energies (K2, K3)
- 1.3 Scintillation and Cerenkov counters (K2, K3)
- 1.4 Qualitative ideas, Hybrid detectors (K2, K3)
- 1.5 Particle accelerators - Pelletron-Synchrotron - Synchrocyclotron (K2, K3)
- 1.6 Colliding beam accelerators - Large Hadron Collider (K2, K3)

### **Unit II: Nuclear Astrophysics**

- 2.1 Cosmic rays: Origin of cosmic rays (K2, K3)
- 2.2 Nature of primary cosmic rays and its energy distribution (K2, K3)
- 2.3 Geomagnetic and Latitude effect - East-west asymmetry - Origin of secondary rays (K2, K3)
- 2.4 Collision with electrons - Thermonuclear fusion (K2, K3)
- 2.5 Stellar nucleo- synthesis - Energy production in stars (K2, K3)
- 2.6 PP chain - CNO cycle. (K2, K3)

### **Unit III: Applications of Nuclear Physics**

- 3.1 Rutherford Backscattering Spectroscopy as a tool for depth profiling (K2, K3, K4)
- 3.2 Nuclear Fission Reactors (K2, K3)
- 3.3 Neutron Activation Analysis (K2, K3, K4)
- 3.4 Proton Induced X-ray Emission for trace element analysis (K2, K3, K4)
- 3.5 Radioactive dating - Mossbauer Effect (K2, K3)
- 3.6 Applications in medicine (K3, K4)

### **Unit IV: UV Spectroscopy**

- 4.1 Energy levels - Molecular orbital's theory and UV spectra (K2, K3)
- 4.2 Franck Condon Principle - Transition Probability - Measurement of spectrum (K2, K3, K4)
- 4.3 Types of transition in Organic molecules - Types of absorption bands (K2, K3)
- 4.4 Transition in metal complexes - Selection rules (K2, K3, K4)
- 4.5 Electronic spectra in poly atomic molecules - Chromospheres concept (K2, K3)
- 4.6 Application of UV Spectroscopy (K3, K4)

### **Unit V: Atomic Absorption and Emission Spectroscopy**

- 5.1 Principle of AAS - Measurement of atomic absorption (K2, K3)
- 5.2 Instrumentation - Single beam Spectrophotometer (K2, K3)
- 5.3 Applications of AAS (K2, K3, K4)
- 5.4 Atomic Emission Spectroscopy - Principle of AES - Advantages (K2, K3)
- 5.5 Instrumentation - Laser beam - Applications of AES (K2, K3, K4)
- 5.6 Difference between AAS and AES (K3, K4)

**Books for Study:**

1. G. Aruldas - Molecular Structure and Spectroscopy - Prentice Hall of India Pvt. Ltd., New Delhi, 2001.
2. H.Kaur - Spectroscopy, 5th Edition - A PragatiPrakashan, 2009
3. P. S. Sindhu - Molecular Spectroscopy - Tata McGraw Hill, New Delhi, 1990.
4. Krane K.S. Nuclear Physics, Wiley India Pvt. Ltd., (2008).
5. Lilley J.S., Nuclear physics principles and applications John Wiley & sons Ltd., (2007).

**Books for Reference:**

1. Raymond Chang - Basic Principles of Spectroscopy - McGraw Hill Kogakusha, 1980.
2. G. W. King - Spectroscopy and Molecular Structure - HoitRinchart and WinstenInc, London, 1964
3. Concepts of Modern Physics: A.Beiser.
4. Subatomic Physics, Frauenfelder and Henley. (Prentice-Hall)
5. De Soete, D. R. Gijbelsa n d J. Hoste, Neutron Activation Analysis. John Wiley and Sons: New York, NY. (1972).
6. L. C. Feldmen and j. W. Mayer, fundamentals of surface and thin film s analysis, North Holland, Elsevier, 1986.
7. W. R. Leo, Techniques for Nuclear and Particle Physics Experiments, Narosa Publishing House, Indi, 1995.
8. G. F.Knoll, Radiation Detection and Measurement, John, Wiley & Sons, Inc, 2000.

## SEMESTER IV

### PCPHO20- PRACTICAL III: ADVANCED GENERAL EXPERIMENTS

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCPHO20	<b>Title of the Course:</b> Practical III: Advanced General Experiments	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide the student hands-on experiences to conduct advanced general experiments in laboratory in lieu with the theory taught in the class.

#### Course Outcomes (CO)

The learners will be able to

1. Interpret and appreciate the advanced concepts in physics.
2. Use scientific equipment for analysis and data acquisition.
3. Analyse the properties (electric, magnetic, nuclear and dielectric) of solids/liquids.
4. Apply acquired knowledge to the analysis of experimental data.
5. Get exposure to work environment at research level and motivation for a lifelong learning.

CLO	PSO					
	1	2	3	4	5	6
CLO1	H	L	H	L	H	H
CLO2	M	H	L	M	H	H
CLO3	H	H	H	M	H	H
CLO4	H	M	H	L	H	H

CLO5	H	H	H	H	H	H

(Low - L, Medium – M, High - H)

## Course Syllabus

### (Any 15 experiments) (K1 - K6)

1. G.M. Counter - characteristics, Inverse square law.
2. G.M. Counter - Absorption co-efficient.
3. Determination of Carrier Concentration - Hall Effect.
4. Determination of Volume Susceptibility of a liquid by Quincke's method.
5. Determination of Mass Susceptibility of a liquid by Guoy's method.
6. Michelson Interferometer - Wavelength and separation of wavelengths.
7. Michelson Interferometer - Thickness of mica sheet.
8. F.P. Etalon using Michelson set up.
9. Determination of Wave length of Laser Beam.
10. Ultrasonic Interferometer - Velocity and Compressibility of a liquid.
11. Ultrasonic Diffraction - Velocity and Compressibility of a liquid.
12. Determination of Planck's constant.
13. B-H curve using CRO.
14. Salt Analysis using Spectrograph - CDS
15. Dielectric constant of liquids and solids by capacitance method.
16. Determination of coefficient of coupling by AC bridge method.
17. Impedance measurement using LCR bridge.
18. Four probe method - Determination of conductivity of thin films.
19. Determination of dielectric loss using CRO.
20. Laser diode characteristics.

## SEMESTER IV

### PCPHP20 - PRACTICAL- IV MICROPROCESSOR, MICROCONTROLLER AND C PROGRAMMING

<b>Year: II</b> <b>Sem: IV</b>	<b>Course Code:</b> PCPHP20	<b>Title of the Course:</b> Microprocessor, Microcontroller & C-Programming	<b>Course Type:</b> Practical	<b>Course Category:</b> Core	<b>H/W</b> 4	<b>Credits</b> 4	<b>Marks</b> 100
-----------------------------------	--------------------------------	---	----------------------------------	---------------------------------	-----------------	---------------------	---------------------

#### Course Objectives

1. To provide the students hands on training of programming knowledge on Microprocessor, Microcontroller and C language.
2. To make the students develop the assembly language programs for arithmetic and peripheral interface operations.

#### CourseOutcomes (CO)

The learners will be able to

1. Develop assembly language programs on arithmetic and sorting operations using 8085 and 8051
2. Develop and perform peripheral interface programs with 8085 Microprocessor
3. Perform all code conversions and analog signals into digital and vice versa. Also can generate wave forms.
4. Write C program for any basic operations
5. Solve any physical problems using C language along with numerical techniques

CO	PSO

CO5	H	H	M	H	M	M

(Low - L, Medium – M, High - H)

## **Course Syllabus**

**(Any 20 experiments)**

### **Microprocessor 8085 Programmes (K1 - K6)**

1. Addition & subtraction and Multiplication & Division of 8-bit hexadecimal numbers.
2. Square and Square Root of 8-bit hexadecimal numbers.
3. Picking up Largest and Smallest number in an array of 8-bit hexadecimal numbers.
4. Arranging an array of 8-bit hexadecimal numbers in Ascending and Descending orders.
5. Code Conversion of Binary to BCD and BCD to Binary, Binary to ASCII and ASCII to Binary and BCD to ASCII and ASCII to BCD.
6. 8-Bit and 16-Bit BCD Addition.
7. Addition of Array of 8-Bit Numbers.
8. Digital Clock Program for 12 / 24 Hours.
9. Analog to Digital Conversion and ADC Interface.
10. Digital to Analog Conversion - Wave form Generator - DAC Interface.
11. Keyboard Display Interface.
12. Stepper Motor Interface.
13. Traffic regulation interface
14. Dynamic message display
15. 8255 I/O Display interface

### **Microprocessor 8086 Programmes**

1. 16-Bit Addition & subtraction and Multiplication & division.
2. 16-Bit Ascending and descending order.
3. Computation of LCM.
4. Factorial of a number.

### **Microcontroller 8051 Experiments**

1. 8-Bit Addition and Subtraction
2. 8-Bit Multiplication and Division.
3. Sorting in ascending and descending order.
4. Sorting out the maxima and minima.

### **Computation Methods - C Programming**

1. Lagrange interpolation with algorithm, flow chart with program and its output
2. Numerical integration by Simpson's rule with algorithm and flowchart with program and its output.

3. Numerical solution of ordinary first order differential equation -Euler's method with algorithm, flowchart and its output.
4. Numerical solution of ordinary first order differential equations by the Runge- kutta method, with algorithm, flow chart with program and its output
5. Curve fitting - Least square fitting with algorithm, flowchart and its output.

# **Department of Zoology (PG)**

## **SYLLABUS AND REGULATIONS**

Under

**OUTCOME-BASED EDUCATION**

**2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**AUXILIUM COLLEGE (Autonomous)**

*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*

**Gandhi Nagar, Vellore-632 006**

**AUXILIUM COLLEGE (Autonomous), Gandhi Nagar, Vellore-632006.**  
(Accredited by NAAC with A<sup>+</sup> Grade with a CGPA of 3.55 out of 4 in the 3<sup>rd</sup> cycle)

**OUTCOME BASED EDUCATION**  
**M.Sc. ZOOLOGY**

(Effective for those admitted from the Academic Year 2020 – 2021)

**PROGRAMME OBJECTIVES:**

**On completion of the PG Programme, students will be able to:**

**PO1:** Attain an in-depth knowledge in the respective domains augmented through self-learning.

**PO2:** Assimilate and apply principles and concepts towards skill development and employability.

**PO3:** Apply critical and scientific approaches to address problems and find solutions.

**PO4:** Develop research skills through multi/inter/trans-disciplinary perspectives.

**PO5:** Integrate issues of social relevance in the field of study.

**PO6:** Persist in life-long learning for personal and societal progress.

**PROGRAMME SPECIFIC OBJECTIVES:**

**As Masters in Zoology, graduates will:**

**PSO1:** Have in-depth knowledge on animal diversity from acellular to multicellular level of organization and apply the learnt concepts in all the fields of Zoology.

**PSO2:** Demonstrate expertise in practical procedures and handling laboratory equipments/instruments. Effective communicator, novel thinker to address the emerging needs.

**PSO3:** Be abled leaders with team spirit, analytical thinking and completion of work in academic, on-field and research areas.

**PSO4:** Gain ability to develop research aptitude/creative thinking in contemporary and current fields of interest.

**PSO5:** Conduct their duty with at most honesty and adhere to ethical protocols. On the whole, be agents of social transformation to up bring their society at large.

**PSO6:** Be technically sound in applying the Information technology and will be lifelong learners in updating to the current advancements in their respective fields.

## SEMESTER I

### PCZOA20 - PHYLOGENY OF INVERTEBRATA AND CHORDATA

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PCZOA20	Phylogeny of Invertebrata and Chordata	Theory	Core	7	4	100

#### Objectives:

- To enlighten the students with adequate scientific details on origin, evolution, adaptive radiations and Phylogenetic relationships of Invertebrates and Chordates.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Analyze the taxonomic status of Invertebrates, its origin and Evolution

**CO2:** Categorize Respiratory, Circulatory and Urinogenital system of various classes of vertebrates.

**CO3:** Justify adaptive radiations of annelids, molluscs, pisces, amphibians and mammals.

**CO4:** Explain salient features of invertebrate and chordates.

**CO5:** Distinguish structural, functional and phylogenetic significance of minor phyla.

CO/PSO	PSO

CO3	H	H	M	H	M	H
CO4	H	H	M	H	M	H
CO5	H	H	M	H	M	H

#### Unit 1:

(21 Hours)

- 1.1: Phylogenetic tree of Invertebrates. (K1, K2, K3, K4, K5)
- 1.2: Origin and evolution of Metazoan theories - Haeckal, syncytial, colonial, Hadzi's theory. (K1, K2, K3, K4, K5)
- 1.3: Coelom- classification, theories - Enterocoel, Gonocoel, Nephrocoel and Schizocoel. (K1, K2, K3, K4, K5)
- 1.4: Grades of Symmetry; Metamerism - classification, theories- Pseudometamerism, Cyclomerism, corm theory, Embryological theory. (K1, K2, K3, K4, K5)

- 1.5: Origin of Cephalization; Jawed vertebrates- origin, class- Acanthodians. (K1, K2, K3, K4, K5)  
1.6: Placoderms – order - Arthrodire, Ptyctodonts, Phyllolepid, Antiarchs, Petalichthys, Rhenanids, Palaeospondylus. (K1, K2, K3, K4, K5)

**Unit 2:**

**(21 Hours)**

- 2.1: Comparative anatomy of Respiratory System- Respiratory organs - Gills, Lungs. (K1, K2, K3, K4, K5)  
2.2: Circulatory system - Evolution of Heart. (K1, K2, K3, K4, K5)  
2.3: Modification of aortic arches. (K1, K2, K3, K4, K5)  
2.4: Modifications of veins. (K1, K2, K3, K4, K5)  
2.5: Urino-genital system - Origin and structure of Kidney across vertebrates. (K1, K2, K3, K4, K5)  
2.6: Gonads and their ducts. (K1, K2, K3, K4, K5)

**Unit 3:**

**(21 Hours)**

- 3.1: Adaptive radiations in: Annelids - Polychaete, Hirudinae. (K1, K2, K3, K4, K5, K6)  
3.2: Molluscs – Gastropods, Polyplacophora, Bivalves, Scaphopods, Cephalopods. (K1, K2, K3, K4, K5, K6)  
3.3: Fishes- Earliest Elasmobranchs, Teleost - Body forms, Feeding habit. (K1, K2, K3, K4, K5, K6)  
3.4: Protective mechanism, Bioluminescence. (K1, K2, K3, K4, K5)  
3.5: Adaptive radiation in Amphibians - Limbless Amphibians, Salamanders and Newts, Frogs and Toads. (K1, K2, K3, K4, K5)  
3.6: Adaptive radiation in Mammals - Terrestrial; Arboreal; Flying; Aquatic. (K1, K2, K3, K4, K5)

**Unit 4:**

**(21 Hours)**

- 4.1: Torsion in Mollusca. (K1, K2, K3, K4, K5)  
4.2: Larval forms in Echinoderms and their significance. (K1, K2, K3, K4, K5)  
4.3: Origin of Tetrapod limbs. (K1, K2, K3, K4, K5, K6)  
4.4: Extinct Reptiles. (K1, K2, K3, K4, K5)  
4.5: Archaeopteryx and affinities. (K1, K2, K3, K4, K5)  
4.6: Egg laying Mammals. (K1, K2, K3, K4, K5)

**Unit 5:**

**(21 Hours)**

- 5.1: Structural, functional and Phylogenetic significance of Lophophora. (K1, K2, K3, K4, K5)  
5.2: Structural, functional and Phylogenetic significance of Phoronida. (K1, K2, K3, K4, K5)  
5.3: Structural, functional and Phylogenetic significance of Rotifera. (K1, K2, K3, K4, K5)  
5.4: Structural, functional and Phylogenetic significance of Sipunculida. (K1, K2, K3, K4, K5)  
5.5: Structural, functional and Phylogenetic significance of Chaetognatha. (K1, K2, K3, K4, K5)  
5.6: Structural, functional and Phylogenetic significance of Phoronophora. (K1, K2, K3, K4, K5)

**Books Study for Reference:**

## SEMESTER I

### PCZOB20 - MOLECULAR BIOLOGY AND GENETICS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PCZOB20	Molecular Biology and Genetics	Theory	Core	6	5	100

#### Objectives:

To understand the fine structure of genetic material, functional modifications and their regulation.  
To know the chromosomal basis of genetic disorders, development and differentiation.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Expand knowledge of DNA, RNA structure and understand their synthesis process.

**CO2:** Summarize transcription and translation concepts.

**CO3:** Describe transcriptional modification mechanism.

**CO4:** Interpret various genetic disorders and genetic variation in metabolism.

**CO5:** Discuss genetic recombination and analyze genetic concepts.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	M
CO5	H	H	H	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit 1:

(18 Hours)

1.1: Molecular structure of DNA – Chemical structure; double helix. (K1, K2, K3, K4, K5)

1.2: Identification of DNA and RNA as genetic material. (K1, K2, K3, K4, K5, K6)

1.3: Characterization of genetic code-non ambiguous- non overlapping; Degenerative code. (K1, K2, K3, K4, K5, K6)

1.4: DNA Replication - Chargaff's rule, geometry, Enzymology of DNA replication.

Discontinuous Replication, Events in the Replication Fork, Initiation of Synthesis of the Leading Strand. (K1, K2, K3, K4, K5, K6)

- 1.5: Bidirectional Replication, Termination of Replication, Methylation of DNA. (K1, K2, K3, K4, K5, K6)
- 1.6: DNA damage and repair - Excision repair (Base and nucleotide), mismatch repair, recombination repair. (K1, K2, K3, K4, K5, K6)

**Unit 2: (18 Hours)**

- 2.1: RNA - Chemical Structure, Types. (K1, K2, K3, K4, K5, K6)
- 2.2: Transcription: Enzymatic Synthesis of RNA; RNA polymerase structure. (K1, K2, K3, K4, K5, K6)
- 2.3: Basic features of RNA synthesis – Template recognition - Core promoters (-10 and -35 box), UP element; Initiation; Elongation. (K1, K2, K3, K4, K5, K6)
- 2.4: Termination- Rho independent and Rho dependent. (K1, K2, K3, K4, K5, K6)
- 2.5: Operons - Prokaryotic transcriptional control: Negative control by repressor and Positive control by CAP (Catabolic Activator Protein). (K1, K2, K3, K4, K5, K6)
- 2.6: Lac operon; Gal operon. Role of Genome Imprinting in Epigenetic regulation of gene expression. (K1, K2, K3, K4, K5, K6)

**Unit 3: (18 Hours)**

- 3.1: Post transcriptional modifications: Splicing - splicing signals. (K1, K2, K3, K4, K5, K6)
- 3.2: Mechanism of splicing of nuclear mRNA precursor - branched lariat shaped intermediate; snRNPs. (K1, K2, K3, K4, K5, K6)
- 3.3: Spliceosome - spliceosome assembly and function; alternative splicing. (K1, K2, K3, K4, K5, K6)
- 3.4: Self-Splicing RNAs- Group I and II Introns - tRNA splicing. (K1, K2, K3, K4, K5, K6)
- 3.5: Capping: structure; synthesis, function. (K1, K2, K3, K4, K5, K6)
- 3.6: Polyadenylation: Poly A tailing, mechanism, functions. (K1, K2, K3, K4, K5, K6)

**Unit 4: GENETICS (18 Hours)**

- 4.1: Chromosomal mapping in Eukaryotes. (K1, K2, K3, K4, K5, K6)
- 4.2: Man – Heterokaryon and translocation studies. (K1, K2, K3, K4, K5, K6)
- 4.3: Inborn errors of metabolism- Protein; Carbohydrate; Lipid; Nucleic acid. (K1, K2, K3, K4, K5, K6)
- 4.4: Recombination: Types of Recombination, Breakage and Rejoining and Heteroduplexes. (K1, K2, K3, K4, K5, K6)
- 4.5: Branch migration, The Holliday Model- The recBCD Protein. (K1, K2, K3, K4, K5, K6)
- 4.6: Evolution of Sex Chromosomes; Dosage compensation and X Inactivation role in Sex Determination. (K1, K2, K3, K4, K5, K6)

**Unit 5: (18 Hours)**

- 5.1: Genes in development and differentiation in Drosophila. (K1, K2, K3, K4, K5, K6)
- 5.2: Binary fate decision, positional pattern formation – A- P axis, D-V axis. (K1, K2, K3, K4, K5, K6)
- 5.3: Cell fates; refining pattern; comparison of vertebrate/pattern with insects. (K1, K2, K3, K4, K5, K6)
- 5.4: Neoplasia - Difference between normal and cancer cells- Biochemical, Cytoskeleton, Cell surface. (K1, K2, K3, K4, K5, K6)
- 5.5: Genetic basis of human cancer; Transforming agents – Oncoviruses (RNA and DNA). (K1, K2, K3, K4, K5, K6)
- 5.6: Chemical carcinogenesis. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbooks:**

1. Robert P. Wagner - Introduction to modern genetics- John Wiley and sons, Inc, 1980.
2. Anthony J.F Griffiths - An introduction to genetic analysis 7ed- W.H Freeman, 2000.

**Reference Books:**

3. Robert F. Weaver - Molecular Biology 5<sup>th</sup> Edition - McGraw Hill, 2013.

## SEMESTER I

### PCZOC20- APPLIED BIOTECHNOLOGY AND MICROBIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PCZOC20	Applied Biotechnology And Microbiology	Theory	Core	6	4	100

#### Objectives:

- To familiarize the use of the data and techniques of engineering and technology in biology for the study of living organisms.
- To make or modify products of processes for specific use.
- To find solution of problems concerning human activities including agriculture, medical treatment, industry and environment
- To acquire a basic knowledge of the microbes in general and of the environmental, medical and industrial important microbes in particular in order to have an integrated approach in biology.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain the benefits of microbes in production and value addition of food products.

**CO2:** Apply the tools and techniques used in molecular biology.

**CO3:** Solve the problems related to biotechnology keeping in mind the safety factor for environment and society.

**CO4:** Discuss the basic techniques used in genetic manipulation. Biosafety and ethical issues.

**CO5:** Explain transgenic animals and their use in research field.

CO4	H	H	H	L	M	H
CO5	H	M	H	H	L	H

**Unit 1:****(18 Hours)**

- 1.1: Microbes in food production- Bread, Yoghurt. (K1, K2, K3, K4, K5)
- 1.2: Microbes in food production Cheese, Butter. (K1, K2, K3, K4, K5)
- 1.3: Microbes in food production Vinegar. (K1, K2, K3, K4, K5)
- 1.4: Microbes in food production Beer and Wine. (K1, K2, K3, K4, K5)
- 1.5: Food Spoilage. (K1, K2, K3, K4, K5)
- 1.6: Food Preservation. (K1, K2, K3, K4, K5)

**Unit 2:****(18 Hours)**

- 2.1: Gene therapy. (K1, K2, K3, K4, K5, K6)
- 2.2: Forensic Medicine-DNA fingerprinting using minisatellite. (K1, K2, K3, K4, K5, K6)
- 2.3: Autoantibody fingerprinting. (K1, K2, K3, K4, K5, K6)
- 2.4: Hybridoma technology. (K1, K2, K3, K4, K5, K6)
- 2.5: Monoclonal antibodies. (K1, K2, K3, K4, K5)
- 2.6: Polyclonal antibodies. (K1, K2, K3, K4, K5)

**Unit 3:****(18 Hours)**

- 3.1: Use of genetically engineered organisms for removal of specific pollutants. (K1, K2, K3, K4, K5)
- 3.2: GEM for treating oil spills. (K1, K2, K3, K4, K5)
- 3.3: GEM for detecting pesticides in the soil and their degradation. (K1, K2, K3, K4, K5)
- 3.4: Bioleaching, Biomining, Biosurfactants. (K1, K2, K3, K4, K5)
- 3.5: Biosensors-Conventional, Microbial, Urea. (K1, K2, K3, K4, K5)
- 3.6: Alcohol and Integrated Multibiosensor. (K1, K2, K3, K4, K5)

**Unit 4:****(18 Hours)**

- 4.1: GM Papaya, GM Tomato. (K1, K2, K3, K4, K5)
- 4.2: Bt Cotton, Bt Brinjal and Golden Rice. (K1, K2, K3, K4, K5)
- 4.3: Transgenic plants Application-Industrial enzymes. (K1, K2, K3, K4, K5)
- 4.4: Organic chemical, plastics. (K1, K2, K3, K4, K5)
- 4.5: Vaccine- producing plants. (K1, K2, K3, K4, K5)
- 4.6: Biofertilizers. (K1, K2, K3, K4, K5)

**Unit 5:****(18 Hours)**

- 5.1: Transgenic Fish, Chickens, Mouse. (K1, K2, K3, K4, K5)
- 5.2: Transgenic Cow, Goat, Sheep. (K1, K2, K3, K4, K5)
- 5.3: Transgenic Pig, Dog. (K1, K2, K3, K4, K5)
- 5.4: Applications of Transgenic animals. (K1, K2, K3, K4, K5)
- 5.5: Molecular Pharming. (K1, K2, K3, K4, K5)
- 5.6: Gene Pharming in Transgenic animals. (K1, K2, K3, K4, K5)

## SEMESTER I

### PEZOA20 - ELECTIVE IA: BIostatISTICS AND COMPUTATIONAL BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PEZOA20	Biostatistics and Bioinformatics	Theory	Core	5	5	100

#### Objective:

- To understand the basic concepts of biostatistics and its application in research.
- To synthesis an area of modern biology in order to analyze and solve biological problems in a more systematic way through computational management.

#### Course Outcomes:

**CO1:** Describe statistical population, sampling and probability.

**CO2:** Explain and perform standard deviation, Student t test and Chi square Test.

**CO3:** Compute Correlation, Regression and ANOVA.

**CO4:** Discuss the databases and application of search tools.

**CO5:** Explain genomics, proteomics, drug designing and phylogenetic tree analysis.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	L	M	H	H	L	M
CO2	L	M	H	H	L	M
CO3	L	M	H	H	L	M
CO4	L	M	H	H	L	M
CO5	L	M	H	H	L	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	L	H	M	M
CO2	H	H	H	H	H	M
CO3	H	H	H	H	H	M
CO4	H	H	L	H	L	M
CO5	H	H	L	H	M	M

#### Unit 1:

(15 Hours)

1.1: Introduction and scope of statistics. (K1, K2, K3, K4, K5)

1.2: Statistical Population – Finite, Infinite; Sample and Sampling Methods, Variables –Types. (K1, K2, K3, K4, K5)

1.3: Probability – Definition, Events and its types. (K1, K2, K3, K4, K5)

1.4: Types of probability – Apriori, Aposteriori. (K1, K2, K3, K4, K5)

1.5: Rules of probability - Addition rule, Product rule. (K1, K2, K3, K4, K5)

1.6: Simple Choice, Combination, Permutation. (K1, K2, K3, K4, K5)

**Unit 2:** (15 Hours)

- 2.1: Dispersion – Standard Deviation: Standard Error. (K1, K2, K3, K4, K5)
- 2.2: Hypothesis testing – Null and Alternate hypothesis. (K1, K2, K3, K4, K5)
- 2.3: Levels of significance. Degree of freedom. (K1, K2)
- 2.4: Test of significance for large and small samples. (K1, K2, K3, K4, K5)
- 2.5: Students ‘t’ Test. (K1, K2, K3, K4, K5)
- 2.6: Chi square Test. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Correlation – Types. (K1, K2, K3, K4, K5)
- 3.2: Methods of Correlation-Scatter diagram. (K1, K2, K3, K4, K5)
- 3.3: Methods of Correlation - Karl Pearson’s. (K1, K2, K3, K4, K5)
- 3.4: Regression – Regression Equation. (K1, K2, K3, K4, K5)
- 3.5: Regression line. (K1, K2, K3, K4, K5)
- 3.6: ANOVA – One way analysis (Analysis of Variance). (K1, K2, K3, K4, K5)

**Unit 4: BIOINFORMATICS** (15 Hours)

- 4.1: Definition – History - Scope of Bioinformatics. (K1, K2, K3, K4, K5)
- 4.2: Databases - Primary, secondary and Tertiary. (K1, K2, K3, K4, K5)
- 4.3: Database search - Sequence database search. (K1, K2, K3, K4, K5, K6)
- 4.4: FASTA. (K1, K2, K3, K4, K5, K6)
- 4.5: BLAST. (K1, K2, K3, K4, K5, K6)
- 4.6: Amino acid substitution matrices (PAM) and Blossum. (K1, K2, K3, K4, K5, K6)

**Unit 5:** (15 Hours)

- 5.1: Genomics. (K1, K2, K3, K4, K5)
- 5.2: Human Genome Project. (K1, K2, K3, K4, K5)
- 5.3: Proteomics. (K1, K2, K3, K4, K5)
- 5.4: Phylogenetic analysis. (K1, K2, K3, K4, K5)
- 5.5: Drug designing. (K1, K2, K3, K4, K5, K6)
- 5.6: Drug targeting. (K1, K2, K3, K4, K5, K6)

## SEMESTER I

### PEZOB20 - ELECTIVE - I B: COMPUTATIONAL METHODS FOR SEQUENCE ANALYSIS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PEZOB20	Computational Methods For Sequence Analysis	Theory	Core	5	5	100

#### Objective:

- Understand Genomic data acquisition and analysis, comparative and predictive analysis of DNA and protein sequence, Phylogenetic inference etc.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain and classify the biological databases and its application.

**CO2:** Describe the sequence alignment, substitution matrices, and score matrices and search tools.

**CO3:** Analyze the evolutionary distance and boot strapping strategies.

**CO4:** Asses the genomic sequences, gene finding and analyses the regulatory regions.

**CO5:** Explain the secondary structure and gene identification.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit 1:

(15 Hours)

1.1: Introduction to bioinformatics. (K1, K2, K3, K4, K5)

1.2: Classification of biological databases. (K1, K2, K3, K4, K5)

1.3: Biological data formats. (K1, K2, K3, K4, K5)

1.4: Application of bioinformatics in various fields. (K1, K2, K3, K4, K5)

1.5: Introduction to single letter code of amino acids, symbols used in nucleotides.

(K1, K2, K3, K4, K5)

1.6: Data retrieval – Entrez and SRS. (K1, K2, K3, K4, K5, K6)

**Unit 2:** (15 Hours)

2.1: Introduction to Sequence alignment. (K1, K2, K3, K4, K5)

2.2: Substitution matrices, scoring matrices – PAM and BLOSUM. (K1, K2, K3, K4, K5, K6)

2.3: Local and Global alignment concepts, dot plot, dynamic programming methodology.  
(K1, K2, K3, K4, K5)

2.4: Multiple sequence alignment – Progressive alignment. (K1, K2, K3, K4, K5)

2.5: Database searches for homologous sequences – FASTA. (K1, K2, K3, K4, K5, K6)

2.6: BLAST versions. (K1, K2, K3, K4, K5, K6)

**Unit 3:** (15 Hours)

3.1: Evolutionary analysis. (K1, K2, K3, K4, K5)

3.2: Distances - clustering methods. (K1, K2, K3, K4, K5)

3.3: Rooted tree representation. (K1, K2, K3, K4, K5)

3.4: Unrooted tree representation. (K1, K2, K3, K4, K5)

3.5: Bootstrapping strategies. (K1, K2, K3, K4, K5)

3.6: Phylogenetic analysis. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

4.1: Fragment assembly. (K1, K2, K3, K4, K5)

4.2: Genome sequence assembly. (K1, K2, K3, K4, K5, K6)

4.3: Gene finding method. (K1, K2, K3, K4, K5)

4.4: Gene prediction – Analysis. (K1, K2, K3, K4, K5)

4.5: Genome annotation. (K1, K2, K3, K4, K5)

4.6: Prediction of regulatory regions. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hours)

5.1: Concepts and secondary structure prediction. (K1, K2, K3, K4, K5)

5.2: Probabilistic models. (K1, K2, K3, K4, K5)

5.3: Markov chain. (K1, K2, K3, K4, K5)

5.4: Hidden Markov Models. (K1, K2, K3, K4, K5, K6)

5.5: Gene identification and other applications. (K1, K2, K3, K4, K5, K6)

5.6: Internet resources for gene identification, detection of functional sites, gene expression.  
(K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbooks:**

1. Andreqas D. Baxevanis, B. F. Francis Ouellette. Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins John Wiley and Sons, New York (1998).
2. Shanmughavel, P. 2005. Principles of Bioinformatics, Pointer Publishers, Jaipur, India.

**Reference Books:**

## SEMESTER II

### PCZOD20 - RESEARCH METHODOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PCZOD20	Research Methodology	Theory	Core	6	4	100

#### Objectives:

- To enable the students to understand the principles and methods of various instruments used in biology and to prepare them to use these techniques in their own research.
- To understand the Research methods and the preparation of research manuscripts and the role of Journals and e-journals in research.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Describe the principle and working mechanisms of various instruments.

**CO2:** Interpret theoretical knowledge of various biological instruments useful for research.

**CO3:** Demonstrate critical thinking in designing research problem and find the solution to scientific research problem.

**CO4:** Discuss research based acquaintance in designing the experiments and interpretation of data with research tools.

**CO5:** Explain scientific ideas in both written and oral formats.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	M	H	H	H

#### Unit 1:

**(18 Hours)**

1.1: Principles and biological uses of phase contrast, fluorescence. (K1, K2, K3, K4, K5)

1.2: Scanning and transmission electron microscopes. (K1, K2, K3, K4, K5)

1.3: Spectroscopic techniques- Absorption and Emission principles - UV, visible spectroscopy. (K1, K2, K3, K4, K5)

1.4: Fluorescence and Raman spectroscopy. (K1, K2, K3, K4, K5)

1.5: X-ray crystallography. (K1, K2, K3, K4, K5)

1.6: NMR. (K1, K2, K3, K4, K5, K6)

**Unit 2:** **(18 Hours)**

2.1: Principle and application of - Chromatography - Gel, Ion, column, Affinity, HPLC & GLC. (K1, K2, K3, K4, K5)

2.2: Electrophoresis – Agarose, SDS - PAGE, Immunoelectrophoresis. (K1, K2, K3, K4, K5)

2.3: Centrifugation - Principle, Ultra centrifugation. (K1, K2, K3, K4, K5)

2.4: Applications of Radioactive Isotopes in biology. (K1, K2, K3, K4, K5, K6)

2.5: Counting methods - GM counters, Scintillation counters. (K1, K2, K3, K4, K5)

2.6: PEG. Autoradiography. (K1, K2, K3, K4, K5)

**Unit 3:** **(18 Hours)**

3.1: Scientific Method and its goals. (K1, K2, K3, K4, K5)

3.2: Research process. (K1, K2, K3, K4, K5)

3.3: Criteria of good research – research problem. (K1, K2, K3, K4, K5)

3.4: Criteria for selecting the problem. (K1, K2, K3, K4, K5)

3.5: Necessity of defining the problem – hypothesis. (K1, K2, K3, K4, K5)

3.6: Types of hypothesis - testing of hypothesis and their limitations. (K1, K2, K3, K4, K5)

**Unit 4:** **(18 Hours)**

4.1: Research Design - Meaning and needs of research design. (K1, K2, K3, K4, K5)

4.2: Important concepts relating to research design - different research design. (K1, K2, K3, K4, K5)

4.3: Sampling design - Steps in sampling design - Characteristics of good sampling design. (K1, K2, K3, K4, K5)

4.4: Different types of sample design. (K1, K2, K3, K4, K5)

4.5: Research methods – Survey - experimental, exploratory - case study. (K1, K2, K3, K4, K5)

4.6: Selection of tools - criteria for selection of tools – different types of tools - criteria of good research tool. (K1, K2, K3, K4, K5)

**Unit 5:** **(18 Hours)**

5.1: Reference work and preparation of dissertation. (K1, K2, K3, K4, K5, K6)

5.2: Pubmed, Google Scholar, and Infilibnet. (K1, K2, K3, K4, K5)

5.3: Computer aided techniques for data analysis, SPSS software. (K1, K2, K3, K4, K5, K6)

5.4: Data presentation and power point presentation. (K1, K2, K3, K4, K5)

5.5: Reference collection – preparation of thesis. (K1, K2, K3, K4, K5)

5.6: Preparation of scientific paper for publication in a Journal. (K1, K2, K3, K4, K5)

## **Books for Study and Reference:**

### **Textbooks:**

1. Anderson Durston, Polle 1970 - Thesis and Assignment Writing - Wiley Eastern Ltd., New Delhi.
2. Comir and Peter Wood Ford 1979 - Writing Scientific Papers in English - Pitman Medical Publishing Co., London.

### **Reference Books:**

3. Day R.A. 1994 - How to Write and Publish a Scientific Paper - Cambridge University Press, London.

## SEMESTER II

### PCZOE20 - APPLIED ENTOMOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PCZOE20	Applied Entomology	Theory	Core	5	4	100

#### Objective:

- This core paper has been designed to understand the biology of Insects, Insect pest management, Integrated Pest Management and biological control.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Identify the pest in different cash crops and the mode of infection.

