WORKSHOP ON SEED PEN MAKING

On 29th November 2019, the Enviro club (Shift-II) organized a workshop on "Seed Pen Making". All the Enviro club members actively participated and nearly 60 seed pens were prepared. These seed pens not only reduced plastic waste but also contained seeds of various plant. Various charts and pluck cards were displayed in the campus to create awareness on "Avoid plastics". The seed pens

were distributed to the students.

NSS volunteers distribute seed balls; plan for greener environment in district in 2 years

EXPRESS NEWS SERVICE | **green**

STUDENTS attached to the NSS unit of the Auxilium College here have launched a project to make the district green in their own way. On Monday, over 500 students began distributing seed balls to the public and fellow students.

The event was inaugurated by the college principal Dr Regina Mary. This is the first time the NSS unit has taken up the green project in collaboration with a local NGO, Samaritan Trust, led by Archbishop. The trust has helped in the preparation of the seed balls using the native seeds of neem and pomegranate, said NSS

Student volunteers preparing seed balls at Auxilium college in Erode on Monday | EXPRESS

programme officer Dr Anantha.

"We are planning to distribute around one lakh seed balls every year to locals as well as to students through the NSS so that they could throw the seeds to 'grow green' in their neighbour-

hood," she said. The project was targeted to sensitize and involve students on environmental issues, added Anantha.

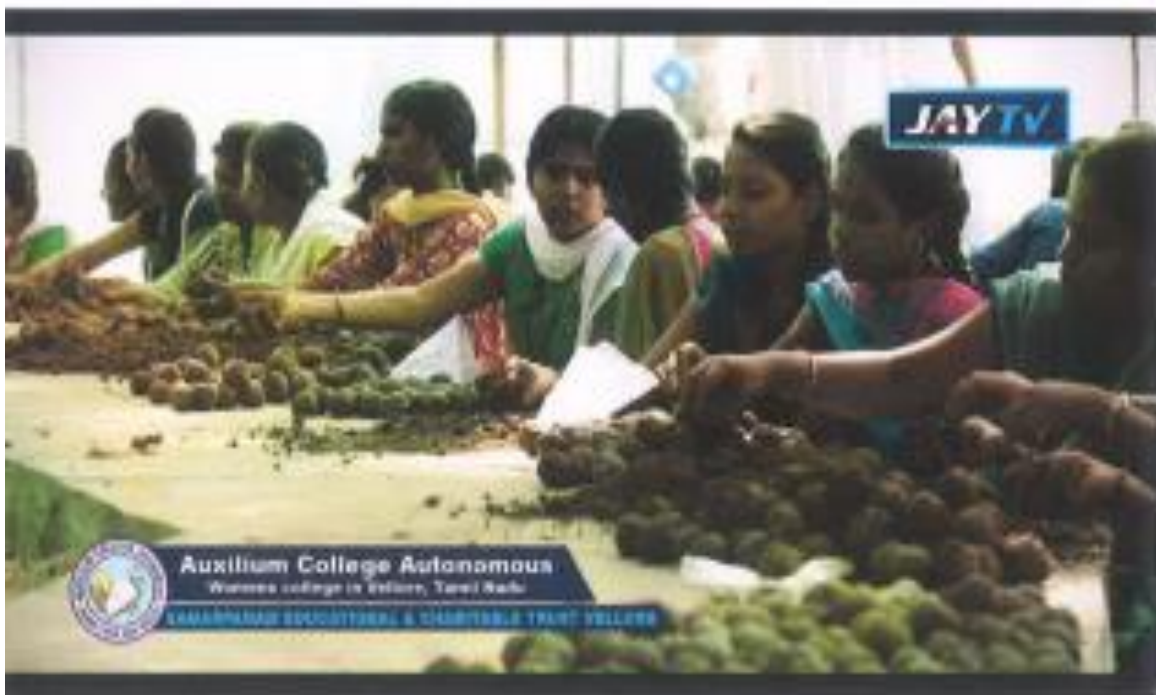

One of the students said they would also be distributing the seed balls in places of worship in and around the district as justification for a long-term benefit. The NSS unit also plans to throw seed balls in Changanathur, Palani, Athi and Sathuvachari hills, as part of the project. Greening of the hills will help the city in bringing down its temperature during summer.

In the third week of October when students would complete their exams, the NSS unit would resume the distribution of seed

balls to accomplish the target of one lakh seed balls this year, said Anantha. The project would go on for the next two years to complete the distribution of 3 lakh seed balls and was expected to have a considerable impact on the environment of the district, she added.

Archbishop of the Samaritan Trust said the trust had been helping the students in preparing seed balls at the college campus. "We provided the seeds and gave the know-how on preparing the seed balls," he said. Through its cousin's launch the project last year due to various reasons, from this year, we would be able to achieve our target," he added.
