Step: 4.0.0 (Exam Registration Process)

Step: 4.0.1

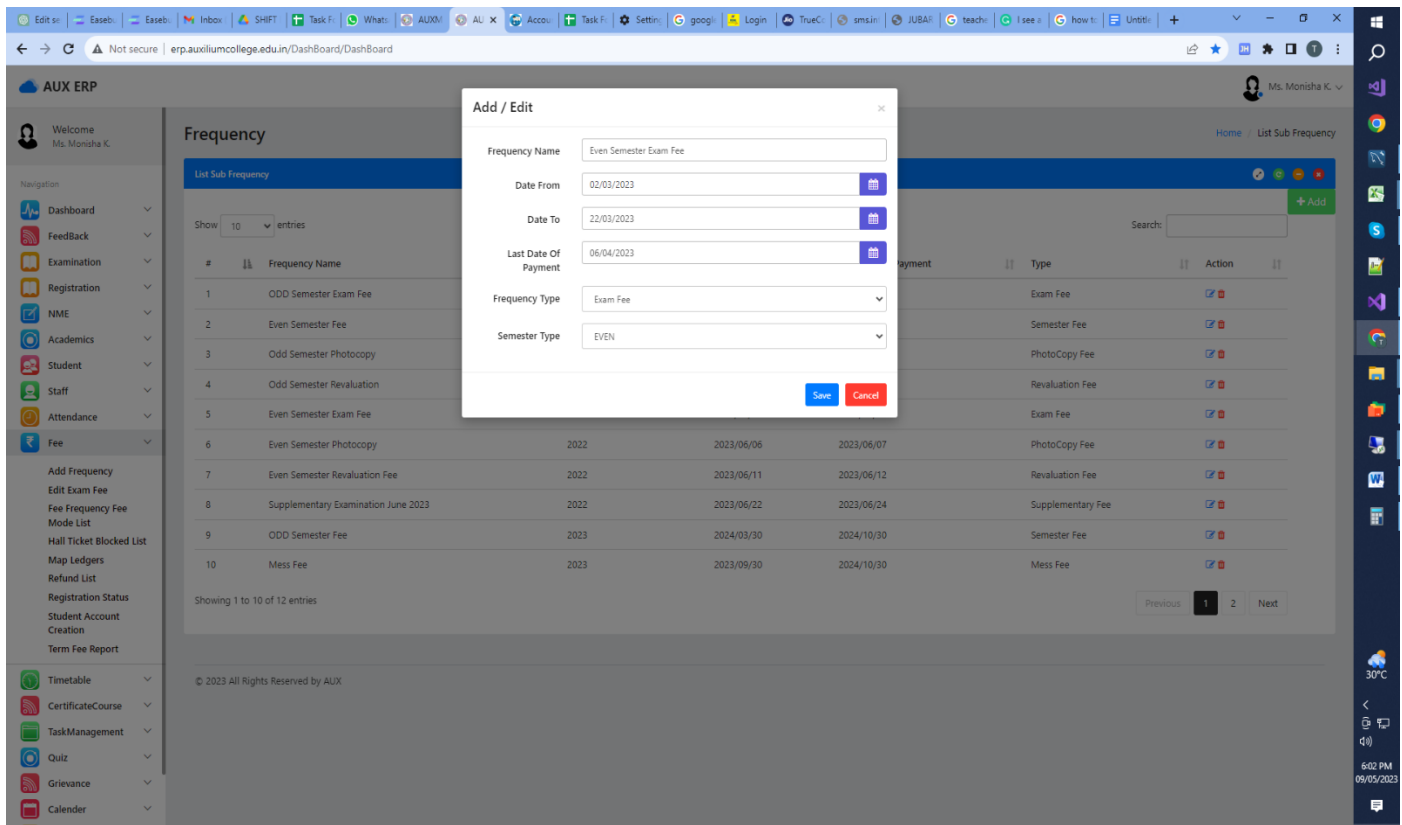

Task Title: Create a Fee Frequency for Exam Fee

Purpose of the Task:

Creating a fee frequency with exam setting serves several important purposes, especially in the context of managing financial transactions and billing processes within an organization.