**CO2:** Analyze the pest species of vegetables, fruits, stored grains and household pests.

**CO3:** Categorize the different insect pests and vectors of livestock.

**CO4:** Explain the classification of insecticides and the mode of action.

**CO5:** Apply appropriate method of insect pest management and integrated pest management.

CO/PO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	H	M	H
CO2	H	H	M	H	M	H
CO3	H	H	M	H	M	H
CO4	H	M	M	H	M	H
CO5	H	H	M	H	M	H

#### Unit 1:

**(15 Hours)**

1.1: Causes for insects assuming pest status. (K1, K2, K3, K4, K5)

1.2: Forecasting Pest outbreak. (K1, K2, K3, K4, K5)

1.3: Biology, nature, extent of damage and control measures of insect pests of Sugarcane - *Chilo infuscatellus*, *Tryporyza nivella*, *Chilo sacchariphagus*. (K1, K2, K3, K4, K5)

1.4: Biology, nature, extent of damage and control measures of insect pests of Cotton – *Aphis gossypii*, *Dysdercus koenigii*, *Thrips tabaci*. (K1, K2, K3, K4, K5)

1.5: Biology, nature, extent of damage and control measures of insect pests of Groundnut – *Aphis craccivora*, *Aproraema modicella*, *Helicoverpa armigera*. (K1, K2, K3, K4, K5)

1.6: Coconut - *Rhynchophorus ferrugineus*, *Oryctes rhinoceros*, *Nephantis seiropa*. (K1, K2, K3, K4, K5)

**Unit 2: (15 Hours)**

- 2.1: Biology, nature, extent of damage and control measures of insect pests of Vegetable - *Epilachna dodecastigma*, *Pieris brassicae*, *Leucinodes orbonalis*. (K1, K2, K3, K4, K5)
- 2.2: Biology, nature, extent of damage and control measures of insect pests of Fruits - *Sternochetus mangifera*, *Cosmopolites sordidus*, *Papilio demoleus*. (K1, K2, K3, K4, K5)
- 2.3: Biology, nature, extent of damage and control measures of insect pests of Stored product - Paddy - *Leptocorisa varicornis*, *Tryporyza incertulus*, *Sitophilus oryzae*. (K1, K2, K3, K4, K5)
- 2.4: Biology, nature, extent of damage and control measures of insect pests of stored product Wheat - *Triticum vulgare*, *Mythimna separata*, *Spodoptera mauritia*. (K1, K2, K3, K4, K5)
- 2.5: Biology, nature, extent of damage and control measures of insect pests of Household pest- *Ctenolepisma saccharina*, *Anthrena pimpinella*, *Trichophaga abruptella*. (K1, K2, K3, K4, K5)
- 2.6: Insect resistant crops. (K1, K2, K3, K4, K5, K6)

**Unit 3: (15 Hours)**

- 3.1: Insect pest of domestic animals - Cattle- Cattle fly. (K1, K2, K3, K4, K5)
- 3.2: Insect pest of domestic animals Ox - Warble fly. (K1, K2, K3, K4, K5)
- 3.3: Insect pest of domestic animals Fowl - Chicken flea, Shaft louse. (K1, K2, K3, K4, K5)
- 3.4: Insect pest of domestic animals Sheep and Goat - Head Maggot, Sheep Ked, Biting Louse. (K1, K2, K3, K4, K5)
- 3.5: Insect vectors of Animals – Mites, Ticks. (K1, K2, K3, K4, K5)
- 3.6: Organic methods of domestic pest management. (K1, K2, K3, K4, K5)

**Unit 4: (15 Hours)**

- 4.1: Classification of Insecticides - Chemical nature – Inorganic - Arsenic and Fluorine compounds. (K1, K2, K3, K4, K5)
- 4.2: Organic compounds- Animal origin – Nereistoxin. (K1, K2, K3, K4, K5)
- 4.3: Plant origin - Nicotinoids, Pyrethroides, Rotenoids. Hydrocarbons. (K1, K2, K3, K4, K5)
- 4.4: Synthetic organic compounds - DDT, BHC, Parathion. (K1, K2, K3, K4, K5)
- 4.5: Mode of action - Physical Poison, Protoplasmic Poison, Respiratory Poison. (K1, K2, K3, K4, K5)
- 4.6: Nerve Poison. Mode of Entry - Stomach Poisons, Contact Poison, Fumigants. (K1, K2, K3, K4, K5)

**Unit 5: (15 Hours)**

- 5.1: Biological control of plant pest. (K1, K2, K3, K4, K5)
- 5.2: Viral insecticides, Bacterial insecticides, Fungal insecticides. (K1, K2, K3, K4, K5)
- 5.3: Integrated Pest Management. (K1, K2, K3, K4, K5, K6)
- 5.4: Use of insect pathogens in control of pest. (K1, K2, K3, K4, K5)
- 5.5: Non-conventional pest control- Insect Attractants, Repellents, Antifeedants, Genetic radiations. (K1, K2, K3, K4, K5)
- 5.6: Plant protection appliances- Duster, Sprayers and Fumigators. (K1, K2, K3, K4, K5)

## **Books for study and Reference:**

### **Textbooks:**

1. Vasantharaj V.B, Kumaraswami. T- 1998-Elements of Economic Entomology- Popular Book Depot.
2. Nalina Sundari, Santhi R- 1962- Entomology- MJP Publishers.

### **Reference Books:**

## SEMESTER II

### PCZOF20 - BIODIVERSITY AND WILDLIFE CONSERVATION

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PCZOF20	Biodiversity and wild life conservation	Theory	Core	6	4	100

#### Objective:

- To understand the habitat and distribution of wild animals, causes for their endangerment and methods adopted for their conservation.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Discuss the Biodiversity India and ecosystems.

**CO2:** Explain the values of Biodiversity.

**CO3:** Discuss the Wildlife of India and threats to the wildlife.

**CO4:** Explain Wildlife protection and conservation.

**CO5:** Explain conservation methods.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	M	H	H	M	H
CO5	H	H	H	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	H	M	H
CO2	H	H	M	H	M	H
CO3	H	H	M	H	M	H
CO4	H	M	M	H	M	H
CO5	H	H	M	H	M	H

#### Unit 1:

(18 Hours)

1.1: Biodiversity in India: Genetic, species and ecosystem diversity. (K1, K2, K3, K4, K5)

1.2: Biogeographic classification of India. National and local level. (K1, K2, K3, K4, K5)

1.3: India as a mega diversity nation. (K1, K2, K3, K4, K5, K6)

1.4: Ecology and Ecosystems - Structure and function of ecosystem. (K1, K2, K3, K4, K5)

1.5: Energy flow in the ecosystem. (K1, K2, K3, K4, K5, K6)

1.6: Types of Ecosystem: Forest, Aquatic (Lake and Ocean) and Urban. (K1, K2, K3, K4, K5)

**Unit 2:** (18 Hours)

- 2.1: Value of biodiversity: Consumptive use, Productive use, Social, Ethical and Aesthetic. (K1, K2, K3, K4, K5)
- 2.2: Hotspots of biodiversity. (K1, K2, K3, K4, K5, K6)
- 2.3: Endemic and Invasive species. (K1, K2, K3, K4, K5)
- 2.4: Threats to biodiversity: Habitat loss. (K1, K2, K3, K4, K5, K6)
- 2.5: Climate change; Poaching. (K1, K2, K3, K4, K5)
- 2.6: Man and wildlife conflicts. (K1, K2, K3, K4, K5)

**Unit 3:** (18 Hours)

- 3.1: Wildlife of India. (K1, K2, K3, K4, K5)
- 3.2: Values of wildlife - Positive and Negative. (K1, K2, K3, K4, K5)
- 3.3: Morphological and Physiological adaptations of Endangered and threatened species. (K1, K2, K3, K4, K5)
- 3.4: Population dynamics: Exponential and Logistic. (K1, K2, K3, K4, K5)
- 3.5: Local and Regional Extinction. (K1, K2, K3, K4, K5)
- 3.6: Red Data Book. (K1, K2, K3, K4, K5)

**Unit 4:** (18 Hours)

- 4.1: Wildlife protection Act. (K1, K2, K3, K4, K5)
- 4.2: In-situ and ex-situ conservation. (K1, K2, K3, K4, K5, K6)
- 4.3: IUCN Red List – CITES. (K1, K2, K3, K4, K5)
- 4.4: National Parks and Sanctuaries. (K1, K2, K3, K4, K5)
- 4.5: Biospheres reserves. (K1, K2, K3, K4, K5)
- 4.6: Project Tiger - Project Gir Lion and Crocodile breeding project. (K1, K2, K3, K4, K5)

**Unit 5:** (18 Hours)

- 5.1: Germplasm conservation and Cryogenic preservation. (K1, K2, K3, K4, K5)
- 5.2: Assisted reproduction. (K1, K2, K3, K4, K5)
- 5.3: Captive breeding - Non-invasive and Minimal invasive method. (K1, K2, K3, K4, K5)
- 5.4: Scat analysis and Radio telemetry. (K1, K2, K3, K4, K5, K6)
- 5.5: Habitat suitability. (K1, K2, K3, K4, K5)
- 5.6: Remote sensing and GIS. (K1, K2, K3, K4, K5, K6)

**Books for Study and Reference:**

**Textbooks:**

**SEMESTER II**  
**PCZOG20 - PRACTICAL I**  
**INVERTEBRATA, CHORDATA, MOLECULAR BIOLOGY, GENETICS,**  
**BIOTECHNOLOGY AND MICROBIOLOGY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I & II	PCZOG20	Practical -I	Practical	Core	3	4	100

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Demonstrate and dissect different systems of specimen.

**CO2:** Identify structural modification of chordates, adaptive feature based on mode of life and chromosomes.

**CO3:** Identify and explain various inborn errors of metabolism, describe karyotyping and identify functional gene in given sequence.

**CO4:** Gain practical insights on various instruments used in molecular biology.

**CO5:** Identify /explain various microorganisms, transgenic animals and GM plants.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	M	H	H	M	H
CO5	H	H	H	H	M	H

CO/PSO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6

CO2	H	H	M	H	M	H
CO3	H	H	M	H	M	H
CO4	H	M	M	H	M	H
CO5	H	H	M	H	M	H

**Major: Dissections:**

**1. Invertebrata:** Digestive system- Prawn, Cockroach and Sepia  
 Nervous system – Prawn, Cockroach and sepia

**2. Chordata:** 9<sup>th</sup> and 10<sup>th</sup> Cranial nerves of Shark  
 Arterial system of Shark

**3. Minor: Mounting:**

Appendages of Prawn  
 Mouth parts – Cockroach, Mosquito, House fly, Honey bee  
 Sting of Honey Bee  
 Brain of frog and calotes (Museum Specimen)

#### **4. Study of museum specimen and slides relevant to**

- Structural modifications of chordates - Hippocampus, Acipenser and Ambystoma.
- Adaptive features for their mode of life - Echeneis, Hyla, and Draco.

#### **5. Molecular Biology and Genetics:**

- Giant chromosome - polytene chromosomes 1. Chironomous Larva (Slide),  
2. Lampbrush chromosomes - chart
- Identification of a functional gene in the given nucleotide sequence.

#### **6. Karyotyping using human metaphase chromosome plates: Identification of syndromes:**

- (i) Down (ii) Klinefelter (iii) Turner

#### **7. Study on Inborn errors of metabolism using Chromosomal Charts.**

Lipid metabolism	-	Tay-Sachs and Niemann-Pick
Protein metabolism	-	PKU and Alkaptonuria
Carbohydrate metabolism	-	Galactosemia and Pompe's disease

#### **8. Visit to a Molecular Biology laboratory.**

#### **9. Biotechnology and Microbiology:**

- Aspergillus, Rhizopus, Pseudomonas, Bacillus
- Salmonella*, *Lactobacillus*, *Saccharomyces cerevisiae*
- GM Papaya, GM Tomato, Bt Cotton, Bt Brinjal
- Hybridoma Technology
- Transgenic Animals- Fish, Goat.

#### **10. Determination of Bacterial Growth by Turbidity Measurement – Demonstration.**

**SEMESTER II**  
**PCZOH20 - PRACTICAL II - RESEARCH METHODOLOGY, APPLIED**  
**ENTOMOLOGY, BIODIVERSITY AND WILDLIFE CONSERVATION**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I & II	PCZOH20	Practical II	Practical	Core	3	4	100

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CLO1:** Apply basic concepts of instrumentation.

**CLO2:** Gain skills in techniques of chromatography, electrophoresis and spectroscopy.

**CLO3:** Demonstrate Histochemical staining techniques.

**CLO4:** Summarize the insect pest and their control measures.

**CLO5:** Explain biodiversity and explore the fauna existing around for documentation and motivates for further studies and research in the field.

CO3	H	H	H	M	M	L
CO4	H	H	H	H	M	H
CO5	H	M	H	H	L	H

**Research Methodology:**

1. Electrophoresis – Agarose gel - SDS PAGE
2. Paper Chromatography
3. Gel/ Affinity Chromatography- Demonstration
4. Histochemical staining technique of Carbohydrates, Protein and Lipids
5. Estimation of Urea - DAM Method
6. Estimation of Cholesterol - ZAC'S Method
7. Estimation of Glucose – Ortho Toluidine Method
8. Estimation of Protein – Biuret Method

**Spotters:** Microscope- Compound, Fluorescent, TEM, SEM

**Applied Entomology:**

**Study on Insect Pests:- Spotters**

1. Pest of sugarcane – *Euethola humilis*, *Chilio infuscatellus*

2. Pest of cotton – *Dysdercus koenigii*, *Aphis gossypii*
3. Pest of paddy – *Sogatella furcifera*, *Leptocorisa varicornis*
4. Pest of coconut- *Oryctes rhinoceros*, *Rhyncophorus ferrugineus*
5. Pest of Wheat- *Meromyza Americana*, *Triticum vulgare*
6. Pest of Fruits- *Batocera rufamaculata*, *Papilio demoleus*
7. Pest of vegetables- *Epilachna vigintioctopunctata*, *Leucinodes orbonalis*
8. House hold pest- *Ctenolepisma saccharina*, *Anthrena pimpinella*
9. Stored products pest- *Sitophilus oryzae*, *Leptocorisa varicornis*
10. Collection of Insects and preservation Techniques- Insect box

### **Biodiversity and Wild Life Conservation:**

1. Observation and documentation of fauna inside the College campus – Soil microarthropods- Annelids, Amphibians, Reptiles and Birds
2. Spotters of endemic species- Laughing thrush, Grey headed bulbul.
3. Endangered species of India- Red crowned roofed turtle, Javan rhinoceros.
4. Zoo geographical realms:
  - Holartic realm-Hoary bat, Elk
  - Paleotropical realm- Hyena, Gibbon
  - Notogaeen realm- Flying fox, Bandicoot
  - Antartic realm – Leopard seal, Orca
5. Hotspots of Tamil Nadu- Western Ghats- Lion tailed macaque, Dwarf Malabar Pufferfish, Nilgiri Langur.
6. Endemism- Komodo dragon, Kangaroo, Kiwi

**SEMESTER II**  
**PEZOC20 - ELECTIVE II A: BIOCHEMISTRY**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PEZOC20	Biochemistry	Theory	Elective	5	5	100

**Objective:**

- To comprehend the molecular design of life introduces the most important classes of biological macromolecules like proteins, carbohydrates, lipids and presents the basic concepts of catalysis and enzyme action.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Explain the atom and types of bonds and buffers.

**CO2:** Explain the properties of water body fluids its biological function and Classification of Amino acids.

**CO3:** Appraise the classification, properties and mode of action of Protein and Enzyme.

**CO4:** Summarize the complexity of the carbohydrate metabolism.

**CO5:** Categorize the Vitamins and its importance.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	L	H
CO2	H	H	L	H	L	M

CO5	H	H	L	M	L	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	M	L	M
CO2	H	M	H	L	M	M
CO3	H	L	H	M	M	L
CO4	H	H	H	H	M	H
CO5	H	M	H	H	L	H

**Unit 1:**

**(15 Hours)**

1.1: Structure of an atom. Types of bonds-covalent-ionic- hydrogen. (K1, K2, K3, K4, K5)

1.2: Zwitter ions- isoelectrical point. (K1, K2, K3, K4, K5)

1.3: Water - Biological importance, Physical properties, Structure, Interactions in aqueous solution. (K1, K2, K3, K4, K5)

1.4: pH and buffers. (K1, K2, K3, K4, K5)

- 1.5: Acid- Base balance, Henderson Hasselbach equation, Biological importance of Buffers. (K1,K2, K3, K4, K5)
- 1.6: Acidosis and Alkalosis. (K1, K2, K3, K4, K5)

**Unit 2:** (15 Hours)

- 2.1: Electrolyte and water balance. (K1, K2, K3, K4, K5)
- 2.2: Body fluids- Milk, Colostrum. (K1, K2, K3, K4, K5)
- 2.3: Amniotic fluid and CSF. (K1, K2, K3, K4, K5)
- 2.4: Urine. (K1, K2, K3, K4, K5)
- 2.5: Amino Acids: Structure. (K1, K2, K3, K4, K5)
- 2.6: Classification of amino acids and properties. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Proteins: Classification of Proteins based on the structure, properties. (K1, K2, K3, K4, K5)
- 3.2: Metabolism- Deamination, Transamination, Transmethylation. (K1, K2, K3, K4, K5)
- 3.3: Krebs's Henslict cycle(Urea cycle). (K1, K2, K3, K4, K5)
- 3.4: Enzymes: Nomenclature, Classification. (K1, K2, K3, K4, K5)
- 3.5: Properties of enzymes. (K1, K2, K3, K4, K5)
- 3.6: Mode of enzyme action, enzyme substrate compounds. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

- 4.1: Carbohydrates: Structure. Classification. (K1, K2, K3, K4, K5)
- 4.2: Metabolism- Glycogenesis, Glycogenolysis, Gluconeogenesis. Glycolysis- Embden Meyerhoff Pathway. Hexose Monophosphate shunt. (K1, K2, K3, K4, K5, K6)
- 4.3: Lipids: Structure and Classification. (K1, K2, K3, K4, K5)
- 4.4: Biosynthesis and oxidation of fatty acids-Biological significance of carbohydrates, protein and lipids. (K1, K2, K3, K4, K5)
- 4.5: Convergence of Central Metabolic Pathway - TCA/Krebs's Cycle. (K1, K2, K3, K4, K5, K6)
- 4.6: Electron transport system. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hrs)

- 5.1: Water soluble Vitamins - Structure, Classification, Sources, Functions. (K1, K2, K3, K4, K5)
- 5.2: Hyper and Hypo vitaminosis and deficiencies in man. (K1, K2, K3, K4, K5)
- 5.3: Fat soluble Vitamins - Structure, Classification, Sources, Functions. (K1, K2, K3, K4, K5)
- 5.4: Hyper and Hypo vitaminosis and deficiencies in man. (K1, K2, K3, K4, K5)
- 5.5: Metabolism of Xenobiotics. (K1, K2, K3, K4, K5)
- 5.6: Detoxification and Biotransformation. (K1, K2, K3, K4, K5, K6)

**Books for Study and Reference:**

**Textbooks;**

## SEMESTER II

### PEZOD20 - ELECTIVE II B: ENDOCRINOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PEZOD20	Endocrinology	Theory	Elective	5	5	100

#### Objective:

- To make the students learn the objectives and scope of comparative endocrinology, anatomy, morphology and histology of endocrine tissues of vertebrates, crustacean and insect endocrine organs and their functions

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Discuss hormones its classification and function, the anatomy of endocrine glands,

**CO2:** Explain Pituitary and Parathyroid Structure and Function.

**CO3:** Comprehensive knowledge about structure and function of Pancreas and Adrenal glands.

**CO4:** Describe the complexity of the endocrine system of invertebrates.

**CLO5:** Elucidate hormones in development.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	H	H	H

#### Unit 1:

(15 Hours)

1.1: Introduction, objectives and scope of endocrinology. (K1, K2, K3, K4, K5)

1.2: Modern concepts in Endocrinology. (K1, K2, K3, K4, K5)

1.3: Problems in Endocrinology. (K1, K2, K3, K4, K5)

1.4: Endocrine glands in crustaceans, insects and vertebrates. (K1, K2, K3, K4, K5, K6)

1.5: Experimental methods of hormone research. (K1, K2, K3, K4, K5, K6)

1.6: General classes of chemical messengers. (K1, K2, K3, K4, K5)

**Unit 2:** (15 Hours)

- 2.1: Pituitary gland - characteristics, structural organization. (K1, K2, K3, K4, K5)
- 2.2: Hormone secretion and its functions. (K1, K2, K3, K4, K5)
- 2.3: Hypothalamic control. (K1, K2, K3, K4, K5)
- 2.4: Thyroid gland - structural organizations. (K1, K2, K3, K4, K5)
- 2.5: Metabolic effects of thyroid - effects on reproduction. (K1, K2, K3, K4, K5)
- 2.6: Parathyroid its structures and functions. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Structure of pancreas. (K1, K2, K3, K4, K5)
- 3.2: Pancreatic hormones and their functions. (K1, K2, K3, K4, K5)
- 3.3: Structural organizations of adrenals. (K1, K2, K3, K4, K5)
- 3.4: Hormones secreted by adrenal gland. (K1, K2, K3, K4, K5)
- 3.5: Functions of cortical hormones. (K1, K2, K3, K4, K5)
- 3.6: Functions of Medullary hormones. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

- 4.1: Concepts of neurosecretions. (K1, K2, K3, K4, K5, K6)
- 4.2: Endocrine systems in crustaceans. (K1, K2, K3, K4, K5)
- 4.3: Endocrine control of moulting and metamorphosis. (K1, K2, K3, K4, K5)
- 4.4: Neuroendocrine system in insects. (K1, K2, K3, K4, K5)
- 4.5: Endocrine control of moulting in insects. (K1, K2, K3, K4, K5)
- 4.6: Metamorphosis and reproduction in insects. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hours)

- 5.1: Hormonal control of metamorphosis in an anuran amphibian. (K1, K2, K3, K4, K5)
- 5.2: Structure and hormones of mammalian testis. (K1, K2, K3, K4, K5)
- 5.3: Structure and hormones of mammalian ovary. (K1, K2, K3, K4, K5)
- 5.4: Estrous and menstrual cycle. (K1, K2, K3, K4, K5)
- 5.5: Hormones of pregnancy and parturition. (K1, K2, K3, K4, K5)
- 5.6: Hormonal control of lactation. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbooks:**

### SEMESTER III

#### PCZOI20 - ENVIRONMENTAL BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PCZOI20	Environmental Biology	Theory	Core	7	4	100

**Objectives:**

- Understand the Changes in environment and its impact.
- Understand the contaminants, their effects and disposal.
- Importance of recycling technologies in Environmental Conservation.
- Understand the issues related to pollution and laws enforced.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Describe ecological succession and Environmental stresses and their management.

**CO2:** Explain the major classes of contaminants and their impact on environment.

**CO3:** Explain green energy and the types of recycling technologies for solid and liquid wastes and their role in environmental conservation.

**CO4:** Discuss environmental indicators and their role in environmental balances and bioremediation.

**CO5:** Explain the importance of global ecology towards sustainable civilization.

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CLO1	H	H	H	H	M	H
CLO2	H	H	H	H	M	H
CLO3	H	H	H	H	M	H
CLO4	H	H	H	H	M	H
CLO5	H	H	H	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CLO1	H	H	M	H	M	H
CLO2	H	H	M	H	M	H
CLO3	H	H	M	H	M	H
CLO4	H	H	M	H	M	H
CLO5	H	H	M	H	M	H

**Unit 1:**

**(21 Hours)**

1.1: Ecological succession – Process and Patterns of Succession. (K1, K2, K3, K4, K5)

1.2: Human influence on Succession. (K1, K2, K3, K4, K5, K6)

1.3: Homeostasis. (K1, K2, K3, K4, K5, K6)

1.4: Radioactive compounds and their impact on the environment. (K1, K2, K3, K4, K5)

1.5: Environmental Stresses and their management - global climatic pattern. (K1, K2, K3, K4, K5, K6)

1.6: Atmospheric ozone, Ozone depletion, coping with climatic variations. (K1, K2, K3, K4, K5, K6)

**Unit 2:** (21 Hours)

2.1: Major classes of contaminants. (K1, K2, K3, K4, K5)

2.2: Uptake, biotransformation, detoxification, elimination and accumulation of toxicants. (K1, K2, K3, K4, K5)

2.3: Factors influencing bioaccumulation from food and tropic transfer. (K1, K2, K3, K4, K5)

2.4: Important heavy metals and their role in environment. (K1, K2, K3, K4, K5)

2.5: Agrochemical use and misuse, alternatives. Pesticides and other chemicals in agriculture, industry and hygiene and their disposal. (K1, K2, K3, K4, K5)

2.6: Impact of chemicals on biodiversity of microbes, animals and plants. Biodegradation of chemicals. (K1, K2, K3, K4, K5)

**Unit 3:** (21 Hours)

3.1: Green energy – Bio fuels. (K1, K2, K3, K4, K5)

3.2: Recycling and reuse technologies for solid wastes and their role in environmental conservation. (K1, K2, K3, K4, K5)

3.3: Recycling and reuse technologies for liquid wastes and their role in environmental conservation. (K1, K2, K3, K4, K5)

3.4: Remote sensing – basic concepts. (K1, K2, K3, K4, K5)

3.5: Applications of remote sensing techniques in environmental conservation.  
(K1, K2, K3, K4, K5, K6)

**Unit 4:** (21 Hours)

4.1: Environmental indicators and their role in environmental balance. (K1, K2, K3, K4, K5)

4.2: Bioremediation - Definition - Need and Scope of Bioremediation. (K1, K2, K3, K4, K5, K6)

4.3: Environmental application of Bioremediation. (K1, K2, K3, K4, K5)

4.4: Phytoremediation. (K1, K2, K3, K4, K5)

4.5: Biomagnifications. (K1, K2, K3, K4, K5)

4.6: Bioavailability. (K1, K2, K3, K4, K5)

**Unit 5:** (21 Hours)

5.1: Global ecology towards sustainable civilization: Ecological. (K1, K2, K3, K4, K5)

5.2: Societal gaps. (K1, K2, K3, K4, K5)

5.3: Global sustainability, Long term transitions. (K1, K2, K3, K4, K5)

5.4: Human designed and Management systems. (K1, K2, K3, K4, K5)

5.5: Environmental laws and Acts pertaining to environmental protection and management. (K1, K2, K3, K4, K5)

5.6: Environmental monitoring and environmental assessment. (K1, K2, K3, K4, K5)

## SEMESTER III

### PCZOJ20 - LIMNOLOGY AND TOXICOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PCZOJ20	Limnology and Toxicology	Theory	Core	6	4	100

#### Objectives:

- To understand the different fresh water habitat, their fauna and Physio-chemical properties.
- An introduction to basic toxicology to understand dosage, route of exposure and its effects on fauna

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Attains basic concept about fresh water habitats and its types.

**CO2:** Describe the Physio-Chemical Characteristics and its importance in freshwater ecosystems.

**CO3:** Summarize about the organisms and adaptation in the freshwater ecosystem.

**CO4:** Explain the basic knowledge about toxicology its principle, agents and estimation methods.

**CO5:** Describe the impact of toxicant in the aquatic ecosystem.

CO3	H	H	H	M	M	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit 1: LIMNOLOGY

(18 Hours)

1.1: Limnology – Definition, historical development. (K1, K2, K3, K4, K5)

1.2: Scope of Limnology. (K1, K2, K3, K4, K5)

1.3: Types of freshwater habitats and their ecosystem. (K1, K2, K3, K4, K5, K6)

1.4: Lentic- Ponds. (K1, K2, K3, K4, K5)

1.5: Lakes. (K1, K2, K3, K4, K5)

1.6: Lotic- Streams, Rivers. (K1, K2, K3, K4, K5)

**Unit 2:****(18 Hours)**

- 2.1: Physio – Chemical Characteristics- Light. (K1, K2, K3, K4, K5)
- 2.2: Temperature and Radiation.(K1, K2, K3, K4, K5)
- 2.3: Stratification and Heat Budget. (K1, K2, K3, K4, K5)
- 2.4: Dissolved Solids – Carbonate, Bicarbonates, Phosphate and Nitrate. (K1, K2, K3, K4, K5)
- 2.5: Turbidity. (K1, K2, K3, K4, K5)
- 2.6: Dissolved gases - Oxygen, Carbon dioxide, pH. (K1, K2, K3, K4, K5)

**Unit 3:****(18 Hours)**

- 3.1: General study of freshwater organisms. Plankton – Phytoplankton - Diatoms, Dinoflagellates, Blue- green algae. (K1, K2, K3, K4, K5, K6)
- 3.2: Zooplankton – Larval forms of Arthropods. (K1, K2, K3, K4, K5, K6)
- 3.3: Benthos- general adaptations. (K1, K2, K3, K4, K5)
- 3.4: Littoral zone- general adaptations. (K1, K2, K3, K4, K5)
- 3.5: Limnetic zone- general adaptations. (K1, K2, K3, K4, K5)
- 3.6: Profundal zone - general adaptations. (K1, K2, K3, K4, K5)

**Unit 4: TOXICOLOGY****(18 Hours)**

- 4.1: Toxicology - Basic concepts. (K1, K2, K3, K4, K5)
- 4.2: Toxicokinetics –Principles- ADME (Absorption, Distribution, Metabolism and Excretion). (K1, K2, K3, K4, K5, K6)
- 4.3: Various types of toxicological agents. (K1, K2, K3, K4, K5)
- 4.4: Toxicity testing principles, hazards, risks and their control methods. (K1, K2, K3, K4, K5)
- 4.5: Heavy metal toxicity – Estimation of mercury by Dithizone Colorimetric method, Estimation of fluoride by Diphenyl Carbozide Colorimetric method. (K1, K2, K3, K4, K5)
- 4.6: Estimation of Chromium by Diphenyl Carbozide Colorimetric method. (K1, K2, K3, K4, K5)

**Unit 5:****(18 Hours)**

- 5.1: Aquatic environment – Toxicants and toxicity. (K1, K2, K3, K4, K5)
- 5.2: Factors that affect the environmental concentrations of the toxicants. (K1, K2, K3, K4, K5, K6)
- 5.3: Factors that influence toxicity. (K1, K2, K3, K4, K5)
- 5.4: Effect on aquatic Fauna. (K1, K2, K3, K4, K5)
- 5.5: Toxicity test: Acute toxicity test - chronic toxicity test - LC 50 – LD 50. (K1, K2, K3, K4, K5)
- 5.6: Factors that modify toxicity. (K1, K2, K3, K4, K5)

**SEMESTER III**  
**PCZOK20 - ANIMAL BEHAVIOUR**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PCZOK20	Animal Behaviour	Theory	Core	6	4	100

**Objective:**

- This paper has been designated to highlight the Behavioural strategies and adaptations of animals for their survival.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Discuss the innate, acquired and group behaviours.

**CO2:** Explain the habitat selection and foraging methods of animals.

**CO3:** Compute the interspecific behaviours.

**CO4:** Explain about communication in animals.

**CO5:** Analyze Social behaviours in animals.

PSO/CO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	M	H	H	H	M
CO2	H	M	H	H	H	H
CO3	H	H	H	H	H	M
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PLO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	M	M
CO3	H	H	H	H	M	M
CO4	H	H	H	H	M	M
CO5	H	H	H	H	M	M

**Unit 1:**

**(18 Hours)**

1.1: Ethology – Definition. (K1, K2, K3, K4, K5)

1.2: Biorhythms and biological clocks. (K1, K2, K3, K4, K5)

1.3: Instinct and learning. (K1, K2, K3, K4, K5)

1.4: Cognition. Group Behaviour - Stereotyped and acquired Behaviour. (K1, K2, K3, K4, K5)

1.5: Learning. (K1, K2, K3, K4, K5)

1.6: Memory. (K1, K2, K3, K4, K5)

**Unit 2:** (18 Hours)

- 2.1: Habitat selection - Dispersal, environmental signals for dispersal. (K1, K2, K3, K4, K5)
- 2.2: Habitat imprinting, tradition, theory of habitat selection. Homing. (K1, K2, K3, K4, K5, K6)
- 2.3: Foraging methods - Prey model, patch model. (K1, K2, K3, K4, K5)
- 2.4: Techniques for acquiring food. (K1, K2, K3, K4, K5)
- 2.5: Modifying food supply. Construction of traps, electromagnetic fields. (K1, K2, K3, K4, K5)
- 2.6: Territorialism. (K1, K2, K3, K4, K5)

**Unit 3:** (18 Hours)

- 3.1: Anti-predator Behaviour - Individual strategies- escaping and freezing. (K1, K2, K3, K4, K5)
- 3.2: Anti-predator Behaviour - Individual strategies- Deception, toxicity. (K1, K2, K3, K4, K5)
- 3.3: Anti-predator Behaviour - Individual strategies- Mimicry, distraction, displays.  
(K1, K2, K3, K4, K5)
- 3.4: Social strategies – Host - parasite relation. (K1, K2, K3, K4, K5)
- 3.5: Individual Behaviour – Conflict. (K1, K2, K3, K4, K5)
- 3.6: Aggression. (K1, K2, K3, K4, K5)

**Unit 4:** (18 Hours)

- 4.1: Communication in animals – Types. (K1, K2, K3, K4, K5)
- 4.2: Sound - Alarm calls, sonar in bats. (K1, K2, K3, K4, K5)
- 4.3: Neurobiology of Bird song. (K1, K2, K3, K4, K5)
- 4.4: Language acquisition by Humans and Apes. (K1, K2, K3, K4, K5, K6)
- 4.5: Chemical communication – Pheromones - Insect pheromones and vertebrate pheromones.  
(K1, K2, K3, K4, K5)
- 4.6: Visual communication. (K1, K2, K3, K4, K5)

**Unit 5:** (18 Hours)

- 5.1: Social Behaviour. (K1, K2, K3, K4, K5)
- 5.2: Social organization in Insects. (K1, K2, K3, K4, K5)
- 5.3: Social organization in Mammals. (K1, K2, K3, K4, K5)
- 5.4: Advantages of social Behaviour. (K1, K2, K3, K4, K5)
- 5.5: Reproductive Behaviour. (K1, K2, K3, K4, K5)
- 5.6: Courtship in birds. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**SEMESTER III**  
**PEZOE20 - ELECTIVE III A: CLINICAL LABORATORY TECHNIQUES**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PEZOE20	Clinical Laboratory Techniques	Theory	Elective	5	5	100

**Objective:**

To imbibe the knowledge in the laboratory techniques which are applied to humans in day to day life.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Develop technical knowledge in laboratory practices and apparatus maintenance.

**CO2:** Examine blood composition and basic hematological techniques.

**CO3:** Justify the pathology of diseases caused by parasites, virus, bacteria & fungus.

**CO4:** Discuss experimental techniques and methods of urine analysis.

**CO5:** Analyze the results of physical, microscopic and biochemical analysis of body fluids.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO

CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit 1:**

**(15 Hours)**

1.1: Scope of Clinical laboratory technique (CLT). (K1, K2, K3, K4, K5)

1.2: Management and administration. (K1, K2, K3, K4, K5)

1.3: First aid in Laboratories. (K1, K2, K3, K4, K5)

1.4: General lab apparatus and general procedures, glass wares used in CLT studies.  
(K1, K2, K3, K4, K5)

1.5: Sterilization. (K1, K2, K3, K4, K5)

1.6: Disposal of infected materials. (K1, K2, K3, K4, K5)

**Unit 2:** (15 Hours)

- 2.1: Hematology – Blood. Haemopoiesis. (K1, K2, K3, K4, K5)
- 2.2: Collection – Capillary and venipuncture. Anticoagulants. (K1, K2, K3, K4, K5)
- 2.3: Basic hematology techniques - TC, DC, PCV, ESR, RBC fragility test. (K1, K2, K3, K4, K5, K6)
- 2.4: Clotting time, bleeding time, prothrombin time, GOD/POD. (K1, K2, K3, K4, K5, K6)
- 2.5: Blood grouping. (K1, K2, K3, K4, K5)
- 2.6: Platelets and its importance - blood coagulation. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Common Parasites of Man, life cycle and their Clinical diagnosis in body fluids- Blood- *Plasmodium vivax*. (K1, K2, K3, K4, K5)
- 3.2: Lymph - *Wuchereria bancrofti*. (K1, K2, K3, K4, K5)
- 3.3: CSF- toxoplasma, Perinicious malaria. (K1, K2, K3, K4, K5)
- 3.4: Clinical diagnosis of bacterial diseases – Typhoid. (K1, K2, K3, K4, K5)
- 3.5: Clinical diagnosis of viral disease - Hepatitis B. (K1, K2, K3, K4, K5)
- 3.6: Clinical diagnosis of Fungal Infections – Candidiasis. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

- 4.1: Urine analysis – Physical - volume, appearance, colour, order. (K1, K2, K3, K4, K5)
- 4.2: Microscopic examinations for deposits, RBC, casts, pus cells. (K1, K2, K3, K4, K5)
- 4.3: Biochemical analysis - Estimation of sugar, albumin, bile pigments, bile salt and ketone bodies. (K1, K2, K3, K4, K5)
- 4.4: Semen analysis - Physical examinations. (K1, K2, K3, K4, K5)
- 4.5: Microscopic examinations - motility of sperms – sperm counting(K1, K2, K3, K4, K5)
- 4.6: Vaginal analysis - Microscopic examinations – Pap smear. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hours)

- 5.1: CSF - Collection, Physical examinations; Microscopic examinations; Biochemical analysis. (K1, K2, K3, K4, K5)
- 5.2: Gastric juice – Collection - Test for resting gastric content, Detection and estimation of gastric juice secretions. (K1, K2, K3, K4, K5)
- 5.3: Liver function test - Liver functions, estimation of serum bilirubin, serum enzymes, serum proteins. (K1, K2, K3, K4, K5, K6)
- 5.4: Estimation of cavity fluids - Pericardial, Pleural, peritoneal, Amniotic and for physical, chemical, cytological examination. (K1, K2, K3, K4, K5)
- 5.5: Stool analysis - Appearance, Composition, Collection, Physical, Chemical, microscopical examinations. (K1, K2, K3, K4, K5)
- 5.6: Examination for intestinal parasites. (K1, K2, K3, K4, K5)

## SEMESTER III

### PEZOF20 - ELECTIVE III B: FISHERIES SCIENCE

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PEZOF20	Fisheries Science	Theory	Elective	5	5	100

#### Objective:

- The aim of the paper is to understand the morphology, classification and identification of fishes and the fisheries and fishery resources of India.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain the morphology and physiology of Indian fishes.