Image 1:

Notes: Please refer to the following image for instructions on how to add the fee frequency for exam settings

Step: 4.0.2

Task Title: Map ledgers

Purpose of the Task:

Fee map ledgers often integrate with other modules within the ERP system, such as accounts receivable and accounts payable. This integration streamlines fee-related processes, reduces manual data entry, and minimizes the risk of errors

Image 1:

Notes: The following image refers to the necessary mapping of ledgers, including which heads are used for online fee collection and to which accounts those heads are related for settlement. This mapping is done using this page exclusively.

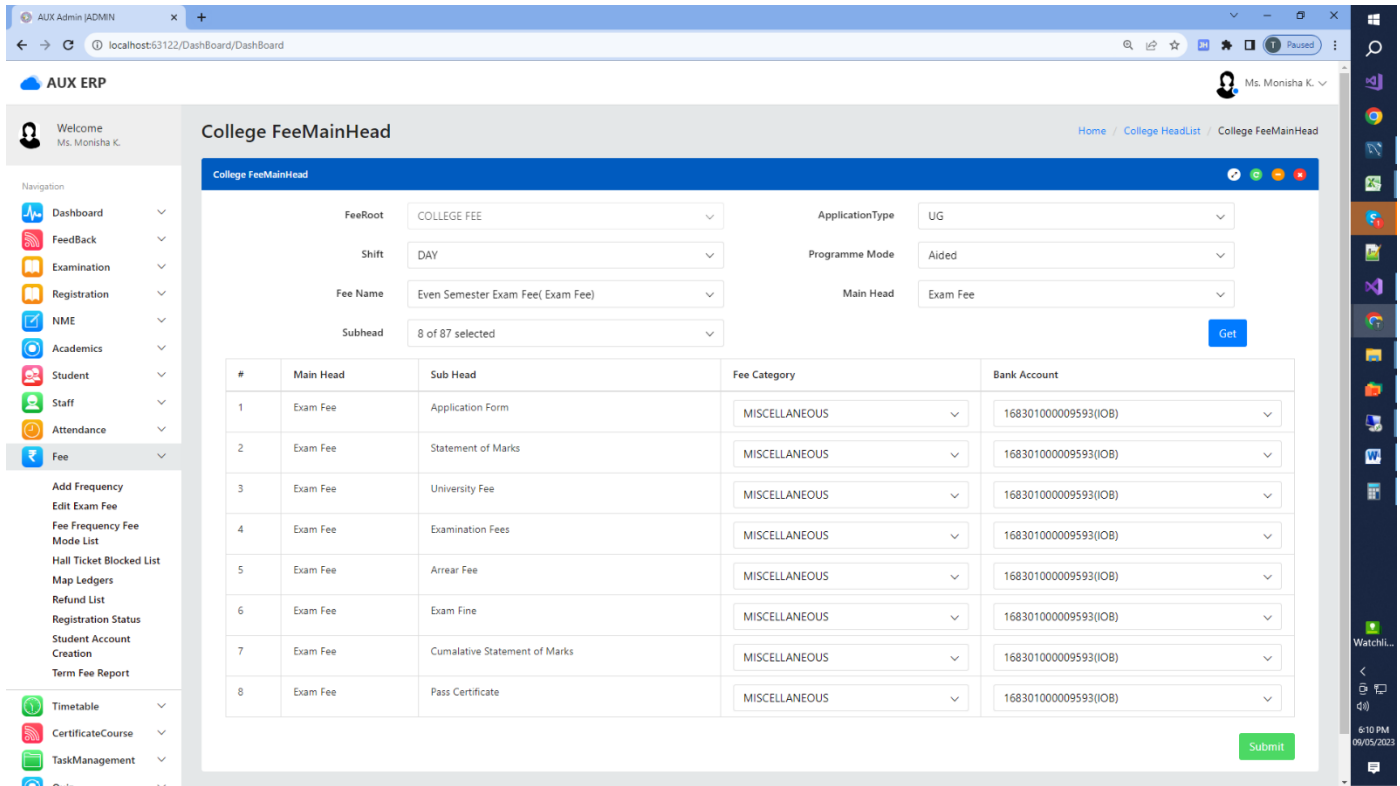

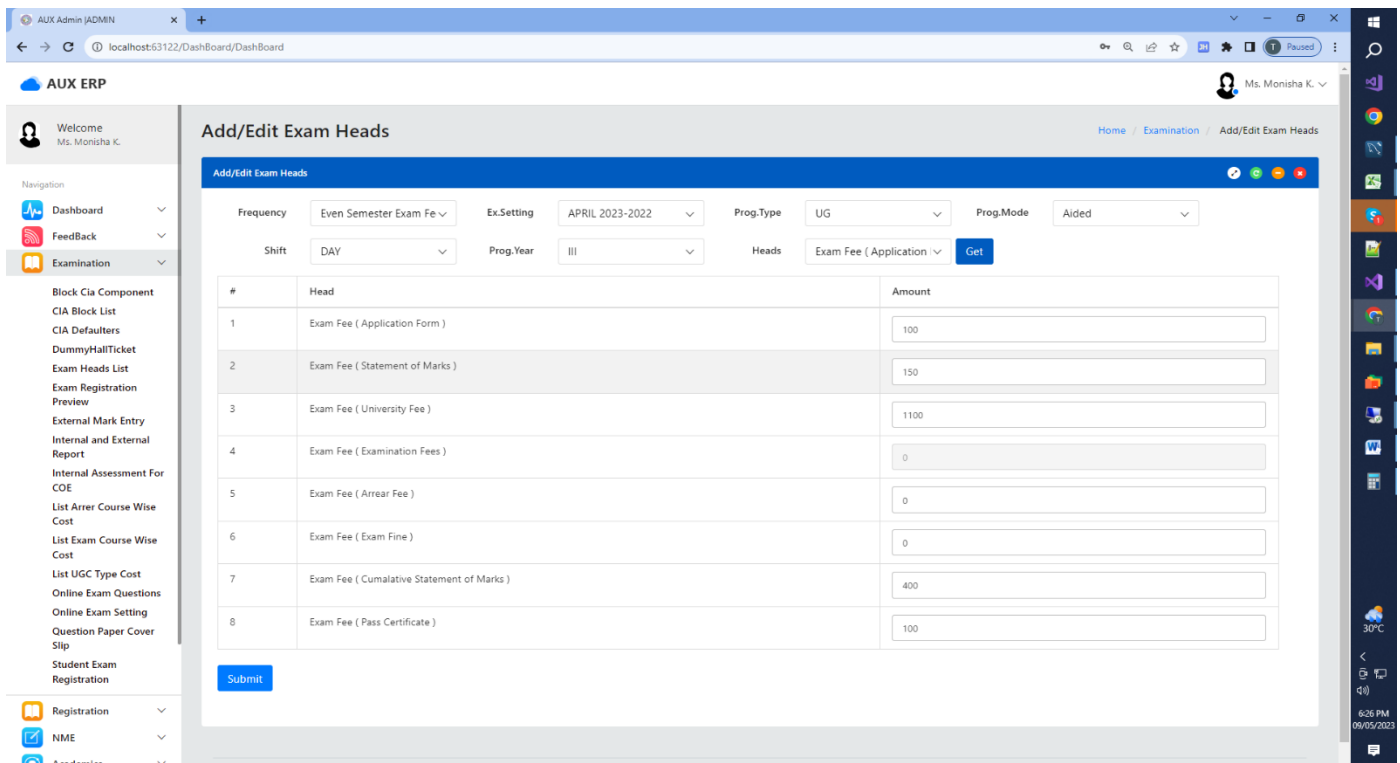

Image 2:

The following image is used to add or edit fees related to the head based on exam settings, application type, shift, class year, and mapped heads. The examination fee is not editable because the examination head amount varies for every student.