**CO2:** Analyze the environmental and nutritional requirements of fishes.

**CO3:** Understand the types, distribution and scope of inland fisheries.

**CO4:** Impart theoretical knowledge on surveying methods of fishery resources.

**CO5:** Acquire knowledge on various threats and conservation strategies of Indian fishes.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

#### Unit 1:

(15 Hours)

1.1: General morphology and outline classification of fish. (K1, K2, K3, K4, K5)

1.2: Major groups of fish and their characteristics – morphometric and meristic characters of elasmobranchs and teleost fishes. (K1, K2, K3, K4, K5)

1.3: Basic anatomy of fish – digestive, circulatory, respiratory, nervous and reproductive system. (K1, K2, K3, K4, K5)

1.4: Food and feeding habits. (K1, K2, K3, K4, K5)

1.5: Maturity, fecundity, spawning. (K1, K2, K3, K4, K5)

1.6: Survival of Indian fish. (K1, K2, K3, K4, K5, K6)

**Unit 2:** (15 Hours)

- 2.1: Length-weight relationship. (K1, K2, K3, K4, K5)
- 2.2: Factors influencing growth condition factor, age determination. (K1, K2, K3, K4, K5)
- 2.3: Theory of fishing. (K1, K2, K3, K4, K5)
- 2.4: Unit stock, recruitment. (K1, K2, K3, K4, K5)
- 2.5: Growth, mortality, migration. (K1, K2, K3, K4, K5)
- 2.6: Fish tagging and marking. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Fishery zones in India. (K1, K2, K3, K4, K5)
- 3.2: Types of fisheries in India – Riverine, Estuarine, Coldwater, Reservoir and Pond fisheries. (K1, K2, K3, K4, K5)
- 3.3: Present status and scope of inland capture fisheries – their fishery characterizes, distribution and importance. (K1, K2, K3, K4, K5)
- 3.4: Present status and scope of marine capture fisheries – crustaceans (Prawn/shrimp, lobster and crabs). (K1, K2, K3, K4, K5)
- 3.5: Present status and scope of marine capture fisheries Molluscs (clam, cockle, mussel, oyster, cephalopods). (K1, K2, K3, K4, K5)
- 3.6: Present status and scope of marine capture fisheries Fishes – their fishery characteristics, distribution and importance. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

- 4.1: Methods of surveying the fishery resources- Acoustic method. (K1, K2, K3, K4, K5, K6)
- 4.2: Methods of surveying the fishery resources - Aerial method. (K1, K2, K3, K4, K5)
- 4.3: Survey of fish eggs and larvae. (K1, K2, K3, K4, K5)
- 4.4: Analyzing population features. (K1, K2, K3, K4, K5)
- 4.5: Growth mortality selection. (K1, K2, K3, K4, K5)
- 4.6: Collection of eggs. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hours)

- 5.1: Principle methods of exploitation of fish. (K1, K2, K3, K4, K5)
- 5.2: Indigenous and modern gears and crafts. (K1, K2, K3, K4, K5)
- 5.3: Principle methods of fish preservation and processing in India. (K1, K2, K3, K4, K5)
- 5.4: Types of spoilage, causative factors. (K1, K2, K3, K4, K5)
- 5.5: Marketing. (K1, K2, K3, K4, K5)
- 5.6: Economics. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbooks:**

- 1. Day F. 1981 – Fishes of India, Vol. I and Vol. II – William Sawson & Sons Ltd., London.
- 2. Jhingran C.G. 1981 – Fish and Fisheries of India – Hindustan Publishing Co., India.

**Reference Books:**

## SEMESTER IV

### PCZOM20 - PHYSIOLOGY AND ENDOCRINOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PCZOM20	Physiology and Endocrinology	Theory	Core	7	4	100

**Objective:**

- To enable students to understand the Structural and functional aspects of systems, the basic concept of Enzymes and Gastrointestinal hormones and the functions of hormones in the body.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Expand knowledge about the enzymes, digestive system and interaction of complex metabolic pathway, respiration and the adaptation at extreme conditions.

**CO2:** Summarize the circulatory and excretory system with its structure, function and regulatory mechanism.

**CO3:** Discuss the muscular and nervous system structure, function and regulation.

**CO4:** Describe hormones its classification and function, the anatomy of endocrine glands.

**CO5:** Interpret endocrine system with its function and regulation in reproduction.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	M

**Unit 1: PHYSIOLOGY**

**(21 Hours)**

- 1.1: Digestion and absorption. Role of gastrointestinal hormones. (K1, K2, K3, K4, K5)
- 1.2: Carbohydrates Proteins and Lipids Metabolism. (K1, K2, K3, K4, K5, K6)
- 1.3: Respiration- Mechanism of respiration. Nervous and chemical control of respiration. (K1, K2, K3, K4, K5)
- 1.4: Acid – base balance. (K1, K2, K3, K4, K5)
- 1.5: Body Mass Index (BMI). (K1, K2, K3, K4, K5)
- 1.6: Basal Metabolic Rate (BMR). (K1, K2, K3, K4, K5)

**Unit 2:** (21 Hours)

- 2.1: Circulation: Structure of heart, Properties of Cardiac muscle. (K1, K2, K3, K4, K5)
- 2.2: Cardiac Cycle, Origin and conduction of Heart beat. (K1, K2, K3, K4, K5)
- 2.3: Hormonal and neural regulation of Circulation. (K1, K2, K3, K4, K5)
- 2.4: Excretion – Structure of Kidney, Blood supply. (K1, K2, K3, K4, K5)
- 2.5: Urine Formation – Micturition. (K1, K2, K3, K4, K5)
- 2.6: Neural, hormonal regulation of urine formation in man. (K1, K2, K3, K4, K5)

**Unit 3:** (21 Hours)

- 3.1: Muscles – Skeletal muscle - Anatomy of muscle fiber – muscle proteins. (K1, K2, K3, K4, K5)
- 3.2: Physiology of muscle contraction- Mechanism of Muscle contraction theories.  
(K1, K2, K3, K4, K5, K6)
- 3.3: Smooth Muscle – Types - Multi unit, Visceral; Calcium - Calmodulin role in Smooth muscle contraction. (K1, K2, K3, K4, K5)
- 3.4: Nervous System – Brain and spinal cord and reflex action. (K1, K2, K3, K4, K5)
- 3.5: Sympathetic and parasympathetic system. (K1, K2, K3, K4, K5)
- 3.6: Neurons, transmissions of nerve impulse, neurotransmitters. (K1, K2, K3, K4, K5)

**Unit 4: ENDOCRINOLOGY** (21 Hours)

- 4.1: Endocrine glands in Mammals. (K1, K2, K3, K4, K5)
- 4.2: Hormones – Classification, function and chemical nature. (K1, K2, K3, K4, K5)
- 4.3: Physiology of endocrine glands – Pituitary gland. (K1, K2, K3, K4, K5)
- 4.4: Physiology of endocrine glands -Pancreas gland. (K1, K2, K3, K4, K5)
- 4.5: Physiology of endocrine glands - Thyroid gland. (K1, K2, K3, K4, K5)
- 4.6: Physiology of endocrine glands- Adrenal gland. (K1, K2, K3, K4, K5)

**Unit 5:** (21 Hours)

- 5.1: Endocrinology and Reproduction. (K1, K2, K3, K4, K5)
- 5.2: Physiology of Mammalian reproductive hormones - Testis (K1, K2, K3, K4, K5)
- 5.3: Physiology of Mammalian reproductive hormones - Ovary. (K1, K2, K3, K4, K5)
- 5.4: Estrous and menstrual cycle. (K1, K2, K3, K4, K5)
- 5.5: Neuroendocrine regulation of Pregnancy. (K1, K2, K3, K4, K5)
- 5.6: Parturition and Lactation. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbook:**

1. Hoar, W.S. 1999. General and comparative physiology, prentice Hall, New Delhi.
2. Guyton, A. 2001. Textbook of Medical physiology, Tenth Edition, W.B. Saunders, London.

## SEMESTER IV

### PCZON20 - DEVELOPMENTAL BIOLOGY AND IMMUNOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PCZON20	Developmental Biology and Immunology	Theory	Core	6	4	100

#### Objectives:

- To imbibe the current knowledge pertaining to the formation and development of embryos.
- To understand the fundamental aspects and basic patterns of animal development.
- To understand the importance of cells in immune system.
- To understand the application of immunology in the treatment of diseases.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain the chemo differentiation in the egg during development.

**CO2:** Describe the organizer and cellular differentiation, genetic defects, aging regeneration and teratogenesis.

**CO3:** Discuss the various forms of asexual reproduction, artificial fertilization and stem cells.

**CO4:** Summarize the cells of Immune system and immune response.

**CO5:** Explain the importance of immune therapy in treatment of diseases.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	H	L	M
CO2	H	H	L	H	L	M
CO3	H	H	M	H	L	M
CO4	H	H	L	H	L	M
CO5	H	H	L	H	L	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	M	L	L
CO2	H	H	H	M	M	L
CO3	H	H	H	M	L	M
CO4	H	H	H	H	L	L
CO5	H	H	M	H	L	M

#### Unit 1: DEVELOPMENTAL BIOLOGY

(18 Hours)

1.1: Chemo differentiation: Nucleus of Cleavage cells. (K1, K2, K3, K4, K5)

1.2: Distribution of cytoplasmic substances in the egg during cleavage. (K1, K2, K3, K4, K5)

1.3: Role of egg cortex. (K1, K2, K3, K4, K5)

1.4: Nucleocytoplasmic interactions. (K1, K2, K3, K4, K5)

1.5: Role of maternal genes during early development. (K1, K2, K3, K4, K5)

1.6: Involvement of paternal genes in the control of development. (K1, K2, K3, K4, K5, K6)

**Unit 2: (18 Hours)**

2.1: Organizer: Spemann's primary organizer – analysis of nature and mechanism of induction. (K1, K2, K3, K4, K5)

2.2: Nuclear transplantation – Cellular differentiation and protein synthesis. (K1, K2, K3, K4, K5, K6)

2.3: Differential activation – Developmental genetic defects. (K1, K2, K3, K4, K5)

2.4: Role of cell death in development. Aging. (K1, K2, K3, K4, K5, K6)

2.5: Regeneration. (K1, K2, K3, K4, K5)

2.6: Teratogenesis. (K1, K2, K3, K4, K5)

**Unit 3: (18 Hours)**

3.1: Asexual reproduction – Occurrence and forms of asexual reproduction. (K1, K2, K3, K4, K5)

3.2: Cloning – Artificial fertilization - embryo transfer. (K1, K2, K3, K4, K5)

3.3: Stem cell research and its significance. (K1, K2, K3, K4, K5, K6)

3.4: Asymmetric division of stem cells vs embryonic stem cell. (K1, K2, K3, K4, K5)

3.5: Therapeutic cloning – stem cell therapy. (K1, K2, K3, K4, K5)

3.6: Ethical issues of Stem cell. (K1, K2, K3, K4, K5)

**Unit 4: IMMUNOLOGY (18 Hours)**

4.1: Cells of Immune system – Stem Cells, Lymphoid cells, mononuclear cells, Granulocytes, Mast cells, Dendrite cells. (K1, K2, K3, K4, K5)

4.2: Immunoglobulin - structure, isotypes and biological function. (K1, K2, K3, K4, K5)

4.3: Antigenic determinants on immunoglobulin - isotype, allotype and idiotype. (K1, K2, K3, K4, K5)

4.4: B cell Receptors, T cell Receptors. (K1, K2, K3, K4, K5, K6)

4.5: Antigen – Antibody interaction. (K1, K2, K3, K4, K5)

4.6: MHC – Structure, Antigen processing and Presentation. (K1, K2, K3, K4, K5)

**Unit 5: (18 Hours)**

5.1: Transplantation Immunology – Types of grafts (Auto, Iso, Allo and Xeno). (K1, K2, K3, K4, K5)

5.2: Process of Graft Acceptance and Graft Rejection. (K1, K2, K3, K4, K5)

5.3: Immunosuppressive Therapy. (K1, K2, K3, K4, K5, K6)

5.4: Vaccines-Principles and types of vaccines-DNA Recombinant Vaccines. (K1, K2, K3, K4, K5, K6)

5.5: Autoimmunity. (K1, K2, K3, K4, K5)

5.6: HIV/AIDS. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**SEMESTER IV**  
**PCZOO20 – EVOLUTION**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PCZOO20	Evolution	Theory	Core	6	4	100

**Objectives:**

- To comprehend the scientific concepts of animal evolution through an understanding of its evidences, its mechanics, process and products.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Analyse the evidences of evolution, and importance of paleontology.

**CO2:** Compare the evolutionary theories, trends and mechanism of evolution.

**CO3:** Justify the adaptations for successful continuation of life and extinction.

**CO4:** Appraise the distribution of animals and geological time scale.

**CO5:** Explain the Human origin and evolution.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit 1:**

**(18 Hours)**

1.1: Evidences For Evolution from Taxonomy. (K1, K2, K3, K4, K5)

1.2: Comparative anatomy and Paleontology. (K1, K2, K3, K4, K5)

1.3: Fossils – Formation, Fossilization - Types of Fossils. (K1, K2, K3, K4, K5)

1.4: Evaluation using fossils. (K1, K2, K3, K4, K5, K6)

1.5: Significance of fossils, Living fossils. (K1, K2, K3, K4, K5)

1.6: Dating of fossils - Lead method, Radio-Carbon method. (K1, K2, K3, K4, K5, K6)

**Unit 2:****(18 Hours)**

- 2.1: Neo-Lamarckism; Neo-Darwinism. (K1, K2, K3, K4, K5)
- 2.2: Micro, macro and mega evolution. (K1, K2, K3, K4, K5)
- 2.3: Isolation and isolating mechanisms. (K1, K2, K3, K4, K5)
- 2.4: Race formation; Selection natural, artificial and sexual. (K1, K2, K3, K4, K5)
- 2.5: Trends in Evolution - Neotony - Types, Factors and evolutionary significance; Atavism. (K1, K2, K3, K4, K5, K6)
- 2.6: Orthogenesis - Mechanism, Orthoselection, Evidences. (K1, K2, K3, K4, K5)

**Unit 3:****(18 Hours)**

- 3.1: Adaptation - Structural adaptation - Cursorial, Fossorial. (K1, K2, K3, K4, K5)
- 3.2: Adaptation - Structural adaptation - Arboreal, Desert, Aquatic. (K1, K2, K3, K4, K5)
- 3.3: Adaptation - Structural adaptation - Volant, Cave, Deep Sea. (K1, K2, K3, K4, K5)
- 3.4: Protective adaptation - Cryptic, Warning, Mimicry. (K1, K2, K3, K4, K5)
- 3.5: Extinction- Types of extinction, Causes, Significance of extinction. (K1, K2, K3, K4, K5)
- 3.6: Extinct animals. (K1, K2, K3, K4, K5)

**Unit 4:****(18 Hours)**

- 4.1: Animal distribution – Kinds of Distribution – In space. (K1, K2, K3, K4, K5)
- 4.2: Geographic – Zoogeographic realms. (K1, K2, K3, K4, K5)
- 4.3: Barriers and Dispersal, Means of dispersal; Bathymetric – Geobiotic, Limnobiologic, Halobiologic. (K1, K2, K3, K4, K5)
- 4.4: In Time – Geological Time scale and Geologic Distribution. (K1, K2, K3, K4, K5)
- 4.5: Patterns of Distribution. (K1, K2, K3, K4, K5)
- 4.6: Insular fauna - Oceanic islands, Continental islands. (K1, K2, K3, K4, K5)

**Unit 5:****(18 Hours)**

- 5.1: History of Primates. (K1, K2, K3, K4, K5)
- 5.2: Classification of Primates. (K1, K2, K3, K4, K5)
- 5.3: Evolution of Man- Structural and Chemical similarities and differences. (K1, K2, K3, K4, K5)
- 5.4: Man in fossil record - Java man, Peking man, Heidelberg man. (K1, K2, K3, K4, K5)
- 5.5: Swanscombe man, Neanderthal man, Cromagnon man. (K1, K2, K3, K4, K5)
- 5.6: Cultural Evolution of Man. (K1, K2, K3, K4, K5)

**Books for Study and Reference:****Textbooks:**

## SEMESTER IV

### PCZOP20 - PRACTICAL III - ENVIRONMENTAL BIOLOGY, LIMNOLOGY, TOXICOLOGY AND ANIMAL BEHAVIOUR

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III & IV	PCZOP20	Practical III	Practical	Core	3	4	100

#### Course Learning Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Perform practical procedures in ecology.

**CO2:** Describe the adaptive features of animals with reference to their habitat and ethology.

**CO3:** Prepare slides of planktons.

**CO4:** Perform Toxicology studies.

**CO5:** Discuss water treatment through water treatment plant visits.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	M	M
CO2	H	H	H	H	M	M
CO3	H	H	H	H	L	M
CO4	H	H	H	H	H	M
CO5	H	M	H	H	H	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	M
CO3	H	H	H	H	L	M
CO4	H	H	H	H	H	M
CO5	H	H	H	H	M	M

#### I. ENVIRONMENTAL BIOLOGY

##### 1. Estimation:

- Estimation of dissolved Oxygen
- Estimation of CO<sub>2</sub>
- Estimation of Salinity
- Estimation of Carbonates and Bicarbonates

##### 2. Analysis of Industrial effluent – BOD

##### 3. Study of different fauna with special reference to the adaptations:

- Study of Sandy shore fauna
- Study of Muddy shore fauna

c) Study of Rocky shore fauna

## II. LIMNOLOGY AND TOXICOLOGY

4. Estimation:

- a) Estimation of Chromium
- b) Estimation of Nitrites
- c) Estimation of Phosphates

5. Mounting:

- a) Observation of fresh water planktons
- b) Observation of marine planktons

6. Lentic Adaptations: Daphnia, Crab, Prawn, Clams, Snail, Water Strider, Salamander, Alligator

7. Lotic Adaptations: Limpet, Crayfish, Salmon, Eel, Crocodile, Hippopotamus, Brook trout, Lung fish.

8. Toxicity induced diseases: a) Minamata disease b) Itai-itai c) Painter's colic

9. Visit to water treatment plant.

## III. ANIMAL BEHAVIOUR:

10. Animal Association

- a.) Parasitism
  - i) Ectoparasites – Ticks, Mites
  - ii) Endoparasites – *Taenia solium*, *Ascaris lumbricoides*
- b.) Mutualism – Termites and Trichonympha, Sea Anemone and Hermit Crab
- c) Commensalisms – Shark and Echeneis, Whale and Barnacles
- d) Parental Care in Fish – Hippocampus, Male ring- tailed Cardinals, Gouramis
- e) Parental Care in Amphibians – Midwife toad, Ichthyophis, Marsupial frog.

**SEMESTER IV**  
**PCZOQ20 - PRACTICAL IV**  
**PHYSIOLOGY, ENDOCRINOLOGY, DEVELOPMENTAL BIOLOGY, IMMUNOLOGY**  
**AND EVOLUTION**

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III & IV	PCZOQ20	Practical- IV	Practical	Core	3	4	100

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Analyze physiological parameters.

**CO2:** Interpret Endocrine glands and Endocrine disorders.

**CO3:** Explain immunological importance of WBC and principle on antigen antibody reaction in ABO grouping.

**CO4:** Identify the developmental stages, placenta, and histology in development biology.

**CO5:** Compare the evolutionary significance, mimicry and adaptation in animals.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	M	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	M	H

**Physiology**

- a) Estimation of RQ in Fish with reference to temperature.
- b) Salt loss and Salt gain in fish.
- c) Study of Human salivary amylase activity in relation to temperature
- d) Study of Human salivary amylase activity in relation to pH
- e) Oxygen consumption by fish in relation to body weight
- f) Estimation of digestive enzyme activity in Cockroach

**Endocrinology:**

- a) Slides: Pituitary gland, Thyroid gland, Parathyroid gland, Adrenal gland, Pancreas.
- b) Abnormalities of hormones: Hypersecretion – Gigantism, Grave's disease, Cushing's syndrome.
- c) Hyposecretion- Dwarfism, Cretinism, Myxoedema, Addison's disease.

**Developmental Biology and Immunology**

- a) Immunoelectrophoresis – chart
- b) Immunodiffusion - chart
- c) Antigen and Antibody reaction – ABO Blood grouping
- d) Differential count of WBC
- e) Pregnancy test

**Spotters/Charts/ Slides**

- a) Blastula and Gastrula of Frog
- b) T.S of Testis – T.S. of Ovary – Graffian Follicles (mammals)
- c) Placentation – Placenta of Shark and Sheep
- d) Embryo of Mammals – Sheep and Pig
- e) Developmental stages in Chick – 18 hours, 24hrs, 48hrs, and 72hrs
- f) Histology of Lymphoid organs – Thymus, Spleen, Bone marrow, Lymph node

**Evolution:****Spotters/Charts/ Slides**

- a) Evolutionary importance of Peripatus, Limulus, Tornaria
- b) Adaptations – Arboreal - Squirrel, Fossorial- Rat, Cursorial- Ostrich and Aerial- Bat
- c) Cryptic coloration -Leaf and stick insects
- d) Batesian mimicry - Monarch and Viceroy butterflies.
- e) Study of Paleontological Fossils - Trilobites, Ammonites, Seymouria, Nautilus.

## SEMESTER IV

### PEZOG20 - ELECTIVE IV A: FISHERY BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PEZOG20	Fishery Biology	Theory	Elective	5	5	100

#### Objective:

- The objective of the paper is to understand shell fisheries in India and to have knowledge about their byproducts, marketing, transportation and Insurance.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Apply the parameters for the growth of fish, biology of fish and gears in fishery.

**CO2:** Acquire knowledge of biology and techniques of shell fisheries.

**CO3:** Apply knowledge in establishing and managing sea weed and pearl culture and byproducts of fishery.

**CO4:** Differentiate the types of fish cultures pathogens and their control measures.

**CO5:** Explain the processing, transportation and marketing of Fishes.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit 1:

(15 Hours)

- 1.1: Water quality-temperature, pH, CLO<sub>2</sub>, salinity, nutrients and trace elements for the growth of fishes. (K1, K2, K3, K4, K5)
- 1.2: Biology of Marine edible fish - Oil sardines. (K1, K2, K3, K4, K5)
- 1.3: Biology of freshwater edible fish- Catla. (K1, K2, K3, K4, K5)
- 1.4: Indian capture methods – shafts. (K1, K2, K3, K4, K5)
- 1.5: Indaian capture gears. (K1, K2, K3, K4, K5)
- 1.6: Economic importance of commercial fisheries. (K1, K2, K3, K4, K5)

**Unit 2:** (15 Hours)

- 2.1: Biology and culture techniques of Shell fisheries. (K1, K2, K3, K4, K5)
- 2.2: Marine and freshwater Crustaceans- Prawns, Lobsters, Crabs. (K1, K2, K3, K4, K5)
- 2.3: Molluscs – Oysters. (K1, K2, K3, K4, K5)
- 2.4: Clams, Cuttle fish. (K1, K2, K3, K4, K5)
- 2.5: State wise Commercial and export potential of Shell fisheries. (K1, K2, K3, K4, K5)
- 2.6: Economic importance of Shell fisheries. (K1, K2, K3, K4, K5)

**Unit 3:** (15 Hours)

- 3.1: Sea weeds – Types. (K1, K2, K3, K4, K5)
- 3.2: Different culture methods of sea weeds. (K1, K2, K3, K4, K5)
- 3.3: Pearl culture - stages of pearl formations. (K1, K2, K3, K4, K5)
- 3.4: Pearl culture techniques. (K1, K2, K3, K4, K5, K6)
- 3.5: Byproducts of fishes - Fish meal – Fish oil. (K1, K2, K3, K4, K5)
- 3.6: Fish manure – Chunks. (K1, K2, K3, K4, K5)

**Unit 4:** (15 Hours)

- 4.1: Composite fish culture– Paddy cum fish culture. (K1, K2, K3, K4, K5)
- 4.2: Integrated fish culture. (K1, K2, K3, K4, K5)
- 4.3: Sewage water fish culture. (K1, K2, K3, K4, K5)
- 4.4: Raceway culture, cage, pen and rack culture system. (K1, K2, K3, K4, K5)
- 4.5: Control of Parasites, predators. (K1, K2, K3, K4, K5)
- 4.6: Weeds in culture ponds. (K1, K2, K3, K4, K5)

**Unit 5:** (15 Hours)

- 5.1: Methods of processing. (K1, K2, K3, K4, K5)
- 5.2: Packaging. (K1, K2, K3, K4, K5)
- 5.3: Storage of fishes. (K1, K2, K3, K4, K5)
- 5.4: Transport facilities. (K1, K2, K3, K4, K5)
- 5.5: Marketing channels. (K1, K2, K3, K4, K5)
- 5.6: E-marketing. (K1, K2, K3, K4, K5)

**Books for Study and Reference:**

**Textbooks:**

1. Jingran, V.G., 1982. Fish and fisheries of India. Hindustan publishing Corporation - New Delhi
2. Hopher, B and Y. Pruginin, 1981 - Commercial fish farming, John Wiley & Sons, N.Y. Marine Products Export Review, 1982 MPEDA, Cochin.

## SEMESTER IV

### PEZOH20 - ELECTIVE IV B: AQUACULTURE AND FARM MANAGEMENT

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PEZOH20	Aquaculture and Farm Management	Theory	Elective	5	5	100

#### Objective:

- To understand the culture practices of both fin fish and shell fishes.
- Gaining knowledge in the food and feeding habits, investigating the seed production and farm management and method of farming.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Describe parameters of aquatic environment for aquaculture and farm management.

**CO2:** Elucidate biological criteria and economic significance of cultivable species.

**CO3:** Discuss seed production and hatchery management of commercially important cultivable fishes.

**CO4:** Explain different types of fish cultures techniques.

**CO5:** Analyse water quality parameters and biotechnological tools in disease diagnosis of culture fishes.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6

CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	H	H

#### Unit 1:

**(15 Hours)**

1.1: Overview - Importance of aquaculture. (K1, K2, K3, K4, K5)

1.2: Global scenario. (K1, K2, K3, K4, K5)

1.3: Present status in India-prospects and scope. (K1, K2, K3, K4, K5)

1.4: Aquaculture Farms - Site selection, topography. (K1, K2, K3, K4, K5)

1.5: Water availability and supply, soil conditions and quality. (K1, K2, K3, K4, K5)

1.6: Design and layout, farm design, structure and construction. (K1, K2, K3, K4, K5)

**Unit 2: (15 Hours)**

2.1: Standard guidance for choosing cultivable species- seaweed, Crustacean (Prawns and Lobsters). (K1, K2, K3, K4, K5)

2.2: Molluscs (Clams, Cockles, Mussels and Oysters) and fishes-biological criteria. (K1, K2, K3, K4, K5)

2.3: Environmental adaptability and compatibility. (K1, K2, K3, K4, K5)

2.4: Adaptability to intensive culture. (K1, K2, K3, K4, K5)

2.5: Economic importance-economics, market values. (K1, K2, K3, K4, K5)

2.6: By products and availability in adjacent region. (K1, K2, K3, K4, K5)

**Unit 3: (15 Hours)**

3.1: Distribution and abundance of natural seed resources, collection methods and segregation. (K1, K2, K3, K4, K5)

3.2: Artificial seed production-breeding under controlled condition. (K1, K2, K3, K4, K5)

3.3: Induced breeding technique, larval rearing, packing and transportation. (K1, K2, K3, K4, K5)

3.4: Live feed - Microalgae, Rotifer and Artemia - their culture. (K1, K2, K3, K4, K5)

3.5: Feed formulation - conventional and non-conventional ingredients. (K1, K2, K3, K4, K5)

3.6: Feed additives, feed attractants and feed formulations. (K1, K2, K3, K4, K5)

**Unit 4: (15 Hours)**

4.1: Traditional, Extensive, Semi-intensive and intensive systems, composite fish culture. (K1, K2, K3, K4, K5)

4.2: Paddy-cum-fish culture. (K1, K2, K3, K4, K5)

4.3: Integrated fish culture, sewage water fish culture, raceway culture. (K1, K2, K3, K4, K5)

4.4: Cage, pen and rack culture system management. (K1, K2, K3, K4, K5)

4.5: Pond preparation. (K1, K2, K3, K4, K5)

4.6: Production and economics. (K1, K2, K3, K4, K5)

**Unit 5: (15 Hours)**

5.1: Water quality - temperature, Salinity, pH, O<sub>2</sub>, ClO<sub>2</sub>, levels, nutrients and trace elements (K1, K2, K3, K4, K5)

5.2: Control of parasites, predators. (K1, K2, K3, K4, K5)

5.3: Weeds and diseases in culture ponds. (K1, K2, K3, K4, K5)

5.4: Disease diagnosis-ELISA, Western blotting. (K1, K2, K3, K4, K5)

5.5: DNA based diagnosis of diseases. (K1, K2, K3, K4, K5)

5.6: Fish vaccines. (K1, K2, K3, K4, K5)

## SEMESTER I

### PIZOA20 - INDEPENDENT ELECTIVE I A- PET KEEPING

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PIZOA20	Pet Keeping	Theory	Independent Elective	-	2	100

#### Objective:

- To gain an extensive foundation for a career in the pet industry.
- To develop a career or business working with animals in breeding and supplying pets, or supplying services or products to pet owners.

#### Course Outcomes:

##### On completion of the course the student will be able to...

CO1: Analyze the present status of maintaining pets and its needs.

CO2: Interpret on varied dog breeds and train them.

CO3: Identify cat breeds and trace the diseased cat and treat them.

CO4: Expand knowledge on best choices of bird breed for business.

CO5: Elucidate commercially important fishes and understand the construction and requirement for setting aquarium to become an entrepreneur.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	M	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

#### Unit 1:

1.1: Animal care: laws and licenses. (K1, K2, K3, K4, K5)

1.2: Animal charities and societies (RSPCA, WSPA, Blue cross). (K1, K2, K3, K4, K5)

1.3: Pet trading. (K1, K2, K3, K4, K5)

1.4: Pet care needs -feeding, watering, shelter. (K1, K2, K3, K4, K5)

1.5: Containment, fencing, caging, and protection. (K1, K2, K3, K4, K5)

1.6: Maintaining health and hygiene. (K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Dogs: Selection – breeds. (K1, K2, K3, K4, K5)
- 2.2: Training – positive reinforcement for puppies. (K1, K2, K3, K4, K5)
- 2.3: Adult training; Reappraise basic training; teaching old dogs new tricks.  
(K1, K2, K3, K4, K5)
- 2.4: Illness- first aid on spot diagnosis- vomiting and diarrhea, poisoning.  
(K1, K2, K3, K4, K5)
- 2.5: Cuts, grazes, wounds and burns. (K1, K2, K3, K4, K5)
- 2.6: Breaks and fractures; shock. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Cat: Breeds (Lang Haired, semi long haired, short haired, oriental). (K1, K2, K3, K4, K5)
- 3.2: Allergies-containment. (K1, K2, K3, K4, K5)
- 3.3: Breeding. (K1, K2, K3, K4, K5)
- 3.4: New born Kittens. (K1, K2, K3, K4, K5)
- 3.5: Care for sick cat signs of illness, temperature. (K1, K2, K3, K4, K5)
- 3.6: Common ailments, skin disorders -ticks. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Birds: Selection. (K1, K2, K3, K4, K5)
- 4.2: Breeds (canaries, finches, budgerigars, small parrots). (K1, K2, K3, K4, K5)
- 4.3: Containment -Aviaries, selection, design and size. (K1, K2, K3, K4, K5)
- 4.4: Management-feeding -watering- Grooming (Wing trim, beak trim, nail trim).  
(K1, K2, K3, K4, K5)
- 4.5: Caring for sick bird. (K1, K2, K3, K4, K5)
- 4.6: Signs of illness and common ailments. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Selection - Types of fish -Tropical, Marine, Cold water. (K1, K2, K3, K4, K5)
- 5.2: Costs, size, Equipments. (K1, K2, K3, K4, K5)
- 5.3: Tanks, Ponds, pumps, aquarium, night lights. (K1, K2, K3, K4, K5)
- 5.4: Water quality - changing water. (K1, K2, K3, K4, K5)
- 5.5: Feed -pelleted, live feed. (K1, K2, K3, K4, K5)
- 5.6: Illness -fungal, bacterial parasites. (K1, K2, K3, K4, K5)

**Books for Study and Reference:****Textbooks:**

1. Shane Bateman, The First aid companion for dogs & cats published by Rodale books, 2001.
2. Alan Edwards, The ultimate Encyclopedia of cats, cat breeds & cat care; published by south water, 2012.

**Reference Books:**

3. Sheldon L. Gerstenfeld, V.M.D, The Bird Care Book, published by Da Capo Lifelong books, 1989.

## SEMESTER I

### PIZOB20 - INDEPENDENT ELECTIVE I B- BIOPHYSICS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PIZOB20	Biophysics	Theory	Independent Elective	-	2	100

**Objectives:**

- To impart knowledge on the basic principles of biophysics.
- To employ different advanced Methodologies in Research.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Recall the basic concepts of Biophysics.

**CO2:** Describe and apply the law of thermodynamics of the biological system and concepts of energy

**CO3:** Explain the membrane conductivity and transport.

**CO4:** Explain the principle techniques and application of lasers in biomedical field.

**CO5:** Discuss the working principle, instrumentation and applications of bio-analytical instruments.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	L	H	M	H
CO2	H	H	M	H	L	H
CO3	H	H	H	H	L	H
CO4	H	H	M	H	M	H
CO5	H	H	M	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	M	L	M
CO2	H	H	H	L	M	H
CO3	H	H	H	M	L	M
CO4	H	H	M	H	M	H
CO5	H	H	H	M	L	H

**Unit 1:**

1.1: Basic concepts of biophysics- Atoms, Atoms and elements. (K1, K2, K3, K4, K5)

1.2: Molecules and components. (K1, K2, K3, K4, K5)

1.3: Structure of atoms, isotopes, hydrogen ion concentration. (K1, K2, K3, K4, K5)

1.4: Mole and mole concept. (K1, K2, K3, K4, K5)

1.5: Normality, buffers, stability. (K1, K2, K3, K4, K5)

1.6: Redox potential and examples of redox potential in biological systems.  
(K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Thermodynamics of biological system- first and second law of thermodynamics. (K1, K2, K3, K4, K5)
- 2.2: Activation energy biological system as open non equilibrium system. (K1, K2, K3, K4, K5)
- 2.3: Concepts of energy unavailable energy. (K1, K2, K3, K4, K5)
- 2.4: Entropy. (K1, K2, K3, K4, K5)
- 2.5: Enthalpy, Negative entropy. (K1, K2, K3, K4, K5)
- 2.6: Application of biological system thermodynamics of active and passive transport. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Membrane conductivity- active transport mechanism. (K1, K2, K3, K4, K5)
- 3.2: Factors-biological significance- characterization. (K1, K2, K3, K4, K5)
- 3.3: Biological importance. (K1, K2, K3, K4, K5)
- 3.4: Techniques used in diffusion, Osmosis, emulsions. (K1, K2, K3, K4, K5)
- 3.5: Colloids, dialysis. (K1, K2, K3, K4, K5)
- 3.6: Velocity and surface tension. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Principle and application of sensors. (K1, K2, K3, K4, K5)
- 4.2: Laser beam in Biomedical field –applications of Lasers in therapies and diagnosis. (K1, K2, K3, K4, K5)
- 4.3: Magnetic Resonance Imaging ( MRI), Computer Topography (CT)scan. (K1, K2, K3, K4, K5)
- 4.4: Ultrasound in interaction with tissues and application in therapeutics. Electrocardiogram (ECG), Electroencephalogram (EEG), Electromyograph (EMG). (K1, K2, K3, K4, K5)
- 4.5: Flow Cytometry and cell sorting. (K1, K2, K3, K4, K5)
- 4.6: Autoradiography –types and techniques used and Evaluation of radiogram. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Chromatography-Adsorption, Partition, Principle, Experimental set up, Methodology and Applications of Gel-Permeation Chromatography. (K1, K2, K3, K4, K5)
- 5.2: Gas Liquid Chromatography. (K1, K2, K3, K4, K5)
- 5.3: Electrophoresis principle, factors affecting the migration of substances and supporting media immune electrophoresis. (K1, K2, K3, K4, K5)
- 5.4: Slab Gel electrophoresis. (K1, K2, K3, K4, K5)
- 5.5: Spectroscopy –Atomic Emission Spectroscopy, Atomic Absorption Spectroscopy. (K1, K2, K3, K4, K5)
- 5.6: Electron Spin Spectroscopy. (K1, K2, K3, K4, K5)

## **Books for Study and Reference**

### **Textbooks:**

## SEMESTER II

### PIZOC20 - INDEPENDENT ELECTIVE II A-ANIMAL HUSBANDARY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PIZOC20	Animal Husbandry	Theory	Independent Elective	-	2	100

#### Objectives of the paper

- To know about the care and management of livestock.
- To learn the correct method of feeding, breeding, housing and health care of livestock.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain the management of livestock.

**CO2:** Expand the knowledge to differentiate special breeds of cattle.

**CO3:** Elucidate different methods of breeding.

**CO4:** Summarize on the nutritive feeding practice of cattle.

**CO5:** Provide intensive ideas on management of cattle.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6

CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	M	H	H	H	H

#### Unit 1: Cattle Industry In South India

1.1: Cattle – importance, classification. (K1, K2, K3, K4, K5)

1.2: Population and food supply, suitable environment, rainfall and soil. (K1, K2, K3, K4, K5)

1.3: Suitability for tracts and farming types. (K1, K2, K3, K4, K5)

1.4: Grazing conditions, communal, fore stand private grazing. (K1, K2, K3, K4, K5)

1.5: Fodder cultivation. (K1, K2, K3, K4, K5)

1.6: Cattle rearing. (K1, K2, K3, K4, K5)

## **Unit 2: Important Breeds of Cattle In South India**

- 2.1: Breed characters: Kangayam, Ogole. (K1, K2, K3, K4, K5)
- 2.2: Mysore and Alambadi breeds. (K1, K2, K3, K4, K5)
- 2.3: Barghur cattle, jellicut animals. (K1, K2, K3, K4, K5)
- 2.4: Tanjore polled cattle. (K1, K2, K3, K4, K5)
- 2.5: Buffaloes. (K1, K2, K3, K4, K5)
- 2.6: South Indian Breeds. (K1, K2, K3, K4, K5)

## **Unit 3: Methods of Breeding**

- 3.1: In – breeding, line – breeding. (K1, K2, K3, K4, K5)
- 3.2: Out – crossing with other species and breeds. (K1, K2, K3, K4, K5)
- 3.3: Grading – up, selection – individuality. (K1, K2, K3, K4, K5)
- 3.4: Parentage, offspring influence. (K1, K2, K3, K4, K5)
- 3.5: Improvement of cattle in South India. (K1, K2, K3, K4, K5)
- 3.6: Hurdles in grading – up. (K1, K2, K3, K4, K5)

## **Unit 4: Principles of Feeding**

- 4.1: Use of food, nutrients, nutritive ratio. (K1, K2, K3, K4, K5)
- 4.2: Starch equivalent, energy value, feeding standard. (K1, K2, K3, K4, K5)
- 4.3: Rations, roughages and concentrates. (K1, K2, K3, K4, K5)
- 4.4: Schedule of rations, some feeding hints. (K1, K2, K3, K4, K5)
- 4.5: Composition of feeding stuffs. (K1, K2, K3, K4, K5)
- 4.6: Digestibility coefficient of important feeds. (K1, K2, K3, K4, K5)

## **Unit 5: Management of Cattle**

- 5.1: Housing, providing drinking water. (K1, K2, K3, K4, K5)
- 5.2: Grooming and washing. (K1, K2, K3, K4, K5)
- 5.3: Providing exercise. (K1, K2, K3, K4, K5)
- 5.4: Care of sick animals. (K1, K2, K3, K4, K5)
- 5.5: Vaccination. (K1, K2, K3, K4, K5)
- 5.6: Training young stock. (K1, K2, K3, K4, K5)

## **Books for Study and Reference:**

### **Textbooks:**

1. Animal Husbandry Department, Madras, Administration report for the year 1949 – 50.
2. Ind. Council of Agric., Res., New Delhi, Survey of cattle breeds in India, Bull., 24 (1934), 27 (1939) and 54 (1942).

### **Reference Books:**

3. Kellner, C., The Scientific Feeding of Animals.

## SEMESTER II

### PIZOD20 - INDEPENDENT ELECTIVE II B- ECO ENERGETICS AND ECOLOGICAL METHODS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PIZOD20	Eco Energetics And Ecological Methods	Theory	Independent Elective	-	2	100

#### Objectives:

- To promote environment, friendly, socially and sustainable model of energy
- To promote the concept of energy efficiency
- To understand the soil population estimation by using techniques
- To understand the methods of wildlife population estimation
- To gain the knowledge about zooplankton and phytoplankton.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Explain the structure and functions of ecosystem.

**CO2:** Discuss the productivity and methods of measuring productivity.

**CO3:** Summarize about sampling and extraction techniques.

**CO4:** Describe the methods of wild life population studies.

**CO5:** Categorize the planktons, method of collection, preservation and morphological identification.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	L	M
CO2	H	H	M	H	M	M
CO3	H	H	M	H	L	M
CO4	H	H	H	H	M	M
CO5	H	H	M	H	L	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	H	H	M	M
CO2	H	M	H	H	M	M
CO3	H	M	H	H	M	L
CO4	H	H	M	H	H	L
CO5	H	H	M	H	H	L

#### Unit 1:

- 1.1: Concept of ecosystem- Define terms -ecosystem, habitat, ecological niche. (K1, K2, K3, K4, K5)
- 1.2: Energy flow in an ecosystem – model of energy flow. (K1, K2, K3, K4, K5)
- 1.3: Food Chain-Types of food chains. (K1, K2, K3, K4, K5)
- 1.4: Food webs. (K1, K2, K3, K4, K5)
- 1.5: Efficiency of energy transfer between trophic levels, ecological pyramids. (K1, K2, K3, K4, K5)
- 1.6: Law of thermodynamics. (K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Productivity. (K1, K2, K3, K4, K5)
- 2.2: Primary productivity and Secondary productivity. (K1, K2, K3, K4, K5)
- 2.3: Fundamentals of productivity, aspects of productivity. (K1, K2, K3, K4, K5)
- 2.4: Productivity rate, ecological efficiency. (K1, K2, K3, K4, K5)
- 2.5: Methods of measurement - harvest method, oxygen method. (K1, K2, K3, K4, K5)
- 2.6: pH method, disappearance of raw materials. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Population Estimates by Sampling. (K1, K2, K3, K4, K5)
- 3.2: Unit of Soil or Litter Habitat. (K1, K2, K3, K4, K5)
- 3.3: Extraction Techniques; Bulk staining. (K1, K2, K3, K4, K5)
- 3.4: Mechanical methods of extraction, Dry sieving, Wet sieving. (K1, K2, K3, K4, K5)
- 3.5: Soil arthropod collection- Tullgren funnel series. (K1, K2, K3, K4, K5)
- 3.6: Soil washing and flotation. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Wildlife Population Estimates by Census and Distance Measuring Techniques. (K1, K2, K3, K4, K5)
- 4.2: Census methods. (K1, K2, K3, K4, K5)
- 4.3: Point and line survey methods. (K1, K2, K3, K4, K5)
- 4.4: Indices of abundance using transects. (K1, K2, K3, K4, K5)
- 4.5: Methods based on flushing. (K1, K2, K3, K4, K5)
- 4.6: Line transect methods: the Fourier series estimator, Point transects. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Planktons- types, characters and ecology. (K1, K2, K3, K4, K5)
- 5.2: Phytoplankton-Marine. (K1, K2, K3, K4, K5)
- 5.3: Phytoplankton – Freshwater. (K1, K2, K3, K4, K5)
- 5.4: Method of Collection. (K1, K2, K3, K4, K5)
- 5.5: Preservation and morphological Identification of Marine Zooplankton. (K1, K2, K3, K4, K5)
- 5.6: Preservation and morphological Identification of fresh water zooplankton. (K1, K2, K3, K4, K5)

**Books for Study and References:****Textbooks:**

- 1. Dr. Verma and Dr. Agarwal Environmental Biology(principle of ecology).
- 2. Eugene P.Odum Fundamentals of ecology.

**Reference Books:**

3. P.B. Nagaraj- Basic Thermodynamics Paperback – 1 Jan 2005.

## SEMESTER III

### PIZOE20 - INDEPENDENT ELECTIVE III A- RADIATION BIOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PIZOE20	Radiation Biology	Theory	Independent Elective	-	2	100

**Objective:**

- To understand the radiation protection.
- To learn about the application of radiation in treatments.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Apply the fundamentals of radiation biology.

**CO2:** Explain the effects of Radiation on DNA and its effects.

**CO3:** Analyze the radiation exposure and response.

**CO4:** Asses the role of radiation in carcinogenesis.

**CO5:** Explain radio therapy, protection and precaution in using radioisotopes.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	L	M
CO2	H	H	M	H	L	H
CO3	H	H	H	H	M	M
CO4	H	H	M	H	M	H
CO5	H	H	H	H	M	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	L	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	M
CO4	H	H	H	H	M	H
CO5	H	H	M	H	M	M

**Unit 1:**

1.1: Definition, scope and significance of radiation biology. (K1, K2, K3, K4, K5)

1.2: General classification of radiation. (K1, K2, K3, K4, K5)

1.3: Ionizing radiation, linear energy transfer. (K1, K2, K3, K4, K5)

1.4: Radiation dose and units. (K1, K2, K3, K4, K5)

1.5: Principles of radiation dosimetry. (K1, K2, K3, K4, K5)

1.6: Direct and indirect effects. (K1, K2, K3, K4, K5)

**Unit 2:**

2.1: Radiations lesions in DNA, radiobiological effect on cell. (K1, K2, K3, K4, K5)

2.2: Radiation sensitizers and protectors. (K1, K2, K3, K4, K5)

- 2.3: Effect of Radiation on Human Health. (K1, K2, K3, K4, K5)
- 2.4: Long term radiation risks from low radiations doses. (K1, K2, K3, K4, K5)
- 2.5: Radiation induced cancer. (K1, K2, K3, K4, K5)
- 2.6: Radiation effects in the developing embryo and fetus, radiation induced heritable diseases. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Radiation Quantities Exposure, Absorbed Dose. (K1, K2, K3, K4, K5)
- 3.2: Equivalent Dose, Effective Dose. (K1, K2, K3, K4, K5)
- 3.3: Cellular Response To Radiation Indirect and direct action. (K1, K2, K3, K4, K5)
- 3.4: Time scale of radiation effects. (K1, K2, K3, K4, K5)
- 3.5: DNA damage and chromosomal aberrations. (K1, K2, K3, K4, K5)
- 3.6: Radioprotectors and Radiosensitizers. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Time-scale of effects in Radiation Biology. (K1, K2, K3, K4, K5)
- 4.2: Response of normal and malignant tissues to radiation exposure. (K1, K2, K3, K4, K5)
- 4.3: Radiation Carcinogenesis. (K1, K2, K3, K4, K5)
- 4.4: Risk estimates for radiation-induced cancer. (K1, K2, K3, K4, K5)
- 4.5: Radiation-induced sterility. (K1, K2, K3, K4, K5)
- 4.6: Hereditary effects of radiation. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Whole-Body Radiation Effects Acute radiation syndrome. (K1, K2, K3, K4, K5)
- 5.2: Treatment of radiation accident victims. (K1, K2, K3, K4, K5)
- 5.3: Radiation Protection. (K1, K2, K3, K4, K5)
- 5.4: Radio therapy. (K1, K2, K3, K4, K5)
- 5.5: Risk estimates in Humans. (K1, K2, K3, K4, K5)
- 5.6: Precautions and safety measures in handling radioisotopes. (K1, K2, K3, K4, K5)

**Books for Study and reference:**

**Textbooks:**

- 1. Physics and Radiobiology of Nuclear Medicine - Gopal B. Saha. – Springer IIIrd edition 2006.
- 2. Radiation and Man - H. C. Jain - National Book trust, India. – 1994.

### SEMESTER III

#### PIZOF20 - INDEPENDENT ELECTIVE III B- DAIRYING.

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PIZOF20	Dairying	Theory	Independent Elective	-	2	100

**Objective:**

- To learn the techniques in improved milk production.
- To know the preservation and processing of milk.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Discuss the development and management of dairying.

**CO2:** Explain properties of milk and its composition.

**CO3:** Describe various periods of milking, variations in compositions and equipments used in milking.

**CO4:** Discuss entry of bacteria into milk and types of bacteria.

**CO5:** Explain various methods of pasteurization.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	M	H	H	M
CO2	H	H	M	H	H	M
CO3	H	H	M	H	H	M
CO4	H	H	M	H	H	M
CO5	H	H	M	H	H	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	M	H	M	H
CO2	H	H	M	H	M	H
CO3	H	H	M	H	M	H
CO4	H	H	M	H	M	H
CO5	H	H	M	H	M	H

**Unit 1:**

1.1: Development of dairying. (K1, K2, K3, K4, K5)

1.2: Cattle population and production of milk. (K1, K2, K3, K4, K5)

1.3: Dietary requirements of milk, milk intake and income levels. (K1, K2, K3, K4, K5)

1.4: Milk production-cost relationship. (K1, K2, K3, K4, K5)

1.5: Utilisation of milk. (K1, K2, K3, K4, K5)

1.6: Nutritive value of milk. (K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Lactation, milk as food. (K1, K2, K3, K4, K5)
- 2.2: Udder, secretion of milk, let-down of milk. (K1, K2, K3, K4, K5)
- 2.3: Factors affecting secretion-individuality, feeding, environment and maintenance.  
(K1, K2, K3, K4, K5)
- 2.4: Properties of milk. (K1, K2, K3, K4, K5)
- 2.5: Composition of milk-proteins, fat, lactose, ash and water, vitamins. (K1, K2, K3, K4, K5)
- 2.6: Thermal stability of milk. (K1, K2, K3, K4, K5)

### **Unit3:**

- 3.1: Variations in composition-period preceding milking. (K1, K2, K3, K4, K5)
- 3.2: Time of milking, portion of milk tested. (K1, K2, K3, K4, K5)
- 3.3: Stage of lactation, age of cow, and feed. (K1, K2, K3, K4, K5)
- 3.4: Food value of milk. (K1, K2, K3, K4, K5)
- 3.5: Enzymes in milk. (K1, K2, K3, K4, K5)
- 3.6: Colostrum pre-milking, slimy or ropy milk. (K1, K2, K3, K4, K5)

### **Unit 4:**

- 4.1: Entry of bacteria into milk, water-supply, attendants. (K1, K2, K3, K4, K5)
- 4.2: Unhealthy animals; types of bacteria in milk. (K1, K2, K3, K4, K5)
- 4.3: Effects of bacteria on milk; reducing number of bacteria in milk. (K1, K2, K3, K4, K5)
- 4.4: Milk borne diseases. (K1, K2, K3, K4, K5)
- 4.5: Dairy utensils, cleaning. (K1, K2, K3, K4, K5)
- 4.6: Sterilising utensils and equipment. (K1, K2, K3, K4, K5)

### **Unit 5:**

- 5.1: Pasteurisation of milk in India. (K1, K2, K3, K4, K5)
- 5.2: Holder method of pasteurisation. (K1, K2, K3, K4, K5)
- 5.3: H.T.S.T. method, pasteurising bottled milk. (K1, K2, K3, K4, K5)
- 5.4: Cooling after pasteurisation. (K1, K2, K3, K4, K5)
- 5.5: Homogenisation, grading milk. (K1, K2, K3, K4, K5)
- 5.6: Packing of milk(K1, K2, K3, K4, K5)

### **Books for Study and Reference:**

#### **Textbooks:**

1. The technology of milk Processing – Ananthakrishnan, C.P., Khan, A.Q. and Padmanabhan, P.N. – Shri Lakshmi Publications.
2. Dastur, N. N. and Banerji, B. N Manufacture and Storage of Ghee. Ind. FarminR, IX (7), pp. 78. 1948.

**Reference Books:**

## SEMESTER IV

### PIZOG20 - INDEPENDENT ELECTIVE IVA- BIOSYSTEMATICS

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PIZOG20	Biosystematics	Theory	Independent Elective	-	2	100

**Objectives:**

- To understand biological characteristics.
- To learn diversity and evolutionary relationship among the organisms.
- To apply phylogeny classification at species level and infra species level.

**Course Outcomes:**

**On completion of the course the student will be able to...**

**CO1:** Explain the concept, importance and attributes of biosystematics.

**CO2:** Discuss the biological characteristics.

**CO3:** Compute the evolutionary relationship among the organisms.

**CO4:** Familiarize different taxonomic procedures, taxonomic keys and zoological nomenclature.

**CO5:** Apply phylogeny classification at species level and infra species level.

PSO/CO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	M
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	M	H	H	H	H
CO5	H	M	H	H	H	H

CO/PLO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

**Unit 1:**

- 1.1: Introduction & basic concept of biosystematics & taxonomy. (K1, K2, K3, K4, K5)
- 1.2: Rise of Taxonomy - Problems, aims and tasks in taxonomy. (K1, K2, K3, K4, K5)
- 1.3: Taxonomy as a profession. (K1, K2, K3, K4, K5)
- 1.4: Importance & application of biosystematics in biology. (K1, K2, K3, K4, K5)
- 1.5: Chemotaxonomy – Cytotaxonomy. (K1, K2, K3, K4, K5)
- 1.6: Attributes of Taxonomy. (K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Types of biological classification (Essentialism, Nominalism, Empirism, Cladism and evolutionary classification). (K1, K2, K3, K4, K5)
- 2.2: Newer Trends in Taxonomy: Morphological approach, Immature stages and embryological approach. (K1, K2, K3, K4, K5)
- 2.3: Ecological Approach, Behavioural Approach. (K1, K2, K3, K4, K5)
- 2.4: Cytological and Biochemical Approaches. (K1, K2, K3, K4, K5)
- 2.5: Numerical taxonomy. (K1, K2, K3, K4, K5)
- 2.6: Differential Systematics. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Zoological Classification Kinds of classification, phyletic lineages. (K1, K2, K3, K4, K5)
- 3.2: Components of classification - Hierarchy of categories. (K1, K2, K3, K4, K5)
- 3.3: Species concepts, Typological species concept, Nominalistic species concept. (K1, K2, K3, K4, K5)
- 3.4: Biological species concept, Evolutionary species concept, Recognition species concept. (K1, K2, K3, K4, K5)
- 3.5: Kinds of species : Polytypic & monotypic species, subspecies, infraspecific groups. (K1, K2, K3, K4, K5)
- 3.6: Super species, other kind of species. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Taxonomic procedures, Taxonomic collection. (K1, K2, K3, K4, K5)
- 4.2: Curing of animals & Process of Identification. (K1, K2, K3, K4, K5)
- 4.3: Preservation of specimens. (K1, K2, K3, K4, K5)
- 4.4: Taxonomic Keys - Types, merits & demerits. (K1, K2, K3, K4, K5)
- 4.5: International code of Zoological Nomenclature (ICZN). (K1, K2, K3, K4, K5)
- 4.6: Interpretation of rules of nomenclature. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Taxonomic Records. (K1, K2, K3, K4, K5)
- 5.2: Publications Taxonomic keys. (K1, K2, K3, K4, K5)
- 5.3: Taxonomic characters description. (K1, K2, K3, K4, K5)
- 5.4: Taxonomic paper. (K1, K2, K3, K4, K5)
- 5.5: Zoological Records. (K1, K2, K3, K4, K5)
- 5.6: Directories, Abstracts, Review. (K1, K2, K3, K4, K5)

**Books for Study and Reference:****Textbooks:**

## SEMESTER IV

### PIZOH20 - INDEPENDENT ELECTIVE IV B - GENERAL PSYCHOLOGY

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PIZOH20	General Psychology	Theory	Independent Elective	-	2	100

#### Objectives:

- To understand, predict and control behavior.
- To learn the causes of abnormal behavior.
- To minimize the intensity of real-life problems

#### Course Outcomes:

##### On completion of the course the student will be able to...

CO1: Explain Psychology and its branches.

CO2: Define concept of self and describe the theories of Personality.

CO3: Discuss the need of social psychology.

CO4: Explain Psychopathology.

CO5: Apply the knowledge of psychology in different areas like forensic, family, court etc.

CO/PSO	PSO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	L	M	M	H	M	M
CO2	L	M	H	H	H	M
CO3	L	M	H	M	H	H
CO4	L	M	M	H	M	M
CO5	L	M	M	H	H	M

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PO6
CO1	H	M	M	M	H	H
CO2	H	M	M	H	H	H
CO3	H	H	H	M	H	H
CO4	H	H	H	M	M	H
CO5	H	H	M	M	H	H

#### Unit 1:

1.1: Psychology -Meaning- Scope. (K1, K2, K3, K4, K5)

1.2: Branches. (K1, K2, K3, K4, K5)

1.3: Application of Psychology in Family. (K1, K2, K3, K4, K5)

1.4: Education, Health, Self-Development. (K1, K2, K3, K4, K5)

1.5: Research in Psychology, Research challenges. (K1, K2, K3, K4, K5)

1.6: States of Consciousness.

**Unit 2:**

- 2.1: The Concept of Self. (K1, K2, K3, K4, K5)
- 2.2: Personality – Definition- Structure of personality. (K1, K2, K3, K4, K5)
- 2.3: Dynamic Nature of Personality. (K1, K2, K3, K4, K5)
- 2.4: Personality development- Theories of Personality. (K1, K2, K3, K4, K5)
- 2.5: Psychoanalytic method. (K1, K2, K3, K4, K5)
- 2.6: Personality Evaluation. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Social Psychology – Aim – Scope- Methods. (K1, K2, K3, K4, K5)
- 3.2: Nature and Need of Social Behavior. (K1, K2, K3, K4, K5)
- 3.3: Sequence of social development- Infancy, Childhood. (K1, K2, K3, K4, K5)
- 3.4: Social maturity, Social Norm. (K1, K2, K3, K4, K5)
- 3.5: Role and Status- Social Interaction. (K1, K2, K3, K4, K5)
- 3.6: Socialization. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Psychopathology- Abnormal behavior. (K1, K2, K3, K4, K5)
- 4.2: Models- Diagnosing and Classifying disorders. (K1, K2, K3, K4, K5)
- 4.3: Neuroses- Psychoses- Schizophrenia. (K1, K2, K3, K4, K5)
- 4.4: Personality disorders. (K1, K2, K3, K4, K5)
- 4.5: Prevalence of Mental disorders. (K1, K2, K3, K4, K5)
- 4.6: Anxiety Disorder. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Forensic Psychology- Family Court- Civil Court- Criminal Court. (K1, K2, K3, K4, K5)
- 5.2: Child Abuse Evaluations, Termination of parental rights. (K1, K2, K3, K4, K5)
- 5.3: Adoption Readiness Evaluation. (K1, K2, K3, K4, K5)
- 5.4: Personal Injury Evaluations. (K1, K2, K3, K4, K5)
- 5.5: Psychological factors in physical trauma, Sexual Harassment. (K1, K2, K3, K4, K5)
- 5.6: Alcohol Abuse and Drug Abuse. (K1, K2, K3, K4, K5)

**Books for Study and References:****Textbooks:**

1. Ernest R Hilgard, Richard C Atkinson and Rita L Atkinson – Introduction to Psychology 6<sup>th</sup> Edition- Oxford & IBH Publishing Co. Pvt. Ltd. 1975
2. Chaube S.P. Social Psychology- Second Revised Edition- Lakshmi Narain Agarwal Educational Publishers, Agra- 3. 1995.

## SEMESTER IV

### PIZOI20 - INDEPENDENT ELECTIVE IVC- ANIMAL CARE

Year	SEM	Course code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PIZOI20	Animal Care	Theory	Independent Elective	-	2	100

#### Objective

- To impart special knowledge on animals and their relationship.
- To learn to examine sick animals, and understand how diagnostic procedures are applied for determining diseases.
- To learn about animal psychology; innate behaviour and survival.

#### Course Outcomes:

**On completion of the course the student will be able to...**

**CO1:** Exapand knowledge on animal feeding.

**CO2:** Acquire knowledge on requirements for animal accommodation.

**CO3:** Recognize sick animals and diagnostic procedures to determine the disease.

**CO4:** Apply their knowledge in handling, restraining and transporting animals.

**CO5:** Explain animal psychology, innate behavior and survival.

CO/PO	PO					
	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	H	H	H	H	H	H
CO2	H	H	H	H	H	H
CO3	H	H	H	H	H	H
CO4	H	H	H	H	H	H
CO5	H	H	H	H	H	H

CO/PO	PO					
	PO1	PO2	PO3	PO4	PO5	PLO6
CO1	H	H	H	H	M	H
CO2	H	H	H	H	M	H
CO3	H	H	H	H	M	H
CO4	H	H	H	H	M	H
CO5	H	H	H	H	M	H

#### Unit 1:

1.1: Animal Care- Scope. (K1, K2, K3, K4, K5)

1.2: Animal feeding: Types of feeder. (K1, K2, K3, K4, K5)

1.3: Nutritional requirements; vitamins, minerals. (K1, K2, K3, K4, K5)

1.4: Choosing and preparing food. (K1, K2, K3, K4, K5)

1.5: Quantity and timing of feeding. (K1, K2, K3, K4, K5)

1.6: Supplements. (K1, K2, K3, K4, K5)

**Unit 2:**

- 2.1: Animal accommodation. (K1, K2, K3, K4, K5)
- 2.2: Housing requirements. (K1, K2, K3, K4, K5)
- 2.3: Bedding materials. (K1, K2, K3, K4, K5)
- 2.4: Fixtures and fittings. (K1, K2, K3, K4, K5)
- 2.5: Cleaning and maintaining. (K1, K2, K3, K4, K5)
- 2.6: Waste disposal. (K1, K2, K3, K4, K5)

**Unit 3:**

- 3.1: Animal health: Disease prevention. (K1, K2, K3, K4, K5)
- 3.2: Common diseases of dogs, cats and rabbits. (K1, K2, K3, K4, K5)
- 3.3: Endoparasites and ectoparasites. (K1, K2, K3, K4, K5)
- 3.4: Signs of ill health. (K1, K2, K3, K4, K5)
- 3.5: First aid procedures. (K1, K2, K3, K4, K5)
- 3.6: Remedies. (K1, K2, K3, K4, K5)

**Unit 4:**

- 4.1: Handling, restraining and moving animals. (K1, K2, K3, K4, K5)
- 4.2: Need for handle, restrain and move animals. (K1, K2, K3, K4, K5)
- 4.3: Personal protective equipment. (K1, K2, K3, K4, K5)
- 4.4: Handling equipment. (K1, K2, K3, K4, K5)
- 4.5: Restraint equipment. (K1, K2, K3, K4, K5)
- 4.6: Reducing stress. (K1, K2, K3, K4, K5)

**Unit 5:**

- 5.1: Animal behaviour; Normal behaviour; Emotions. (K1, K2, K3, K4, K5)
- 5.2: Abnormal behaviour. (K1, K2, K3, K4, K5)
- 5.3: Stereotypic behaviour. (K1, K2, K3, K4, K5)
- 5.4: Observing behaviour; methods and recording. (K1, K2, K3, K4, K5)
- 5.5: Avoiding/ reducing abnormal behaviour. (K1, K2, K3, K4, K5)
- 5.6: Environmental enrichment. (K1, K2, K3, K4, K5)

**AUXILIUM COLLEGE (Autonomous)**  
*(Accredited by NAAC with A+ Grade with a CGPA of 3.55 out of 4 in the 3rd Cycle)*  
**Gandhi Nagar, Vellore-632 006**

**Department of Business Administration (PG)**

**OUTCOME BASED EDUCATION - 2020**

**(Effective for the Batch of Students Admitted from 2020-2021)**

**A) INSTITUTION LEVEL**

**Vision:**

The vision of the college is the education of young women especially the poorest to become empowered and efficient leaders of integrity for the society.

**Mission:**

To impart higher education to the economically weak, socially backward and needy students of Vellore and neighboring districts.

**B) NAME OF THE PROGRAMME: MBA**

**Vision:**

To empower and mould young women students in professional, ethical, social and environmental dimensions with high degree of entrepreneurial and managerial competence so that they can integrate their skills to serve the industry and society globally.

**C) ELIGIBILITY CRITERIA OF THE PROGRAMME**

The prospective applicant must satisfy one of the following eligibility criteria for admissions to the MBA programme. A graduate degree under 10+2+3 or 10+2+4 pattern under any discipline, securing at least 50% marks in aggregate, from a recognized university.

**D) COURSE CURRICULUM GUIDELINES**

***Choice Based Credit System (CBCS):*** The MBA Degree programme is offered through a unique Choice Based Credit System'. Under Choice Based Credit System, subjects are classified into Core, Non Core, Employability Skill and Independent Elective papers.

**Core(C)** subjects are compulsory. The prescribed syllabi of the Core Subjects will help the students to acquire mastery over the fundamental concepts, in-depth knowledge of the respective discipline and get updated with the latest developments in the subject.

**Non Core (N)** subjects are compulsory. The prescribed syllabi of the Non Core Subjects are supportive to substantiate the core papers.

**Employability Skill (E)** subjects are job-oriented skill and need-based, designed to develop skills in the student to enhance her Opportunities for acquiring a suitable job.

**Independent Elective (I)** subjects are based on the choice of the students from among the list offered by the Department. At least one paper per semester is compulsory. The students can opt for a maximum of three self-study papers that will add an advantage of gaining extra credits.

### **Testing, Assessing and Valuation**

**Weightage of Marks:** The weightage of marks between Continuous Internal Assessment and End Semester Examination shall be 40 and 60 respectively.

**Passing Minimum:** A student is declared to have passed a given subject only when she secures a minimum of 30 (out of 60) marks in the end-semester examination and an aggregate of 50% marks (both Internal and End-Semester Examination put together). There is no minimum passing marks for the internal assessment component.

**Continuous Internal Assessment Components:** The weightage of 40 marks for Internal Assessment Components shall consist of the following components.

- Two written tests each of two hours duration for 50 marks will be conducted. The tests will be conducted centrally. The average of two such CA is calculated for 35 marks. Syllabus of not less than two units shall be included for each CA. There is no passing minimum for CA.
- 5 marks includes the innovative method of testing during class hours by the staff in charge of the subject in the form of assignments/ quiz/ seminars/ presentations/ online/open book/ Viva voce/ group work/ mini project/ exhibition, etc. The topic and time for submission/presentation will be announced by the staff member in charge of the subject in advance. Each student should explain and defend her presentation.

### **Evaluation of End Semester Written Examination**

- The End Semester Examination shall be evaluated for a weightage of 100 marks and this will be evaluated by the panel of examiners that consists of both internal and external examiners.
- The valuation will be centralized.
- A student has a maximum period of five years from the Date of Admission to clear all the subjects prescribed for the programme at the time of her admission. After the fifth year, to complete the programme, the student has to appear for an examination in the same/equivalent paper offered under the revised syllabus structure.

### ***Question Paper Pattern***

The question paper pattern for the end semester written examination shall be as given below

<b><i>Section A-</i></b> 8 questions carrying 5 marks each out of 10 (Open Choice)	<b>8x5 = 40marks</b>
<b><i>Section B-</i></b> 3 questions out of 5 (Open Choice)	<b>3x15= 45 marks</b>
<b><i>Section C-</i></b> A compulsory question/Case Study in the relevant subject	<b>1x15=15 marks</b>
Total	<b>100 marks</b>

***Attendance:*** Each student should obtain 75 per cent attendance to be eligible for appearing for the End Semester Examination.

### ***Revaluation***

- A student can apply for the photocopy of answer scripts, if needed, on payment of the prescribed fee.
- A student can apply for revaluation of any paper on payment of the prescribed fee within the specified date.
- Receipt of the photocopy of the answer script is a pre- requisite for revaluation.

### ***Re-Examination***

After the declaration of the results of the final semester, a student can apply by the specified date, for re-examination in not more than three papers. This facility is available only for those students who have not obtained a pass in maximum of three papers. The examination will be conducted and results published within a month of the first publication of the result.

### ***Note***

A student can report any grievance regarding CA or SE, to the Controller of Examinations, who in turn, will present the same to the Examination Committee, Chaired by the Principal.

### **Classification of Successful Candidates**

Conversion of Marks to Grade Points and Letter Grade

<b>Range(Percentage)</b>	<b>Letter Grade</b>	<b>Grade Point</b>	<b>Description</b>
90 – 100	S	10	Outstanding
80 – 89	A	8	Distinction
70 – 79	B	7	Good
60 – 69	C	6	Average
50 – 59	D	5	Pass
00 – 49	F	2	Fail
Absent for Final Exam	E	1	Exposure
Lack of Attendance	I	0	Incomplete

### **Calculation of Grade Point Average**

Based on the average grades obtained by a candidate, the Grade Point Average (CGPA) is calculated.

**Unit – III Group Behavior****(15 hours)**

- 3.1 Groups in organizations, Influence (K1, K2, K3, K4)
- 3.2 Group dynamics (K1, K2, K3, K4)
- 3.3 Formal and informal (K1, K2, K3, K4)
- 3.4 Group cohesiveness, Group decision making techniques (K1, K2, K3, K4)
- 3.5 Interpersonal behaviour (K1, K2, K3, K4)
- 3.6 Work teams, Concept,Types, Effective teams (K1, K2, K3, K4)

**Unit – IV Leadership and Power****(15 hours)**

- 4.1 Meaning, Importance (K1, K2, K3, K4)
- 4.2 Leadership styles, Theories, Leaders Vs Managers (K1, K2, K3, K4)
- 4.3 Sources of power, Power centers (K1, K2, K3, K4)
- 4.4 Power and politics, Communication (K1, K2, K3, K4)
- 4.5 Functions, Model, Choice of Communication (K1, K2, K3, K4)
- 4.6 Barriers to Effective Communication (K1, K2, K3, K4)

**Unit – V Dynamics of Organizational Behavior****(15 hours)**

- 5.1 Organizational Change, Importance (K1, K2, K3, K4)
- 5.2 Stability Vs change, Proactive Vs Reactive change (K1, K2, K3, K4)
- 5.3 Change process, Resistance to change, Managing change , Stress (K1, K2, K3, K4)
- 5.4 Work stressors, Prevention and management of stress (K1, K2, K3, K4)
- 5.5 Balancing work and life, Organizational Development (K1, K2, K3, K4)
- 5.6 Characteristics, Objectives, Organizational interventions(K1, K2, K3, K4)

**Note:** Case studies for all units. (K5,K6)

## SEMESTER - I

### PCBAC20 - ECONOMICS FOR MANAGEMENT

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PCBAC20	Economics for Management	Theory	Core	6	3	100

#### OBJECTIVES

1. To gain knowledge about the basic concepts of economics
2. To attain in depth understanding of day today basic elements that drive the economics
3. To acquire the familiarity with the elements of production required in the current corporate scenario
4. To imbibe awareness about the pricing in the current market which serves as the basic elements of personal and professional life
5. To empower the wards about the economic issues that is ethically important as sincere citizens of India.

#### COURSE OUTCOMES (CO)

The learners will be able to

**CO1:** Understand the concept of Economics

**CO2:** Acquire the acquaintance of Demand and Supply

**CO3:** Apply the Conception of Cost Production Function

**CO4:** Understand the assumption of pricing and Market competition

**CO5:** Acquire the knowledge on Macroeconomics, Inflation

CO5	H	H	H	M	M	H

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit I: Introduction to Concepts of Economics****(15 hours)**

- 1.1 Definition, Scope, Types, Kinds (K1, K2,)
- 1.2 Themes, Macro and Micro Econometrics, Problems (K1, K2,)
- 1.3 Production Possibility Frontier, Efficiency, Market Mechanisms (K1, K2, K3)
- 1.4 Role of Government, Rise of Welfare State (K1, K2, K3, )
- 1.5 Consumption Function, Investment Function, (K1, K2, K3)
- 1.6 Marginal Efficiency, Multiplier, Accelerator (K1, K2, K3, K4)

**Unit II: Elements of Supply & Demand****(15 hours)**

- 2.1 Demand and Supply Analysis, (K1, K2,)
- 2.2 Laws of Supply and Demand (K1, K2)
- 2.3 Elasticity of Demand and Supply, Types (K1, K2)
- 2.4 Equilibrium and Changes in Market Equilibrium- (K1, K2, K3)
- 2.5 Demand Forecasting, Techniques (K1, K2, K3)
- 2.6 Demand Forecasting for New Products.(K1, K2, K3, K4)

**Unit III: Cost Production Function****(15 hours)**

- 3.1 Law of Diminishing Utility (K1, K2,)
- 3.2 Indifference Curve (K1, K2,)
- 3.3 Cost of Production (K1, K2, K3, K4)
- 3.4 Short and Long Run Cost Function- (K1, K2, K3)
- 3.5 Economies of Scale (K1, K2, K3)
- 3.6 Dis-Economies of Scale (K1, K2, K3)

**Unit IV: Theory of pricing and Market competition****(15 hours)**

- 4.1 Pricing (K1, K2,)
- 4.2 Equilibrium of Firm (K1, K2,)
- 4.3 Perfect Competition, Monopoly and Price Discrimination (K1, K2, K3)
- 4.4 Revenue, Types and Relationship- (K1, K2, K3)
- 4.5 Monopolistic and Oligopoly Competition (K1, K2, K3)
- 4.6 Stabilization Policies (K1, K2, K3, K4,)

**Unit V - Macro Economics, Inflation****(15 hours)**

- 5.1 Business Cycle (K1, K2,)
  - 5.2 Challenges of Economic Development, Unemployment, (K1, K2, K3)
  - 5.3 Macroeconomics (K1, K2, K3)
  - 5.4 National Income and Expenditures (K1, K2, K3)
  - 5.5 Macro Economic Aggregates (K1, K2, K3, K4)
  - 5.6 Inflation and Deflation (K1, K2, K3)
- Note:** Case studies for all Units.(K5.K6)

## SEMESTER – I

### PCBAD20 - ACCOUNTING FOR MANAGEMENT

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/ W	Credits	Marks
I / I	PCBAD20	Accounting for Management	Problem	Core	6	3	100

#### OBJECTIVES

To enable the students to understand the principles , concepts , conventions and preparation of financial statements.

1. To enable the students understand and prepare Financial Statement Analysis.
2. To give practical knowledge over the most important tools of analysis and interpretation of Financial Statements
3. To enable the students understand the concept of Cost Accounting, the elements of Cost and methods of Costing
4. To make understand the learners and to give practical knowledge over the most important techniques of Management Accounting.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Be able to acquire depth knowledge in Accounting and will be capable of preparing financial income statement and financial balance sheet.

**CO2:** Be capable of preparing analysis and interpreting financial statements using various tools.

**CO3:** Gain knowledge how to prepare fund flow statement and cash flow statement and using the same for decision making in business.

**CO4:** Gains knowledge on the concepts of management and cost accounting techniques, preparation of cost sheet, valuation of stock, pricing of material issues and prepare accounting for stage wise production under different process.

**CO5:** Acquire Knowledge to help the management in decision making in the form of preparing budgets and price fixation.

CO5	H	H	H	H	H	H

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit 1 – Financial Accounting**

**(15 Hours)**

- 1.1 Introduction to Financial Accounting (K1, K2, K3)
- 1.2 Cost Accounting (K1, K2, K3)
- 1.3 Management Accounting (K1, K2, K3)
- 1.4 Generally accepted accounting principles, conventions and concepts (K1, K2, K3)
- 1.5 Balance Sheet and related concepts (K1, K2, K3)
- 1.6 Profit and Loss account and related concepts (K1, K2, K3)

**Unit II – Analysis of Financial Statement – I**

**(15 Hours)**

- 2.1 Analysis of financial statements – Objectives – Comparative Income statement – Comparative position statement (K1, K2, K3, K4)
- 2.2 Common size Income statement – Common size position statement (K1, K2, K3, K4)
- 2.3 Trend analysis (K1, K2, K3, K4)
- 2.4 Financial ratio analysis (K1, K2, K3, K4)
- 2.5 Profitability analysis – Solvency analysis (K1, K2, K3, K4)
- 2.6 Liquidity analysis – Turnover ratios (K1, K2, K3, K4)

**Unit III – Analysis of Financial Statement – II**

**(15 Hours)**

- 3.1 Cash concept – Sources and applications of cash flow (K1, K2, K3, K4)
- 3.2 Cash from operation (K1, K2, K3, K4)
- 3.3 Cash flow (as per Accounting Standard 3) (K2, K3, K4)
- 3.4 Concepts of funds – Meaning of funds flow (K2, K3, K4)
- 3.5 Working Capital concepts of funds – Schedule of changes in working capital (K2, K3, K4)
- 3.6 Funds from operations – Funds flow statement analysis – Difference between Cash flow and Funds Flow (K2, K3, K4)

**Unit IV – Cost Accounting**

**(15 Hours)**

- 4.1 Cost accounts – Need for cost accounts – Classification of costs (K1, K2, K3, K5)
- 4.2 Cost sheet (K3, K5)
- 4.3 Material FIFO, LIFO (K1, K3, K5)
- 4.4 Labour – Taylor, Merrick, Gantt, (K3, K4, K5)
- 4.5 Overheads – Allocation and Apportionment (K3, K4, K5)

4.6 Process costing. (K1,K3, K5)

## **Unit V – Management Accounting**

**(15 Hours)**

5.1 Marginal Costing (K1,K2,K3, K5)

5.2 Break even Analysis – Break Even Point (K1, K2, K3, K5)

5.3 CVP Analysis- Margin of safety – PV ratio (K1, K2, K3, K5)

5.4 Budgetary Control – Production Budget (K1, K2, K3, K5)

5.5 Sales Budget – Cash Budget (K1, K2, K3, K5)

5.6 Fixed and Flexible Budget. (K1,K2, K3, K5)

**Note:** 80% problems and 20% theory

### PCBAF20 - MANAGEMENT INFORMATION SYSTEM AND TECHNOLOGY

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PCBAF20	Management Information System and Technology	Theory	Core	6	2	100

#### OBJECTIVES

1. To gain domain knowledge in all aspects of management information system and technology
2. To enhance the managerial skills using information system
3. To implement the conceptual and practical management concepts using information system and technology in the workplace.
4. To adhere the values and ethics relevant to the business environment.
5. To master in developing the information system and technology to work in an organization as a team or to start an enterprise.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Understand about management information system concepts and resources.