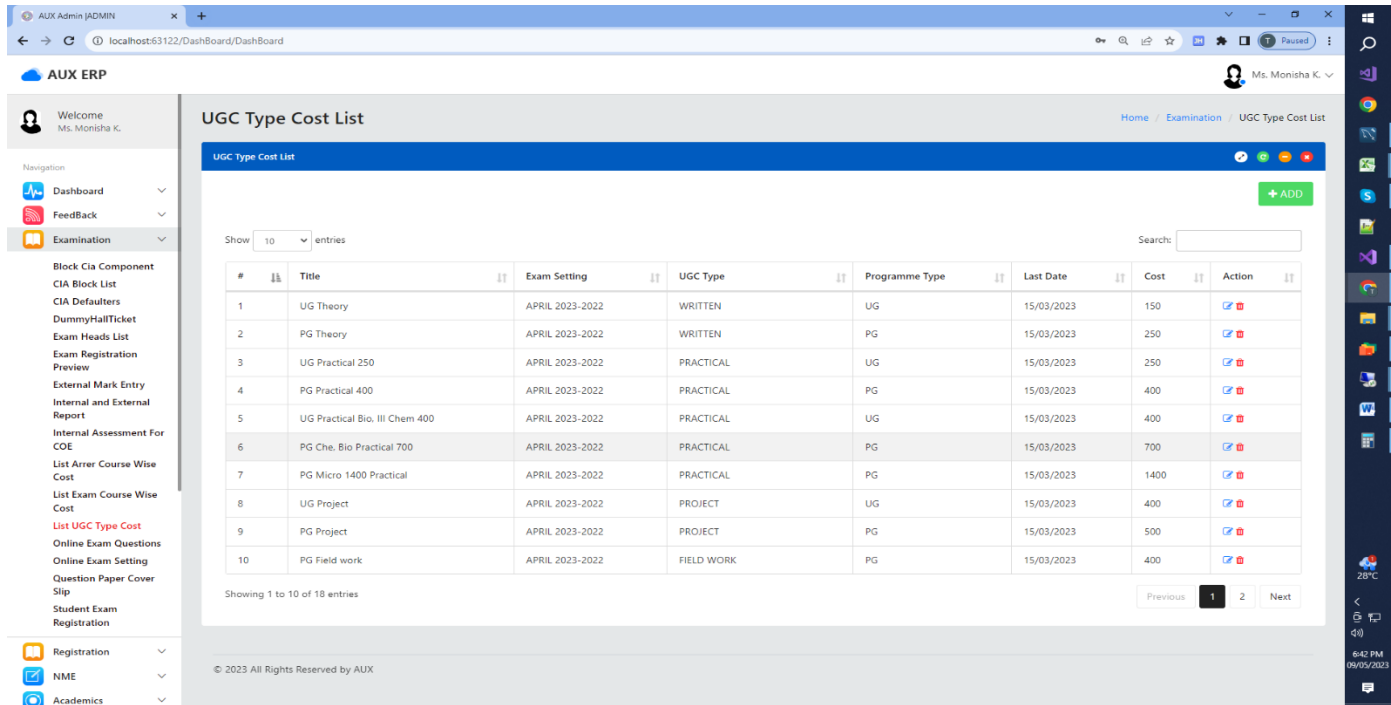

Step: 4.0.3

Task Title: UGC Course Wise Cost

Purpose of the Task:

This is used to define the cost of a specific UGC Course type, and it is helpful during the student exam registration stage.

Task Title: Exam mark packet setting

Purpose of the Task:

Exam mark packet setting plays a significant role in the allocation of exam settings, the exam packet process, and the exam timetable. It is primarily associated with the process of generating exam results.

Image 1:

Notes: The following image displays a sample Exam Mark Packet Setting categorized by Exam Setting and Application Type. A student's passing status is

determined based on the internal pass mark, external pass mark, and total pass mark settings on this page. The Exam Course Type is defined in the course root.

The screenshot shows the AUX ERP interface for the Exam Packet Process. The main content area displays a table of exam settings for APRIL 2022, categorized by App Type (UG). The table includes columns for Course Type, Exam Name, Internal Passmark, External Passmark, Total Pass Mark, and Packet Count. A sidebar on the left lists various system functions, and a search bar is visible at the top right of the table area.