**CO2:** Be able to analyze various concepts of information technology.

**CO3:** Be able to classify the different functional business systems using information system and technology and can implement in their organization.

**CO4:** Enhance the planning and developing skills and master in business IT environment.

**CO5:** Adhere ethical responsibility of business concepts.

CO5	L	L	M	L	M	H

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

## **Unit I - Information Systems**

**(15 hours)**

- 1.1 Introduction -Fundamental roles of IS – Trends in IS (K1, K2, K3)
- 1.2 Applications in Business – E-business in business (K1, K2, K3)
- 1.3 Types of IS (K1, K2, K3, K4)
- 1.4 System concepts- – Components of Information System (K1, K2, K3, K4)
- 1.5 Information System Resources –Information System Activities (K1, K2, K3, K4)
- 1.6 Recognizing Information System– Information system Advantages and Disadvantages (K1, K2, K3, K4)

## **Unit II - Information Technology concepts**

**(15 hours)**

- 2.1 Managerial challenges of Information technology (K1, K2, K3)
- 2.2 Fundamentals of Strategic Advantage – Strategic Uses of IT –Value chain and strategic IT (K1, K2, K3)
- 2.3 Using Information Technology for strategic advantage - Reengineering process - Role of IT (K1, K2, K3)
- 2.4 Data Resource Management Approach- Foundation Concepts-Types of Databases (K1, K2, K3, K4)
- 2.5 Data Mining - Data Warehousing and their business applications (K1, K2, K3, K4)
- 2.6 Database Management Approach (K1, K2, K3, K4)

## **Unit III -IT in Business**

**(15 hours)**

- 3.1 Functional business systems (K1, K2, K3)
- 3.2 Customer Relationship Management (CRM) (K1, K2, K3)
- 3.3 Enterprise Resource Planning (ERP) (K1, K2, K3)
- 3.4 Supply chain Management (SCM) (K1, K2, K3)
- 3.5 E-commerce systems – Essential E-commerce Processes –Electronic Payment Processes (K1, K2, K3, K4)
- 3.6 E-business models – Clicks and Bricks in E-commerce – M- commerce (K1, K2, K3)

## **Unit IV -IS and IT Development**

**(15 hours)**

- 4.1 Planning Fundamentals (K1, K2, K3)
- 4.2 Business Models and Planning – Business/IT Planning – Business application planning (K1, K2, K3, K4)
- 4.3 Implementing IT – End-user resistance and Involvement- Change Management (K1, K2, K3,K4)
- 4.4 Developing Business /IT Solutions : IS Development – The Systems Approach (K1, K2, K3,K4)
- 4.5 The Systems Development Cycle – Prototyping – Systems Development Process (K1, K2, K3,K4)
- 4.6 Implementing new systems – Evaluating Hardware, Software and Services(K1, K2, K3)

## Unit V - Ethical Responsibilities of a Business

(15 hours)

5.1 Ethical Challenges of IT (K1, K2, K3)

5.2 Computer Crime – Privacy Issues – Health Issues (K1, K2, K3, K4)

5.3 Security Management of IT – Tools of Security Management – Internet worked security defenses (K1, K2, K3)

5.4 Security Measures – IT ACT 2000 in India (K1, K2, K3)

5.5 Enterprise and Global Management of IT Managing the IS function – Failures in IT Management (K1, K2, K3)

5.6 Global Business/IT Strategies- Global IT Platforms. (K1, K2, K3)

**Note:** Case studies for all Units (K5, K6)

### PJBAB20 - PRACTICAL – I: MS OFFICE AND ADVANCED EXCEL

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I / I	PJBAB20	MS Office and Advanced Excel	Practical	Elective	2	2	100

#### OBJECTIVES

1. To heighten their awareness of correct usage of Office Software.
2. Assist students to improve fluency and accuracy in mailing, creating presentations
3. To use advanced excel for data analysis purposes in business environment
4. To equip students with the knowledge and skills required to accomplish Word, Excel and PowerPoint tasks efficiently

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Master in the use of strategies, such as mail merging, creating articles.

**CO2:** Draft and to animate the presentations using power point

**CO3:** Analyse formulas and feeding the data in the excel

**CO4:** Develop and create charts and pivot table

**CO5:** Enhance and develop their ability to solve using conditionals and lookup functions in advanced excel.

## Practical List

1. Create your Resume in MS-word with necessary formatting.
2. Write a promotion letter to inform 5 employees that he/she has been chosen to a post or for a task, Based on qualification and experience, using mail-merge, make use of If, Then, Else statement.
3. Create a simple Quiz in PowerPoint (minimum 5 slides) and add animations to it.
4. Create an invitation using Power point presentation with borders, backgrounds and inserting image.
5. Input 5 employee details (Emp. No, name, basic pay, DA, HRA) and calculate GROSS ( $GROSS = \text{Basic} + DA + HRA$ ) and NET pay ( $NET \text{ Pay} = GROSS - DA$ ), Create Bar chart and Column chart for input values.
6. Get the order entry for 5-types of books, and calculate the total cost and cumulative cost sort it from maximum to minimum cost. Create chart for input values
7. Create a Pivot table and extract the significance from a data set using report filter for the goods exported in a year by a company and insert pivot chart .
8. Input data of a product price and quantity in a data table and perform what-if analysis.
9. Create a voters list for 5 members and find weather the candidate is eligible to vote using simple conditionals function.
10. Create a simple Lookup table using Lookup function in excel for employees ID and their salary.

## SEMESTER – II

### PCBAG20 – SUPPLY CHAIN MANAGEMENT

Year/Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
I / II	PCBAG20	Supply Chain Management	Theory	Core	6	3	100

#### OBJECTIVES

1. The course provides an analytical framework for understanding the supply chain techniques of the current business environment.
2. To learn flow in Supply Chain.
3. To understand the inventory techniques.
4. To learn about the entire network in Supply Chain.
5. To learn about the latest trends in technology.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Acquire knowledge on Supply Chain activities in the market and implement Supply Chain Management.

**CO2:** Evaluate the various networks and its flaws.

**CO3:** Distinguish the various inventory models in supply chain.

**CO4:** Implement the supply chain network for logistics.

**CO5:** Elaborate the current trends and technological implementation in the supply chain environment.

**Unit I: Introduction and Planning****(15 hours)**

- 1.1 Introduction, Evolution, Definition (K1, K2, K3)
- 1.2 Supply Chain, Activity Mix, Importance, Conceptual Model (K1, K2, K3)
- 1.3 Supply Chain Management Approach (K1, K2, K3)
- 1.4 Supply chain drivers, metrics (K1, K2, K3)
- 1.5 Supply Chain performance in India (K1, K2, K3)
- 1.6 Enhancing Supply Chain Performance. (K1, K2, K3)

**Unit II : Managing Flows****(15 hours)**

- 2.1 Planning Networks (K1, K2, K3, K4)
- 2.2 Decision making under risk (K1, K2, K3, K4)
- 2.3 Decision trees (K1, K2, K3, K4)
- 2.4 Decision making under uncertainty (K1, K2, K3, K4)
- 2.5 Distribution Network Design, Role (K1, K2, K3, K4)
- 2.6 Factors Influencing Options, Value Addition in Supply Chain (K1, K2, K3, K4)

**Unit III: Inventory Strategy****(15 hours)**

- 3.1 Inventory, objectives, bullwhip effect, control (K1, K2, K3, K4)
- 3.2 Probabilistic inventory models, Risk pooling (K1, K2, K3, K4)
- 3.3 Vendor managed inventory, Multi-echelon inventory (K1, K2, K3, K4)
- 3.4 Warehousing Functions, Types, Site Selection (K1, K2, K3, K4)
- 3.5 Decision Model, Layout Design (K1, K2, K3, K4)
- 3.6 Costing, Virtual Warehouse (K1, K2, K3, K4)

**Unit IV: Supply Chain Network & Transportation****(15 hours)**

- 4.1 Transportation, Drivers, Modes (K1, K2, K3, K4)
- 4.2 Measures, Strategies for Transportation, 3PL and 4PL (K1, K2, K3, K4)
- 4.3 Vehicle Routing and Scheduling, Packaging (K1, K2, K3, K4)
- 4.4 Design considerations, Material and Cost (K1, K2, K3, K4)
- 4.5 Packaging as Unitisation (K1, K2, K3, K4)
- 4.6 Consumer and Industrial Packaging (K1, K2, K3, K4)

**Unit V : Current Trends****(15 hours)**

- 5.1 Supply Chain Integration (K1, K2, K3, K4)
- 5.2 Building partnership and trust in SC Value of Information (K1, K2, K3, K4)
- 5.3 Bullwhip Effect, Effective, forecasting, Coordinating the supply chain (K1, K2, K3, K4)
- 5.4 SC Restructuring, SC Mapping, SC process restructuring (K1, K2, K3, K4)
- 5.5 Postpone the point of differentiation, IT in Supply Chain (K1, K2, K3, K4)
- 5.6 Agile Supply Chains - Reverse Supply chain. Agro Supply Chains (K1, K2, K3, K4)

## SEMESTER -II

### PCBAL20 – ENTERPRISE RESOURCE PLANNING

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
I / II	PCBAL20	Enterprise Resource Planning	Theory	Core	6	2	100

#### OBJECTIVES

1. To enable the evolution and role of ERP in business integration.
2. To integrate emerging technologies into ERP systems including supply chain management and customer relationship management
3. To understand Transition of ERP architecture, design, development, implementation, and project management. To choose perfect project team.
4. To find out the Effective Management concepts implemented in ERP after implementation
5. To get an idea with enterprise software from SAP.

#### COURSE OUTCOME

The learners will be able to

**CO1:** Understand how ERP is evolved and analyze various risk in ERP

**CO2:** Be able to integrate and analyze related technologies with ERP and also to understand the entire product life cycle starting from manufacturing till SCM and CRM

**CO3:** Be able to classify the legacy system with ERP system and able to apply various transition strategies according to the organization

**CO4:** Can analyze the success and failure factors and will be able to apply the success factors in post implementation phase

**CO5:** Understand and use the idea of SAP AG, SAP Net weaver in the enterprise.

CO5	H	L	M	M	H	H

**H-HIGH (3), M-MODERATE(2), L-LOW(1)**

### **Unit I: Introduction**

**(15 hours)**

- 1.1 Introduction to ERP —Common ERP Myths (K1, K2, K3)
- 1.2 History and Evolution of ERP - Reasons for the Growth- Advantages(K1, K2, K3)
- 1.3 Why ERP- Roadmap for successful ERP Implementation (K1, K2, K3)
- 1.4 Basic ERP Concepts - ERP Fit (K1, K2, K3)
- 1.5 Importance - Create Value (K1, K2, K3)
- 1.6 ERP Architecture- Risks of ERP(K1, K2, K3)

### **Unit II: ERP and Technology**

**(15 hours)**

- 2.1 Benefits of ERP- ERP and related technologies (K1, K2, K3,K4)
- 2.2 Business Process Reengineering -Business Intelligence (K1, K2, K3,K4)
- 2.3 Product life cycle management (K1, K2, K3)
- 2.4 Customer Relationship Management (K1, K2, K3)
- 2.5 Supply Chain Management (K1, K2, K3)
- 2.6 Advanced technology and ERP Security- Business models of an ERP packages (K1, K2, K3)

### **Unit III: ERP Implementation**

**(15 hours)**

- 3.1 ERP Implementation Transition Strategies (K1, K2, K3)
- 3.2 Life Cycle (K1, K2, K3,K4)
- 3.3 Implementation Process (K1, K2, K3,K4)
- 3.4 Training and Education (K1, K2, K3,K4)
- 3.5 Data Migration (K1, K2, K3,K4)
- 3.6 ERP Project Teams (K1, K2, K3,K4)

### **Unit IV: Operation, Maintenance and Future Trends in ERP**

**(15 hours)**

- 4.1 ERP Operation (K1, K2, K3,K4)
- 4.2 ERP Maintenance (K1, K2, K3,K4)
- 4.3 Success factors of ERP implementation (K1, K2, K3,K4)
- 4.4 Failure factors of an ERP Implementation (K1, K2, K3,K4)
- 4.5 Future directions in ERP (K1,K2, K3,K4,)
- 4.6 Trends in ERP(K1,K2,K3,K4)

## **Unit V: SAP**

**(15 hours)**

- 5.1 SAP AG -SAP Business Basics (K1, K2, K3,K4)
- 5.2 SAP Technology Basics- SAP Project Basics (K1, K2, K3,K4)
- 5.3 Overview of SAP Applications and Components (K1, K2, K3,K4)
- 5.4 A Business User Perspective on Implementing SAP (K1, K2, K3,K4)
- 5.5 Logging On and Using SAP's User Interface (K1, K2, K3,K4)
- 5.6 SAP User Roles and Authorizations (K1, K2, K3,K4)

**Note:** Case Studies for all Units. (K5.K6)

Each student shall be required to prepare the report on the basis of training undergone by her in a business or industrial organization. The report should demonstrate the capability of the students in studying the organization and its process in totality.

### **Evaluation Pattern**

- Each student should undergo the training separately.
- The mode of evaluating the student will consist of two parts. One on the basis of report writing and the other will be through Viva Voce.
- The valuation of the report writing will be done by the internal examiner while for the oral examination an external examiner will be called for.
- 60 marks will be awarded for the report writing and for oral examination 40marks.
- Training will be for a period of 30 days which will be during the month of May- June of every academic year.
- Each student should find a reputed organization which carries out the important functions like Production, Human Resource, Finance and Marketing to carry out her investigation with the approval of the department.
- Records should be maintained for daily activities signed by the concerned authorities in the organization
- After completion of the training, the student should get Completion Certificate and Attendance Certificate from the company when she comes back to the college.
- Any change of the organization during the course of the Training should be done only after getting the consent from the Head of the Department of the College in writing.
- Training report is to be submitted by the students within 30 days from the commencement of the 3<sup>rd</sup> semester.
- Evaluation of the report should be sent to the Controller of Examinations through the Head of the Department, before the last working day of the 3<sup>rd</sup> semester
- The following are the components for report writing (60Marks)
  - Content - 40Marks
  - Layout - 10Marks
  - Grammar - 10 Marks
- Viva -Voce – (40Marks)
  - Oral Presentation - 30Marks
  - Question and Answer - 10Marks

**SEMESTER IV**  
**PCBAO20 – PRODUCTION AND OPERATIONS MANAGEMENT**

Year/Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II/IV	PCBAO20	Production and Operations Management	Theory	Core	6	3	100

**OBJECTIVES**

1. To understand the concept and techniques of production and operations management.
2. To be aware about Forecasting and capacity building.
3. To understand plant location and design.
4. To have an in depth knowledge on Inventory Management.
5. To apply various tools of TQM.

**COURSE OUTCOMES**

The learners will be able to

**CO1:** Appreciate the principles and applications relevant to the production and operation systems of manufacturing/service firms.

**CO2:** Reveal the ability to apply some forecasting techniques, enlarge basic materials requirement schedules and develop an aggregate plan and describe the boundaries of an operations system, and recognize its interfaces with other functional areas within the organization and with its external environment.

**CO3:** To understand techniques of location and facility planning; line balancing; job designing; and capacity planning in operations management.

**CO4:** Plan and implement suitable materials handling principles and practices in the operations.

**CO5:** Plan and implement suitable quality control measures in Quality Circles to TQM.

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit - I Introduction to Production and Operations Management (15 hours)**

- 1.1 Production systems , Nature, Importance and Organizational function (K1, K2, K3)
- 1.2 Characteristics of Modern production and operation function (K1, K2, K3)
- 1.3 Recent trends in production and operation management (K1, K2, K3)
- 1.4 Role of operations in Strategic management (K1, K2, K3)
- 1.5 Production and operation strategy (K1, K2, K3)
- 1.6 Nature of International operations management. (K1, K2, K3)

**Unit – II Forecasting, Capacity and Aggregate Planning (15 hours)**

- 2.1 Demand Forecasting, Needs, Types (K1, K2, K3, K4)
- 2.2 Objectives and steps, Capacity Planning, Long range, types (K1, K2, K3, K4)
- 2.3 Rough cut plan, CRP, Types of capacity, Process (K1, K2, K3, K4)
- 2.4 Master Production Scheduling, Objectives, Functions (K1, K2, K3, K4)
- 2.5 Developing capacity alternatives, Aggregate planning (K1, K2, K3, K4)
- 2.6 Approaches – Costs – overview of MRP, MRP II, ERP (K1, K2, K3, K4)

**Unit – III Plant Location, Design of Product and Process (15 hours)**

- 3.1 Meaning, Steps in location selection, Importance of location factors (K1, K2, K3, K4)
- 3.2 Plant layout models, Meaning, Objectives, Types, Importance (K1, K2, K3, K4)
- 3.3 Principles of plant layout, Layout planning, Tools & techniques (K1, K2, K3, K4)
- 3.4 Criteria for selection and design of layouts (K1, K2, K3, K4)
- 3.5 Product design, Importance, Factors, Characteristics, Approaches (K1, K2, K3, K4)
- 3.6 Process planning – Process selection – Process decisions. (K1, K2, K3, K4)

**Unit – IV Operations and Materials Management (15 hours)**

- 4.1 Inventory management, Meaning, Objectives (K1, K2, K3, K4)
- 4.2 Factors, Process, Inventory control techniques, Purchase (K1, K2, K3, K4)
- 4.3 Definition, Objectives, Functions, Purchasing cycle, Vendor rating (K1, K2, K3, K4)
- 4.4 Techniques, Value Analysis, Stores Management, Nature, Layout (K1, K2, K3, K4)
- 4.5 Classification and Coding, JIT, Materials management (K1, K2, K3, K4)
- 4.6 Objectives, Planning, Budgeting and control. (K1, K2, K3, K4)

**Unit – V Total Quality Management (15 hours)**

- 5.1 Definition, Quality, TQM framework (K1, K2, K3, K4)
- 5.2 Dimensions of product and service quality (K1, K2, K3, K4)
- 5.3 Contribution of Deming, Crosby, Ishikawa, Quality Circle (K1, K2, K3, K4)
- 5.4 Japanese 5s Principle, 8D Methodology (K1, K2, K3, K4)
- 5.5 KAIZEN, Key elements, Classification (K1, K2, K3, K4)
- 5.6 Six Sigma concepts of process capability, TPM principles, Benefits, BPR. (K1, K2, K3, K4)

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

## **Unit I Introduction to Merchant Banking**

**(15 Hours)**

- 1.1: Definition of Merchant Banking – Functions (K1, K2, K3, K4, K5, K6)
- 1.2: Responsibilities of Merchant Bankers (K1, K2, K4, K5, K6)
- 1.3: SEBI guidelines (K1, K2, K4, K5)
- 1.4: Defaults of Merchant bankers and penalty points (K1, K2, K3, K4, K5, K6)
- 1.5: Code of conduct for merchant bankers (K1, K2, K3, K4)
- 1.6: Difference between Merchant banking and commercial banking (K1, K2, K4, K5)

## **Unit II Capital Market Instruments**

**(15 Hours)**

- 2.1: Capital Market instruments – Meaning - Types: Preference shares - Equity shares (K1, K2, K3, K4)
- 2.2: Nonvoting equity shares - Cumulative Convertible preference shares (K1, K2, K3, K4)
- 2.3: Company fixed deposits – Warrants (K1, K2, K3, K4)
- 2.4: Debentures and Bonds (K1, K2, K3, K4)
- 2.5: Innovative Debt Instruments (K1, K2, K3, K4)
- 2.6: Shares vs. Debentures (K1, K2, K3, K4)

## **Unit III Fund Based Services**

**(15 Hours)**

- 3.1: Factoring – Meaning – Mechanism - Features (K1, K2, K3, K4)
- 3.2: Legal aspects of factoring (K1, K2, K3, K4)
- 3.3: Types – Advantages – Disadvantages of factoring (K1, K2, K4)
- 3.4: Players – Functions of factoring (K1, K2, K3, K4, K5)
- 3.5: Forfeiting – Definition – Steps – Mechanics (K1, K2, K3, K4, K5)
- 3.6: Advantages - Factoring vs. Forfeiting (K1, K2, K3, K4, K5)
- 3.7: IDR (K1, K2, K4, K5)
- 3.8: Book Building (K1, K2, K3, K4, K5, K6)
- 3.9: Green shoe Option (K1, K2, K3, K4, K5, K6)

## **Unit IV Fund Based Services**

**(15 Hours)**

- 4.1: Merger – Acquisition – Takeover - Types of merger (K1, K2, K3, K4, K5, K6)
- 4.2: Venture capital – Meaning - Stages of venture capital finance (K1, K2, K3, K4, K5, K6)
- 4.3: Leasing – Meaning - Essential elements (K1, K2, K3, K4, K5, K6)
- 4.4: Types of leasing (K1, K2, K3, K4, K5, K6)
- 4.5: Players - Merits and demerits of leasing (K1, K2, K3, K4, K5, K6)
- 4.6: Hire purchase finance – meaning (K1, K2, K3, K6)
- 4.7: Consumer finance – Meaning - Types (K1, K2, K3, K4, K6)

## **Unit V Credit Rating**

**(15 Hours)**

- 5.1: Credit Rating – Definition – Features (K1, K2, K3, K4)
- 5.2: Advantages of credit rating (K1, K2, K3, K4)
- 5.3: Domestic credit rating Agencies: CRISIL (K1, K2, K4, K5)
- 5.4: ICRA (K1, K2, K4, K5)
- 5.5: CARE (K1, K2, K4, K5)
- 5.6: CIBIL – Objectives and Services (K1, K2, K4, K5)

**Note:** Case Studies for all Units (K5.K6)

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

**Unit I - Introduction to Risk Management (15 Hours)**

- 1.1 Risk – Types of Risk (K1,K2)
- 1.2 Objectives of risk management (K1,K2,K3)
- 1.3 Sources of risk (K1,K2,K3)
- 1.4 Risk identification (K1,K2,K3)
- 1.5 Measurement of risk(K1,K2,K3)
- 1.6 Risk Management Process(K1,K2,K3,K4)

**Unit II - Risk Management Techniques (15 Hours)**

- 2.1 Risk Avoidance (K1,K2,K3,K4)
- 2.2 Loss Control (K1,K2,K3,K4)
- 2.3 Risk retention (K1,K2,K3,K4)
- 2.4 Risk transfer (K1,K2,K3,K4)
- 2.5 Cost of risk management (K1,K2,K3,K4)
- 2.6 Pooling and diversification of risk. (K1,K2,K3,K4)

**Unit III – Derivatives Management – I (15 Hours)**

- 3.1 Derivatives – Definition (K1)
- 3.2 Types (K1,K2,K3)
- 3.3 Uses (K1,K2,K3)
- 3.4 Forward contracts (K1,K2,K3)
- 3.5 Future Contracts – SWAPS – Hedging with options (K1,K2,K3)
- 3.6 Sophisticated Hedging Strategies with option(K1,K2,K3,K4)

**Unit IV – Derivatives Management – II (15 Hours)**

- 4.1 Evolution of derivatives in India (K1,K2,K3)
- 4.2 Recommendations of L.C.Gupta Committee (K1,K2,K3)
- 4.3 Categories of derivatives traded in India (K1,K2,K3)
- 4.4 Derivatives trading at BSE/NSE (K1,K2,K3)
- 4.5 Strengthening of cash market (K1,K2,K3)
- 4.6 salient features of index futures contract at BSE/NSE(K1,K2,K3)

**Unit V - Advance Financial Derivatives (15 Hours)**

- 5.1 Advance Financial Derivatives-Introduction(K1)
- 5.2 Interest Rate Options(K1,K2,K3)
- 5.3 Interest Rate Caps(K1,K2,K3)
- 5.4 Terms Of Interest Rate Agreement(K1,K2)
- 5.5 Types Of Interest Rate Caps-Interest Rate Guarantee and Cap(K1,K2,K3,K4)
- 5.6 Other advanced derivatives. (K1,K2,K3,K4)

CO5	H	L	M	H	M	L

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit – 1 Concepts of Compensation System and the Pay Model (15 hours)**

- 1.1 : Definition – concept (K1)
- 1.2 : Forms of pay (K1, K2)
- 1.3: Pay model (K2)
- 1.4: Developing a total compensation strategy (K2, K3)
- 1.5: Compensation strategy – internal structure (K1, K2, K3)
- 1.6: Strategic choices and consequences (K2, K3)

**Unit- II Job valuation & Job Description (15 hours)**

- 2.1: Job Analysis – procedure – information collected (K1)
- 2.2: Methods of collecting the information (K1, K2)
- 2.2: Job description (K1)
- 2.3: Judging job analysis (K2, K3)
- 2.3: Job evaluation process (K2, K3)
- 2.4: Major decisions in the process of job evaluation. (K2, K3, K4)

**Unit- III Person Based Structures (15 hours)**

- 3.1: Designing pay level, mix, structures – major decision (K1)
- 3.2: Person Based Structures (Skill) – introduction – skill plans (K1, K2, K3)
- 3.4: Types – purpose – analysis (K2, K3)
- 3.5: Competencies – defining competencies – purpose (K2, K3)
- 3.6: Competency analysis – administering the plan (K2, K3)
- 3.5: Bias in internal structures (K2, K3, K4)

**Unit – IV Benefits and Services (15 hours)**

- 4.1: Concept – reason for growth in the employee’s benefits (K1, K2)
- 4.2: Key considerations (K2)
- 4.3: Components of wages and benefits structure – components of a benefit plan (K2, K3)
- 4.4: Benefit administering (K2, K3)
- 4.5: The Indian Constitution and Social Security – legislations (K2, K3)
- 4.6: Trends and issues.(K3, K4)

**Unit- V Pay Level and Market Competitiveness (15 hours)**

- 5.1: Pay for performance plans – concept – specific pay for performance plans (K1, K2)
- 5.2: Team incentives plans (K2, K3)
- 5.3: Gain-sharing plans (K1, K2)
- 5.4: Profit Sharing Plans - ESOPs – BBOPs (K2, K3)
- 5.5: Competitiveness – external competitiveness – labour market factor – product market factors  
organizational factors – relevant markets (K2, K3, K4)

## 5.6 Competitive pay policy alternatives (K2, K3)

## SEMESTER IV

### PEHRB20 - ELECTIVE III B - TRAINING AND DEVELOPMENT

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / III	PEHRB20	Training and Development	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. Impart the concept and approaches to training
2. Discuss the importance of training and development from a HR perspective.
3. Identify training plans and effectively implement them.
4. Define the different types of training.
5. Outline the different types of training delivery methods

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Understand the concepts, process, models and approaches involved in training

**CO2:** Explain the training design and interpret the various learning dimensions.

**CO3:** Apply training methods based on the nature of the groups.

**CO4:** Integrate various training methods in classroom and professional environment

**CO5:** Understand and apply the assessment and model of evaluation.

**SEMESTER -III**  
**PESSA20- ELECTIVE IV A - CLOUD COMPUTING**

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / III	PESSA20	Cloud Computing	Theory	Core Elective	6	3	100

**OBJECTIVES**

1. To enable the evolution and role of Cloud Computing in business integration.
2. To integrate Cloud architecture with various virtualized datacenters.
3. Able to understand Cloud architecture, design, development and implementation
4. To enable the students understand the concept of Grid Computing and Networking.
5. To get an idea on the concept Internet of things.

**COURSE OUTCOMES**

The learners will be able to

**CO1:** Understand how Cloud is evolved and will come out with good conceptual knowledge in Cloud Computing

**CO2:** Analyze the services, and platforms in Cloud

**CO3:** Come with awareness on various cloud providers

**CO4:** Attain knowledge of Gridding and networking

**CO5:** Enable the students to have a skill with Internet of Things

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

**Unit I –Introduction (15 hours)**

- 1.1 Cloud Computing Basics – Overview (K1, K2, K3)
- 1.2 Applications – Benefits (K1, K2, K3)
- 1.3 Limitations – Security Concerns (K1, K2, K3)
- 1.4 Clustering – Virtualization (K1, K2, K3)
- 1.5 Types of Cloud Services (K1, K2, K3)
- 1.6 Cloud Titans (K1, K2, K3)

**Unit II - Cloud Architecture over Virtualized Data Centers (15 hours)**

- 2.1 Cloud Computing and Service Models (K1, K2, K3)
- 2.2 Data Center Design and Interconnection Network (K1, K2, K3, K4)
- 2.3 Architectural Design of Compute and Storage Clouds (K1, K2, K3, K4)
- 2.4 Public Cloud Platform (K1, K2, K3)
- 2.5 Inter Cloud Resources Management (K1, K2, K3)
- 2.6 Cloud Security and Trust Management (K1, K2, K3, K4)

**Unit III -Cloud Programming and Software environment (15 hours)**

- 3.1 Services and Service Oriented Architecture (K1, K2, K3, K4)
- 3.2 Features of Cloud and Grid Platforms (K1, K2, K3, K4)
- 3.3 Programming support of Google App Engine (K1, K2, K3, K4)
- 3.4 Programming on Amazon AWS (K1, K2, K3, K4)
- 3.5 Programming on Microsoft Azure (K1, K2, K3, K4)
- 3.6 Emerging Cloud Software environment (K1, K2, K3)

**Unit IV -Grid computing and Peer to peer computing (15 hours)**

- 4.1 Grid Architecture and Services modeling (K1, K2, K3, K4)
- 4.2 Grid Application Trends and Security Measures (K1, K2, K3, K4)
- 4.3 Peer to Peer Computing Systems (K1, K2, K3, K4)
- 4.4 P2P Overlay Network and Properties (K1, K2, K3, K4)
- 4.5 Routing and Proximity- Fault tolerance (K1, K2, K3, K4)
- 4.6 Securing Overlays to Prevent DDoS Attack (K1, K2, K3, K4)

**Unit V -Ubiquitous cloud and Internet of Things (15 hours)**

- 5.1 Ubiquitous Computing - Cloud trends in supporting ubiquitous computing (K1, K2, K3)
- 5.2 Performance of distributed systems and cloud (K1, K2, K3)
- 5.3 Internet of Things Concepts (K1, K2, K3)
- 5.4 Enabling technologies for the Internet of Things (K1, K2, K3, K4)

5.5 Innovative applications of Internet of things (K1, K2, K3, K4)

5.6 Online social and professional networking (K1, K2, K3).

**Note:** Case studies for all units. (K5.K6)

**SEMESTER - III**  
**PESSB20 – ELECTIVE IV B - DIGITAL BUSINESS AND E COMMERCE**

Year/ Sem	Course Code	Title of the Course	Course Category	H/W	Credits	Marks
II / III	PESSB20	Digital Business and E Commerce	Core Elective	6	3	100

**OBJECTIVES**

1. To gain domain knowledge in all aspects of Digital and E-Commerce environment.
2. To enhance the technologies used in digital business.
3. To implement the conceptual and practical knowledge of E- CRM and E- SCM concepts in the workplace
4. To establish awareness of using digital payment methodologies from diverse aspects of technology.
5. To enhance various E- commerce strategies to master in the digital business environment.

**COURSE OUTCOMES**

The learners will be able to

**CO1:** Understand about emergence of E-commerce

**CO2:** Analyze various technologies used to develop digital business environment

**CO3:** Understand the concepts of E- marketing and Digital payment

**CO4:** Students adhere to the values and ethics relevant to the digital payment in business environment

**CO5:** Have knowledge to establish new strategies and master in E- Commerce.

CO5	L	M	H	M	H	M

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

## **Unit I - Introduction to E-Commerce**

**(15 hours)**

- 1.1 Emergence of the Internet – Emergence of the World Wide Web (K1, K2, K3)
- 1.2 Advantages and Disadvantages of E- commerce (K1, K2, K3)
- 1.3 BAM Model - Online Extension of a BAM Model (K1, K2, K3)
- 1.4 Transition of E-commerce in India – E-Transition Challenges for Indian Corporates (K1, K2, K3)
- 1.5 E- Business Models Based on Transaction Parties (K1, K2, K3, K4)
- 1.6 E- Business Models Based on Transaction Types (K1, K2, K3, K4)

## **Unit II - E-Commerce Enabling Technologies and E-Security**

**(15 hours)**

- 2.1 Digital Business concepts -Internet Client-Server Applications (K1, K2, K3)
- 2.2 Networks and Internets: Communication Switching (K1, K2, K3)
- 2.3 Developments in Transmission – Network Routers – The Internet Protocol Suite (K1, K2, K3)
- 2.4 Naming Conventions – URLs – Search Engines (K1, K2, K3)
- 2.5 Software Agents – Internet Service Provider (K1, K2, K3)
- 2.6 Information Security Environment in India (K1, K2, K3)

## **Unit III - Digital Business Ecosystems**

**(15 hours)**

- 3.1 E-Marketing: Traditional Marketing –Identifying Web Presence Goals (K1, K2, K3,K4)
- 3.2 The Browsing Behavior Model – Online Marketing – E-Advertising (K1, K2, K3, K4)
- 3.3 E-Payment Systems: Main Concerns in Internet Banking – People Drive Change – Digital Payment Requirements (K1, K2, K3, K4)
- 3.4 Digital Token-based E-payment Systems – Classification of New Payment Systems (K1, K2, K3, K4)
- 3.5 Properties of Electronic Cash – Cheque Payment Systems on the Internet (K1, K2, K3, K4)
- 3.6 Risk and E-Payment Systems- E Procurement (K1, K2, K3)

## **Unit IV - E-CRM & E-SCM**

**(15 hours)**

- 4.1 E-Customer Relationship Management: Introduction- Typical Business Touch Points(K1, K2, K3, K4)
- 4.2 CRM and workflow Automation – Customer Relationship Management System for a Bank (K1, K2, K3)
- 4.3 Social Media Marketing (K1, K2, K3, K4)
- 4.4 E-Supply Chain Management: Supply Chain – Fulfilling Customer’s Needs – Smart Chains, Smarter Gains (K1, K2, K3,K4)
- 4.5 SCM in Wal-Mart World – The pay-off –Seven Ways to Reduce Inventory –E-SCM Provides “Real-time”Benefits(K1, K2, K3)
- 4.6 The Strategic Advantage - E-Supply Chain Components and Architecture –Major Trends in E-SCM (K1, K2, K3)

## **Unit V - Digital Business Web Design**

**(15 hours)**

- 5.1 E-Strategy: Information and Strategy- The Virtual Value Chain (K1, K2, K3)
- 5.2 Seven Dimensions of E-Commerce Strategy (K1, K2, K3)
- 5.3 Value Chain and E-Strategy (K1, K2, K3)
- 5.4 Planning the E-Commerce Project. (K1, K2, K3, K4)
- 5.5 Effective Web Design: Requirements of Intelligent Websites (K1, K2, K3)
- 5.6 Setting Website Goals and Objectives – Strategies for Website Development (K1, K2, K3)

**Note:** Case studies for all Units. (K5.K6)

## SEMESTER - IV

### PESSC20 - ELECTIVE IV C - DECISION SUPPORT AND BUSINESS INTELLIGENCE

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / IV	PESSC20	Decision Support and Business Intelligence	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. To gain domain knowledge in all aspects of Decision Support system and Business Intelligence.
2. To enhance the data mining skills
3. To implement the conceptual and practical decision making in the workplace
4. To establish awareness in various decision modeling technology.
5. To master in decision making skills to work in an organization as a team or to start an enterprise.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Enable the student to understand about decision support systems

**CO2:** Able to analyze various phases of decision making and components of decision support system

**CO3:** Understand the modeling approaches of decision making and can implement in their organization.

**CO4:** Be able to enhance the data mining skills by applying knowledge discovery

**CO5:** Master in decision making skills on analyzing the data warehousing and mining concepts.

CO5	M	L	H	M	H	L

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

**Unit I - Introduction to Decision Support Systems (15 hours)**

- 1.1 Introduction – Changing Business Environments and Computerized Decision Support (K1, K2, K3)
- 1.2 Managerial Decision Making – Computerized Support for Decision Making (K1, K2, K3)
- 1.3 An Early Framework for Computerized Decision Support – Concept of Decision support Systems (K1, K2, K3)
- 1.4 System View of Decision Support (K1, K2, K3)
- 1.5 Tools & Techniques of Managerial Decision Support (K1, K2, K3)
- 1.6 Implementing Computer Based DSS–Models (K1, K2, K3)

**Unit II - DSS Phases & Components (15 hours)**

- 2.1 Phases of the Decision Making Process: The Intelligent Phase – The Design Phase (K1, K2, K3, K4)
- 2.2 The Choice Phase – The Implementation Phase (K1, K2, K3, K4).
- 2.3 How are Decisions Supported DSS Configurations – Characteristics & Capabilities (K1, K2, K3, K4)
- 2.4 Components: The Data Management Subsystem – The Model Management Subsystem (K1, K2, K3, K4)
- 2.5 The User Interface Subsystem – The Knowledge Based Management Subsystem (K1, K2, K3, K4)
- 2.6 The Decision Support System: User- Hardware (K1, K2, K3, K4)

**Unit III - DSS: Modeling & Analysis (15 hours)**

- 3.1 Management Support Systems Modeling – Static & Dynamic Models (K1, K2, K3, K4)
- 3.2 Static & Dynamic Models- Certainty, Uncertainty & Risk V
- 3.3 Management Support Systems Modeling with Spreadsheets – Decision Analysis with Decision Tables & Decision Trees (K1, K2, K3, K4)
- 3.4 The Structure of Mathematical Models – Mathematical Programming Optimization (K1, K2, K3, K4)
- 3.4 Multiple Goals, Sensitivity Analysis, What – IF Analysis & Goal Seeking (K1, K2, K3, K4)
- 3.6 Problem Solving Search Methods –Simulation (K1, K2, K3, K4)

**Unit IV - Introduction to Data Mining (15 hours)**

- 4.1 Introduction to Data Mining (K1, K2, K3, K4)
- 4.2 Knowledge Discovery (K1, K2, K3, K4)
- 4.3 Patterns that can be Mined (K1, K2, K3, K4)
- 4.4 Technologies used (K1, K2, K3)
- 4.5 Applications in data mining (K1, K2, K3)
- 4.6 Issues in Data Mining (K1, K2, K3)

**Unit V - Introduction to Data Warehousing (15 hours)**

- 5.1 Data Warehouse Basic Concepts –Difference between Operational Database and Data ware house (K1, K2, K3, K4)
- 5.2 Data Warehousing A multitier Architecture – Data Warehouse models Enterprise Warehouse, Data mart and Virtual Ware house - Meta data repository (K1, K2, K3, K4)
- 5.3 Data Warehouse Modeling : Data Cube (K1, K2, K3, K4)
- 5.4 Data Warehouse Modeling OLAP (K1, K2, K3, K4)
- 5.5 Data Warehouse Design- Business Analysis Framework- Design Process (K1, K2, K3, K4)

## 5.6 Data Warehouse Usage for Information Processing – OLAP to Multidimensional Data mining (K1, K2, K3, K4)

**Note:** Case studies for all Units. (K5.K6)

**HOSPITAL ADMINISTRATION SPECIALIZATION  
SEMESTER - III**

**PEHCA20 - ELECTIVE V A - HOSPITAL DESIGN AND OPERATION MANAGEMENT**

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / III	PEHCA20	Hospital Design and Operation Management	Theory	Core Elective	6	3	100

**OBJECTIVES**

1. To recognize the importance and need for planning of hospital services and the factors involved
2. To identify, differentiate and interrelate the steps and roles of various personnel involved in overall planning and implementation of the hospital
3. To identify, differentiate and evaluate the functions and requirements for clinical, engineering and support services in the hospital
4. To identify and plan for compliance of the hospital and services to legal requirements
5. To develop, organize and implement a hospital design plan

**COURSE OUTCOMES**

The learners will be able to

**CO1:** Understand and infer the importance of hospital planning and identify the factors influencing outcomes To identify, understand and differentiate the various steps involved in hospital planning

**CO2:** Understand, recognize and interrelate the steps involved in hospital planning

**CO3:** Gain the knowledge in the functions and requirements of various clinical services in the hospital

**CO4:** Understand the functions and requirements of various support services in the hospital

**CO5:** Be able to develop, plan and implement engineering services for the hospital.

**H-HIGH (3), M-MODERATE (2), L-LOW (1)**

**Unit 1: Introduction to Hospital Planning (15 hours)**

- 1.1 Market survey - Assessment of the demand and need for hospital services (K1, K2, K3, K4)
- 1.2 Factors influencing hospital utilization (K1, K2, K3, K4)
- 1.3 Steps In Hospital Planning: Need Assessment - Bed planning – Land requirements (K1, K2, K3, K4)
- 1.4 Project cost – Space requirements –Hospital drawings - Documents- (K1, K2, K3, K4)
- 1.5 Project management & implementation (K1, K2, K3, K4)
- 1.6 Project Management tools - Gantt chart and other project planning tools (K1,K2,K3,K4)

**Unit 2: Hospital planning (15 hours)**

- 2.1 Principles of hospital planning(K1,K2,K3,K4)
- 2.2 Formation of Hospital Planning Team- Financial Planning (K1,K2,K3,K4)
- 2.3 Statutory legal requirements - Hospital planning (K1,K2,K3,K4)
- 2.4 Planning process – size of the hospital – site selection - Specialties – Bed allocation (K1,K2,K3,K4)
- 2.5 Human Resource in hospitals - Equipment planning - Conception to commissioning (K1,K2,K3,K4)
- 2.6 Site development - Construction of Hospital–Commissioning(K1,K2,K3,K4)

**Unit 3: Planning for Clinical services (15 hours)**

- 3.1 Planning, - Design layout - functional flow of clinical services (K1,K2,K3,K4)
- 3.2 Outpatient Services - Accident and Emergency (K1,K2,K3,K4)
- 3.3 Inpatient Services – Nursing services (K1,K2,K3,K4)
- 3.4 Hospital Infection Control(K1,K2,K3,K4)
- 3.5 Intensive Care Unit (K1,K2,K3,K4)
- 3.6 Operation Theatre - Day care (K1,K2,K3,K4)

**Unit 4: Planning for Support services (15 hours)**

- 4.1 Planning, Design, layout (K1,K2,K3,K4)
- 4.2 Functional flow of support services: Pharmacy (K1,K2,K3,K4)
- 4.3 Diagnostic labs - Radiology - Cath labs (K1,K2,K3,K4)
- 4.4 Physiotherapy - Blood bank - Central Sterile Supply Department (K1,K2,K3,K4)
- 4.5 Medical records - Hospital Information System (K1,K2,K3,K4)
- 4.6 Mortuary - Central Medical Gas System(K1,K2,K3,K4)

**Unit 5: Planning for Ancillary support services (15 hours)**

- 5.1 Planning, Design, layout (K1,K2,K3,K4)
- 5.2 Functional flow of ancillary support services(K1,K2,K3,K4)
- 5.3 Engineering Services (Biomedical Engineering, Mechanical Engineering & HVAC, Water Supply and Sanitary Service, Electrical Engineering, Civil Engineering) (K1,K2,K3,K4)
- 5.4 Communication Service - Biomedical Waste Disposal – Transport Service - Laundry Services - Dietary Service (K1,K2,K3,K4)

5.5 Administrative Services - Quality Services - House Keeping Department (K1,K2,K3,K4)

5.6 Hospital Maintenance – Estates management (K1,K2,K3,K4)

**Note:** Case studies for all Units. (K5.K6)

## SEMESTER - III

### PEHCB20- ELECTIVE V B - HOSPITAL MATERIALS AND EQUIPMENT MANAGEMENT

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / III	PEHCB20	Hospital Materials and Equipment Management	Theory	Core Elective	6	3	100

#### OBJECTIVES

- 1.To understand the structure and overall functioning of the materials management
- 2.To identify, differentiate and analyze the functions of materials management departments
- 3.To recognize, evaluate and design the inventory control system for economical functioning of the hospital
- 4.To categorize, plan and implement audits of inventory and materials system
- 5.To develop, organize and implement the materials management system in the hospital

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Understand and interpret the role of materials management in the hospital. To understand, recognize and interrelate the components of purchase system in materials management

**CO2:** Understand, recognize and interrelate the components of purchase system in materials management. To develop and critique a purchase system for the hospital

**CO3:** Understand, interrelate aspects, develop and critique the stores system for the hospital

**CO4:** Be able to plan and implement equipment purchase and utilization assessment systems

**CO5:** Recognize the importance of new technologies and trends in materials management and select the appropriate methods for sustainable economic and efficient functioning To plan and develop long term strategies for materials planning in the hospital.

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit – I Introduction****(15 hours)**

- 1.1 Material - Functions of materials management (K1,K2,K3)
- 1.2 Objectives of material management – Material management in health care (K1,K2,K3,K4)
- 1.3 Integrated material management – Myths and realities of material management (K1,K2,K3,K4)
- 1.4 Hospital Stores - Functions and types of hospital stores (K1,K2,K3,K4)
- 1.5 Planning of hospital stores – Indenting of stores – Duties of store keeper (K1,K2,K3,K4)
- 1.6 Control of stores – Location and layout - legal aspects of purchasing. (K1,K2,K3,K4)

**Unit – II Purchase and Procurement****(15 hours)**

- 2.1 Purchasing - Principles of purchasing – Purchase Cycle (K1,K2,K3,K4)
- 2.2 Fundamentals of purchasing – Advantages and disadvantages – Rules regarding purchase order (K1,K2,K3,K4)
- 2.3 Tender System & process – Types of contracts (K1,K2,K3,K4)
- 2.4 Inspection of articles – Payment terms
- 2.5 Registration of Vendors – Advantages and disadvantages -Centralization and decentralization (K1,K2,K3,K4)
- 2.6 Group purchasing –Purchase selection and audit committees (K1,K2,K3,K4)

**Unit – III Inspection and Stores****(15 hours)**

Store –Principles - Functions of store- Types of store (K1,K2,K3,K4)

- 3.1 Inventory - inventory control – Types of Inventory cost (K1,K2,K3,K4)
- 3.2 Types of Inventory Control Pareto analysis -ABC/VED/SDE/XYZ/HML/GOLF/MNG/SOS (K1,K2,K3,K4)
- 3.3 Analysis – Lead Time – Buffer stock – Reorder level – Economic Order Quantity (EOQ) – Ordering system – Bin system – Stock verification – Need (K1,K2,K3,K4)
- 3.4 Techniques. (K1,K2,K3,K4)
- 3.5 Types of Inventory Control systems (K1,K2,K3,K4)
- 3.6 Preventive measures- Condemnation and disposal (K1,K2,K3,K4)

**Unit – IV Equipment management****(15 hours)**

- 4.1 Equipment planning and selection – Steps in equipment selection (K1,K2,K3,K4)
- 4.2 Equipment utilization – Repair and maintenance of equipment (K1,K2,K3,K4)
- 4.3 Equipment audit - Equipment Planning and Procurement(K1,K2,K3,K4)
- 4.4 Importing – Import procedures - Import documentation(K1,K2,K3,K4)
- 4.5 Methods of payment – Letter of credit – Foreign currency-payments(K1,K2,K3,K4)
- 4.6 Planning and procurement of spares/accessories/consumables(K1,K2,K3,K4)

## **Unit – V Recent trends in Materials Management**

**(15 hours)**

- 5.1 Concept and frame work of Supply Chain management (K1,K2,K3,K4)
- 5.2 Logistics Management - concept of Just in time and central purchasing (K1,K2,K3,K4)
- 5.3 Integrated Materials Management – RFID - The Internet of Things (K1,K2,K3,K4)
- 5.4 Strategies for Hospital Equipment planning and Selection (K1,K2,K3,K4)
- 5.5 Quality improvement tools in stores management (K1,K2,K3,K4)
- 5.6 Innovation in warehouse and Distribution centers – Material data analytics (K1,K2,K3,K4)

**Note:** Case studies for all Units. (K5.K6)

## SEMESTER – IV

### PEHCC20- ELECTIVE V C - HOSPITAL QUALITY MANAGEMENT AND LEGAL ASPECTS

Year/ Sem	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II / IV	PEHCC20	Hospital Quality Management and Legal Aspects	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. To understand the structure and overall functioning of various healthcare systems
2. To identify, differentiate and analyze the functions of clinical and non-clinical departments in the hospital
3. To recognize, interrelate, differentiate, evaluate quality standards for hospital and design the an appropriate quality system to comply with standards
4. To plan and develop effective systems for legal compliance in hospital
5. To develop, organize and implement various clinical and non-clinical services in the hospital

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Understand and distinguish the role of management and healthcare indicators in the hospital

**CO2:** Understand, recognize and interrelate the functions of various clinical services in the hospital

**CO3:** Recognize and interrelate the functions of various non-clinical services in the hospital

**CO4:** Gain knowledge various aspects of quality in the hospital from the viewpoint of accreditation and certification

**CO5:** Understand the various legal requirements for hospitals and design effective methods to ensure legal compliance in the hospital.

CO4	M	H	M	M	L	L
CO5	H	M	M	H	M	H

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit 1: Quality Management & Safety****(15 hours)**

- 1.1 Principles of Quality Management (K1,K2,K3,K4)
- 1.2 Structure, Process and Outcome - Quality / Customer Service (K1,K2,K3,K4)
- 1.3 Quality Foundation, Tools and Techniques - Flow Chart Cause -Effect Diagram - Pareto Diagram  
Statistical Process Control - Healthcare Quality (K1,K2,K3,K4)
- 1.4 Business Process Reengineering & other relevant tools and techniques, Safety (K1,K2,K3,K4)
- 1.5 International Patient Safety Goals (IPSG) – Occupational Health (K1,K2,K3,K4)
- 1.6 Disaster management – Facility safety: Security - Fire hazards – Engineering Hazards – Radiological hazards. (K1,K2,K3,K4)

**Unit 2: Accreditation and Certification****(15 hours)**

- 2.1 ISO Certification - ISQua (K1,K2,K3,K4)
- 2.2 Accreditation – NABH - QCI - NABL – JCI (K1,K2,K3,K4)
- 2.3 Accreditation process – NABH Chapters (K1,K2,K3,K4)
- 2.4 Key Performance Indicators - Gap audit – Clinical audit (K1,K2,K3,K4)
- 2.5 Management audit – Audit process - Levels of accreditation (K1,K2,K3,K4)
- 2.6 Tools and methods used for quality assessment and sustainment for accreditation (K1,K2,K3,K4)

**Unit 3: Healthcare Laws****(15 hours)**

- 3.1 Clinical Establishments Act - Consumer Protection Act (K1,K2,K3,K4)
- 3.2 Medical Termination of Pregnancy Act- Prenatal Preconception Diagnostic Techniques Act (K1,K2,K3,K4)
- 3.3 Human Organ Transplantation Act – Pharmacy Act – Drugs and Cosmetics Act (K1,K2,K3,K4)
- 3.4 Biomedical Waste Management Handling Rules (K1,K2,K3,K4)
- 3.5 Registration of Births and Deaths Act (K1,K2,K3,K4)
- 3.6 Licenses/certificates to be maintained: lifts, boilers, pharmacies, biomedical waste disposal, blood bank, radiation related services, generator fuel etc. (K1,K2,K3,K4)

**Unit 4: Legal Aspects of Healthcare****(15 hours)**

- 4.1 Rights and responsibilities of patients (K1,K2,K3,K4)
- 4.2 Doctor patient contract - Law of torts(K1,K2,K3,K4)
- 4.3 Informed Consent – Confidentiality (K1,K2,K3,K4)
- 4.4 Medical Malpractice & Negligence (K1,K2,K3,K4)
- 4.5 Doctrines of jurisprudence in medical profession – Types of offences – Charge Sheet (K1,K2,K3,K4)
- 4.6 Evidence – Witness (K1,K2,K3,K4)

## **Unit 5: Ethical Aspects of Healthcare**

**(15 hours)**

5.1 Healthcare Ethics – Principles of Ethics (K1,K2,K3,K4)

5.2 Code of Conduct (K1,K2,K3,K4)

5.3 Irrational Drug Therapy (K1,K2,K3,K4)

5.4 Reproductive Medicine – Euthanasia (K1,K2,K3,K4)

5.5 Organ donation and transplantation – Alternative medicine (K1,K2,K3,K4)

5.6 Human experimentation - Technology (K1,K2,K3,K4)

**Note:** Case studies for all Units. (K5.K6)

## LOGISTICS SPECIALIZATION

### SEMESTER III

#### PELMA20 - ELECTIVE VI A – LOGISTICS MANAGEMENT

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / III	PELMA20	Logistics Management	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. The course provides the analytical framework for understanding the basic concepts and evolution of logistics.
2. Develop knowledge about the interconnectedness of packaging and logistics with the latest trends.
3. Develop knowledge about key elements of Containers.
4. Enhance analytical skills and capability to synthesize information related to logistics re-engineering.
5. Enhance and develop the skills on international logistics functions.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Analyze how logistical decisions (e.g., facilities, inventory, and transportation) impact the performance of the firm as well as the entire supply chain.

**CO2:** Analyze the strengths and weaknesses of packing and the emerging trends in the same.

**CO3:** Develop the strategies that can be taken to find the best paths to route vehicles to deliver and collect goods at multiple stops.

**CO4:** Develop strategies logistics reengineering and compete with the latest technology.

**CO5:** Know the basic characteristics of inbound and outbound logistics.

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit I : Introduction****(15 hours)**

- 1.1 Logistics: Definition, Evolution, Concept, Components (KI, K2, K3)
- 1.2 Importance, Objectives Logistic Subsystem, the work of Logistics (KI, K2, K3)
- 1.3 Integrated Logistics, Barrier to Internal Integration (KI, K2, K3)
- 1.4 Logistics as a Support/Interface/Enabler of Marketing function (KI, K2, K3)
- 1.5 Logistics as a Support function of Order Fulfillment (KI, K2, K3)
- 1.6 Assembling & Labeling from Multi storage points, Consignment convergence/divergence and Delivery. (KI, K2, K3)

**Unit II: Packaging****(15 hours)**

- 2.1 Packaging, Perspectives, Damage protection (KI, K2, K3, K4)
- 2.2 Material Handling efficiency / Utility, Product characteristics (KI, K2, K3, K4)
- 2.3 Unitization, Communication, Channel Integration, Alternative materials (KI, K2, K3, K4)
- 2.4 Traditional materials, Emerging Trends, The purposes of packaging (KI, K2, K3, K4)
- 2.5 The packaging industry: structure and dynamics, Returnable packaging (KI, K2, K3, K4)
- 2.6 General packaging principles, Retail logistics packaging, Fresh foods applications (KI, K2, K3, K4)

**Unit III : Containerization****(15 hours)**

- 3.1 Major container trades, Two container operators (KI, K2, K3, K4)
- 3.2 Container ships; terminals, Container distribution (KI, K2, K3, K4)
- 3.3 Container types, Non - containerizable cargo (KI, K2, K3, K4)
- 3.4 Features of containerization (KI, K2, K3, K4)
- 3.5 Container bases (KI, K2, K3, K4)
- 3.6 International Convention for Safe Containers.(KI, K2, K3, K4)

**Unit IV : Logistics Positioning****(15 hours)**

- 4.1 Logistics reengineering, Reengineering procedure, Logistics environmental assessment, Industry competitive Assessment (KI, K2, K3, K4)
- 4.2 Geo market differentials, Technology assessment, Material energy assessment, Channel structure (KI, K2, K3, K4)
- 4.3 Economic social projections, Service industry Trends (KI, K2, K3, K4)
- 4.4 Regulatory posture, Conclusion (KI, K2, K3, K4)
- 4.5 Time based logistics, alternative logistics strategies (KI, K2, K3, K4)
- 4.6 Strategic integration, Logistics time based control techniques (KI, K2, K3, K4)

**Unit V – International Logistics Functions****(15 hours)**

- 5.1 Introduction (KI, K2, K3, K4)
- 5.2 Outbound Logistics Functions (KI, K2, K3, K4)
- 5.3 Inbound Logistics Functions (KI, K2, K3, K4)
- 5.4 Overall Logistics Activities (KI, K2, K3, K4)
- 5.5 Logistics Intermediaries (KI, K2, K3, K4)

**Note: Case studies for all units. (K5.K6)**

## SEMESTER III

### PELMB20 - ELECTIVE VI B – EXPORT AND IMPORT MANAGEMENT

Year/Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / III	PELMB20	Export and Import Management	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. To impart the knowledge on the key functions in export and import process and procedures.
2. To provide understanding to the students on the various modes of logistics.
3. To educate the students in solving issues related to requirements in export and import management.
4. To educate the students in solving issues related to requirements in export and import management related to water carriers.
5. To know all the in depth functionalities of Air Carriers.

#### COURSE OUTCOMES

The learners will be able to

**CO1:** Remember the basics of global trade and import and export policies

**CO2:** Understand various import process and procedures and agencies involved in EXIM process and their role in the international trade

**CO3:** Acquire knowledge on the various modes of transportation.

**CO4:** Understand the payment methods, risks and various financing of water carriers.

**CO5:** Elaborate the procedures of Air Carriers.

CO4	H	M	H	L	M	L
CO5	H	M	M	L	M	L

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

**Unit I: Introduction (15 hours)**

- 1.1 Export & Import – Introduction (K1, K2, K3, K4)
- 1.2 Definitions - Evolution of Export & Import (K1, K2, K3, K4)
- 1.3 Foreign Trade (K1, K2, K3, K4)
- 1.4 Institutional Framework and Basics (K1, K2, K3, K4)
- 1.5 Multinational Organizations & Structure (K1, K2, K3, K4)
- 1.6 International Business Scenario (K1, K2, K3, K4)

**Unit II – Procedures In Customs Clearance And Documentation (15 hours)**

- 2.1 Export Procedures and Documents , Customs Clearance of Import and Export Cargo (K1, K2, K3, K4)
- 2.2 Methods and Instruments of Payment and Pricing (K1, K2, K3, K4)
- 2.3 INCOTERMS , Marine Insurance , Methods of Financing Exporters (K1, K2, K3, K4)
- 2.4 Export - Import , Documentation and Steps - Export (K1, K2, K3, K4)
- 2.5 Import Strategies and Practice, Export Marketing (K1, K2, K3, K4)
- 2.6 Business Risk Management and Coverage , Export Incentive Schemes (K1, K2, K3, K4)

**Unit III: Transportation (15 hours)**

- 3.1 Role of transportation ,Transport Decision (K1, K2, K3, K4)
- 3.2 Legal classification of carriers , Intermodal transportation (K1, K2, K3, K4)
- 3.3 Transportation management , Documentation (Domestic and International) , Bases for rates (K1, K2, K3, K4)
- 3.4 Transportation services , Characteristics of Modes of Transportation (K1, K2, K3, K4)
- 3.5 Characteristics of Shipping Industry , World Shipping (K1, K2, K3, K4)
- 3.6 Containerization and Leasing Practices. (K1, K2, K3, K4)

**Unit IV: Water Carriers (15 hours)**

- 4.1 Types of ships , Liners , Tramps , Specialized vessels and their trades (K1, K2, K3, K4)
- 4.2 Cargo stowage/packing overview, Stowage of cargo, Types and characteristics of cargo , Cargo and container handling equipment (K1, K2, K3, K4)
- 4.3 Types of packing, Dangerous cargo. , Export controls (K1, K2, K3, K4)
- 4.4 Customs tariff, Customs Freight Simplified Procedures (CFSP) (K1, K2, K3, K4)
- 4.5 New Export System (NES), Unique Consignment Reference (UCR) (K1, K2, K3, K4)
- 4.6 Customs reliefs, Importation and exportation of goods, Ship's papers, Ship's protest (K1, K2, K3, K4)

**Unit V: Air Carriers (15 hours)**

- 5.1 Types of Carriers, Private Carriers, For-Hire Carriers (K1, K2, K3, K4)
- 5.2 Market Structure, Number of Carriers, Characteristics, General (K1, K2, K3, K4)
- 5.3 Speed of Service, Length of Haul and Capacity-Accessibility and Dependability, Equipments (K1, K2, K3, K4)
- 5.4 Types of Vehicles, Terminals, Cost Structure Fixed Versus Variable Cost (K1, K2, K3, K4)
- 5.5 Components, Fuel, Labor , Equipment ,Economies of Scale/Economies of Density ,

Rates, Pricing (K1, K2, K3, K4)

5.6 Operating Efficiency, Current Issues, Safety, Security (K1, K2, K3, K4)

**Note:** Case studies for all units. (K5.K6)

## SEMESTER IV

### PELMC20 - ELECTIVE VI C - GREEN SUPPLY CHAIN AND LOGISTICS MANAGEMENT

Year/Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II / IV	PELMC20	Green Supply Chain and Logistics Management	Theory	Core Elective	6	3	100

#### OBJECTIVES

1. To provide foundational knowledge associated with the green supply chain.
2. To teach the implication of today's most pressing environmental issues.
3. To describe how the various green supply chain practices can actually save money, increases efficiency and reduce delivery time.
4. To understand the concepts of green manufacturing.
5. To have an indepth knowledge on environmental impact of green logistics.

#### COURSE OUTCOMES

The learners will be able to

- CO1:** Remember the basics of Green Supply Chain Management.  
**CO2:** Understand various procedures in ECO Design with its drivers.  
**CO3:** Acquire knowledge on green purchasing.  
**CO4:** Understand the concepts in green manufacturing and its challenges.  
**CO5:** Be aware on green logistics and its drivers.

CO2	H	L	M	L	H	M
CO3	H	M	M	L	M	L
CO4	H	M	M	M	M	L
CO5	H	L	L	L	L	H

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

## **Unit I Introduction**

**(15 hours)**

- 1.1 Introduction (KI, K2, K3)
- 1.2 Traditional Supply Chain and Green Supply Chain (KI, K2, K3)
- 1.3 Environmental Concern and Supply Chain (KI, K2, K3)
- 1.4 Closed-loop Supply Chain (KI, K2, K3)
- 1.5 Corporate Environmental Management, Green Supply Chain (GSCM) (KI, K2, K3)
- 1.6 Definition, Basic Concepts, GSCM Practices (KI, K2, K3)

## **Unit II Eco-Design**

**(15 hours)**

- 2.1 Design for the Environment (DFE) or Eco-Design (KI, K2, K3)
- 2.2 Eco-Design and Supplier Relationships (KI, K2, K3)
- 2.3 Definitions of Eco-Design (KI, K2, K3)
- 2.4 Tools of Product Eco-Design (KI, K2, K3)
- 2.5 Involving suppliers in product eco-design (KI, K2, K3)
- 2.6 Drivers, Challenges and Successful factors (KI, K2, K3)

## **Unit III Green Purchasing**

**(15 hours)**

- 3.1 Green Procurement and Purchasing (KI, K2, K3, K4)
- 3.2 Definitions of green purchasing (KI, K2, K3, K4)
- 3.3 Drivers of green purchasing (KI, K2, K3, K4)
- 3.4 Green purchasing strategies (KI, K2, K3, K4)
- 3.5 Green purchasing performance measurement (KI, K2, K3, K4)
- 3.6 Green Supplier Development and Collaboration. (KI, K2, K3, K4)

## **Unit IV Green Manufacturing**

**(15 hours)**

- 4.1 Green Manufacturing or Production (KI, K2, K3, K4)
- 4.2 Evolution, Definitions , 4Re's: recycling, remanufacturing, reuse and reduction (KI, K2, K3, K4)
- 4.3 Closed-loop Manufacturing (KI, K2, K3, K4)
- 4.4 ISO 14000 systems (KI, K2, K3, K4)
- 4.5 Life Cycle Analysis (LCA) (KI, K2, K3, K4)
- 4.6 Lean Manufacturing for Green Manufacturing or Production. (KI, K2, K3, K4)

## **Unit V Green Logistics and Transportation**

**(15 hours)**

- 5.1 Green Logistics and Transportation (KI, K2, K3, K4)
- 5.2 Definitions of Green Logistics (KI, K2, K3, K4)
- 5.3 Critical drivers of Green Logistics (KI, K2, K3, K4)
- 5.4 Green transportation and logistics practices (KI, K2, K3, K4)
- 5.5 Environmental impacts of transportation and logistics (KI, K2, K3, K4)
- 5.6 Closing the Loop: Reverse Logistics. (KI, K2, K3, K4)

**Note:** Case studies for all units. (K5.K6)

**Text Books**

## PCBAQ20– PROJECT

Year/Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks
II /IV	PCBAQ20	Project	Project	Skill Paper	6	6	100

### OBJECTIVES

1. To discover potential research areas in the field of specialization
2. To offer students a glimpse into real world problems and challenges
3. To motivate students to the vast array of literature available on the various research challenges in the organization
4. To enable students to use analytical techniques and to give solution for a problem
5. To improve the communication and management skills of the students

### COURSE OUTCOMES

The learners will be able to

**CO1:** Compare and contrast several existing solutions for research challenge

**CO2:** Formulate and propose a plan for creating a solution for the research plan identified

**CO3:** Conduct a survey of several available literature in the preferred field of study

**CO4:** Be able to report and present the findings of the study conducted in the preferred domain

**CO5:** Demonstrate an ability to work in teams and manage the conduct of the research study

CO5	M	H	H	L	H	H

**H-HIGH(3), M-MODERATE(2), L-LOW(1)**

## PCBAQ20– PROJECT

Each student is required to do a project and prepare the report on the basis of investigation carried out by her in an institution or industrial organization. The student is expected to identify a problem in the organization based on her area of specialization and provide solutions and suggestions to the management. The report should demonstrate the capability of the students in analyzing and evaluating the problem and to create original approach in providing solutions to the problem.

The project should include field studies, surveys, interpretation, planning and design of the research methodology presented in a comprehensive manner with recommendations for solutions based on scientifically worked out data and viva will be conducted on the basis of the report and presentation.

### Evaluation Pattern

- Each student should carry out her investigation separately.
- The mode of evaluating the student will consist of two parts. One, on the basis of report writing and the other will be through Viva Voce.
- The valuation of the project report writing will be done by the internal examiner while for the oral examination an external examiner will be called for.
- 60 marks will be awarded for project report writing, 20 marks for overall review and for oral examination 20marks.
- Project will be for a period of 3 months which will be during the month of February - April of every academic year.
- Each student should find a reputed industry to carry out her investigation with the approval of the department.
- Records should be maintained for daily activities signed by the concerned authorities in the organization
- Students should report to the college as per the schedule of the review meeting. Attendance will be maintained and marks are allotted for there view
- On completion of the project, the student should get Completion Certificate and Attendance Certificate from the company.
- Any change of the organization during the course of the project should be done only after getting the consent from the Head of the Department and the internal guide of the College in writing.

The following are the components for report writing

- |   |                                      |                          |
|---|--------------------------------------|--------------------------|
| • | Content                              | - 40Marks                |
| • | Methodology                          | - 10Marks                |
| • | Layout                               | - 5Marks                 |
| • | Grammar                              | - 5Marks                 |
| • | Review of the Project and Attendance | -20 Marks (CA – 80Marks) |
| • | Viva-Voce                            | - (Semester - 20Marks)   |
| • | Oral Presentation                    | - 10Marks                |
| • | Question and Answer                  | - 10Marks                |

## INDEPENDENT ELECTIVES

### INDEPENDENT ELECTIVE PAPER - 1

#### PIBAA20 - MANAGEMENT CONCEPTS IN THIRUKKURAL

Year/ Sem	Course Code	Title of the Course	Course type	Course Category	H/W	Credits	Marks

**Concurrent Field Work** is carried out on two days in a week for 12 weeks in a semester.

**Block Field Work** is carried out for 1 month (26 working days – 8 hours per day) after the completion of the University Examinations. A report of satisfactory completion of block field work by the agency and the department is required for course completion.

### 5. Field Work:

Concurrent field work is an integral part of the total programme of training in Social Work. Field Work programme consists of observation visits to the agencies, institutions and community settings, rural camp and direct practice of social work skills for intervention under the guidance of professional social workers in selected placements.

Placements provide an opportunity to the learner to apply theory to practice and gain first hand experience. Therefore, fieldwork in each semester is compulsory in this programme and a student is expected to have 100 percent attendance. A student should earn a total of 60 credits in 4 semesters in fieldwork.

In all the 4 semesters 2 working days per week shall be set aside for concurrent fieldwork of per week. Each semester will have a minimum of 24 days of concurrent fieldwork spread over 12 weeks. Block fieldwork is carried out for 1 month (26 days) (8 working hours per day) after the completion of the semester examinations. The credits allotted for Summer Placement and Internship Program are the additional credits earned by the students.

## Concurrent Field Work, Summer Placement and Internship Program (Block Placement)

Semester	No. of Days	No. of Hours	Credits
Field Work I	24	180	6
Field Work II	24	180	6
Summer Placement	26	180	5
Field Work III	24	180	6
Field Work IV	24	180	6
Block Placement	26	180	5
<b>Total</b>	<b>148</b>	<b>1080</b>	<b>34</b>

### 6. Research Project

Research Project Work is to be done during third and the fourth semesters.

Stage 1: Problem Formulation and Introduction.

Stage 2: Review of Literature.

Stage 3: Research Methodology.

Stage 4: Analysis and Interpretation.

Stage 5: Main Findings, Summary and Conclusion.

Examination Pattern of Research Project:

Continuous assessment:      Stage 1: 10 (Max. Marks)  
   Stage 2: 10 (Max. Marks)  
   Stage 3: 10 (Max. Marks)  
   Stage 4: 10 (Max. Marks)  
   Stage 5: 20 (Max. Marks)  
**Total : 60 (Max. Marks)**

Semester Examination:      Viva Voce.  
**Total : 40 (Max. Marks)**

CO5	H	M	H	H	H	H

(Low - L, Medium – M, High - H)

### Unit I:

(15 hours)

- 1.1 Social Disorganization : Definition and concept (K1,K2)
- 1.2 Social Pathology : Meaning, and concept (K1,K2)
- 1.3 Social problems : Meaning, definition and concept (K1,K2)
- 1.4 Social Deviance: concepts, nature, cause (K1,K2)

- 1.5 Characteristics of social problems and social deviance(**K3,K2**)
- 1.6 Problems resulting from catastrophes: fire, drought, flood, earthquake, war and influx of refugees. (**K2,K4,K3**)

**Unit II: (15 hours)**

- 2.1 Theories of social deviance: biogenic, Psychogenic and sociological (**K6, K4,K5,K3**)
- 2.2 Deviant Sub-culture and their interactions with normal society.( **K5,K4,K3**)
- 2.3 Poverty- concepts, causes, strategies effective measures for poverty alleviation (**K6,K5,K4,K2**)
- 2.4 Over population-Causes, effects, policy (**K6,K5,K4**)
- 2.5 Illiteracy--causes, National policy on education, Adult Education Program— (**K5,K4,K3,K2**)
- 2.6 Unemployment and underemployment- types, causes,consequences and measures taken (**K5,K4,K6,K2**)

**Unit III: (15 hours)**

- 3.1 Problems of vulnerable groups-Women, Child, Youth and Aged (**K5,K4,K2**)
- 3.2 Problems of ill housing and slums—(**K5,K4,K3**)
- 3.3 Morbidity and mortality-(**K6,K2,K4,K5**)
- 3.4 Communicable diseases-(**K6,K2,K4**)
- 3.5 AIDS- (**K6, K4,K2**)
- 3.6 Malnourishment and nutritional disorders (**K6,K4,K3**)

**Unit IV: (15 hours)**

- 4.1 Specially challenged meaning and concepts (**K4,K5,K2**)
- 4.2 Problems of the differently abled and the services available (**K6,K5,K4**)
- 4.3 Crime and correctional administration (**K6,K4,K2**)
- 4.4 Delinquency nature, Types and prevention (**K6,K5,K4,K2**)
- 4.5 Female infanticide—(**K5,K4,K3**)
- 4.6 Common problems street children, beggary,prostitution, LGBT-( **K5,K4**)

**Unit V: (15 hours)**

- 5.1 Problems of social stratification Scheduled caste, Tribe and denotified communities—(**K6,K5,K4**),
- 5.2 Alcoholism (**K6,K5,K4,K3**)
- 5.3 Drug addiction—(**K6,K5,K4.K3**)
- 5.4 Suicide ( **K6,K5,K3**)
- 5.5 Corruption ---(**K6,K4,K5**)
- 5.6 Impact of social media---(**K6,K5,K4,K2**)

## SEMESTER I

### PISWA20 - IEC- DISASTER MANAGEMENT

Year	SEM	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	I	PISWA20	Disaster Management	Theory	Core			100

#### COURSE OBJECTIVES

- To provide students an exposure to disaster management, their significance and types.
- To enhance the awareness of institutional processes in disasters.
- To ensure the students to understand the relationship between vulnerability, disaster, disaster prevention and risk reduction.
- To gain preliminary knowledge of Disaster Risk Reduction(DRR)
- To develop ability to respond to their surroundings with disaster response where they live.

#### COURSE OUTCOMES

After completion of the course the students will be able to attain the following outcomes  
**CO1** :Understanding of the process of Disaster Management and the various types of disasters.

**CO2**: Enhance the students to acquire knowledge on response to disasters and disaster cycle

**CO3**: Practice the role of the Social Worker in Disaster Management and legislation related to it

**CO4**: Equip themselves to work in disaster situations and Expose knowledge on the impact of disaster on individual and community

**CO5**: Develop skills to analyze the factors leading to disaster

CO4	M	H	H	H	H	H
CO5	M	M	H	H	H	H

(Low - L, Medium – M, High - H)

## **Unit I: Concept of Disaster Management**

- 1.1 Basic concepts of disaster management (K2,K1)
- 1.2 Definition: Disaster, Hazards, Vulnerability, Risks (K2,K1)
- 1.3 Disaster Types of disaster- natural and manmade disasters-(K3,K2)
- 1.4 Disaster risk Management (K2,K1)
- 1.5 Risk analysis techniques(K6,K5,K3)
- 1.6 Process and steps of Risk assessment. (K4,K2)

## **Unit II: Response to Disaster Management**

- 2.1 Emergency Response (K3,K2)
- 2.2 Crisis management (K2,K3)
- 2.3 Hazards vulnerability, (K2,K3)
- 2.4 Disaster Risk mitigation (K2,K1)
- 2.5 Response, Relief, Reconstruction, Rehabilitation. (K6,K4,K1)
- 2.6 Disaster cycle - Phase,Culture safety, Prevention, Mitigation and Preparedness.(K5,K3)

## **Unit III : Legislation**

- 3.1 Government intervention (K5,K3,K1)
- 3.2 Institutional Mechanisms of Disaster Components of disaster. (K4,K3)
- 3.3 Water, Food, Sanitation, Shelter, Health Institutional Arrangements(K4,K2)
- 3.4 Disaster relief Management Acts (K5,K4,K3)
- 3.5 Policies, Plan for relief (K3,K2,K1)
- 3.6 Programmes and legislation.(K5,K3,K2)

## **Unit IV: Disaster risk management**

- 4.1 Hazards risk management Climate Changes and variability (K2,K1)
- 4.2 causes, impacts of climate changes (K2,K1)
- 4.3 Pollution - Air Pollution, Water Pollution, Soil Pollution. (K2,K1)
- 4.4 Relevance and Disaster risk (K2,K4)
- 4.5 Urban rural risk management(K5,K2,K1)
- 4.6 Role and Responsibilities of community, Panchayat raj institution/ Urban Local bodies. (K6,K4,K3,K2)

## **Unit V: Risk Assessment**

- 5.1 Industrials Hazards risk management process, (K4,K2,K1)
- 5.2 Natural hazard/ risk assessment, (K4,K2,K1)
- 5.3 Understanding climate risk, Mapping of risk assessment, (K6,K2,K1)
- 5.4 Decision making for risk reduction, Problems in risk assessment, (K5,K2)
- 5.5 Activities and roles of the community action on Risk reduction, (K3,K2)
- 5.6 Participatory risk assessment ,Participatory risk assessment methods.(K6,K2)

CO1	H	M	H	M	H	M
CO2	M	H	M	H	M	H
CO3	H	M	H	M	H	M
CO4	H	H	H	H	M	M
CO5	H	H	H	H	H	H

(Low - L, Medium – M, High - H)

The students are involved in supervised visits to a minimum of 15 agencies. NGO's, Hospitals, Industries and Government welfare agencies are visited with the purpose of observing and learning the administrative structure, aims & objectives, general, specific and welfare activities.

In addition the students are taken on a 10 days Rural camp during which they stay in a selected village and study the community living, develop rapport, do a statistical survey, identify specific social problem, organize and conduct an awareness program.

During observation visit students are expected to prepare a field work report for every agency and submit. During rural camp daily activity report and a comprehensive report is prepared and submitted. Regular review conferences are conducted by the field work supervisor. At the end of the semester a viva is conducted by an external examiner and marks are awarded.

Objectives of the Camp:

1. Living out experience
2. Learn, understand and accept different cultures.
3. Learn about basic research methods.
4. Learning skills in PRA methods.
5. Organizing and conducting awareness programmes.

Schedule of the camp:

1. Meeting community leaders and getting help and cooperation in the camp.
2. Observing and familiarizing a new community.
3. Meeting families and building rapport.
4. Preparing a systematic study of the village.
5. Collection of relevant information.
6. Organizing and using PRA tools.
7. Arriving at a community diagnosis.
8. Organizing and conducting awareness program.
9. Organizing small group activities.
10. Feedback and arranging follow up of community organization and development.

## SEMESTER II

### PCSWE20 - HUMAN GROWTH AND PERSONALITY DEVELOPMENT

Year	SEM	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PCSWE20	Human Growth and Personality Development	Theory	Core	5	4	100

#### COURSE OBJECTIVES:

- To obtain an understanding of human behaviour in relation to the society.
- To equip the students of social work with understanding of human behaviour and personality development models.
- To introduce the students to the various fields of Psychology.

#### COURSE OUTCOME

After completion of the course the students will be able to attain the following outcomes.

**CO1:** Summarize the relevance of psychology for social work practice

**CO2:** Understand the psychological bases and processes involved with cognition, learning, behavior and personality development

**CO3:** Obtain an insight to factors contributing to development of personality

**CO4:** Explore the concept of social psychology and application of psychological tests.

**CO5:** Explore the developmental stages of life from a psychological perspective.

## SEMESTER II

### PCSWF20 – SOCIAL WORK RESEARCH

Year	SEM	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
I	II	PCSWF20	Social Work Research	Theory	Core	5	4	100

#### COURSE OBJECTIVES

- To understand the nature and importance of the scientific method and appreciate the principles of social work research
- To develop the capacity to independently conceptualize a problem and execute research
- To develop technical competency to assess and analyze social problems, needs and services
- To face the challenge in solving the unsolved social problems
- To develop analytical skills among students

#### COURSE OUTCOMES

After completion of the course the students will be able to attain the following outcomes,

**CO1 :** Demonstrate, develop and understanding the capability to independently conceptualize a problem and execute research

**CO2 :** Provide clear plan of the research and understand framework of research methods and techniques through research design

**CO3 :** Analyzing the concept of Data Collection and Data Processing

**CO4 :** Demonstrate, understanding and mastery of the knowledge, values, skills relevant to research competencies.

**CO5 :** Appropriately apply statistical techniques in Social Work Research

CO5	M	H	H	H	H	H

(Low - L, Medium – M, High - H)

**Unit I: Social Work Research** (15 hours)

- 1.1 Meaning, Definition, (K2,K1)
- 1.2 Purpose of research (K2,K1)
- 1.3 Scope and limitations of research (K3,K2)
- 1.4 Quantitative and qualitative research – (K2,K1)
- 1.5 Steps in research process. (K4,K2)
- 1.6 Conceptualization, operationalization, variables. (K6,K4,K2)

**Unit II: Research Design** (15 hours)

- 2.1 Definition of Research design, Purpose of Research design (K2,K1)
- 2.2 Types of design: exploratory, descriptive, diagnostic and experimental design- (K3,K2)
- 2.3 Sampling: Definition for Sampling , Principles, types of Sampling (K3,K2,K1)
- 2.4 Procedure, universe and sample frame (K4,K2)
- 2.5 Selection of samples - measurements and its level – validity and reliability. (K6,K4,K3)
- 2.6 Rating Scale: meaning and uses (K5,K2)

**Unit III: Data Collection** (15 hours)

- 3.1 Sources and methods of data collection, primary and secondary source (K3,K2)
- 3.2 Methods of data collection, observation, and survey method, personal interview (K2,K1)
- 3.3 Interview: interview guide principles of interview (K4,K2)
- 3.4 Questionnaire: construction of questionnaire, types and format(K5,K2,K1)
- 3.5 Questionnaire their advantages and disadvantages (K6,K2,K1)
- 3.6 Data Processing: Content checking - editing Data - Clarification - Coding- Tabulation –Analysis – Presentation - Interpretation. (K3,K2,K1)

**Unit IV: Elements of Research** (15 hours)

- 4.1 Planning a research project: Project proposal (K6,K4,K1)
- 4.2 Problem formulation, framing objectives, defining concepts (K6,K1)
- 4.3 Hypothesis and its types, (K6,K5,K3)
- 4.4 Review of literature, research design, (K2,K3)
- 4.5 Sampling methods, data collection, (K4,K2)
- 4.6 Analysis, reporting.( K5,K4,K3)

**Unit V: Statistics** (15 hours)

- 5.1 Statistics: Meaning, uses and its limitations (K2,K1)
- 5.2 Measures of central tendency: mean, median, mode. (K6,K5,K3)
- 5.3 Dispersion: Range, Mean deviation- quartile deviation- standard deviation- coefficient of variation. (K6,K5,K3)
- 5.4 Test of significance: t” test , Chi square test. (K6,K5,K3)

5.5 Correlation: meaning, type and uses (K2,K1)

5.6 Karl Pearson's Coefficient of correlation- simple and rank correlation. (K5,K4,K2)

(Low - L, Medium – M, High - H)

**Unit I : Community** (15 hours)

- 1.1 Meaning (K1, K2)
- 1.2 Types (K1, K2)
- 1.3 Characteristics, (K1,K2,K4,)
- 1.4 Community Organization – Concept, Meaning, Definition, (K1,K2, K3)
- 1.5 Scopes, Principles - (K1,K2, K3)
- 1.6 Philosophy and its relevance (K1,K2,K3)

**Unit II: Process or Phases of Community Organization** ( 15hours)

- 2.1 Process or phases of Community Organization - Study and survey, (K2,K4,K5)
- 2.2 analysis, assessment, discussion, organization, (K2,K3,K4,K5)
- 2.3 action, reflection, modification, continuation K2,K3,K4)
- 2.4 Skills in Community Organization: Organizing, communication, training, consultation, (K1,K2,K3)
- 2.5 public relations, resource mobilization, liasoning, conflict resolution (K1, K2)
- 2.6 Models of Community Organization, locality development, social planning (K1,K2,K3)

**Unit III: Participatory Rural appraisal (PRA)** (15 hours)

- 3.1 History, Concept, principles, (K1, K2,K3)
- 3.2 Tools and techniques ( K2, K3,K4)
- 3.3 Methods of PRA- Social Mapping, Venn Diagram, Wealth Ranking, Seasonality Calender, Focus Group Discussion, Indepth Interviews, Key Informant Interviews..etc (K1, K2, K3,K4,K5)
- 3.4 Importance of participation and advantages, difference between PRA and RRA (K1, K2,K4)
- 3.5 Social Action – Definition, principles and scope (K1,K2)
- 3.6 Social Action as a method of social work. (K2,,K4)

**Unit IV: Strategies and Tactics:** (15hours)

- 4.1 Negotiation, advocacy, (K1, K2,)
- 4.2 Social networking ,conflict resolution (K1, K2,K3)
- 4.3 Pressure, individual contact (K1,K2,K3)
- 4.4 Conscientization, legal situation, violence (K2, K4)
- 4.5, Public relations, political organization (,K2,K4)
- 4.6 Collaborative – peace initiative. (K1,K2,K3)

**Unit V: Resource mobilization** (15 hours)

- 5.1 Resource mobilization – Concept, (K1, K2, K3)
- 5.2 people – the most valuable resources ( K2, K3)
- 5.3 process and steps involved in mobilizing community resources (K1, K2,K3,K4,K5)
- 5.4 Techniques and sources of fund raising (K1, K2,,K3,K4,K5,K6)
- 5.5 Corporate Social Responsibility (CSR) initiative – Swatch Bharath (K1,K2,K3)
- 5.6 Social activist – Anna Hazareh, Saul Alansky, Paulo Freire.(K1,K2)

CO5	H	H	H	H	H	H

(Low - L, Medium – M, High - H)

The students go for practice based social work for two days in a week and expected to spend a minimum of 16 hours per week in the field.

The students are placed in villages or hospitals or schools or NGOs or government offices of counseling centers of welfare organizations or service organization for a semester.

During the placement they have to practice all the primary methods of social work. On has to complete 5 cases in case work, one group following all the stages of group work practice with at least 10 sessions and in the community conduct common programmes or solve an issue of the community following the principles of community organization and social action.

Every week the students write a report of their activities and submit to the concerned fieldwork supervisors. The supervisors conduct individual and group conference regularly.

At the end of the semester viva is conducted by an external examiner and marks are awarded.

### **PPSWA20- SUMMER PLACEMENT**

During the summer holidays the first year students are instructed to go for one month (24 days) field placement training preferably in their respective field of specialization. The students are placed in appropriate agencies as per their specialization for a month.

During the placement the students are expected to learn about the vision, mission, philosophy, administration, strategies, programs, activities, achievements and also involve with the activities of the organization to whatever extent possible.

Students should get their daily activity sheet and daily records which should be submitted to the department. After successful completion of the placement the students are awarded only credits.

### SEMESTER III

#### PCSWI20- COMPUTER APPLICATIONS FOR SOCIAL WORK

Year	SEM	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	III	PCSWI20	Computer Applications for Social Work	Theory	Core	5	3	100

#### COURSE OBJECTIVES:

- To gain an understanding of the computer and its usage for social work.
- To enable them to realize the need to have suitable skills for the practice of Statistical package of social sciences.
- To make aware on the different functions of this package for research work.
- To know the features of operating system
- To understand the procedure to enter data through SPSS

#### COURSE OUTCOMES

After completion of the course the students will be able to attain the following outcomes,

**CO1** : Understand, implement, evaluate the basic applications of artificial intelligence

**CO2** : Identify, select, and apply the different tools in SPSS

**CO3** : Understand and develop the basic work of the SPSS and assess the needed data

**CO4** : Formulating the various statistical analysis to test different hypothesis

**CO5** : Analyze the significance of statistical application and data management system

(Low - L, Medium – M, High - H)

**Unit I: Fundamentals of a Computer (8 Hours)**

- 1.1 Meaning, characteristics, (K2,K1)
- 1.2 Types of Fundamental data (K2,K3)
- 1.3 Basic operations – input, storage, processing, output, ALU and control (K5,K3,K4)
- 1.4 Word processing – structure of word window, creating document, saving, opening, operating, printing, find and replace (K6,K5,K4)
- 1.5 Spread sheet – Cells, rows, columns - Creating, opening, saving and printing a spreadsheet, creating tables, charts and calculations (K4,K3,K2)
- 1.6 E-mail etiquette and Internet usage. (K5, K3)

**Unit II: Basics of Statistical Analysis (8 hours)**

- 2.1 Population, sample, case, case number, variable, variable level, types of variable, system missing value, scale of measurement, code sheet, types of statistics, statistical tests, types of analysis (K6,K5,K4)
- 2.2 Structure of SPSS window (K6,K5,K4)
- 2.3 Creating data file – define data, variable name, variable label values, value labels, editing data file, saving, printing and recording of data (K6,K5,K3)
- 2.4 Qualitative Data Analysis Software (K6,K4,K2)

**Unit III: Analysis of Data (8hours)**

- 3.1 Single frequency, bivariate analysis, charts and diagrams (K5,K4)
- 3.2 Editing of tables and charts, fixing tables and charts in word document
- 3.3 Interpretation of data (K5,K3)
- 3.4 Application of statistical calculation and test (K5,K4,K3)
- 3.5 measurement of central tendency, dispersion (K6,K5,K4)
- 3.6 chi-square test, “t” test. (K6, K4, K2)

**Unit IV: Data Creation (8hours)**

- 4.1 Practical: (K6)
- 4.2 Creating a document and use of various formatting facilities. (K6,K4, K3)
- 4.3 Create a spreadsheet and produce results. (K6,K4, K3)
- 4.4 Adding word table and Excel chart to power point. (K6,K4)
- 4.5 Creating data file, assigning names and values to variables and saving it. (K6,K3)

**Unit V: Statistical Application (8hours)**

- 5.1 Running a simple analysis to create a frequency table. (K6,K4, K3)
- 5.2 Creating charts for different variables. (K6,K3, K2)
- 5.3 Statistical application to obtain central tendency and dispersion values. (K5,K3,K2)
- 5.4 Creating two-way tables and to obtain chi square values. (K6,K4, K3)

**Books for Study and Reference:**

## **SEMESTER IV**

### **PCSWK20- RESEARCH PROJECT**

#### **COURSE OBJECTIVES:**

- To understand application of Social Work research
- To apply learning of research methodology, tools , techniques
- To undertake a research study on relevant social issues applying ethics and principles
- To consolidate, analyse and interpret data collected
- To understand and apply statistics where appropriate
- To apply skills in report writing in research and to provide workable solutions and effect social change

The students are placed under a supervisor for the research project work. The students start the project work in the third semester itself. Each student identifies a research problem, defines the problem, collect the review of literature, objectives, prepare a proposal, formulate the research problem and construct a tool for data collection.

After the completion of the third semester and before starting the fourth semester the students collect the data. In the fourth semester the students complete the data processing and complete the research study and submit the final copy of valuation.

At the end of the semester viva is conducted by an external examiner and the marks are awarded. (60 marks record by the supervisor and 40 marks for viva voce)

**SEMESTER IV**  
**PCSWL20- CONCURRENT FIELD WORK IV**

Year	SEM	Course Code	Title of the Course	Course Type	Course Category	H/W	Credits	Marks
II	IV	PCSWL20	Concurrent Field Work	Practical	Core	16	6	100

**COURSE OBJECTIVES**

- To enable the student to analyze and understand the social realities and factor influencing individuals in the contexts of the fields of specialization.
- To develop competence in analyzing the needs and problems of individuals, groups and communities and utilize the appropriate Social Work methods and approaches to address the needs.
- To apply the knowledge and skills of the methods according to the fields of specialization.
- To practice Social Work values, principles and ethical standards in working with hospitals, community and related agencies
- To identify and mobilize resources to fulfil needs of people in agencies and communities and to mobilize the community people to participate in the different programmes.
- To learn the skills of planning, implementing and evaluating one's work and to become aware of personal resources and potentials and use it to develop oneself professionally.

**COURSE OUTCOME**

After completion of the course the students will be able to attain the following outcomes.

**CO1:** Demonstrate ability to analyze the social situations of individuals, groups and communities.

**CO2:** Understand the role of organizations and practice the values, principles and ethics in fields of Social Work.

**CO3:** Work and Develop competency in identifying and applying the different methods of Social Work appropriately.

**CO4:** Identify and facilitate solutions of individual, group and community problems through the application of Social Work skills.

**CO5:** Demonstrate competency in planning, identifying and mobilizing resources to organize programmes and meet needs of different target groups.

CO5	H	H	H	H	H	H

**(Low - L, Medium – M, High - H)**

The second-year students during the third semester go for practice based social work for two days in a week and expected to spend a minimum of 16 hours per week in the field. The students are placed in villages or hospitals or schools or NGO's or Government offices or counseling centers or welfare organizations or service organizations or industries for a semester.

During the placement the students are expected to learn about the vision, mission, philosophy, administration, strategies, programs, activities, achievements and also involve with the activities of the organization to whatever extent possible.

The students also undertake any assignments given to them by the agency, they may also undertake any research for the organization.

Every week the students write a report of their activities and submit to the concerned fieldwork supervisor. The supervisor conducts individual and group conference regularly.

At the end of the semester viva is conducted by an external examiner and marks are awarded.

### **PPSWB20 – INTERNSHIP PROGRAM (BLOCK PLACEMENT)**

Immediately after the fourth semester written examination the students are placed for a month for compulsory Internship Program.

The students are placed in suitable agencies based on their specialization. The student has to be part of the organization and take part in all the activities of the organization and undertake the assignment given to them.

After completion of placement the student submits an activity sheet, daily reports which are assessed and certified by the department stating the successful completion of the placement. Only credits are awarded thereafter. If the performance of the student is not satisfactory the placement should be repeated.

---

## SEMESTER - III

### PGTRA20 - TEACHING AND RESEARCH APTITUDE

<b>Year: II</b> <b>Sem: III</b>	<b>Course Code</b> PGTRA22	<b>Title of the Course</b> Teaching and Research Aptitude	<b>Course Type</b> Theory	<b>Course Category</b> Core	<b>H/W</b>	<b>Credits</b>	<b>Marks</b> 40+60 =100
------------------------------------	-------------------------------	--	------------------------------	--------------------------------	------------	----------------	-------------------------------

#### **Unit I – Teaching and Research Methodology**

- 1.1 Teaching : Nature, objectives, characteristics and basic requirements
- 1.2 Learner’s Characteristics
- 1.3 Factor’s affecting teaching, methods of teaching, Teaching aids and Evaluation System
- 1.4 Research, meaning, characteristics and types
- 1.5 Steps of research and methods of research
- 1.6 Paper, article, workshop, conference and symposium, thesis writing, its Characteristics and format

#### **Unit II – Reading Comprehension and Communication**

- 2.1 Reading Comprehension
- 2.2 Passage to be set with questions to be answered
- 2.3 Communication, its nature, characteristics and objectives
- 2.4 Types and barriers of communication
- 2.5 Effective classroom communication
- 2.6 Mass media and society

#### **Unit III – Reasoning ability and Data Interpretation**

- 3.1 Number series and Letter Series
- 3.2 Codes, Relationships and Classification
- 3.3 Verbal Analogies, Inductive and Deductive Reasoning
- 3.4 Sources, acquisition and interpretation of data
- 3.5 Quantitative and Qualitative data
- 3.6 Graphical representation and mapping of data

## **Unit IV – Information and Communication Technology**

- 4.1 General abbreviations in ICT
- 4.2 ICT – Terminologies
- 4.3 Basics of Internet and Intranet
- 4.4 Basics of E-mail – Audio and Video conferencing
- 4.5 Digital Initiatives in Higher Education
- 4.6 ICT and Governance

## **Unit V – People Development and Environment**

- 5.1 Development and Environment
- 5.2 Human and environment interaction
- 5.3 Environmental issues
- 5.4 Natural and energy resources
- 5.5 Natural hazards and disasters
- 5.6 Environmental Protection Act and Action Plan

## SEMESTER II

(M.A./M.Sc./M.Com./M.B.A./M.S.W)

### PNHRA20 – HUMAN RIGHTS

Year: I	Course Code:	Title of the Course:	Course Type:	Course Category:	H/W	Credits	Marks
Sem: II	PNHRA22	Human Rights	Theory				100

#### Course Objectives:

1. To provide a perspective and foundation for a human rights culture among students.
2. To create awareness on the Indian legal system, rule of law and human rights perspective in India.
3. To equip students with knowledge about the human rights movements and new rights gained.

#### Course Learning Outcome:

After completion of the course the students will be able to attain the following Outcomes,

1. Obtain knowledge and understand about fundamental human rights
2. Understanding of the concepts of Indian constitution and to emphasize the importance of them.
3. Promote knowledge in understanding the concept of human rights and its significance to the present scenario
4. Able to sensitize students for the application of human rights to the various practice domains of the different profession
5. Develop an Understanding on Human Right based on different cultural aspects.
6. Promote awareness on the Indian legal system, rule of law, human rights related movements

#### Unit I: Introduction to Human Rights

- 1.1 Human Rights – Introduction
- 1.2 Meaning and definition
- 1.3 Origin and Development
- 1.4 Elements of Human Rights
- 1.5 Kinds of Human Rights -Civil and Political rights
- 1.6 Social ,Economic & Cultural rights

#### Unit II: Indian Constitution and Human Rights

- 2.1 Indian Constitution -Meaning- Definition, Classification
- 2.2 Features of India Constitution, Federalism
- 2.3 Preamble, Fundamental Rights
- 2.4 Directive Principles of State policy
- 2.5 Right to constitutional Remedies, PIL, Different Courts

2.6 Constitution of Human Rights Court, Right to Information Act, 2005(RTI)

### **Unit III: Universal Declaration and International Covenants on Human Rights**

- 3.1 Universal declaration – Meaning & concepts
- 3.2 Provisions of universal declaration of Human Rights
- 3.3 Effects and influence of Universal Declaration
- 3.4 Distinction between the Indian constitution and Universal Declaration
- 3.5 International covenants on civil & Political Rights ,1966 (ICCPR)
- 3.6 International covenants on Economic, social and cultural rights, 1966 (ICESCR)

### **Unit IV: United Nations and Human Rights**

- 4.1 Provisions relating to human rights under UN charter
- 4.2 Through principal organs, UN Commission on Human Rights
- 4.3 UN charter based institutions, UN specialized Agencies
- 4.4 Human Rights and Domestic Jurisdiction
- 4.5 United Nation Convention against Torture (UNCAT)
- 4.6 Convention on the Protection of the Migrant Workers

### **Unit V: Human Rights and Different Policies**

- 5.1 Anti-Human Trafficking and Protection of Human Rights Act,1993
- 5.2 Policies and Acts, National Policy for Children 2013, Juvenile Justice Act 2000,
- 5.3 POCSO Act 2012, Criminal Procedure and Amendment Act 2013,
- 5.4 National Policy for Empowerment of women 2001, The Sexual Harassment of Women at Workplace Act 2013,
- 5.5 National Human Rights commission, State Human Rights Commission
- 5.6 Farm Bill 2020, CAA,NRC,NPR, New Educational Policy 2020.

### **Reference Items: Books, Journal**

- 1. Protection of Human Rights Act, 1993.

**AUXILIUM COLLEGE (Autonomous)**  
**(Accredited by the NAAC with A+ Grade with a CGPA of 3.55 in**  
**the 3<sup>rd</sup> Cycle) Gandhi Nagar, Vellore – 632 006**

**ACADEMIC PROGRAMME – REGULATIONS (PG)**

**With effect from the Academic Year 2021 - 2022**

Auxilium College, an autonomous institution, follows the Semester pattern with Choice Based Credit System (CBCS) of evaluation, requiring 3 years of study for an Undergraduate Degree Programme and 2 years of study for a Postgraduate Degree Programme. The duration of a semester is 90 days of instruction.

The CBCS offers internal assessment, inter-departmental academic collaboration and course credits. It offers freedom to the departments to design the course structure, to frame rules pertaining to academic programmes and also to introduce new study programmes. It aims at making the academic programme student-oriented, interdisciplinary, flexible and relevant to the times. Under this system, the students will have ample freedom to select the electives to suit their interest, aptitude and needs.

A curriculum is a programme of studies and/or activities (curricular, co-curricular and extra curricular). Arising from the basic needs and moving on to individual, social and cultural needs, the curriculum attempts to fulfill the ideal needs also, such as moral, intellectual, aesthetic and spiritual needs.

### **Credit System**

The Autonomous status of the College offers a student the benefits of Choice Based Credit System. Every paper is allotted a certain number of credits. A student is awarded the specified credits on obtaining a pass in the respective paper.

The student has abundant opportunities during the course of study to obtain additional credits by doing Optional Certificate Courses offered by different Programmes of the College. This facility will strengthen the academic potential of the student, as it provides flexibility in the choice of courses offered beyond the framework of the respective discipline of study. The introduction of the CBCS ensures compatibility with the academic norms practiced in other educational institutions of repute in India and abroad.

The structure of undergraduate programmes provides a wide range of choice for students to opt for courses based on their eligibility, aptitude and career goals. The undergraduate curriculum will include the following categories of courses in order to accomplish a holistic approach to undergraduate education.

**Structure of Postgraduate Degree Programmes as  
per R.C. No. 2909/M1/08 dated 02.05.2008**

**(a) Core Courses**

**(b) Major Electives**

**(c) Human Rights**

**(i) Core Course**

Each Programme has a set of Core courses spread over four Semesters. The syllabi of the Core courses will help the student to acquire an in-depth knowledge in the course and to stay abreast with the recent developments in the respective discipline. This Programme includes Project work.

**(ii) Major Electives**

Each department offers a course in Major electives which consists of three/four papers spread over the course of study.

**(iii) Human Rights Education**

A course in Human Rights Education is offered in the II Semester. It is mandatory for every student to obtain a pass in this Paper.

**(iv) Teaching and Research Aptitude**

A course in Teaching and Research Aptitude is offered in the III Semester. It is aimed to assess the teaching and research capabilities of the students. Common classes will be held outside normal working hours.

**(v) Independent Elective course**

It was made mandatory for all the Pg Students to take up one independent elective course every semester with effect from 2018 onwards.

**(vi) Online Course**

Each semester a student should complete one course conducted by -----  
This is to make the student gain more knowledge other than their own courses.

**Medium of Instruction and Examination**

The medium of instruction and examination will be English.

**Distribution of Hours:**

Postgraduates: 15 Weeks/Semester

Course	Hours/Week				Total Credits
	Sem I	Sem II	Sem III	Sem IV	
Core (Including Practical and Project)	25	23	25	25	65

<b>Major Electives</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>	<b>20</b>
<b>Human Rights</b>	-	<b>2</b>	-	-	<b>2</b>
<b>Teaching and Research Aptitude</b>	-	-	-	-	<b>3</b>
<b>Total</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>30</b>	<b>90</b> <b>Credits</b>

### Requirements of Attendance

1. The minimum requirement of attendance for a candidate is 75% per semester, to enable her to appear for the Semester Examinations.
2. If the attendance of a candidate is between 65 - 75%, due to any of the following reasons, the candidate is eligible to appear for the current Semester Examinations only after obtaining condonation from the Principal, by payment of the prescribed Condonation Fee:
  - a. Prolonged illness
  - b. Major surgery**
  - c. Accident, which requires a long period of rest**

The reason for the long period of absence should be informed to the Principal and the sanction obtained, within a week from the commencement of absence.

If the attendance of a candidate is between 50% - 65% in a semester, she is not eligible to appear for the current Semester Examinations. But she is permitted to appear for the arrear courses, if any. She is also permitted to move to the next Semester.

If the attendance of a candidate is below 50%, she is not eligible to continue her studies but can complete the Programme by re-joining the same Semester in the following academic year, if vacancy is available. She should obtain the approval from the University through the concerned Head of the Department and the Principal.

## **TESTING, ASSESSING AND VALUATION**

There are two components in the Valuation and Assessment of a student - Internal and External. These are implemented through

1. Continuous Assessment (CA) during the Semester for 40 marks. It consists of two written tests and an innovative component.
2. Semester Examination (SE) at the end of the Semester for 100 marks which will be converted to 60.

The maximum marks for each Paper shall be 100.

Each Postgraduate Programme consists of four Semesters.

### **Continuous Assessment (CA):**

1. The Continuous Assessment of each student will be done by the respective Departments.
2. Each written test is of two hours duration for 50 marks. The tests will be conducted centrally. The average of two such CA is calculated for 35 marks.

3. The innovative component is for 5 marks, conducted during the class hours by the Staff member in charge of the course, in the form of assignments/ quiz/ seminars /presentations/Online/Open Book/Viva Voce/ Group work/ Mini Project/Exhibition, etc. The topic and time for submission/ presentation will be announced by the staff member in charge of the course in advance. Each student should explain and defend her presentation.
4. **Syllabus of not less than two units shall be included for each CA.**
  5. **A retest for CA will be conducted for a student only if a student is absent due to NSS/NCC/Sports camps on prior written permission obtained through the concerned staff member.**
  6. **There is no passing minimum for CA.**
  7. **There is no provision for improvement in CA.**

#### **Semester Examinations (SE)**

1. A student should register herself to appear for the Semester Examinations by payment of the prescribed fee.
2. The Semester Examinations will be in the form of a comprehensive examination covering the entire syllabus in each course. It will be of 3 hours duration, irrespective of the number of credits allotted to it.

#### **Valuation of Answer Scripts**

1. There shall be single valuation for Postgraduate Courses. The Panel of Examiners will consist of internal and external examiners.
2. The valuation will be centralised.
3. A student has a maximum period of five years from the Date of Admission to clear all the courses prescribed for the Programme at the time of her admission. After the fifth year, to complete the programme, the student has to appear for an examination in the same/equivalent paper offered under the revised syllabus structure.
4. Fraction of final marks in CA and SE shall be rounded off to the nearest integer.

***Revaluation***

1. A student can apply for the photocopy of answer scripts, if needed, on payment of the prescribed fee.
2. A student can apply for revaluation of any paper, on payment of the prescribed fee within the specified date. Receipt of the photocopy of the answer script is a pre-requisite for revaluation.

**Supplementary Examination**

After the declaration of the results of the final semester, a student who has only one paper in any semester can apply by the specified date, for Supplementary Examination, either for reappearance or for improvement. This facility is available only for those students who have not obtained a pass due to one paper. The examination will be conducted and results published within a month of the first publication of the result.

**Improvement:**

The facility to improve one's performance in any paper(s) is offered to all the students. A student, who wishes to improve her performance in any paper(s), may apply for the examination in the same, if the examination is conducted in that paper(s) during that particular semester/ Supplementary Examination.

This provision is available till the Supplementary Examination after the final semester examination.

**Note:**

A student can report any grievance regarding CA or SE, to the Controller of Examinations, who in turn, will present the same to the Examination Committee, chaired by the Principal.

**CA and SE for Laboratory and Practical Work**

CA		SE	
Components	Marks	Components	Marks
Performance during regular practicals	10	Record	10
Regularity and submission of Observation Notebook and Record	5	Practical Examination	45
Practical Examination	25	Viva Voce	5
<b>Total</b>	<b>40</b>	<b>Total</b>	<b>60</b>

**Passing Minimum:**

A candidate shall be declared to have passed in a course if she secures 50% and above in the SE. If a candidate fails in any paper, she shall be required to appear only for the SE in the respective paper.

**Classification of Successful Candidates:**

**Conversion of Marks to Grade Points and Letter Grade:**

Range of Marks	Grade Points	Letter Grade	Description
90 - 100	9.0 – 9.5	O	Outstanding
80 – 89	8.0 – 8.9	D+	Excellent

75 – 79	7.5 – 7.9	D	Distinction
70 – 74	7.0 – 7.4	A+	Very Good
60 – 69	6.0 – 6.9	A	Good
50 – 59	5.0 – 5.9	B	Average
00 – 49	0.0	U	Re-appear
ABSENT	0.0	AA	ABSENT

### Calculation of Grade Point Average

Based on the grades obtained by a candidate, the Grade Point Average (GPA) is calculated as follows:

Grade Point Average (GPA) =

$$\frac{\sum C_i G_i}{\sum C_i}$$

i.e., GPA = Sum of the multiplication of  
Grade Points by

the credits of the  
courses Sum of  
the credits of the  
courses in a  
Semester

Where

$C_i$  = Credits earned for course  $i$  in any semester

$G_i$  = Grade Point obtained for course  $i$  in any semester

For the Entire Programme:

Based on the grades obtained by a candidate for the entire programme, the Cumulative Grade Point Average (CGPA) is calculated as follows:

Cumulative Grade Point Average (CGPA) =

$$\frac{\sum_{i=1}^n C_i G_i}{\sum_{i=1}^n C_i}$$

**i.e., CGPA = Sum of the multiplication of Grade Points by  
the credits of the entire programme  
Sum of the credits of the courses of the  
entire programme**

**Where**

**$C_i$  = Credits earned for course  $i$  in any semester**

**$G_{nj}$  = Grade Point obtained for course  $i$  in any semester**

**$n$  refers to the Semester in which such courses were credited.**

**The final classification is based on the following Grade Conversion Table:**

<b>CGPA</b>	<b>GRADE</b>	<b>CLASSIFICATION OF FINAL RESULT</b>
<b>9.5 – 10.0</b>	<b>O+</b>	<b>First Class with Exemplary *</b>
<b>9.0 and above but below 9.5</b>	<b>O</b>	
<b>8.5 and above but below 9.0</b>	<b>D++</b>	<b>First Class with Distinction *</b>
<b>8.0 and above but below 8.5</b>	<b>D+</b>	
<b>7.5 and above but below 8.0</b>	<b>D</b>	
<b>7.0 and above but below 7.5</b>	<b>A++</b>	<b>First Class</b>
<b>6.5 and above but below 7.0</b>	<b>A+</b>	
<b>6.0 and above but below 6.5</b>	<b>A</b>	
<b>5.5 and above but below 6.0</b>	<b>B+</b>	<b>Second Class</b>
<b>5.0 and above but below 5.5</b>	<b>B</b>	
<b>0.0 and above but below 5.0</b>	<b>U</b>	<b>Re-appear</b>

**\* The candidates who have passed in the first appearance and within the prescribed semester of the P.G. programme only are eligible.**

## Ranking of Successful Candidates

**Ranking will be based on CGPA. Candidates who passed in all the examinations prescribed for the Programme in the very first appearance only are eligible for ranking.**

### **Malpractices:**

**Resolved that the following norms be followed in dealing with the cases of malpractices in CA/Semester Examinations.**

<b>S.No.</b>	<b>Nature of Malpractice</b>	<b>Action Suggested</b>
<b>1.</b>	<b>Appeal by a candidate for favourable consideration or mercy in the answer script</b>	<b>Warn the candidate</b>
<b>2.</b>	<b>Letter of appeal for favourable consideration, promising bribe in cash or kind.</b>	<b>Cancel the examination taken in that particular Course only</b>
<b>3.</b>	<b>Candidate writing her own name in any part of the answer book</b>	<b>Warn the candidate</b>
<b>4.</b>	<b>Candidate writing her own Register Number in any part of the answer book other than on the front page</b>	<b>Warn the candidate</b>
<b>5.</b>	<b>Possessing notes or books relevant to the course of the examination</b>	<b>Cancel the examination taken in that particular Course only</b>
<b>6.</b>	<b>Possessing notes or books relevant to the course of the examination (repeated)</b>	<b>Cancel the examinations taken previously and not to allow to appear for the remaining</b>
		<b>examinations in that Semester</b>

7.	Using or copying from notes or books relevant to the course of the examination	Cancel the examination taken in that particular Course only
8.	Using or copying from the answer scripts of other candidates	Cancel the examination taken by both the candidates in that particular Course only
9.	Inserting pre-written answer sheet(s) brought from outside, in the main answer book.	Cancel the examinations taken previously and not to allow to appear for the remaining examinations in that Semester
10.	Threatening or assaulting the Invigilator or behaving in any insubordinate manner	Cancel the examination taken
11.	Manhandling or injuring any examination personnel	Cancel the examination taken
12.	Impersonation	Cancel the examination taken and debar from the examination for the next three years
13.	Tampering with spelling/ name/initials in any certificate	The candidate has to produce fresh certificates and a fine of 1,000/-
14.	Tampering with the Date of Birth in the certificate issued by the College	The candidates should not be permitted to appear for any examination of this College for a period of two years from the date of submission of documents and not to pursue any course of studies for the corresponding period
15.	Tampering with the Grade Certificate or any other Certificate issued by the College	The College will retain the tampered certificate and duplicate certificate will not be issued for three years from the date of presentation of documents. The candidate should not pursue any

		<b>course of studies in this College for the corresponding period</b>
--	--	---

**Important Note:**

**The decision of the Principal shall be final in all matters pertaining to the Academic Programme.**

**5.4 Formal Elements of Fiction:** Plot Construction, Narrative point of View, Characterization

**5.5 Formal Elements of Fiction:** Setting, Tone, Style, Symbolism and Irony.

**5.6 Close Reading & Critical Interpretation:**

To facilitate a deeper understanding of the period when the novel rose to dominate the literary marketplace, defining the form and its modes of representing the private lives of individuals. The critical reading includes the late eighteenth century which saw a medieval revival, in which writers venerated and imitated archaic language and forms. The important development of this movement was the Gothic novel, which typically features such forbidden themes as incest, murder, necrophilia, atheism, and sexual desire.

## PCENO20 - ENGLISH LANGUAGE TEACHING

<b>Year:</b> <b>II</b>	<b>Course Code:</b> PCENO20	<b>Title of the Course:</b> English Language Teaching	<b>Course Type:</b> Theory	<b>Course Category:</b> Main	<b>H/W:</b> <b>6</b>	<b>Credits:</b> <b>5</b>	<b>Marks:</b> <b>100</b>
<b>Sem - IV</b>							

### Course Outcomes (CO)

On Completion of the Course the Learners will be able to:

1. Identify approaches to enable language learning and establish the feasibility of following a bilingual approach for the teaching of English.
2. Create a resource bank of language teaching strategies, ideas and techniques to be used for English Language teaching.
3. Analyse the concepts that relate and integrate content and language instruction for language acquisition.
4. Evaluate the characteristics of the approaches to enhance performance for best outcomes in language learning.

5. Design activities that allow learners to practice academic language and to develop second language acquisition at the best of the student's ability.

**Unit I: Major trends in twentieth-century**

**(15 Hours)**

**Language teaching**

1.1 A brief history of early developments in Language Teaching

K1,K2

1.2 Interlanguage

K1, K2

From Rod Ellis. *Second Language Acquisition*. OUP.New Delhi. 2017

1.3 The Oral Approach and Situational Language Teaching	K2, K3
1.4 The Audiolingual Method	K2, K3
1.5 Whole Language	K2, K3
1.6 Multiple Intelligences	K2, K3

**Unit II: Current approaches and methods (20 Hours)**

2.1 Communicative Language Teaching	K2,K4
2.2 Competency-Based Language Teaching	K2,K3
2.3 Task-Based Language Teaching	K3,K4
2.4 Cooperative Language Learning	K3, K4
2.5 Content Based Instruction	K3, K4
2.6 Neurolinguistic Programming (NLP)	K3, K4

**Unit III: Alternative twentieth-century approaches and methods (15 Hours)**

3.1 The Natural Approach	K3.K4
3.2 Total Physical Response	K3, K4
3.3 The Silent Way	K3, K4
3.4 Community Language Learning	K3, K4
3.5 The Lexical Approach	K3, K4
3.6 The post-methods era	K3, K4

**Unit IV: Four basic Skills (LSRW) (20 Hours)**

4.1 Tasks for Language teachers, Using the Tasks	K5, K6
4.2 Carrying out small scale research in the classroom	K5, K6
Devising and evaluating Tasks	
4.3 Lesson Planning, Syllabus, Tests, Assessment	K5, K6
4.4 Practical Lesson management	K5, K6
4.5 Using Websites for Language Teaching	K4, K5
4.6 Micro-Teaching and Self Observation	K5, K6

**Unit V: Teaching Literature (20 Hours)**

5.1 Theories of Teaching Literature (pg 21-41)	K3, K4
5.2 Methods of Teaching Literature (Pg42-61)	K3, K4
5.3 Teaching Poetry (Pg62-78)	K4, K5
5.4 Teaching Drama (Pg79- 87)	K4, K5
5.5 Teaching Fiction (Pg88-102)	K4, K5
5.6 Teaching Literature in Dark Times	K4, K5

### **End-Semester Examination 100 Marks**

#### 1. Question Paper Pattern A:

Section A – Annotations 150 words – 4 questions out of 6 (4x5 = 20)

Section B – Short Answers - 300 words - either/or pattern (4x5 = 20)

Section C – Essays - 900 words - 4 questions out of 6 (4x15 = 60)

#### 2. Question Paper Pattern B:

Section A – Short Questions 80 words – 10 questions out of 12 (10x2 = 20)

Section B – Short Answers - 300 words - either/or pattern (4x5 = 20)

Section C – Essays - 900 words - 4 questions out of 6 (4x15 = 60)

#### 3. Question Paper Pattern C:

Independent Elective I A, II A, IIIA, IV A

Section A – (1x20 = 20)

Objective Type questions on Identification:

Section B – (1x20 = 20)

Objective Type questions on History and Theory of Literary Criticism:

Section C – (1x40 = 40)

Objective Type questions on Cultural and Historical Contexts:

4. Question Paper Pattern D:

Independent Elective – Course I B, II B, III, IV B

Answer any five questions out of 8 - 5x20=100

**PROGRAMME OUTCOME:**

On completion of the UG Programme, students will be able to:

**PO 1: SOCIAL CONTRIBUTION:**

excel as a socially committed individual having empathy for the needs of the society through value-based education.

**PO 2: ENVIRONMENT AND SUSTAINABILITY:**

enhance the theoretical and practical knowledge gained in the field of auditing, tax filing, and share market.

**PO 3: PROFESSIONAL ETHICS:**

apply ethical principles in promoting values and attitudes and become responsible towards the practice of accounting norms.

**PO 4: INDIVIDUAL AND TEAM WORK:**

function effectively as an individual and as a member or leader in teams strengthening group dynamics to achieve the common goals of the organisations.

**PO 05: LIFE-LONG LEARNING:**

recognize the need for and have the ability to engage in life-long learning process to cope up with the emerging trends in social, cultural, economic and technological changes.

**PO6: HIGHER KNOWLEDGE :**

Pursue higher knowledge, qualify professionally, enhance entrepreneurial skills and contribute towards the needs of the society.

**PROGRAMME SPECIFIC OBJECTIVE:**

Within few years of obtaining UG Degree in commerce, the students will be able to

**PSO 1. SUBJECT PROFICIENCY:**

succeed in obtaining employment appropriate to their interest in related fields and make a positive contribution in public practice, government, commerce and industry.

**PSO 2. PRACTICAL APPLICATION:**

Apply the practical knowledge gained over the years in the field of auditing, tax filing, share market and other finance related services

**PSO 3. PROFESSIONAL GROWTH:**

develop in their professional career through lifelong learning and excel as the fellow associates in the field of company secretaryship, chartered accountancy and business administration.

**PSO 4. MANAGEMENT SKILLS:**

Exercise leadership qualities and moral values through ethical ways with the concern for the society and the environment with team spirit to adapt to change throughout their professional career.

**PSO 5. ADDRESSING THE NEEDS OF THE NATION:**

Cater to the needs of the industry/society so as to contribute for the development of the nation.

**PSO6. ENTREPRENEURIAL SKILL:**

Enhance the Entrepreneurial skill, critical & creative thinking to thrive to be self-motivated and successful.

## Course Syllabus

### Unit I: Introduction to Accounting

(15 Hours)

- 1.1 Introduction, Meaning and Definition of Accounting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.2 Principles of Double entry (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.3 Basic Accounting Principles (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.4 Methods of Accounting concepts and conventions (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5 Accounting Equation (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6 Journal Entries, ledgers and Trial Balance (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit II: Subsidiary Books

(15 Hours)

- 2.1 Introduction to Subsidiary Books (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.2 Journal Proper and methods of subsidiary Books (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Methods of Purchases and purchases return Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Sales and its return Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Types of cash book Single, Double, Triple and analytical petty cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.6 Bills Receivable and Bills Payable Books (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit III: Bank Reconciliation Statement and Rectification of Errors

(15 Hours)

- 3.1 Need, Meaning causes for differences between cash book and pass book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.2 Method of preparation of Bank reconciliation statement (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Bank balance to be shown in balance sheet. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.4 Classifications of errors (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.5 Suspense Account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.6 Effect of Rectification (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit IV: Final Accounts

(15 Hours)

- 4.1 Introduction to Final Accounts (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Features and terms of manufacturing Account  
(Included stock of finished goods, raw material consumed etc) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Manufacturing Account (K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Trading Profit and Loss Account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Final accounts without adjustments (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.6 Final accounts with adjustments (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit V: Accounts of Non-Profit Organizations

(15 Hours)

- 5.1 Introduction to final Accounts of Non-Profit Organizations (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Preparation of Receipts and Payments Account (K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Preparation of Income and Expenditure Account. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4 Preparation of Receipts and Payments Account from Income and Expenditure Account  
And Balance sheet (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Preparation of opening and closing balance sheets from a given expenditure account and receipts and payment. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Final Accounts of Non-Profit Organisations (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Consumer protection Act**

**(6 Hours)**

- 1.1 Gandhi's Quote - Brief History (K<sub>1</sub>,K<sub>2</sub>)
- 1.2 Consumer Protection Act, 1986 (K<sub>1</sub>,K<sub>2</sub>)
- 1.3 Rights of Consumer (K<sub>1</sub>,K<sub>2</sub>)
- 1.4 United Nations Guidelines (K<sub>1</sub>,K<sub>2</sub>)
- 1.5 Responsibility of consumers (K<sub>1</sub>,K<sub>2</sub>)
- 1.6 Standard Certification Marks (K<sub>1</sub>,K<sub>2</sub>)

### **Unit II: Right to Information Act**

**(6 Hours)**

- 2.1 Meaning of Brand name, label, Package & Trade Mark (K<sub>1</sub>,K<sub>2</sub>)
- 2.2 Advertisements, print and Electronic Media (K<sub>1</sub>,K<sub>2</sub>)
- 2.3 Official records and citizen charter (K<sub>1</sub>,K<sub>2</sub>)
- 2.4 Meaning of right to Choose (K<sub>1</sub>,K<sub>2</sub>)
- 2.5 Platforms for consumer representation (K<sub>1</sub>,K<sub>2</sub>)
- 2.6 Consumer Protection Councils (K<sub>1</sub>,K<sub>2</sub>)

### **Unit III: Right to Redressal – 1**

**(6 Hours)**

- 3.1 Types of Grievances (K<sub>1</sub>,K<sub>2</sub>)
- 3.2 Remedies available under the Consumer Protection (K<sub>1</sub>,K<sub>2</sub>)
- 3.3 Restrictive Trade Practice Act, 1986 (K<sub>1</sub>,K<sub>2</sub>)
- 3.4 Unfair Trade Practice (K<sub>1</sub>,K<sub>2</sub>)
- 3.5 Pre-packed goods and unfair trade practices (K<sub>1</sub>,K<sub>2</sub>)
- 3.6 Advertising Standards Council of India (K<sub>1</sub>,K<sub>2</sub>)

### **Unit IV: Right to Redressal – II**

**(6 Hours)**

- 4.1 Definitions; goods, services, Consumer of Goods, consumer of Services, Complaint, complainant, consumer dispute, defect, deficiency, Appropriate laboratory, manufacturer (K<sub>1</sub>,K<sub>2</sub>)
- 4.2 Filing a complaint (K<sub>1</sub>,K<sub>2</sub>)
- 4.3 Procedure on receipt of complaint (K<sub>1</sub>,K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Appeals (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 4.5 District Forum, State Commission and National Commission (K<sub>1</sub>,K<sub>2</sub>)
- 4.6 Composition, Appointment, Term of office (K<sub>1</sub>,K<sub>2</sub>)

### **Unit V: Consumer Responsibilities and Case laws and other tips**

**(6 Hours)**

- 5.1 Responsibilities (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Critical Awareness – Social Responsibility (K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Environmental Awareness (K<sub>1</sub>, K<sub>2</sub>)
- 5.4 Solidarity (K<sub>1</sub>, K<sub>2</sub>)
- 5.5 Responsibilities in association with all the Rights (K<sub>1</sub>, K<sub>2</sub>)
- 5.6 Leading Case Laws (K<sub>1</sub>, K<sub>2</sub>)

5	H	M	M	H	H	M

**Low – L, Medium – M, High - H**

**Course Syllabus**

**Unit I: Single entry System**

**(15 Hours)**

- 1.1 Meaning, definition salient features, limitations and difference between double entry and single entry. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.2 Distinction between balance sheet and statement of affairs (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.3 Ascertainment of Profit & Net worth method (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.4 Computation of Conversion Method (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5 Calculation of missing items and appropriate accounts (K<sub>3</sub>, K<sub>4</sub>)
- 1.6 Calculation of missing figures and Balance sheet (K<sub>3</sub>, K<sub>4</sub>)

**Unit II: Average due Date and Account Current**

**(15 Hours)**

- 2.1 Meaning of average due date & Meaning & Definition of Account current (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Computation of where amount is lent in different installments/ Preparation of Account Current (K<sub>3</sub>, K<sub>4</sub>)
- 2.3 Determination of due date/ Calculation of Product Method and Red ink interest method (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.4 Average due date as basis for calculation of interest/ Calculation of interest table method and Daily Balance Method (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Interest on drawing of interest (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6 Where the amount is lent in a single installments/ Calculation of Époque method and varying interest method (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

**Unit III: Depreciation**

**(15 Hours)**

- 3.1 Concepts, Meaning, characteristics, causes and objectives of Depreciation. Basic factors affecting the amount of depreciation (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Methods of recording depreciation and exchange of used asset (K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Methods of providing depreciation straight line method, diminishing balance method (K<sub>2</sub>, K<sub>3</sub>)
- 3.4 Change in Method of depreciation, Annuity Method, Depreciation fund or sinking fund method. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

- 3.5 Computation of Insurance policy method Revaluation methods. (K<sub>2</sub>,K<sub>3</sub>, K<sub>4</sub>)  
3.6 Computation of Depletion method, machine hour rate method(K<sub>2</sub>,K<sub>3</sub>, K<sub>4</sub>)

**Unit IV: Accounting for Special Transactions I –**

**Joint Venture and Consignment**

**(15 Hours)**

- 4.1 Meaning and features of Joint venture and Consignment Distinction between Joint venture and Partnership and sale and consignment (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>, K<sub>4</sub>)  
4.2 Calculation of Accounting for joint Ventures when a separate book is kept Accounting treatment of consignment transaction(K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>, K<sub>4</sub>)  
4.3 Computation when separate set of book is not kept in joint venture & Journal entries in consignor's and consignee book (K<sub>3</sub>, K<sub>4</sub>)  
4.4 Computation of when each co-venture maintains a complete record of all the joint venture maintains a record of his own transactions (K<sub>3</sub>, K<sub>4</sub>)  
4.5 Computation of partial record method or memorandum joint venture method.  
4.6 Conversion of consignment into joint venture (K<sub>3</sub>, K<sub>4</sub>)

**Unit V: Accounting for special Transaction II -Bills of exchange(15 Hours)**

- 5.1 Bills of Exchange Introduction definition of bills of exchange features parties to bill of exchange. (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>, K<sub>4</sub>)  
5.2 Advantages and Disadvantages of bills of exchange types of Bills of exchange-accounting for Bills of exchange(K<sub>2</sub>,K<sub>3</sub>)  
5.3 Recording transactions in journal and ledger (K<sub>3</sub>, K<sub>4</sub>)  
5.4 Computation of Retiring bill under rebate (K<sub>3</sub>, K<sub>4</sub>)  
5.5 Dishonour of Bill and renewal of Bill. (K<sub>3</sub>, K<sub>4</sub>)  
5.6 Computation of Accommodation Bills and Trade Bills(K<sub>3</sub>, K<sub>4</sub>)

**Course Syllabus**

**Unit I: Branch Accounts:**

**(15 Hours)**

- 1.1 Meaning and objectives of Branch Accounts(K<sub>1</sub>,K<sub>2</sub>)
- 1.2 Types of branches – Dependent and independent Branch (Excluding Foreign Branches) (K<sub>1</sub>,K<sub>2</sub>)
- 1.3 Debtors system under Dependent Branch System. (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.4 Stock and Debtors System. (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 1.5 Wholesale Branch System(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 1.6 Final Accounts System(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)

**Unit II: Departmental Accounting:**

**(15 Hours)**

- 2.1 Meaning, need and advantages of Departmental Accounting(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 2.2 Distinction between departments and branches (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 2.3 Methods and techniques of Departmental Accounting(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 2.4 Allocation of expenses (K<sub>1</sub>,K<sub>2</sub>)
- 2.5 Inter departmental transfers at cost price (K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 2.6 Inter departmental transfers at selling price(K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit III: Hire Purchase and Instalment Systems:**

**(15 Hours)**

- 3.1 Meaning of Hire Purchase System, Distinction between Hire Purchase and Instalment System. (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 3.2 Accounting Treatment for Hire purchase system. (K<sub>1</sub>,K<sub>2</sub>)
- 3.3 Calculation of interest(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 3.4 Default and complete repossession (K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 3.5 Default and partial repossession (K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 3.6 Meaning and Accounting treatment of Instalment System (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit IV: Royalty Accounts:**

**(15 Hours)**

- 4.1 Meaning and its treatment in Final Accounts(K<sub>1</sub>,K<sub>2</sub>)
- 4.2 Technical terms used in Royalty Accounts(K<sub>1</sub>,K<sub>2</sub>)
- 4.3 Accounting treatment of entries in Royalty Accounts(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 4.4 Methods of recoupment of shortworkings and its Treatment (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)
- 4.5 Meaning of sub-lease and its Accounting Treatment (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)
- 4.6 Methods of recoupment of shortworkings and its treatment in sublease(K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>)

**Unit V: Investment Accounts:**

**(15 Hours)**

- 5.1 Meaning of Investment Accounts and its nature. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.2 Purchase and sale of investments and types of Securities(K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Cum-interest and Ex-interest quotations and its Accounting treatment. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.4 Fixed bearing securities and its interest Calculation with journal entries. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.5 Columnar investment accounts for fixed income bearing securities. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Columnar investment accounts for equity shares(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## Course Syllabus

### Unit I: Introduction: (15 Hours)

- 1.1 Definition of Cost, Costing, Cost Accountancy and Cost Accounting, Need, Scope and Objectives of Cost Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.2 Difference between Cost and Financial Accounting, Advantages and Limitations of Cost Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3 Classification of cost, Cost centre, Cost Units, Methods and Types of costing. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4 Elements of Cost, Preparation of simple cost sheet without inventories. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.5 Cost sheet with inventories and closing stock valuation. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6 Preparation of Tenders and Quotations. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit II: Material Control: (15 Hours)

- 2.1 Meaning, Need, Essentials, Advantages and Organisation of Material control (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Classification, codification of materials, inventory control and its techniques. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Economic Ordering Quantity – Problems. (K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Computation of Stock Levels. (K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Pricing of Materials (without returns and losses). (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.6 Pricing of Materials (with Returns and Losses). (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit III: Labour: (15 Hours)

- 3.1 Introduction, Types of labours, objectives and techniques. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2 Labour turnover methods, Causes, Measurements, Calculation of labour Turnover. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Time Keeping, Objectives, Essentials, Methods of Time keeping. (K<sub>1</sub>, K<sub>2</sub>)
- 3.4 Calculation of wages (Normal & Overtime). (K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Calculation of remuneration and incentives based on time (Time rate system). (K<sub>3</sub>, K<sub>4</sub>)
- 3.6 Calculation of Wages, Remuneration and Incentives based on Outputs. (Piece Rate system). (K<sub>2</sub>, K<sub>4</sub>)

### Unit IV: Overheads - I: (15 Hours)

- 4.1 Meaning -Definition and Importance of overheads-classification of overheads based on function. (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Classification of overheads based on behavior - classification based on elements. (K<sub>1</sub>, K<sub>2</sub>)
- 4.3 Codification of overheads - Departmentation of overheads. (K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Allocation of Overheads- Apportionment of Overheads-difference between Allocation and apportionment. (K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Primary distribution of overheads, Principles of apportionment, bases of apportionment. (K<sub>3</sub>, K<sub>4</sub>)
- 4.6 Primary distribution –Problems. (K<sub>3</sub>, K<sub>4</sub>)

### Unit V: Overheads – II: (15 Hours)

- 5.1 Secondary distribution - direct reapportionment method - Step ladder method (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Secondary distribution - Reciprocal services method (K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Secondary distribution - Repeated distribution method - Trial and Error method (K<sub>2</sub>, K<sub>3</sub>)
- 5.4 Absorption of overheads, Overheads rates, Types and Methods. (K<sub>2</sub>, K<sub>3</sub>)

5.5 Problems on Absorption (All Methods).( K<sub>3</sub>, K<sub>4</sub>)

5.6 Machine Hour rate.( K<sub>3</sub>, K<sub>3</sub>)

## Course Syllabus

### **Unit I: Introduction: Nature, Offer and Acceptance, Consideration (15 Hours)**

- 1.1 Definition, essential elements of a valid contract, Classification of contracts (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Offer, legal rules as to Offer (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 1.3 Acceptance, Legal rules as to Acceptance(K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 1.4 Communication of offer, acceptance and revocation(K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 1.5 Consideration, legal rules as to consideration(K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 1.6 Stranger to contract and exceptions (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)

### **Unit II: Capacity to Contract and Free Consent (15 Hours)**

- 2.1 Minor and minor's position as regard to agreement(K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 2.2 Persons of unsound mind and persons disqualified under law(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Coercion and undue influence(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Misrepresentation(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Fraud (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6 Mistake(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Legality of Object, Void agreements, Contingent contracts and Quasi-contracts (15 Hours)**

- 3.1 Unlawful objects and consideration, unlawful and illegal agreements (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Agreements opposed to public policy (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 3.3 Void agreements, void contracts, and restitution (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 3.4 Wagering agreements (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Contingent contracts (K<sub>1</sub>, K<sub>2</sub>,K<sub>3</sub>)
- 3.6 Quasi-contracts (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: Performance, Discharge and Remedies to breach of contract (15 Hours)**

- 4.1 Performance of contract (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2 Reciprocal promises, Appropriation of payments and assignment of contracts (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Discharge of contract by performance, agreement or consent, lapse of time (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Discharge by impossibility of performance, operation of Law, breach of contract (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Rescission and suit for damages (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6 Suit upon quantum meruit, specific performance, and injunction (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Contract of Agency (15 Hours)**

- 5.1 Definition, essentials and rules of Agency (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.2 Creation of Agency (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Classification of agents, delegation of authority (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.4 Relations of Principal and Agents (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.5 Relation of Principal with Third Parties (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.6 Termination of Agency (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

## Course Syllabus

### Unit I: Introduction

(15 Hours)

- 1.1 Business Communication, Meaning, Definition ((K<sub>1</sub>,K<sub>2</sub>)
- 1.2 Objectives, Process of Communication (K<sub>2</sub>,K<sub>3</sub>)
- 1.3 Importance of Communication (K<sub>2</sub>,K<sub>3</sub>)
- 1.4 Types of Communication (K<sub>2</sub>,K<sub>3</sub>)
- 1.5 Directions of Communications (K<sub>2</sub>,K<sub>3</sub>)
- 1.6 Barriers to Effective Communication (K<sub>2</sub>,K<sub>4</sub>)

### Unit II: Business Communication

(15 Hours)

- 2.1 Features of Business Communication (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Guidelines (The 7Cs) for Effective Business Communication (K<sub>1</sub>,K<sub>2</sub>, K<sub>3</sub>,K<sub>4</sub>)
- 2.3 Model Letters, Layout of Business Letter (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Features in Layout of a Business Letter, Need for Business Letter (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Functions of a Business Letter (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.6 Classification of Business Letter. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit III: Bank Correspondence

(15 Hours)

- 3.1 Guidelines for writing a complaint letter (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Drafting Complaint Letters regarding various issues to the authorities (K<sub>1</sub>, K<sub>3</sub>)
- 3.3 Essentials of Bank Correspondence (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.4 Letters from Customers to Bank, Opening of a Current Account (K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Requesting to Stop Payment, Extension of time for the repayment of a Loan (K<sub>1</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.6 Transfer of SB Account to another Branch, Wrong Debit in the Account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit IV: Report Writing

(15 Hours)

- 4.1 Reports, Importance (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Kinds, Effective Report (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Guidelines of Report writing (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Short Reports, Long Reports (K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Meetings (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.6 Agenda and Minutes (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### Unit V: Job Application

(15 Hours)

- 5.1 Job Application, Meaning, Important aspects, Advantages (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Drafting Job Application (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Resumes, Meaning (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.4 Types, Drafting (K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Model of Letters and Resumes (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6 Interviews, Guidelines (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

5	H	H	M	H	H	H

(Low – L, Medium – M, High –H)

## **Course Syllabus**

### **Unit I: Process Costing**

**(15 Hours)**

- 1.1. Introduction Features, costing procedures. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Special points in Process costing – Normal loss and scrap.( K<sub>1</sub>, K<sub>2</sub>)
- 1.3. Abnormal Loss, Abnormal Gain. (K<sub>1</sub>, K<sub>2</sub>)
- 1.4. Problems on Normal Process account. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5. Process Cost with Normal Loss and Normal Gain with Units. (K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Process Cost with Abnormal Loss and Abnormal Gain with Units. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Costing Methods**

**(15 Hours)**

- 2.1. Joint products – Meaning, Accounting for joint products, methods used in apportioning Joint cost. (K<sub>1</sub>, K<sub>2</sub>)
- 2.2. Problems on Joint products- Average Unit method, Physical Unit method, Survey method, Market value method. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.3. By-products – Meaning, Accounting for by-products, Methods used in apportioning By-products, Problems on By-products. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Job costing – Meaning, Features, Advantages, Limitations and procedures. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5. Batch costing – Elements of cost relating to batch, Economic Batch Quantity (EBQ). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6. Problems on Job costing and batch costing. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Contract Costing**

**(15 Hours)**

- 3.1. Meaning, features, Difference between contract costing and job costing. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Contract Costing, Problems on completed contract. (K<sub>3</sub>, K<sub>4</sub>)
- 3.3. Contract Costing – Treatment of plant. (K<sub>2</sub>, K<sub>3</sub>)
- 3.4. Incomplete Contracts. (K<sub>3</sub>, K<sub>4</sub>)
- 3.5. Incomplete contracts with laws. (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Multiple Contracts. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Transport Costing**

**(15 Hours)**

- 4.1. Meaning, Classification of cost, Selection of appropriate cost Unit. (K<sub>1</sub>, K<sub>2</sub>)
- 4.2. Computation of cost Unit. (K<sub>2</sub>, K<sub>3</sub>)
- 4.3. Calculation of cost for running distance. (K<sub>2</sub>, K<sub>3</sub>)
- 4.4. Passenger transport cost. (K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Goods transport Cost.( K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Comprehensive Problems. (K<sub>3</sub>, K<sub>4</sub> )

### **Unit V: Reconciliation Statement**

**(15 Hours)**

- 5.1. Introduction, Meaning and need for reconciliation. (K<sub>1</sub>, K<sub>2</sub>)
- 5.2. Reasons for difference in profit. (K<sub>1</sub>, K<sub>2</sub>)
- 5.3. Procedure of Reconciliation with format. (K<sub>2</sub>, K<sub>3</sub>)
- 5.4. Reconciliation statement – profit as per cost account and laws as per financial account. (K<sub>3</sub>, K<sub>4</sub>)
- 5.5. Reconciliation statement – profit as per financial account and laws as per cost account . (K<sub>3</sub>, K<sub>4</sub>)
- 5.6. Memorandum reconciliation statement. (K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Marginal Costing**

**(15 Hours)**

- 1.1 Meaning and definition of Marginal Costing (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Marginal costing and Absorption Costing (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3 Cost Volume Profit Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.4 Fixed cost and Variable cost (Important terms) ( K<sub>2</sub>, K<sub>3</sub>)
- 1.5 Contribution to Sales (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.6 Calculation of Break - Even Analysis (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Practical Applications of Marginal Costing**

**(15 Hours)**

- 2.1 Practical Applications of Marginal Costing for Managerial Decision Making (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Key Factors in Make or Buy Decision (K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Idle facilities and Plant Mergers (K<sub>2</sub>, K<sub>3</sub>)
- 2.4 Product Mix or Sales Mix (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Export decision - Product Elimination Decision (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Plant or Equipment Purchase Decision (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Standard costing and Variance Analysis**

**(15 Hours)**

- 3.1 Meaning of Standard Costing and Variance Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>4</sub>)
- 3.2 Advantages and Limitations of Standard Costing and Variance Analysis (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.3 Computation of Variances Relating to Materials (K<sub>1</sub>, K<sub>2</sub>)
- 3.4 Labour, Overheads and Sales based on Sales Value (Simple problems) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Standard Costs and Estimated Costs (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Applicability of Standard Cost (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: Capital Budgeting**

**(15 Hours)**

- 4.1 Meaning and definition of Capital Budgeting (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Difference between Traditional Methods and Non Traditional Methods (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Pay back accounting Rate of Return (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Profitability Index and Internal Rate of Return (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 Discounted Cash Flow Method (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6 N.P.V and I.R.R Method (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Responsibility Accounting and Zero Base Budgeting**

**(15 Hours)**

- 5.1 Meaning of Responsibility accounting and Zero Base Budgeting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.2 Essentials of Responsibility accounting (K<sub>1</sub>, K<sub>2</sub>)
- 5.3 Responsibility Centres (K<sub>1</sub>, K<sub>2</sub>)
- 5.4 Advantages and Limitations of Responsibility Accounting (K<sub>1</sub>, K<sub>2</sub>)
- 5.5 Cost centre and Profit centre (K<sub>1</sub>, K<sub>2</sub>)
- 5.6 Zero Base budgeting and process (K<sub>1</sub>, K<sub>2</sub>)

## **Course Syllabus**

### **Unit I: Introduction to E-Commerce (12 Hours)**

- 1.1 E-Commerce Meaning and Definition (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.2 Concept of Electronic Commerce (K<sub>2</sub>, K<sub>3</sub>)
- 1.3 Nature, Scope ( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4 Impact, challenges and limitations of E-Commerce (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5 Advantages of E-Commerce& Disadvantages (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6 Encryption and Decryption (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Aspects of E-Commerce (12 Hours)**

- 2.1 Evolution of E-Commerce (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2 Major categories of E-Commerce ( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Advertising and Marketing through internet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.4 Internet Advertising and models (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 2.5 Banner Advertisements (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.6 Sponsoring content and push based advertising (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Security in E-Commerce (12 Hours)**

- 3.1 Firewall and Securities (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.2 OSI Models (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Network security and Firewalls (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 3.4 Firewall & Protocols Types of Protocols (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Data and Message Security (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Security tools (Digital Signature and Digital Certificate) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: E-Commerce payment modes (12 Hours)**

- 4.1 E-Payment Systems Introduction (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2 Online payment& Prepaid and Post paid payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Types of Electronic Payment System (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.4 Security issues on Electronic payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.5 Net Banking & Mobile Commerce. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 4.6 Requirements metrics of a payment system (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Tally (Theory) (12 Hours)**

- 5.1 Introduction of Tally Accounting and Inventory an outline (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Fundamentals of accounting, accounting terms, (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.3 Definitions Ledger and ledger accounts Trial balance (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4 Trading and profit and loss account Balance SheetFundamentals of Inventory (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.5 Account creation, Account Information, Groups (create,display, delete) (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6Multiple groups ledger (create, display, alter) Multiple ledger Inventory master creation stock groups and stock items Entering Vouchers and Invoices Different types of Accounting vouchers and Inventory Vouchers,Reports in tally Balance sheet, Profit and Loss Account, Trial Balance, Day Book Ratio Analysis, Reconciliation of Bank account,

Interest Calculation (Simple Mode) (K<sub>1</sub>,K<sub>2</sub>,K<sub>3</sub>,K<sub>4</sub>)

**Unit VI: Practical (12 Hours)**

1. Profit & Loss Account and Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
2. Trial balance and Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
3. Bank reconciliation (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
4. Stock summary and Profit and loss Account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
5. Interest receivables and payables (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Introduction to Accounting, Concepts & Conventions & Accounting Cycle (15 Hours)**

- 1.1. Meaning of Accounting, Definition of Accounting, Need and Steps in Accounting. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Advantage and limitations of Accounting, Groups interested in Accounting and Branches of Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3. Concepts and Conventions of Accounting, Classification of Various concepts and Conventions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4. Double Entry System- (Accounting Equations, Rules pertaining to Accounting equations), and Accounting Cycle. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.5. Journal: Recording of transactions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Ledger- Classification of transactions. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Trial Balance, Subsidiary Books & Bank Reconciliation Statements (15 Hours)**

- 2.1. Meaning of Trial balance, Definition, Objectives, Methods of Trial balance, Schedule of Debtors and Creditors and Errors not disclosed in Trial Balance. (K<sub>1</sub>, K<sub>2</sub>)
- 2.2. Problems (Trial Balance). (K<sub>3</sub>, K<sub>4</sub>)
- 2.3. Meaning of Subsidiary books, Types of Subsidiary books, Benefits, Methods of Recording and Posting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Accounting treatment of Subsidiary books. (K<sub>3</sub>, K<sub>4</sub>)
- 2.5: Meaning of Reconciliation, Need, Causes for difference and Methods of preparing Bank Reconciliation Statements. (K<sub>1</sub>, K<sub>2</sub>)
- 2.6: Preparation of Bank Reconciliation Statement. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Final Accounts with Simple adjustments (15 Hours)**

- 3.1. Introduction to Final Accounts, Meaning of Manufacturing Account and features of Manufacturing Accounts. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Trading Account Meaning and its Accounting treatment. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3. Profit & Loss Account Meaning and its accounting treatment. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.4. Balance sheet meaning, Classification of Assets and Liabilities and Adjustments. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5. Problems (Final Accounts without Adjustments). (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Problems (Final Accounts with Simple Adjustments). (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Depreciation Accounting (15 Hours)**

- 4.1. Meaning and Definition of Depreciation, Characteristic features of Depreciation. (K<sub>1</sub>, K<sub>2</sub>)
- 4.2. Objectives of Depreciation, Factors affecting the amount of Depreciation. (K<sub>1</sub>, K<sub>2</sub>)
- 4.3. Methods of providing depreciation – Introduction. (K<sub>1</sub>, K<sub>2</sub>)
- 4.4. Straight Line method Meaning, Merits and Demerits, Calculations for finding the Rate of Depreciation ( & More than one Asset). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Diminishing Balance method Meaning, Merits and Demerits, Simple problems. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Problems related to Depreciation. (K<sub>3</sub>, K<sub>4</sub>)

## **Unit 5: Single Entry System**

**(15 Hours)**

- 5.1.** Meaning, Definition, Characteristic Features and Limitations of Single Entry System.  
( K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.2.** Difference between Double Entry System and Single Entry System. (K<sub>3</sub>, K<sub>4</sub>)
- 5.3.** Ascertainment of Profit: Net worth method, Steps in calculating Profit or Loss.  
(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.4.** Conversion Method: Meaning, Need, Steps for conversion of incomplete records.  
(K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.5.** Net worth Method: Preparation of Statement of Affairs and Statement of Profit.  
(K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.6.** Conversion Method: Debtors Account, Creditors Account, Bills Payable Account, Bills receivable Account and preparation of Final Account. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Partnership Account –I (Fundamentals & Admission) (15 Hours)**

- 1.1. Definition, Meaning, Partnership deed. (K<sub>1</sub>, K<sub>2</sub>)
- 1.2. Accounts of partnership firm. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.3. Partners Capital account (Fixed & Fluctuating). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 1.4. Admission of a partner- Introduction, Goodwill –meaning, need & Factors affecting the value of Goodwill. (K<sub>1</sub>, K<sub>2</sub>)
- 1.5. Calculation of Sacrificing Ratio and Valuation of Goodwill. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 1.6. Problems of Admission of a partner (Capital account and Balance sheet). (K<sub>3</sub>, K<sub>4</sub>)

### **Unit II: Partnership Account – II (Retirement & Death) (15 Hours)**

- 2.1. Introduction to Retirement of Partner – Profit Sharing Ratio, Gaining Ratio, Difference between Sacrificing Ratio and Gaining Ratio and Treatment of Goodwill. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.2. Problems (Treatment of Goodwill). (K<sub>3</sub>, K<sub>4</sub>)
- 2.3. Comprehensive problems on Retirement of a Partner. (K<sub>2</sub>, K<sub>3</sub>)
- 2.4. Introduction to Death of a partner, Mode of payment. (K<sub>1</sub>, K<sub>2</sub>)
- 2.5: Calculation of Gaining ratio and share of Goodwill. (K<sub>2</sub>, K<sub>3</sub>)
- 2.6: Comprehensive problems on Death of a Partner. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit III: Branch Accounts (15 Hours)**

- 3.1. Meaning and objectives of Branch Account. (K<sub>1</sub>, K<sub>2</sub>)
- 3.2. Types of Branch Account. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3. Features of Dependent Branch. (K<sub>1</sub>, K<sub>2</sub>)
- 3.4. Debtors System (Dependent Branch System). (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5. Stock and Debtors System. (K<sub>3</sub>, K<sub>4</sub>)
- 3.6. Final Accounts System. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit IV: Departmental Accounting (15 Hours)**

- 4.1. Meaning, Need, Advantages of Departmental Accounting. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.2. Difference between Departmental accounts and Branch Accounts, Apportionment of expenses. (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3. Apportionment of Indirect expenses. Problems (K<sub>2</sub>, K<sub>3</sub>)
- 4.4. Departmental Trading Account (K<sub>2</sub>, K<sub>3</sub>)
- 4.5. Departmental Profit and Loss Account with indirect expenses (K<sub>2</sub>, K<sub>3</sub>)
- 4.6. Inter Departmental transfer at cost price. (K<sub>3</sub>, K<sub>4</sub>)

### **Unit V: Hire Purchase System (15 Hours)**

- 5.1. Meaning, Definition and characteristic features of Hire purchase. (K<sub>1</sub>, K<sub>2</sub>)
- 5.2. Difference between Hire purchase system and Instalment System. (K<sub>3</sub>, K<sub>4</sub>)
- 5.3. Calculation of Interest. (K<sub>2</sub>, K<sub>3</sub>, K<sub>4</sub>)
- 5.4. Journal in the books of buyer and seller. (K<sub>3</sub>, K<sub>4</sub>)
- 5.5. Ledger in the books of both buyer and seller. (K<sub>3</sub>, K<sub>4</sub>)
- 5.6. Default and repossession – Complete repossession. (K<sub>3</sub>, K<sub>4</sub>)

## **Course Syllabus**

### **Unit I: Basic concepts of Accounting** (9 Hours)

- 1.1 Definition, Objectives (K<sub>1</sub>, K<sub>2</sub>)
- 1.2 Groups interested in accounting information (K<sub>1</sub>, K<sub>2</sub>)
- 1.3 Branches, methods, Types, Bases of accounting (K<sub>1</sub>, K<sub>2</sub>)
- 1.4 Accounting Terminology (K<sub>1</sub>, K<sub>2</sub>)
- 1.5 Accounting concepts (K<sub>1</sub>, K<sub>2</sub>)
- 1.6 Conventions and Equations (K<sub>1</sub>, K<sub>2</sub>)

### **UnitII: Journal & Ledger** (9 Hours)

- 2.1 Journal, meaning and objectives (K<sub>1</sub>, K<sub>2</sub>)
- 2.2 Recording of transactions in journal (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.3 Ledger, meaning and its features and difference between Journal and ledger (K<sub>1</sub>, K<sub>2</sub>)
- 2.4 Posting of journal into ledger (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 2.5 Trial balance, meaning, objectives (K<sub>1</sub>, K<sub>2</sub>)
- 2.6 Preparation of Trial balance (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit III: Subsidiary Books** (9 Hours)

- 3.1 Purchase and Purchase returns Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.2 Sales and Sales returns Book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.3 Simple cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.4 Two column cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.5 Three columnar cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 3.6 Petty cash book (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit IV: Rectification of errors** (9 Hours)

- 4.1 Meaning, classification of errors (K<sub>1</sub>, K<sub>2</sub>)
- 4.2 Errors of casting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.3 Errors of carry forward (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.4 Errors of posting (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.5 One sided errors (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 4.6 Double sided errors (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)

### **Unit V: Final Accounts** (9 Hours)

- 5.1 Trading account, meaning, items appearing in Trading account (K<sub>1</sub>, K<sub>2</sub>)
- 5.2 Preparation of Trading account (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.3 Profit and Loss account, meaning, contents of P&L A/c (K<sub>1</sub>, K<sub>2</sub>)
- 5.4Preparation of P&L A/c (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
- 5.5 Balance sheet, classification of assets and liabilities (K<sub>1</sub>, K<sub>2</sub>)
- 5.6 Preparation of Balance sheet (K<sub>1</sub>, K<sub>2</sub>, K<sub>3</sub>)
